

The Game 391

Chapter 391: Immortal Enjoys! Pilgrimage to Qinglin Villa!

At this moment, he was definitely in a real immortal experience.

Tree of Sound: pleasant +1, peace of mind +1, relaxation of the body and mind +1, relieving pressure +1.

Agarwood incense: Fragrance richness +2, promotion of body circulation function +2, calmness +2, qi circulation +2, relieving dizziness and fatigue +2

Wild Oolong Tea: Tea fragrance +2, sweet aftertaste +2, eliminate grease +2, promote digestion +2, refreshment +2, anticancer +1

It was difficult for others to experience one of the three things, but now he was enjoying it at the same time.

Who else?

If this wasn't immortal enjoyment, what was?

On the other side.

Lin Lanzi was also leading the media department to make a promotional video for the Ancient Ginkgo Garden. With the Tree of Sound, they still had to film the accompanying video.

At prime time at night, the multimedia department produced a long promotional video and released it on the official account of the villa.

The official account of the villa was clearly much more lively than before.

In the past, Zhao Moqing was in charge of the account and was not a professional. She also had to manage the finance department and the villa, so it was impossible for her to focus all her energy on this.

Therefore, the videos that Zhao Moqing took in the past were all supported by the attributes produced by the system.

Now that there was Lin Lanzi in charge, and there were professional planners, lighters, editors, and photographers, the quality of the videos taken was very high. Moreover, they could also routinely take some interesting videos and fan interaction videos of the villa itself.

Even the two animals, Red Hair and Wang Cai, were often pulled to take videos and forced to open for business.

Fortunately, the two little guys were terrifyingly intelligent. They seemed to understand what these stupid humans meant. When they pulled them and patted them, they looked like they had become spirits.

This naturally caused the number of fans on the official account to increase. As soon as Lin Lanzi posted the video of the Ancient Ginkgo Garden, many official fans saw it.

“Hello, everyone. We met again. I’m going to introduce you to a new place today. It’s the Ancient Ginkgo Garden of our villa. There are two ancient ginkgo trees here.”

Then a close-up video of two ancient ginkgo trees began to play.

The publicity for the ancient ginkgo clearly did not attract much attention from fans.

After all, the ornamental season of ginkgo trees was after October. Besides, which thousand-year-old ginkgo tree could compare to this ancient ginkgo tree?

Moreover, although the two 500-year-old ginkgo trees in the video were lush and looked a little spectacular, it was not that there were no such old trees elsewhere.

When many people saw the beginning of the video, they could not help but comment before the video finished playing:

“Qinglin Villa’s Ancient Ginkgo Garden is a little substandard compared to the past.”

“This time the ginkgo is a little run-of-the-mill. It lacks the characteristics of the things it used to have. In a time when it’s not the season to watch ginkgo, the attraction isn’t much.”

“Don’t be too harsh, everyone. These two trees are still very spectacular. They’re still passable for viewing.”

“...”

As the saying went, it was easy to be slapped in the face if you spoke too early and commented too early. Halfway through the video, the voice sounded again:

“Everyone should have heard the legend of the Tree of Sound, right? Rumor has it that there are ancient trees more than 500 years old that can emit a pleasant sound. Our two 500-year-old ancient ginkgo trees in Qinglin Villa can emit sounds.”

“We’ve recorded the sound of two ancient ginkgo trees. Next, please enjoy the Tree of Sound.”

Hearing these words, the people watching the video were clearly stunned.

The Tree of Sound?

Many people had never heard this word before.

Those who had heard it before were very curious because the sound of trees was indeed rare. Most people would never have the chance to hear the Tree of Sound in their lives.

However, regardless of whether they knew about the Tree of Sound, everyone was stunned.

A soft and pleasant voice sounded in the video.

The sound was strange. It didn’t seem to be played by an instrument, but it was very pleasant. The key was that everyone felt slowly calm and relaxed when they heard the music. The mental pressure slowly disappeared.

At this moment, there seemed to be only one thought. This was the true meaning of light music.

But this also shocked countless people.

Everyone had heard light music before. It was used to relieve mental pressure and relax the body and mind. As for how effective light music was, it varied from person to person. However, no matter what the effect was, it was definitely far inferior to this. It was crushed to pieces.

At this moment, someone reacted and hurriedly commented,

“Is this the Tree of Sound? Is it played by trees?”

“I was superficial. The previous comment has been deleted. These two ginkgo trees are awesome!”

“F*ck, I can’t believe it. I’m about to explode from frustration over my thesis. When I hear this music, my frustration slowly disappears. My body and mind relax.”

“...”

Clearly, as expected, the Tree of Sound surprised everyone.

Suddenly, the music stopped. Everyone felt a little uncomfortable at that moment, as if the air conditioner in the hot weather had suddenly cut off the electricity.

At this moment, the voice on the video sounded again:

“I’m sure everyone has already experienced the Tree of Sound. I don’t think I’ve disappointed you, right? But I want to tell everyone that listening under the two ginkgo trees is definitely more enjoyable than this recording. It’s a shock to the soul and spirit.”

“However, the Ancient Ginkgo Garden’s ability to receive guests is limited. Not everyone can listen on the spot. Only tourists and VIP guests who have booked the bridal chamber can get a free ticket to the Ancient Ginkgo Garden. The other tourists have to get it through a free lottery. There are only about 100 spots a day.”

?

Chapter 392: Immortal Enjoys! Pilgrimage to Qinglin Villa!

Everyone was shocked by these words.

The light music just now was already amazing, but now, it was said that listening to the Tree of Sound under the ancient ginkgo tree would be even more enjoyable?

This made many people subconsciously click on the booking connection of Qinglin Villa’s official account.

They had originally intended to travel to Qinglin Villa. Now, they could not help but want to experience the effect mentioned in the video personally.

However, when they entered the booking link to Qinglin Villa, they realized that there was no room to book.

There were only more than 150 bridal rooms in Qinglin Villa to begin with, because it was already difficult to book a room with special sandalwood incense that helped one sleep. How could they book a room under such circumstances?

If they wanted to book it, they had to wait for it to refresh. Then, when an empty room appeared, they had to compete with others in speed.

Many people who watched the video immediately discovered the Easter egg letters at the end of the video: The recorded Tree of Sound had already been uploaded to the QQ Music Platform. It could be downloaded by searching for the 'Qinglin Villa Tree of Sound'.

Seeing this, many people hurriedly logged into QQ music. The Tree of Sound just now was not enough to enjoy. It was good to have a place to download it.

Xiao Huihui was a planning employee of a company. She was the kind of person who would be ordered around by the supervisor and admitted defeat to the clients.

Her job was very stressful. Her greatest wish was to wait for her number of paid leave to accumulate more and then go on a trip every May without caring about the company.

She had also long made plans for the trip in May. In the beginning, she had chosen many places to go, such as West Lake, Dali, Qinglin Villa... and so on.

