

## The Game 421

### Chapter 421: Sent to the Hospital! I Can't React For A Moment!

When the people of Lower House Village thought about how much money they could have earned from the land they were panicking about, many of them hated Guo Guan and his father to the core.

Therefore, not long after, the Xitai Town police station received a police report that someone had torn down a civilian house in Lower House Village. When the police arrived, it was Guo Guan's house that had been torn down. The village chief's wife had been sent to the hospital as her leg had been injured.

The entire village seemed to have placed their resentment on Guo Guan and his son. They even took extreme measures in their anger. However, no one reflected at all. If they were not greedy, would they have agreed with this father and son?

If it was just this father and son, would things have ended up like this?

People were always good at finding other people's mistakes. They were better at blaming others and ignoring their responsibilities.

None of the snowflakes had been innocent during the avalanche.

As for Qin Lin, he did not care about the village anymore.

Shen Li was responsible for promoting the watermelons.

However, Professor Ren's news forced him to call Chen Shengfei, Ma Liewen, and Shen Li over.

He had to tell the three of them about this.

The matter was naturally about the 12 Donasi Plant Roots.

Chen Shengfei and the other two did not know about this yet.

This time, Professor Ren naturally reported that Li Kai had cultivated 12 Donasi Plant Roots. This injection of 700,000 yuan was naturally a huge problem for the people.

In order to solve the problem of the SMA illness, Professor Ren's department had been trying, but they had not succeeded.

Therefore, the supervisor of Professor Ren's department was already shocked that Li Kai had cultivated these 12 Donasi Plant Roots.

Under Professor Ren's suggestion, the entire department immediately began to debug other substitute recipes for cracking the SMA healing potion.

Otherwise, why would the higher-ups let someone of Professor Ren's level stay in Qinglin Villa for so long?

Their priority now was to solve the problem of the SMA disease treatment potion.

Now, the 12 Donasi Plant Roots had already begun to condense seeds. Someone was about to be sent down.

These 12 Donasi Plant Roots nominally belonged to Qinglin Laboratory, so the higher-ups naturally had to talk to Qinglin Laboratory.

Chen Shengfei, Ma Liewen, and Shen Li were called to the office together and looked at Qin Lin in confusion.

Shen Li asked, "President Qin, you suddenly called me, President Chen, and President Ma over. You should have something important to say, right?"

Chen Shengfei and Ma Liewen also looked at Qin Lin.

"There's something I want to say. Brother Li has developed something else recently," Qin Lin said as he handed the three documents to the three of them.

That was Li Kai's experimental report on the raw material for the SMA illness medicine, the Donasi Plant Root. He had forced Li Kai to write this. After all, if Brother Li took the blame, the show would be completed.

Chen Shengfei and Ma Liewen naturally knew about Li Kai. The Li family had asked Li Kai to come to Qinglin Laboratory, and the two of them had actually guessed some inside information.

Shen Li's thoughts were simpler. He did not know Li Kai's background and only knew that Professor Li Kai was the person in charge of the laboratory. However, he had never asked about the laboratory.

Laboratory research companies like this had always been separated by research and development.

He was fully responsible for the development and operation, and he had no right to ask about the laboratory without President Qin.

Unless he received an equity reward one day and joined the board of directors to become a member.

He did not expect Professor Li Kai to have new results when the new variety of watermelons had just begun to be promoted.

He looked at the document immediately and was stunned when he saw the experimental report on the raw material for the SMA illness, the Donasi Plant Root.

Professor Li Kai had cultivated such a thing?

Wasn't this too impressive?

The key was that the report also mentioned that Professor Ren had come to help Professor Li Kai transplant the Donasi Plant Root.

This was even more shocking.

He naturally knew what kind of person Professor Ren was.

Such a person had actually come to help Professor Li Kai do cultivation experiments. This was enough to show how awesome Professor Li Kai was.

When Chen Shengfei and Ma Liewen found out about this, they were also surprised. Although they knew that Li Qing's uncle had done research at the Ming City Research Institute in the past, they really did not expect him to be so awesome as to create such a thing.

After the three of them finished reading the document, Qin Lin also said, "Now, the higher-ups are coming to the laboratory to discuss these 12 Donasi Plant Roots. What do you think we should do?"

When the three of them heard this, they pondered for a moment. Then, Chen Shengfei said, "Qin Lin, this SMA illness has always been a problem for the higher-ups, right? After all, 700,000 yuan per injection is a nightmare for 99% of families."

Shen Li said, "However, there are too few SMA diseases. Even if this Donasi Plant Root is cultivated in batches, we won't be able to earn much if we sell it cheaply. It won't be appropriate if it's too expensive."

"Then we won't sell it. We'll just donate it," Ma Liewen suddenly said. "Now that the laboratory has a new variety of watermelons, we don't have to earn money from this. If we donate it directly to the higher-ups, we can gain favor with the laboratory."

Chen Shengfei nodded again and said, "Indeed, this kind of favorable impression seems to have no benefits, but the hidden benefits are not something that can be compared to earning that little money."

Shen Li also echoed, "President Qin, I think President Chen and President Ma make sense. Some things can only be gained if there are losses."

"Since you've said so, let's decide on that. Donate it." Qin Lin nodded. Actually, he had wanted to donate it at first. There was no need to earn this kind of money. 1

?

Chapter 422: Sent to the Hospital! I Can't React For A Moment!

Now that he heard Chen Shengfei, Ma Liewen, and Shen Li say that, he was sure that this was the right choice.

Since he had made a decision, there was no need to continue discussing this matter. Qin Lin also brought the three of them to the field where Li Kai cultivated the 12 Donasi Plant Roots.

...

The next day.

In Qinglin Villa, Professor Ren and Li Kai went to the geographical location of the 12 Donasi Plant Roots as usual to take care of them and record the data.

However, before they could do so, Professor Ren suddenly received a call. As soon as the call went through, he said in surprise, "They're arriving soon? Why didn't they inform us in advance?"

With that, Professor Ren hung up and entered the villa immediately to wait in the parking lot.

Not long after, three taxis stopped and a group of people got out.

These people were clearly led by a middle-aged man with glasses.

When Professor Ren saw the middle-aged man, he immediately went up to him. “Minister Lu, why did you come over directly?”

When Lu Chengfeng saw Professor Ren, he immediately smiled and said, “They wanted to inform Ming City and Youcheng County of the arrangements, but I refused. I took the plane, train, and taxi myself.”

Professor Ren nodded and said, “Only Minister Lu doesn’t care about such extravagance. Now, shall I bring you to see Boss Qin first?”

Lu Chengfeng nodded and said, “Yes, that’s more important. During this time, the various teams in the department have already done their best. They have cracked the other secondary materials’ formulas for the SMA healing potion and found substitutes. Now, they’re just short of the main ingredient, the Donasi Plant Root.”

