

The Game 241

Chapter 241: Can You Buy Other Versions of Things From TV Shopping? 1

Qin Lin locked the door and appeared in the game with a thought. He saw the package.

It looked no different from a real delivery package, but when he saw the delivery slip, he was stunned.

From: Olive Town

Product: Special sexy stockings from Olive Town.

“It’s actually from Olive Town?” Qin Lin asked in surprise.

This new game was clearly an adaptation of Ore Town. The game characters had appeared at Ore Town’s ranch.

And Olive Town was another version after Ore Town.

Now that the game characters were shopping on TV, they were actually buying stockings from Olive Town?

Was this a dream combination created by the game designer when he was developing it? Or was it because of the system?

Qin Lin didn’t dwell on this now. He would know if it was a dream link after going to the game forum. If it was a dream link planned by the game company, many players would definitely discover this surprise.

If it was because of the system, that would be interesting. After all, there were a lot of good things in other versions of Ranches Story. They might all be available through TV shopping.

Qin Lin thought about it and took a small knife to open the package.

The stockings were lace-black. Although they were still unopened through the packaging, he knew from the lace and the light that they were his type. They were definitely sexy.

[Sexy stockings: Quality 1]

[This is a very sexy stocking. It’s an elaborate product from Olive Town: texture +1, comfort +1, sexiness +1, seduction +1, hook desire+1, tear resistance +1, tear excitement +1!]

Seeing the note on the stocking, Qin Lin inexplicably smiled.

He had previously wondered if the silk thread processing machine had a chance to process a Quality 1 silk stocking and what attributes it would have.

He did not expect to buy Quality 1 stockings online on television.

Besides, weren’t these attributes what stockings should have?

Not to mention the texture and comfort.

Sexiness and seduction were added exactly to the right attribute points.

Tearing was not a good attribute, but adding the tearing excitement attribute seemed to be very fun.

Qin Lin took the stockings and eagerly logged out of the game. Naturally, he was just anxious to verify if the things online could be brought to reality.

It turned out to be possible, so he went back to the bedroom immediately and locked the door.

A moment later, Zhao Moqing came out of the bathroom in her pajamas.

"Here." Qin Lin pretended to casually hand the stockings in the game to Zhao Moqing.

"Stockings?" Zhao Moqing was puzzled.

"Yes, I bought it for you to see if it's suitable. If it's not, I'll return it." Qin Lin looked forward to it.

It was not that he had never seen Zhao Moqing wearing stockings, nor had he never torn them.

But this was a game with additional attributes, right?

"Why would a man like you buy stockings? I can buy..." As Zhao Moqing spoke, she opened the package and saw that it was actually a sexy design. She rolled her eyes at Qin Lin. "Men..."

Qin Lin said with a sly smile, "Try it. Let's see how sexy my wife looks in it."

"Hmph!" Zhao Moqing snorted proudly and sat down to put it on.

At home, if a man wanted to be ridiculous, so be it. After all, a married couple needed some romance.

"This silk is good. It's very comfortable to wear," Zhao Moqing said in surprise.

After all, it was texture +1, comfort +1.

A moment later, Qin Lin pounced forward.

...

The night passed.

The next day, Qin Lin woke up satisfied. He was just a little tired from last night.

However, the combination of tearing +1 and tearing excitement +1 was really exciting. Therefore, he immediately looked at the screen in his mind to control the game character to go to the television to buy a few more pairs.

But this time when they got to the TV, it was showing a newscast. It wasn't a shopping show at all.

The new version of the shopping show was also apparently refreshed at random.

Qin Lin was vexed. Why didn't he buy more pairs yesterday?

All he could do now was wait for the shopping show to refresh again. He just didn't know if it would be stockings next time, if not how soon it would be refreshed again.

Zhao Moqing also woke up.

Men get tired after a night of fun. Women never do.

"You're awake?" Qin Lin came back to his senses and looked at her with a smile. "I'll buy a few more pairs of stockings for you when I have time."

Zhao Moqing rolled her eyes at him. "Mom should be up. I'll get up and help her cook porridge."

She got up and changed, then picked up the tattered stocking and dropped it in the trash.

This was the first time she had seen Qin Lin so excited last night.

Qin Lin looked at Zhao Moqing's legs and wanted more. Then, he looked at the screen in his mind that controlled the game character to pick today's crops.

After he was done, he picked up his phone and logged into a certain voice to scroll through a few videos. After scrolling through a few videos, he realized that there was something about the villa. Moreover, there was indeed a mention of sandalwood incense.

After a night, those who had used it would definitely know the effect. When faced with that effect, they would definitely want to post it on their WeChat Moments and share it.

Indeed, early in the morning, surprised voices sounded in the bridal chamber of Qinglin Villa.

"You slept so well last night."

"Indeed. I'm just here to give it a try. I didn't expect the incense in Qinglin Villa to be so effective."

"I haven't slept so soundly in a long time."

"..."

Those who stayed in the bridal chamber last night and did not choose the other two medicinal wine benefits basically received the benefits of sandalwood incense powder.

Chapter 242: Can You Buy Other Versions of Things From TV Shopping?

After all, the bridal chamber cost 350 yuan a night. As long as they booked the bridal chamber, they would have spent 200 yuan and could receive benefits for free.

Wan Gu woke up early in the morning and stretched lazily.

He had not slept so comfortably since he started writing novels. For the past month alone, he had only slept at 2 or 3 a.m.

He had a really comfortable sleep last night. What made him even happier was that the welfare incense he had received could be used more than ten times. The key was that he had even bought a few portions from other tourists who had received the incense powder.

The tourists who did not care about this were probably going to regret it.

After leaving the bridal chamber, he saw Wang Yang and Su Juan walking out of the bridal chamber opposite. Su Juan, who was dressed in female clothes and a naughty hat with light makeup, made him take a few more glances.

She looked like a very virtuous girl and was also beautiful. He was really envious of Wang Yang. How could he find such a girlfriend?

“Wan Gu, you’re awake too?” Wang Yang saw Wan Gu and greeted him with a smile. “You slept very well last night, right?”

“Yes.” Wan Gu nodded. “The effect is very strong. If only I could buy more and light some everyday. Insomnia is really very painful.”

