

The Game 401

Chapter 401: Surprise Li Kai! Professor Ren: Unless Xiao Li is a Genius!

However, they could only face a cold situation now. What if the house was sold, the car was sold, and their savings were spent?

Give up?

Or was it treated until there was nothing left?

No one knew how to choose.

Their parents' nature left them with no choice. However, not every parent was rich and could withstand an injection of 700,000 yuan.

Once they were in a desperate situation, there was nothing they could do.

Other than despair, who knew what to do at this time?

It was not the first time they had come to give their child an injection. They had seen the heart-wrenching pain of helpless parents. They had also seen their child tortured until she could not say a word when she left. She could only look helplessly at her parents' pain.

The child just stared and stared until she left in pain...

Tang Xiuwan was clearly affected. Her eyes were red and her beautiful face was filled with fear.

When Li Kai saw this, he finally mustered his courage and hugged Tang Xiuwan slightly. He comforted her. "Xiuwan, don't worry. I won't let anything happen to her. Believe me."

At this moment, he was even more certain that he had to cultivate the Donasi Plant Root.

It was not only for Tang Xiuwan. Seeing his parents collapse, he actually felt very worried.

He wondered how many parents in the country were in such a situation.

If he was helpless, he would not overestimate himself.

However, with Brother Qin's special soil, it was definitely possible.

Tang Xiuwan felt inexplicably dependent on her helplessness after being comforted by Li Kai.

Then, she realized that she was being hugged by Li Kai. At a time like this, she inexplicably felt a little warm, but this was too ambiguous for her and Senior Brother Li.

Furthermore, she had just gotten a divorce and was not used to such intimacy with Senior Brother Li.

She subconsciously wanted to separate from Senior Brother Li.

Li Kai naturally felt Tang Xiuwan's actions. At this moment, he was not stupid. He put more strength in his arms and hugged her more tightly.

He was not a fool.

Tang Xiuwan did not succeed. She subconsciously looked at Li Kai and finally gave up.

Soon after, the child woke up.

The first injection was in good condition. He could be discharged after the doctor prescribed an IV. He could just get the second injection in April. 2

For the time being, there was no other way to treat an illness like SMA except by administering healing drugs. Until the last moment, being hospitalized was useless.

After the discharge procedures, Li Kai and Tang Xiuwan took the child back to Youcheng County on the train.

The old man sat in front of the sleeping child.

Li Kai and Tang Xiuwan sat together. Along the way, they were very silent, as if they had entered a cooling-off period after the hospital hug.

Li Kai also chickened out after the impulse in the hospital. He could only tilt his head from time to time and secretly glance at Tang Xiuwan.

This state remained until Youcheng County. It did not change even after sending Tang Xiuwan home.

However, with the beauty of the hospital in his arms, Li Kai was satisfied.

When he returned to the villa, the sun was already setting. He immediately went to the backyard of the original hall to check on the condition of the Donasi Plant Roots.

Brother Qin should have helped him pour the potion.

When they reached the field, Li Kai squatted down, took out a magnifying glass, and began to observe the seeds one by one, not wanting to waste any time.

He crouched down and smelled the potion that had not completely spread.

Brother Qin was indeed reliable.

The first seed did not stir. Not a hint of a new sprout breaking the skin appeared on the leather.

Li Kai began to check the second seed. It was the same.

Four seeds in a row were the same.

It seemed that it would depend on the potion he made. He would know tomorrow and the day after.

With that in mind, he looked at the fifth seed. At that moment, he looked incredulous. He even rubbed his eyes, suspecting that he was mistaken.

He looked at the magnifying glass again. The small black bud was clearly visible.

"It... it germinated?" Li Kai's face instantly revealed surprise.

He was still wondering if the potion would work when the heavens gave him a huge surprise.

Li Kai hurriedly examined the other seeds with a magnifying glass.

Although most of the seeds did not germinate, he quickly discovered a second germinating seed, a third, a fourth...

"I knew it. Haha, I knew Brother Qin's special soil was good." Li Kai could not control the excitement on his face at all and rushed to Qin Lin's office.

He wanted to share this good news with Brother Qin immediately.

...

In the office, Qin Lin's attention was already completely focused on the game on the screen in his mind. He controlled the game character to continuously dig on the eighth floor of the mine.

The eighth floor of the mine was almost finished, but so far there was nothing.

Other than gold, silver, and copper, there was not even a piece of jade, let alone special soil.

Something was wrong.

An entire floor of the mine couldn't be empty. That meant the good stuff might all be back there.

As he was thinking, the system notifications sounded one after another.

[Congratulations on digging up special soil!]

[Congratulations on digging up special soil!]

This was the second consecutive hit.

Furthermore, he had dug up two more bags of special soil.

Qin Lin also smiled slightly. It was impossible for him to not gain anything from the entire floor.

This way, he had more than ten bags of special soil stored. It was time to return to his hometown and get more soil in that old field.

?

Chapter 402: Surprise Li Kai! Professor Ren: Unless Xiao Li is a Genius!

When the laboratory began to be built, the soil excavation of the old field would have to be moved to the modification field contracted by the laboratory.

The others did not know what was going on, but only he knew the details. He would get more special soil from the game and be prepared.

Qin Lin continued to control the game character to dig. A moment later, two notifications sounded.

[Congratulations on digging up a piece of Violet Jadeite Ore!]

[Congratulations on digging up a dragon-type Jadeite Ore!]

Everything on this eighth floor was really concentrated in the area behind.

In the game character's storage box, there was also a lot of jade ore stored. There were already more than 20 pieces.

These were all surprises for Zhao Moqing when they got married.

Just as he was about to continue controlling the game character to continue digging, he suddenly heard a hurried knock on the door.

Qin Lin shouted in confusion and saw Li Kai open the office door in a hurry. He said in surprise, "Brother Qin, I have good news for you. The seeds of the Donasi Plant Root on that land have germinated."

Qin Lin smiled to himself when he saw Li Kai's expression, but he immediately pretended to be surprised. "Really? It germinated?"

Li Kai nodded affirmatively and said, "Yes, it really germinated. Brother Qin, I knew that your special soil could do it. If these germinating seeds can be cultivated on a large scale, they can definitely save many children with SMA illness."

"Brother Li, that's all your credit. You earned it with your hard work." Qin Lin immediately hinted to push the blame. Anyway, this had nothing to do with him. It was all Li Kai's doing.

Li Kai did not suspect any of this at all. In his joy, he thought of something. "I have to tell Xiuwan this good news. This news will definitely reassure her a lot."

With that, he hurriedly left Qin Lin's office.

This scene made Qin Lin shake his head.

Brother Li was really concerned about Dr. Tang.

He continued to look at the screen in his mind and excavated the remaining area of the mine's eighth floor. Unfortunately, he did not gain anything else, so he could only control the game character to return to the ranch.

Next time.

Qin Lin would go to the artificial paddy field in the backyard every day to check on the Beauty Cucumber seeds, while Li Kai was completely immersed in the ground with the Donasi Plant Root.

Three days passed.

The Beauty Cucumbers and other seeds planted in the artificial paddy field had also germinated.

Qin Lin found bamboo sticks and inserted them beside the Beauty Cucumber seeds for the Beauty Cucumber to climb the vines.

