

## The Game 481

Chapter 481: Thomas gifted a night illumination jade lion and mutated grass

After completing the plot mission, Thomas didn't stay any longer. He left young Markelov behind and left in a hurry, as if he would be asked for money if he stayed any longer.

[ congratulations, you have received a pony. It has been bound! ]

In the game, Qin Lin controlled the game character to stand in front of the pony. The pony also immediately put its head in front of him, and a little red Heart also appeared on the top of its head.

This was also one of the settings that players liked about the story of the farm. Although it was the simplest way to express it, when players played with their pets, they would always think that the pet was really happy when they saw the little red hearts above their heads.

Then, Qin Lin locked the office door and entered the game.

To be honest, he had never seen a horse in other places except for when he followed his rich classmate to a horse-riding Class A few times in college.

At that time, the rich second generation student had let them experience what it was like to be a Knight. Although they weren't good at riding, they enjoyed it.

It was a pity that the rich second-generation student didn't take them to the horse track for a while. He didn't even play with the dormitory mates anymore.

It was not until the rich second generation student was expelled by the school that he found out that the rich second generation student had been acting alone during that period of time. He had actually been hitting on a female teacher and had quite a wild time with her. It seemed that they had even gotten into an abortion.

After being expelled from the school, the other party left with the female teacher.

It was only later that everyone found out that this matter was actually caused by someone from their dormitory who had posted it on the forum to stir up public opinion. Otherwise, it wouldn't have reached the extent of expulsion.

When he found out about this, he couldn't believe it.

Although that rich second-generation student had the intention of showing off his wealth, he was also good to everyone. Who knew that someone in the dormitory would do such a thing?

It was also after this incident that he kept a respectful distance from the other people in the dormitory, renting a house outside the school and living together with Zhao Moyi.

Since they didn't know who was the human and who was the ghost, they would all stay away from him.

As soon as he entered the game, Qin Lin felt a furry feeling on his cheek. He saw The Little White Horse rubbing its head against his face.

Qin Lin hurriedly hugged The Little White Horse's head. The Little White Horse looked at him with a pair of black and bright pearl-like eyes. Its eyes were full of wisdom, and one could see its joy.

The Little White Horse was even more beautiful in real life. It was snow-white from head to toe, without a single stray color. It was very beautiful and people liked it at first glance.

it seemed that among animals, this kind of white fur was more beautiful, just like the white fox, little snow, and now the little white horse was the same.

At the same time, Qin Lin also saw the remark of The Little White Horse:

[ (can be named) little white Horse: Mount! ]

[ this is a mutated White Horse that has the rumored bloodline of Jurchen's thousand-mile horse. It is gentle, friendly to people, and has a very high intelligence. It will be a very good Mount when it grows up. ]

Looking at the remarks, Qin Lin had to admit that the mounts produced in the game had high intelligence, which was very good.

however, what surprised him was the bloodline of the little white horse.

It was the almost extinct Jurchen thousand li horse.

When he saw this, he also understood why the White Horse's remark was 'Mount'.

This was because this type of horse was the first choice for war horses in ancient times.

Moreover, white warhorses had a high status in ancient times, and many famous generals rode white horses.

In ancient battlefields, it was best to avoid white-robed generals on white horses because they could be Zhao Yun or Xue Rengui.

Especially Zhao Yun's night illumination jade lion, which was of Jurchen's thousand li horse bloodline.

This type of warhorse was usually very fierce and ordinary people would not be able to subdue it. Only an expert like Zhao Yun would be able to subdue it.

however, the pony given by mayor thomas had a gentle and friendly remark. it was not suitable to be a warhorse. in ancient times, it was most likely raised as a stallion.

After all, even if such a famous horse could not be a warhorse, it was impossible to kill it and eat its meat.

Qin Lin looked at The Little White Horse. The more he looked at it, the more he liked it. "You'll be called little lion from now on!"

The Little White Horse was so handsome. It would definitely be a night jade lion in the future. It would definitely look very handsome when riding it on the racecourse of the ranch.

It was a pity that he could not ride the pony now.

According to its age and the passage of time in the game, it could only be ridden after it had grown up in the game.

The only problem was how to bring it out.

This time, he had asked Lu Yong to purchase more than 50 horses, and he wanted Lu Yong to purchase a White Horse to replace it?

However, there were very few pure white horses in reality, and even fewer of them had such a bloodline. Their ages didn't match either, and the characteristics and bloodline information registered by the seller couldn't be changed when raising a horse for quarantine and other documents.

Unless it was a horse born in his own village, then there would be no problem with tampering with it.

Therefore, this time, it didn't work. It was better to let Li Qing or Li Kai go to the city's epidemic prevention and breeding Department to get the procedures done directly.

With the Li family's status and power, this was an easy and simple matter.

Moreover, departments such as epidemic prevention and breeding were also somewhat marginalized. They were more familiar with such worldly affairs. In this way, when he brought the little lion out, he would fill in the information and go through the procedures, so it would not arouse any suspicion.

Qin Lin took the little lion to the ranches. After entering, they could see the newly developed area. In reality, the area was very large. At a glance, it was indeed hundreds of acres.

?

Chapter 482: Thomas gifted a night illumination jade lion and mutated grass

The little lion ran happily as soon as it entered the ranches.

It was obviously very happy.

After running one round, it ran back to Qin Lin's side and circled around him, as happy as a child who had just found an amusement park.

Qin Lin played with the little lion for a while, then logged out of the game. When he looked at the game screen again, he got the information about the farm leveling up.

After the upgrade, in addition to the basic facilities such as the chicken house and Duck House, there were three more facilities that could be built.

one was the stables. the [ complimentary ) ] displayed in the system's display probably meant that the system could build it after it gifted the horses. it was considered a complimentary facility.

According to the forum, such a free facility could not be used to buy Cubs to raise, which meant that it could only be used for the lion cubs.

The other two facilities that could be built were the Kong 'nest and the pigpen. These two facilities had level restrictions and could only be built after the upgrade.

These two facilities could be used to buy and raise young animals, but to make Kong Neset and the pigpen at the same level, was there a hole in the game's brain?

Then, Qin Lin's attention was no longer on Kong necai or the pigpen, because the system also reminded him that after the system upgrade, he needed to plant pastures in the newly developed ranches, harvest them, and make them into fodder for the animals.

Moreover, the system also reminded him that the absence of pasture would affect the mood of the animals.

this made qin lin understand.

Like the little lion, as a horse, it would be very lost without the grassland.