Wang Yang shook his head and said, “I know Qinglin Villa very well. Their things are usually very few or limited. It’s very difficult to buy them.”

Wan Gu asked, “It shouldn’t be difficult to buy sandalwood on the market, right?”

Wang Yang teased, “There’s a lot of sandalwood on the market, but have you seen anyone say that sandalwood is helpful for sleeping? It seems like it’s been debunked by an expert professor in the past. It’s also sandalwood, but there’s also quality, right?”

As he spoke, he picked up his phone and opened Weibo. He logged into his account and wanted to send a video to share the effects of the sandalwood incense.

However, when he opened it, he was stunned to discover that the villa’s sandalwood fragrance had already become a trending topic.

He was too late again.

“These people are so fast?” Wang Yang could not help but be stunned. In the end, he could only invite Wan Gu helplessly. “It’s been a long time. Let’s go for breakfast together. By the way, what book did you write? I’ll go take a look and tip you.”

...

The train station.

The two old men got out of the train early in the morning and walked to the waiting area.

“Old Ren, are you really not going to get someone to pick you up?”

“Old Liu, we don’t have to trouble him. Let’s take the car over.”

These two people were Professor Ren and Professor Liu, who had been entrusted by Li Kai to be the middleman in Ming City.

The two young men followed the two professors with the briefcase in their hands.

They were experimental assistants to the two professors.

When Professor Ren arrived at the waiting area, he looked at the dense queue and was shocked. “Old Liu, did we sit at the wrong station? Is this really a station in a small county?”

Professor Liu explained, "You're so focused on doing experiments every day and don't pay attention to Qinglin Villa. There are more tourists than you think. They're famous in Ming City."

After a while, it was their turn. They got into two cars.

As soon as Professor Ren and Professor Liu got into the car, the middle-aged driver in the car asked, "Are you two going to Qinglin Villa?"

Professor Ren said in surprise, "You can tell?"

The driver started the car and smiled. "I see that the two of you are traveling light and have young lackeys behind you. Most people should be going to Qinglin Villa to play."

Professor Liu smiled and asked, "What if we're not going to Qinglin Villa?"

The driver smiled and said, "Then I'll suggest that the two of you go to Qinglin Villa to play. Now that you're in Youcheng County, if you've never been to Qinglin Villa, then you're not considered to have been here."

"Moreover, Qinglin Villa is indeed very fun. I've also brought my wife and daughter to see the Triangular Plum Blossom Sea. As a man, even I was mesmerized by the scenery of the Sea of Flowers. It's also very fun to drift... But at your age, I won't go to play."

"This Qinglin Villa seems really good." Professor Ren and Professor Liu looked at each other.

They were old and smart, so they could naturally tell that the driver's praise for Qinglin Villa was sincere.

However, the driver continued, "But you're a little late. If you had come yesterday, Qinglin Villa would have been lively. Moreover, there were benefits to receive. There was medicinal wine to nourish the kidneys and treat hemorrhoids, and incense powder to help sleep."

"If the two of you have been paying attention to the news on the Internet, you should know that these three things in Qinglin Villa are very effective. The tourists have already confirmed it. Several passengers I pulled in yesterday were very excited."

The driver clearly sounded proud.

Although he was not an employee of Qinglin Villa, he was also earning from this industrial chain affected by Qinglin Villa. Naturally, he had the mentality of a host.

"I also find it unbelievable that medicinal wine is actually effective in treating hemorrhoids," Professor Ren replied with a smile.

He had come to verify the effect of the Qinglin Medicine Wine. Firstly, it was for his scientific curiosity. Secondly, it was to completely resolve the misunderstanding with Qinglin Villa.

From the reaction online, the medicinal wine seemed to be very effective, but he still wanted to verify it himself.

The car soon arrived at Qinglin Villa.

After the two of them got out of the car, the driver kindly reminded them, “Brothers, remember to take photos and videos at the entrance of the villa. That sign board is made of top-notch Chinese rosewood. It’s written by a top-notch master in the country, Chen Fengwu. It’s worth more than a million yuan. It would be a waste not to clock in.”

Chapter 243: Can You Buy Other Versions of Things From TV Shopping?

“Okay, thank you, Master.” Professor Ren smiled and waved goodbye to the driver. Then, he said to Professor Liu, “The driver of Youcheng County is very enthusiastic.”

Professor Liu smiled and said, “He’s not stupid. He relies on the tourists of Qinglin Villa to make a living. Besides, how much economy can so many tourists promote? If the leaders of Youcheng County aren’t stupid, they’ll definitely pay more attention to training in this area.”

As they spoke, they walked into the villa and saw the sign.

At this moment, a long line had already been taken under the sign board. Tourists were queuing up to take photos, and there was a security guard beside them to maintain order.

Professor Liu smiled and teased, “We haven’t entered the scenic area yet. This scene is really rare.”

“This writing is indeed very good,” Professor Ren praised.

As the two of them stepped forward, another security guard came over and reminded them, “Sirs, if you want to take a video and clock in, please queue up in order. If not, you can enter the villa directly from the two roads beside it.”

Professor Ren and Professor Liu naturally weren’t interested in the way these young people checked in at the scenic spot. They directly entered the villa from another path.

Professor Liu entered the villa and took out his phone to call Li Kai.

Early in the morning, Li Kai had already entered the backyard of the villa’s original hall. He could see that there was already a shed in the backyard with some instruments inside.

The shed was built by Chen Dabei, and the equipment was arranged by his nephew, Li Qing, from the research institute.

This watermelon could grow out of season without relying on the greenhouse. It was very helpful to his experiments. Now, he comes over early every morning.

As he was extracting the chlorophyll from the watermelon vine, his phone rang. When he saw the number, he immediately picked it up. “Director Liu, it’s so early. Don’t tell me you’ve arrived at the villa?”

Professor Liu’s voice sounded. “You’re right. Professor Ren and I have arrived. We’re at the entrance.”

“I’ll be right there.” When Li Kai heard his superior’s words, he immediately hung up and walked out. When he arrived at the entrance of the villa, he saw Professor Liu and Professor Ren. “Director Liu, Professor Ren.”

Professor Liu immediately introduced, “Old Ren, this is Li Kai. He’s an associate professor at my research institute and is already evaluating professors. He’s just short of a thesis.”