The leaves of the Donasi Plant Roots he had transplanted from the game also began to spread and grow a lot.

Li Kai looked at these Donasi Plant Roots every day and would take notes in his notebook.

After another half a month, long vines had grown out of the seeds of the Beauty Cucumber and covered the bamboo strips that pierced the field.

The Donasi Plant Roots that had been transplanted from those games had already grown a lot of leaves.

However, the medicinal effect of the Donasi Plant Root was not the leaves on the soil.

These leaves only had the effect of blooming and condensing seeds.

What was really effective were the roots under the soil. Furthermore, after the roots were cut open, they could be transplanted.

Furthermore, most importantly, the Donasi Plant Root needed to be cut and transplanted before it could condense the seeds.

As for whether there was a genetic improvement, it depended on whether these grass roots could survive after being cut open and transplanted.

What could not survive was definitely the probability of triggering a genetic improvement.

Those who could survive had definitely been triggered. Then, the seeds that grew and condensed could be planted in batches.

“Brother Qin, the roots of these Donasi Plant Roots are almost ready to be cut and transplanted.” Li Kai looked for Qin Lin and frowned. “But I have no experience in cutting open the roots of these Donasi Plant Roots. I’m worried that something will go wrong. I heard that Professor Ren’s department also failed at this step when they were studying the Donasi Plant Roots.”

“That’s why I want to ask Professor Ren to help. That department has done research on these substitute herbs like SMA. Professor Ren is also one of the people in charge of research.”

“Don’t worry, I’ll think of a way to deal with the special soil and hide it. I won’t let Professor Ren know.”

He had to ask Brother Qin for his opinion on this matter. If Brother Qin did not agree, he could only try to transplant it himself.

Since Li Kai had said so, Qin Lin naturally did not object. He still believed that the other party would handle it well.

After receiving permission, Li Kai did not hesitate and directly called Professor Ren.

...

Beijing.

Chinese Academy of Sciences.

A special research department gathered a group of the best researchers in the country.

Professor Ren was one of the people in charge of life health research.

This discipline was very wide-ranging. Now, the general research was on a breakthrough in life health drugs. The expensive drugs for several types of illnesses were all targets.

Previously, the cancer medicine that Professor Ren had conquered was not available domestically. It was also Professor Ren's results that caused the price of such medicine to decrease greatly and enter health insurance.

Originally, a treatment session would cost hundreds of thousands of yuan. Now, a treatment session would only cost 5,000 yuan after health insurance.

This had benefited countless people.

After Professor Ren made this contribution, he became the person-in-charge of a special attack team.

In an office, Professor Ren gathered his team for a meeting.

"Everyone, think about what new ideas can overcome this denaturation element." Professor Ren looked at the experimental data on the LCD screen and said to the others.

This data was the experimental analysis data of the denaturation elements contained in the Qinglin Medicine Wine.

After research, they could confirm that this denaturation element would be helpful in the research of several types of expensive drugs. As long as they cracked this denaturation element, those types of expensive drugs would also become ordinary price drugs.

Unfortunately, this denaturation element was far more difficult to conquer than he had imagined.

At that moment, Professor Ren felt his phone vibrate. A call had come in. He asked his team to look at the data first before leaving the conference room and taking out his phone.

The number was Xiao Li's.

He naturally knew that it was Li Kai from Qinglin Villa. Previously, he had asked him for seeds for the SMA substitute medicine and said that he wanted to study it. He had sent him some seeds for the Donasi Plant Root.

Their department actually did not have many seeds for the SMA substitute medicine. There were slightly more seeds for the Donasi Plant Root, but the department had paid a lot to obtain them.

Could the other party have used it all up?

There was no way to give him more.

To be honest, he did not suggest that the other party study the Donasi Plant Root seeds. This was because he also knew at Qinglin Villa that the other party was studying low-temperature genetic experiments and had touched on a little bit.

He felt that this experiment still had prospects. The results might be helpful to some of their department's experiments.

Now that the other party was going to study the Donasi Plant Root seeds, he would be multitasking and could not focus.

If he was not that kind of genius with extreme talent, it was better to be dedicated. Otherwise, it would be difficult to please both.

Besides, how could the study of substitute materials for SMA drugs be so easy?

This SMA drug was also one of the drugs they were going to conquer.

After all, a needle of 700,000 yuan was this kind of desperate nightmare for the Chinese. However, they had never succeeded in so many attempts. It was a long drawn-out battle to overcome such drugs.

Therefore, it was impossible for Xiao Li to research anything alone.

He had to persuade the other party to focus on the low-temperature genetic experiment because he still admired the other party's ability.

With that in mind, Professor Ren picked up the call.

?

Chapter 403: One Department Can't Compare to One Person! Cooking Too?

Professor Ren picked up Li Kai's call and was about to persuade him when Li Kai said, "Professor Ren, I need your help with my research."

When Professor Ren heard this, he asked, "Xiao Li, how can I help you?"

Li Kai explained, "Professor Ren, didn't I ask you for some seeds of Donasi Plant Root previously? I've been researching and cultivating these past few days, and there are already many seedlings that can be cut and transplanted, but I don't have any experience in this area, so I want to ask Professor Ren for help."

Professor Ren was clearly stunned when he heard Li Kai's words.

What had he heard?

Did Xiao Li say that he had cultivated a lot of Donasi Plant Roots?

A lot?

It couldn't be, could it?

Professor Ren hurriedly asked, "Xiao Li, are you talking about the Donasi Plant Root?"

After the department paid the price to get those Donasi Plant Root seeds, there were many research experiments at first, but the results were not good.

He had once successfully cultivated five seedlings, but when he cut and transplanted them, all the transplanted seedlings died.

This medicinal herb was too special.

If it was not cut and transplanted, the nodules would not be able to produce seeds like a man being ligated. Only by cutting and transplanting, and each nodule becoming an independent individual, could the seeds be condensed.

Wild ones could only wait for a stalk to wither before their roots naturally rotted, leaving a knot in the center to germinate and grow before they could condense seeds.

Because of this, coupled with the harsh growth environment, it was almost extinct.

The few seedlings their department had produced previously had also failed at cutting and transplanting.

Because there were limited seeds, the research in this area had to be planned.

Now, Xiao Li had cultivated a lot alone?

Could the other party really be that kind of genius?

Li Kai's voice came again. "Professor Ren, it's the Donasi Plant Root."

When Professor Ren received confirmation, he hurriedly asked, "Xiao Li, did you say that you cultivated a lot? How many seedlings have you cultivated?"

Li Kai replied, "There are more than 20 seedlings in total."

"So many!" Professor Ren was really surprised. At this moment, he could not care less about persuading Li Kai. He immediately said, "Xiao Li, you must take good care of those seedlings. I'll fly to Qinglin Villa immediately."

Xiao Li had really given him a huge surprise.

After hanging up, Professor Ren entered the conference room and said to an assistant inside, "Xiao Yu, book a flight to Ming City. Come with me to Ming City. The others can continue to study the denaturation elements in the Qinglin Medicine Wine."

"Okay, Professor Ren." Xiao Yu nodded hurriedly.

