

The Game 591

Chapter 591

But just as the doctor heaved a sigh of relief, Qin Lin had already entered the car and called Chen Li.

"President Qin, what's the matter?" Chen Li's voice came from the other side of the phone.

Qin Lin went straight to the point. "Chen Xian, the pharmacy at no. 65, 75 road is selling fake herbs. nowadays, there are so many tourists coming to your city every day. there will always be some tourists who will buy herbs. if the fake herbs are sold and spread on the internet, our your city's reputation will be ruined."

That's right, he was making a backhanded report. He directly called Chen Li, the Deputy County chief, and the other party would have a way to deal with it.

Don't blame him for the pharmacy. Since he saw it, he couldn't pretend he didn't see it.

Because of his grandfather's and father's previous illness, he clearly knew how painful and worried it was to be a family member of a sick person.

How desperate would it be if they bought fake medicine and even delayed the treatment of their loved ones when they were sick?

anyway, he just wasn't happy.

On the other side, Chen Li was stunned when he received the call.

He didn't expect boss Qin to suddenly report a pharmacy.

From his position, he thought more. Boss Qin's identity couldn't possibly be at odds with a pharmacy. Did a tourist really buy fake medicine from the pharmacy?

Boss Qin had said that if the tourists spread it online, it would be a big scandal. So, was it true that some tourists wanted to spread it but boss Qin stopped them? was that why Boss Qin had this phone number?

He knew very well that the tourism industry had been integrated into your city's blood. If such a fake medicine incident happened, it would have a huge impact on your city.

Linlin villa might be fine, but when the time came, their your city would definitely be criticized for being a burden to Linlin villa.

Chen Li did not dare to hesitate and immediately reported Qin Lin's report to Sun Xian.

Sun Xian was furious. He immediately called for people to make arrangements.

A main County and a Deputy County wanted to reorganize a pharmacy, so there was no doubt about the result.

After Qin Lin called Chen Li, he didn't care about the matter anymore. He went to buy some tools for pounding and making medicinal liquid.

After returning to the villa, Qin Lin immediately took the tools and found a place to start making the type 03 Constitution-increasing liquid.

This process was very cumbersome, and the key was that the preparation process and proportion were very troublesome.

If assembly lines were to be used in the future, the conversion process would be even more troublesome.

After spending a lot of time, Qin Lin managed to produce the first batch of Type 03 body-strengthening potion.

Chinese medicine was bitter and unpleasant, but the smell of the liquid medicine was not as bad as he had imagined. Instead, it had a strange medicinal fragrance.

It wasn't smelly, but it didn't smell good either.

After Qin Lin finished making the potion, he brought it to his office and locked the door. He then brought the potion into the game.

A moment later, Qin Lin saw the 'believe' remark of the type 03 body-strengthening potion:

[Type 03 body-strengthening potion: Grade 1 (mysterious)]

[this is a special potion that increases one's Constitution. As long as you reach a certain limit of training every day and continue training for a period of time, you will have a special effect: Constitution +1, Constitution limit +1! (There is no effect after reaching a certain level of Constitution)]

This was a Grade 1 medicinal liquid, and it had very simple remarks and only two attributes.

however, these two attributes surprised qin lin.

One's physique could be improved when they trained. Moreover, long-term training could also improve one's physique. One's body would be stronger and their soul would be better.

Therefore, athletes and soldiers who trained regularly were definitely stronger than ordinary people.

Needless to say, the +1 Constitution attribute would naturally have a better effect when he trained.

Naturally, this would have a huge auxiliary effect on training.

The other thing was to increase the upper limit of his Constitution by +1.

This attribute was interesting.

The effect of training was limited, and so was the increase in Constitution.

For example, running.

Most people couldn't become runners no matter how hard they trained, and even athletes were divided into different levels.

some of them could only reach the provincial sports standard no matter how hard they trained.

Some of them could meet the National Sports standards.

However, most of them couldn't get into the Olympic Games no matter how much they trained.

This was the limit of his Constitution.

Naturally, the upper limit of each person's physique was different.

In our country, Su Bingtian was the best athlete in the 100m sprint, but he had never won a medal in the 100m race.

This was the effect of the upper limit of his Constitution.

No matter how much he trained, his upper limit was still there.

Qin Lin didn't know how powerful the +1 physique limit was, but if Su Bingtian had it, he would be even stronger than him. He would be able to win a medal or even a gold medal among the black athletes.

Thinking of this, Qin Lin was a little eager to try. He didn't know if he had taken two fruits of the tree of strength.

After all, there was another note in the note that there would no longer be any restrictions on the effects once the physique reached a certain level.

He decisively drank the type 03 body strengthening medicinal liquid.

This medicinal liquid would only be effective after enough time to train to the limit, so he began to train after drinking the medicinal liquid.

He would do push-ups at an extremely fast speed.

This is the limit, right?

He almost exhausted himself before stopping. Worried that he did not have enough time, he continued to train after a short rest. He only stopped after a few times.

Chapter 592

However, after a day, he did not feel any increase in his Constitution.

Naturally, training was not something that could be done in a day.

Therefore, he slipped away on the second day, the third day, and the next few days, he continued to make medicinal liquid and drink it, then carried out extreme training.