During this process, she would watch the video comparisons of the official accounts of these scenic spots. Then, one by one, the scenic spots began to be eliminated by her.

It was like she was playing a game of plan. She would go to whichever scenic spot lasted until the end.

However, when she heard the Tree of Sound that shocked her just now, she crossed out all the other scenic spots and only left Qinglin Villa behind. She decided to spend this year's annual leave at Qinglin Villa.

Xiao Huihui immediately logged into QQ Music and searched: 'Qinglin Villa's Tree of Sound'. As expected, this music jumped out.

Furthermore, 13,271 people had already downloaded it.

Xiao Huihui hurriedly chose to download it, but when it was refreshed, the number of downloads became 16,721.

This was unbelievable.

Although she was not a secret fan and did not pay attention to those celebrities ranking, the number of downloads should be very exaggerated, right?

However, after the music was downloaded, she could not care less. She took out her earpiece and connected it to her phone. She began to listen to the Tree of Sound in Qinglin Villa.

"Welcome to the Tree of Sound in Qinglin Villa!"

As the first sentence sounded, a pleasant sound slowly rang.

It was indeed the Tree of Sound.

A moment later, Xiao Huihui felt her body and mind slowly relax. The pressure of the job, the pressure put on her by the clients and her supervisor slowly disappeared, and her mind was open.

She felt that if she listened for half an hour before working, she would definitely be very efficient.

She felt that the Tree of Sound would probably never disappear from her song list again.

This also confirmed her intention to travel to Qinglin Villa in May.

She was going on a pilgrimage to the two ginkgo trees.

Suddenly, an angry voice sounded beside her. A tall and long-legged girl smashed the document in her hand on the table.

When Xiao Huihui saw this, she asked, "Sun Li, was your proposal rejected again?"

Sun Li said fiercely, "That bastard. It's just that he treated me to a meal and I didn't go. He deliberately messed with me and made me change Plan A and Plan B."

"Listen to the music and calm down." Xiao Huihui handed a headset to Sun Li.

She naturally knew what that supervisor was playing at. He had acne all over his face and liked to treat female subordinates in the department to meals. Who didn't understand what he was thinking? Who would like that wretched look?

However, such a person was in charge. He was not qualified to fire them, but he was better at making things difficult for others than anyone else.

Most of the department had suffered from him.

Sun Li took the earpiece and put it to her ear. She was not from a rich family, and it was not easy to find a good job in society. No matter how bad the job was, she could not quit. She could only rely on music to ease her mood.

However, when she heard the pleasant sound from the earpiece, she was suddenly stunned.

A moment later, she asked subconsciously, "Huihui, what is this music? It's awesome."

The same scene happened in many places.

Everyone who had seen the latest video of Qinglin Villa was attracted by the effect of the Tree of Sound. It was an attribute that the system directly applied to the Tree of Sound. No one could resist it. Then, most people went to the QQ music platform to download the Tree of Sound uploaded by Qinglin Villa.

This also made the villa's video more and more popular, and more downloads of the QQ music platform.

This continued to increase and ferment before it completely exploded.

The next day, when countless people took out their phones to watch short videos, they realized that the entire Internet was already filled with the Tree of Sound. What was the Tree of Sound? This Tree of Sound was too magical!... Videos like that appeared crazily.

After a night of fermentation, not only was the Tree of Sound in Qinglin Villa trending, but it also blew up the flow pool again. This time, it was even more popular than any other time.

It also made the Tree of Sound enter the eyes of countless people overnight.

Few people had heard the Tree of Sound before. In fact, most people did not know what it was.

However, last night, countless people heard the Tree of Sound in Qinglin Villa and were intoxicated by it.

1

Music was the art that resonated the most. Good music could soak people in.

However, the Tree of Sound was no longer just immersive.

Those who had heard it did not know how to describe the enjoyment.

No one would doubt that this might be the light music that would never be deleted from their song list.

?

Chapter 393: A Bull Bragging to the Sky! Master Lin Is Numb!

Early in the morning.

When Qin Lin woke up, Zhao Moqing was already watching a video on her phone.

Seeing that he had woken up, Zhao Moqing handed the phone in her hand to him. "Hubby, look. The villa's ancient ginkgo court has become popular. It should have exploded the flow pool again."

Qin Lin also looked at the video on his phone.

He had expected the Tree of Sound to be popular.

That system attribute spreads through sound. It was used on one's senses. To others, it was also a costless and most direct benefit of the system.

Furthermore, no one could resist the additional attributes of the system. It was difficult not to be popular.

This was also the reason why he asked Lin Lanzi to transmit the recorded Tree of Sound directly to the music platform.

The more people listened, the stronger the publicity.

However, after a night, the popularity seemed to be beyond imagination.

The overnight fermentation actually produced one hot topic after another.

"It's hard to believe that light music swept the Internet overnight, and that it was the sound of two ginkgo trees."

"I was lucky to hear the legendary Tree of Sound. The Tree of Sound eclipsed countless music masters and musical talents."

“More than two million downloads in one night. The first place on Penguin Music’s new song popularity list is actually natural light music. The artist is actually two ginkgo trees!”

...

As Qin Lin looked at these hot topics, Zhao Moqing’s eyes were watery as she looked at him in admiration. “Hubby, I realize that you’re really a genius in such planning and publicity.”

Qin Lin did not know if he was a genius. After all, it was all thanks to the system. If he could not do anything, he might as well give the system to Wang Cai.

However, looking at his wife’s watery and admiring gaze, he felt that he had to do something at this time. After all, the atmosphere was here, so he directly turned around... 1

...

Not long after, Qin Lin was kicked off the bed by Zhao Moqing. “You’re torturing me so early in the morning. Can’t you restrain yourself?”

Qin Lin teased, “Sigh, women are good at turning hostile.”

Then a pillow landed squarely on his face.

After washing up, they immediately put on their clothes and left.

Lin Fen had already prepared breakfast and was waiting for the couple.

Wang Cai was also happily eating a pot of rice at the side. When he saw the two of them come out, he even looked up politely and whimpered at them. Then, he lowered his head and started eating happily.

Dogs naturally did not like rice, but what if it was rice made from Quality 2 Xiangshui Tribute Rice?

Qin Lin and Zhao Moqing also left immediately after breakfast.

With the momentum of the Tree of Sound, it was obvious that many people would come for the ancient ginkgo courtyard today. Zhao Moqing had to go to the villa to make preparations first.

Indeed, after last night’s fermentation, countless people had silently booked train tickets to Youcheng County.

The three big hotels in Youcheng County clearly felt that the number of guests had increased, and they were quickly filled.

Faced with such a situation, the people from the three hotels knew what was going on even without reading the news online.

This would only happen when Qinglin Villa was causing trouble. 1

When he went online, he saw that the entire Internet was indeed filled with news about the Tree of Sound in Qinglin Villa. The two ginkgo trees had become popular.