Soon, Professor Ren boarded the plane to Ming City with a box.

On the plane.

Professor Ren began to calculate silently.

The Donasi Plant Root could replace the main ingredient in the SMA treatment medicine.

Once that problem was resolved, the other drugs in the formula could also be tried with cheaper drugs of the same effect.

Then this was not a patent that belonged to the foreign pharmaceutical group.

The reason why SMA therapeutic drugs were expensive, other than the cost of the herbs themselves, was mainly the expensive scientific research cost and time of that pharmaceutical group.

The cost of the pharmaceutical company's research on this medicine was hundreds of millions.

If the cost of this experiment was placed on those large-scale illnesses, it would be nothing. The patients would only have to bear dozens or hundreds of yuan.

However, when the cost was placed on the rare small group illness, an injection of 700,000 yuan appeared.

If they used this method of cracking in lieu of medicine, not only could they avoid foreign patents, but there was also no research cost. The only thing left was the price of the herbs themselves.

After trying a match with a cheaper drug of the same effect, this SMA drug should be able to be reduced from 700,000 yuan a shot to about 10,000 yuan.

In the same 20 injections, the price decreased from 14 million to about 200,000 yuan.

If they entered health insurance again, it might be cheaper for the people.

What did that mean?

Despair turned to hope.

A terminal illness became a disease that everyone could cure.

Once successful, it could cause a sensation.

Naturally, this would also seriously harm the interests of foreign pharmaceutical groups. However, compared to the interests of their compatriots, the interests of foreign pharmaceutical groups were nothing.

However, this was the expected premise that those Donasi Plant Roots could be cut and transplanted successfully.

...

This time, Professor Ren was welcomed by Qin Lin and Li Kai.

When Qin Lin saw Professor Ren get out of the car, he immediately went forward to welcome him. "Professor Ren, we meet again. I'll arrange a place for you to rest first."

"Boss Qin, let's go take a look at those Donasi Plant Roots first," Professor Ren said anxiously.

How could he be in the mood to rest at this time? His entire body and mind had long flown to the Donasi Plant Root.

Li Kai could understand Professor Ren's feelings. He smiled and said, "Brother Qin, then we'll accompany Professor Ren to see the Donasi Plant Root first."

As a researcher, it couldn't be more attractive now.

Qin Lin nodded.

The two of them brought Professor Ren into the villa, but they did not go to the original hall. Instead, they went to the area where the new watermelon was planted and arrived at one of the circled fields.

He could see more than a dozen large pots in the field. Each pot was filled with soil dug from the ground in the backyard of the original hall. There was also an entire Donasi Plant Root seedling transplanted into the pots.

?

Chapter 404: A Department Can't Compare to One Person! Cooking Too?

He naturally did this because he did not want Professor Ren to probe too much into the land and paddy field in the backyard.

Now that things had come to this, it was up to Li Kai.

Professor Ren was not in the mood to investigate this. He jogged to the pots and observed them. In just a moment, his face was filled with excitement as he praised, "It's really the Donasi Plant Root. Xiao Li, you're amazing. How did you do it?"

How could he not be excited?

It was not that their department had not done experiments, but they had not been able to produce so many Donasi Plant Root seedlings at once.

This kind of vegetation that treated, repaired, and strengthened neurons was too difficult to cultivate.

Li Kai naturally knew that this was related to the special soil, but he said, "Professor Ren, this is just luck. It just happened to be cultivated, so I don't have any experience in the cutting and transplanting behind. I asked you for help. Moreover, it's really cultivated. Only Professor Ren and the others can produce the finished medicine as quickly as possible."

Professor Ren smiled and said, "If you're not capable, you won't be able to cultivate more than a dozen stalks with luck. Xiao Li, why did you think of cultivating the Donasi Plant Root when you're doing low-temperature genetic experiments? I was quite surprised when you called me previously."

This question made Li Kai hesitate for a moment before answering in embarrassment.

After all, he was crazy and impulsive about love.

At this moment, Qin Lin smiled and said, "Professor Ren, the child of a junior sister that Brother Li likes got SMA illness. Her husband didn't want to take responsibility and abandoned her and the child. Brother Li planned to cultivate this SMA medicinal material for his junior sister."

"You don't know, but in order to cultivate this Donasi Plant Root, Brother Li almost guarded those seeds. He even studied a potion to water these seeds."

Anyway, this was just to brag to Li Kai and let Professor Ren know that this was cultivated by Li Kai with his blood, sweat, and tears. There was no other reason, and it had nothing to do with him.

When Professor Ren heard these words, he looked at Li Kai strangely. "I didn't expect Xiao Li to be so loyal."

Who would have thought there was such a story?

These Donasi Plant Root seedlings were actually cultivated because of a woman?

If he really relied on these seedlings to transplant a large number of plants and solve the illness problem of the SMA, this story would definitely become a story that would be discussed enthusiastically in the medical world in the future.

If Xiao Li could get the beauty in the end, this story would be the perfect scientific love story.

Who didn't like stories like that?

The way Professor Ren looked at Li Kai changed completely. The admiration in his eyes could not be concealed at all.

No matter why Xiao Li had studied the roots, there was one thing he could not hide. He had not sent the seeds for long.

In such a short period of time, the other party had cultivated more than 20 Donasi Plant Roots that could be cut and transplanted. This was enough to make those people in the department blush.

No matter how this process went or if it relied on luck, this result was enough to prove that the other party was a genius.

It was difficult not to admire such a person.

He wanted to poach the other party to his project defense team.

Once this succeeded, the other party's reputation would probably not be weaker than his.

Li Kai was a little embarrassed under Professor Ren's gaze. He hurriedly changed the topic and asked, "Professor Ren, how do you want to transplant these seedlings?"

"Take a look at the nodules first. Xiao Yu, take out everything," Professor Ren instructed his assistant.

Xiao Yu had been carrying a large box. When he heard the instructions, he immediately went forward and opened the box. He could see many tools and tubes of liquid in the box.

Professor Ren took out a special pair of tweezers and a magnifying glass and squatted in front of a Donasi Plant Root. He used the special tweezers to remove the soil and observed it with a magnifying glass.

After a while, Professor Ren said, "There are a lot of nodules on this root. There are a total of five of them. We can transplant five of them. Xiao Li, there's no time to lose. Let's undergo the transplant immediately!"

Li Kai asked, "Professor Ren, are you sure you don't want to rest?"

"What's there to rest for?" Professor Ren said as he took out tools from the box and a special small hoe made of aluminum alloy. Under his instructions, the assistant, Xiao Yu, went to the side and dug with the small hoe.

Professor Ren took out another tube of liquid and handed it to Li Kai. "Xiao Li, this is nutrient solution F76. You should know how to dilute it, right?"

"Professor Ren, you've brought this thing here." Li Kai's face lit up with joy and more confidence as he held the potion.

This was a nutritional agent specially developed by Professor Ren's department to cultivate rare plants. Not only was it expensive, but it was also very difficult to obtain in the outside world.

Qin Lin could not help with the rest. He could only watch as Professor Ren, Li Kai, and the assistant busied themselves. They cultivated him with the game medicinal garden and then transplanted the Donasi Plant Roots into the field beside him.

