

The Game 251

Chapter 251: I've Never Met Such a Situation! Such A Big Duck Egg?

After doing this, Qin Lin got up and left, planning to find Zhao Moqing to eat in the canteen.

Zhao Moqing was not in the office. He found her in the multimedia room editing and planning to film the announcement of the bridal chamber service upgrade with Gao Yaoyao.

When Qin Lin entered, the video had already been taken and edited. "Yaoyao is becoming more and more photogenic."

Gao Yaoyao's capital was not bad. She was pure, beautiful, and had a cheerful personality. In the beginning, she might have been a little unnatural, but now, she was already very natural in front of the camera.

The key was that after becoming a supervisor and managing those waitresses, she had more confidence than before. This confidence was very attractive to the opposite sex.

For example, Zhao Moqing was now in charge of everything in the entire villa. Her confidence was even stronger, as if she had bred a temperament that was quite charming.

Zhao Moqing clearly agreed with Qin Lin. "Yes, Yaoyao is getting more and more beautiful. Many male fans in the villa are infatuated with Yaoyao. They say they want to kill you, the owner of the villa, and snatch Yaoyao."

"Then I'll have to be careful when I go out in the future," Qin Lin teased. Gao Yaoyao's "Qinglin Villa Service Manager, Yaoyao" account had indeed attracted many perverts.

Gao Yaoyao blushed and said shyly, "Boss, Sister Moqing, it's not as exaggerated as you say."

After watching the video, Qin Lin also said, "The video is done. Let's go to the canteen to eat together!"

Zhao Moqing got the editing team to send the video to her. Then, she said to the editing and planning girl, "Let's go eat!"

"Long live Sister Moqing, long live Boss." The planner was clearly hungry. She cheered happily and went out with Gao Yaoyao.

Zhao Moqing uploaded the video to a certain official number in the villa and hugged Qin Lin's arm as they headed to the canteen.

Zhao Moqing uploaded the video of the bridal chamber service upgrade online and it soon became a hot topic.

The benefits of Qinglin Villa's listing event, be it the medicinal wine for treating hemorrhoids or the sandalwood incense for sleeping, had long proven to be very effective.

People suffering from hemorrhoids and insomnia were paying attention now.

Many people commented on the official account of Qinglin Villa and asked if these two things were sold.

Now that Zhao Moqing's video had attracted attention as soon as it was released, it would be strange if it was not trending.

This was the advantage of having popularity.

When the person opened the video, Gao Yaoyao's sweet voice sounded.

"Hello, everyone. I'm Gao Yaoyao from Qinglin Villa. Everyone is paying attention to the medicinal wine for hemorrhoids and the special sandalwood incense for sleeping in our villa. Many people even left messages wanting to buy it."

"Unfortunately, this medicinal wine is very rare. Our villa can't supply it for sale. The sandalwood incense for sleep is also specially made. It's equally rare and can't be supplied for sale."

"Of course, there's also good news for everyone. Our villa's bridal chamber has been upgraded to a 'sleep-aiding bridal chamber' service."

"From tomorrow onwards, after the tourists check out at 12 noon, the price of the room will be changed to 450 yuan a night. We'll give you a sandalwood incense sleeping service + three grams of incense gift bag."

As soon as this video was released, many people saw it, especially those who had serious hemorrhoids.

They had originally wanted to go to Qinglin Villa when they saw the benefits of giving out medicinal wine to treat hemorrhoids, but they hesitated because of Professor Ren's video. Now, they had completely missed it.

Thinking of their stinging hemorrhoids and the powerful effect of the medicinal wine described online, they realized that missing out on it would really make them extremely regretful.

As Qin Lin had expected, no one cared about the 100 yuan increase in the bridal room service. Instead, it aroused the enthusiasm of the insomniac.

"I just experienced the effect of Qinglin Villa's sandalwood incense. Now, even five-star hotels are incomparable to the bridal chamber of Qinglin Villa."

"Three grams can be used for six nights and one night in the bedroom. That's equivalent to 100 dollars for seven nights of comfortable sleep. It's a blessing for people with severe insomnia."

"Qinglin Villa only raised the price by 100 yuan. Do you think I don't have money? Raise it by 200 yuan and let me have fewer competitors to book a room."

"..."

In a luxurious hotel, Wan Gu lay in a big bathtub, smoking and watching videos on his phone.

After he left Qinglin Villa, he came to this province to play with Wang Yang.

This was the hotel Wang Yang had arranged for him.

This trip to Qinglin Villa was definitely a huge gain for him.

The effect of the sandalwood incense was too strong.

After writing the novel, he did not earn much money, but his insomnia became worse. His biological clock was completely out of tune, and the pain of insomnia became deeper and deeper.

This time, the benefits he had received at Qinglin Villa and the ones he had bought from the other tourists could let him sleep comfortably for a while. They should save his broken biological clock and cure his insomnia.

“Eh, Qinglin Villa posted a video again?” Wan Gu quickly saw the video of Qinglin Villa’s bridal chamber service upgrading.

That made his eyes light up.

Qinglin Villa’s bridal chamber actually had such a sleeping service. As a severe insomnia, he planned to book a bridal chamber at noon tomorrow and go back to Qinglin Villa to stay for a few more nights to enjoy more of the special sandalwood incense powder.

As he was thinking, he received a message from Wang Yang on WeChat. “Wan Gu, enjoy tonight.”

“Enjoy what?” Wan Gu was stunned for a moment. Then, he heard the door open outside. This shocked him. He immediately picked up the towel and wrapped it around himself. He opened the door and looked out.

Chapter 252: I’ve Never Met Such a Situation! Such A Big Duck Egg?

Two young ladies in revealing clothes walked into the room with the room card.

“???” Wan Gu was stunned.

What was going on?

They had never met before.

...

The night passed in the blink of an eye.

Qin Lin woke up early in the morning and looked at the screen in his mind. After picking all the ripe crops, he controlled his game character to go to the ranch and duck house to see the situation of the delicious ducks.

As they entered the duck house, caws sounded.

After this night, according to the game’s time ratio, the second batch of 50 ducks had already grown halfway.

The first batch of 50 ducks had already grown up. They were already very big and their feathers were white.

Furthermore, round duck eggs could be seen lying on the ground around the duck house.

They were clearly still cute ducklings yesterday, but they had grown up so quickly and even knew how to lay eggs.

Logically speaking, this was unbelievable. After all, he had only fed the duck twice, but according to the time ratio, the duck had grown for half a year.

If he fed them twice a year in reality, they would have died long ago.

However, farming time in this game was so fast. The mechanism of the game planned was like this.

There was only one explanation. When he didn't enter the game world, it was a 2D cartoon game. Everything was affected by the game mechanism.

Only when he entered the game world would it be the real world.

Otherwise, it was impossible for a 100-year-old tree to respawn in the real world. That was all due to the game mechanism.

Qin Lin did not dwell on this. He began to control the game character to pick up the duck eggs and send them to the storage room.