Unfortunately, as the days passed, he did not feel any effect at all.

In other words, this medicinal liquid had no effect on his Constitution.

So, for the next few days, he asked Chen Dabai to hire a few security guards and let them drink some medicine every day to do extreme training.

Almost every security guard made them train to their limits for two hours, and they were on the verge of death.

Isn't this long enough?

However, after another week, the security guards still felt that there was no effect. It was no different from not drinking the drug and having normal training.

Could it be that the training time was not enough, and it would take half a month to a month to see the results?

He felt that something was wrong. He didn't understand the remark clearly, so he called Li Kai over.

"Old Brother Qin, is this the medicinal liquid that Jin Daming made with the secret formula he exchanged last time?" Li Kai subconsciously made a guess when he saw the liquid Qin Lin took out.

Qin Lin didn't want to push the blame to brother Li, so he didn't bother to explain. "Old brother Li, I need you to help me test the data of this liquid and see if there's anything special about it."

Using scientific methods to test it might help him understand the remarks of this medicinal liquid better.

Li Kai naturally wouldn't refuse Qin Lin's request. He immediately left with the medicinal liquid and began to test it.

He tested the data of this Type 03 body-increasing liquid in the shortest time possible, then brought the data to Qin Lin with a face full of disbelief and said, " "Old Brother Qin, maybe that Jin Daming isn't a scammer. There are two special substances in the medicinal liquid that you have concocted."

these two substances can be used on the human cells. One of them is effective for assisting in training, while the other can even strengthen the cells and increase the upper limit of a person's physical fitness.

although there's a limit to this enhancement, if the effects are fully displayed, the effect will definitely make my physique much stronger than before.

Qin Lin nodded when he heard this.

This was similar to the information in the remarks.

However, he remembered that the training of the security guards had not been effective, so he asked again, " "But there should be a limit to this thing, right?"

Li Kai nodded and explained, " there are indeed restrictions. In fact, the restrictions are very large. These two substances can only work when the cells are in an extremely active and tired state.

this restriction is very strange. I don't understand it. According to my calculations, other than the rest time, you need to exercise intensely for at least five hours for these two substances to be effective. Moreover, you can't take too long breaks in between.

Qin Lin finally understood why the security guards had no effect after two hours of extreme training.

How could something from the system be so limited? it would only take effect after five hours of extreme training.

in other words, 5 hours of extreme training was the basic condition. after these 5 hours, if he continued to train, the type 03 body enhancement potion's constitution +1 effect and constitution upper limit +1 attribute effect would take effect.

However, it was basically ineffective against ordinary people.

This was because no ordinary person would be able to do extreme training for five hours a day.

Even if they knew the effects of this potion, 99.99% of ordinary people would not be able to do it.

This meant that the type 03 drug was only effective for national athletes and soldiers, except for the men's football team.

Only national athletes and soldiers would do extreme exercises for more than five hours a day.

the market for this item was obviously very small, but it was even more awesome to a certain extent!

Chapter 593

The limitations of the body-increasing medicinal liquid also meant that there was no way to promote it on a large scale.

This caused Qin Lin to temporarily put aside the body-enhancing medicinal liquid. After Li Kai left, he took out the incomplete secret recipe that Jin Daming had used to exchange for the Linlin medicinal wine.

The system noted that this secret recipe seemed to have a special effect. You can find Dr. Dott and try to fix it.

He had never tried it before, but now he could see Doctor Dott's ability.

Qin Lin locked the office door from the inside and entered the game with a thought. He put the incomplete secret recipe into his backpack and then logged out of the game again. He controlled the game character to take the incomplete secret recipe to find Doctor Dott.

He clicked on doctor Dott, and this time, a special option appeared.

[analyzing and repairing the incomplete recipe!]

Qin Lin directly clicked on this option, and a box and a prompt appeared in the game:

[please put in the secret recipe that you need to analyze and repair!]

qin lin immediately placed the incomplete recipe that jin daming had exchanged for in the box, then clicked confirm.

[Dr. Dott is analyzing the secret recipe and repairing it. Please wait patiently.]

A moment later, doctor Dott's prompt appeared again.

[the recipe has been fixed. This is a good recipe for medicinal cuisine. It's just that the recipe is too mysterious and difficult to understand, so I wrote a simple and easy to understand one!]

[you've received a secret recipe for a medicinal cuisine personally written by Dr. Dott!]

Qin Lin looked at his character's backpack again. Sure enough, he saw a new prescription, no longer the thick paper that he used to have.

He didn't expect that the incomplete formula that Jin Daming used to exchange the medicinal wine was actually a medicinal cuisine secret recipe ...

He just didn't know what effect this medicinal cuisine secret recipe had.

qin lin immediately entered the game and saw the remarks of the herbal dish recipe:

[special herbal cuisine cooking recipe: Grade 1]

[this is a special medicinal cuisine recipe. After using it, you can obtain a cooking skill. Then, you can mix it with other ingredients to make a special medicinal soup. [special taste +1, special taste +1, special medicinal fragrance +1, health and body strengthening +1, energy recovery +1, blood and Qi replenishing +1, immunity +1!]

"This is good!"

Qin Lin saw the remarks of the secret recipe and immediately felt that the two bottles of Linlin medicinal wine were worth it.