The tickets to Qinglin Villa's ancient ginkgo courtyard this time were free benefits that limited the number of people. No matter how many people came a day, only more than 300 people could receive the benefits and personally go to the two ancient ginkgo trees to listen to the Tree of Sound.

The first to have a chance to enjoy this benefit was naturally the tourists who had stayed in the bridal area last night and had a chance to renew their booking.

Because of the sleeping-aiding effect of the sandalwood incense, there were many insomniac tourists who kept renewing their reservations for the sake of the sandalwood incense. For the benign development of the villa, and at the same time, to increase the style of the bridal chamber, it was also stipulated that tourists could only renew their reservations for one night.

Therefore, as long as it was a tourist who had just checked in last night, they had a chance to renew their booking for a night. Once they renewed their booking, they could receive tickets for free.

Kong Qi had a chance to renew his reservation. He was traveling for his 10th wedding anniversary with his wife. The first stop of the trip was Qinglin Villa. He had arrived by train yesterday morning and had already seen the Sea of Flowers and the floating bridge viewing area. He had to admit that the scenery was really good.

He and his wife had taken a lot of photos.

He was going to check out and head to the next stop after playing drifting today.

However, when he woke up early in the morning and watched a video with his wife, he saw the news of the Tree of Sound.

He and his wife were surprised to hear the Tree of Sound.

That feeling made him open Penguin Music and download it without hesitation.

"Hubby, let's renew our booking for a day. That way, we can receive tickets to the ancient ginkgo courtyard for free."

"But we have to go to the next stop after drifting today."

"We don't have to stay even if we renew the reservation. Can't we just get tickets to the ancient silver letter house?"

"It's 450 yuan a night."

Although Kong Qi said that, his actions were very honest. He held his waist and got up to wash up. He went to the dining room for breakfast and brought his wife to the hall to renew their marriage. 2

After receiving two tickets to the ancient ginkgo house, he brought his wife to the ancient ginkgo house according to the road sign.

The road to the ancient ginkgo court was a crooked little gravel road.

There were also ornamental plants planted on both sides.

After a few turns and crossing the gravel road, a large retro-style courtyard appeared in front of him. From afar, he could see two ancient ginkgo trees surrounded by the courtyard.

?

Chapter 394: A Bull Bragging to the Sky! Master Lin Is Numb!

Because of the special location, Kong Linqi did not notice this place last night.

Outside the ancient ginkgo courtyard, Chen Dabei was already guarding the exit and entrance with security guards. There were also waiters checking tickets at the entrance.

Kong Qi took out the tickets and gave them to the ticket attendant before entering the courtyard.

There were already some people inside. They should all be tourists who could renew the bridal chamber.

These people were gathered in front of the two stone monuments, discussing.

“These two ginkgo trees have such a story.”

“Who’s Master Lin? His story with the two trees is so touching.”

“That’s right. Master Lin is a loyal person. He repaid the favor and saved these two trees.”

“These two ginkgoes saved Master Lin’s family decades ago and themselves decades later.”

“...”

Curious, Kong Qi and his wife approached the two stone tablets. On them were engraved the story of a man called Master Lin and the two ancient ginkgo trees.

The couple was clearly attracted by the story. They had only come for the Tree of Sound, but who knew there was such a story?

This story added another sense of history to the Tree of Sound.

At this moment, a gust of wind blew and the pleasant sound rang.

The moment Kong Qi and his wife heard this voice, they finally knew what a more shocking enjoyment was.

They could only hear the real Tree of Sound under this tree.

...

As time passed.

More and more tourists arrived at the villa, far more than usual.

The villa was full again.

The sudden increase in tourists was all for the two ancient ginkgo trees. Those who did not book a bridal chamber could only obtain tickets to the ancient ginkgo courtyard through the lucky draw.

However, the chances of winning the tickets to the ancient silver letter house were always higher than the previous Supreme Set meal and the one-a-day big egg purchase scroll. It did not take long for tourists to win the tickets and enter the ancient silver letter house.

When the tourists who had booked the bridal chamber arrived at the villa, they immediately went to collect their tickets for free and went straight to the ancient ginkgo house.

As these tourists were shocked by the real Tree of Sound, the story of Master Lin and the two ginkgo trees became popular online.

Furthermore, among these tourists were art bloggers who were good at telling stories.

Videos of such bloggers usually did not show their faces. They usually sorted out some stories through themselves and sorted them out before telling the stories clearly to their fans.

Soon, a special topic titled "You saved my life decades ago, and I risked my life to revive you decades later" became popular.

"Since last night, the Tree of Sound has begun to sweep across the Internet. Many places around me can hear the pleasant sound."

"Everyone knows that the Tree of Sound in Qinglin Villa is pleasant to the ear. It's a gift from nature, but no one knows that there's a very touching story behind it."

"About a few decades ago, there was a special period. At that time, a child with the surname Lin had no choice but to escape into the wilderness with his family because his grandfather had become the target of persecution..." 1

"... In the forest at night, the sound of trees saved the child's family. As time passed, the child's family returned to their hometown. He grew up, got married, had children, and had grandchildren. He became Master Lin."

"But Master Lin never forgot the two ginkgo trees. From time to time, he would come to visit. Once, when he came to the two ancient ginkgo trees, they seemed to be traumatized. They withered and were dilapidated, and they could die at any time."

"When I think of how you saved my life in the past, Master Lin knows what he has to do. He wants to repay you. You saved my family decades ago, but I'm going to try my best to save you decades later."

"Therefore, Master Lin began to save trees day after day and year after year. He invested most of his monthly salary into saving the trees. In the end, Master Lin's efforts were answered. The two ginkgo trees revived and grew lush leaves. Not long ago, the Tree of Sound sounded again."

"If not for Master Lin, I'm sure everyone wouldn't be able to hear this pleasant tree cry now."

At the end of the video, there were also photos of the two stone tablets. The story engraved on them was clearly visible.

The art blogger told the story on the stone tablet again.

As this topic became popular, everyone quickly knew the story of the two ginkgo trees and Master Lin. No one expected such a touching story behind it.

All of a sudden, this matter seemed to have undergone a sublimation.

Naturally, Master Lin also became popular. There were even more and more comments online saying that he was loyal.

For a moment, Master Lin's popularity was no less than those big Internet celebrities.

Under this increasing popularity, the county naturally received the news.

When Sun Xian received Chen Li's report, he could not believe it when he saw the news on the Internet. "There were originally two 500-year-old ginkgo trees in the villa, but can they still emit such sounds?"

Chen Li nodded and said, "Yes, but as you know, the person in charge in front isn't paying attention to it at all. It's all because Master Lin was silently saving the tree. After those people went in, Boss Qin accepted the villa and supported Master Lin to save the tree. That's how he saved it."

When Sun Xian heard this, he immediately said fiercely, "It's good that they went in. If these bastards didn't go in, Boss Qin wouldn't have taken over the villa. It's impossible for these two trees to be saved by Master Lin. Look at how many people these two trees have brought us now?"

