

The Game 531

Chapter 531

Heavenwood Epiphyllum seed: Grade 1 "

this is a special herb. After the game's improvements, it has a very short growth time and is very effective in treating mental illnesses. It can be used as a raw material for some mental illnesses.

The seed store indeed had the seed of the Heavenwood Tongshi. Moreover, from the remarks, the Heavenwood Tongshi sold in the game was effective for mental-type medicine.

If this plant was useful for the U31i drug developed by the Chinese Academy of Sciences, then it would be amazing if it had an extremely short growth period.

Or rather, professor Li Kai was going to be Awesome Again.

a black pot was about to fall from the sky.

Because Minister Lu still had to rush to the next meeting, the video conference didn't drag on for long. The real details would be discussed by the specialists sent by the Chinese Academy of Sciences later.

"Professor Jin, professor li, it's a rare opportunity to assist in research experiments. Let's have a competition and see who can produce results first," professor Huang said.

Professor Jin smiled. sure. I'm just afraid that the three of us won't be able to produce any results by then. If that happens, we'll all be embarrassed.

Professor Huang laughed. haha, that's true. We'll have to exchange some research materials when the time comes.

Li Kai was too embarrassed to answer their conversation. The key was that he had to rely on the special soil to cultivate it. He felt guilty.

After the video conference ended, Li Kai finally heaved a sigh of relief. He was really afraid that the cat would be out of the bag.

Qin Lin, on the other hand, controlled his game character to buy the seeds directly, then returned to the farm and planted the seeds of the Heavenwood tongshu in the herb garden.

He wanted to see the effects of the Tian Mu Tong Gu.

To his surprise, he received a system notification at noon.

The heavenly wood Tonghui had already matured.

this speed surprised him.

although there had been seeds with extremely short growth time in the game before, this was the first time it had happened so quickly.

According to the time ratio in the game, it would probably mature in a month in real life.

In the office.

When Qin Lin received the notification, he immediately controlled his game character to pick the heavenly wood Tongshi from the herb garden. Then, he locked the office door and entered the game to check.

[Heavenwood clear aperture: Grade 1]

[this is a special medicine produced by the game. It is very effective for some mental illnesses. It can be used as a raw material for medicine for some mental illnesses: Calming the nerves +1, relieving stress +1, mental stress effect +1]

Qin Lin looked at the remarks of the heavenly wood Tongshi. There were only three attributes, but it happened to have the mental stress effect required by the Chinese Academy of Sciences.

Although he didn't know what the effect of the heavenly wood armor developed by the Chinese Academy of Sciences was, the +1 attribute produced by the system couldn't be worse.

Therefore, after knowing the effects, Qin Lin decisively exited the game and looked at the screen in his mind. He controlled his game character to go to the seed shop in ore town and continue to buy some seeds of the transparent sky Wood.

After controlling the game character to return to the farm, he entered the game again. When he exited the game, he had a small bag of the seeds of the heavenly wood Tongshi, which was produced by the game.

The Commissioner sent by the Chinese Academy of Sciences arrived on the third day, which meant that the Chinese Academy of Sciences had already made preparations for this experiment assistance. This also showed how important this matter was to them.

The specialist who came to Linlin's laboratory was a middle-aged man.

Shen Li and Li Kai were in charge of welcoming the guests. They were the last to be brought to Qin Lin, because he was the one who had to sign the contract to assist in the experiment.

"Chief Yan, this is our Chairman Qin." When Shen Li brought her to Qin Lin, he introduced her, "President Qin, this is chief Yan from the Chinese Academy of Sciences. The contract for assisting in the experiment is waiting for you to sign.

"Boss Qin, it's an honor to meet you." Chief Yan immediately stepped forward and shook hands with Qin Lin enthusiastically. At the same time, he handed the contract to Qin Lin and said, "This is the contract for Linlin's laboratory to assist in the experiment. Please take a look, boss Qin."

Chief Yan finally understood why Minister Lu had told him not to be too surprised when he saw boss Qin's age.

So he was so young. Moreover, he was the internet celebrity little Qin who rode a horse.

Who would have thought of this?

However, he didn't dare to underestimate Mr. Qin's young age. Minister Lu had told him before he came that Mr. Qin must be a very powerful person to be able to make such a career at his age and make someone like professor Li Kai stay in Linlin laboratory willingly.

He had achieved so much at such a young age and had not died halfway in the future. He would definitely have a place in the top position of the country's big shots.

Furthermore, regardless of whether it was the donation of adonashi grass roots or the help he had given to you city's development, the higher-ups had given him their approval. They had a very good impression of boss Qin.

Minister Lu was even very sure that with boss Qin's introverted and worldly style, he would definitely not die prematurely in the future. He would even achieve greater things than Wang, MA, Ren Qianqian, and other big shots.

After all, he already had the demeanor of a responsible entrepreneur at such a young age.

There was a fundamental difference between entrepreneurs and capitalists.

It was rare to find such a young man in the new generation.

chief Yan, welcome to our Linlin laboratory.

Qin Lin also took the contract and looked at it with a smile.

To put it simply, the Chinese Academy of Sciences would transfer the money, and Linlin laboratory would do the research. It was very similar to a business contract outside.

Chapter 532

the difference was that this experiment assistance contract was official, and it was more about honor and achievement.

After the experiment was successful, the laboratory would be awarded an honor badge by the Chinese Academy of Sciences, and it would also have the qualifications to apply for a national title.

This was something that could not be bought with money.

Of course, the Chinese Academy of Sciences didn't transfer the money all at once. They would transfer the funds in stages as the experiment progressed.

During the cultivation stage, the other party would also be stationed at Linlin's laboratory.

The other two, professor Huang and professor Jin, were in the same situation.

After reading the contents of the contract, Qin Lin signed his name directly. To be honest, the terms and conditions of the contract didn't mean much to him.

After that, Qin Lin called Gao Yaoyao over and arranged a nuptial room reserved for chief Yan in the villa.

The next step was to think about how to mix the game's seed of the Heavenwood tongshu with the seed chief Yan brought from the Chinese Academy of Sciences.