“You’re young and promising,” Professor Ren praised Li Kai with a smile.

Professor Liu also said, “Li Kai, I wonder if Boss Qin is free now? Old Ren wants to see him and see the medicinal wine for hemorrhoids.”

Li Kai explained, “I don’t know if Boss Qin has arrived at the villa at this time. After all, he’s very busy. If Professor Ren wants to see that medicinal wine, I happened to receive a benefit yesterday. I can show it to Professor Ren first.”

Naturally, he knew that Brother Qin should be at the villa’s office now. However, he also knew the most about Professor Ren and Qinglin Villa.

He naturally wanted Professor Ren to know the effect of this medicinal wine first. After all, Professor Ren was an academic person, but sometimes, he would inexplicably fuss about it.

This was because he was such a person. If he let Professor Ren know the effect of this medicinal wine first, such an academic fuss could be avoided. After Professor Ren saw Brother Qin, he could only ask him for help, just like how he had asked to study watermelons previously.

He had experienced it himself, so he naturally knew how to deal with it.

“Alright, then bring me to take a look.” Professor Ren did not think too much about it and immediately nodded.

“Professor Ren, please.” Li Kai led the way and led Professor Ren and the others to the first bridal chamber.

Li Kai entered the bridal chamber and took out a 30ml bottle of medicinal wine. It was the benefit the villa had given to the tourists yesterday.

Li Kai handed the medicinal wine to Professor Ren. “Professor Ren, this is the Qinglin Medicinal Wine that can treat hemorrhoids. It’s very effective.”

At this moment, Professor Liu asked, “Old Ren, shall we find a place to take out the equipment we brought and verify this wine?”

Professor Ren shook his head and said, “There’s no need for that. There’s a faster way.”

“???” Professor Liu looked puzzled.

Professor Ren opened the medicinal wine and poured it into his mouth.

Professor Liu instantly understood.

Chapter 244: Upgrade Again! The Ranches Are Open!

As the saying went, nine out of 10 men and 10 out of 10 women had hemorrhoids. This meant that the rate of hemorrhoids was very high, and it was even harder to guard against it.

Furthermore, some professions that stood for a long time, sat for a long time, and had irregular schedules also had a higher rate of hemorrhoids than others, such as teachers, drivers, police officers, programmers, scientific researchers, and so on.

Professor Ren was a researcher.

Therefore, wasn't it easy to verify the effect?

He was using his own body to verify it. It could be considered a sacrifice for scientific research.

After drinking half of the 30ml of wine, Professor Ren stopped in surprise.

This was because the medicinal wine tasted surprisingly good, as if it was old. Then, he picked up the rest of the wine and drank it in one go.

When Li Kai saw that the 30ml of wine was gone just like that, his heart ached inexplicably.

That wine could be used three times.

After drinking the wine, Professor Ren said to the laboratory assistant behind him, "Help me calculate the time. I want to see the exact time this medicinal wine takes effect."

The tourists who posted videos online said that the effect was very strong and that it would work 'immediately'. However, they did not specify the time.

The assistant in the back immediately opened his briefcase when he heard the instructions. He took out an experiment log and a pen, then took out his phone to calculate the time.

But a moment later, Professor Ren looked shocked. "Um... let's write 'immediately' for the effective time."

He now knew what the tourists meant by "immediately".

This was really immediate.

Because he could already feel the effect behind it.

Now, he wanted to see how long it would take for the hemorrhoids to completely subside and improve.

"Professor Ren, then let's not just wait around. I'll bring you to the Sea of Flowers in the villa first?" Li Kai suggested at this moment.

According to his experience of drinking this wine, Professor Ren's hemorrhoids would improve after touring the Sea of Flowers.

Professor Ren did not object. "Xiao Li, sorry to trouble you."

...

Qin Lin had gone a little crazy with Zhao Moqing last night because of the stimulation of the stockings.

He was still a little tired after breakfast today, so after moving his things out of the warehouse and to the villa, he made himself a cup of medicinal honey water.

Unfortunately, the medicinal honey water's attribute of relieving fatigue +2 was useless against his fatigue.

Weren't they all tired? How could there be a difference in treatment?

When he arrived at the office, Qin Lin lit up a little agarwood incense.

As the pleasant fragrance dissipated, he logged into the villa's application management program and checked a few public emails.

These public emails were either notices sent by Zhao Moqing or work reports summarized by the various departments yesterday or some applications.

There were some things he had to deal with, and he would deal with them immediately. After reading these public emails, he opened the website and logged into the forum for the new version of Ranches Story.

After discovering last night that the stockings for television shopping were actually produced by Olive Town, he wondered if it was a dream connection planned by the game company or because of the system.

This could be found in the game forum.

If it was a dream joint event planned by the game company, with the ability of those hardworking players, someone should have long discovered this joint event.

However, after logging into the forum, Qin Lin flipped through the pages but did not find any posts related to stockings and Olive Town.

In other words, this might not be a dream connection planned by the game company, but because of the system?

Qin Lin did not jump to conclusions. He posted another thread titled "You can buy stockings in Olive Town on television."

Someone quickly replied:

1st comment, Hollywood: Has the original poster worked hard enough to get a new Easter egg? There's no picture or evidence!

2nd comment, Heaven Supreme: I've already looped a list of television shopping. There are no stockings at all.

3rd comment, Red Dust Passerby: I think you're thinking too much about stockings. The game company doesn't seem to have the copyright to Olive Town. It's impossible to add elements of Olive Town.

...

Qin Lin looked at the increasing number of replies and could completely confirm that the products the game characters bought in Olive Town on television had nothing to do with the game company.

Then it really had something to do with the system.

He returned his attention to the game character in his mind and controlled it to go to the television.

This time, the television screen in the game turned into a news column:

[Recently, a rare fossil was discovered in Honey Village...]

“Honey Village?”

Honey Village was also a version of Ranches Story, like Olive Town.

There were also many good things in this version. Did this mean that he could buy them on television in the future?

As Qin Lin was thinking, he heard a knock on the office door. He immediately said, “Come in.”

The office door opened and Li Kai walked in with four people.

Furthermore, he recognized Professor Ren behind him.

Was this person already here?