If he wanted to sell it directly, he could directly control the game character and put it in a special delivery box.

After Qin Lin finished checking the duck eggs in the duck house, he came back to his senses. Zhao Moqing had already gotten up and sat at the dressing table to start putting on her makeup.

The two of them washed up and left the bedroom. Lin Fen had already made porridge. Zhao Moqing could make breakfast, but Lin Fen preferred to wake up early and rush to make it before Zhao Moqing did. She did not let Zhao Moqing make it and even forced Zhao Moqing to sleep more every morning.

"Mom!" Zhao Moqing sat down happily. She could eat the breakfast her mother-in-law made every day. Which woman wouldn't be happy?

Lin Fen got a bowl of porridge for Qin Lin. "The Xiangshui Tribute Rice at home is running out. If you can get more, get some for Moqing's mother too. I saw that Chen Xiao liked to eat the Xiangshui Tribute Rice."

If those rich people heard this, they would definitely open their mouths in shock. After all, most of them could not buy Xiangshui Tribute Rice, but Lin Fen made light of it.

However, how could she not downplay what she ate at home every day?

"I understand, Mom." Qin Lin also made a note of this. Although the Quality 1 Xiangshui Tribute Rice was sold every day, the Quality 2 Xiangshui Tribute Rice was left behind. There was already a lot in the game.

After eating the porridge, Qin Lin went out to the warehouse and entered the game. He moved all the things that were to be transported to the villa today out of the game and placed them in the car before heading to the location where the duck eggs were stored.

Although he had guessed that this duck egg and duck should be of Quality 1, he had to confirm it.

When he saw those duck eggs, Qin Lin subconsciously picked one up. The duck egg was no longer in the shape of a cartoon but a real duck egg with a clear touch. However, ordinary duck eggs were only 5.5cm tall and 3.5cm in diameter. The one in his hand was twice as big.

Furthermore, among those duck eggs, he saw three clearly larger duck eggs.

Even if it was as big as an ostrich egg.

Wasn't it unbelievable that a duck egg could be that big?

Chapter 253: Beauty Egg! Is This Really a Duck?

This was the first time Qin Lin had seen such a big duck egg.

Especially when he saw the three duck eggs that were not much worse than ostrich eggs, he inexplicably wanted to know how the duck was born.

This was probably going to crack.

Qin Lin focused and saw the note on the duck egg in his hand.

[Duck egg: Quality 1]

[This is a duck egg born from a special big white duck: Yin-nourishing lungs +1, Yin-nourishing blood +1, beautiful skin +1, volume +1.]

Qin Lin put down the one in his hand and picked up one of the three especially big ones.

[Duck egg: Quality 2]

[This is a duck egg born from a special big white duck: Yin-nourishing lungs +2, Yin-nourishing blood +2, beautiful skin +2, volume +2.]

When he saw the note on the duck egg, he finally knew why it was so big. It had the attribute of increasing its size.

A Quality 3 watermelon weighed more than 200 catties because of its attributes.

Now that this duck egg had the attribute of increasing its size, it was not strange for it to be bigger.

Qin Lin was surprised by the other three attributes of this duck egg. He felt that he had to prepare one for Zhao Moqing every day.

This egg was simply a holy item for women.

There was no need to talk about nourishing the skin and clearing the lungs. Nourishing the skin was very beneficial to women. If women were normal in that aspect, men would be more sexually happy, right?

Furthermore, this beauty attribute was definitely something that women would crazily pursue. If this beauty attribute was used for a long time, even a 40-year-old girl would look like she was in her 20s, right?

He had to let Zhao Moqing eat it every day. With the effect of Xiangshui Tribute Rice, when Zhao Moqing was 40 or 50 years old, she would still be in her 20s. Wouldn't he be so proud to bring her out?

At that time, people would think he was taking his granddaughter out, right?

No, it shouldn't be at this pace. This beauty treatment was also effective on men, right? He could eat it every day too.

The correct rhythm should be decades later, when he and Zhao Moqing still looked young, they would call Qin Ren, Zhao Moyun, and the others to make them doubt their lives.

Qin Lin smiled for some reason.

He had even thought of a very stylish name for this duck egg: Beauty Egg.

Then, he left the storage room and rushed to the duck house on the ranch.

It was naturally impossible for a normal duck to give birth to such a big egg.

Then this duck must have mutated too.

Otherwise, such a big egg would be too careless about the duck's feelings.

As soon as he entered the duck house, the quacking of ducks sounded in his ears.

Unlike the crisp sound in the game, in this real situation, the duck cries were noisy.

Flutter!

A big white duck spread its wings and flew past him. Its snow-white wings were elegant and beautiful.

"???" Qin Lin was puzzled for a moment. Was this really a duck?

Indeed, the duck was too big to look like a duck. It was bigger than a swan and more like a swan than a swan.

Furthermore, he saw three ducks of this size.

Now he understood what had happened to the three duck eggs that were almost ostrich eggs. They must have been born.

Other than these three ducks, the other ducks were also larger than ordinary ducks, especially the first batch of 50 ducks that had already grown.

Ordinary ducks weighed about three to eight catties, and large ducks only weighed about 10 catties. However, the first batch of 50 ducks probably weighed more than 10 to 20 catties. They were as big as ordinary swans.

The key was that not only was this duck big, but it was also pure white and looked very good.

Qin Lin looked at the quacking ducks and grabbed one of them. He saw the attributes:

[Big white duck: Quality 1]

[This is a specially cultivated big white duck. Its quality is better than ordinary ducks: Taste +1, nourishing the stomach +1, cough-stopping +1, nutrition +1, weight +1, appearance +1, feces smell -1.]

As expected, this duck also had the attribute of weight +1, so it grew bigger than ordinary ducks and laid bigger eggs.

Furthermore, the eggs it laid had Yin-nourishing lungs, but its own meat was nourishing the stomach. The effect was actually different.

The key was that the attributes of these ducks seemed to be inferior to the eggs they laid. After all, with the additional attributes of nourishing the yin, nourishing the blood, and beautifying the face, the popularity and value would be completely different.

Of course, this did not mean that duck eggs were more valuable than this duck. It was stupid to think that way. This was because ducks could lay more than one egg. Ducks also had the attribute of beauty +1.

Qin Lin put down the duck and walked over to grab one of the three big ducks.

The big white duck was spreading its snow-white wings and displaying its beautiful figure like a swan. It clucked arrogantly. Suddenly, a pair of big hands grabbed its spread wings and lifted it up.

The big white duck immediately struggled.

Qin Lin felt the power of this big white duck. Even a big lion-headed goose couldn't compare to it, right?

If it were an ordinary weak person, they probably wouldn't be able to grab it.

Fortunately, he had eaten a fruit of the Tree of Strength. The big white duck was helpless in his hands and could not struggle at all.

The big white duck struggled for a while but had no strength. It could only quack randomly.

Qin Lin also felt the weight of the big white duck in his hand. It was probably more than 40 catties.