He was basically giving this thing to the country for free.

In the eyes of others, this kind of act of rushing to give things out might be a fool's behavior, but he was happy to do so. Who asked him to have so many of these things?

There was no harm in doing more of these things when he had enough ability and there were not many losses.

The funding from the Chinese Academy of Sciences arrived very quickly. It arrived early the next morning, and Li Kai began to work at the Linlin laboratory.

Although assisting in the cultivation process was like forcing a duck onto a rack, the matter was already set in stone. He still had this sense of responsibility. Moreover, with the special soil, he more or less had some confidence.

After all, he had seen the effects of this special soil more than once.

Qin Lin sent the in-game items to the villa. After dealing with the villa's matters, he immediately took out the bag of seeds of the celestial wood Tongshi that he had brought out from the game.

He put the seed into his pocket and went to Linlin's laboratory.

When he arrived at Linlin's laboratory, he first went to the experimental site to check on the situation.

The seeds that he had planted before had already entered the growth stage, and each seedling was developing well. It was just that he didn't know how many of these seeds would undergo genetic mutation.

then, he went to the place where the cola fruits were planted.

After all, these things are two sharp swords that can destroy the two money bags that the Starchief Empire used to make money in our territory.

The Cola fruit was a type of short seedling, and now the main stem of the seedling had also appeared.

When the Cola fruit tree grew Cola fruits, old brother Li, Shen Li, and the others would be so shocked their jaws would drop.

Then, Qin Lin walked out of the experimental site and went to another experimental site nearby.

Linlin's laboratory was a very large experimental site. This was the only place where special soil was mixed. The other places were still normal soil.

This time, chief Yan was there to assist in the cultivation experiment. In order not to expose the special soil, brother Li had already discussed with him that the cultivation site would be placed in another experimental site.

When Qin Lin arrived at the experimental site, Li Kai, chief Yan, and Shen Li were all there.

Li Kai was busy in an experimental field.

Shen Li, on the other hand, was accompanying chief Yan, the Commissioner, by the side.

In fact, the two of them could not help much with the training.

"Chairman Qin." Shen Li!

"Boss Qin!" Chief Yan.

The two of them greeted Qin Lin when they saw him.

Qin Lin responded to the two of them. He then looked at Li Kai, who was busy in the experimental field, and asked, "Old brother Li, how is it? when can we plant the seeds?"

"last night, i specifically looked through the information on the heavenly wood tongshi and found that this herb has strict requirements for the moisture and breathability of the soil," li kai explained.

if we can control the moisture retention and air permeability to a certain extent, there should be some effects. So, I'm going to personally go through this piece of land and mix in other amounts of soil to maintain different levels of air permeability and moisture retention. I'm going to see how big the final impact is.

As he spoke, he gestured to Qin Lin to look at the bag next to him.

When Qin Lin saw the soil in the bag, he immediately understood and handed the bag to Li Kai.

this was the soil mixed with special soil from another experimental site.

Li Kai took the bag and poured the soil into the field.

What moisture retention and breathability were all nonsense for chief Yan to hear. There was no such thing at all. He just casually turned the floor.

In the end, he still had to rely on the special soil.

Chief Yan obviously didn't know about this. When he heard Li Kai's words, he suddenly said in surprise, "I've learned about the cultivation of the heavenly wood Tongshi when I was at the Chinese Academy of Sciences. The people at the Chinese Academy of Sciences all want to improve the nutrient content of the soil, or improve the condition of the seed itself. No one has really tried it in this area. Professor Li Kai really lives up to his reputation, he's amazing."

"Hehe." Li Kai.

"Ran ran," Qin Lin.

The two insiders heard chief Yan's conversation and looked at each other silently.

Very good, he had fooled this person.

Li Kai's actions were very Swift, and he quickly mixed the soil with the special soil into the test site.

The next step was to plant the seeds of the Heavenwood Tongshi that chief Yan had brought.

Chief Yan had brought a lot of seeds of the Heavenwood tongshu. Because he was prepared for long-term research, there were a lot of seeds.

This time, Li Kai also took out some seeds for the first batch of planting.

When Qin Lin saw Li Kai take out the seeds, he hurriedly said, " "Brother Li, give me some seeds. I'll try to plant some so that I can have a sense of participation in this national-level experiment."

Chapter 533

Li Kai did not refuse and handed some seeds to Qin Lin.

Since we'll be relying on special soil, it doesn't matter if you plant it casually.

However, he did not know that when Qin Lin caught those seeds, he had mixed some of the seeds from the game into the seeds.

Then, Qin Lin deliberately planted the seeds in front of Li Kai without any purpose.

This way, Li Kai's seeds would cover his own, and no one would be able to tell which seed was planted by whom.

Li Kai didn't suspect anything. After all, old Brother Qin was just playing around. If he planted blindly, so be it. With the special soil, it wouldn't affect him.

Chief Yan saw that Qin Lin also got off the bed and started to work, so he asked Shen Li curiously, " "Boss Shen, will boss Qin also help professor Li Kai with his experiment?"

Shen Li explained, " our boss graduated with a major in tourism. He probably doesn't have the ability to do so. However, our boss has a good relationship with professor Li Kai. He might have learned something from him. After all, with professor Li Kai's ability, this wouldn't affect his research.

Chief Yan agreed, " that's true. Professor Li Kai must be very powerful. Seeing how close Mr. Qin and professor Li Kai are, I can understand why Mr. Qin, a tourist, would set up a laboratory. Professor Li Kai didn't accept professor Ren's invitation to the Chinese Academy of Sciences and wanted to stay at Linlin laboratory.

After spending a lot of time and sweat, Li Kai finally managed to plant all the seeds he had taken out in the experimental plot.

When he finished, he and Qin Lin both heaved a sigh of relief.

"Old Brother Qin, the first batch of plants has been planted." Li Kai's face was full of smiles, with a look that only he and Qin Lin could understand.

Everything was dependent on this special soil.