With the attributes of the special soil, there should be some that could successfully stimulate genetic improvement, right?

While Qin Lin was idle and watching Professor Ren and the other two get busy, he called Gao Yaoyao and asked her to send three bottles of Qinglin Tea over.

Since Professor Ren did not want to rest, he could not let him be tired. If he was tired, he would drink tea to recover his strength.

As soon as he hung up, he suddenly looked at the game on the screen in his mind in surprise.

Another plot mission appeared. An NPC entered the farm. It was the gourmet he had not seen in a long time.

[We meet again. I heard from the mayor that you're very helpful. I'm holding a food festival. Can you help me prepare some food? I can give you a book of culinary skills experience as a thank you!]

Food festival?

Qin Lin was a little surprised. It was actually this plot mission because it was in the old version.

This was a fried rice mission. After completing it, he could obtain a technique for cooking fried rice.

In the game, this was a mission worth doing for a player who cooked to collect preferences.

However, if he did this mission, the reward seemed to be the fried rice skill experience book, right?

He wondered what attributes fried rice added.

However, if he used Quality 2 Xiangshui Tribute Rice as the ingredient and coupled with the additional attributes of this system's fried rice, it would be very good, right?

He wondered if he could make shiny fried rice like the Chinese small master?

Li Kai looked up and saw that Qin Lin was in a daze. He said, "Brother Qin, Professor Ren helped out without even resting. As the host, shouldn't you prepare dinner for him tonight?"

How could Qin Lin not understand what he meant? He just wanted him to cook. He also smiled and said, "Sure, I'll cook for you guys tonight."

“Fried rice? Brother Li, let’s not make a scene.” Li Kai immediately said firmly, “Please make fish. As a big boss, you can’t be stingy with fried rice. Your Wang Cai doesn’t even eat it.”

When Qin Lin heard this, he teased, “Then don’t eat it when the time comes. If you eat it, you’ll be like Wang Cai. Coincidentally, Wang Cai is a princess.”

“...” Li Kai inexplicably felt that something was wrong.

However, Qin Lin had already left and returned to his office to do the Gourmet’s plot mission.

The mission was not difficult. It was still to send some materials and so on. It was just that this gourmet tortured people and did not say everything at once.

After saying it all at once, his backpack was enough to bring it over at once. He had to say it one by one. After saying it, he would let them run once. After that, he would let them run again.

Wasn’t this cheap?

No wonder he was also a target in the Ore Town Girl version, but he was the least popular.

Who would like a b*tch, right?

However, he still had to do the mission. After spending some time running the mission, the system notification sounded again:

[Congratulations on obtaining the Special Cooking Skill, Fried Rice Experience Book!]

This was really a fried rice skill experience book.

He did not hesitate. He locked the office door and entered the game. Replacing the game character, he saw the message that had been given to him by the skill book:

[This is a special culinary skill book. After using it, you can obtain culinary skill experience regarding fried rice. You can make all kinds of fried rice and retain the attributes of the materials. Skill additional effect: Taste +1! Delicious +1! Appetite +1! Fragrance +1! Aftertaste +1!]

This information was not bad. It had two more attributes than the previous fish culinary skill.

The key was that he could still retain the attributes of the materials.

If he used Quality 2 Xiangshui Tribute Rice to make fried rice, then it would be texture +3 and delicious +3.

Was Quality 3 fried rice okay?

And it was fried rice that could relieve aging.

He wanted to see if Li Kai would eat it. If he did, he would be Wang Cai’s companion.

?

Chapter 405: What Immortal Scrambled Eggs Is This? The Best Black Pot Hero!

[Do you want to use the Fried Rice Skill Experience Book?]

Qin Lin decisively chose to use it.

Just like before, when he used fish culinary skills and tea techniques, information instantly surged into his mind and was deeply remembered.

And that familiar muscle memory.

Qin Lin originally thought that the fried rice skill was just a simple fried rice skill, but that was not the case after receiving the information. Many cooking methods appeared in his mind.

For example, egg fried rice, Yangzhou fried rice, sausage fried rice, tomato fried rice, curry fried rice, bacon fried rice, fruit fried rice, and so on.

He really did not expect there to be so many types of fried rice. Previously, he only knew about egg fried rice.

Thinking about how he had to welcome Professor Ren tonight, he also exited the game. At the same time, he brought out the Quality 2 Xiangshui Tribute Rice and two Quality 2 Beauty Eggs.

If he said he would make fried rice, he would make fried rice.

Fried rice culinary skills + Quality Xiangshui Tribute Rice + Quality 2 Beauty Eggs. When the time came, only he would have Quality 3 egg fried rice.

With this Quality 3 egg fried rice, it would probably be a waste to make other things.

When the sun set, Qin Lin left the office with his things. He first went to the dining room kitchen and caught a Quality 2 wild fish from the fish pool. He took a big fish head and placed the other fish into the freezer. Just the egg fried rice alone was not enough. He still had to have a fish head soup to accompany it.

Then he headed for the original hall.

The original hall was going to be built and modified in a few days.

When the time came, he would have to wait for the manor villa to be built.

When he entered the hall, he realized that Li Qing was already in the hall with his wife, Lin Liu.

Li Qing had stayed in this villa for so long. He was probably here to ask for public food. Otherwise, he would not be able to eat public food for a long time after getting pregnant.

“Boss Qin, I’m here to disturb you again.” Lin Liu greeted him politely when she saw him enter.

Qin Lin also smiled and said, “Welcome. Why would I disturb you?”

“Qin Lin, are you cooking again tonight?” Li Qing’s eyes lit up as he accurately discovered the ingredients in Qin Lin’s hand.

If there was anything he looked forward to the most in Qinglin Villa, other than wine, it was Qin Lin’s culinary skills.

Qin Lin's delicacies were unknown elsewhere, but they should not be eaten in Ming City or even other places in Min Province.

"Professor Ren is here to help deal with the laboratory and cook a meal for him," Qin Lin explained and entered the kitchen with his things.

Li Qing followed directly. "Qin Lin, I'll help you."

Lin Liu shook her head when she saw this. When she was cooking, she had never seen her husband take the initiative to help her.

She was left alone and left the hall to look for Zhao Moqing in the office.

Previously, in order to get wine, her husband and Qin Lin had left her alone in the villa. Zhao Moqing had been playing with her and even played all over Youcheng County. The friendship between women had long been formed, and they still often chatted on WeChat.

Since her husband had been seduced by Qin Lin, she would go and seduce Qin Lin's wife. This was fair and square. 1

Lin Liu quickly arrived at Zhao Moqing's office. When she entered, she saw Zhao Moqing chatting with a gentle woman. "Moqing, I didn't disturb you, right?"

When Zhao Moqing saw Lin Liu, she invited her in surprise, "Sister Lin Liu, when did you come? Come in quickly."

Lin Liu smiled and came in. "Sigh, my husband is so infatuated with your husband that he doesn't even want to go home. Naturally, I have to find him myself."

Zhao Moqing smiled when she heard this. "Sister Lin Liu, let me introduce you. This is Tang Xiuwan, the person in charge of our villa's medical room. Dr. Tang, this is Sister Lin Liu."

With that, she looked at the two women strangely.