“Brother Qin, Professor Ren and Professor Liu from our institute are here.” Li Kai entered the office and introduced them to Qin Lin.

Professor Ren was clearly stunned when he saw Qin Lin.

Although he had already heard from Li Kai that Boss Qin was very young, he was too young.

“Professor Ren, Professor Liu, welcome, welcome.” Qin Lin immediately stood up and welcomed them into the office warmly.

People like Professor Ren and Elder Yuan were truly elders who were obsessed with scientific research, unlike those brick artists on the Internet who called themselves beasts.

Furthermore, not only did Professor Ren make a major contribution in the previous disaster, but he also became one of the praised heroes.

Chapter 245: Upgrade Again! The Ranches Are Open!

He had also developed a drug that was not available domestically. As soon as this drug was released, it directly reduced the price of similar drugs domestically and abroad. Foreign drugs had no choice but to be covered by health insurance.

Countless people benefited from this.

Qin Lin always admired such people from the bottom of his heart.

“Boss Qin is really young and promising.” Professor Liu sighed.

Professor Ren said in embarrassment, “Boss Qin, I’m really sorry about what happened online previously. I didn’t know when the video was uploaded online.”

“Professor Ren, since it’s a misunderstanding, why mention the past?” Qin Lin immediately waved his hand and led Professor Ren and the others to the tea table. “Professor Ren, sit down. I’ll make tea for you.”

Li Kai sat down without hesitation. “Professor Ren, I told you that Brother Qin is a very open-minded person. He won’t take the past to heart.”

“I’m the one who’s still caught up in it.” Professor Ren smiled and nodded.

He could naturally tell that Boss Qin’s attitude was not fake.

Sincerity could touch people. If it was an act, he could tell at a glance.

Professor Liu looked at Qin Lin, who was focused on making tea, and could not help but praise, “There aren’t many young people like Boss Qin.”

Professor Ren nodded in agreement.

After the two professors sat down, they soon smelled the pleasant fragrance floating in the office. They even felt that the mental fatigue from the entire journey was gone. Their bodies were comfortable, and they felt refreshed.

This made the two of them look at each other and guess that this must be the top-notch incense. Boss Qin actually had such a thing.

However, they did not want to pry into this. After all, this had nothing to do with them.

Qin Lin made tea and poured a cup for Professor Ren and the others before saying, “Professor Ren, have some tea first. I’ll get the medicinal wine later and accompany you to verify the effect.”

When Professor Ren heard this, he hurriedly said, “Boss Qin, there’s no need to verify it. Xiao Li has already verified the medicinal wine with me. The effect is very strong. I’m really ashamed of the previous video.”

Qin Lin smiled and said, “Professor Ren, I already said not to mention what happened before. Otherwise, I won’t invite you here.”

“Alright, I won’t mention it,” Professor Ren replied with a smile. Then, he asked in embarrassment, “Boss Qin, actually, I have a presumptuous request. Can I stay in the villa for a while to study your medicinal wine? I guess there’s some kind of scientific denaturation element in your medicinal wine.”

Professor Ren was clearly anxious.

This was because he had already experienced the Qinglin Medicine Wine himself. Even he, an expert in this field, was shocked by its effect, okay?

He drank 30ml of wine and strolled out of the Triangular Plum Blossom Sea. His hemorrhoids completely improved.

If he could study what the denaturation element in that medicinal wine was, he might be able to develop a special medicine that was very effective for hemorrhoids. It could also greatly promote other aspects of life health science.

“Professor Ren, that’s not a problem. I’ll get someone to arrange a place for you to stay.” Qin Lin naturally did not refuse Professor Ren’s request.

He hoped that Professor Ren could study the denaturation element from this medicinal wine. In that case, there would be a lot of things in the game. Would he be able to use it for similar research in the future?

Naturally, it would be best if Professor Ren could develop any more hemorrhoid medicine.

After all, hemorrhoids were torture to everyone.

Most importantly, the medicine developed by Professor Ren’s department could really benefit everyone.

That was a scientific research department directly led by the country. It was either to earn money or to benefit the people.

One of the drugs his father used for cancer was the kind that Professor Ren had developed in this department. Then it went into health insurance and was 20 times cheaper than similar drugs.

Now, those similar medicines had no choice but to enter health insurance and reduce the price by 20 times.

If not for Professor Ren’s medicine, his family might have owed even more. His father might not have lasted that long.

Many of the drugs that entered health insurance had dropped their prices drastically. Was it because those pharmaceutical companies had a conscience? That was because there was a country behind them. Professor Ren’s department was constantly working hard.

It was precisely because he had received a favor that he decisively agreed to Professor Ren’s request.

After all, a medicinal wine for hemorrhoids did not affect him much.

He did not need to earn money from this now.

Furthermore, even if Professor Qin really researched the medicine to treat hemorrhoids through this denaturation element, it might not be comparable to his medicinal wine.

In the eyes of many people, his method might be very stupid. Some people might even label him brainless. They might think that if he gave his things to others to study, others might take them to earn money.

But compared to such possibilities, he believed more in heroes like Professor Ren and the country.

He was not the kind of person who enjoyed the welfare of the country, enjoyed the favors of the country, lived in peaceful land guarded by the country, and cursed at the country and questioned it in all kinds of ways.

When Professor Ren saw that Qin Lin agreed so readily, he was stunned. “Boss Qin, you agreed just like that? If I use this to research a medicine to treat hemorrhoids, aren’t you afraid that it will affect your wine?”

Qin Lin had long understood this question, so he naturally did not care. "Professor Ren, it's just wine. I really hope you can develop a medicine for hemorrhoids that can benefit everyone."

Chapter 246: Upgrade Again! The Ranches Are Open!

When Professor Ren heard this, he looked at Qin Lin differently. He had not met such a young man in a long time.

He could naturally tell that Boss Qin really did not care and spoke very frankly.

Professor Ren also promised, "Boss Qin, don't worry. I can really develop that kind of denaturation element from your wine. I'll apply to the country to compensate you."

"There's compensation? That's acceptable," Qin Lin said half-jokingly.

"There will be." Professor Ren nodded again with certainty. Then, he asked anxiously, "Boss Qin, is it convenient for you to tell me what material this medicinal wine is made of?"