At that time, he only needed to get some nutrient fluid to water the seeds in front of chief Yan.

yeah, I'm done. It's up to you now, old brother Li. Qin Lin was also full of smiles. The famous seed of the heavenly wood illumination had sneaked in without anyone knowing. Old brother Li was ready to take the blame.

"Professor Li Kai, you've worked hard." chief yan and shen li walked forward and looked at li kai's sweaty appearance, and they sincerely admired him.

Even the cultivation experts at the Chinese Academy of Sciences wouldn't do it by themselves. Planting would be done by specialized people.

At noon.

Chief Yan returned to the nuptial chamber arranged by Linlin villa and reported Li Kai's situation on the first day to the Chinese Academy of Sciences.

At the Chinese Academy of Sciences.

The first day of the experiment was the first day of work for the three professors. Minister Lu and professor Ren had been paying attention to this.

Chief Yan wasn't the only one reporting. The specialists from professor Huang and professor Jin also reported back.

"professor ren, take a look. the three professors have already started their experiments." Minister Lu gave three portions of the information to professor Ren.

Professor Ren also took it and looked at it. He said, "

" this professor jin really has a different way of thinking from the cultivation experts at the chinese academy of sciences. his first step is to consider the effect of long-term moisture retention and temperature on the seed of the glorious sky wood. i've never tried this before, so i don't know what the final result will be. "

"Professor Huang's idea is also different. He didn't do what the experts at the Chinese Academy of Sciences have already done. Instead, he chose to control the soil's breathability and nutrient control, and then record the growth of the seeds."

Minister Lu didn't know much about this, so he asked, " "Professor Ren, will the ideas of these two professors be effective?"

I'm not sure about that. This is just the most basic control of soil conditions. The real test is still the control and breeding later. Professor Ren shook his head. He couldn't make a judgment and said, " let's take a look at professor Li's train of thought first. He's indeed professor li. Little li, this is good.

Halfway through his words, he was stunned, and the surprise on his face was uncontrollable. Li's basic idea was to control the moisture and breathability of the soil, and add other soil to make different levels of moisture and breathability so that the differences could be recorded.

Minister Lu was surprised when he heard this. "Professor Huang and professor Jin came up with this idea. Did professor Li Kai come up with it at the same time? Professor Li Kai really lives up to his name, he's amazing."

it doesn't matter if it's effective or not, " professor Ren agreed. I'm afraid professor Huang and professor Jin won't be able to help but be surprised if they know about this!

[Chapter 534 Professor Li Kai Is Amazing! The Li Family's Old Man Arrives At The Villa](#)

He really didn't need to learn how to put on an act.

In order not to expose the game system, Qin Lin pretended to be a good player a few times and finally got the skill.

Li Kai was the same. Because he had taken the blame for special soil several times, he had become very good at putting on an act. The next day, he prepared different nutrient solutions and began to water the seeds of the Heavenwood tree in different areas.

"Professor Li Kai's scientific research attitude is really admirable," chief Yan said when he saw him.

Qin Lin didn't pay any more attention to the condition of the heavenly wood Tonghui, because the aquarium was finally built.

Early in the morning, after he had delivered his things to the villa, he was called to the original Hall by Zhao Moyu.

The sign of the aquarium had been hung outside the original Hall, and the entire Hall had changed greatly. The interior was no longer as old as before. Not only had the area expanded a lot, but it was also a brand new Atlan-style construction structure.

There was a special glass isolation with a science-fiction effect, and different areas were divided to provide different ornamental fish activities.

After all, large, medium, and small ornamental fish all had different habits. Some big fish would even bite the small ones, so it was necessary to separate them.

at this time, the aquarium had already started to release water. the construction team could even be seen adding a special liquid into the water.

The person in charge of the construction explained to Qin Lin and Zhao Moyu, "president qin, president zhao, we've started the final waterproof test and disinfection stage. other than those who are staying behind to observe, the rest of us will be leaving."

" after the testing and disinfection stage is over, we will come back and renovate the landscape of the aquarium's interior, such as seaweed and strange stones. "

Qin Lin also knew that the fish couldn't be raised immediately after the aquarium was built, or they would die. In particular, some vinegar had to be added to the water to remove the alkali. Otherwise, the ornamental fish would rot in there.

The disinfection and alkali removal process would take about a week, and after that, the water would have to be changed twice before the ornamental fish could be cultivated normally.

The Aquarium's container was soon filled with water. The person in charge of the construction brought someone to check it and found that it was waterproof very well. After finding no leaks, he left the person in charge to monitor it and left with the others.

If there were any problems during this period, the people watching over them would inform them to come back in time to deal with it.

After Qin Lin returned to his office, he locked the door and entered the game.

Now that the aquarium was ready, he could bring out the ornamental fish he had saved in the game.

Soon, Qin Lin saw the number of ornamental fish in the pool.

After upgrading the fishing rod to level two, he could catch ornamental fish every day. There were a total of 1872 ornamental fish in the pool.

among them were golden pineapples, red cats, arhat fish, peacock fish, maryfish, tiger skin fish, and many other ornamental fish.

Although Qin Lin had never caught a quality 2 ornamental fish like the yellow white Tiger, these fish were all quality 1. They all had attributes of +1 in aesthetics, +1 in taste, and +1 in deliciousness.

Taste +1 and taste +1 were useless attributes to ornamental fish, so he didn't need to worry about them. The +1 in viewership would definitely make these ornamental fish more beautiful than ordinary fish outside.

When the aquarium could release fish, the number of ornamental fish would be at least 2000. 2000 ornamental fish swimming in the water with +1 attribute would surely be very beautiful.

He would have to make a trip to Ming city and find an opportunity to get the ornamental fish and transport them to the villa.

A week passed by quickly.

the aquarium's water resistance was up to standard within the week, and there were no problems at all. furthermore, a week was more than enough time to kill the virus and remove the alkali.

The construction workers also started changing the running water. After doing this twice, they could let some fish in to check the situation.

If the fish could survive, then they could start setting up aquatic plants and landscape stones. In the end, they could put in a large number of ornamental fish.