Therefore, to raise a horse, one had to first plant grass.

Just like the young livestock, they had to go to another big ranch store in ore town to buy the pasture.

He controlled the game character to the front of the NPC rancher and clicked on the purchasable list. As expected, there was a sub-list of pastures.

Patriarch grass was only a category, and there were many other species.

Therefore, there were many varieties of pastures on the list, such as:

Giant fungus grass, rygrass, Mexico corn grass, Emperor bamboo grass, white clover, shadawang, dog tooth grass.

The farm in the villa used the dog tooth grass that was specially cultivated for the farm.

Qin Lin looked at the pasture seeds and didn't know how to choose for a moment. Should he choose the same dog tooth grass as the villa's pasture?

Just as he was thinking about it, he scrolled down the list and saw a special seed.

[ dog's tooth grass seed: Grade 2 ]

[ this is a mutated dog's tooth grass seed that was specially cultivated for the pasture. It is a selected species that has been through long-term research, layers of checks, and continuous optimization. After planting, it has a strong vitality and a shorter growth time than ordinary dog's tooth grass. It is very popular with herdsman and has special effects. The game seed is not affected by soil and environment. ]

It turned out to be another seed with a star, and it happened to be the dog tooth grass.

qin lin bought the seed immediately after seeing it.

What was there to choose?

This one.

Moreover, the remark was a little unbelievable.

The seeds in the game were not affected by the soil and environment. Did that mean that the quality 2 pasture seeds in the real world would also be quality 2?

This seemed a little awesome.

He was looking forward to the special effects of the grade 2 grass.

After buying some 2 quality Dogtooth grass seeds, Qin Lin decisively controlled his game character to return to the farm and then directly planted the pasture in the newly developed area of the farm.

The bag of dog tooth grass seeds was quite big, unlike the small bags of other crops 'seeds.

Early the next morning, Qin Lin woke up and looked at the game screen. The green Dogtooth grass had fully grown and the ranches were already green.

The little lion was already running on the green, still eating the grass with its head down. As it ate, a little red Heart would appear on its head, indicating that it was eating very happily. With every bite, a happy little red Heart would appear.

This made Qin Lin a little curious about the properties of the green teathed grass.

Although horses could eat grass, the fact that they could eat grass so happily meant that the grass was definitely not ordinary.

Qin Lin controlled the game character to go to the plantation, pick the crops that ripened in the morning and put them in the storage room. Then, he got up and had breakfast before going to the storage room. Then, he entered the game and went directly to the pasture area.

The first thing he saw was a hundred acres of green grass that made him feel very comfortable. It was as if his soul and spirit had been released, and he became relaxed and happy.

As he walked in, he could smell a very nice and fresh grass fragrance, as if he was in a grassland.

The feeling was too wonderful.

This might be caused by the special attribute of the green foxtail.

For some reason, he thought of the ranch in the villa. The racecourse alone had an area of 300 mu, and the ranch was even wider.

If they were all planted with this kind of pasture, how spectacular would it be when it was fully grown?

When the little lion saw him, it called out and ran over happily. It circled around him twice and even rubbed its head against him.

qin lin touched the little lion's soft hair, then squatted down and picked up a blade of dogtooth grass. when he saw the remark, his eyes lit up.

?

Chapter 483: ! 700,000 square meter grass field plan!

"dog tooth grass: grade 2"

[ this is a type of pasture that has undergone a mutation after careful research. After planting it, it will have unexpected effects on ranches: Green grass fragrance +2, open mood +2, carefree and relaxed +2, aesthetic +2, entry +2, grazed animals "liking +2, nutrition +2, exuberant vitality +2! ]

[ restrictions: the seeds sold in the game are effective! [ the cultivation seed transplant has lost its effect! ]

Qin Lin looked at the attributes of this green Bucktooth grass and was really surprised. There were so many attributes and effects.

the green grass was fragrant, the mood was open, and the spirit was relaxed. this was the natural travel attribute of the grasslands.

When people travelled to the grasslands, wasn't it just to see the spectacular scenery and relax their mood?

Many scholars often described the grasslands with descriptions like 'the fragrance of the grasslands drifted with the wind and entered one's mind, sublimating one's soul in an instant' or 'beautiful and vast, making one fascinated'.

Not to mention the viewing and entry level, the grassland was extremely beautiful to look at, and the photos were even more spectacular.

Many people had never been to the grasslands, but they had seen the magnificence of the grasslands in the videos.

The dog's tooth grass produced by the system had A +2 attribute after it was planted. It was just that it had a better viewing and entry level.

In addition, he would be liked by the ranches and receive +2 nutrition from the ranches. This was definitely great news for the ranchers.

It was probably because of these two attributes that the green foxtail needed the +2 vitality attribute, the description of the seed, and the short growth time.

It had a long growth period, but its vitality was not exuberant. It was also loved by herdsmen. It would probably go bald soon. It would not be a problem if it had a strong vitality and a short growth period.

It could be said that these attributes all met the requirements of the ranches, as expected of a research facility specially designed for ranches.

How spectacular would it be if these attributes could be planted in the hundreds of acres of the manor's pasture?

A few hundred mu was not enough, so he asked Yushui to bring people to clean up and develop new land. He did not have high requirements. He just wanted to plant the dog tooth grass on the new land and connect it with the original pasture area, making up a total of 1000 mu.

That would be equivalent to an area of 700000 square meters. That would be even more spectacular. By then, the triangular plum blossom sea, the floating paddies in the viewing area of the pontoon bridge, and so on would all be his younger brother.

Even the real Prairie was not as attractive as him.

The key was that the dog's tooth grass had a restriction. Only the plants sold in the game had this effect. The cultivated seeds would not be able to be transplanted.

In other words, this would be unique to his villa. Even if people from other places came to check the seeds or steal the grass, they would not have any effect.

This was the most awesome. By then, it would probably be the only one in the country or even the world.

Qin Lin was a little eager to try.

however, there was a problem. how was he going to explain this green spot?

That would be too heaven-defying. Therefore, there had to be someone who could shirk the blame and take the blame.

after thinking for a moment, qin lin had an idea. when it was time to plant, he would take out the special soil left in the game and mix it with water to irrigate the pastures.

When the time came, they could say that it was caused by the special soil. It was best to pull Li Kai along. When necessary, he had to take the blame. 1

As for how to explain the special soil, a cunning rabbit had Three Burrows. Old brother li was so easy to fool, so he should believe it easily.

By then, the reputation would belong to old brother li, and the benefits would belong to him. It was simply too perfect.