This kind of duck had really lived for a long time.

At least he had never seen one in his life. If he put it in the water and said it was a swan, from a distance, no fool would say it wasn't.

Chapter 254: Beauty Egg! Is This Really a Duck?

He did not know if he could bring such a big duck to reality. He had to research ducks first and see if there was such a big duck in the real world.

Then, Qin Lin saw the duck's note:

[Big white duck: Quality 2]

[This is a specially cultivated big white duck. Its quality is better than ordinary ducks. It's a duck that's even more swan-like than a swan: Taste +2, Yin-nourishing +2, cough-stopping +2, nutrition +2, weight +2, appearance +2, feces smell -2.]

Looking at the duck's attributes, it was no wonder it was big.

Even the note said that this duck was more swan-like than a swan.

This taste +2 was very tempting. It made one eager to pluck the fur and taste it.

After reading the note, Qin Lin put down the big duck and exited the game. He got into the blue car and started it to transport the items to the villa.

When he arrived at the villa, he went to the office immediately and went online to search for information about ducks.

After all, those ducks were too big. Ordinary ducks were only a few catties.

However, after checking the relevant information online, he realized that he was too inexperienced.

There were many types of ducks all over the world. Normal ducks usually weighed three to five catties, medium ducks five to eight catties, and there were also large ducks. Most of them weighed about 10 to 20 catties.

These large ducks were very famous, such as the muscovy duck, musk duck, and mallard duck.

Many of these ducks had been raised to more than 20 catties.

Naturally, raising this weight was not something that could be achieved in three to five months with commercial breeding. It had to be raised with self-made nutritious essence grains for a year.

However, it was impossible for ducks raised by ordinary people to grow so big. Ordinary people had never seen them before.

Qin Lin had not seen such a big duck in more than 20 years.

In other words, there was no problem taking out a Quality 1 duck. After all, there were such big ducks in the outside world. It was just that a line of big white ducks that were so big was a little shocking.

Qin Lin continued to check the information to see how much the world's largest duck weighed. In the end, he obtained a shocking result. It was 38 catties outside.

Furthermore, this was a mallard duck, a special breed of duck in the country of Canada. The main use of this duck was not to eat it, but to enter competitions.

There was an activity in Canada similar to chicken sacrifice and milk sacrifice in Ranches Story. It could be called duck sacrifice, which judged the heaviest duck selected.

These 38 catties were the record, and it was also the world's largest duck record. Unfortunately, the night after that duck won, it was at a tycoon's table.

This duck festival was like those beauty shows that were prepared for some rich people. Those who won the beauty contest were rarely not kept by the rich, right?

This was the case for the duck sacrifice. On that day, many rich people would come to see the ducks. The winner would naturally be the fastest to be served at the rich people's table and the most expensive.

Furthermore, there was a person in China called the Duck King Wu who had also carefully raised a large duck. It was also 34 catties in size. Recently, he had to apply for the Guinness Book of Records.

Because no one had applied for the heaviest duck, the Guinness Book of Records.

After all, it was not the era where people applied for the Guinness Book of Records at the most. The people from Canada did not think of applying for this record for a duck that was destined to be eaten.

Therefore, this Duck King Wu seized the opportunity.

Seeing this, Qin Lin thought that it shouldn't be a problem to get three ducks that weighed more than 40 catties, right?

There were even 38 catties. He only needed a few more catties.

Qin Lin even thought maliciously that he should get these three ducks to apply for a Guinness record too. That would be another focus. When the time came, watching ducks would probably become a specialty of Qinglin Villa.

Qin Lin checked some more information about ducks before leaving for the reservoir.

Chen Dabei had long been busy building the duck shed with a team of security guards and Master Ma.

"Hurry up and cooperate with Master Ma to bury the wiring. Don't expose it." Chen Dabei shouted at the two security guards, burying the wiring.

This duck shed was built to receive electricity.

This was also the reason why Qin Lin liked to use Chen Dabei.

He didn't have to repeat what this person had instructed him to do or urge him to do it. He took the initiative and did it beautifully.

On the reservoir, a short section of the pontoon bridge with the fixed template of the floating bucket had also been made.

Seeing this, Qin Lin suddenly had a new idea.

If swans could be used to admire, why couldn't his ducks?

In the past, there was no program for viewing ducks in the country because ducks could not.

The duck produced by his game was completely white and had beautiful attributes. It looked even more arrogant than a swan.

Therefore, the beautiful appearance saved the ducks from the persecution of the poison attribute of taste +2.

Qin Lin was sure that such ducks would definitely be admired. He could definitely get a pontoon bridge to surround it so that tourists could walk on it to admire the ducks.

This section of the reservoir area was very gentle. Even if the reservoir let out water, it would not affect the pontoon bridge here much.

The pontoon itself was also a place that could be a tourist attraction and for a stroll.

Couples could hold hands as they walked on the pontoon. The feeling of their feet moving slightly with the water was very romantic.

There were also many floating bridges in the country. For example, the Enshi Floating Bridge was very famous. Cars could even drive on it.

Therefore, the pontoon bridge + duck-viewing was a very good attraction. Tourists could also rest and take photos on the pontoon bridge.

The key was that the pontoon bridge was also built quickly and could be used soon. When the time came to remove the barbed wire, the pontoon bridge could also serve as a natural barrier to prevent ducks from entering the depths of the reservoir.

He could also see if there were some floating plants in the water that could purify the environment from the game. Not only could he maintain the water quality, but he could also decorate the scenery.

Furthermore, many scenic areas had free viewing areas. This floating bridge could become a free viewing area for Qinglin Villa.

It was just that the safety of the pontoon bridge needed to be taken very seriously. After all, this was a reservoir.

As he thought about the pontoon bridge + duck-viewing, Qin Lin called Chen Dabei over.

“Boss, what’s wrong?” Chen Dabei immediately ran to Qin Lin and asked.

Qin Lin instructed, “Do your best to build the duck house first. Don’t build the pontoon bridge for the time being. I plan to find a special company to build it.”

Since there was this plan, the pontoon could not be done casually. The appearance must be carefully done. The colors of the float and wood had to be uniform and harmonious.

Hearing his boss’s instructions, Chen Dabei did not ask why. Without a word, he shouted at the security guards pushing the floater, “Let’s not do it over there for now. Come and help Master Ma break open the bamboo and build a duck shed.”

After instructing Chen Dabei, Qin Lin returned to his office and checked the company’s information on Youcheng County’s construction.

There must be a construction company that specializes in making pontoons.

Youcheng County carried out the plan of ‘domain tourism+’. Many scenic spots had floating bridges built, and the corresponding market would give birth to companies with such services.

Qin Lin contacted a company that had made pontoons for the Hero Valley.

He had seen the pontoon bridge in the Hero Valley. It was also a pontoon bridge built on the reservoir section, and it was very good.

After that, he returned to the reservoir and supervised the duck house built by Master Ma and the others. He also gave his opinions and guidance and tried his best to achieve the effect he wanted.