When Qin Lin returned to his office from the aquarium, Li Kai came to him in a hurry and said in surprise, "old brother qin, the special soil has shown its effects again."

"what's wrong, old brother li?" Although Qin Lin asked this, he had a rough idea of the reason. It must be the effect of the game's heavenly wood illumination.

After all, according to the time ratio, the heavenly wood Tongshi produced by the game would only grow for a month in the real world.

Around here, the growth of the game's Skywood tongshu should be very different from the ones at the Chinese Academy of Sciences.

Li Kai pulled Qin Lin out of the office. you'll know if you follow me to the experimental site. Some of the celestial wood tonghuang's genes have clearly mutated under the influence of special soil, and they grow very fast.

Chief Yan was also there when Qin Lin followed Li Kai to Linlin's laboratory.

"Boss Qin, professor Li's research seems to be working." As soon as chief Yan saw him, he exclaimed, "it's only been seven days, and the tenwood beetles have already grown so fast. As expected of professor Li Kai. I wonder if these fast-growing ones have increased my mental stress.

Qin Lin also looked at the plot of land where the celestial wood tonghuang was planted. Most of the celestial wood tonghuang had only grown a small handful of leaves, but some had already grown branches, and more than one branch had extended out.

[Chapter 535 Professor Li Kai Is Amazing! The Li Family's Old Man Arrives At The Mountain Villa](#)

In a week's time, chief Yan once again reported the latest experimental status.

Usually, when there was progress in such cultivation, specialists like them had to report it as soon as possible.

Chinese Academy of Sciences.

Professor Ren was calculating a set of experimental data with some people when Minister Lu came to him and said, "Professor Ren, this professor Li Kai is amazing. It's only been a week and he's already making some progress. He's much faster than the other two professors."

Professor Ren was surprised to hear Minister Lu's words, "It's only been a week, and there's already progress on professor Li's Tenmu Tongshi?"

Minister Lu handed a few photos to professor Ren and said, "these are the photos that Xiaoyan just sent over. Some of them are growing faster than the others.

Professor Ren took the photo and looked at it. Some of the ones that were planted at the same time were already much higher than the others.

With his experience and understanding of the heavenly wood Tongshi, it would probably take about a month to harvest at this rate of growth.

This kind of growth rate was truly too inconceivable.

"Are you sure these seeds were sent by the Chinese Academy of Sciences?" professor Ren asked in surprise.

Minister Lu explained, "I've asked little Yan. I'm sure it's the same batch. Little Yan was there when the seeds were sown. He even took out the seeds himself.

I've asked about the specific situation. It seems that professor Li Kai added other soil in different areas to control different degrees of moisture and breathability. He also specially prepared different nutrient solutions for irrigation every day. It should be a combination of reasons that triggered the genetic change.

this also shows that professor Li Kai's experiments are very effective. He really lives up to his reputation. Amazing. By the way, Xiaoyan also took some photos of professor Li Kai's experiments.

every time, professor Li Kai does it himself, trying to make the experiment perfect. He's sweating all over. We should promote his scientific research spirit.

As he spoke, Minister Lu handed some photos to professor Ren. The sweat on Li Kai's forehead and his clothes could be seen even when he was busy.

Professor Ren couldn't help but be moved when he saw this scene. professor Li Kai's scientific research spirit and rigorous scientific research should be learned by young people.

Obviously, the two of them didn't know that. That was just to keep the secret of the special soil from being exposed. In order to talk nonsense without being discovered, Li Kai could only do everything by himself.

However, people generally believed in things that they imagined the most.

Professor Ren couldn't help but say regretfully, "Al, Xiao Li is obviously so capable, but why didn't he show it in the past because of his father's position?" After spending so much time in the Research Institute in Ming city, he is still an Associate Professor. This should not be the case."

Minister Lu sighed and said, " yeah, scientific research shouldn't be involved in this kind of thing. I should raise this to the higher-ups, and professor Li Kai should also be promoted. It's a shame for him to only be an Associate Professor with his grades. He should just be promoted to the Chinese Academy of Sciences.

With that, he said with a hint of anticipation, " I just don't know if professor Li Kai's test subjects can make a breakthrough in the effect of mental stress value.

Professor Ren said, " with this growth rate, we'll know very soon. It's really effective. Then professor Jin and professor Huang's jaws will drop. This has really exceeded a level.

Li Kai, on the other hand, didn't know what the two were thinking. He was now distressed about how to fabricate experimental data and theses. After all, this was an experiment to help the Chinese Academy of Sciences.

Fortunately, there were results, and he could get a lot of data through reverse deduction. He just had to reverse the process and treat the result as a conjecture.

As for the loophole, he didn't have to explain it since the result was out. If he couldn't explain it, he would just be lucky.

Even so, fabricating data and theses required a lot of professional knowledge and academic logic, which was also very taxing on the brain and energy.

Li Kai had no choice but to shut himself up in the laboratory. He even extorted a bottle of Linlin medicinal wine from Qin Lin to protect himself, using the excuse that he had exhausted his energy.

Qin Lin was a little speechless. He didn't understand the relationship between serious energy consumption and yang boosting.

another week passed.

linlin villa's medical room.

tang xiuwan asked the doctor on duty about the situation. " "Did anything happen at the villa and the ranch today?"

"there was a patient who suddenly fainted today. he had low blood sugar." The doctor on duty explained with a smile.

"En!" Tang xiuwan also returned to her desk to check the latest news about the disease.

Although senior brother li had donated the adonasi grass roots, it would still take some time for the Sima medicine to hit the market.

Her daughter was still suffering from stroke, and she couldn't be at ease until she was cured.

Then, she thought of senior brother li.

Senior brother li hadn't spent the night at her place for a while, so she didn't know how long the experiment he mentioned would take.

Just as he was thinking about this, he suddenly saw an old man walking in while supporting an old woman.

ouch, " the old lady mumbled. it hurts. My shoulders are sore.

The doctor on duty immediately walked over to examine the old woman. "Auntie, what's wrong with you? I'll give you a check."