"It's made of bitter ginseng." Qin Lin did not hide it. Others would not be able to learn this bitter ginseng even if they knew.

"Bitter ginseng?" Professor Ren was stunned. "Although this bitter ginseng is effective for hemorrhoids, the effect doesn't seem to be that strong."

Qin Lin explained, "Maybe it's because I used very old bitter ginseng. Furthermore, the wine I used was also more than 20 years old."

Professor Ren guessed, "Then maybe there's a reaction."

Qin Lin naturally knew that it was because of the system, but he would not say it. He changed the topic. "Professor Ren, I'll arrange a place for you to stay first. I'll provide you with some wine when the time comes."

Professor Ren also wanted to start his research as soon as possible. He said, "Then I'll trouble Boss Qin. How much do you want? Give me an invoice. I can reimburse you."

Qin Lin did not dwell on this matter. He personally brought Professor Ren to arrange for him to stay in the bridal chamber. He even specially called Gao Yaoyao over and instructed her to clean up an empty office for Professor Ren to use for the next few days.

He also took out a bottle of medicinal wine that he had brought out earlier and handed it to Professor Ren.

After arranging everything, Qin Lin returned to the office.

Seeing that it was fine, he looked at the screen in his mind again. He first controlled the game character to catch the 35 fish that had refreshed today, then controlled the game character to head to Mount Notre Dame.

However, the trees had also been refreshed. When they were cut down one by one, they were still ordinary wood. It was not until the last tree that they gained something.

[A sandalwood tree can be cut. Do you want to cut it?]

It was actually another sandalwood. After cutting it, he finally harvested 30% of the Quality 1 sandalwood.

In other words, these three sets of Quality 1 sandalwood could make 300 boxes of 100g sandalwood incense again.

As he was thinking, Zhao Moqing entered the office. "Have you made arrangements for Professor Ren?"

Qin Lin replied, "Yes, make arrangements with Master Lin to arrange for Professor Ren to eat in the original hall."

"I'll arrange it later," Zhao Moqing said as she handed her phone to him. "Qin Lin, look at the villa's official account's message. The medicinal wine for treating hemorrhoids and the sandalwood incense for sleeping have been used. Now, many fans are asking if we sell them."

Qin Lin took his phone and saw that there were indeed rows of messages from fans. They were undoubtedly asking about the medicinal wine for hemorrhoids and the sandalwood incense for sleep.

It could be seen how much this hemorrhoid and insomnia affected the general public.

However, the medicinal wine to treat hemorrhoids was really limited. There were very few mountain goods refreshed, and the probability of them refreshing to bitter ginseng was even lower. He had no choice.

On the other hand, he had obtained sandalwood again. There was always a refresh rate. He could make an issue of it.

Qin Lin thought for a moment and said, "We don't have much medicinal wine to treat hemorrhoids, but we can use the sandalwood incense. We can upgrade our bridal chamber. The price of the bridal chamber will increase by 450 yuan a night. It will be accompanied by special sandalwood incense for sleeping and three grams of special sandalwood incense a night."

It meant that the price of the bridal chamber would increase by 100 yuan. In the future, there would be 0.5 grams of sandalwood incense for every bridal chamber. He would even give three grams when the guests left.

One room was 3.5 grams. 150 rooms were only 525 grams a night. It was only 15,750 grams a month, which was 157 boxes of 100 grams.

He had 300 boxes of Quality 1 sandalwood incense each. He could supply it.

The insomnia rate in China was as high as the hemorrhoid rate. The insomnia rate was close to 40%. In other words, more than 1,200 of the more than 3,000 tourists received every day.

Therefore, he was not worried that no one would stay in the bridal chamber. Those who could not sleep would fight to stay. It was just 100 yuan more. Those who were out for a vacation would not care.

This would instead raise the level of their bridal chamber to a higher level. It might even become a special feature. When the time came, the outside world would spread the ‘help sleeping bridal chamber’ project unique to Qinglin Villa.

This could also increase the level of the special sandalwood incense stall produced by his game by more than one level. It was equivalent to 3.5 grams for 100 yuan, which meant 14,285 yuan per catty.

This price was 10 times more expensive than top-notch sandalwood in the outside world. It was more expensive than many Chinese rosewoods.

If it was just sandalwood that was worth this price? Naturally, it was not worth it. However, who asked him, who had a Quality 1, to have a +1 sleep attribute? Who asked for the insomnia rate to be so high? His targeted operation meant that this Quality 1 sandalwood incense had this value.

“Then can the sandalwood fragrance be guaranteed?” Zhao Moqing was most worried about this.

Qin Lin said, “3.5 grams a day in each bridal room can still be guaranteed.”

“Then there’s no problem. This can actually create a special feature.” Zhao Moqing was relieved to hear Qin Lin’s words. “I’ll take a video and announce it on the official account later.”

Zhao Moqing and Qin Lin discussed the details before leaving Qin Lin’s office.

Qin Lin also looked at the game in his mind again. He controlled the game character to return to the ranch and sell all the wood he had harvested today except for the Quality 1 sandalwood incense.

Just as he finished selling all the wood, a notification that surprised him suddenly appeared in his mind:

[Game character upgraded!]

[The ranch meets the opening requirements!]

Chapter 247: First Ranch Construction! Ranch’s New Plan!

Qin Lin received the notification of his character leveling up and immediately looked at the upgrade information.

This time it was upgraded when he was selling wood.

In other words, the character upgrade not only increased experience by planting and picking crops, but also by fishing, harvesting mountain goods, and cutting trees.

He looked at the upgrade information. With this upgrade, there were more things open.

First, he opened up 12 Level 1 plots of land. He could also upgrade six Level 2 plots of land, one Level 3 plot of land, and one Water Field.

However, Qin Lin’s attention was not on these lands now, but on the information [The ranch is open].

In Ranches Story, the ranches section was naturally indispensable. There were even many magical animal husbandry types and many competitions about animals. One could obtain strange rewards in these competitions.

Racing was one of them.

Qin Lin controlled his game character to head to the ranch area. In the old version of the game, the ranch itself had ranch buildings, such as chicken coops, horse coops, and cow coops.

As long as he had enough gold coins, he could spend money to buy chickens and cows.