?

Chapter 395: A Bull Bragging to the Sky! Master Lin Is Numb!

"Two 500-year-old ginkgo trees can still emit this kind of tree cry. We should be able to apply for a national first-level protected plant certificate for them, right?"

"Also, the county wants to reward Master Lin. Get someone to do it as soon as possible."

Chen Li nodded and said, "Yes, I'll get it done as soon as possible."

At this moment, Sun Xian suddenly asked, "Chen Li, do you think these two ginkgo trees can bring greater fame to our Youcheng County?"

Chen Li asked curiously, "Sun Xian, do you have another idea?"

Sun Xian thought for a moment and said, "Didn't you say that you wanted to film a promotional documentary for Youcheng County's tourism? Why don't you use these two ginkgo trees as the theme? Starting from the tree saving Master Lin's family, mixed in some excessive storylines, and finally ending with Qinglin Villa being popular and applying for a 4A scenic spot to succeed. Isn't that good publicity?"

When Chen Li heard this, his eyes lit up. "That's good. With the uniqueness of these two ancient ginkgo trees, they will definitely be very famous in the future. Making such a documentary will definitely increase the reputation of our Youcheng County. I'll discuss this with Boss Qin now."

With that, he rushed out of the office.

Youcheng County was getting more and more popular in terms of global tourism and development. At a time like this, they would not let go of any opportunity to promote their development.

Besides, this proposal was indeed a good way to promote it.

...

Master Lin was popular, but he was feeling very uncomfortable now.

This was because the tourists in Qinglin Villa quickly knew that he was the chef of the restaurant. More and more tourists gathered at the restaurant to see what Master Lin looked like.

It was also an accident that Master Lin's identity was exposed.

Master Lin had no idea that he would become popular online. He did not go online. A sous chef was also old and rarely went online.

The two of them entered the restaurant normally to check. When the sous chef called out to Master Lin, the tourists who came in happened to hear it. Then, more and more people knew that Master Lin, who had suddenly become popular, was the chef of the restaurant.

Immediately after, the restaurant collapsed because there were too many people. A lot of tourists ran to the restaurant and wanted to take photos of Master Lin.

That scene was just like how those popular Internet celebrities suddenly attracted countless onlookers.

Master Lin did not understand what was going on at all. He was stunned.

In the kitchen.

The restaurant waiter and a few chefs stood in front of Master Lin anxiously.

The restaurant was too crowded for the tourists outside to operate normally, but they couldn't chase these tourists away, right?

"What's going on?" Master Lin frowned anxiously.

He was not a celebrity.

Why were these people surrounding him?

The waiter was surprised to hear Master Lin's words. "Master Lin, don't you know you're popular?"

"What's popular?" Master Lin asked with a frown.

The foreman immediately took out his phone and went online. He showed Master Lin the news about the ginkgo tree and him. "Master Lin, look for yourself."

When Master Lin saw the news, his eyes widened and he asked in panic, "This... Why is it on the news... Many people know about this?"

The foreman nodded solemnly. "Yes, many people know. Master Lin, you're very popular now. Anyway, your reputation should be higher than those celebrities today. Just look at the people gathered in the restaurant."

“Oh my god...” Master Lin subconsciously raised his hand and slapped himself.

How could this be?

It was one thing to brag and make up stories, but why did someone believe it? It was even written into a story. The worst thing was that it was on the news.

This was going to be good. Everyone knew.

He had never thought that he, a cow, could brag like this.

Were those people brainless?

Couldn't anyone tell?

Just as Master Lin was feeling vexed that he had spoken too quickly, his phone rang. Seeing that it was his boss, he immediately picked up.

Qin Lin's voice also came from the phone. “Master Lin, come to the office. I have something to tell you.”

Master Lin hung up and left through the back door. He went to Qin Lin's office. As soon as he entered the boss's office, he saw Deputy Chen.

When Chen Li saw Master Lin, he stood up immediately and went forward to hold Master Lin's hand. “Master Lin, I'm really grateful to you. It was your hard work that saved two precious ancient trees. The county is about to apply for a national level-one protected plant for these two ancient ginkgo trees. When the time comes, your contribution will be recorded in the information. The county will also award you with a huge contribution award.”

“This...” Master Lin opened his mouth, not knowing how to answer for a moment.

To be honest, he did not know how the tree was saved.

However, Chen Li continued, “Master Lin, the county has also discussed with Boss Qin to specially film a tourist promotional documentary. With these two ginkgo trees and your story as the main plot, we will find a documentary director to film it. When the time comes, we will have to ask Master Lin to help tell the story in detail.”

“Ah...” Master Lin exclaimed.

He was really just bragging. Why was he making a documentary?

Was God joking too much?

Qin Lin naturally did not object when he heard what Chen Li said.

Not only would that documentary be beneficial to the county, but it would also improve the style of the villa.

He really had to thank Master Lin for this. Otherwise, he really wouldn't know how to smooth things over.

At the thought of this, he smiled at Master Lin and said, "Master Lin, cooperate with me when the time comes. You might even have to act out your own role."

"..." Master Lin felt numb when he heard this.

There was really no way to end this.

?

Chapter 396: Upgrade Again! Special Crops: Beauty Cucumber!

The Tree of Sound in Qinglin Villa became popular online for a few days before it slowly decreased.

This was not because the Tree of Sound was no longer popular, but because the short video platform was controlling its popularity. Although the platform wanted the popularity of one thing to attract attention, it would definitely not keep investing in traffic on something that could not benefit it too much.

Streamer PK, selling goods, and advertising were the mainstream on the platform.

However, over the past week, the reputation of the two 500-year-old ginkgo and Tree of Sound had completely spread.

Now, when others talked about famous trees in the country, they would definitely think of these two ancient ginkgo trees.

On Penguin Music Platform, the light music editing of Tree of Sound was also shockingly downloaded.

Naturally, the county quickly found a documentary director to promote the travel documentary.

The other party had once filmed a documentary about Youcheng County's snacks.

In Qinglin Villa.

Master Lin was accompanying the long-haired man in the restaurant with a bitter expression.

The other party was the director found by the county. There was an assistant beside him who kept writing in a notebook.

The long-haired director said seriously, "Master Lin, let's add more elements of conflict to this transitional plot. For example, during this period, a wood thief wanted to secretly cut trees and was discovered by Lin Yuan. Lin Yuan even fought with the wood thief and was injured. Then, he helped the police catch the wood thief and filled up the story."

Lin Yuan was naturally the protagonist of the promotional documentary and also Master Lin's alias. His real name was Lin Yuan.

"But that isn't true? This isn't good. You can't lie!" Master Lin hurriedly shook his head bitterly. He couldn't lie anymore.

Wasn't this current situation caused by his bragging?

He would be a fool to do such a thing again.

He could not lie anymore.

The long-haired director smiled and said, "Master Lin, your quality of not lying is admirable, but it's just a documentary for publicity. It's still possible to process it appropriately. That's settled."