This was a secret recipe for making a herbal soup. Furthermore, it had surprisingly many attributes.

He finally knew why those Traditional Chinese Medicine aristocratic families had switched to making herbal cuisines and all of them had made a lot of money.

These families of Traditional Chinese Medicine inheritance were really rich.

However, where there was profit, there would naturally be decline. It didn't seem strange for someone like Jin Daming, who had an incomplete prescription, to exchange for wine with an incomplete prescription.

Perhaps Jin Daming's family was really a family with a Traditional Chinese Medicine heritage.

The key was that this medicinal cuisine was somewhat out of his expectations. It actually had the attribute of 'special taste +1', 'special taste +1', and even 'medicinal fragrance +1'.

In terms of sensory attributes, this was one more attribute than the deliciousness and texture +1 of the fish cooking and egg-fried rice.

Therefore, it seemed that the saying that medicinal cuisines were delicious was not a lie. It was true. Naturally, if the method was wrong, it would be difficult to make delicious medicinal cuisines because the smell of medicinal herbs was pungent and unpleasant.

The key point was that the medicinal cuisine also had the attribute effect of health care, body strengthening, essence recovery, blood and Qi replenishing, and immunity increasing by one.

This was definitely useful for people with weak bodies, insufficient blood and Qi, and poor mental state.

Moreover, once the manor villa was ready, even though a quality 2 item was good, a Supreme meal would cost at least 60000 Yuan. Not everyone could afford to eat the emperor's Supreme meal for every meal.

Then wouldn't it cost more than five million a month?

That was not realistic. The most expensive sanatorium in the world was only 370000 pounds, which was more than 3 million.

However, the hospital was a super nursing home that was built for tens of billions of Yuan.

The key was that he had already created the Supreme Emperor set meal's awesomeness. He couldn't lower the price and supply the Supreme Emperor set meal every meal, and then lose the awesomeness he had created previously.

Therefore, even if this Grade 2 item was to be supplied to the manor villa in the future, there would be a limited supply. It would need to be replaced with regular items.

Now, this secret herbal dish seemed to be the best choice. It could be used as the daily supply of the manor villa.

The key was that this was only the effect of the soup. If it was combined with the ingredients, it would only be an additional effect.

This also made him think of something, and that was the medicinal cuisine recipe + game ingredients.

For example, the quality 2 fish produced by the game already had so many attributes. With fish cooking skills and the medicinal cuisine recipe, the additional attributes would be even more amazing.

Moreover, the quality of 2 fish + fish cooking was already deliciousness +3 and texture +3.

With this special taste +1, special taste +1, and special medicinal fragrance +1, it should be even better to the senses.

[do you want to use the secret recipe of medicinal cuisine?]

after dr. dott wrote a copy of the recipe that jin da ming had exchanged for him, the recipe became systematic.

This seemed a little awesome. There should be a lot of incomplete ancient Chinese medicine formulas in the real world, right?

Then, Qin Lin decisively chose to use it.

After a while, the information about the cooking skills of this herbal dish was all printed in his mind, especially the information about the Chinese medicine and its properties:

Folded ear, Poria Cocos, Red Sage herb, Astragalus monoshineas

After the medicinal cuisine was made, a wide variety of ingredients could be prepared. In other words, the restrictions on the ingredients were very small. As long as they could be used to make soup, it would be fine.

Chapter 594

In other words, it could really be made into medicinal fish.

After receiving the information about the secret recipe, Qin Lin was eager to try it out. He planned to make a quality 2 wild fish medicinal dish with fish cooking.

As he thought about it, he left the office immediately and planned to go to you city to buy the medicinal herbs for making the herbal dish.

As soon as he left the office, he saw a familiar face entering the office area. It was Chen shengfei.

Chen shengfei smiled and greeted him. Qin Lin, I came at the wrong time. Are you going out? "

Qin Lin smiled and said, " old Chen, you came at the right time. I was planning to make a medicated fish today. Now, I'm going to you city to buy medicinal herbs. So, you're in luck.

Chen shengfei's eyes lit up. then I've picked the right day to go out today. Qin Lin, I'll go with you and be your driver.

"Old Chen, why did you come all of a sudden today without informing us?" Qin Lin asked with a smile.

Chen shengfei explained, " it just so happens that I'm settling a big contract. I'm taking the opportunity to relax for a day. I still have to go back tomorrow. So, I'm craving your food and wine.

The two chatted as they left the villa and drove to you city.

When they passed by the pharmacy, Qin Lin saw that it had been sealed.

Chen Xian and the others seemed to be very decisive in their decision.

There was more than one pharmacy in you city. Qin Lin asked Chen shengfei to drive to another pharmacy. After buying a batch of herbs he needed, he returned to the villa and handed the herbs to Master Lin for him to help deal with.

.....

The sky turned dark.

Qin Lin then went to the management restaurant with Chen shengfei and Li Kai behind him.

When Li Kai heard that Qin Lin was going to cook again, he immediately put down his experiment and rushed over.

The experiment was important, but Brother Qin's cooking was even more important.

Qin Lin asked Chen shengfei and Li Kai to sit down and wait while he entered the kitchen.

quality 2 ingredients. he would take some out and store it in the kitchen's refrigerator storage room once in a while. when he needed to use it, he could just take it out directly.