“Besides, health insurance was going to negotiate a new round with the foreign medical group. After they got word from us, they delayed the negotiation and are waiting to hear from us.”

“That’s why I’m taking a Donasi Plant Root back this time to make the finished healing potion as soon as possible.”

When Professor Ren heard this, he knew the importance of the matter. He led Minister Lu towards the office and asked, “Minister Lu, I’m sure you already have a plan to discuss with Qinglin Laboratory.”

Minister Lu nodded. “Before I came, the department had already made several negotiations. I believe the negotiators behind me can definitely negotiate a good outcome with Qinglin Laboratory.”

Professor Ren looked at the people and nodded. The negotiator from the department was the top in the country. By bringing these people over, it also showed that the higher-ups were paying unusually close attention to this matter.

Indeed, the higher-ups were paying abnormal attention to this matter now.

After all, there were many rare diseases in the country, and many people suffering from such diseases. However, the cost of treatment for these rare diseases was also very high.

If SMA was included in health insurance, then he had to consider other rare diseases. The amount involved was not in the billions, but hundreds of billions.

These were the reasons why the medical insurance immediately delayed the negotiations when they heard that they could make their own medicine.

If they could make their own medicine, it would include health insurance at an extremely low price. There would be even more room to operate on other rare diseases.

This was also why Minister Lu was in such a hurry.

...

In the office.

Qin Lin retreated from the game, still holding a basket with bottles of wine inside. It was the 60-year-old Qinglin Medicine Wine.

Other than the fact that it was a silver bottle, like the 40- and 50-year-old ones, the vintage dates were engraved on the bottles.

After that, he had to wait for the first batch to reach 70 years.

As he was thinking, he heard a knock on the door. He immediately placed the wine under his desk and went to open the office door.

When he saw Professor Ren and the people behind him, he was clearly stunned.

When Professor Ren saw Qin Lin, he immediately introduced, "Boss Qin, this is Minister Lu sent by the higher-ups. He's here for the Donasi Grass Root."

Qin Lin immediately invited Minister Lu to sit down.

Professor Ren had mentioned this before, but he did not expect Minister Lu to come so quickly.

As soon as Minister Lu sat down, he went straight to the point and said, "Boss Qin, I hope you don't mind our sudden visit. I'm sure you know that we're here for the Donasi Plant Root."

"The higher-ups really need the Donasi Plant Root cultivated by Qinglin Laboratory. This SMA illness has been torturing the sick children and families. To these people, this illness is a nightmare."

He was naturally playing the emotional card. Qinglin Laboratory had cultivated the Donasi Plant Root, so they must know about SMA illnesses and the difficulties of the domestic patient's family.

This way, these negotiators he had brought with him could better start negotiating.

Just as Minister Lu was about to instruct the negotiators, he suddenly heard Qin Lin say, "Minister Lu, our Qinglin Laboratory naturally knows the difficulties of those patients' families, so the shareholders of the laboratory have already decided to donate the cultivated Donasi Plant Root to the higher-ups."

"Okay, then let's have a preliminary discussion..." Minister Lu was saying habitually when he was suddenly stunned.

What did Boss Qin say just now?

Donate it?

The negotiator behind Minister Lu was stunned.

They knew that this was a serious matter. Before coming, they had stayed up all night to make several negotiations. They wanted to successfully persuade Qinglin Laboratory during the negotiations.

But what was this now? They had not made a move, but the other party had simply said that he would donate?

Was the negotiator still useful?

Had he stayed up late for nothing?

When Professor Ren heard this, he was also stunned for a moment. Then, he smiled and thought of the last time he wanted to study the denaturation elements in the Qinglin Medicine Wine. The other party had also donated it just like that.

Not everyone had Boss Qin's breadth of mind, especially since he was so young.

?

Chapter 423: Blowing Up Li Kai! Special Watermelon?

Minister Lu was indeed caught off guard by Qin Lin's words.

Before he was sent down, he had also expected many possible negotiations with the other party.

But he really did not expect the other party to donate it directly.

"Boss Qin, you're really donating it to us?" Minister Lu asked in disbelief.

To be honest, it was not the first time he had been in charge of such a thing, so he had seen all kinds of operators. Some of them complained about the hard work of the business when they started talking, some complained that the research funds were too expensive, and some directly said that they could be supplied at a low price. He had really never seen anyone donate directly.

Although SMA was a small group illness, if the other party wanted to earn money, he could still earn a lot. After all, there were a lot of people suffering from the SMA illness in the world.

The young man's words made him admire him.

"Yes, before Minister Lu came, the shareholders of the laboratory had already held a meeting to confirm it." Qin Lin nodded generously.

When Minister Lu received Qin Lin's confirmation again, the joy on his face could no longer be concealed.

If Qinglin Laboratory directly chose to donate, it would be equivalent to no research cost. Not only could they promote the price of the SMA treatment at the lowest price, but they might also be able to play some special roles overseas.

After all, in the face of SMA illnesses, no family in any country could afford it. For example, in Korea, there were even more people suffering from the SMA illness than in their own country. Furthermore, the price was even higher than theirs, and the families had it worse.

For example, in China, they also had a medical group that had developed a one-time treatment SMA healing potion, but the price of this potion was 2.15 million dollars a needle.

How many families in the country could fork out 2.15 million dollars? The other party's SMA treatment environment was even more difficult than theirs.

Expecting the medical group in the country to lower the price for its people? It was impossible unless the medical group's conscience had been discovered.

That could do a lot.

At this moment, Qin Lin said, "Minister Lu, I'll get the laboratory's general manager to prepare the documents later."

"Boss Qin, thank you very much for your contribution." Minister Lu could only thank him sincerely.

Faced with such a young man, there was no need to say too many official words. Otherwise, he would be at a disadvantage.

When Professor Ren saw this result, he also smiled and said, "Minister Lu, I told you that Boss Qin is a good person, right? It's not just this Donasi Plant Root. He also has a medicinal wine that treats hemorrhoids that contain a special denaturation element."

"This denaturation element is helpful for many kinds of medicinal research. Boss Qin also donated it to us for research. His medicinal wine is worth 60,000 yuan a bottle, but he has never cared that our research would make his medicinal wine worthless."

Minister Lu nodded. He also had some understanding of the denaturation element research of Professor Ren's team, which made him think more highly of Qin Lin.

When he returned, he should think about how to repay the Qinglin Laboratory.

Although the other party had said that he had donated it, the higher-ups still needed to protect such a company. They could not really take it for granted that he had donated, and still had to compensate him.

No matter what position Qin Lin took, they could not ask for it blindly. It was not a benign relationship.

In ancient times, there was a story about Zi Gong's redemption. It said that when the people of Lu Country saw their compatriots encounter misfortune and become slaves in other countries, as long as they could redeem them and restore their freedom, they could receive the country's reward.

When Zi Gong refused national compensation, Confucius said, "You're wrong. If you don't collect the compensation, no one in the Lu Country will redeem their dead compatriots."