[Chapter 536 Professor Li Kai Is Amazing! The Li Family's Old Man Arrives At The Mountain Villa! 3](#)

The old woman suddenly said in disdain, " "Are there only male doctors? No female doctor? I'm not used to seeing a male doctor."

"Let me do it!" Tang xiuwan was the first to get up. Some patients were difficult to deal with, and some were even weird. She was used to it.

the doctor on duty also returned to his seat.

Auntie, " Tang xiuwan said to the old woman, " let me see where you're hurting.

"It's next to the pauldron. It seems like the periculus inflammation has acted up," the old woman immediately said.

Tang xiuwan immediately began to examine the old woman, but she didn't realize that the old woman and the old man were staring at her.

Moreover, his gaze was obviously a little strange.

Tang xiuwan checked the patient's body and had a rough idea of what was going on. aunty, it's really just scapular inflammation. Our treatment methods in the infirmary are limited. Come in with me. I'll get you a hot towel and then do some acupuncture to ease the pain.

"Alright, sorry to trouble you, doctor." The old lady said with a smile.

every doctor had to have some basic knowledge of acupuncture. tang xiuwan, on the other hand, had done more in-depth research, so her technique was quite good.

She was also very patient in dealing with the old woman. At the same time, she gently persuaded the old woman to relax and comforted her.

Old people would always worry about their health, and that worry would affect their mood.

She had been a doctor for a long time, so she knew the basic psychology of some patients very well.

after half an hour of acupuncture, the old woman's frozen shoulder was relieved.

"dr. tang, your acupuncture skills are really good." The old lady looked at Dr. Tang with adoration. " besides, you're so gentle. you'll definitely be a good wife. men are blessed to marry you. "

Tang xiuwan was a little embarrassed by the old lady's words. She had obviously gone off topic.

at that moment, li qing suddenly rushed in and said to tang xiuwan, " "little yan, my hand was scalded by the steam. help me apply some medicine."

Tang xiuwan was embarrassed to be called Xiao Yan by Li Qing, who was about the same age as her. However, Li Qing's relationship with her senior brother li made it sound reasonable for him to call her that.

However, just as Li Qing finished speaking, he looked at the old man and old woman and suddenly said in a dumbfounded manner, " "Grandpa, grandma, what are you doing here?"

The old man was the Li family's old master.

His youngest son and grandson had been staying at Linlin villa, and his youngest son had found a girlfriend here. Naturally, he wanted to come and take a look.

Achoo! Tang xiuwan looked at the old man and the old woman in shock.

Are they senior brother Li's parents?

She hurriedly and respectfully greeted the two of them, " "Uncle, Auntie, I'm sorry. I didn't know who you were and didn't treat you well."

The Li family's old man waved his hand. it's better to know a person's nature without knowing their identity. You're a good girl.

When the doctor heard Li Qing's words, he subconsciously raised his head and looked at the Li family's old man in surprise.

After all, everyone knew about professor Li Kai's background. They also knew that his father used to be a Big Shot. Even though he had retired, he was still a figure who could make the entire Ming city tremble with a stomp of his foot.

He had never thought that such a person would suddenly appear in the medical room.

this kind of person was too much pressure for ordinary people.

He simply took out a medical book to read and pretended to know nothing.

Old Madam Li also stepped forward and grabbed Tang xiuwan's hand. I'm relieved that my son has married you. You'll love me.

Tang xiuwan's face turned red like a little girl's.

She did not expect to meet the parents all of a sudden.

The old man of the Li family looked at Li Qing and said in frustration, "you little rascal. Your wife is pregnant and you're still staying here. Do you have any sense of responsibility as a husband?"

Li Qing was scolded and immediately said, "Grandpa, I'm helping Qin Lin make wine. Oh, I have a bottle of Linlin medicinal wine. I'll give it to Grandpa later."

When the old man heard this, his face immediately became warm and he said, "You're filial."

But the old man thought of something and asked, "But, don't tell me you're hiding something again?"

This made Li Qing's heart skip a beat. All the potions he had previously hidden had been taken away. This time, he had hidden two bottles. He couldn't afford to be careless and lose.

He hurriedly said with an extremely firm attitude, "Grandpa, I really only have one bottle. Little uncle should have one too. He's closer to Qin Lin than I am now, so Qin Lin must have given him a lot of wine."

Obviously, he was trying to divert the disaster to his uncle. It was better for him to die than his uncle. Recently, his uncle often left the villa at night and only returned to the villa with Dr. Tang the next day. It was time for him to control himself.

He was doing this for his uncle's good!

[Chapter 537 This Is My Dearest Uncle! 1](#)

When the Li family's old man heard Li Qing's words, he also asked, "Oh right, where's that bastard Li Kai? Where are you now?"

Li Qing saw that he had successfully diverted the old man's attention and couldn't help but sigh in relief. "Grandpa, I don't know what uncle has been up to recently. He's been acting all mysterious at Linlin's laboratory."

Tang xiuwan, who knew the inside story, quickly explained, "Brother Li told me that he's been assisting the Chinese Academy of Sciences in a National experiment, and there's a Commissioner coming over. He's been in the laboratory these days, I'll call him."

"Don't hit him, let him do his work in peace." Elder Tang quickly stopped Tang xiuwan.

Even if he wasn't in the field of scientific research, he knew the importance of National experiments and how much honor and benefits he could get from participating.

This time, the eldest son's position in the family was going to rise. Because of the younger son's contribution of donating the adonaxi plant root, the eldest son's evaluation in some aspects had also benefited.

If his youngest son could become an academician like Zhong Yuan, he would be so happy that he would wake up laughing.

Naturally, even if his youngest son's recent performance was a little amazing, he only dared to think about it.

As he thought about it, the old man looked at Li Qing and said, " "You're the only one who doesn't do proper work all day long. You don't walk the road arranged by your family, but insist on fiddling with wine."

Li Qing was suddenly speechless.

How did it end up like this?