"..." Master Lin wanted to curse.

Since the other party had decided, why ask him? Besides, why was he looking for him?

After that, the long-haired director raised his request for a plump plot. Master Lin realized that he had no objections at all. Moreover, the story the other party made up was getting more and more strange.

After the long-haired director left, he could only walk gloomily into the original hall.

There were already many people taking measurements in the original hall.

Qin Lin was also gesturing at a person in charge.

These people were the ones he had hired to build the aquarium.

The original hall was empty. The aquarium plan had long been made. Previously, this matter had been delayed because of the cultivation of watermelon seeds and Xiangshui Tribute Rice seeds in the backyard.

Now that the watermelon seeds and Xiangshui Tribute Rice seeds had been successfully cultivated, the aquarium matter could naturally be on the agenda.

The person in charge also recorded Qin Lin's requests one by one.

Building an aquarium was not something that could be done in a moment. The hardest thing about building an aquarium was not the construction process, but the making of the design.

Cost, rationality, how to control the ventilation, oxygen content, reasonable coordination of the biological areas, and so on had to be planned when the design was done.

As for construction, with modern technology and materials, it could be done step by step. Instead, it was not much different from ordinary construction projects.

The person-in-charge and Qin Lin walked around. Seeing that Qin Lin had no new requests, he began to look for the people who measured the data.

When Master Lin saw Qin Lin, he went forward and said bitterly, "Boss, can you tell the county not to film the promotional video?"

"What's wrong?" Qin Lin looked at Master Lin teasingly. He was asking the obvious. After all, he knew that Master Lin must be panicking now.

Master Lin was flustered, but he couldn't tell his boss about his bragging. He could only push the blame to the director. "Boss, isn't that a lie if that director wants to add scenes for me?"

Qin Lin did not expose Master Lin. Instead, he teased, "Art processing is normal. When the time comes, we'll add the words 'advertising a documentary film based on a real story' in front of the documentary. That won't be a problem."

"..." In the end, Master Lin could only sigh helplessly and return to the dining room.

It seemed there was no way to salvage the situation.

He was already so old. Why did he want to take the medicine for regret?

Qin Lin smiled and returned to his office.

Because of the aquarium, he had not settled the matters in the game today. He would go back and play the game first.

When he returned to the office, Qin Lin immediately looked at the screen in his mind and controlled the game to do today's operation. Unfortunately, the fishing was still the same, and the mountain goods had not refreshed. The trees that refreshed were still ordinary trees.

It seemed to be another day without surprises.

However, when he brought the cut trees back to the ranch to sell, the system notification suddenly sounded:

[Character level increased. New function opened!]

The sudden notification made Qin Lin happy.

This was because the Ranches Story game had always had a vague level setting. There was not even an experience bar. It was not something that players could predict when they could level up.

This sudden upgrade was really an unexpected surprise.

Qin Lin hurriedly looked at the information on the game screen.

In addition to the Level 1 land that could be developed and the Level 2 land that could be upgraded, Level 3 could also be upgraded to another level. Moreover, this time, it could be upgraded to Level 4.

There was no movement from the paddy field or the ranch.

As expected, another medicinal garden function was opened. This medicinal garden modification required a Level 3 land.

Qin Lin did not hesitate. He first controlled the game character to develop all the Level 1 lands that could be developed before leveling up to Level 2.

Although there was long no need to move more crops from Level 1 and 2 lands into reality from the game, these lands could become one of the sources of game gold coins.

After that, he controlled the game character to upgrade a Level 3 land. However, developing the medicinal garden consumed a Level 3 land, which was equivalent to the number of Level 3 lands not increasing at all.

He directly chose to modify this newly upgraded Level 3 land into a medicinal garden.

A system prompt immediately appeared:

[Do you want to modify the medicinal garden?]

Qin Lin directly chose yes. Then, the Level 3 plot began to flip. In a moment, the Level 3 plot became a Level 1 medicinal garden.

Looking at the Level 1 medicinal garden, he thought of the Donasi Plant Root that Li Kai wanted to cultivate.

If Li Kai's cultivation failed, he could try using this medicinal garden.

Now that he had enough game gold coins, Qin Lin finally spent gold coins to upgrade to Level 4.

After doing all this, he immediately controlled his game character to go to the Ore Town's seed shop.

He wanted to see if there were any surprises in Level 4 and the new medicinal garden.

He entered the seed shop and clicked on the NPC.

In addition to the paddy field crop seeds, the option of medicinal garden seeds appeared again.

Clicking on the Level 1 medicinal garden seed to check, a list appeared: mint, honeysuckle...

There were many Level 1 medicinal garden seeds that could be sold in the game seed shop, but there were no Donasi Plant Root seeds. This might be because the game planner had limited energy. After all, it was impossible to get all the seeds into the game. If that was the case, just this list of seeds might make the game company die.

However, he was also puzzled. Why did the system decide that the Donasi Plant Root could be planted in a Level 1 medicinal garden?

After all, these Level 1 medicinal garden seeds were very ordinary and common seeds, and these Donasi Plant Root seeds were clearly so difficult to plant and cultivate in reality.

According to his previous experience, the value of the seeds at various levels in the game was related to the value of the seeds in reality. The higher the level of the seeds, the higher the price in reality.

Could it be that this Donasi Plant Root seed had once been easy to cultivate?

Or was Donasi Plant Root just hard to cultivate in the country? Easy to cultivate in some places, just not finding the right place?

Or had the previous cultivation method been wrong and the method not been correct?

Qin Lin couldn't figure it out and didn't think about it. Anyway, he had the system, so it was meaningless to understand this.

Then, he looked at the seeds that could be planted in Level 4 land.

There were also a lot of seeds in Level 4 land. Moreover, the price of these crops in reality was a little higher than in Level 3 land.

But when he scrolled to the end of the list, a surprise appeared.

Qin Lin saw a seed with a star.

The seed represented a mysterious treasure. It was very rare. It was refreshed randomly in shops and its quality was not fixed. It was not in the regular seed list.

Just like the seeds of the seedless watermelon (Quality 2) and the seeds of the Xiangshui Tribute Rice (Quality 1).

[Beauty Cucumber Seed: Quality 2]

[This is a special cucumber seed. It is a high-quality cucumber seed that has been optimized by the crop experts among the dwarfs after long research. It has improved the beauty effect of the cucumber. After a system modification, there is no restriction on seasonal planting. Planting requirements: Level 4 land.]

It was a cucumber seed, but not just any cucumber seed.

Everyone knew that cucumbers had a beauty effect. Some good cucumbers were more effective than face masks.

Because the cucumber enzyme of fresh cucumbers had very strong active biological enzymes and other substances that could effectively promote the metabolism of the body, promote blood circulation, and achieve the effect of moisturizing the skin, it made sense for some women to directly use cucumbers to apply to their faces.