This story was about personal contribution. Actually, it was the same the other way around. Now that Qinglin Laboratory had donated this cultivation result, if they were not given a reward, who would still want to contribute in the future?

Qin Lin did not hesitate and called Shen Li directly, asking him to prepare the donation procedures immediately.

After hanging up, he said to Minister Lu, "Minister Lu, the laboratory will be ready soon."

Minister Lu nodded and asked anxiously, "Boss Qin, where is the Donasi Plant Root now? Why don't we go take a look first?"

Qin Lin nodded and left the office with Minister Lu and Professor Ren. They walked towards the 100 acres of land.

As for the negotiators, they could only follow helplessly.

They were completely useless now and could only be companions. 1

Minister Lu had achieved his goal and exceeded his expectations. He was in a good mood and was even in the mood to admire the villa. "Boss Qin, there are many tourists in your villa. The environment is really good."

Qin Lin smiled and said, "I was just messing around. Who knew that tourists would like it?"

However, Professor Ren directly exposed him. "Boss Qin, if you're messing around, those scenic spots in the country will really be ashamed. Minister Lu, let me tell you, Boss Qin's villa is really doing well. Be it the Sea of Flowers or the floating bridge viewing area, they can definitely make people forget to return."

Minister Lu smiled and nodded. "I believe in that. Before I came, I saw a lot of videos of Qinglin Villa. Just the videos alone attracted me. By the way, I'll go take a look at those two ancient ginkgo trees when I have the chance. This is the second ancient tree I've seen that can emit a tree cry."

Qin Lin was surprised to hear this. "Minister Lu has seen other ancient trees that can emit tree cries?"

?

Chapter 424: Blowing Up Li Kai! Special Watermelon?

Minister Lu smiled and nodded. "There's an ancient parasol tree in the capital. Because of its special location, the outside world doesn't know about that tree. However, although the sound of the parasol tree is pleasant, it's really not as magical as the two ancient ginkgo trees in your villa, Boss Qin. I have to thank Master Lin for leaving these two strange trees for us. This is also a humane inheritance."

Qin Lin also felt that it was worth it for Master Lin. Not only had Master Lin become a celebrity, but even the higher-ups knew about him.

The group quickly arrived at the 100 acres of watermelon land.

The watermelons in the field had already ripened. Furthermore, seeds had begun to be harvested gradually. The first batch of seeds was the ones distributed to the various villages.

Minister Lu looked at the 100 acres of endless green fields and said in surprise, "Boss Qin's villa grows watermelons? These shouldn't be ordinary watermelons, right?"

This was also something that could be figured out with a thought.

With the scale of Qinglin Villa, there was no need for them to plant watermelons themselves, let alone plant the Donasi Plant Root with ordinary watermelons.

Qin Lin explained, "Minister Lu, this is a new type of watermelon. This is also a product developed by Qinglin Laboratory."

Anyway, he could just push everything to Qinglin Laboratory now.

Professor Ren seemed to have completely transformed into a celebrity selling goods today. He praised Boss Qin again, "Minister Lu, Boss Qin's new watermelon is definitely not simple. Not only has its growth period been shortened by half, but it can also be planted without any seasonal seeds. Even in winter, it can be planted without a greenhouse." 1

"That's impressive." Minister Lu was surprised to hear Professor Ren's words.

Whether the growth period was halved or there was no restriction on season planting, this was very heaven-defying for crops.

If all crops could have such an effect, when Qinglin Laboratory promoted this technology, it could greatly reduce the cost of living and provide quality of life.

In the middle of winter, the people did not have to spend more money to buy expensive off-season crops and could eat whatever they wanted in any season.

Professor Ren said firmly, "Yes, Professor Li Kai, who cultivated the Donasi Plant Root, is also studying this low-temperature genetic experiment. He has already reached the threshold, so once he finishes his research, this contribution will be no less than solving the SMA illness."

When Minister Lu heard this, he said sincerely, "Professor Li Kai is amazing. Before this, the department actually didn't know that there was such a powerful researcher in the country. This is our negligence."

However, Professor Ren helped explain, "Xiao Li's identity is special. He's a second-generation heir and usually keeps a low profile. In the past, when he was in the official laboratory in Ming City, perhaps he was afraid of being criticized for relying on his family's connections, so he never took the initiative to apply for too many research resources from the laboratory."

"Now that his father has retired for a long time, the restrictions are not so strict anymore, and came to Boss Qin's place. Now that Boss Qin is supporting his research, his ability has exploded."

When Minister Lu heard this, he was a little annoyed. "How pedantic. Why are you so pedantic? Professor Li Kai should show it if he has this ability. He's in research, so why is he so concerned?"

"Research people should be separated from this kind of thing. Whoever dares to talk about this is obviously not a good person. Isn't this a waste of talent's time?"

When Qin Lin heard their conversation, he smiled in his heart. This was all Professor Ren's imagination, and it was reasonable.

But it really wasn't like that.

However, Minister Lu would definitely believe Professor Ren's imagination.

Therefore, Brother Li was really going to be famous.

This was also a good thing.

The more famous Brother Li was, the better a scapegoat he was.

With that in mind, Qin Lin waved at an employee in the field beside him.

The employee immediately ran over and asked, "Boss, what can I do for you?"

Qin Lin said directly, "Go cut a high-quality Qinglin Watermelon. I want to entertain the guests."

The high-quality Qinglin Watermelon was a Quality 2 watermelon.

The Quality 2 seeds cultivated in the backyard greenhouse had mutated and adapted to the realistic land environment. When they were planted again, they would be Quality 2 watermelons.

These 100 acres were also specially separated into seeds of Quality 2. Most of them were naturally continued to be used to cultivate seeds, and a small portion was directly planted.

Moreover, he did not plan to promote this Quality 2 watermelon on a large scale like the Quality 1 watermelon.

In the future, the cultivation of Quality 1 seeds would be taken over by Qinglin Laboratory. Quality 2 watermelons would be specially planted in these 100 acres. They would only be supplied to the villa or to a small area.

Hearing Qin Lin's orders, the employee did not dare to waste time and immediately went to prepare.

Qin Lin led Minister Lu and the others towards the field where the 12 Donasi Plant Roots were planted. From afar, he saw Li Kai busy in the field.

Professor Ren did not forget to introduce, "Minister Lu, that's Xiao Li."

...

On the field.

Li Kai was kneeling in front of a Donasi Plant Root, carefully observing the growth of the seed.

He was very serious and even had his knees in the dirt. His legs were muddy and more or less dirty.

This Donasi Plant Root was successfully cultivated. When Professor Ren's department produced the SMA healing potion, Xiuwan's daughter would be saved.

Speaking of which, Xiuwan had been much gentler to him recently. If he told her about this surprise, she would definitely be very happy, and he might be able to hug her again. 1

?

Chapter 425: Blowing Up Li Kai! Special Watermelon?