The operation was more careful.

There was still one more problem, and that was the seed.

In the game, due to the special mechanism of the game, he did not need to use many seeds to plant the pasture in the area. However, in reality, there were no such mechanisms in the game. To replant the pasture in the area of 1000 acres, he would need a lot of dog tooth grass seeds.

Thinking of this, Qin Lin began to move the morning's crops out of the game and sent them to the villa. Then, he returned to the office as soon as possible and began to search for information on the internet, wanting to know how many Dogtooth grass seeds were needed.

Soon, he had a rough idea of the density of dog tooth grass cultivated on ranches. If the yield was high and the vitality was strong, 2.5 grams of dog tooth grass seeds per square meter would be enough.

In other words, 1000 mu of land required more than 3000 catties of seeds.

Qin Lin was shocked by the number. It was too much. Fortunately, the quality of the dog Fang grass in the game was 2, which meant that one big bag of it.

He hurriedly controlled his game character to go to the ranch shop and buy another bag of two quality dog tooth grass seeds. Then, he locked the office door, entered the game, and brought the bag of dog tooth grass out of the game.

then, he went to find an electronic scale to weigh the bag of patriarch seeds.

Each bag only weighed 10 pounds.

This weight was half as heavy as the large bags of dog's tooth grass seeds on the market.

The pasture seeds on the market were planted on a large scale in ranches. Not only were they cheap, but the quantity was also calculated by bag, which was different from other crop seeds.

However, a bag of game seeds was only 10 catties, so he would have to buy more than 300 bags of seeds that weighed more than 3000 catties.

Qin Lin looked at the game screen again and controlled the game character to go to the ranch Shop NPC. He made a decision to buy it.

however, after upgrading the ranch, he used all his remaining gold coins to buy a quality 2 dog tooth grass, and he only bought 250 bags.

It wasn't enough even if the game coins were empty.

These gold coins were all saved up from selling crops, wood, and ore in the game, so it could be seen how much he had spent.

?

Chapter 484: ! 700,000 square meter grass field plan!

250 bags of quality 2 dog tooth grass were not enough. Fortunately, in addition to planting crops and cutting trees, he could also make money by fishing and mining.

He then controlled his character to go to the pond where the fish were stored. There were already quite a lot of fish in it. In addition to the hundreds of ornamental fish, there were even more wild fish of species 2 and quality 1. There were thousands of them.

He sold most of the quality 2 and 1 wild fish in one go, leaving only 50 for reserve.

However, the gold coins he got from selling the fish only bought 36 bags of two-star quality dog's tooth grass seeds. It was still not enough to plant 1000 mu of land.

therefore, qin lin controlled his game character to mine in the spring mine. after leveling up again, the mine after the 9th floor was opened.

qin lin directly controlled his game character to the 9th floor. sure enough, he entered the 10th floor without any obstacles and began to dig.

[ congratulations on obtaining a gold ore! ]

.....

[ congratulations on obtaining copper ore! ]

These ores were all sold for money.

[ congratulations on obtaining the blue-and-white jade ore! ]

...

[ congratulations on obtaining special soil! ]

...

It was already noon by the time they finished digging the tenth floor. Qin Lin had obtained three more Jade ores and four bags of special soil. Besides that, he was more concerned about the gold, silver, and copper ores since he was short of money to buy seeds.

Feeling his stomach protest, he went to have some lunch, then returned to the office. He controlled his game character to enter the 11th floor of the spring Mine and continued to dig.

Starting from the 11th floor, the area seemed to be larger than the previous floors. When Qin Lin finished digging the 11th floor, the night fell again.

He still got Jade ore and special soil, 4 pieces of jade ore and 5 bags of special soil.

Of course, after selling the gold, silver, and copper ores, he finally bought all the seeds needed to plant 1000 mu of Dogtooth grass.

Then the next step would be to replace it with a fake one.

Qin Lin immediately searched for the seed company that sold ranches in Ming city on the internet and ordered more than 3000 pounds of dog Fang grass in bulk.

The good thing about taking them in bulk was that there were no special bags to seal them. They were all recently produced seeds.

This could be better exchanged with game seeds.

Moreover, to be on the safe side, he also noted that he had to personally collect and inspect the goods. The key was to issue an invoice to prove that he had bought the seeds from the other party.

This way, when he planted the game's grade 2 Dogtooth grass all over the villa and Ranch, no one would think about the seeds themselves. After all, the other seeds of the company did not have such an effect.

Therefore, in the end, only special soil and brother Li Kai were the scapegoats. 1

To Li Kai, this was caused by the special soil.

To the public, professor Li Kai had cultivated another type of pasture that could only be grown in Linlin villa.

Li Kai was used to taking the blame, so he might even think that he was the only one who knew the truth, and that outsiders didn't know it was because of the special soil.

However, he was the only one who knew the truth.

After placing the order, Qin Lin went home that night and told Zhao Moyu that he would go to Ming city to buy seeds the next day.

therefore, the next day, qin lin sent the game's crops to the villa and prepared two bottles of linlin leisure tea before driving a truck to ming city.

Although it was troublesome, it was a little safer. Besides, it didn't happen often.

Obviously, the people from this subsidiary company were also a little confused.

It was understandable to issue an invoice, but they had a door-to-door delivery service. You could check the goods after the delivery. If our goods were not up to standard, you could just refuse to sign for it.

It was rare to see a customer who had to personally come and check it.

However, an order of more than 3000 catties was not a small sum. Since the other party was willing, they could not refuse.

As long as the other party signed the receipt and paid, it would be fine.

Qin Lin naturally pretended to check the goods, then signed the papers and left. He spent some time returning to the warehouse.

After driving the car into the warehouse, Qin Lin put the bags of seeds into the game. Then, he opened the grade 2 dog tooth grass seeds that the game had bought and exchanged the bags.

Then, he brought the quality 2 dog tooth grass seed back to reality.

On the other hand, the seeds that he bought in real life could be sold in the game, but the price was pitifully low.

After the successful substitution, Qin Lin transported the game seeds to the villa and asked Yu Shui to bring some people over.

In just a moment, Yu Shui arrived with more than 30 people.

With the planting of the new variety of watermelons on 100 mu of land and the development of the beauty cucumber on 100 mu of land, the number of people under Yu Shui's command had increased, reaching more than 60 people in total.

When the villa Department was completed, this Department would also be classified as the plantation Department.

When Yu Shui got close, she asked curiously, "Boss, what kind of seeds are we moving?"