Did grandfather mean that he and little uncle used to be the only ones who didn't do proper work, but now he was the only one?

In the future, he would be the only one who would often be hit by a hammer?

This is not fair.

Previously, when he was the only one who could get the Linlin medicinal wine from Qin Lin, he didn't have this attitude.

How did he burn the bridge after crossing it?

Old master Li didn't care what his grandson was thinking. He said angrily, " "Take me and your grandma around this villa."

What could Li Qing say? he could only lead the way in front of them.

Old Madam li grabbed Tang xiuwan's hand and said, " "Daughter, accompany me for a walk!"

"It's alright, Auntie!" Tang xiuwan was still a little nervous. After all, she was not prepared for this.

For an old man like the old man, the only things he could play in Linlin villa were the triangular plum blossom sea and the floating bridge viewing area.

Li Qing was also an old acquaintance in the villa, so he didn't have to line up to buy tickets or anything. He just showed his face to the waiter and led the old man and the other man into the triangular plum blossom sea through the internal passage.

"yi!" The old man had not walked for long into the triangular plum blossom sea when he was surprised. "This triangular sea of plum blossoms is truly beautiful."

He was indeed very surprised. After all, at his age, his heart was already as still as water. However, entering this sea of flowers, his heart could not help but fluctuate.

That attraction, that appreciation, and gorgeous beauty, as well as that feeling of comfort at a glance, really made him feel inconceivable.

Age did not affect the beauty, aesthetic appeal, attractiveness, and carefreeness of the game's products.

No matter how dead your heart was, you would still be affected by the system's attributes.

For example, if a woman's heart was hurt by a scumbag, under the influence of her happy mood, it would also become the happiness of breaking up.

The deeper he went, the higher the level of the 'happy mood' attribute, and the stronger this feeling would be.

This was the awesomeness of the system.

Therefore, as the old man went deeper into the sea of flowers, he found it more and more unbelievable. this sea of flowers is the most beautiful thing I've ever seen in my life. Before I came, I really didn't think that the video on the internet would be less shocking than watching it in person.

Li Qing was not surprised by the old man's reaction at all.

who wouldn't be like this when they first came to this triangular plum blossom sea?

Following that, he brought the old man to the viewing area of the floating bridges. Looking at the floating paddies all over the lake, the old man was still in shock. a simple reservoir has been built into such a beautiful scene. Even if I'm not familiar with the tourism industry, I know that this is not a simple matter. With the current number of tourists, you city should just provide for Linlin villa.

"They've already been worshipped," Li Qing said with a smile.

the old man nodded,"at least the people of you city have brains."

The viewing area of the floating bridge was bigger than the triangular plum blossom sea. At his age, the old man naturally did not have the energy to go around. Li Qing only took the old man to the entrance for a while, then took him to Linlin Ranch.

After entering the farm, the boundless green grass fragrance +2, open mood +2, relaxed and happy +2, and viewing ability +2 all shocked the old man again.

Li Qing also took into consideration the old man's physical strength, so he directly took the old man to a sightseeing bus.

Sitting on the sightseeing bus, the old man looked at the shocking grass that stretched to the end and couldn't help but ask, " "Li Qing, the internet is saying that it's because of this pasture that the entire Ranch has such beautiful scenery. Was this pasture really developed by your uncle?"

This was also the reason why he had come this time.

As a father, he was happy to see his youngest son's recent achievements, but he still knew what his son used to be like.

now that his youngest son was complimenting him one after another on the internet, he always felt a little guilty.

"grandpa, how can this be fake?" li qing explained. "The people of Linlin villa have seen little uncle studying it, but it's not like he didn't use any external help. Boss Qin found some very rare soil in his

hometown and gave it to little uncle for experiments. Moreover, it's been kept a secret from the outside world, so no one knows."

[Chapter 538 I Owe Him A Big Favor! This Is My Dear Little Uncle! 2](#)

from Li Qing's short words, the Li family's old man could confirm that the special soil had played a big or decisive role.

Otherwise, the difference in his youngest son's performance before and after was too great. It was impossible for him to hide his talents because of his position, as the internet said.

He knew very well that his youngest son had put in a lot of effort into the low-temperature genetic experiment, but there had been no results after so long.

"The Li family owes boss Qin a big favor again." The old man sighed with emotion.

If it was someone else, with this thing, they might not necessarily be worse than his youngest son.

It was obvious how big this favor was.

In this way, his youngest son could be considered to be closely connected to boss Qin.

However, after knowing the reason, he was relieved instead. He would not feel as guilty and unrealistic as before.

After taking a tour around the ranch in the sightseeing bus, Li Qing left the ranch with the old man.

"Grandpa, do you want to see Qin Lin?" Li Qing asked.

The Li family's old man shook his head. There's no need. I've already achieved my goal this time. It's not good to visit rashly at this stage.

"It's fine as long as you have a good relationship with your uncle and boss Qin. Your wife is pregnant, so don't stay here all the time. Go home and spend more time with your wife."

When Li Qing heard this, he immediately replied with a helpless expression, "I know. I'll go back once I'm done with this batch of wine,"

Now, it was just the relationship between little uncle and boss Qin.

His grandfather seemed to have forgotten that he had arrived at Linlin Manor first.

Now, little uncle was completely doted on.

The days of sharing weal and woe in the past were gone.

"Oh, and remember to give me all four bottles of Linlin medicinal wine," Grandpa Shen suddenly said.

Li Qing's heart was in pain. When he heard this, he almost subconsciously said, "Where are the four bottles? I only have three bottles."

"Alright, three bottles it is then!" The old man said with a smile.

Li Qing felt as if his soul had left his body. He repeatedly asked himself what had happened just now.

It seemed like the same thing had happened again. The wine that he had planned to keep for himself was gone.

"It's also a good thing you didn't take the path your family had arranged for you," the old man shook his head.

"Hehe." Li Qing felt like crying.