His lips curved into a happy smile as he thought of the last time he'd held her in the hospital.

When Qin Lin brought Minister Lu and Professor Ren closer, he happened to see Brother Li's silly smile.

Moreover, with such a wretched smile, he felt that Brother Li must be fantasizing about Dr. Tang again.

1

Minister Lu was different. Seeing this, he sighed and said, "Professor Li Kai is really a person who loves research. Only a person who really loves scientific research can smile so happily when he sees his results."

"..." Qin Lin was stunned.

Minister Lu must be wrong. Brother Li's smile was clearly infatuated. 1

However, Minister Lu's voice also brought Li Kai back to his senses. "Brother Qin, Elder Ren, you're here. Who is this?"

Professor Ren hurriedly introduced, "Xiao Li, this is Minister Lu. He's here for the Donasi Plant Root."

Minister Lu got out of the field immediately and shook hands with Li Kai. "Professor Li, your scientific attitude is really a role model for everyone."

He looked at Li Kai's muddy legs and felt even more emotional. To be honest, which second-generation heir in the country was willing to give up on enjoying research? Let alone someone like Professor Li. He had been in charge of research for so long, but he had never seen anyone like him.

Li Kai was really stunned by Minister Lu's enthusiasm.

How had he become a role model?

Qin Lin smiled as he watched this scene. Brother Li really had to thank Professor Ren for supporting him.

When Minister Lu returned to report, he would probably leave Brother Li's name on it.

Professor Ren also got into the field and said, "Minister Lu, these are the Donasi Plant Roots. They have already begun to condense seeds. Moreover, there are many of them, and all of them are very full. When the seeds grow, the roots below can be used to make potions."

When Minister Lu heard this, he asked, "Professor Ren, I have to bring a Donasi Plant Root back to the department to concoct a potion as soon as possible. The health insurance department is still waiting for news. Is there a way to cut out a section without destroying the seed growth?"

Although the health insurance department was anxious to wait for the results, this thing was precious. He did not want to waste one because of this.

Professor Ren explained, "That shouldn't be a problem. Over the past few days, Xiao Li and I have been observing that several of them have grown new nodules. Xiao Li and I will discuss how to deal with them later."

Minister Lu nodded. "Thank you."

Professor Ren did not waste any time. He called Li Kai to observe the Donasi Plant Roots. He did not want to waste a Donasi Plant Root.

Moreover, with their previous experience of cutting and transplanting, the two of them quickly found a way to deal with it. They could cut a section and bring it back to Minister Lu at any time.

A moment later, the employee returned with two trays of cut watermelons.

When Qin Lin saw this, he took a piece of watermelon and handed it to Minister Lu. “Minister Lu, come and try our Qinglin Laboratory’s high-quality watermelon.”

“Then I really have to try it.” Minister Lu took the watermelon and tasted it with a smile.

The two employees also distributed the other watermelons to the negotiators.

Delicious +2, taste +2, sweetness +2, aftertaste +2 watermelons conquered these people in disbelief.

“This watermelon is delicious.”

“Yes, I’ve never eaten such delicious watermelons.”

“I have to say, Qinglin Laboratory is very impressive. They can make such delicious watermelons.”

“...”

Minister Lu was also attracted by the deliciousness of this high-quality Qinglin Watermelon. He originally thought that the watermelons in Qinglin Laboratory were similar to the new varieties in Min Nan.

Who knew that the difference was so great?

This should be the best watermelon in the country. At least he had never eaten such delicious watermelons.

However, on second thought, it was normal for the watermelons developed by Qinglin Laboratory to be more delicious than the ones developed by Professor Li Kai.

Professor Ren smiled and asked, “Minister Lu, the watermelons in Qinglin Laboratory are not bad, right?”

Minister Lu nodded and said, “Yes, I’ve really never eaten such a delicious melon. Qinglin Laboratory is amazing.”

Professor Ren seemed to be pointing out something. “Minister Lu, you can get Boss Qin to prepare some for you. Bring them back for the higher-ups to taste.”

When Minister Lu heard this, his eyes lit up. He understood what Professor Ren meant. After the higher-ups tasted this, there would definitely be a special department coming to place orders for Qinglin Laboratory.

Compared to the other party’s donation, this was a small matter.

Qin Lin’s eyes lit up when he heard Professor Ren’s words. He naturally understood what Professor Ren meant.

They already had Xiangshui Tribute Rice.

Who said there couldn’t be the Qinglin Tribute Melon? 1

Then there would be no need for publicity. It would be sold as a high-end product.

?

## Chapter 426: Poaching! Why Are They All Strange?

“Boss Qin, I’ll really have to trouble you when we go back.” Minister Lu finished a piece of watermelon and took a second piece.

It had to be said that eating this watermelon was really enjoyable, be it the texture, the juiciness, or the lingering fragrance in the mouth after eating it.

Qin Lin was not a fool, so he naturally agreed.

The watermelons cut by the employees were quickly finished by the negotiators. Seeing that they were unsatisfied, Qin Lin instructed the employees to cut two more watermelons.

Not long after, Professor Ren and Li Kai also moved. They carefully dug out the roots of a Donasi Plant Root and cut a section with special tools. They also wet the section in the ground with special gauze to prevent it from rotting.

The cut section was naturally handed to Minister Lu to bring back to prepare the medicine.

Because the negotiations for the Donasi Plant Root had gone smoothly, Minister Lu did not plan to stay long. That was because the health insurance department was anxious for a result. He had to bring the Donasi Plant Root back to formulate a healing potion as soon as possible.

After all, it wouldn’t take long.

If this potion was successful, he could directly show the medical group. If there was a problem with the potion, he would have no choice but to negotiate with the medical group again.

Therefore, the next day, Shen Li sent over the document for the donation. After both parties signed it, Minister Lu brought the Donasi Plant Root back with Professor Ren. Professor Ren had to participate in the preparation of the medicine personally.

Naturally, some Quality 2 watermelons were also taken away.

After Qin Lin and Li Kai sent Minister Lu and Professor Ren off in the parking lot, they turned around and walked back to the villa.

At this moment, Li Kai suddenly said, “Brother Qin, Professor Ren has ill intentions.”

Qin Lin was stunned and asked in confusion, “Brother Li, has Professor Ren offended you? Aren’t you on good terms with him these past few days?”

Li Kai explained, “Professor Ren has been pestering me these past few days to go to his place. He insisted that I was a talent.”

“F\*ck...” Qin Lin cursed when he heard this news. 1

Professor Ren was actually poaching him.

This was too much.

If Brother Li was really poached over, where else could he find such a good scapegoat?

"Brother Li, you can't listen to Professor Ren. Isn't it good to be in the villa? Dr. Tang is also here," Qin Lin hurriedly said, not forgetting to mention the beauty trap. 2

Li Kai was indeed happy with this beauty trap. He smiled and said, "That's right. Xiuwan is still here. How can I go? Besides, Professor Ren has overestimated me. Without that special soil, this Donasi Plant Root would not have been cultivated successfully."