She knew that Mr. Li Kai was eyeing Dr. Tang. If the two of them were going to get together, then these two women would be family.

Lin Liu suddenly said, "Moqing, Qin Lin is cooking again tonight. I really envy you for having such a good husband."

Zhao Moqing naturally knew Qin Lin's culinary skills. When she heard Lin Liu's words, she was really a little proud.

After all, Qin Lin would cook a delicacy that other women could not eat even if they wanted to.

Then, she thought of Mr. Li Kai and Tang Xiuwan and said to Tang Xiuwan, "Dr. Tang, it's rare for Qin Lin to cook tonight. You should join us!"

She naturally wanted to create an opportunity for the two of them.

...

Not long after.

Qin Lin was already washing the Xiangshui Tribute Rice in the kitchen and preparing to cook.

Although Li Qing said he was helping, he was actually just watching from the side. What was the point of making fried rice?

However, when he saw the rice Qin Lin washed, he said in surprise, "Qin Lin, this Xiangshui Tribute Rice seems to be fuller and more crystalline today."

There was always some difference between Quality 2 Xiangshui Tribute Rice and Quality 1.

Qin Lin did not explain. He took out the small wooden bucket for steaming the rice and placed the Quality 2 Xiangshui Tribute Rice in it to boil.

Rice was still better steamed from a wooden bucket than cooked from electric rice.

"Qin Lin, are there any other ingredients you want to help wash? I can help." Li Qing seemed to have been watching and asked in embarrassment.

Qin Lin smiled and said, "I'm eating egg fried rice tonight. There's nothing to wash."

"Egg fried rice?" Li Qing could not help but be stunned.

There were vendors selling egg fried rice everywhere. This was the simplest food.

He just did not expect Qin Lin to make such simple food.

With the other party's culinary skills, wasn't it too degrading to make egg fried rice?

However, Qin Lin said, "Old Li, your uncle and Professor Ren should still be at the plantation. Call them over! Otherwise, the egg fried rice will not taste good when it's cold."

?

Chapter 406: What Immortal Scrambled Eggs Is This? The Best Black Pot Hero!

"Okay!" Li Qing nodded and walked out of the kitchen. When he entered the hall, he saw Zhao Moqing walking in with Lin Liu and Tang Xiuwan.

He greeted the three women and called his uncle.

Not long after he hung up, Li Kai and Professor Ren came in.

Li Kai saw Tang Xiuwan at first glance and his eyes lit up. "Xiuwan, you're here too."

Tang Xiuwan nodded gently. "The lady boss brought me over. She even said that the boss personally cooked today."

Li Kai smiled and said, "Then you're in luck. No one in the entire province can compare to your boss's culinary skills. I guarantee that you'll bite your tongue when you eat what he cooks."

"Senior Brother Li, aren't you exaggerating?" Tang Xiuwan said with a smile.

Although she had never eaten any delicacies, she had still eaten some delicacies. It was not to the extent of biting her tongue.

“You’re exaggerating more and more.” Li Qing shook his head at his uncle and entered the kitchen. He could smell a very strong fragrance already wafting out.

That surprised him.

He had smelled the mellow fragrance of Xiangshui Tribute Rice more than once. It was definitely incomparable to the one in front of him.

This was definitely not just any Xiangshui Tribute Rice.

Just as Old Chen and Old Ma had said, one would never know how many good things Qin Lin had here. He would inadvertently take out something surprising.

Thinking that this was what Qin Lin used to make fried rice, he inexplicably looked forward to it.

Street vendors made fried rice everywhere, but which vendor could use this kind of Xiangshui Tribute Rice as material?

At this moment, Qin Lin also lifted the bucket and opened the lid.

The mellow fragrance of Quality 2 Xiangshui Tribute Rice +2 was released unscrupulously at this moment.

Li Qing was even more sure that this was different from the Xiangshui Tribute Rice they had eaten before.

Qin Lin had already taken out the rice inside and placed it in a large basin. Coupled with his mother and Moqing’s share, he had to make a lot of egg fried rice.

Qin Lin took the Quality 2 Beauty Egg at the side and a bowl. Such a big Beauty Egg was actually cracked open with one hand.

Even if many chefs could not do this, egg fried rice was also one of the types of fried rice. This egg was also in the muscle memory given by the system.

The next moment, Qin Lin threw the eggshells into the trash can and took his chopsticks to stir the yolk and egg white of the Beauty Egg. At the same time, he had already poured some of the Quality 2 Xiangshui Tribute Rice into the pot.

At the same time, he poured some of the evenly and delicately beaten egg into the pot.

He could not put too many eggs and rice in the egg fried rice at once. It was not easy to taste evenly.

He had to roast these rice and eggs twice.

In the next moment, Qin Lin seemed to have been possessed by the God of Cookery in the movie. His smooth actions of picking up the spoon made Li Qing unable to take his eyes off him again. 1

He could only say that the muscle memory given by the system was awesome.

Not only was that action fancy and beautiful, but it also seemed artistic.

If he went to film a gourmet program, there would be no need to edit it.

Soon, under Qin Lin's full operation, in less than three to four minutes, a large pot of steaming egg fried rice was ready. All the rice grains of the egg fried rice gathered together and actually formed a golden piece. It was very beautiful, like the legendary golden rice.

Although it did not bloom with golden light like the egg fried rice at home, it was definitely appetizing at a glance.

Furthermore, with the additional attributes of the culinary skills and the perfect preservation of the materials' attributes, this was a delicious +3, taste +3, aftertaste +1, fragrance +1, mellow +2, appetite +1, yin-nourishing lungs +2, yin-nourishing blood +2, beauty-nourishing skin +2, rich nutrition +2, vitamin VPP anti-aging +2 egg fried rice. 1

What level of immortal egg fried rice was this? 1

With this egg fried rice, those medicinal meals that cost more than 100,000 yuan each would be beaten up.

Moreover, under the +1 attribute of the fragrance of the fried rice, the mellow fragrance was even more attractive. Li Qing could not help but swallow and say, "Let me try it."

With that, he picked up a small spoon, scooped up a little egg fried rice, and put it in his mouth.

As soon as he ate it, Li Qing's eyes widened in shock.

Was that deliciousness and texture something that egg fried rice could have?

He couldn't believe it was only egg fried rice in his mouth.

Who could imagine that a simple egg fried rice could taste so good?

He even felt that this simple egg fried rice was even more delicious than the fish Qin Lin had made previously.

Originally, he thought the saying on television that delicious food often only required the simplest ingredients and cooking was more or less an exaggeration. 1

But now he knew that this was not an exaggeration. It was true.

As long as one's culinary skills were superb, they could make a simple egg fried rice so delicious.

After taking a bite, Li Qing could not help but take another spoonful. He even wanted to take the basin and eat it.

In the end, he resisted because that would be rude.

Qin Lin had already swung the spatula again like flowing water. His left hand grabbed the handle of the pot and shook it. A moment later, another pot of egg fried rice was out.

“Bring the egg fried rice out for them to eat first. I’ll make fish head soup again.” Qin Lin finished the fried rice and instructed Li Qing before dealing with the Quality 2 fish head again.

“Okay!” Li Qing nodded and walked out with two pots of egg fried rice.