After the morning, three more large duck houses were built and stood beside the reservoir, side by side with the one from yesterday.

As long as it was used as a decoration, this large duck house made of pure bamboo would be a little ornamental.

With these four large duck houses, he could get Master Ma and the others to isolate this area of the reservoir with barbed wire and bring the ducks out first.

He had to think about how to explain the source of this duck.

A good breed suddenly changed. This explanation was alright, right?

A livestock farm had three ducks that had mutated. The rancher used the eggs of these three big ducks to cultivate another batch of ducks. Unfortunately, the ducks had degenerated and become smaller.

This way, there was an explanation for both Quality 2 and Quality 1 ducks.

Naturally, in the end, he was the one who discovered these ducks and spent a lot of money to buy them.

As for how to make this reason reasonable, he would have to think about it carefully.

Chapter 255: Forced to Raise the Class! Willow Leaf Duckweed!

Qin Lin left the reservoir and went to Zhao Moqing's office.

Before bringing the duck out of reality, he had to get Zhao Moqing to arrange the finances and buy enough feed.

Once the ducks were brought out, they would no longer be affected by the game mechanism. They had to be fed two to three meals a day. Furthermore, the ducks produced by the game had to be fed with the best feed. The more expensive the better. After all, they had to lay face-nourishing eggs. The better they were fed, the more eggs they would lay.

In addition, he had to buy the tools to clean the ducks and the supplementary materials to ferment the duck feces.

There would definitely be a lot of these in the future.

When he arrived at Zhao Moqing's office, Qin Lin realized that she was interviewing a young man.

Zhao Moqing handed the young man's resume to him. "Mr. Yang Dong is a chemical engineering major. He also worked as a fermentation technician for duck manure fertilizer in the provincial capital. He also knows how to ferment duck manure to feed fish."

Qin Lin took the resume and pulled a chair to sit down. He looked at Yang Dong and said, "Let me introduce myself first. I'm the boss of Qinglin Villa, Qin Lin."

When Yang Dong saw Zhao Moqing, the lady boss of the villa, he guessed that the boss of Qinglin Villa should be very young. After all, such a young lady boss couldn't marry an uncle, right?

However, he did not expect the boss to be so young. He was a few years younger than him.

Qin Lin looked at Yang Dong's resume. His major was very suitable for recruitment.

He also asked Yang Dong, "Mr. Yang Dong, why did you choose to work at our Qinglin Villa? Your salary in the provincial capital is definitely higher than ours. Besides, you're from Ning City. Why did you go through so much trouble to come to Youcheng County to look for a job?"

Although Yang Dong was shocked by Qin Lin's age, he knew that he was in an interview. He hurriedly replied, "My parents died early and I was raised by my grandfather's family. I'm not young anymore. My grandfather wants me to find a girlfriend quickly and get married."

"Isn't Ming City famous for having beautiful women? A young woman from Ming City is the most flirtatious. Sows are everywhere in Tian City, and women in Ning City are the most obscene? Therefore, how can I find a girlfriend in Ning City? Isn't it good to find a beautiful woman in Youcheng County or Sand City?"

"Of course. Most importantly, my grandfather's house was demolished and we got three houses. My grandfather and uncle gave me one. It will definitely be easier for me to find a girlfriend in Youcheng County."

"..." Qin Lin.

"..." Zhao Moqing.

They looked at each other silently. So this was the real reason.

He really had a good grandfather and uncle.

Back then, they had to secretly register their marriage because they did not have a house.

A person also appeared in Qin Lin's mind. It was the breeder, Zhang Guizhu.

Why were the reasons for these two returning to Youcheng County to look for a job so similar?

Zhang Guizhu was a young lady with good conditions and was also beautiful. Because she was an only child and her father had high blood pressure and was not in good health, he hoped that she would not marry out of town. She could return to Youcheng County to find a job and a local boyfriend.

At this moment, Yang Dong continued, "Therefore, it's naturally best to have a stable job while looking for a girlfriend in Youcheng County. Coincidentally, Qinglin Villa has a job that suits my profession. Everyone knows that the job here is the best in Youcheng County."

Qin Lin glanced at Zhao Moqing and asked for her opinion.

Zhao Moqing nodded at him. Yang Dong could pass her interview for the time being. She would only know the rest after he went to work.

After all, many problems could not be seen through in an interview. That was why there had to be a trial period.

Seeing Zhao Moqing nod, Qin Lin also said to Yang Dong, "Mr. Yang Dong, you've been accepted. The internship period is a month. I'll get someone to familiarize you with the environment later."

"Thank you, President Qin. I'll perform well." Yang Dong was clearly relieved.

Qin Lin took out his phone and called Chen Dabei to ask him to come over.

Chen Dabei arrived not long after. He entered the office and asked respectfully, "Boss, Lady Boss, what can I do for you?"

Qin Lin pointed at Yang Dong and said, "Yang Dong has just been hired. Bring him to the HR department to settle the recruitment procedures. Then, bring him to familiarize himself with the situation at the duck house and choose a place to build the duck manure fermentation room..."

"Okay, Boss!" Chen Dabei nodded and walked to Yang Dong's side to call him out of the office before closing the door.

In the office.

When Zhao Moqing saw the two of them leave, she said, "By the way, we've already recruited four people to raise the ducks. I'll get them to come over tomorrow. When will your ducks arrive?"

"Tomorrow. We'll wait for Master Ma and the others to separate that reservoir area with barbed wire," Qin Lin said as he pulled Zhao Moqing over to sit on his lap. His palm also caressed her flesh-colored stockings.

These stockings were also made of silk. Although they felt good, they were clearly much worse than the Quality 1 stockings produced by the system.

"You can't tear this!" Zhao Moqing clearly thought of Qin Lin's excitement when he tore the stockings previously.

Qin Lin rolled his eyes at her. These were not stockings produced by a game. It was impossible for them to arouse his desire to tear them apart.

He returned back to business and said, "The ducks will be here tomorrow. We have to order a batch of feed, cleaning tools, and fermentation ingredients first."

Zhao Moqing nodded and said, "I'll arrange it later."

As she spoke, there was a knock on the door. She hurriedly got off Qin Lin's lap and sat back at her desk. She shouted, "Come in."

Gao Yaoyao came in with a strange expression. "Boss, Sister Moqing, there's a problem with the bridal chamber."

Chapter 256: Forced to Raise the Class! Willow Leaf Duckweed!

"What's wrong?" Zhao Moqing asked with a frown.

Gao Yaoyao explained, "It's almost 12 noon but no one checked out."

When Zhao Moqing heard this news, she frowned and logged into the villa's application to check the situation of the bridal chamber.

Like those hotels, the bridal chamber in the villa required a deposit. Furthermore, the accommodation was to be checked out before 12 noon the next day.

With the villa's current project, even if they came late on the first day, or if they could not finish it in a day because of the Sea of Flowers and rafting, they would still check out before 12 noon the next day.