After stabbing his heart, he still added on?

when he saw the old man into the parking lot, li qing looked at the three bottles of medicinal wine in his hands and felt his heart bleeding. he couldn't help but say, " Grandpa, uncle has some Linlin medicinal wine too. It's rare for you to come here, so why don't you bring some back? "

He had been completely annihilated, but little uncle was completely fine. This was really unfair to him.

In the past, they had agreed to go through thick and thin together. Now, little uncle should also go through thick and thin together.

"i'm already so old, what do i need so much medicinal wine for?" the old man said unhappily. Your uncle is tired from his research and just got a girlfriend. Let him keep her for nourishment."

Li Qing felt that the world was too unfair.

They entered the parking lot.

A man alighted from a car and hurried to the old man to help carry the wine.

This was the personal chauffeur that the old man had arranged.

although he was retired, his position before retirement was sufficient, and these arrangements after retirement were also very in place.

Just as the old man was about to get into the car, another car stopped. Two familiar people who surprised Li Qing got out of the car. They were Liu Yi and the son-in-law of the Wei family, Feng Ren.

Liu Yi and Feng Ren also saw Li Qing and his group when they got out of the car. Naturally, they also recognized the Li family's old man.

The two of them were shocked.

The Li family's old master had actually come to Linlin villa in person. It seemed that the Li family and boss Qin's relationship was closer than he had imagined.

Feng Ren didn't dare to hesitate. He went up to them immediately."Greetings, old master Li. Young master Li, we meet again."

"Who is he?" The old man obviously didn't know Feng Ren, so he asked Li Qing.

"grandpa, he's wei qian's husband," li qing explained."wasn't old master wei also hospitalized for surgery before?" They've also come to boss Qin to ask for a portion of essence Qi wine."

Old master Wei nodded when he heard about the Wei family. He said, "It's enough for you to know about boss Qin's matters. Don't cause him any other trouble."

"Don't worry, old man!" Feng Ren knew what the Li family's old master meant. For example, if he told others about the essence Qi wine, they might come and beg boss Qin.

That might make boss Qin unhappy.

The Wei family was not stupid. His wife's father had also warned them to keep these things to themselves and not tell anyone.

Li family's old man didn't pay much attention to Feng Ren and left with his wife.

Li Qing looked at the car leaving and felt a little sad. As a person who loved wine, he couldn't keep the wine he had. How sad was that?

"Young master Li, what's wrong? He looks so listless." Feng Ren asked Li Qing, puzzled.

"What are you doing here again?" Li Qing asked, not wanting to answer.

feng ren explained, " my wife's grandfather has been discharged from the hospital. i'm here to thank him on behalf of the wei family. by the way, my cousin also has the emperor's supreme set meal and a bottle of linlin medicinal wine. these are good things. "

Li Qing's face fell when he heard the words 'Linlin medicinal wine'. He walked into the villa without saying a word.

Now, hearing these four words, his heart ached.

When Feng Ren and Liu Yi saw this scene, they looked at each other.

What was wrong with young master Li?

However, the two of them didn't have time to think about this. They still had to meet boss Qin.

"Try to be humble when you see boss Qin," Feng Ren reminded him.

[Chapter 539 I Owe Him A Big Favor! This Is My Dearest Uncle! 3](#)

"I understand, cousin." Liu Yi hurriedly nodded.

He was not a fool.

Even the Li family's old man had appeared in Linlin Manor, alright?

...

On the other side.

After returning to the villa, li qingyue realized that he should find a way to make up for his losses. After thinking for a while, he took out his phone and sent a video to his uncle.

The video was taken when she accompanied her grandfather to visit the villa. Dr. Tang was in the video, and he was with her grandmother.

He had originally planned to send the video to his little uncle.

Li Kai was not at Linlin's laboratory, but in an office in the building Linlin's laboratory had rented.

He was working on a set of thesis data, and at the same time, he was testing the genetic data of a celestial wood Tongshi on the instrument beside him.

this was all for the chinese academy of sciences.

In order not to expose the special soil, he had lost a lot of hair doing this.

When he heard his phone ring with a notification for a new message, he immediately opened it when he saw that it was from his nephew, Li Qing.

However, when he saw the video of Tang xiuwan and the old man together, he was so scared that he stood up immediately. His face was full of anxiety.

He wasn't prepared to bring xiuwan to meet his parents. Last time, he had borrowed Brother Qin's help to settle the matter between him and xiuwan. He was afraid that the old man would have a knot in his heart.

What was going on now?

Just as Li Kai was feeling nervous, Li Qing's call came in. He hurriedly answered, " "Li Qing, what's going on? Why is the old man and his wife with xiuwan?"

Li Qing's voice was heard. little uncle, I have some very unfortunate news for you. Grandpa and Grandma came to the mountain villa and even met with Dr. Tang. I'm here to inform you of an urgent matter.

"What's the matter?" Li Kai asked anxiously.

li qing's voice was heard again,"what do you think?" I'll give all my Linlin medicinal wine to the old man. He knows you have more. Where did you put it? I'll bring it to Grandpa for you. Don't keep it for yourself. You're not trying to make Grandpa angry at this time, are you?"

When Li Kai heard this, he immediately felt bitter.

he had finally managed to get three bottles from brother qin, so why did the old master ask him for them?

However, as Li Qing had said, the old man had already met xiuwan. He didn't want to make the old man angry about the wine. He still remembered that li qingzang had been found out for private use of the Linlin medicinal wine and had been criticized a lot.

Thinking of this, Li Kai hurriedly said, " Li Qing, tell the old man that I'm too busy to visit him. Go to my nuptial room and open a box containing experimental equipment. There are three bottles of Linlin medicinal wine in it. The password is 5487. Take two bottles to the old man and remember to save one for me. I really need this wine now.

linlin manor.

Li Qing immediately went to the nuptial area and entered Li Kai's nuptial chamber. As expected, he saw a special box.

The first thing he did was to key in the password and open the box.

There were indeed three bottles of Linlin medicinal wine.

He couldn't help but despise his uncle.

Previously, little uncle had been disdainful of this medicinal wine that strengthened yang and nourished the kidney, but now, "

Li Kai's voice came from the phone, " "Li Qing, remember to put in a good word for me in front of the old man. Don't screw me over at the critical moment."