As the two of them were chatting, they saw Tang Xiuwan in a white coat passing by with a nurse.

"It's Xiuwan. Brother Li, I'm not chatting with you anymore," Li Kai said and walked towards Dr. Tang. He greeted from afar, "Xiuwan."

Qin Lin looked at Li Kai's back and felt like he was looking at Wang Cai's companion. 1

Now, he could only hope that Brother Li's path of bootlicking would be perfect and he would evolve into a wolf and get what he wanted as soon as possible.

With that in mind, he walked to his office and sat down in the office chair made of rosewood and worth hundreds of thousands. Then he looked at the game screen in his mind.

It was still the same routine of fishing, cutting trees, and checking mountain goods. He spent some time dealing with these things and then found nothing.

Qin Lin controlled his game character to go to the ranch house and check on the television.

A surprise appeared. There was another television shopping program today. 1

[Welcome to this week's television shopping program. Today, I've brought you a perfume developed by a beauty master, 'Qin'!]

Then, a beautiful woman in a long dress appeared on the television.

When he saw the woman on the television, Qin Lin was stunned.

This was a female NPC that could be conquered in Ranches Story.

When he was playing this version, the first thing he chose to conquer when he checked the female characters was this woman because she had a really good figure. 1

[Hello, everyone. I'm Qin. This is a perfume I've carefully developed. It's being sold cheaply now. You're welcome to buy it.]

Perfume??

This television shopping program seemed strange. Why were they selling things for women?

Couldn't they sell men's things for once?

However, Qin Lin still decisively controlled his game character to buy perfume.

No matter what, he could buy the perfume for Zhao Moqing and make her happy.

Moreover, he clicked on it continuously. This time, he bought more than 20 bottles. If Zhao Moqing liked this perfume, he could give it to her.

After buying, he went out and strolled around the villa. Soon, a notification appeared in his mind. The delivery of television shopping had arrived.

According to the game time ratio, it was also a delivery process.

Qin Lin returned to his office and locked the door. Then, he entered the game with a thought.

The package was still the same yellow paper one as before. When it was opened, there was a foam mat wrapped around a glass bottle of perfume. There was also a spraying tool.

[Qin's special perfume: Quality 1]

[This is a bottle of perfume developed by the beautician Qin to please her fiancé. After spraying it, it has a special effect: Fragrance +1, Favorability +1, Cheeriness +1, Taste +1.]

Seeing this attribute, Qin Lin felt that this perfume was a little awesome.

What was the effect of perfume? The greatest effect was actually to attract the opposite sex. A pleasant perfume could give the opposite sex a better experience.

These attributes could perfectly meet this requirement.

The fragrance was charming, pleasing, and refreshing. Everyone probably liked this perfume.

The attributes of tempting the opposite sex +1 and taste and confidence +1 were simply super bonus points. Didn't women dress up gorgeously to attract the opposite sex?

Unfortunately, this was just a finished perfume, not a formula.

How good would it be if it was a formula? It would definitely be another product that could sweep the market.

With that in mind, Qin Lin brought the opened bottle of perfume out of the game and went straight to Zhao Moqing's office.

As soon as he entered, he smelled good agarwood incense.

Zhao Moqing was looking at the document. Her serious expression was really attractive. The more he looked at her wife, the more he liked her.

"You don't even know how to help handle all the documents." Zhao Moqing looked up at her husband.

"You've worked hard. I'll reward you with a gift." Qin Lin smiled and walked behind Zhao Moqing. He placed the perfume on the table in front of her and reached out to massage her shoulders.

"Perfume?" Zhao Moqing's eyes lit up. She reached out to take the bottle of perfume and did not forget to say, "Massage my sore spots, my shoulders are a little sore after handling documents for so long."

"Okay," Qin Lin replied with a smile. He pressed her shoulder harder.

"There's no label or . Is it custom-made?" Zhao Moqing was already studying the bottle of perfume.

Qin Lin also made up a story. "Yes, many celebrities like it. I've specially booked it for you."

Zhao Moqing was delighted.

Which woman didn't like perfume, especially from her husband? How could she not be happy?

Which woman wouldn't like small surprises now and then?

Zhao Moqing took a small spray bottle and poured some perfume inside. Immediately, a fragrance floated out of the bottle. Her eyes lit up. "Hubby, this smells so good."

She hurriedly loaded the perfume into the spray bottle and sprayed it on her shoulders, palms, and chest. Then, she leaned towards Qin Lin. "Hubby, smell it."

Indeed, the fragrance of this perfume was surprisingly pleasant. Qin Lin leaned closer to Zhao Moqing. When he smelled it, he indeed felt a sense of spiritual joy and an ambiguous aura was imperceptibly added.

In this office, the ambiguous atmosphere even made him wonder if he should do something at this time.

This probably triggered the attribute that tempted the opposite sex.

Just as this atmosphere was thick, someone knocked on the office door and ruined it.

Zhao Moqing shouted, "Come in."

It was not the villa's employee who opened the door, but his brother-in-law, Zhao Moyun.

"Brother, why are you here?" Zhao Moqing asked in surprise when she saw Zhao Moyun rush in.

"Brother." Qin Lin also got up and greeted Zhao Moyun.

Zhao Moqing entered the office and immediately said, "I'm here to look for Qin Lin and talk to him."

"Brother, what's wrong?" Qin Lin looked at Zhao Moyun in confusion.

Zhao Moyun immediately said, "Qin Lin, isn't my mother's birthday coming up?"

Qin Lin looked at Zhao Moqing. He really didn't know about this. After all, he didn't have a chance to celebrate Zhao Moqing's mother's birthday previously.

At that time, he could only secretly register his marriage with Zhao Moqing and did not dare to go over.

Zhao Moqing also thought of this and nodded at him. "I've been too busy recently and almost forgot about this. I have to prepare a gift for Mom in advance."

"That's right. I'm here for the gift." When Zhao Moyun heard this, it was as if he had a history of blood and tears. He said to Qin Lin anxiously, "Qin Lin, I was tricked too badly by you. I didn't prepare a gift for you the first time, and I prepared a gold ring the second time. You also prepared a pair of jade for Mom and Dad's wedding anniversary."

"Mom didn't give me a good look twice. Now, in Mom's eyes, you're even closer to her than me, her biological son. She's always talking about you, her son-in-law, when she goes out now."

When Qin Lin heard Zhao Moyun's plaintive words, he smiled and asked, "Brother, are you jealous of me?"

"Who's jealous of you?" Zhao Moyun said angrily, "Qin Lin, can I call you big brother this time? Let's discuss the gift? Let me know what you've prepared. I'll prepare something similar. If you trap me again, I'm afraid I won't have a place as a son."