Part of the empty bridal chamber was reserved for the tourists at the villa, while the rest was placed online for reservations.

After Zhao Moqing logged into the backstage and saw the exact situation, she said in surprise, "Only 15 people have checked out. The others have all renewed their rooms?"

Qin Lin also walked to the computer and saw this situation.

It was somewhat unexpected.

After all, the price of the bridal chamber had just increased.

However, he understood the situation after thinking about it. The tourists who had booked the bridal chamber yesterday should have some insomnia. After experiencing the sleep-enhancing effect, they did not care about the 100 yuan at all, so they had renewed it.

Had the price risen enough? Or did he not understand enough about the suffering of insomniacs?

Tourists did not check out and wanted to continue staying. In this situation, other hotel owners would have laughed crazily and wished they could renew their reservations for a few more days.

Qin Lin frowned. This situation was not good for the tourists in their villa.

This upgraded 'sleep-aiding bridal chamber' was to add characteristics to the villa and provide it to tourists who were traveling that day. It was a supporting project and would even give tourists a sense of anticipation.

Zhao Moqing also frowned and said, "Qin Lin, should we raise the price again? Or limit the time for tourists to book a room?"

She was in charge of so many things in the villa that her horizons had long broadened. She could not underestimate the anticipation of tourists.

The current situation of only sleeping and not playing did not match the benign state of the scenic area.

"Let's discuss it," Qin Lin said.

These tourists were forcing him to raise the price of the bridal chamber again.

The two of them discussed it and made a decision. It was clearly better to limit their stay than raise the price again.

Those who did not know better would think that their villa was greedy for money and deliberately said that they did not have a room just because they wanted to increase the price. However, their villa did not need to rely on this house to increase the price by 100 or 200 yuan.

Despite that, the keyboard warrior's sense of justice would ignore these, and the troll did not even have a brain.

It was quickly approaching noon. There were already many insomniacs online who were guarding the booking link on the official website of the villa. After knowing that Qinglin Villa had sandalwood to help them sleep and deliver three grams of special sandalwood incense powder, they wanted to book a room to experience Qinglin Villa.

In the luxurious hotel.

Wan Gu walked out of the toilet with trembling legs. Yesterday's arrangements were too much for him to handle, especially that long-legged lady. She almost tortured him to death. When he got up, his legs were weak.

Naturally, if he could, he wouldn't mind arranging for the long-legged lady to do it again. The other one was fine, but she wasn't gentle at all. She treated him like a free labor cow and made his experience very unpleasant.

After sitting down, Wan Gu picked up his phone and continued to click on the booking link to Qinglin Villa.

He did not forget his business. He was still thinking of staying in the bridal chamber at Qinglin Villa for a few nights and leaving more sandalwood incense powder to help him sleep. This concerned his plan to save his broken biological clock.

However, he had been trying to book a room for half a day since he woke up in the morning. The notification he received now was that there was no room to book.

"F*ck, are you not giving the insomniac a way out?" Wan Gu complained.

This was the first time he had seen it so difficult to book a room.

It wasn't that difficult to book a five-star hotel, right?

Insomnia was prone to being irritable, which made him directly irritable.

At this moment, countless insomniacs on the Internet who had no room to book were as irritable as him.

However, Qin Lin had no choice today.

The tourists from yesterday had all renewed their booking. He could only get Zhao Moqing to send a video to explain the reason and announce the limited time for the bridal chamber tomorrow.

Not long after noon, the company building the pontoon bridge came. After Qin Lin told them the request and the selected materials, he signed the contract. The other party would enter the construction tomorrow.

As soon as he sent away the company building the pontoon bridge, Qin Lin looked at the screen in his mind. The Xiangshui Tribute Rice in the two paddy fields had ripened. The ripening period of the Xiangshui Tribute Rice was different from the plants like watermelons and strawberries, so the time was staggered.

Qin Lin controlled his game character to harvest the Xiangshui Tribute Rice. He kept the Quality 2 rice and sold the Quality 1 rice in the game. Just as he was about to continue planting the Xiangshui Tribute Rice, he thought of something and controlled his game character to go to the Ore Town's seed shop.

He could just see if there were any floating plants in the game.

Since he wanted to build a pontoon bridge and an ornamental duck area, he had to make it as perfect as possible.

Reality was not a game. Once there were many ducks, even if there was a scientific breeding method that could ferment the feces to raise fish, the water quality would be affected in the summer heat.

Therefore, on the basis of scientific breeding, it could cooperate with some floating plants to purify the water quality. Many organic farms that were open to the public did this.

Floating plants were a type of floating water plant that did not grow in the bottom mud.

Chapter 257: Forced to Raise the Class! Willow Leaf Weasel!

These plants themselves contained chlorophyll or other pigments that could absorb solar energy and photosynthesize with the carbon dioxide in the water and air to produce carbohydrates and oxygen. Not only could they purify the air, but they could also purify the water environment. They were also important for matching fish.

Most importantly, the effects of the game were definitely stronger than in reality.

Furthermore, these floating plants also had a decorative effect on the scenery.

Qin Lin controlled his game character to look at the paddy field seeds. The aquatic floating plants he wanted could not appear in the catalogs of Level 1, 2, and 3 plants.

There were many types of plants that could be planted in Level 1 and 2 paddy fields. Previously, there were Xiangshui Tribute Rice seeds, and he could also cultivate eel and loach. He did not look at anything else carefully.

Previously, he had only scanned it roughly and realized that the other plant villas were useless.

After flipping the crop in the paddy field, he really discovered that there was a kind of duckweed seed in the Level 2 paddy field:

[Willow duckweed seed]

[This is a kind of duckweed plant. It has an extremely short growth period and an extremely rich production. After planting it, it can grow beautiful willow leaf duckweed. It can be used to purify the air and water environment. It can also decorate the lake scenery. As the water ripples, it can show beautiful wavy strips.]

Qin Lin bought the willow leaf duckweed without hesitation and let the game character return to the ranch. He scattered the seeds of the willow leaf duckweed on the two paddy fields.

Furthermore, he quickly knew how fast it grew.

It had only been a few hours. Before evening, he had received a notification in his mind that the willow leaf had ripened.

He decisively controlled the game character to pick ripe willow leaf duckweed and scattered new seeds on the two Level 2 paddy fields.

The area in the reservoir that was used to raise ducks was very big. The willow leaf duckweed harvested in one go was definitely not enough.

Then, he left the villa and drove the blue truck to the warehouse and entered the game.

When he arrived at the storage room, he was a little stunned to see the harvested willow leaf duckweed. This was because they had all been stuffed into sacks, and only some leaves were exposed.

There were also the words 'Willow Leaf Duckweed' written on the sack.

Furthermore, there were many sacks. There were a total of 10. Nine of them were placed together, and the other was placed separately.

It should be a difference in quality.

Qin Lin went over and lifted a sack. It was about 40 catties, which meant that there were a total of 400 catties of willow leaf duckweed and 200 catties of paddy field.