He was also eager to eat.

In the hall.

Lin Fen arrived too.

Beside him, the dog and the squirrel Red Hair were barking at each other. One was standing on the bar and the other under the bar.

?

Chapter 407: What Immortal Scrambled Eggs Is This? The Best Black Pot Hero!

Zhao Moqing also called everyone to sit down.

According to the original plan, she arranged for Li Kai and Tang Xiuwan to sit in the corner.

Although Li Kai did not know that Zhao Moqing had done this on purpose, he felt that this seat was really awesome.

Seeing Li Qing bring two pots of egg fried rice to the table, he joked, “Is it really fried rice? Brother Qin can’t be so stingy, right? I think there should be fish, right?”

“Uncle, let me tell you. If you don’t eat this egg fried rice, I can eat your portion for you,” Li Qing said teasingly. After putting down the two pots of egg fried rice, he sat beside Lin Liu. “Honey, try it quickly. Qin Lin’s egg fried rice is really amazing.”

“Professor Ren, it’s the same for you. This egg fried rice will definitely not disappoint you.” Li Qing did not forget to help call Professor Ren.

“Li Qing, you’re talking about an egg fried rice. Let me try it first,” Li Kai said as he got a bowl of egg fried rice. He took two bites with his chopsticks and was stunned. He felt the deliciousness and texture and exclaimed, “I’m f*cking superficial. This egg fried rice is really amazing.”

He really hadn’t expected this.

When he heard Brother Qin talk about fried rice, he thought that there was not much room for maneuver.

No matter how good Brother Qin was at cooking, there was a limit to the taste, right?

However, the result proved that he knew nothing about Brother Qin’s culinary skills.

Li Kai hurriedly got another bowl of egg fried rice for Tang Xiuwan. “Xiuwan, this egg fried rice is very delicious. Try it too. Don’t eat too quickly or you’ll bite your tongue.”

When Li Qing saw this, he felt that his uncle had already reached perfection in a short period of time. 1

Tang Xiuwan was a little embarrassed. She wanted to roll her eyes at Senior Brother Li.

How afraid was he that she would bite her tongue? He had already reminded her twice.

However, she was curious about her boss's culinary skills.

From what Senior Brother Li said, the boss's culinary skills should be very high.

However, when she picked up the bowl and really ate the egg fried rice, she finally knew what Senior Brother Li meant.

She could not describe the delicacy.

The moment she took a bite, the irresistible taste exploded in her mouth. The fragrance filled her mouth, making her unable to resist taking a few more bites.

Suddenly, she gasped and looked embarrassed.

Because it was so delicious, she ate it too quickly and really bit her tongue.

She could only pretend that nothing was wrong and continue eating silently. Otherwise, Senior Brother Li would laugh at her.

Professor Ren was not particular about food. He was more concerned about research. However, with his indifferent attitude, he looked incredulous after eating the egg fried rice in his bowl. He had a new understanding of Boss Qin.

Lin Liu was already tasting it silently. Without saying a word, she couldn't believe she was addicted to egg fried rice.

Zhao Moqing and Lin Fen looked at each other. Only the mother-in-law and daughter-in-law understood what they meant.

Soon, Qin Lin came out with a bowl of fish head soup.

The delicious fish head soup of Quality 3 was clearly a perfect match for the egg fried rice.

The meal was irresistible.

Lin Liu couldn't help but praise, "Qin Lin, your simple egg fried rice and fish head soup are even more delicious than Old Yang's banquet."

Li Qing nodded and said, "Old Yang was so angry that he was hospitalized last time. Countless rich people in Min Province feel regretful and miss that Red Gate Feast. However, compared to Old Yang, Qin Lin's culinary skills are really much better. If Old Yang were here, this simple egg fried rice and fish head soup would definitely not be so delicious."

Professor Ren, who had been silent all this while, suddenly said, "Boss Qin is amazing. This egg fried rice is even better than the national banquet."

These words silenced everyone.

After all, even Li Qing and Li Kai had never eaten a state banquet before.

Other than those who could eat at that place, they were either real big shots or people with outstanding contributions.

Professor Ren was clearly such a person.

In other words, had they eaten something better than a state banquet today?

To be honest, no big shot other than them could eat this kind of egg fried rice, right?

Because of the aftertaste +1 attribute, after eating this meal of egg fried rice, they could not help but pout. They still wanted to eat, but their stomachs were bulging in protest.

...

The next day.

Qin Lin followed Li Kai and Professor Ren to the field where the Donasi Plant Root was transplanted.

The original 20-odd Donasi Plant Root seedlings had already been cut and transplanted to more than 130.

Now it was up to these Donasi Plant Roots to survive.

However, in less than a day, more than 30 of the 130 plants that were transplanted rotted.

This made Professor Ren and Li Kai nervous.

Qin Lin had also been paying attention to the two of them. Since so many of them had withered so quickly, it meant that these had not triggered the genetic improvement attribute.

Another day passed.

Another 30 or so began to rot.

Another day passed.

There were only 12 of the original 130 plants left.

At this moment, Professor Ren and Li Kai's faces were already a little solemn.

If the last 12 stalks also began to rot, it meant that they had failed.

Qin Lin could not help but feel a little nervous.

He had used the game medicinal garden to germinate these seeds. Could it be that they were so disappointed that they did not trigger the attributes of genetic improvement?

Fortunately, these 12 stalks were very strong. They were still intact on the fourth day. On the fifth and sixth days, they had already grown a little and began to germinate new leaves.

This made Professor Ren and Li Kai look happy.

Qin Lin also knew that two seeds had triggered the attributes of genetic improvement. These 12 seedlings were transplanted from those two seedlings.

At this point, he silently withdrew.

Anyway, all of this had nothing to do with him. It had already been proven that Li Kai had worked hard to make it happen. That was the same explanation no matter who asked.

When the SMA healing potion was produced, Brother Li would cause a sensation. At that time, he would be the best scapegoat.

In the future, if the laboratory produced any genetically mutated crops, others would think that it was very normal. Didn't they see that Professor Li Kai, who had settled the SMA, was in charge of that laboratory?

On the seventh day.

In the transplanted field.

Professor Ren and Li Kai looked seriously at the condition of the 12 Donasi Plant Roots over and over again.

After confirming that there were no problems again, Professor Ren could not help but say to Li Kai, "Xiao Li, you're going to be famous soon."

With that, Professor Ren hurriedly took out his phone and dialed.

If he reported this news to the higher-ups, everyone in the department would be shocked!

However, the most important thing now was that Xiao Li was from Qinglin Laboratory. This Donasi Plant Root cultivation was the result of Qinglin Laboratory.

Someone from the higher-ups had to speak to the people from Qinglin Laboratory. As for how to discuss it, it was not something he, a researcher, could worry about.

?

Chapter 408: The New Watermelon Is About to Be Promoted! The Little Squirrel Is Asking for Help!

Time always passed inadvertently. There was no way to reach out and grab it. A month passed quickly in the blink of an eye.

Time passed into April, and it was the second month of spring.

In the room.