"The pasture seeds," Qin Lin explained, "we'll move all of them back to the car. Then, you and your men will plant these pasture seeds at the ranch."

"Grow it on the ranch?" Yu wuyou was stunned for a moment before he cautiously asked, "Boss, haven't we already finished planting the pasture seeds?"

Qin Lin knew that Yu Shui would be confused, so he explained, turn over all the original pasture seeds and plant them again. I want to do a research on the cultivation of pasture seeds with professor Li Kai. Also, open up some more land outside the pasture, so that the area for pasture planting can be covered up to 1000 mu.

“okay, boss!” Yu Shui didn’t ask any more questions after hearing Qin Lin’s explanation.

?

Chapter 485: ! 700,000 square meter grass field plan!

Since the boss had said so, he would just lead his people to work honestly.

He began to order people to move the seeds to the pasture area, and then immediately began to deal with the original pasture seeds, and then planted new seeds.

In the following week, Yu Shui brought people to plant a large area of the 2 seeds that they had brought from the game.

At this time, Qin Lin was about to move on to the second step. He went to the warehouse and took out 5 bags of special soil from the game.

The next step was to mix the special soil into the water and irrigate the 1000 acres of Dogtooth grass seeds. That way, Li Kai could shift the blame to the special soil.

This way, as long as Li Kai was involved, he would be the one to blame. This was all professor Li Kai’s credit.

So, after transporting the five bags of special soil back to the villa, Qin Lin went to Li Kai and told him about using the special soil mixed water to irrigate the 1000 mu of green fodders.

The excuse was naturally to see if he could be lucky enough to create a high-quality pasture with mutated pastures.

Li Kai was shocked to hear Qin Lin’s wild thoughts. “Brother Qin, you said you want to use 5 bags of special soil mixed water to irrigate the pasture seeds. It seems that you still have a lot of special soil.”

Hearing this, Qin Lin was about to use the excuse he had thought of before to explain, but before he could speak, Li Kai said proudly, “ it’s just as I thought. When you took out the Duke’s King rose, I knew you had a backup plan. You’re really a cunning rabbit with Three Burrows.

“Eh!” Qin Lin was stunned. Wasn’t this an excuse he made up? He was going to use this excuse to fool this old brother li, but who knew that old brother li would come up with the excuse he had prepared in his mind.

Could this be considered telepathy?

Li Kai saw that Qin Lin was in a daze, so he smiled and said, “ “old brother qin, there’s no need to explain. i understand. my old man has been telling us this. with old brother qin’s intelligence, it would be strange if you didn’t make more preparations.”

ran ran. Qin Lin began to admire this brother of his.

His imagination was too good. 1

He didn't even want to explain.

Brother, you can imagine whatever you want. I'll admit to your imagination and even praise you for being smart.

It's best that when others are confused, you come out and show your style and explain to others what you've imagined as the truth.

Brother Qin, " Li Kai reminded him, " it's not a problem if you want to use this special soil mixed water to irrigate the pasture seeds, but this special soil is so precious. The special elements in these five bags of special soil may be used to cultivate a lot of genetically mutated crops. Is it worth it? "

Qin Lin smiled. brother li, it's not a question of whether it's worth it or not. It's just more profitable to use it to cultivate genetically mutated crops.

once there are more products, it doesn't matter if there are more or less. But if I can use this special soil to affect the pasture and make the quality of the pasture change, making the pasture unique, that will be another achievement.

"If I succeed, maybe the animals will mutate after eating these pastures for a long time. So, how can we say whether it's a loss or a profit now?"

these words stunned li kai for a moment, and then he said with admiration, " "Old Brother Qin, your cultivation level is high enough. Even I can't help but admire you." 1

When Qin Lin heard this, he could only say that his realm was a fart. However, there were 255 levels in the spring Mine field and a Lake mine field. Who would care about these five bags of special soil?

He then said, " brother Li, can you help me make a plan? help me calculate the proportion of water needed to water these five bags of special soil. I don't want you to do it for free. I have a bottle of Linlin medicinal wine that can strengthen yang and kidney. If you're not free, I'll go find someone else.

Hearing this, Li Kai said anxiously,"don't! Who said I'm not free?" I'll definitely be free when you give the order, old Brother Qin."

What kind of joke was this? it was a bottle of Linlin medicinal wine that could strengthen one's yang and kidney.

In the past, he had laughed at Li Qing and the others for not being able to do it, for they could not do without this wine.

Now that he was with xiuwan, he finally understood what it meant for a woman to be like a Wolf in her thirties and a Tiger in her forties. He finally understood how important this wine was. 1

?

Chapter 486: New item: The spring of the earth

When Li Kai heard the Linlin medicinal wine, all the cells in his body started to stir.

When he was single, he could be indifferent to the wine and even look down on it. Now that he was on the wall, he could only become the person he looked down on before.

Women, you only know how good it is after you've tasted it.

Besides, it was obvious that Brother Qin was a good person. Knowing that he was already so old, he found an excuse to give him a bottle of Linlin medicinal wine.

Otherwise, who wouldn't know how to calculate the ratio of water and special soil? Why would they need a professor like him?

He had to accept this kind intention.

Qin Lin clearly didn't know that Li Kai was starting to imagine things again.

alright, " he said, " I'll leave this to you, brother li. I'll go prepare some wine for you.

As long as Li Kai was involved, then the dog Fang grass would have been cultivated by professor Li Kai. That was the truth.

Li Kai had always been a responsible person. Even if it was just a simple calculation of the ratio of special soil to water, he was very serious and meticulous when he made a promise.

When he found Qin Lin the next day, he even took out a calculation table. The calculation results even went down to the amount of water to be watered per square meter and how to water it.

However, Qin Lin couldn't wait for Li Kai to be so meticulous. This was evidence that he would be able to shift the blame in the future. He immediately dragged Li Kai to find Yu Shui, who was busy planting quality 2 Dogtooth grass.

when yu shui saw the two of them, she knew that professor li kai was here for the experiment. she asked, " "Boss, how do you want me to cooperate?"

He didn't know much about research, so he didn't ask much and just cooperated.

Anyway, whatever professor Li Kai said, he would lead his people to do.

Li Kai added, " Brother Qin, this special soil is mixed with water for irrigation. No matter how large the ratio is, the water storage system of your farm will be blocked. I'm afraid that we can only manually water it. This will require a lot of manpower.

The farm had its own water storage system, and the pipes of the water storage system were buried underground, connected to several large water reservoirs.