Master Lin had already been busy with the chefs. When he saw Qin Lin come in, he immediately said, "Boss, the herbs you bought have been packed in jars and placed over there."

"En!" Qin Lin nodded.

He bought quite a lot of herbs in the first batch. After all, he couldn't go out and buy herbs again every time he wanted to make herbal dishes.

He would buy more for future use.

Qin Lin went to the jars that contained the herbs and started to work on them.

The chefs in the kitchen also subconsciously looked at the boss.

All the chefs working in the villa knew that the boss's cooking skills were superb. Even the world's top 10 Michelin three star masters were completely subdued by his cooking.

Therefore, it was hard not to pay attention to the boss when he was cooking.

Qin Lin took out a certain amount of the required medicinal herbs according to the proportion and then began to boil the medicinal herbs into a soup.

This medicinal cuisine's Secret recipe didn't require the medicinal herbs and ingredients to be placed together at the beginning to boil into a soup. One had to wait until the medicinal herbs were almost ready before adding the ingredients to be cooked.

However, before that, Qin Lin first fried the quality 2 wild fish meat with fish cooking skills to make it reach a certain ripeness. Then, he boiled it with medicinal soup to make it better into the taste.

And this process could increase the deliciousness and texture of the fish by one attribute to the quality 2 fish meat.

The deliciousness and texture of the fish meat had already reached the level of a quality 3. Then, he would use the fish meat to make medicinal cuisines.

The smell of Chinese medicine was strong and pungent, but the smell of Chinese medicine could be neutralized just like the medicinal properties. In some medicinal cuisines, the medicinal materials could even be neutralized with the ingredients, which could even make the strong pungent smell become mild and even become a medicinal fragrance.

This was what the recipe for the herbal dish could do.

Therefore, after the fish was cooked for a while, a medicinal fragrance wafted in the air. When the medicinal cuisine was almost done cooking, the medicinal fragrance became even stronger.

This made the chefs cast sidelong glances again.

"Boss, are you going to make a herbal dish?" Master Lin walked over curiously.

"En!" Qin Lin nodded. He felt that it was time. He opened the pot, and the smell of fish and medicine wafted out.

The smell made Master Lin, who was standing at the side, swallow his saliva.

Qin Lin picked up the chopsticks, picked up a piece of fish, and put it in his mouth. His eyes lit up immediately.

The original 3 grade,+3 deliciousness, and +3 taste was already very good. Now, with the addition of special deliciousness, special taste, and special medicinal fragrance, it was like adding flowers to the enjoyment of the taste, going to another level.

The key point was not only the taste, but also the healing effect of the herbal fish. It added +1 to health care,+1 to energy recovery,+1 to blood and Qi replenishment, and +1 to immunity! .

If big yellow croaker was used to make the medicinal fish ...

Who else could it be?

You can't find such an excellent product in the world.

Not to mention 30 catties of quality 2 wild yellow croaker, which cost 500000 Yuan each, even if it was 1 million Yuan, there would definitely be rich people fighting to buy it.

Master Lin couldn't help but pick up a piece of fish with his chopsticks and put it in his mouth. He was surprised when he ate it. "Boss, if you make this fish into a medicinal dish, it'll be even more delicious than before."

As a chef, his ability to distinguish good food was very high. He had eaten the fish cooked by the boss before, and it was already the best.

Chapter 595

Who knew that the boss could use this fish to make even more delicious medicinal fish?

Other than the boss, there shouldn't be any other chef who could make such a delicious herbal dish, right?

Looking at the fish in the pot, he swallowed his saliva again. Although he still wanted to eat, he put down his chopsticks. After all, the boss had to treat people well when cooking, so he couldn't be rash.

It was a pity that his ability was limited and he couldn't make such a delicious medicinal fish. Otherwise, he would be in for a treat.

"Help me take this medicinal fish out. I'll make another serving of rice with fish and egg." Qin Lin packed the fish in the pot and gave an order to the apprentice chef who was waiting for the dishes to be served. Then, he went to the refrigerator and took out some quality 2 eels.

In the management restaurant.

Chen shengfei and Li Kai sat at the table and couldn't wait any longer. When Qin Lin was cooking, they were always very eager.

That kind of delicacy could not be found anywhere else.

Moreover, they had never tried Qin Lin's herbal dish before.

Zhao Moyu and Lin Fen had also arrived. They had heard that Qin Lin was going to make a herbal dish and were looking forward to it. After all, they had never seen Qin Lin make a herbal dish before.

This guy could always surprise them from time to time.

The apprentice quickly brought the fish out and placed it on the table respectfully.

because it was a medicinal cuisine that had just been cooked, there was immediately a medicinal fragrance.

Chen shengfei was a little surprised. what a strong medicinal smell. Furthermore, it smells very good.

He had once eaten the herbal dishes made by a family with a Traditional Chinese Medicine inheritance. One meal cost at least 100000 Yuan. The herbal dishes made by them had a very good medicinal fragrance.

He had tried the Traditional Chinese Medicine cuisine outside the Traditional Chinese Medicine family, but he had never smelled this kind of medicinal fragrance. Some of the dishes were even a little pungent.

Not to mention the effect, the taste alone was a hundred and eight thousand miles different.