The new version of the game was a little different from those old versions. The game character level was not high enough, and the ranch area had been in a state of waiting to be unlocked.

[Do you want to spend gold coins to unlock the open ranch area?]

Look, the new version was not enough. Even the opening of the ranch required gold coins.

He could only say that the game planner was a real dog.

Fortunately, he had been cutting trees and mining to sell. Coupled with some crops planted in the land, he still had enough game gold coins.

A moment later, the ranch area was unlocked and the game character successfully entered the ranch area. However, the ranch area was empty.

[The current ranch is Level 1. It can be built into a chicken coop and a duck coop!]

Qin Lin received another message.

In other words, this ranch facility had to be upgraded one level at a time like those lands. New buildings had to be opened, and only the corresponding buildings could be used to raise the corresponding livestock.

The new version looked like it had copied another familiar web game.

Currently, Level 1 ranches could only build chicken and duck houses.

Qin Lin thought about the current situation of his villa and directly clicked on the duck house to build it.

Actually, the nutritional value of duck and chicken was similar. They were both very nutritious and common meat products.

Furthermore, the ducks and chickens produced by the game should be the same as the crops. The most basic was Quality 1. Be it the meat or the eggs, they would definitely be better than the ones in the outside world.

However, because he wanted to join the racetrack, Sun Ming had already gotten the people from Youcheng First Construction Company to redesign the design. Before the new blueprint was released, there was no place to raise chickens. He could not let them run around.

However, it was different for ducks. This was because the villa still had a portion of the use of the reservoir. The reservoir was a natural breeding ground for ducks.

He would build some duckhouses in the reservoir beside the villa and raise the ducks in the game. At that time, this duck would be a new breed of duck that could only be eaten in Qinglin Villa.

The key was that if this was done well, he could obtain the Quality 1 meat provided by the mountain villa without entering the game.

On the other hand, there were more ducks and duck feces. He had to raise fish under the duck house.

Duck dung was the most nutritious of all the conventional livestock and poultry feces.

Because the duck's intestines were too short, the food did not stay in the intestines for long. The feed could only absorb a portion of it, and most of it had become a treasure to be pulled out. Therefore, many farms would use duck feces a second time.

Naturally, duck dung had to be specially fermented to be used to raise fish. This required a high salary to hire a few professionals.

Therefore, it was completely feasible to raise ducks and fish.

Now, there were hundreds of wild black carps, grass carps, and bass in the ranch pool. They could be taken out and placed in.

When the time comes, this duck house might become Chen Shengfei's favorite place.

In the game.

After the duck house was built, it was still empty. The ducklings needed to be bought.

Qin Lin controlled his game character to leave the ranch in a hurry. In the game, he had to go to other ranches to buy livestock.

The game character arrived at another ranch in the town and met the NPC rancher, triggering the conversation:

[Are you the owner of that new ranch? Your ranch has a lot of things to do. I have a lot of livestock to sell. I hope you can develop the livestock industry in Ore Town with me!]

After the conversation, the names of a large row of livestock appeared in front of him, but only duck and chicken could be bought.

There were also pigeons, peacocks, swans, pigs, cows, horses, deer, sheep, and so on... However, like the farm seeds, these were all gray and could not be bought if he was not high enough in level.

Qin Lin directly clicked on the purchase button. There was no limit to the number of ducks. Anyway, he had enough game coins to buy 50 ducks.

After the purchase, the rancher's conversation reappeared:

[Haha, you bought 50 ducklings. They'll liven up your ranch. Go back to the ranch and wait. I'll send the ducklings over soon.]

Qin Lin clicked to end the conversation and controlled his game character to return to the ranch immediately. He realized that the rancher was already waiting at the entrance.

[The ducklings are already in the duckhouse. We've given you some feed. The ducklings are very cute. Take good care of them. Their meat and eggs will be delicious when they grow up!]

Chapter 248: First Ranches Construction! Ranch's New Plan!

When Qin Lin saw this conversation, he directly cursed the game planner. How could the words duckling, cute, and delicious be placed together?

The rancher quickly left after fulfilling his NPC conversation duty without a trace of reluctance.

Qin Lin also controlled his game character to enter the duckhouse.

There were indeed more than 50 yellow ducklings inside. They were very cute ducklings that would be delicious when they grew up.

He controlled the game character to put the feed given by the rancher into the feed slot. The group of ducklings ran up to eat it, eager to grow up.

When Qin Lin saw this, he retracted his attention from the game and called Chen Dabei, asking him to wait for him in the original hall with the carpenter horse master.

Since he had a plan to build a duck house in reality, he naturally had to act immediately.

After hanging up, he went to Zhao Moqing's office.

The office was still lit with agarwood incense. Lin Fen was in the office.

Wang Cai was lying comfortably to its side, its eyes narrowed as if it enjoyed the smell of agarwood incense.

When Qin Lin entered the office, Lin Fen and Zhao Moqing were chatting happily.

"Woof!" When Wang Cai saw that Qin Lin had come in and did not close the office door, it whimpered at Qin Lin and ran over to close the office door with its head. Then, it ran back and lay down again.

The last time this dog was brought into the game to learn the Frisbee skill, it became even smarter after its intelligence increased. Did it know that when the door opened, the smell of the agarwood incense would spread?

"Mom, what are you talking about?" Qin Lin walked to Zhao Moqing's desk and asked curiously.

Lin Fen explained, "I was talking to Moqing about the old residence in the village. Every old residence in the village has been renovated. Only our house and your Uncle Shuigen's house have not been renovated."

"Because of our family's situation, your Uncle Shuigen never mentioned it. Now that you're earning money, your Uncle Shuigen told me to hire someone to renovate the old residence for more than ten days while there's still some time during the new year. I'm discussing this with Moqing."

Qin Lin nodded and said, "Mom, this is a good thing. Why didn't you tell me?"

In the past, many old houses in the countryside had two or even a few families living together, sharing the hall and courtyard.

Their family and Uncle Shuigen's old house were the same house. The two kitchens were only two meters apart.

If such an old house was to be renovated, it would usually be renovated by a few families in the old house. Previously, Uncle Shuigen had never mentioned their family's situation.

To many people who came from the countryside, the old house would always be a home. No matter where they made a living or how well they lived now, the memories of the old house when they were young were the most unforgettable.