The water storage system had been activated, and the pipes all over the ranch could automatically spray water out. In addition, in the breeding area, the animals would be washed by this water storage system in the future.

Even the irrigation system of the integrated sea of flowers was connected to these reservoirs.

This was the advantage of modern technology. Otherwise, it would take a lot of manpower in the long run. The water storage system was also the most time-consuming part of the construction of the ranch.

Qin Lin didn't care about manpower at all. then send some people over to help. If it doesn't work, we'll hire temporary workers.

Problems that could be solved with manpower were problems that could be solved with money. 1

Problems that could be solved with money were not problems. 1

Then, he took out the five bags of special soil from the game and handed them to Li Kai, letting Yu Shui water water the water.

Before watering, Li Kai also instructed Yu Shui and the others to build a pool to mix the special soil and water. After mixing the special soil and the corresponding proportion of water evenly, Yu Shui could bring people to water the plants.

After that, Qin Lin also found Zhao Moyi and asked him to transfer the newly recruited employees to help Yu Shui plant and water the two quality Dogtooth grass seeds.

These employees were recruited to fill in the positions on the farm. Now that the animals had not come in and the farm was not open, he could take them to help Yu Shui.

However, a day later, Qin Lin realized that this speed was still too slow. He asked Zhao moyin to post an announcement and recruit more hourly workers to help.

After all, Lu Yong had already inspected all kinds of animals and placed an order. Zhao moyin had also paid the deposit. Once the seller had completed the quarantine, the animals would be shipped, and the animals would soon be entering the ranch.

For the rest of the time, Li Kai stayed in the ranches and busied himself with Yu Shui and the others. After half a month, the quality 2 dog tooth grass seeds were finally planted in 1000 acres of land and watered with special soil and water.

however, in the past half a month, he had made some changes. he had mixed some ordinary dog's tooth grass seeds into the grade 2 dog's tooth grass seeds.

After all, 1000 mu of dog's tooth grass had all mutated. No matter what, it would make people think too much.

If he put some ordinary dog's tooth grass in, it would only be about 30%. This ratio would not affect the overall effect much, but the mutation of the dog's tooth grass would be a matter of probability.

It was just that the dog's tooth grass had a higher mutation record. After all, a wildfire can't burn all of it, and the spring wind can blow. It wasn't strange that the probability of this mutation was high.

After all, no one had the ability to refute this, unless they had five bags of special soil to do the same experiment as the dog's tooth grass, but that was impossible.

The second step of the plan was also a success.

Now, he just had to wait for the 1000 mu of quality 2 dog's tooth grass seeds to sprout and grow. Then, he would shock everyone and let Li Kai take the blame.

In the ranch area.

Li Kai rolled up his muddy pants and said to Qin Yang, "Brother Qin, this 1000 mu of land has finally been watered. I'm so tired. However, if there's such a good thing in the future, you must come and find me again."

He could get a free bottle of Linlin medicinal wine just by doing some simple things that didn't require much thought. The more good things he could get, the better.

"I'll definitely look for you." Qin Lin immediately replied with a smile. This brother Li was so happy to take the blame. If he didn't find him to take the blame, he would be letting him down.

Yu Shui, who was beside him, was also a little happy to see that things were done. She said, "Boss, professor Li has been doing experiments on this farm for the past half a month. I believe that the growth of these pastures will not be disappointing. After all, professor Li Kai was the one who did the experiments."

?

Chapter 487: New item: The spring of the earth

yes, professor Li Kai did the experiment himself. The pasture will definitely not disappoint. Qin Lin said with an inexplicable smile.

He couldn't get rid of old brother Li. If anyone probed, he would ask Yu Shui to come out and talk about how professor Li Kai had been doing the experiments in the past half a month.

Li Kai didn't know that he had been set up again and again. Instead, his face was filled with thoughts of when such a good thing would happen again.

After tasting xiuwan's taste, he had consumed a lot of Linlin medicinal wine.

He didn't mind having too many of these things.

...

At night.

Qin Lin and Zhao Moyu returned home. Just as they were about to practice and familiarize themselves with the difficult fighting positions that they had created these days, they heard her say, "don't be impatient. let's take a look at this list first."

Qin Lin took the name list with a puzzled look. When he saw the contents, he also became serious.

It was a well-organized list of positions in the villa Department.

Now that the ranch in the villa was about to be opened, the villa's department structure had to be perfected. The functions of each department had to be perfected as well, so that the villa could run more effectively.

For example, when the mountain villa wanted to recruit employees, Zhao moyin had to personally take charge of the recruitment of an attendant in the past, because the supervisor was not qualified to sign and confirm this matter.

The structure of the Department was complete. In the future, each department would have their own manager. If the service department lacked staff and wanted to hire waiters, the service department Manager would write an application and send it to the HR department. After the HR manager signed it, they would start the interview for recruitment. After training some related things, they would hand over the people to the service department Manager to arrange.

This kind of small matter didn't need to trouble Zhao moyin at all. Even if it was at the level of supervisor, the Department manager could also appoint it on his own. Finally, he could write an application, go through the process, and let him sign it with Zhao moyin.

In the future, he and Zhao Moyu would only be responsible for the appointment of managers. This way, they would be able to free up more energy to do more important things.

The various departments operating their own functions could also improve efficiency.

Qin Lin also looked at it seriously. The department structure was perfect, and the first batch of people would be promoted to manager positions. They would become the real backbone of the villa in the future.

These people would naturally have to sign new contracts after being promoted. Although the salary was higher and the power was greater, there were also more restrictions. The relevant contracts had already been prepared by senior brother Chu.

First of all, he and Zhao moqing, he was the chairman and the boss, and Zhao moyin was the CEO, which meant that she was the real female president.

He felt that the game should be more user-friendly, and that the TV shopping should have some professional female CEO clothing.

After all, if Olive Town could make such sexy and alluring pajamas, it shouldn't be a problem for them to make a suit for a female CEO in this area, right? 1

With Zhao moyin's identity, he should be more resistant to tearing.

As he thought about it, the corners of Qin Lin's mouth curled up slightly.

Zhao Moyu saw his expression and said, "What are you thinking about with such a wretched smile?"

"What else could I be thinking? I just wanted to buy you some clothes to add some fun," Qin Lin said honestly.

zhao mo rolled his eyes at him in annoyance and pretended not to hear him.

Qin Lin looked at the form again.

This time, Yu Shui from the plantation Department was promoted to manager.

The department's technical ability was greater than the management ability. Yu Shui had been doing a good job as the director.