Now, Qin Lin's herbal fish could also smell this medicinal fragrance. It was amazing.

"Mr. Chen, professor li, try this fish first." As the female host, Zhao moyin also entertained the two.

Chen shengfei and Li Kai were definitely not polite when it came to food. They immediately got a bowl of fish and started eating.

As soon as it entered their mouths, their eyes lit up.

Both of them had eaten Qin Lin's fish banquet before and knew how delicious it was.

Now that this fish was made into medicinal fish, its taste was even better than the fish banquet.

It was too extreme.

They had a feeling that other than Qin Lin, no other chef in the world could make such delicious food.

"I've gained a new understanding of Brother Qin's cooking skills," said Li Kai with a sigh.

Chen shengfei nodded in agreement.

Zhao Moyu and Lin Fen were naturally very happy to hear the two of them praising Qin Lin. Moreover, they also found that Qin Lin's medicinal fish was really delicious.

If he ate too quickly, he would definitely bite his tongue.

When Qin Lin came out of the kitchen after cooking the egg-fried rice and the medicinal fish, he was shocked to find that the pot of medicinal fish had almost been finished.

Chen shengfei and Li Kai held their stomachs and hiccuped. They had no choice. To foodies, the medicinal fish was really irresistible.

When they saw Qin Lin coming out with the egg-fried rice and the herbal dish, eel, the two of them felt bitter.

What if I overate?

he still wanted to eat the eel.

Therefore, she could only force herself to continue eating and burping.

Qin Lin laughed when he saw the two of them.

This also showed how attractive the medicinal cuisine was.

...

The next day.

Qin Lin made another herbal dish. This time, he used the meat of a 2 quality beauty duck. Of course, the duck meat was not da Bai, Er Bai, or San Bai from the villa he killed.

In the game, he took a quality 2 beauty duck to find a butcher to kill. After killing it, he could get the processed meat.

Although the cooked duck didn't have the deliciousness and texture of a Grade 3 duck, it had special deliciousness +1, special texture +1, and special medicinal fragrance +1.

This herbal dish duck was also a top-grade dish.

Chen shengfei and Li Kai couldn't stop eating this medicinal Duck Meal.

Qin Lin also ate a lot.

When the manor villa was ready, this secret recipe would be a super signboard.

However, after the meal, the villa welcomed a special guest, and that was director Yan.

Qin Lin's office.

Director Yan immediately handed him a document. "Boss Qin, I'm here to deliver a special order to you."

Qin Lin took the document and looked at it. He was surprised. "The national team's daily drink order? Didn't our Linlin leisure tea get punished by the organizing committee and can't enter the competition?"

Director Hao smiled. boss Qin, they have the final say on the field, but we have the final say off the field. This Linlin leisure tea can be of great help even in daily training.

Qin Lin agreed with him and understood what director Yan meant.

Then, he thought of something.

That was the body-increasing medicinal liquid.

This thing was only effective for national athletes and soldiers who did extreme sports for more than five hours on a daily basis. Now that chief physician Hao happened to be here, he had an idea.

[Chapter 596 Is This Just A Chinese Medicine Formula? Dr. Cadolte's BUG?](#)

The national team's order was a special order that needed special treatment. It would be supplied at a lower price than the normal factory price.

this kind of order was not about making money. the order itself had a special meaning and a special kind of publicity.

Qin Lin immediately called Deng Guang over and handed him the order form that chief physician Hao had brought.

However, he wasn't in the mood to pay attention to the order for the Linlin leisure tea.

after deng guang left with the documents, he said to chief physician hao,"director hao, you're in charge of managing the athletes. there's something that linlin's laboratory would like to discuss with you."

Director Yan was a little surprised and asked,"Boss Qin, please."

it's like this, director Hao, " Qin Lin explained. we have a very special liquid medicine now. Professor Li Kai's side has detected two special substances in this liquid medicine.

one of these two substances can allow a person to take effect on their cells after five hours of extreme exercise. Training will have a very strong effect on improving the physique. If you take it for a long time, you can even break through the physical limit in this state.

" ? ? ? "When director Yan heard Qin Lin's words, he was stunned for a moment. Then, he couldn't help but be surprised. He asked,"Boss Qin, is this really the case?"

he was clearly in disbelief.

If there was such a medicine, he thought about what it would mean if the athletes on the national team could break through the physical limit.

Was there really such a medicinal liquid?

It was too sci-fi.

It wasn't that various countries hadn't conducted research in this area, but it was obvious that no country had such an achievement. It was even difficult for various countries to make a breakthrough in a drug that targeted sub-health.

Therefore, there was no need to mention this kind of medicine that could break the body's limit.

now, boss qin had actually said that linlin's laboratory had such a drug. how could they not be surprised?

Qin Lin explained, " director Hao, of course I wouldn't joke about this. However, this is only professor Li Kai's guess after testing it. He hasn't tested it out yet. After all, it's not possible for ordinary people to undergo five hours of extreme training for a long time.

Department Director Hao immediately understood what Qin Lin meant. Whether professor Li Kai's guess was true or not, he would need to rely on the athletes of the national team to confirm it.

Only the national team's athletes would do extreme exercises for more than five hours a day.