Qin Lin woke up early in the morning and looked at the screen in his mind. He picked the ripe crops in the game one by one and controlled his game character to send them to the storage room. Then, he looked at Zhao Moqing, who was still sleeping beside him, and secretly leaned forward to kiss her lips.

Zhao Moqing had been eating Quality 2 Xiangshui Tribute Rice and Beauty Eggs for a long time. Her skin was getting better, more moist, and more beautiful.

Her skin was as good as a little girl's, but she had the charm of a woman.

Qin Lin had succeeded in kissing her. Just as he was about to get up, he realized that Zhao Moqing's fair arms were wrapped around his neck as she looked at him with watery eyes.

Seeing this, he did not hesitate. He picked her up and walked towards the bathroom.

Before he reached the door, the clothes on him were almost gone.

...

After a morning performance, Qin Lin left for the warehouse.

Entering the game, he did not head to the storage room to move things as usual. Instead, he entered the ranch house.

He could see that there was a lot of furniture in the house. Among them were a few chairs of the same style. The furniture and chairs were all wooden and beautiful.

These were either made of rosewood or red sandalwood.

Over the past month, Mount Notre Dame had also refreshed two more rosewood and red sandalwood, which he had used to create these.

Those chairs were the ones he wanted to take to the office to match the rosewood desk and the red sandalwood tea table.

Qin Lin walked to the largest desk.

This desk was made of Quality 1 rosewood. It weighed more than 300 catties and was originally built for Chen Shengfei.

In the beginning, he had promised to help Chen Shengfei investigate the rosewood. In order to better conceal it, he had specially built this table and placed it in the game for a period of time.

According to the game time ratio, this thing was more than 20 years old.

At the thought of this, he took out his phone and took a video of the rosewood desk. At the same time, he said, "Old Chen, I found a good rosewood. The wood is definitely more than 30 years old. It weighs more than 300 catties. Do you want it? If you want it, I'll help you get it."

After filming a video, he exited the game with a thought and returned to the warehouse. He sent the video to Chen Shengfei's WeChat.

Ming City.

In the chairman's office of the Blue Ocean Corporation, Chen Shengfei was handling the company's documents. When he received Qin Lin's WeChat video, he clicked on it immediately.

The first thing he saw was an office table. Then a very large hall. The layout was a little retro, but it was very artistic. He wondered where it was.

Then, Chen Shengfei recognized a rosewood desk in the video.

It was even bigger than the one in Qin Lin's office.

When he heard Qin Lin's words in the video, Chen Shengfei immediately replied to Qin Lin, "Yes, help me get it first. Then, I'll transfer the money to you at the villa. Don't let anyone snatch it."

Although the age of the rosewood, which was more than 30 years old, was not as old as the one in Qin Lin's office, such a big desk was extremely rare.

This coupled with the finished product and the overall artistic value, there were also people who bought it for 6,000 yuan per catty.

Once it was too late, it might be someone else's collection.

Over at the warehouse, Qin Lin received Chen Shengfei's message and replied, "OK."

It did not matter if it was money or not. As long as Old Chen liked this thing.

When he was done, he entered the game again and headed for the storage room.

In addition to the crops harvested yesterday and in the morning, there were many other Quality 2 items in the storage room. For example, the Quality 2 Beauty Egg harvested from the ranch duck house, the Quality 2 Watermelon harvested from the Level 3 land, the Quality 2 Beauty Cucumber harvested from the Level 4 land, and so on.

Other than those that were transported to reality, most of the Quality 1 items had been sold to the system for gold coins, while more and more Quality 2 items were kept.

In addition, there were jars of wine stacked high in one corner of the storage room.

These wines included wine brewed by Qinglin Brewery with Quality 1 Xiangshui Tribute Rice, and ordinary wine brewed by Qinglin Brewery.

Over the past month, he had moved in a lot of ordinary wine. He had even ordered a lot of other types of wine online.

These had been in the game for some time. According to the game time ratio, they were five to 10 years old.

In the built manor villa, he had asked Sun Ming to specially build a wine cellar. In the future, he would put these wines into the wine cellar's collection.

At that time, these wines would make the outside world go crazy for them.

In addition to these normal wines, there was also brewed medicinal wine.

The medicinal wine brewed with Quality 3 wild ginseng had not been touched except for by Old Master Li. It was originally brewed with 30-year-old wine, but it is almost 60 years old now.

There was also medicinal wine brewed by Cherokee roses and myrtles. It was originally brewed and put in. It was more than 60 years old.

There were also three subsequent bubbles that were 20, 35, and 45 years old.

Other than that, his luck was not bad over the past month. The mountain goods had also refreshed myrtles and cherries twice. He had also brewed two medicinal wines that nourished the blood, qi, and kidneys. They were also five and 10 years old.

With this wine, when the manor villa was built, his wine cellar should be very popular.

?

Chapter 409: The New Watermelon Is About to Be Promoted! The Little Squirrel Is Asking for Help!

After that, Qin Lin began to move today's things out of the game and shipped them to the villa.

As for the rosewood desk, he was not in a hurry to move it. He would get it out tomorrow and leave it for a day.

When he arrived at the villa, he handed the moving goods to Chen Dabei. He also took out his phone and sent another message to Chen Shengfei. "Old Chen, it's done. The things will arrive tomorrow. Coincidentally, you have to come over tomorrow."

Ming City.

Chen Shengfei also received the message quickly. He immediately called his secretary into the office.

"President Chen, what can I do for you?" the secretary asked Chen Shengfei as soon as he entered.

Chen Shengfei patted the desk in front of him and said, "Get someone to help me move this desk to the warehouse after work today. I'll arrive with a new desk later."

"Okay, Boss!" The secretary nodded and left.

Chen Shengfei looked at the WeChat message and could not help but sigh. Qin Lin was still reliable.

At the same time, he was a little touched. After all, he had only mentioned it casually back then. He did not expect Qin Lin to still remember it. He had made the right friend.

...

Qin Lin entered the villa and went straight to the original hall.

The outside of the original hall had changed drastically. Even the entrance to the door had become a door frame with crystal-colored metal because the aquarium had officially started work.

Qin Lin entered. The engineers inside were busy.

The person in charge recognized Qin Lin and greeted him immediately. "President Qin, shall I show you?"

Qin Lin nodded and followed the person-in-charge.

The construction of the aquarium extended the distance to the outside of the original hall, which was the original kitchen.

The kitchen had naturally been demolished.

The overall style of the aquarium was science fiction retro. It was what Hollywood movies often called the Atlantean art style. It was very, very nice to look at it alone.

Qin Lin looked around and also entered the backyard. In order to not affect the artificial paddy field in the backyard, there was a brick wall in between.

When the aquarium was built, the back door into the backyard would be completely closed. At that time, he would have to enter the backyard from the other side.

When Qin Lin arrived at the artificial paddy field, he could see that there were already more than ten types of crops in the paddy field, such as carrots, cabbages, okra, beans, melons, and so on.

These were naturally used by Qin Lin as disguises. The really important things in this paddy field were the Beauty Cucumbers. The buds on them had already begun to condense into small melon seeds.

When these Beauty Cucumbers ripened, he would get Li Kai to test them.

At that time, Li Kai would be surprised to find that this cucumber had a beauty effect. Then, it would be a new variety of cucumber that relied on special soil genes to mutate.