The special beauty cucumber seeds that had been refreshed this time had been strengthened in terms of beauty effects. It could be said that this kind of cucumber was not used to eat. It was specially used to cover the face.

However, the planting requirement for this Beauty Cucumber was Level 4 land. Presumably, after leaving Level 4 land and planting it outside, the quality would probably decrease like watermelon.

However, as long as they could confirm that it had a beauty effect, even if the quality decreased, many women would rush to buy it.

What did women care about the most?

Wasn't it their face?

It was also the easiest to earn money on beauty.

Qin Lin felt that the system wanted him to control the key to wealth.

Previously, duck eggs had such an effect. Now, even a cucumber was for beauty. Moreover, there were more or less some restrictions on beauty eggs. This beauty cucumber could definitely be promoted on a large scale in reality.

In the future, this might even be one of the necessary dishes in a woman's kitchen.

After all, this thing was not only useful for beauty, but also for women.

Qin Lin decisively controlled his game character to buy the Beauty Cucumber seeds and headed to the ranch to plant them on the Level 4 land.

The growth cycle of cucumbers was not very long, about two months. According to the game time ratio, they could be harvested in the afternoon.

In the afternoon, the game indeed indicated that the Beauty Cucumber had been planted successfully.

Qin Lin controlled his game character to pick the Beauty Cucumbers in Level 4 land and placed them in the storage room. Then, he locked the office door.

Then, he entered the game immediately and saw the table where the Beauty Cucumbers were placed in the storage room.

At a glance, there were not many harvests. Moreover, these cucumbers were not big in size. Their skins were not green. Instead, they were a little brownish-yellow. They were not as big as normal cucumbers. They were thinner and longer, about five centimeters in diameter.

For some reason, something was wrong.

There was a message board in front of these Beauty Cucumbers:

[Beauty Cucumber: Quality 2 (75 pieces)]

[This is a special Beauty Cucumber. It's a finished product carefully studied by experts among dwarfs. It's a blessing for women: Skin whitening effect +2, skin moisturizing effect +2! Taste -2, delicious -2, special unknown effect +1]

?

Chapter 397: Are You Sure You Want to Eat This Cucumber? Perform a Special Transplant!

Qin Lin looked at the note and finally knew why it was called a Beauty Cucumber.

Taste -2, Delicious -2 was simply not edible.

Then wouldn't the remaining skin application have a +2 beautifying effect and a +2 moisturizing effect?

Moreover, there was no rule about the application area. Not only could it be applied to the face, but it should also be possible to apply it elsewhere. 2

This was amazing.

After all, a woman's attraction to a man was not just on her beautiful face. Once the defense on her body was removed, there were many things that could attract men.

However, he did not understand what this special unknown effect was.

Could there be a special medicinal attribute?

However, couldn't the medicinal attributes just be displayed?

Qin Lin was deep in thought. Could it be...

A moment later, he was out of the game with two cucumbers, wanting to try the effect of the Beauty Cucumber.

When he returned to reality, Qin Lin opened the door and left the office. He went to the kitchen to get a clean melon knife and plate, then washed the two cucumbers before returning to the office.

As soon as he entered the office, Wang Cai ran towards him with a cry. When it reached him, it squatted down and bit the QR code hanging around its neck.

The dog now treated this as its daily fun. Other than asking its mother to play Frisbee with it, it would definitely ask him to scan the QR code once a day. 1

Qin Lin took out his phone and scanned the QR code before walking towards the office.

The dog also put down the QR code and seemed to see the two cucumbers in its master's hand. It followed him into the office.

Qin Lin didn't have the time to care about the dog at this moment. He closed the office door and locked it. It would be awkward if someone saw a man putting a cucumber on his face.

Beauty Cucumbers were like ordinary cucumbers. They were not so crispy when cut. Instead, they were very flexible.

A moment later, Qin Lin cut a cucumber and placed it on a plate before applying it to his face.

As soon as the skin on his face touched the cucumber slices, he felt a cold feeling.

This was not a special attribute. It would be strange if the weather was not cold in early March.

Woof! ~

The dog barked. It had somehow crossed its legs on the desk and was staring at him. 1

Woof, woof!

When the dog saw him looking, it barked again.

Qin Lin had something on his face, so he had no time to care about it. Just as he was about to sit down on the chair, the dog barked anxiously again. As it barked, it actually raised a claw and pointed at another Beauty Cucumber.

This action surprised Qin Lin.

He knew that Wang Cai was very smart from the beginning and was very intelligent. After bringing it into the game binding and learning the Frisbee pet skill, its intelligence had increased again. However, wasn't its action of asking for something too human?

Woof!

The dog barked again when it saw its master staring at it, anticipation in its eyes.

This was a greedy dog.

Qin Lin suddenly looked at the dog maliciously.

Naturally, the dog wouldn't think about applying cucumber. It definitely wanted to eat this Beauty Cucumber. This was a cucumber with a texture of -2 and deliciousness of -2.

Qin Lin suddenly wanted to know the effect of these two attributes. Seeing that this dog had delivered itself to his door, he did not stand on ceremony and generously picked up another cucumber and threw it out.

Seeing this, the dog jumped very nimbly and used the Frisbee skill to accurately bite the cucumber into its mouth before landing steadily.

How could the dog waste time when the cucumber was in its mouth? It bit it.

With a crisp cracking sound, the melon juice instantly exploded in its mouth.

At that moment, the dog's eyes widened as if it had been electrocuted. It spat out the cucumber in its mouth and vomited.

Woof! ~

As the dog vomited, it hurriedly kicked the cucumber away and barked at Qin Lin aggrievedly.

"You wanted to eat it yourself, yet you're complaining now." Qin Lin smiled unkindly when he saw that the dog was still vomiting. Then, he sat back in his office chair.

When it was about time, Qin Lin took the cucumbers off his face and threw them into the trash can. It had to be said that after applying this Beauty Cucumber, his face felt abnormally comfortable. The key was that the moist feeling definitely far exceeded the effect of applying a high-quality facial mask.

He had accompanied Zhao Moqing to experience the promotion of one of the top 10 brands, L'Oréal.

To be honest, L'Oréal's high-quality facial mask was simply crushed into dregs compared to the moist feeling of this Quality 2 cucumber.

Even if it was Quality 1, the effect would not be inferior to this L'Oréal high-quality facial mask.

If it could be cultivated, it would definitely be bigger than the market for watermelons. Its potential might be on par with Qinglin Tea.

Qinglin Tea was something that men needed. This Beauty Cucumber was what women needed very much.

Perhaps some people would say that many women also needed Qinglin Tea, but Qin Lin believed that many men also needed this Beauty Cucumber.

Qin Lin looked at the light in his mind again and controlled his game character to go to the Ore Town's seed shop to buy seeds for the Beauty Cucumber.

Since he had obtained it, he had to get it to reality.

When this thing was cultivated in reality, not only could it be promoted on a large scale like a new watermelon, but it also had the same seasonal planting attribute as a new watermelon. There was also a lot of room for operation.