Furthermore, the older generation believed that as long as the house in their hometown was still there, no matter how painful it was to fall outside or how miserable they were, there would still be a way out and a pillar of support.

If they didn't even have their old house, they would really be rootless and have no soul to rely on.

That was indeed the case. Even if the old residence did not have the traffic and tall buildings of a big city, there would always be a moment in life when they recalled that distant mountain village. They wanted to smell the fragrance of the wild flowers and drink the sugarcane mountain spring.

This was probably their pillar of support.

When Lin Fen heard her son's words, she said matter-of-factly, "You don't have to worry about this family. Moqing is in charge of the money. She can make the decision. I'll inform you after discussing it with Moqing."

Qin Lin smiled and said, "Alright, you and Moqing will decide on this matter. How much does this renovation cost?"

However, Lin Fen reminded him, "It doesn't cost much. Please let your Uncle Shuigen do the math. When the time comes, our old residence will be renovated to be about the same as your Uncle Shuigen's house. Although you've made some money, don't stand out in this."

"I understand." Qin Lin understood what his mother meant. Now that many people had earned some money, they liked to compare themselves with each other in the renovation of the old residence. Many people in the same house had a good relationship, but some insisted on suppressing the other party. When they were renovating, they had to compete. As they compared, the resentment in their hearts came out and their relationship worsened.

With his current income, he could renovate the old house better than anyone in the village.

However, there was no need. If he did too well, Qin Ren's family would be too inferior. Even if they did not have that intention, it would look bad to outsiders.

Back then, with their family's situation, Qin Ren's family did not choose to renovate first. Wasn't he afraid that others would compare and make their family look bad?

Therefore, everyone paid the same amount of money to repair the old residence. They did not compete with each other and kept the old residence together.

Qin Lin did not forget his business and said to Zhao Moqing, "By the way, recruit a few people who know how to raise ducks and ferment duck feces."

Zhao Moqing asked, "Do you want to raise ducks?"

Qin Lin explained, "Doesn't the villa still have the right to use the reservoir? We have to use it. We can also raise fish while raising ducks."

"Yes, I'll call the agent later and ask him to recommend a few people for an interview." Zhao Moqing nodded. The villa had developed to this point, and there was also Qinglin Food Company. It was also a big employer. After the county's corporate guidance fund was established, just the food company factory alone would need to hire nearly 600 people.

As long as the villa had a hiring requirement, the intermediary company would serve as soon as possible.

After Qin Lin finished instructing, he left the office to look for Chen Dabei and the others.

Chen Dabei was already waiting in the original hall with Master Ma.

"Supervisor Chen, why did Boss call us?" Master Ma asked from behind Chen Dabei.

Chapter 249: First Ranches Construction! Ranch's New Plan!

Chen Dabei said, "Old Ma, stop asking because I don't know either. If there's anything the Boss asks you to do, just do it well. Don't be lazy when the time comes."

"How can that be? Supervisor Chen, you know that I'm the most diligent," Master Ma immediately said. For a scattered carpenter like him, he was very satisfied with the job at Qinglin Villa. Firstly, the salary was not low and was stable. Secondly, the food was good.

"Boss!" Chen Dabei quickly saw Qin Lin and went forward with Master Ma.

"Let's go to the reservoir to take a look." Qin Lin also called the two of them to the reservoir.

It was not far from the nearest reservoir in the villa. They arrived in a short while. This was a mountain, a slow-moving water area, and it met the farming conditions.

Qin Lin looked around the reservoir and asked Master Ma, "Master Ma, can you build a duck house here?"

Master Ma looked around and nodded. "Boss, there's no problem with that, but if the duck house you're building is big, I definitely can't handle it alone."

"Master Ma, you don't have to worry about that. I'll get the security guards to help you," Chen Dabei said immediately. He had followed his boss for so long and knew why his boss had called him over.

Qin Lin also smiled and nodded. "Master Ma, the duck house I want to build is not small, and there's more than one. Chen Dabei will cooperate with you. Tell me what materials you want. I'll get someone to buy them immediately."

"Boss, that requires a lot of things." Master Ma also told Qin Lin what he needed.

The most important material for building the duck house in the reservoir was naturally the bamboo and the barbed wire in the cut area. In addition, it was what was needed to build the floating bridge.

These things were not difficult to get. After Chen Dabei went out for a run, everything was transported to the reservoir in the afternoon.

Chen Dabei also led a team of security guards to help Master Ma build a big pile in the reservoir.

These large stakes had to slowly expand into the water from the shore. They were used to fix the floating bridge.

When the time came, he would use empty oil barrels and some special floating tools as the base. With wooden planks fixed on it, it would be a floating bridge that could be walked.

Master Ma was already drilling holes in the bamboo with his tools. He had to get a few bamboo rafts first.

Bamboo rafts were also good things. It was very comfortable to row bamboo rafts on the reservoir in summer and bask in the sun.

With this in mind, it was not a bad idea to prepare two green boats.

However, this bamboo raft was now made to cooperate with the pulling of the isolation barbed wire.

This isolation barbed wire was only to stop the ducks. If he wanted to raise fish later, he had to set up another blockade in the water to prevent the fish from escaping.

After a busy afternoon, the first dual-use duck house had a preliminary model by the reservoir.

This was faster than he had imagined.

Seeing that it was dark, Qin Lin asked everyone to go back and continue tomorrow. He also returned to the office. When he passed by an office, he heard Professor Ren's voice. "No, there's nothing wrong with the test paper we brought. Why can't we detect the special ingredient in this medicinal wine?"

Qin Lin looked into the half-closed office. Professor Ren and the others had already merged the two tables together and were testing something with some unknown paper.

He did not expect Professor Ren to start working so soon. His attitude and enthusiasm for scientific research were really high.

Professor Liu's voice sounded. "Old Ren, try the third rule alkaline paper test."

"Yes, I didn't expect the degeneration element in this medicinal wine to be so difficult to detect." Professor Ren frowned and said, "If it doesn't work, Old Liu, help me send a testing machine over after you return to the research institute tomorrow."

Qin Lin did not disturb Professor Ren and the others. He walked straight to his office and looked at the game in his mind the moment he entered. He controlled his game character to head to the ranch.