Little uncle, don't worry. I'm your closest nephew. In the Li family, only the two of us have gone through thick and thin together. Why would I cheat you? " Li Qing said with a firm and affirmative tone, " I'll definitely not cheat you. I'll try my best to put in a good word for you to Dr. Tang. I guarantee that Grandpa and Grandma will be very satisfied with Dr. Tang.

He wasn't lying. His grandparents were indeed very satisfied with Dr. Tang.

When Li Kai heard Li Qing's promise, he said gratefully, " "Li Qing, you're still the one I can rely on at critical moments."

"Naturally!" Li Qing replied with a smile.

After hanging up the phone, he happily took the three bottles of Linlin medicinal wine from the box and held them in his arms.

However, looking at the empty box, he also remembered that his uncle really had a new girlfriend, Dr. Tang, at his old age. In the end, he found his conscience and put the bottle back.

Who asked the other party to be his closest uncle?

[Chapter 540 All Thanks To Boss Qin! Professor Li Kai Is Really Amazing! 1](#)

Time passed, and another two weeks went by.

After the opening of Linlin Ranch, you city had been tidied up and adjusted, and the traffic on the main road had finally begun to recover.

In the county.

Sun Xian once again found Chen Li and asked, after opening up a restricted road, there wasn't any more traffic, right? "

" it's barely maintained, " chen li explained. " but the construction of the new outer ring road has to be started as soon as you city is built. "

The restricted road opened was just outside you city, leading to Linlin villa. However, this would more or less affect the travel of you city's locals. There would always be some disadvantages.

yes, the county will arrange a meeting with you city Yijian, " said Wang Yao. sun xian also agreed with this.

It was normal for an international metropolis like Xia city to open such a restricted road due to traffic jams, but it was rare for a small county like you city to open such a restricted road.

However, there was no other way. Many tourists drove by themselves, and there were so many foreign vehicles coming in every day.

Because of the influx of tourists, the number of you city's car rental and online car booking also exploded.

As the Linlin Manor developed, you Cheng was affected more and more. Many times, you Cheng had to cooperate with the Linlin Manor to make changes.

However, the county was happy to see such a situation.

After all, Linlin villa could receive 12000 customers a day, which meant 4.4 million people a year.

Excluding the expenses in Linlin villa and ranches, if these people could throw 500 yuan in you city per person, that would be close to 2.2 billion a year.

this was equivalent to one-tenth of you city's GDP.

Was it difficult to make the tourists spend 500 yuan when they were traveling now?

Staying in a hotel, taking a taxi, casually buying some things, and finally eating, drinking, and having fun, they would arrive.

With this alone, you city could feed the people of an entire industrial chain, and there would be many more job opportunities and ways to make money.

Most importantly, this could attract the return of the local workers who had gone out, as well as the flow of foreign people and talents.

this was very important for a county that wanted to be promoted to a city.

If Linlin Manor built a good foundation for the human Flow, the small target of 2.2 billion could still be achieved in the county.

as long as they could build facilities and entertainment venues to serve tourists in the county, they would be able to let tourists have a place to play in you city.

"By the way, we have to keep a close eye on Linlin's watermelons." " next year, there will be a new round of candidates, " sun xian said to chen li. " this time, our you city must be on the list of candidates for the promotion of city. "

Chen Li nodded. I'll arrange for someone to keep an eye on the Linlin watermelons. There won't be any problems.

After the Linlin watermelons were planted this year, it was estimated that it would be equivalent to one-tenth of you city's GDP in the past.

This was another big industrial chain.

This industry chain and the tourism industry chain would be of great help to you Cheng's shortlist selection next year.

To be honest, he and sun Xian were both very emotional. Because of boss Qin, you city's GDP directly increased by 20%, and this did not include Linlin food company and Linlin villa itself.

Moreover, they were not sure when boss Qin would come up with something to raise the number again.

If you city could still mess up in this situation, it would be really embarrassing. Everyone could be given a hoe to farm.

...

Linlin Manor.

In the aquarium.

Qin Lin and Zhao mochen had already brought some people to observe some fish swimming through the glass.

There were a few other people following behind the two of them. They were all the aquarium staff that Zhao Moyu had recruited and appointed recently.

The aquarium had changed the running water twice recently, and today, they were starting to put in some fish to try to cultivate.

After three days, the fish would be fine, and they could continue to decorate the landscape with water grass and strange stones. Then, they could add running water and put the ornamental fish into the farm.

All in all, this was a very cumbersome process.

The person in charge of construction came out from inside and said, "Boss Qin, these fish will be fine after three days. We'll start the final arrangement."

"En!" Qin Lin nodded in response, then looked at a young female behind him and said, director Ling, I'll leave you in charge of the aquarium from now on. Just let me know when you need to place the ornamental fish. I've already ordered more than 2000 ornamental fish.

This curator was called Ling Xuan, and she was a professional that Zhao Mo Yin had poached from Xia city through headhunting. When the other party came, he had also brought two professional managers.

Ordinary employees could be transferred from the mountain villa and recruited from you city, but for a project like the aquarium, the person in charge and the manager had to be professional.

"okay, boss!" Ling Xuan immediately nodded in response.

She used to be a senior vice Director of an aquarium in Xia city. Under normal circumstances, even if she jumped ship, it was impossible for her to go to a company in a small county. However, Linlin villa was obviously an exception.

After Qin Lin and Zhao Moyu finished with the Aquarium's Affairs, he drove directly to Linlin's laboratory. He had more important things to deal with today.

It had been more than 20 days since he had planted the wood-connecting sky Poria. The seeds produced by the game were growing rapidly, and they would probably be fully ripe and harvested in a few days.

this was a shocking amount of time.

But now, some of the seeds planted with the celestial wood tongshu could barely be tested for their mental stress value.

Li Kai, chief Yan, professor Ren, and Minister Lu were all eager to know the results.

Today, old brother li was going to do a preliminary test on the stats of the celestial BodyShield.