Then, he saw the note on the bag of willow leaf duckweed:

[Willow leaf duckweed: Quality 1]

[A very beautiful duckweed plant with many effects: photosynthesis +1, purification of the water environment +1, beauty +1, attractiveness +1, appearance +1.]

Clearly, these three attributes were unique to duckweed.

Photosynthesis could make the air better. Purifying the water environment could make the water clear, purify the water, and eliminate some of the hidden dangers of having too many ducks.

There was no need to mention the beauty, attractiveness, and appearance. They were all excellent attributes for the scenic area.

This was already an attribute similar to the triangular plum.

It seemed that the pontoon + ornamental duck project was a little sloppy.

If it was free, who knew how many people would flood in? It would be difficult to control.

With these attributes, coupled with the appearance, beauty, and uniqueness of the duck, it seemed like he still had to charge a fee to enter. Just like the Sea of Flowers, 50 yuan was enough.

He could make the pontoon bridge longer with more twists and forks, in order to accommodate more people. He could also make a walking area on the shore, which was a strolling viewing area.

Besides, didn't tourists have a hobby of feeding? They would definitely not be able to resist feeding those beautiful and cute white ducks.

Therefore, when the time came, he would write a sign that said, "In order to prevent ducks from getting sick, it's forbidden to feed outside food. If you want to feed them, you can buy the villa's special duck feed."

It seemed a good deal to take tourists' tickets and ask them to spend money to buy feed to help him raise the ducks.

Qin Lin looked at the bag of willow leaf duckweed and saw the message.

[Willow leaf duckweed: Quality 2]

[A very beautiful duckweed plant with many effects: photosynthesis +2, purification of the water environment +2, beauty +2, attractiveness +2, appearance +2.]

Seeing this, Qin Lin was already looking forward to it.

He believed that this duckweed + ornamental duck was definitely a beautiful scene.

Next, he brought all the bags of willow leaf duckweed out of the game and placed them in the truck.

Before preparing to return to the villa, he entered the game again and brought out the three Quality 2 duck eggs.

At night, he could try this duck egg.

He, Zhao Moqing, and his mother would each have one.

He wondered if they would believe him if he said it was a duck egg.

Chapter 258: This Is Clearly Arranged!

Qin Lin transported the duckweed to the reservoir. The car did not enter the villa and could enter the reservoir by another way.

When the time came, he had to set up a security booth to prevent outsiders from barging in.

When the car stopped, Chen Dabei immediately brought a few security guards forward. He knew that his boss must have brought something over again.

Therefore, without Qin Lin's instructions, he said to the security guards very tactfully, "Go up and move the things."

Qin Lin got out of the car and asked Chen Dabei, "How's the progress on installing the temporary barbed wire?"

Chen Dabei explained, "It's almost done. It'll be done before dinner."

Qin Lin nodded and asked, "How's Yang Dong?"

Chen Dabei did not think too much about it and said, "His personality is not bad and he's not lazy. After investigating the place where the duck feces are fermented, he even helped Master Ma decorate the duck house. He seems to be more professional than Master Ma in some aspects."

"I see." Qin Lin nodded.

The security guards removed all 10 sacks from the car.

Chen Dabei opened a bag curiously. "Boss, these are all duckweed. Are we going to put them in that reservoir?"

"Yes!" Qin Lin instructed, "Spread all of this in. Remember to untie the knots."

"Understood," Chen Dabei replied. He led a few security guards to carry the duckweed to the shore and got someone to pull the bamboo raft over.

They had to transport the duckweed to the middle area through the bamboo raft before scattering it.

The willow leaf duckweed was not big. It was in the shape of a thin willow leaf. When it was sprinkled into the water, it would scatter with the water. A few of them would be specially separated after being tied.

Floating duckweed had strong vitality. Not only could it survive all year round, but it could also grow again even if it was torn apart.

Not long after, Chen Dabei threw the last bag of duckweed into the water.

When the duckweed spread out in the water, Chen Dabei realized that these duckweed seemed to be very beautiful.

A security guard at the side said in surprise, "Manager Chen, these duckweeds are much more beautiful than the ones I saw in my hometown river. I was too busy to notice earlier, but now that I see them, I can't help but want to take a few more glances."

Chen Dabei naturally had the same feeling, but he did not show it in front of his subordinates. He said as if he understood everything, "This is something Boss bought with money. Is it comparable to something that no one wants even if it's given in the wilderness?"

"That's true!" The security guard felt that his supervisor made sense.

Qin Lin looked at the willow leaf duckweed with a happy expression. With the enhancement of the game attribute, the effect was better than he had imagined.

He roughly knew what Du Mu's 'Green Brocade Lake of Duckweed' meant.

When this area of water was embellished with willow leaf duckweed, and even some floating plants like water lilies appeared in the system in the future, the interweaving would definitely be beyond everyone's expectations.

With another group of beautiful white ducks swimming on it, that beauty would be more vivid.

'Floating duckweed sending clear water' and 'red palm clearing waves' were clearly a good combination.

After scattering the duckweed, Chen Dabei brought people to the other side to help Master Ma and the others install the temporary barbed wire. When he was done, the sky had already turned dark.

He immediately went to the shore to report to Qin Lin. "Boss, the temporary barbed wire has been installed."

"You've worked hard. Get everyone to eat in the canteen. I'll get the kitchen to cook a big item for you to eat." As Qin Lin spoke, he took out his phone and made arrangements for the kitchen. At the same time, he walked towards the truck and took out a bag containing three Quality 2 duck eggs.

It was indeed very difficult for these people to work on the water in the cold. Cooking a Quality 2 black carp weighing more than 30 catties could make them eat very happily.

When Chen Dabei saw Qin Lin leave, he shouted at the others with a happy expression, "The boss said that there will be an additional meal tonight. He'll give us a wild big fish to eat."

When the security guards heard this, they immediately cheered.

"Long live the boss!"

"We're in for a treat tonight!"

"Manager Chen, ask the boss if we can still work tomorrow. I still want to eat something big."

"..."

The wild goods in the villa were limited. No matter how rich the tourists were, they might not be able to eat them. Previously, the event boss had also killed big goods to reward everyone. Although they did not eat much, the taste was beautiful and they had been thinking about it.

Since their boss had specially killed one for them today, they could eat more.

"Manager Chen, are you talking about that kind of wild fish?" Yang Dong also ran to Chen Dabei's side with anticipation. He had seen many videos of Qinglin Mountain before coming to apply.

This was the quickest way to find out about the cottage. He'd seen videos of big wild fish, too. The tourists who'd eaten it had praised the thing to the skies.

Besides, he had never eaten such a big item before.

"Yes." Chen Dabei nodded at Yang Dong and said, "On the first day of coming to the villa, you almost froze on this cold water. Eat more later. Other than big goods, our villa's employee meals are also very good."