In this half a month, the planting of 1000 mu of quality 2 Dogtooth grass was also well arranged. There was no problem for him to be the manager of the planting Department.

Chen dabei was next.

This guy was smart. He had no problem being a Security Manager in a Scenic Area like the mountain villa.

Lin Lanzi was the manager of the media department.

As for Lu Yong, he was the manager of the procurement department. The other party had come to the mountain villa from the blue ocean Group, and this position was reserved for him.

Finally, it was the service manager's turn. Gao Yaoyao's name was written on the form, but Zhao mochen circled her name.

"You're not sure about Yaoyao's position?" Qin Lin asked Zhao Moxi.

Zhao mochen nodded and said, " Yaoyao is a good person, but she's too young and not very mature. Moreover, she only has a secondary school education. Although she has been studying and making progress, the service department is the biggest Department in the villa. When the ranches are opened, there will be more people in the service department. I'm afraid that she can't handle it, and it won't be good for her.

Qin Lin also understood Zhao Moyu's worries. The service manager was indeed the position with the strongest management ability and ability to deal with all kinds of events.

Everyone knew that Gao Yaoyao was a good girl. She studied hard and made progress. However, the villa was developing too quickly, and they didn't give her enough time.

If he really forced himself to take on this position, he was afraid that this girl would not be able to take the pressure.

But at the same time, Gao Yaoyao had been in the villa for the longest time. She could be said to be his first employee and had not made any mistakes. Since the others had been promoted, he should not leave her behind.

Qin Lin thought for a moment and said, " how about this? since the service department is the biggest Department, we'll separate the villa service department and the herding area service department. We'll let Yaoyao be the villa Service Department Manager. As for the herding area, we'll just headhunt another manager from outside.

well, that's it then. Yao Yao's character is suitable for this industry, and it's worth training her. I'll talk to a few people tomorrow.

Zhao moyin agreed to Qin Lin's idea. After all, she knew nothing about it in the beginning, but she had been learning and improving. She said, however, the human resource manager and the logistics Manager are more important. We have to recruit them from outside.

?

Chapter 488: New item: The spring of the earth

"My dear wife, you can make the decision." Qin Lin said as he threw the form out and then pounced. 1

...

the night passed.

The next day, Qin Lin had just returned to his office after delivering the game to the villa. He saw Gao Yaoyao coming out of Zhao mochen's office with a happy face.

It was obvious that Zhao Moyu had started talking to them early in the morning.

Although he had already decided on a few people to be promoted to managers, he still had to follow the necessary procedures.

Zhao moyin was becoming more and more decisive, like a female CEO. The more she was like this, the more he looked forward to the corresponding clothes on the games, TV, and shopping programs.

"Boss!" Gao Yaoyao greeted Qin Lin respectfully, then quickly promised, " "Thank you for your trust, boss and sister silent. I won't let you down."

She had been called over for a talk early in the morning. At first, she didn't know what was going on, but now she knew. Although sister Moxi didn't say it clearly, the meaning was clear. She wanted to promote her.

she was already a supervisor, and if she was promoted, she would be a manager. she was very grateful for this. she knew how capable she was. if she hadn't met her boss, she might have been a waitress elsewhere.

Now that her boss and sister Moxi wanted to promote her to this position, she was not only grateful but also a little afraid. She was afraid that she would embarrass her boss and sister Moxi if she didn't do it well.

"Do a good job!" qin lin looked at gao yaoyao and gave her a word of encouragement.

"En!" Gao Yaoyao nodded heavily.

She knew that she could only try her best to improve herself in the future. She had to live up to her position, to live up to the trust of her boss and sister moxiang.

After that, Qin Lin also returned to his office. He opened the villa APP's back-end to see what he had to deal with. Then, he looked at the game on the screen in his mind to deal with today's matters.

Unfortunately, fishing and cutting trees still didn't give him any extra gains, and the mountain products didn't respawn.

Then, he controlled his game character to continue mining in the spring Mine. Now that the game's gold had run out, it was good to mine to replenish his gold.

The 11th floor of the spring Mine had been dug out. He controlled his character to go to the 12th floor and dig.

Just like before, the probability of gold, silver, and copper ores was very high. After digging two or three squares, one of the three would appear.

[ congratulations, you have excavated a bag of special soil! ]

.....

[ congratulations, you have obtained a piece of blue jade ore! ]

After that, he also dug up special soil and special Jade. After the sixth floor, these two things were already regular harvests.

"I wonder when this mine will give me another surprise." Just as Qin Lin was thinking about this, he controlled his game character to dig at the next square. Suddenly, he saw that the ground that had been dug was completely different from the previous one.

Previously, the items they dug up would appear in the hands of the game characters and then be kept in their backpacks.

This time, after the game character dug, a fountain appeared on the ground and directly lifted the game character up. Then, the notification appeared.

[ congratulations, you have dug up a rare underground spring. You have obtained Earth Spring water X2 ]

"???" Qin Lin looked at the two buckets of water in his backpack in surprise.

The shape of the water bucket surprised him. It was similar to the large bottled mineral water in reality.

Moreover, the spring water of the earth was something that was not available in the old version.

In the new version of the game, the deeper one went into the mine, the more things one could dig. Moreover, there were a total of 255 levels, so there would definitely be a lot of things to add. The spring water of the earth was obviously one of them.

Moreover, it was already the 12th floor underground, so it made sense to be able to dig an underground spring.

With this new discovery, Qin Lin was excited. He controlled his game character to continue digging. After all, the probability of digging special soil was not low.

Unfortunately, other than two more bags of special soil and three more Jade ores, they did not find any more earthspring water.

At this moment, he remembered that the underground spring was rare, which meant that it was not as easy to dig as special soil.

However, this also meant that the spring water of the earth was definitely of a higher grade than the special soil. After all, in the game, the rarer something was, the better it was. This was common sense.

Qin Lin controlled his character to enter the entrance to the 13th floor, but this time, he was restricted again. He couldn't enter without a certain level, and only the third floor was open to him.

This also allowed him to control his game character to return to the farm, take out the two buckets of Earth Spring water, lock the office from the inside, and directly enter the game to check the remarks of the earth Spring water.

[ (rare) Earth Spring water: Mysterious! ]

[ this is a rather rare underground solution. It is the essence accumulated in underground springs. It is very active and has a very strong effect on the growth of plants. Restrictions: [ each plant can only absorb a limited amount of energy. It is impossible to absorb energy indefinitely. Please study the specific situation on your own. ]

qin lin immediately knew what the earth spring water was used for when he saw the note.