When Zhao Moqing heard Zhao Moyun's words, she teased, "Big brother, if you want to call Qin Lin big brother, should you call me big sister too?"

When Zhao Moyun heard this, he said, "Moqing, stop fooling around."

Zhao Moqing asked seriously, "Big brother, I'm in charge of the finances. Do you think I can make the decision for Qin Lin?"

"Big sister, you're my big sister, okay?" Zhao Moyun instantly said angrily.

"Good boy!" Zhao Moqing was amused.

"..." Zhao Moyun gritted his teeth.

Qin Lin smiled and said, "Big brother, I'll prepare two sets this time. I'll prepare one for you too."

He was not worried about his mother-in-law's birthday gift at all. There were still many jade ores in the game.

He was just going to download the design plan and bring it into the game to forge jewelry at Sebara's.

"That's more like it. I'll transfer the money to you when the time comes. I'll leave first." A smile instantly appeared on Zhao Moyun's face. Then, he glared at Zhao Moqing, who took advantage of him, and left.

For the next few days, everything in the villa was normal. The matters of Qinglin Food Company and Qinglin Laboratory were also progressing steadily.

On the other hand, an official announcement about the SMA illness and the Donasi Plant Root caused a huge commotion, instantly making Qinglin Laboratory and Li Kai trending.

?

Chapter 427: Thank You, Qinglin Laboratory! Thank You, Professor Li Kai!

In a modern information society, people's entertainment life would never lack those complicated and varied short videos.

When a new day arrived, the two trending news were the most discussed.

One was the news that a vice principal in the south had driven drunk and was better off pleading guilty because there was no damage done.

Good lord, this was the first time he knew that someone being caught drunk driving could avoid punishment and prosecution.

As soon as the news came out, it caused a very big commotion. Everyone shouted: What a lucky guy.

There were even some who were not afraid of the situation getting out of hand and were crazily calling for everyone to drink and drive. As long as they had a good attitude, they would even call on the families of the drunk drivers who had once confessed and did not cause any damage but were punished to appeal.

Something was definitely wrong. This matter was trending, and no one knew who was going to be affected.

The other trending news was even more surprising. It was released by the official news media and the official daily newspaper.

“This is the \*\* news channel. I have good scientific news for everyone. Professor Li Kai of Qinglin Laboratory has cultivated the raw material, the Donasi Plant Root, that can make the SMA healing potion. Now...”

\*\* news channel sent the message that drew countless attention.

At first, it was still Qinglin Laboratory that received attention.

After all, Qinglin Villa and Qinglin Food Company were too popular online.

Now that another Qinglin Laboratory had suddenly appeared, everyone subconsciously thought that Qinglin Company might be up to no good again.

After all, when had Qinglin Villa and Qinglin Food Company not been causing trouble on the trending news?

Qinglin Tea was still extremely popular. Many places could not buy it even if they wanted to.

However, news of the SMA illness became popular and people found out that the treatment for this illness was 700,000 yuan per injection, and most patients would have to spend more than 10 million yuan to treat the illness completely. Only then did everyone realize that Qin Lin’s company was not trying to cause trouble. They had already caused a big deal.

SMA was a rare disease. Actually, most people did not know about it. Now that they knew about this injection of 700,000 yuan, who would not be shocked?

This was even more terrifying than cancer.

Therefore, how could they not be surprised to see that Qinglin Laboratory had actually cultivated raw materials that could make healing SMA potions?

What was even more shocking was that Qinglin Laboratory had actually donated this cultivation result.

How admirable was this?

One needle cost 700,000 yuan. If it were any other company, they wouldn’t have donated it directly, right?

More importantly, the officials estimated that with this Donasi Plant Root, once the clinical trial of the medicine produced was successful, the injection of 700,000 yuan would drop to about 10,000 yuan. It would only cost a few thousand yuan to enter health insurance.

How shocking was a few thousand compared to 700,000?

It was not too much to say that Professor Li Kai's research was a great achievement, right?

The official news account and XX Daily both sent this video, which also clearly indicated the contribution of Qinglin Laboratory.\*\*

Therefore, the news exploded.

Qinglin Laboratory and Li Kai became popular at an unbelievable speed. For a moment, countless news accounts began to forward, creating a sweeping momentum.

The discussion of every video was unusually lively.

"Qinglin Company really didn't disappoint. As soon as they caused trouble, the entire Internet knew about it. Moreover, the experiment was really well done."

"I really have to admire Qinglin Laboratory this time. If it were me, I would definitely not bear to donate a needle of 700,000 yuan."

"The SMA patients will probably be indebted to Professor Li Kai and Qinglin Laboratory for the rest of their lives."

"Some professors are obsessed with studying to benefit the people. Some vice principals tell everyone that they don't have to be punished for drunk driving!"

"..."

Naturally, this video did not only cause a sensation online.

Beijing.

The largest number of SMA patients in the country gathered in a tertiary neurology hospital.

In a ward, there was a commotion. A man asked a doctor anxiously, "Dr. Bao, why did you cancel my daughter's noninvasive spine test? Did you take someone's money and bring their child forward?"

These words attracted the attention of the other family members in the ward. They all looked at the doctor angrily.

When children had SMA illnesses, the expensive treatment fees made them unable to breathe from the pressure of life. If they encountered such a terrible thing again while treating them, it would really make them collapse.

Dr. Bao explained with an awkward expression, "Mr. Chu, don't be agitated. I'm here to explain this to you."

"Did you see the news today? Professor Li Kai cultivated the Donasi Plant Root, the raw material for treating SMA potions."

“We can make our own SMA healing potion now. And it’s very cheap.”

“Now, the Chinese Academy of Sciences needs clinical trials for patients. I just want to ask if your child is willing to receive treatment from the chemistry department. It won’t cost a penny.”

These words stunned Mr. Chu for a moment. His face was filled with disbelief, but he still took out his phone to check the news today immediately.

When the patients’ families heard this news, they subconsciously took out their phones.

They were not in the mood to play with their phones because of the child, let alone know what had happened today. However, when they heard this news, everyone was moved.

After going online, the families of these patients could not help but look happy. None of them could believe it.

?

Chapter 428: Thank You, Qinglin Laboratory! Thank You, Professor Li Kai!

“Is this true? Did Qinglin Laboratory donate it?”

“A few thousand yuan a needle in the future?”

“It should be true. The official news is out. Thank God. Thank you, Professor Li Kai. Thank you, Qinglin Laboratory.”

“Child, you’re saved. It’s all thanks to Professor Li Kai and Qinglin Laboratory.”

“...”

When the families of these patients saw the message, they could not help but open the WeChat group of the patients’ families to share this good news.

This nightmare-like illness made many family members spontaneously enter the group to warm up and exchange information in order to inquire about this illness.

Perhaps one day, someone like “I’m Not the Medicine God” would make a pirated channel to share with everyone?

However, when they opened the group, they realized that it was already in an uproar.