Because of the time ratio in the game, one day in reality was half a year inside. When the game character entered the duckhouse, he saw that the cute ducklings, who were still covered in yellow fur in the morning, were already half-grown ducks with white fur. They were valiant and loud.

Seeing the game character enter, the delicious ducks surrounded him. They were clearly hungry.

Qin Lin controlled his game character to put in the feed and left the ranch again. There were 50 ducks. The feed given by the rancher had already been fed twice. He wanted to buy some more.

In addition, the duck house was built faster than he had imagined. As long as the breeder was recruited, he should be able to send the first batch of ducks over tomorrow.

Therefore, he planned to buy 50 more ducklings and gather 100 delicious ducks tomorrow.

Chapter 250: I've Never Met Such a Situation! Such A Big Duck Egg?

After Qin Lin bought another 50 ducklings and entered the duck house, he looked at the land.

In addition to the opening of the ranch, this upgrade also opened 12 plots of Level 1 land. It could be upgraded to another six plots of Level 2 and one plot of Level 3 land, as well as a paddy field.

The batch of crops in the evening was about to ripen. It was just enough to develop these lands and upgrade them. This way, when the original land was harvested, he could plant them together. Otherwise, it would be too troublesome.

Qin Lin controlled his game character to clean up all the weeds, wooden stakes, and stones in the 12 new plots of land and used a hoe to develop them one by one.

After developing these 12 plots of land, he upgraded six of them to Level 2 land and one of them to Level 3 land.

Finally, he modified a water field and upgraded it to Level 2.

He had no intention of taking out the crops planted in Level 1 and Level 2 lands this time. He decided to sell them in the game.

The villa no longer needed to earn money by increasing the number of Quality 1 crops in Level 1 and 2 lands.

Quality 2 crops appeared in these lands.

However, there were three plots of Level 3 land, two plots of Level 2 water fields, and more plots of Level 2 water fields and Level 3 land to be used.

With two plots of Level 2 paddy field, the matching cultivation of eel and loach could be carried out together.

Although the price of Quality 1 eel and Quality 1 loach had reached 200 yuan a catty, they were very popular. As soon as there was a supply, they were immediately sold out.

After all, these two things were the best in the South.

However, the eels and loaches had been cultivated for a longer time. It turned out that there was only a Level 2 paddy field. After raising the eels, there were no loaches, and after raising the loaches, there were no eels.

Furthermore, a mature batch only weighed 50 catties.

The meat produced by such games had to be increased.

Now that there was an additional Level 2 paddy field that could be cultivated at the same time, it was equivalent to more than 50 catties of eel and more than 50 catties of loach that could be supplied at the villa.

The other was Level 3 land.

The reason why all the watermelons in the previous two plots of land were planted was because the seedless watermelon seeds were of Quality 2. The watermelons planted were all of Quality 2.

However, if the crops planted by ordinary seeds were all Quality 1, there was only a probability of some being Quality 2.

If it was calculated according to its value, this Level 3 land would also be planted with a seedless watermelon of Quality 2. Its value would be the highest.

However, in the previous two boxes of Quality 2 watermelons, he could already harvest 40 to 50 Quality 2 seedless watermelons a day.

Furthermore, a Quality 2 watermelon weighed more than 20 catties and basically cost more than 2,000 yuan. Although it was already famous and everyone knew that this watermelon was delicious, among the more than 3,000 tourists, the number of people who could buy an entire Quality 2 watermelon was about the same. It was even the tourists who lived in the bridal chamber who bought it and cut it on the spot in the small courtyard.

Therefore, he planned to plant other things in this Level 3 area. The diversification of high-end fruits was also important. He could not rely on just one watermelon and the Quality 2 strawberries that appeared every day in Level 2 land.

Qin Lin controlled his game character to go to the Ore Town's seed shop and checked. There were many seeds that could be planted in the Level 3 land: Multi-core four-edged beans, yellow yamakurage, green-skinned kiwis, milk strawberries, blue purple plums, and so on...

Ordinary seeds produced Quality 1 fruits, so he had to check the best price among these things.

Qin Lin retracted his gaze and went online to check the prices of these crops.

Multi-core four-edged beans: Average price today is 65 yuan per catty.

Yellow Yamakurage: Average price today is 58 yuan per catty.

Green-skinned kiwi: Average price today is 60 yuan per catty.

Blue Purple Plum Blossom: Average price today is 100 yuan per catty.

...

Clearly, the prices of these planted crops in Level 3 lands were much higher than those in Level 1 and 2 lands.

Most crops in Level 1 lands cost 5 to 6 yuan a catty, and ordinary red strawberries in Level 2 lands only cost 25 yuan a catty. The crops in Level 3 lands basically cost more than 55 yuan. This was already a semi-extravagant crop.

Of course, these were the prices of ordinary items outside. If there were game attributes, it would naturally be different.

The okra that could be planted in Level 1 land was only 5 yuan a catty outside. His sales center for Quality 1 sold for 15 yuan, and the Quality 2 sold for 200 yuan a catty.

Ordinary red strawberries that could be planted in Level 2 land were only 25 yuan a catty outside. His sales center for Quality 1 sold for 40 yuan and 200 yuan for Quality 2.

Therefore, since the crops planted in this Level 3 land had game attributes, he would naturally sell them at a higher price.

The most expensive crop that could be planted in these Level 3 lands was the 100 yuan a catty of Blue Purple Plum.

This was only the normal price in reality.

After he planted it from the game, he would sell it for 150 yuan for the Quality 1 and 300 yuan for the Quality 2, right?

[Blue Purple Plum Seed: Ordinary]

[This is a plum seedling. The blue purple plum it produces is very delicious. It takes two days to grow and is harvested five times a day.]

This blue purple plum is a seedling. It's different from the seeds of watermelons, and the way it's harvested is also different.

The Blue Purple Plum Seed needs two days to grow. After that, it can be harvested repeatedly. It can be harvested a total of five times.

Qin Lin decisively bought some Blue Purple Plum seedlings and returned to the ranch. He planted the seedlings on the new Level 3 land.

At this moment, the crops in the original fields had also ripened.

Qin Lin picked the batch of crops in the evening and sent them to the storage room to be transported tomorrow morning. Then, he planted new seeds.