It had a very strong promoting effect on the growth of plants, which was to increase the growth speed of plants.

This was the same as the accelerated growth of fertilizer in games.

He just didn't know how strong this extremely strong boosting effect was.

Qin Lin exited the game and walked out of the office. He wanted to see the effects of the earth Spring water. He would know once he took it out and tried it.

After leaving the villa, Qin Lin brought one of the buckets of Earth Spring water out. He then returned to the villa and directly poured it into the water reservoir of the pasture's water storage system.

There was a limit to the amount of Earth Spring water that each plant could absorb. He didn't know the exact amount, so he just took a bucket of Earth Spring water and poured it into a reservoir, directly watering the quality 2 Dogtooth grass. He just didn't know if diluting it and watering 1000 mu of it would have any effect.

Normally, it would take three to five days for a dog's tooth grass to germinate, but the quality 2 dog's tooth grass in the game had an even shorter growth time. It had already been a day since it was planted. If he added the spring water to the water reservoir and watered it, he would know if it had any effect tomorrow.

Soon, Qin Lin arrived at the reservoir and poured the bucket of Earth Spring water into the reservoir connected to the ranch. He then started the stirring machine.

This was to add in some pesticide and other things to make it dissolve.

Finally, he directly opened the valve and began to irrigate once.

When he arrived at the area where the grass was planted, the land had been watered and was suddenly wet. He looked at the seeds on the ground and found that they had not sprouted yet. He would come back tomorrow to check. There should be some changes.

After he was done, Qin Lin looked at the time. It was almost noon, so he asked Zhao moyin to go to the cafeteria for lunch.

“Boss! Lady boss!” Yu Shui had already finished her lunch. When she saw Qin Lin and Zhao Moyi, she hurriedly greeted them. Her attitude was more respectful than before because she had also been invited to talk to Zhao Moyi and knew that she was going to be promoted to manager.

This also made him feel a higher sense of belonging to the villa, and his respect for Qin Lin and Qin mo also came from the bottom of his heart. It also showed that he cherished this promotion opportunity very much.

After leaving the cafeteria, Yu Shui went straight to the farm.

After knowing that he was going to be promoted, he was now very enthusiastic about work.

The boss had asked professor Li Kai to experiment on the 1000 mu of green Bucktooth grass seeds. The boss must care a lot about them, so he naturally had to inspect them a few more times to avoid any problems.

eh, who opened the valve before the watering time set by professor Li Kai? ” Yu Shui came closer, looked at the watered land, and frowned.

Wasn’t this nonsense?

What if it affected professor Li Kai’s experiment?

as yu shui spoke, she was suddenly stunned. she squatted down in surprise and looked at the green leaves in a daze.

“This Gu didn’t germinate a few hours ago, right?” Yu Shui asked herself in disbelief.

?

Chapter 489: The grassland that was built in 15 days! Suddenly slapped in the face by a horse!\_1

yu shui looked at the sprouted dog’s tooth grass seeds in disbelief. then, she began to check her surroundings carefully and found that almost all the newly planted dog’s tooth grass had sprouted.

When he was planting the dog’s tooth grass seeds, he had done some research on it, so he knew the growth cycle of this kind of dog’s tooth grass that was specially cultivated for ranches.

The good seeds of the dog tooth grass cultivated for ranches would germinate in three days at the earliest.

It had only been a day and a half since he planted the seeds with his people, right? All of them had sprouted, and the time needed had been reduced by half.

"Professor Li Kai is amazing." Yu Shui immediately thought of the special soil that professor Li Kai had watered with water.

Although the boss and professor Li Kai didn't reveal what the special soil was, he could tell at first glance that it didn't look like soil. The grayish-black color was more like a mixture of plant ash and fertilizer.

&Nbsp; it must have been this thing that made the grass seeds germinate so quickly.

Professor Li Kai's experiment was definitely effective.

Thinking of this, Yu Shui hurried out of the ranch area.

He had to report the good news to his boss and professor Li Kai.

In the staff cafeteria.

Qin Lin and Zhao mochen had already finished their lunch. At another table, Li Kai and Tang xiuwan were whispering to each other.

after old brother li and dr. tang got together, he had less time to freeload food. even quality 2 food didn't seem as delicious as dr. tang's.

Just as he was about to leave, he saw Yu Shui rush in and shout, "Boss, professor Li's experiment on the forage grass seems to have succeeded."

His voice was a little too loud and hurried, so all the staff in the restaurant looked at him.

"What kind of research is professor Li Kai doing this time?"

"I think it's from the ranch."

"Didn't boss Yu say that it was patriarch grass?"

"....."

The employees of the villa were very familiar with professor Li Kai.

professor li kai's current reputation was very great. furthermore, he was very knowledgeable. in their eyes, he was a very powerful person.

Seeing this, the corners of Qin Lin's mouth curled up slightly.

It was good.

the news spread.

The patriarch grass was the research of professor Li Kai.

"Senior brother li, what have you been researching this time?" Tang xiuwan was also curious. She sounded a little proud. After all, he was her boyfriend.

Li Kai didn't do any research on the pasture. He just added some special soil, and whatever happened was due to the special soil.

He couldn't disclose the details of the special soil to the public, and he was also curious about what had happened to the patriarch grass, so he asked Yu Shui, "What's wrong with patriarch grass?"

Yu Shui hurriedly explained, " professor li, the grass seeds have already germinated. Under normal circumstances, it would take three days for the canine grass seeds to germinate. Now, it has only been one and a half days. The time has been reduced by half.

"So fast?" Li Kai was surprised to hear this and immediately said to Qin Yang,"Old Brother Qin, shall we go and take a look?"

He knew in his heart that this was definitely the effect of the special soil.

"let's go!" Qin Lin nodded.

He was just as surprised.

He didn't expect the effects of the spring water of the earth to be so strong.

When he had just finished watering the plants, he had checked that no seeds had sprouted. But how long had it been?

The two of them left with Yu Shui, and the staff cafeteria became lively again.

"Professor Li Kai's research on the patriarch grass seems to have produced some results."

I'm guessing professor Li Kai will be on the hot search again.

"By the way, professor Li Kai's research is amazing."

"....."

Qin Lin heard the discussion behind him and couldn't help but smile even more.

In the employees 'hearts, they thought,"professor Li Kai is amazing!" professor li was the one who researched on mu hai.

Old brother li must have thought that it was caused by special soil.

Only he himself knew that this was caused by the earth Spring.

very quickly.