“The news is true. I’m in Beijing Third Hospital. A doctor also asked if I wanted clinical trial treatment.”

“The chemistry department did it, so it can’t be fake. There’s hope.”

“Yes, we’re so thankful to Professor Li Kai.”

“I also have to thank Qinglin Laboratory. They were the ones who supported Professor Li Kai’s research. In the end, Qinglin Laboratory even donated the results.”

“Yes, thank you, Qinglin Laboratory and Professor Li Kai.”

“If the child recovers, let’s bring the children to Qinglin Villa to play!”

“Agreed. I have to thank the Qinglin Experiment and Professor Li Kai for saving my child’s life.”

“...”

Although the medicine had not been promoted and their child had not been cured, the gloom in the group had clearly dissipated in a short period of time under this news.

Because they saw hope, and they firmly believed that hope was real.

After watching the news, Mr. Chu knew that he had misunderstood the doctors. He quickly apologized, “Dr. Bao, I’m sorry for what happened just now. I was impulsive. Is what you said true? Is there a risk in the clinical experiments?”

“There are risks, but they’re very low. However, there are also risks in normal treatment. You have to consider this yourself. If you’re willing, I’ll help you fill in the information,” Dr. Bao explained with a smile.

He had actually obtained some information about the inside story of this potion.

This potion was used to crack the foreign healing potion, especially since the medicinal materials were one-on-one substitute medicinal materials. The effect and function were almost the same as that one.

With the Chinese Academy of Sciences leading the way, the risk was basically controllable.

However, he naturally could not say this openly. After all, the department above had also taken advantage of the loopholes in the international patent law.

...

Ming City.

After the previous surgery, Old Master Li recovered very quickly and looked very good.

Everyone in the Li family knew that this must be because of Boss Qin’s Vitality Wine. Otherwise, wouldn’t the old man be dispirited for more than half a year after the major surgery?

After many old people underwent surgery, even if they were cured, their physical condition would be much worse.

As usual, Old Master Li took out a small wine glass and a silver bottle of Qinglin Medicine Wine.

Drinking a small mouthful of Qinglin Medicine Wine every day was also one of his enjoyment projects.

Every time he drank the Qinglin Medicine Wine, he felt warm and very comfortable. Moreover, over the years, he could clearly feel that the Qinglin Medicine Wine was stronger than the medicinal wine of the two Chinese medicine heritage families.

At this moment, Li Zhen rushed in with a phone. He went to the old man’s side and handed it to him.

“Dad, look at the news today. A rare illness like SMA has been resolved. It was reported on the Central Television News Channel and Everyone Daily.”

The old man nodded. "Science is improving. Such illnesses will always be resolved one by one. This is a good thing. You asked me to see this news, is this related to our Li family?"

Li Zhen immediately explained, "It was my brother who resolved this matter. Qinglin Laboratory donated this technology and it's on the news now. Moreover, the entire Internet knows about this."

The old man immediately looked surprised when he heard this. He hurriedly took the phone and looked at it.

It would be fine if it was just the SMA illness that was resolved, but it was different if it was resolved by his youngest son, Li Kai.

Two important news channels were released at the same time, which meant that there were some hidden signals. Not only was it good for his son, but it was also good for their Li family.

Because Li Kai was a member of his Li family.

After watching the news, the old man said in surprise, "I didn't expect this kid to make a name for himself when he went to Qinglin Villa. This is a good thing. In addition, we've underestimated Boss Qin. I'm afraid the higher-ups will remember his donation. Even without our previous tricks, some people will have to worry about getting into trouble."

Li Zhen naturally understood what the old man meant.

Boss Qin's method seemed to be making Qinglin Laboratory lose out, but it was actually very meaningful. There would be many benefits in the future.

This donation was really not something a young person could have. No one could bear to do it.

However, he clearly did not know that Qin Lin did not care about this at all. A person only had 10 yuan and might not be willing to donate 1 yuan.

But what if a person had 100 million yuan? Would he care about that one yuan? 1

...

In Qinglin Villa.

Tang Xiuwan was applying medicine to a girl who had sprained her ankle while rafting with her boyfriend.

"Alright, just apply some medicine when we get back. It's nothing serious," Tang Xiuwan said gently after applying the medicine to the girl.

"Thank you, Doctor," the girl thanked her before leaving the medical room with her boyfriend's help.

Tang Xiuwan had just sat down to register when she saw a nurse run in. She handed the phone to her immediately. "Dr. Tang, Mr. Li Kai is on the news. I didn't expect him to be a professor. Moreover, he's so powerful."

?

Chapter 429: Thank You, Qinglin Laboratory! Thank You, Professor Li Kai!

“???” Tang Xiuwan took the phone in confusion. There was a news video on it.

She clicked on it and the news video played.

“This is XX news channel. I have good news for the university. Professor Li Kai of Qinglin Laboratory has cultivated the raw material, the Donasi Plant Root, that can make the SMA healing potion. Now...”

When Tang Xiuwan saw this video, her face was filled with disbelief and surprise. There was going to be a new SMA treatment in the country soon? Moreover, a needle only cost a few thousand yuan. This was definitely great news for her.

However, what surprised her even more was that Senior Brother Li had actually cultivated this thing.

This also reminded her of the few times Senior Brother Li had comforted her and sworn that Xiao Nan would be fine.

For some reason, she suddenly felt her heart skip a beat. Could Senior Brother Li have done this research for her?

But then she shook her head.

She knew very well that there had always been no scientific research institute in the country that could solve this illness. How could Senior Brother Li have studied this for her and even developed it in such a short time?

If that was the case, how powerful was Senior Brother Li?

Tang Xiuwan sighed silently. She was not a little girl anymore. Why was she still so naive?

For the next week, the short video platform was filled with videos of Qinglin Laboratory and Li Kai almost every day. The news also played the videos non-stop.

This was naturally to spread the news. It was also the higher-ups’ intention to promote such positive and socially responsible deeds.

Therefore, the short video platform could only tacitly give all the traffic to Li Kai and Qinglin Laboratory during this time.

Similarly, the official evening news broadcast this news continuously. A photo of ‘Professor Li Kai studying the scene’ attracted countless attention.

The photo showed Professor Li Kai kneeling and studying the Donasi Plant Root. His legs were muddy from squatting on the mud, and he was smiling happily at the Donasi Plant Root. 1

This fully showed how much Professor Li Kai liked scientific research.

Only Qin Lin felt that Brother Li was smiling foolishly when he saw this photo. He wondered who had taken this photo with Minister Lu.

However, he did not dare to comment on Brother Li’s silly smile. He was afraid of being cursed at by netizens at a time like this.

He could only sigh that the truth was in the hands of a few.

If that was all, everyone would only admire Professor Li Kai for contributing to scientific research. However, as Li Kai's background was exposed, countless people began to admire Li Kai's noble aspirations and morals.