After controlling the game character to return to the door, Qin Lin locked the office door again. He glanced at Wang Cai, who was still vomiting, and entered the game with a thought. 1

?

Chapter 398: Are You Sure You Want to Eat This Cucumber? Perform a Special Transplant!

A moment later, Qin Lin appeared in the office with some seeds of the Beauty Cucumber.

The dog didn't seem to have recovered yet. It made slightly retching motions. It seemed that the effects of the taste -2, delicious -2 were very powerful.

Qin Lin ignored the dog and threw the Beauty Cucumber it had kicked away into the trash can. Then, he opened the door and went to the backyard of the original hall, planning to plant the Beauty Cucumber seeds in the artificial field.

However, as soon as he walked out of the office, he felt that planting only one kind of cucumber didn't seem to be enough. He still had to make a few disguises. Therefore, Qin Lin left the villa and bought more than ten types of seeds at the county's seed shop before returning to the villa and arriving at the original hall.

As soon as he entered the courtyard, he saw Li Kai rummaging through the soil on the ground he had driven out. He had picked out the seeds and thrown them away.

When Qin Lin saw this, he asked, "Brother Li, has it failed?"

"Yes!" Li Kai sighed and nodded. "It's already past the longest time for seeds to germinate. Furthermore, some seeds have already begun to rot. I was too naive. Although the rare special soil contains elements that improve genes, genetic changes are also probabilistic."

"Now, we have to replant the soil. We can even cultivate harsh things like Xiangshui Tribute Rice. I believe there will always be a chance for this medicinal herb planting to succeed."

Qin Lin nodded. This was within his expectations. If medicinal herbs that could repair, strengthen, and strengthen neurons were so easy to cultivate, the SMA's treatment medicine would not still be an overseas aid medicine now. It would have long become an ordinary medicine. It was impossible for it to cost 700,000 yuan.

It was precisely because it was difficult that there was no choice.

Now, it seemed that with the attributes of the special soil, there was a chance of touching it.

He thought of the medicinal garden. He could try what he had thought before. However, how to push the blame to Li Kai was a problem. He needed the other party to be absent to have enough room to operate.

Seeing that Li Kai was busy, he also took a small hoe beside him and entered the artificial water field. He would plant more than 10 seeds and Beauty Cucumber seeds near the artificial field first.

Li Kai looked at him and did not think too much about it.

After all, knowing the effect of this special soil, it was normal for Brother Qin to want to try more seeds. If any seeds were to clash with the new watermelon, it would be another new variety with genetic mutation.

Qin Lin patiently divided the artificial fields into areas and planted more than 10 seeds separately to avoid affecting each other when they grew. It was mainly to prevent those seeds from affecting the seeds of the Beauty Cucumber.

After planting Li Kai's Dosani Plant Root seeds, he poured water on them and helped Qin Lin fill a pot of water to water the seeds he had planted.

For the next two days, Qin Lin went to the backyard of the original hall to water and check every day. He would see Li Kai taking care of the ground where the Donasi Plant Roots were planted. He was very careful, just like how he had studied low-temperature genetic experiments on watermelons previously.

He wondered if he had ever thought of his low-temperature genetic experiments.

On the third day.

Qin Lin went to the artificial paddy field to water the plants, but he did not see Li Kai. Just as he was feeling puzzled, he suddenly ran in anxiously. "Brother Qin, please take care of these Donasi Plant Roots for a day. I've prepared a special potion for these plants. It's under the bar outside. Remember to pour it on for me tomorrow."

Qin Lin asked in confusion, "Brother Li, are you leaving for something?"

Li Kai hurriedly nodded and said, "Xiuwan's daughter is going to do a non-invasive spine test and then get the first injection of healing medicine. I want to accompany her to the First Hospital in the city."

"Leave it to me." Qin Lin nodded and understood.

Li Qing said that his uncle had the potential to be a bootlicker. That was really the case.

However, if the bootlicker succeeded, it would not be a bootlicker anymore. Instead, it could evolve into a werewolf and make Doctor Tang kneel and lick it.

He hoped that Brother Li would not end up with nothing.

Li Kai was leaving for a day. Didn't that give him a chance to experiment?

"Brother Qin, sorry to trouble you. I'll leave first." Li Kai left in a hurry. He was very at ease handing this seed to Brother Qin to take care of.

Brother Qin was reliable, unlike his nephew.

In the backyard.

After Qin Lin confirmed that Li Kai had left the villa, he silently picked up a small hoe at the side and dug out the seeds that Li Kai had planted.

It was impossible to take good care of it.

The experiment had to be tested.

In order to better conceal it, Qin Lin did not dig too much. He only dug some at the random intersections. When the time came, these seeds would be transplanted from the game as if they had sprouted randomly.

When he was almost done digging, Qin Lin returned to the office with the seeds he had dug out. Then, he locked the door and entered the game.

He put the seeds in the game storage box and exited the game again to return to his office.

Qin Lin controlled the game character to take out the seeds from the storage box like a game backpack.

He did not rush to the herb garden to plant the seeds because he had to control the time. For the sake of normality, he could not wait for the Donasi Plant Root seeds to mature before transplanting them, could he?

That way, even a fool like Li Kai would find it abnormal.

?

Chapter 399: Are You Sure You Want to Eat This Cucumber? Perform a Special Transplant!

Therefore, he wanted to plant this seed in the medicinal garden. When it was about time to germinate, he would personally enter the game medicinal garden to dig out the newly germinated seed.

This was also something he had not tried before.

In the past, he would only pick vegetables when the crops were all ripe. He had never forcefully operated them halfway.

According to the ratio of game time, one day was about half a year. The germinating time for Donasi Plant Roots was three to seven days.

Then this germinating time would occupy 1.6% of the half a year.

There were 24 hours and 1,440 minutes in a day. According to the ratio, it would take about 23 minutes to plant the Donasi Plant Root seeds to germinate.

If he dug it out of the game and transplanted it, it would be able to pass off as real. Even Li Kai would not suspect it.

Qin Lin suddenly felt that he was still very smart.

As for whether this idea would work, he would only know after an experiment.

With that in mind, Qin Lin controlled his game character to head to the medicinal garden and planted the Donasi Plant Root seeds in his backpack. Then, he retracted his attention from the game and immediately took out his phone to start the clock.

Time passed.

When the time on his phone passed 22 minutes and was only approaching 23 minutes, he entered the game with a thought.

Qin Lin went straight to the medicinal garden.

The medicinal garden had also become a real land in front of him.

Unlike the lands beside it, there were special quails around the medicinal garden, and the medicinal garden was still bare.

There were only some seeds dug out from the original hall and backyard. It was impossible to plant all the seeds in this medicinal garden. He still had to find the seeds.

Qin Lin hurriedly squatted down and searched the medicinal garden. In a moment, he found a seed. He could see that roots had already appeared and a small black seedling had broken out of its shell.