It was simply the perfect plan.

Qin Lin observed for a while and realized that there was nothing wrong with the Beauty Cucumber, so he headed to the 100 acres of land where the new watermelon was planted.

This area had long been green. There were lush watermelon vines everywhere. One could see that there were also watermelons growing in the watermelon field.

It had been almost 50 days since these 100 acres of watermelons were planted. The growth period of the new variety of watermelons was short, and these watermelons could mature quickly.

Most of these watermelons were planted with colchicine when they germinated.

The triples harvested from these melons could be planted in batches to produce more seedless watermelons.

This was also the trouble with seedless watermelons. To obtain such seeds that could not form germ cells, one had to go through this cultivation process.

Qin Lin looked at the watermelon and went to the plantation that was surrounded by three layers. In the field were the 12 Donasi Plant Roots.

In a month, 12 stalks had already grown lushly. There were also special flower buds opening on them. They were slowly condensing seeds.

Professor Ren had been staying at the villa with Li Kai every day to take care of these 12 Donasi Plant Roots.

In order to prevent any accidents, the two of them even borrowed a few security guards from Chen Dabei's security department. They guarded him 24 hours a day and no one else could enter.

This was a hope for the two of them to completely resolve the SMA illness. Furthermore, the seed was condensing and was about to succeed again. When the time came, other than the ones that were left behind, Professor Ren would also want to collect two of them and return to the capital to experiment with the production of the SMA healing potion.

Qin Lin remembered what Professor Ren had reminded him a few days ago. When this SMA illness treatment potion was produced, someone from above would definitely come to discuss the Donasi Grass Root with Qinglin Laboratory.

He had to think about this carefully.

Qin Lin returned to his office and dealt with the villa's matters. He also took a look at the situation of Qinglin Food Company and Qinglin Laboratory.

On Qinglin Food Company's side, Qinglin Tea Drink Factory was already producing at full capacity. In addition to Wang Yang, the agent of the provincial capital of Min Province, the two provincial capitals of Zhe Province and North Province had also chosen an agent.

However, under the current reputation of Qinglin Tea, these two agents were not promoted as quickly as Wang Yang in the provincial capital of Min Province.

Moreover, the two agents from Zhe Province and the Northern Province originally had channels. It turned out that Wang Yang did not have his own channels. This had to be said that Wang Yang was really capable.

Even Chen Shengfei and Ma Liewen had praised this guy's ability.

Over the past month, Wang Yang had also occupied most of the functional drinks market in Min Province. He and Deng Guang were also considering expanding the beverage factory later. When the production capacity was sufficient, they would give Wang Yang the general agent of Min Province.

The other was Qinglin Ketchup.

In addition to the original factories that worked double shifts to produce at full capacity, the fund loan owed to Youcheng County had been repaid. The new factory had also been built in the Redland industrial area.

?

Chapter 410: The New Watermelon Is About to Be Promoted! The Little Squirrel Is Asking for Help!

Moreover, Qinglin Ketchup was developing extremely quickly. The market share of promotion had already reached 2%.

Although it was only 2%, it had to be known that a lot of ketchup was in the gap between the top 10 brands. Its market share was not even 0.2%, and the bottom 10 brands only had a 5% share before. Now, it has naturally fallen by 5%.

As long as Qinglin Ketchup exceeded this market share, it could squeeze out the top 10 brands and become one of the new top 10 brands.

What Qinglin Ketchup lacked now was time.

However, the new factory for Qinglin Ketchup was already under construction. When it was completed, the new factory could accommodate more production lines. When production capacity caught up, it would be easy to squeeze into the top 10 brands.

Finally, there was Qinglin Laboratory.

The laboratory had the 400 million yuan invested by Chen Shengfei and Ma Liewen and had already rented a building to transform it. Naturally, this building was only used as a temporary laboratory for work.

Shen Li had already contracted a piece of land to build a perfect crop genetic laboratory with an investment of 100 million yuan.

Although this laboratory could not compare to the laboratories of those large companies after it was built, it was definitely not small. It was considered very shocking in a place like Youcheng County.

Youcheng County also paid special attention to this laboratory. The construction and contract procedures were all given the green light. In addition to giving many policies, they also sent a director to follow up the entire time.

And now, Qinglin Laboratory had something to deal with immediately, which was the promotion of the new watermelon.

After Shen Li took those seedless watermelon seeds from him, he sent people to find places to plant them in various towns in Youcheng County.

Those watermelons were equally ripe now.

Tomorrow, everyone would go to the various towns to investigate and see the exact growth of the watermelons before promoting them.

Chen Shengfei and Ma Liewen had originally come for this matter.

Although the two of them were only shareholders, they wanted to participate in the first product of this laboratory because they knew the prospects of this new watermelon.

Qin Lin was looking at the information when he suddenly heard a faint sound outside the door. There seemed to be the sound of claws scratching the door.

Puzzled, he got up and opened the office to see Red Hair clawing at the door. He could actually see the anxiety in its eyes.

Seeing Qin Lin open the door, Red Hair hurriedly scurried to his shoulder and grabbed his collar.

“Little guy, why are you in such a hurry?” Qin Lin looked at Red Hair in confusion.

Red Hair, on the other hand, was leading him by the collar and pointing out. It clearly wanted him to quickly walk in the direction it was pointing.

Qin Lin understood and followed the position the little guy pointed at. Soon, he arrived at the original buffet restaurant and barbecue place.

This place had always been empty. At first, he did not think of any renovation. Later on, Zhang Guizhu suggested surrounding it and transforming it into a pet house so that pets could come in to play. At the same time, it could be transformed into a pet breeder's rest area.

Qin Lin also agreed to this plan.

Although there were only squirrels now, he could also buy other pets from pet merchants in the future.

Therefore, it had taken half a month to find someone to decorate this place. There was also a wall outside, and many animal patterns were sprayed on the wall.

As soon as he arrived, Red Hair rushed in.

When Qin Lin walked in, he saw Zhang Guizhu and two girls anxiously surrounding a squirrel in a self-service kitchen.

The two girls were newly recruited to take care of the pets. After all, Zhang Guizhu was the only one. She did not even have a break. She had wanted to recruit them before the New Year.

Qin Lin walked over and realized that something was wrong.

The squirrels around the three girls had bulging stomachs. "Is this squirrel pregnant?" he asked in surprise. "What's wrong with it?"

Besides, the squirrel was in bad shape. It seemed to be dying.

Red Hair barked anxiously beside him.

When Zhang Guizhu saw that Qin Lin was here, she also said anxiously, "Boss, this squirrel is indeed pregnant. We didn't realize it previously and fell and injured it while playing. The situation is a little bad now. We don't have any treatment methods at all. Moreover, there's no pet hospital in Youcheng County that can treat it. We can't even send it to Ming City, Xia City, and the provincial capital in time."

"Squeak!" Red Hair's eyes were filled with anxiety as if it wanted to express something.

Qin Lin was puzzled and asked the little guy, "Did you do this? Are these your wife and child?"

As soon as he finished speaking, three more squirrels immediately crawled out from the side. They seemed to be staring at him and squeaking at him. 1

What did this mean?

It was a little messy.