"Everyone seems to be focused on Professor Li Kai's contribution to the SMA illness. No one seems to have paid attention to his family background. According to my investigation, he's the second generation of the Li family in Ming City..."

"Professor Li Kai, you didn't take the bright road paved by your parents. You didn't drive a good car and never spent a lot. You resolutely chose the difficult scientific research path and gave up the enjoyment you should have. You remind me of a word that has already been forgotten: the noble son of an aristocratic family!" 1

"An inch of land, an inch of blood, 100,000 young people, 100,000 troops. They sacrificed their lives for the country without fear. They are children of an aristocratic family."

"Professor Li Kai is really a role model for those second-generation heirs. I can't help but admire the Li family's upbringing."

As Li Kai's identity was exposed, not only did he receive high praise for himself, but the Li family also received a lot of good comments.

Saying that Li Kai had a good upbringing was enough praise for the Li family.

"Brother Qin, am I really as good as they say? Why didn't I know?" Li Kai looked at the comments about him online and felt embarrassed. In the beginning, he even blushed.

He felt that he was deceiving the world.

"Brother Li, your self-awareness is very deep," Qin Lin said with a smile. However, he felt that the Li family might have been responsible for the sudden exposure of Li Kai's identity.

Otherwise, it shouldn't have happened so soon.

After a week, the popularity of Qinglin Laboratory and Li Kai began to decrease.

Until a week later, a convoy appeared in the parking lot of Qinglin Villa and attracted everyone's attention.

This convoy was not an ordinary car. They were all brands from the capital.

Furthermore, three of the vehicles in the middle were escort vehicles. On them were the words "Scientific experiment escort. Do not approach." There were even guards coming out of the cars.

The tourists who saw this scene suddenly realized the reason.

Qinglin Laboratory had donated the Donasi Plant Root that could make the SMA disease medicine. These cars were here to escort this.

?

Chapter 430: Li Kai's relationship advisor looks like! king!\_1

Linlin Manor.

Even the area near the triangular plum plantation had been guarded by Captain Hong, the scenic patrol, and the people sent by the county.

There were many tourists gathered around and they looked in the direction of the potted plant garden curiously.

Everyone could guess the reason for the convoy's formation just now.

Captain Hong, thank you for your hard work. I'll go in and take a look. Chen Li gave an order to Captain Hong and walked in.

It had been a week, but he and the county people were still in a state of confusion.

Because Linlin's leisure tea had been poached by Ning City, they had been very attentive to Linlin's laboratory, and the laboratory had been paying close attention to it.

But just when they thought that there would be no omissions, who knew that Linlin's laboratory would do such a big thing under their eyes.

It wasn't until the news came out that they were shocked to find out that Linlin's laboratory had caused such a big incident.

This was really impossible to guard against.

Today, when the county received a call from the higher-ups asking them to cooperate with the escort, he and Sun Xian were really regretful. This time, you Cheng did not get any benefits.

How good would it be if the news added 'your city's support for Linlin laboratory'?

...

Minister Lu's men were on high alert in the field where Adonaxi plant roots.

In the fields.

Professor Ren was carefully transplanting the roots of the Adonaxi grass with his people.

Due to the cultivation requirements, Professor Ren's department needed to transplant the 12 Adonaxi roots to Beijing and plant them in a special medicinal garden.

This would be of greater benefit to the collection and planting of seeds in the future.

For this reason, Professor Ren and the others brought a special transplant box and moved very carefully, for fear of touching the seeds on it.

At the side.

Qin Lin and Shen Li were also accompanying Minister Lu.

“Boss Qin, the contribution of your Linlin laboratory will be noted on the top.” Minister Lu said as he took two documents from his assistant and handed them to Qin Lin.

As for the contribution of Linlin’s laboratory, the higher-ups would naturally repay it. These two documents were one of the rewards.

Qin Lin took the two documents and his eyes lit up when he saw the contents.

One of them was an order for high-quality watermelons, and the order was from the procurement department. This was a real tribute.

The other document was the title of ‘Chinese Academy of Sciences project partner’.

Although this was just an honorary title, and the Linlin laboratory actually had no relationship with the Chinese Academy of Sciences, it was a very good protective shield and a signal that could save the laboratory a lot of trouble.

To him, this was good stuff.

The risk of being exposed had become lower.

Qin Lin finished reading the document and handed it to Shen Li.

Chen Li received the documents and looked at the contents. His face also revealed a happy expression. He naturally knew the hidden benefits that these two documents could bring.

As time went by, professor Ren brought people to transplant the 12 adonassis roots into the transplant boxes one by one. Then, he asked the guards to carefully carry the transplant boxes out.

Seeing this, Li Kai was completely relieved. He knew that his responsibility had been successfully completed, and the next thing would be handed over to professor Ren’s Department.

When the Sima treatment agent made by professor Ren and the others was promoted, xiuwan’s daughter would not have to worry about the cost of treatment. Xiuwan would definitely be happy.

Li Kai couldn’t help but smile when he thought about how xiuwan had been gentler to him these days.

The sound of a camera clicking could be heard. It was a recording staff member who had accurately caught professor Li’s smile.

He had already thought of the title,”professor Li Kai saw that his own adonassis plant root is about to save those who are suffering from stroke.” He revealed a gratified smile.

Li Kai obviously didn’t notice the carefree person’s actions until professor Ren came to him and patted him on the shoulder.

“Professor Ren.” Li Kai immediately greeted him.

Professor Ren looked at Li Kai with appreciation and asked, ” “Li, you are a rare genius. Have you thought about what I told you before? do you want to join my team?”

Li Kai wasn’t interested in this at all, so he immediately told the truth, ” “Professor Ren, I’m still very clear about my own capabilities. I was just lucky to cultivate the adonaxi plant root this time.”

"You're too humble." Professor Ren could only sigh at Li Kai's refusal. He turned around and saw Qin Lin staring at him.

Professor Ren suddenly felt embarrassed. He was caught red-handed trying to poach her. "Boss Qin, remember to call ran ran if you need anything!"

"Ran ran." Qin Lin's face was full of resentment.

And even called you to come over and poach him?

Not long after.

Minister Lu and professor Ren left with the 12 adonaxi plant roots.

However, the video of Minister Lu leading his men to escort the adonaxis plant roots was once again on the hot search. Linlin's laboratory and Li Kai's popularity, which had just cooled down, began to explode again.

...

Whether it was the Linlin watermelons getting an order from the purchasing department, or the Linlin laboratory getting the title of " project partner of the Chinese Academy of Sciences, " both were happy things.

Therefore, at Li Kai's request, Qin Lin agreed to personally cook a Grade 3 egg fried rice and a Grade 3 all-fish banquet to celebrate his success.

The original Hall had already been transformed into the aquarium, so the meal could only be held in the staff cafeteria.

But to Li Kai, as long as he could eat the food made by Brother Qin, it didn't matter where he ate. Even if it was in the toilet, he would still eat with relish. 1