The leaves of this plant were actually black.

Qin Lin carefully dug out the seed again. When the seed was in his hand, it meant that such a transplant should be possible.

Then, he spent time finding the other seeds and brought them out of the game.

He looked at the screen in his mind again. The seeds of the medicinal garden in the game had been dug out, and the medicinal garden had already shown that it was not planted.

He immediately went to the backyard of the original hall and carefully planted those seeds back in the field Li Kai had made.

There were attributes of survival +2 mixed in the ground. Most of these sprouting seeds should be able to survive. As for whether they could trigger the attributes of the genetic improvement +1, it depended on the growth process later.

As long as one of them triggered a chance of genetic improvement during its growth, it could adapt to the growth environment here. Then, it could be cultivated on a large scale.

If none of them were triggered, he would be unlucky and have to redo it.

However, the growth process was so long that there was always a chance of triggering these seeds. It was better than relying on the few days when the seeds germinated.

After transplanting these seeds, it would depend on how they survived the next day.

The next day.

After delivering the things in the game, Qin Lin immediately went to the original hall and went to the land Li Kai had opened to check the seeds he had transplanted from the game yesterday.

A few were rotten. The buds that had broken out of their shells had withered. This was clearly affected.

However, some of them were still alive and well. The black buds that had broken out of their shells were stronger, which made him relieved.

Not dead was half the battle.

Now, he was just waiting for these seeds to grow.

During this process, as long as one of these unaffected seeds had the attribute of triggering a genetic improvement +1, there was a high chance that the cultivation would succeed.

Once it succeeded, everyone would definitely be shocked. At that time, they would make a name for Qinglin Laboratory.

It had to be known that Professor Ren's Chinese Academy of Sciences department had also tried many times but had never succeeded.

When the time comes, this achievement might even be printed in some medical textbooks and become neighbors with those medical greats.

As a tourism management major, he clearly could not afford such an honor. He could only wrong his brother, Li Kai. When the time came, he would definitely obtain a lot of skin and equipment from books.

Now all he had to do was wait.

?

Chapter 400: Surprise Li Kai! Professor Ren: Unless Xiao Li is a Genius!

Qin Lin did not forget Li Kai's instructions. He entered the bar in the hall and took out a pot of strong-smelling medicine.

This was the potion Li Kai had given him.

After doing everything, he also watered those seeds with these potions. Then, he went to the artificial water field and watered the seeds of the Beauty Cucumber.

After that, Qin Lin returned to his office and looked at the game on the screen in his mind as usual. He fished and cut trees.

After that, Qin Lin returned to his office and looked at the game on the screen in his mind as usual. He fished and cut trees.

Those with Quality 2 could stay in the game, and those with Quality 1 could find time to take out the game.

Other than the sandalwood incense consumed in the cave area, the sandalwood that had been refreshed a few times had also been made a lot.

There were also more than 700 boxes of sandalwood incense in the villa. They could be used for a very long time. 1

As for the mountain goods, they had not refreshed today.

After completing the usual missions, Qin Lin controlled the game character to head to the Spring Mine. After leveling up again, the fifth floor of the Spring Mine should be open.

Sure enough, when they reached the mine, there was no obstruction at the entrance to the sixth floor.

After controlling the game character to enter the sixth floor, Qin Lin took out his tools from his backpack and began to dig. Not long after, the system notification sounded:

[Congratulations on digging up special soil!]

Today seemed to be a lucky day. Another icon containing a gray-black soil bag appeared in his backpack.

It was the same special soil as before.

He continued to dig.

When he finished digging all six floors, he found two more bags of special soil and a few pieces of jade.

The harvest on the sixth floor was not bad.

Then, he controlled the game character to enter the seventh level and continue digging. After completely digging the seventh level, he also obtained a few pieces of jade ore and a few bags of special soil.

Just as he was about to control his game character to enter the eighth floor, he received a call from Zhao Moqing. There was a document that he, the boss, needed to sign.

Qin Lin could only get up and leave the office.

...

On the other side.

In the First Neurology Hospital in Ming City, Li Kai was waiting outside the operating theater with Tang Xiuwan.

The child was already inside for a spinal minimally invasive test, followed by the first injection.

Tang Xiuwan was very haggard, and her gentle face was filled with worry.

Thinking of her child's illness made her feel even more helpless.

Li Kai placed his hand on the chair and looked at his junior sister. His arms were restless, and he wanted to hug her and comfort her.

However, he retracted his hand as soon as it reached out. He could only comfort her. "Xiuwan, the minimally invasive test will not be a big deal. She will recover after the injection."

"Yes!" Tang Xiuwan nodded subconsciously.

This scene was witnessed by a woman in her late 50s.

She was Tang Xiuwan's mother. If Tang Xiuwan wanted to work and earn money, she would be in charge of taking care of the child.

She didn't know who this attentive man was, but she could tell that he cared about her daughter. It didn't take a genius to figure out that he was after her.

However, when she thought of her granddaughter's situation, she sighed.

This was a bottomless pit.

Her daughter had divorced her ex-husband. Even if she sold the house, it would not be enough for her child to get a few injections. What if it did not improve after a few injections?

No man could accept his daughter's situation, but Mr. Li pounced on her.

A moment.

The operating room door opened and a cute little girl, still under anesthesia, was wheeled out.

Tang Xiuwan immediately stood up and walked towards the doctor. "Senior Brother Chu, how's the child?"

Dr. Chu was clearly also an acquaintance of hers. He was her real senior brother in medical school, unlike Li Kai, her senior brother.

"The first injection is in good condition. The details will depend on the second injection in four months. When the child wakes up, we'll observe her for two hours. If there's no problem, you can bring her back first. You can come back for the second injection in four months," Senior Brother Chu explained.

He really felt a little regretful about Junior Sister Tang's encounter.

One had to know that there were many people who chased after this Junior Sister Tang at Xia University back then, and there was no lack of people with good conditions. However, this Junior Sister chose the worst conditions and even paid wrongly in the end. It was really a pity.

The child was wheeled back to the ward. There were two more beds inside. The children lying there were all children with SMA illnesses.

After all, as the number one neurology hospital in Ming City, this place was much better at treating SMA than other hospitals in Ming City.

The families of the two children in the ward looked a little numb. There seemed to be despair in their eyes.

"Is there really hope for Xiao Nan?" A mother who was taking care of the child seemed to have broken down. While the child was sleeping, she ran out the door and sobbed softly. "She just asked me: Mom, when will I be better? But we've already sold the house. There's really nothing we can do..." 1

“I’m really afraid. The little baby I met when I came for the injection four months ago has just come to this world. She’s six months old, but she’s going to be suggested to give up on death. What will we do when Xiao Nan comes...”

No matter how soft this depressed mother’s voice was, the sobs came in. The emotions of the other family seemed to be affected and showing signs of collapse.

Who did not treat the arrival of children as a gift?

Who did not cherish their child?