Yang Dong was naturally looking forward to it. He followed Chen Dabei to the staff canteen, but when he arrived, what attracted his attention were the waitresses and cashier girls.

Only then did he realize that the scenic area was a service industry. There must be many young and beautiful girls in their positions. He had not forgotten the mission his grandfather had given him.

Yang Dong admitted to being envious as he watched the security guard he had a good afternoon with run to a cute waitress.

Chapter 259: This Is Clearly Arranged!

He then saw a beautiful young lady in casual clothes sitting beside the waitress. She caught his eye and he immediately asked Chen Dabei, "Manager Chen, what does that beauty do in the villa?"

"She's the villa's pet breeder," Chen Dabei said as he glanced at Zhang Guizhu.

...

On the other side...

Qin Lin entered the original hall with three Quality 2 duck eggs and saw his mother and Zhao Moqing walking over.

During this period of time, Li Kai, Li Qing, and Professor Ren would eat here. He, his mother, and Zhao Moqing's meals were also prepared by Master Lin. There was no need to trouble Master Lin to cook in two different places.

Li Kai and Li Qing were already sitting in their usual seats by the window.

Professor Ren also sat at another table with his assistant.

As for Professor Liu, he had already returned to Ming City with his research assistant.

When Lin Fen saw her son coming over, she asked, "Xiao Lin, what are you holding?"

Qin Lin smiled and explained, "Duck eggs. I brought them back specially today. We each have one."

"Duck egg?" Zhao Moqing saw that the bag was not the right size and took it in confusion. When she opened it, she was stunned.

She took out a big duck egg and said in surprise, "Qin Lin, you call this duck egg?"

Li Qing and the others were clearly attracted to it.

The duck egg was too big.

Li Kai said directly, "Brother Qin, this is an ostrich egg, right?"

Qin Lin explained, "This is really a duck egg. It's different from ordinary duck eggs. The duck that laid this egg weighs more than 40 catties."

“More than 40 catties? There’s such a big duck?” Lin Fen was shocked. She had raised ducks in the countryside in the past and had no idea that ducks could grow to more than 40 catties.

Zhao Moqing was also in disbelief. “Qin Lin, you’re going to buy such big ducks for your duck house?”

When Qin Lin heard this question, he said the excuse he had made up, “Of course not in the beginning. I originally planned to buy a batch of ordinary ducks. It’s just that someone in the livestock wholesale market promoted a batch of ducks to me. He said that the breed had changed and three of them had grown to 40 catties. These eggs were born from those three ducks. I plan to go over tomorrow to take a look. It’s just that the price the other party quoted is very expensive. I haven’t decided if I want to buy them.”

“It’s very expensive?” When Li Qing heard his words, he frowned and said, “Qin Lin, is he making a trap for you? I’ve really never seen a duck weighing 40 catties, especially such a big duck egg. Don’t tell me he’s tricking you with an ostrich egg?”

Li Kai also nodded and said, “That’s right. Brother Qin, you have to be careful. It’ll be troublesome if someone really sets a trap for you. I’ve never seen such a big duck egg.”

Real friends would often get to the bottom of things at this time. The two of them treated Qin Lin as a friend. When they heard the loophole in Qin Lin’s words, the first thing they thought of was to worry about him.

“No wonder when I said I was going to the other party’s livestock farm, they kept finding excuses,” Qin Lin said awkwardly.

He really did not expect this uncle and nephew to think that someone had set him up.

Now, he could only change his strategy and follow the thoughts of his uncle and nephew.

At this moment, Professor Ren walked forward and said to Li Kai, “Xiao Li, you’re an associate professor after all. Won’t you know if it’s a duck egg with a test? Are there any instruments that can detect it?”

“That’s right. Thank you for reminding me, Professor Ren. My concern confused me for a moment.” Li Kai patted his head and led Li Qing into the shed built in the backyard to take out a few instruments and some tools. Then, he said to Qin Lin, “Brother Qin, give me an egg. I’ll help you test it. If it’s not a duck egg, the other party has definitely set you up.”

Qin Lin knew that this was a duck egg.

But he could not say it.

Besides, Li Kai was doing this for his own good.

He could only take out a duck egg and hand it to Li Kai.

Li Kai took the duck egg, cracked it on a bowl, and began to fiddle with it.

Professor Ren walked over and checked.

Zhao Moqing and Lin Fen’s attention were also attracted by Li Kai, wanting to know the outcome.

At this moment, an apprentice brought out the dishes and placed them on the table without anyone paying attention.

With such an experimental professional instrument, it did not take long to detect the duck egg.

After some time, under Li Kai's operation, the instrument's screen displayed the test data.

Li Kai looked at the data in surprise and said, "This... is really a duck egg."

"Is it really a duck egg?" Li Qing could not help but pick up the broken duck egg and look at it.

"Is this duck egg real?" Lin Fen asked Zhao Moqing.

"Yes." Zhao Moqing nodded.

Professor Ren looked at the test data and said, "Not only is it a duck egg, but it also has many substances that are beneficial to the human body. There are many ingredients that can nourish one's appearance. The duck that gave birth to this duck egg might really be a mutated breed."

Qin Lin took the opportunity to say, "In other words, the other party didn't lie to me. Is there really such a big duck?"

"To be able to give birth to such a big duck egg, that duck must not be small." Li Kai nodded, then frowned. "But if it's really a mutation, and the egg can nourish the face and beauty, why did the other party sell it to Boss Qin? Can't he keep it for himself to cultivate?"

Li Qing smiled and said, "This means that there's still something wrong with that duck, and the other party doesn't have the ability to solve it. Therefore, he wants to find a receiver to earn a sum of money, lest it all go down the drain in the end and he earns nothing."

Li Kai reacted and said, "That's possible. I heard something at the research institute. A small orchard owner was lucky to obtain a mutated grape and secretly cultivated it himself. He was afraid that outsiders would know."

"But the mutated variety was accompanied by many problems that ordinary people could not solve. In the end, the small orchard owner cultivated the mutated grape to death. When he found out that a company was willing to buy it for five million yuan, he sat on the ground and cried."

"Then if there's a problem with this duck, it means that we shouldn't buy it?" Zhao Moqing knew that there was a problem with the other party's duck after listening for a long time.

Qin Lin did not expect things to be so dramatic.

There was no problem with the duck, but Li Kai and Li Qing did not know the situation. According to their guess, it was normal. It was even possible for another person to think of a more bizarre plot.

Professor Ren looked at the test data and thought for a moment before saying, "Boss Qin, there's nothing wrong with this duck's egg, and there's no harmful substance. Just this alone shows that this mutated duck is very valuable."

“Whether or not the other party knows there’s a problem with the duck and wants you to take over, you can keep the ducks first. There are a lot of problems with mutant breeds, but just because the other party can’t solve them doesn’t mean everyone can’t.”

“I know an old friend with skills in this area. If there’s really a problem with the ducks, I’ll contact them for you and get that old friend to come over and help you resolve it.”