Qin Lin and Li Kai went to the ranch area and squatted down to check with Yu Shui. They found that the seeds had sprouted.

"it's really sprouting." Li Kai was surprised. the germination time has been shortened, which means that the special soil has affected these pastures. Brother Qin, there is a high possibility that the pastures have undergone a mutation. It seems that your luck is really good.

"It's all thanks to you, old brother li." Although Qin Lin said so, he was sure that the grass was mutated. After all, the dog tooth grass seeds that came out of the game were mutated.

In the following time, the shortening of the germination time was not the most surprising thing.

Qin Lin didn't expect the effect of the spring water of the earth to be long-lasting. In the next few days, the grass seeds watered with the spring water changed every day.

In just a few days, lush green Dog tooth grass could be seen growing in all the areas at an amazing speed.

It must be known that the growth cycle of this kind of dog tooth grass cultivated for ranches was at least a month.

At this rate, the growth cycle would be astonishingly short.

Other than Qin Lin, who knew about the effects of the earth Spring water, who was still calm, Li Kai, Yu Shui, and the other employees working in the ranches were all in disbelief.

Naturally, while Yu Shui and the staff were in awe, they were also praising professor Li Kai for being so amazing.

This caused Li Kai to start panicking.

He knew that this was the effect of the special soil, but if this continued, the outside world would know about the patriarch grass and it would cause a commotion. When that time came, would he have to take the blame again?

?

Chapter 490: The grassland that was built in 15 days! Suddenly slapped in the face by a horse!\_2

After all, the special soil was a secret of brother Li and Linlin's laboratory, and he couldn't disclose it to the public.

On the 10th day, the entire farm area was already lush and green.

When it was the 15th day, the entire farm area seemed to have become an endless grassland. Zhao moyin and the people in the villa had long known about the situation in the farm area, and everyone was in disbelief.

Zhao Moyu had even asked Lin Lanzi to start preparing a publicity plan for the ranch.

After the employees at the villa knew that the farm had become a grassland, they talked about the pasture and professor Li Kai the most every day.

Yu Shui seemed to be in awe of professor Li Kai's ability, so she also said that she had personally participated in the training with her people. She told people a lot about how professor Li Kai trained and did it himself.

Li Kai and Qin Lin walked into the farm and looked at the vast expanse of green. The two of them felt relaxed and happy.

How should he put it? when he came in and saw the boundless grass, his entire spirit seemed to have been sublimated.

This was the effect of the dog's tooth grass.

If they were tourists, they would feel that this trip was not in vain after seeing such an impact.

Moreover, as he went deeper, he also experienced another attribute of the dog's tooth grass. He could smell the fragrance of green grass.

The smell was indescribable. It was as if he was in nature, giving him a very comfortable feeling.

Brother Qin, I've already taken samples of these pastures and tested them. Almost all of them have mutated, and the proportion has reached the extent of about 70%.

moreover, the special elements detected are very rich in nutrients. I'm afraid that the animals you raise will be better off just eating this grass than others who have carefully raised it with all kinds of feed.

if this data gets out, all the ranchers will be shocked. This special soil's effect on the dog tooth grass is too strong.

Li Kai couldn't help but sigh as he spoke.

It was because the effect was so good that the farm might cause a sensation in the future because of this green Dogtooth grass. However, according to the current situation, under the condition that the special soil was not exposed, he seemed to have to take the blame again.

He wasn't afraid of taking the blame, but he was afraid that everyone outside thought he was powerful and awesome, but he didn't know it.

He remembered a movie he had watched before. It was about a hooligan who was rumored to be the world's number one master by chance. Everyone was afraid of him and knew that he was powerful, but he didn't know how powerful he was.

At that time, he had thought that the plot was stupid.

Was there anyone in the world that stupid?

There would be people who would believe that a hooligan was the number one in the world.

Now that he had experienced it for himself, he felt that it was not that the plot was stupid, but that the world was really so wonderful.

Qin Lin didn't find Li Kai's words strange. After all, the dog tooth grass had the attribute of +2 nutrition for grazing animals, so it was not strange that it was rich in nutrients.

He took out his phone again and took a video of the endless green.

It was just like the scene of the triangular plum blossom sea. When this video was released, it was very beautiful and attractive. The quality of the video was definitely far better than his shooting skills.

The advanced-level attributes were no worse than a Grade 2 triangular plum.

It seemed like this green foxtail really wasn't affected by the environment. Even if it was grown in real life, it would still be a quality 2.

In order to be sure, Qin Lin also squatted down and plucked a few stalks of Dogtooth grass. He would bring them into the game to check their attributes later.

When he returned to the office, the first thing he did was to lock the door. Then, he entered the game to check the attributes of the dog tooth grass planted in reality.

[ dog tooth grass: normal ]

[ this is just an ordinary dog's tooth grass. There's nothing special about it! ]

...

"Dog tooth grass: Grade 2"

[ this is a type of pasture that has undergone a mutation after careful research. after planting it, it will have unexpected effects on ranches: Green grass fragrance +2, open mood +2, carefree and relaxed +2, aesthetic +2, entry +2, grazed animals "liking +2, nutrition +2, exuberant vitality +2! ]

There were ordinary ones among the dog's tooth grass, but the seeds he took out from the game were of Grade 2 after they were planted.

This +2 attribute of being liked by grazing animals also allowed the animals who entered the ranch to settle down immediately without any problems.

animals were quarantined for a long time, and they were also transported over long distances. when they arrived at a new environment, it was easy for them to become anxious and anxious. they might even not eat or drink, which led to many problems.

Therefore, a new profession was born, and that was tamer. They could help animals settle down as quickly as possible, thus reducing anxiety and anxiety, which could cause diseases and reduce losses.

However, with the +2 attribute of being liked by herdsmen, the tamer might lose his job.

Fortunately, this Grade 2 dog tooth grass also had its limitations. Only game seeds would have those attributes. Cultivating the seeds or transplanting them would not have any effect.

Otherwise, there would be a lot of people coming to steal grass to cultivate. There was really no way to guard against this 700000 square meter area.

Another two days passed.

Qin Lin had just finished delivering the goods and returned to the villa office when Lu Yong came to find him early in the morning. Lu Yong had already put on a custom-made professional suit with a blue base and the Linlin villa at the collar.

This was a suit that Zhao moyin had specially ordered for him. The suit was also for managers, and the color could be chosen. The Linlin Manor was embroidered on the collar, and it was also where the employee tag was. Lu Yong's employee tag was the purchasing manager.