However, this was not a small matter. He did not dare to make a decision in private, so he could only say, " "boss qin, can you give me a copy of professor li kai's test report and the liquid you mentioned? I need to take a copy back."

"Naturally," Qin Lin nodded and brought Li Kai's previous test report and a portion of the medicinal liquid he had concocted before handing them to director Hao.

After director Yan got the items, he left Linlin villa with them as quickly as he could.

He didn't expect that boss Qin would know about this amazing medicinal liquid when he came to place an order.

...

Director Yan soon returned to Beijing and found one of his department heads.

When the Minister received the report, he was also shocked. He immediately ordered, "director nie, hurry to the Chinese Academy of Sciences and test this liquid. I'll call their Minister Lu.

...

Chinese Academy of Sciences.

Minister Lu was holding a meeting with professor Ren and some researchers. After professor Li Kai from Linlin laboratory helped cultivate the giant centipede, the Chinese Academy of Sciences had made a big breakthrough in the U31i drug for treating sub-healthy diseases.

They were having a meeting to discuss the next step of the U31i experiment plan.

Suddenly, Minister Lu received a call. He looked at the number and saw that it was from another Minister. He answered the call immediately.

When he heard the news, he stood up in shock. "Minister Zhao, is what you said true? Alright, alright, your people come over, I'll immediately get someone to conduct the test."

After hanging up the phone, Minister Lu was no longer in the mood for a meeting. He directly said to professor Ren, "professor Ren, take two researchers from your group who are good at cell and physique research with me. The rest of you can continue the discussion.

Professor Ren was in charge of life and health Research, and there were people in his group who were good at cell and physique research. The life and health Research topics in his group were also largely related to cellular pathological changes.

The most direct example would be the research on cancer cells.

Professor Ren called two team members over. He looked at Minister Lu's anxious face and asked, "Minister Lu, what's the matter?"

"the national team went to linlin villa," minister lu explained. "they might have brought back something good from boss qin."

"What good stuff?" Professor Ren asked in a hurry.

It was possible that professor Li Kai had come up with something good.

After all, this was not the first time professor Li Kai had made something good.

Minister Lu explained, " it's a special medicinal liquid. It seems to contain two special substances that can affect cells after five hours of extreme training. One of the special substances may even increase the upper limit of a person's physique after long-term training. In other words, it can break through the physical limit.

"Is there really such a thing?" Professor Ren's eyes were filled with disbelief.

he knew very well how difficult it was to break through the limit of one's physique. if it was easy, it wouldn't have been so difficult to research the sub-health u31i drug.

[Chapter 597 Is This Only A Chinese Medicine Formula? Dr. Cadolte's BUG?](#)

Minister Lu nodded. that's what Minister Zhao said. If it's true, then the liquid is not only effective on the national team's athletes. It should be effective in the Army, especially the top-tier Special Forces!

Professor Ren immediately understood what he meant, and his expression became serious.

To a certain extent, this was beyond the era.

soon after, department director yan came to them in a hurry.

When he saw Minister Lu, he immediately handed over the documents in his hand and the medicinal liquid he had brought back, " "Minister Lu, this is it."

After taking the liquid and the data, Minister Lu handed Li Kai's test data to professor Ren and said, " "let's take a look,"

Professor Ren took the documents and read them. His eyes lit up. just by looking at the data, professor Li Kai used his own cells to simulate five hours of extreme exercise, and then tested it with the substances extracted from the liquid. If his calculation is correct, the effect of this special substance may be true.

"Let's go, we'll immediately go and test it again." Minister Lu said decisively.

It wasn't that he didn't trust professor Li Kai, but because of the rigorous scientific approach, no matter who made the report, they had to re-test it.

Professor Ren nodded and brought two team members to the laboratory to test the liquid.

in order to extract the cells for a simulation experiment that limited the training state to five hours, professor ren also extracted the cells from himself and two of his team members for testing.

professor ren and the others finished the test of the body-increasing medicinal liquid almost at the fastest speed.

When they personally came to a conclusion, they could no longer maintain the joy on their faces.

Professor Ren said to Minister Lu with excitement, " professor Li Kai's test has confirmed that the two substances do have this effect.

"But we're just extracting cells to simulate that state. We need someone to verify it. We'll have to go to Linlin's laboratory and take a few athletes with us."

this special substance is effective, " Minister Lu asked. does the medicine have any side effects? "

we didn't find any substances that are harmful or harmful to the human body, " professor Ren explained. however, when we get to Linlin's laboratory, I will re-test it with professor Li Kai a few times before giving it to the athletes. We will only carry out the experiment after we are sure.

"En!" minister lu nodded. now that he was sure that these two substances were useful, he had to test the medicine no matter what because it had great significance.

...

The next day.

Linlin Manor.

Qin Lin's figure suddenly appeared in the empty office.

He had just entered the game and put down some things.

He immediately sat down in his office chair and focused his attention on the game in his mind.

Just as he was about to control his character to leave the farm, he received a call from his brother, Li Kai.

He pressed the answer button and heard old brother Li's voice, Brother Qin, Linlin's laboratory has received news that Minister Lu and professor Ren have brought people here again. They'll be here soon. It's about the medicinal liquid.