He was repaying Qin Lin for letting him study the medicinal wine. It was true that mutated varieties were rare, but compared to the possibility of the Qinglin Medicinal Wine’s denaturation element, it was not something a few ducks could compare to.

If there was a problem with the duck, he would get his old friend to come over and help resolve it. It could be considered making up for it.

Qin Lin really felt that it was ridiculous.

This was a clear arrangement for him.

Now this story was even more bizarre than the one he had made up.

But the key was that this was led by Professor Ren, so it was not a problem no matter how ridiculous it was.

Really, he hadn’t even thought about that.

At this point, he pretended to be embarrassed and said, “I was planning to give up after hearing what Li Qing and the others said. Since Professor Ren has said so, I’ll contact them tomorrow.”

“Qin Lin, I’ll get Master Lin to make these two remaining duck eggs into egg soup for everyone to try,” Zhao Moqing said as she carried the remaining two duck eggs into the kitchen.

This made Li Qing and Li Kai look forward to it. They were also foodies. They had never eaten such a big duck egg in their lives.

When they reached the kitchen, she handed two duck eggs to Master Lin and said, “Make these two duck eggs into egg soup and give Professor Ren, Mr. Li, and the others a share.”

“Two duck eggs for three portions of egg custard?” Master Lin almost subconsciously said, but when he turned around and saw the two duck eggs, he was dumbfounded. “Lady Boss, are these duck eggs?”

Damn... He was inexperienced and had never seen such a big duck egg.

Zhao Moqing nodded and explained, “It’s a duck egg, a new breed. The villa might produce such duck eggs in the future.”

“Is it really a duck egg? My god.” Master Lin picked up one of them and looked at it, feeling amazed.

Chapter 260: Boss, Are These Ducks?

The Quality 2 duck egg soup was quickly prepared by Master Lin.

Zhao Moqing, Lin Fen, and Li Qing were all looking forward to it. After all, these ducks were a mutated breed. No one had eaten this kind of duck egg before.

However, Qin Lin knew that although the attributes of this duck egg were very good, without the deliciousness and texture, it should taste no different from an ordinary duck egg.

He took a sip and indeed could not tell the difference between it and ordinary duck egg soup.

However, the attributes of a Quality 2 duck egg+2 would definitely not be the same as ordinary duck eggs. It was just that the effect was not shown on the surface.

The night passed.

The next day, Zhao Moqing sat in front of the makeup mirror as usual. She suddenly leaned in front of Qin Lin in surprise. "Hubby, is my skin very good this morning?"

"Yes, it makes me want to take a bite." Qin Lin looked over and nodded.

Wasn't that so? She hadn't put on any makeup yet. Her skin was clearly fair and translucent, and she looked a little more compact and delicate.

Actually, he felt something when he got up. His face was clearly refreshed, which it hadn't been before.

It was obvious that it was a Quality 2 duck egg beauty enhancement +2. The effect was clearly stronger than he had imagined.

Zhao Moqing looked at herself in the mirror in surprise. "Professor Ren said that the duck egg has a beautifying effect. I didn't expect it to be so effective."

Qin Lin leaned over with a smile and hugged Zhao Moqing to his thigh. He teased, "It shouldn't just be the effect of beauty enhancement. There should be other effects."

Zhao Moqing asked curiously, "What other effects?"

Qin Lin leaned into Zhao Moqing's ear and whispered teasingly, "Didn't you feel it last night?"

"Ah!" Zhao Moqing's ears turned red from Qin Lin's words. "What nonsense are you talking about so early in the morning?"

Qin Lin smiled slyly.

Nonsense?

It was not nonsense, but practical.

The benefits of nourishing the lungs and blood were not a joke. The effects of nourishing the yin were even more serious.

Zhao Moqing looked at Qin Lin's cheap smile and snorted heavily. Then, she sat on Qin Lin's lap and started putting on makeup in front of the mirror.

Actually, she still enjoyed Qin Lin's little romance at home.

Qin Lin also looked at the game on the screen in his mind. Other than the ripe crops, the willow leaf duckweed in the two paddy fields had ripened again.

This was already the third batch of mature plants. The second batch had matured after the battle with Zhao Moqing late last night. He had harvested and planted the third batch.

After harvesting the third batch of willow leaf duckweed, there were 20 sacks in the storage room, a total of 800 catties.

He continued to harvest the other mature crops and controlled the game character to head to the ranch.

There were round duck eggs lying on the floor of the duck house again. Furthermore, there were more duck eggs than yesterday.

This was because the 50 ducks in the second batch had already grown completely.

He would bring them all out of the game today.

Qin Lin and Zhao Moqing ate breakfast together and went to the warehouse.

There was a lot to do in the morning. Not only did he have to send the ripe crops to the villa, but he also had to take those willow leaf ducklings out of the game and transport them to the villa.

When Qin Lin arrived at the warehouse, he transported the ripe crops to the villa first. After getting Chen Dabei to bring people into the villa, he drove back to the warehouse and instructed Chen Dabei to bring people to the reservoir to wait.

When he arrived at the warehouse again, Qin Lin immediately entered the game and moved all the 20 sacks of willow leaf duckweed out before transporting them to the reservoir.

When he stopped the car, Chen Dabei was already waiting with his men. At the same time, Yang Dong was there.

Master Ma was also busy on the other side with his men. Although there were four duck houses now, there was no harm in building a few more.

Qin Lin also instructed Chen Dabei, "Move all the duckweed out of the car and scatter them in the water."

"Okay, Boss." Chen Dabei nodded and brought people to move the 20 sacks of willow leaf duckweed down. He used the bamboo raft to transport the willow leaf duckweed into the water again. Then, he began to sprinkle the area from yesterday.

With yesterday's experience, Chen Dabei and the others were clearly faster today. It took about the same time to scatter 20 bags as yesterday.

However, the area where the duckweed floated in the water was twice as big as before. It looked even more spectacular.

From afar, as the water surged, it was as if there were clear waves dancing in that area.

This scene was already beautiful, and under the attraction attribute, it attracted even more attention.

Qin Lin took out his phone and took a video of that area.

His video-taking skills were very bad, but with the attributes of the camera, he realized that the video he took was still very good. It actually had a hint of artistic conception.

Qin Lin was looking forward to the scene of this area being decorated with willow leaves and ducklings wandering around.

With that in mind, he hurriedly drove the truck out of the villa again. This time, he was going to transport the ducks.

Before going to the warehouse, he specially went to buy a PVP tarp. When the time came, he could wrap the entire boxcar in the tarp so that the ducks could not escape.

At the same time, he bought some wooden planks and wooden shelves and placed them in the car. They were divided into three layers and could increase the number of ducks transported.

What he wanted to transport was not only those big ducks that had grown up. He also planned to buy 300 small ducklings in the future. There were a total of 400 ducks, and he might not be able to transport them in one trip.

It was enough to bring out 400 ducks from the game.

After that, he could cultivate the eggs laid by these ducks in reality.