Qin Lin guessed that after director Hao brought back the body-strengthening potion and the treatment, the higher-ups would definitely send someone. He didn't expect it to be Minister Lu, and it was faster than he had expected.

Qin Lin also temporarily withdrew his attention from the game and left the office.

when he arrived at the parking lot, he saw that old brother Li was already waiting for him.

"Brother Qin, it seems like the higher-ups value this medicinal liquid very much," Li Kai said when he saw Qin Lin.

Qin Lin nodded.

This was expected.

not long after, two cars arrived. minister lu and professor ren got off one of the cars.

This time, they had come in such a hurry that they didn't even inform you city.

Professor Ren had also brought some assistants with him. He wanted to do his best to help Linlin's laboratory with the experiments.

Department Director Yan was there as well.

He had been following Minister Lu with a few strong young men. They were the rising stars of the National athletes who had been specially brought here. They were also young men with great potential.

Under normal circumstances, they would have a chance to win a medal in an international event after training.

If there were no accidents, according to professor Ren, these post-production talents would be the most promising competitors for gold medals in various events.

"Minister Lu, professor Ren, director Yan." Qin Lin and Li Kai greeted the three of them.

"Boss Qin, we meet again."

Minister Lu and professor Ren also greeted Qin Lin.

Minister Lu looked at Li Kai and couldn't help but sigh, " professor Li Kai, you're really amazing. You've managed to come up with this medicinal liquid in such a short time. If this experiment is successful, it will be of great significance.

Li Kai didn't dare to claim credit for this and immediately explained, " this medicinal liquid has nothing to do with me. This is a formula for Chinese medicine. I'm a wastrel from a Traditional Chinese Medicine family.

it might be because of the loss of medical skills and the decline of the family. The other party brought a family formula to Brother Qin and exchanged it for two bottles of medicinal wine. Brother Qin then concocted it according to the formula.

at first, old Brother Qin thought that it wouldn't have any effect. After testing it, I found two special substances.

"Whoosh!" Minister Lu!

Wanwan. professor Ren.

" ran ran. " director yan.

whoosh whoosh ", the researchers.

Li Kai's words stunned Minister Lu and the others. They had always thought that the liquid medicine was made by professor Li Kai and had been praising him on the way.

[Chapter 598 Is This Only A Chinese Medicine Formula? Dr. Cadolte's BUG?](#)

Now, the other party said that this medicinal liquid was concocted by a wastrel from a Traditional Chinese Medicine family in exchange for the formula of the medicinal wine. Even the other party and boss Qin thought that this medicinal liquid had no effect. It was only after professor Li Kai had tested it that he found an abnormality. If there had been no confirmation from the test, this might not have happened.

This was unbelievable.

"Professor Li Kai, is what you said true?" Minister Lu asked again to confirm.

that's true, " Li Kai nodded. I think we might have underestimated Chinese medicine.

Minister Lu suddenly felt like he was being ridiculed after getting the confirmation.

In other words, this medicinal liquid was indeed concocted by a long-existing Chinese medicine formula?

A research on breaking through the physique that had been difficult to solve despite spending countless research funds could be solved with a Chinese medicine formula?

However, they seemed to have given up on Chinese medicine.

Minister Lu and professor Ren looked at each other and seemed to understand each other's meaning.

In other words, they might have given up a treasure.

after all, who would have thought that a chinese medicine formula would have such an effect?

This was probably what it meant to have something in one's own home, but not know about it, and still spend money for nothing.

Minister Lu decided that he would report this matter as soon as possible when he returned. If a Chinese medicine formula had such a magical effect, could there be other formulas?

Qin Lin and Li Kai received Minister Lu and his team. This time, they brought the athletes here to test the effects of the body-increasing liquid.

Therefore, after Qin Lin received Minister Lu, he handed everything over to Li Kai. He didn't know much about the experiment, so he let old brother li and his men do it in Linlin's laboratory.

According to the note, it would take a long time for the national team members to break through the physical limit.

After going to the Linlin laboratory with Minister Lu and the others, Qin Lin returned to Linlin villa and went straight to his office. Then, he looked at the game on the light screen in his mind.

He still had things to do.

Qin Lin controlled his game character and left the farm. He went to doctor Dott again, clicked on the button, and selected [the secret recipe for analyzing and repairing the damaged parts].

Then, he put in the box with the incomplete formula and a prompt:

[please put in the secret recipe that you need to analyze and repair!]

Qin Lin took control of his character and put an incomplete formula into the box. Then, he clicked "confirm."

There were actually nine more of these recipes in his game character's backpack.

This was what he had brought into the game before.

[Dr. Dott is analyzing the secret recipe and repairing it. Please wait patiently.]

A moment later, doctor Dott's prompt appeared again.

[I'm really sorry, but your incomplete formula doesn't have much value. It's the most common cold medicine formula on the market!]

Obviously, even if a prescription that was available on the market or well-known was missing a few medicinal herbs on purpose, doctor Dott would still be able to analyze and repair the original formula.

That would be meaningless.

"This doctor Dott is really something." Qin Lin saw the notification and smiled.

These incomplete formulas were naturally something that he had deliberately created. The formulas he had obtained were incomplete because he had intentionally added fewer medicinal ingredients.

He felt that Dr. Dott's ability to analyze and repair the prescription was a bit of a waste.

the formula for the cold medicine was naturally made up.

The other nine were Chinese medicine recipes that he had found on the internet.

qin lin controlled the game character to put the second recipe in.

[I'm really sorry, but your incomplete formula is of no value.]

"Ran ran." Qin Lin frowned.

The second formula was not just for show. It was a Chinese medicine formula that he had found online. Furthermore, each of these formulas cost him 200 yuan.

However, Dr. Dott didn't seem to buy it.

He didn't believe it and immediately clicked on the third formula!

[I'm really sorry, but your incomplete formula is of no value.]

The fourth card!

[I'm really sorry, but your incomplete formula is of no value.]

eight cards in a row.

[i'm really sorry, but your incomplete formula is of no value.]

“++!”Qin Lin couldn't help but swear.

What the hell, was there still integrity in this world?

They were all fake. Eight recipes meant that he had been cheated of 1600 Yuan.

Did the other party have any moral bottom line?

The key point was that he suddenly realized that even if all nine were fake, it would only cost 1800 Yuan.

It seemed like no case would be filed if it was less than 2000 Yuan.

He finally understood why the other party said that there were only nine formulas.

the other party was being very dependable and not greedy at all!

"Hehe." Qin Lin was too tired to complain. He could only put the last recipe in the box and click "confirm."

At first, he thought that all nine pictures were fake, but this time, the conversation prompt that appeared on doctor Dott was different.

[the recipe has been fixed. This is a rather valuable herbal recipe. I've written a new one for you and analyzed the effects!]

[congratulations, you have received a copy of Dr. Dott's analysis and repair, as well as a handwritten Chinese medicine formula.]

The sudden notification stunned Qin Lin for a moment, and then his face revealed a happy expression.

It seemed that he had misunderstood the other party.

There was true love in this world. How could he simply misunderstand others as liars?

Qin Lin didn't hesitate. He locked the office door and entered the game with a thought. He saw the remarks on the new formula.

However, when he saw the remarks, his face revealed a strange expression.

laxative drink: quality 1 "

[this is a special prescription that can make a special tea: Cure constipation +1, cure bloody stool +1, cure weak stool +1, cure sticky stool +1, cure rough stool +1!]

this kasaya

Medicine was actually a type of beverage, but Qin Lin had never thought that he would be able to create a medicine that was against sh * t by using his BUG on doctor Dott.

[Chapter 599 Another Chinese Medicine Formula? This Effect Is Really Strong?](#)

Although this was a medicinal drink that was specially made for feces, it seemed to be very awesome.

After all, the problem of a person suffering from diarrhea was more serious than hemorrhoids.

If it was said that nine out of ten men had hemorrhoids and ten out of ten women had hemorrhoids, it would be a bit of an exaggeration. However, if this probability was placed in the case of feces, it was definitely not an exaggeration.

and the laxative's attributes were definitely a problem that everyone would have more or less.

In other words, this would be another very popular medicinal drink.

Even if it wasn't as explosive as Linlin leisure tea, it could also be regarded as another main drink of Linlin food company.

Most importantly, the potion also had A +1 constipation healing attribute.

Although it wasn't as effective as the grade 2 wild honey medicine in treating constipation +2, the combination of the relieving-of-bowels medicine and Linlin leisure tea could cure constipation and restore stamina. It seemed like it was possible to replace the grade 2 wild honey.

the seeds planted in linlin's laboratory, which were planted in special soil, had more genetic mutations, and a few more quality 1 vegetables.

by then, these vegetables would not be promoted and would be specially supplied to the manor. he could also be laid off as a porter. in the future, he would only have to send some quality 2 things to the manor villa from time to time.

Qin Lin entered the game immediately and chose to use the secret recipe of the laxative drink, obtaining all the information about the laxative drink.

The prescription for the convenient drink didn't require many herbs, only a dozen types, but there were a few herbs that you city's pharmacy couldn't get.

It wasn't that the herbs were rare or difficult to grow, it was just that the herbs were a little outdated. After all, not many people usually bought Chinese medicine for feces.

Although everyone had this problem, most of them took Western medicine. They wouldn't specifically pick Chinese medicine to stew, as it was a waste of time.

Some people even had these problems, but they could only bear with it and rely on their own bodies to recuperate. They would be fine after a few days.

He couldn't just go to the hospital after getting hot from eating barbecue and having hot feces, right?

If that was a waste of time and money, it would be better to drink more water and eat lighter so that his body could adjust and recover on its own.

Therefore, this was also the market for laxatives.

He was too lazy to go to the hospital, but he could still go downstairs to buy a drink.

It was a little uncomfortable to rely on his own body to adjust, and it would also affect his future food.

Qin Lin had to order from the pharmacy since he didn't have enough herbs.

fortunately, the medicine was commonly used and could be delivered in three days.

He ordered some herbs from a pharmacy and went back to his office in the villa immediately. Then, he turned on his computer and logged into a forum.

he searched for an ID called 'the remaining gold' on the forum.

This nickname was weird at first glance, and he even suspected that the other party had typed the 'Jin' word wrong.

He had bought the 9 incomplete formulas from the other party.

the other party was an honest person. one of the nine recipes was a good laxative drink.

He naturally wanted to ask if the other party had any more of such formulas.

He clicked on the 'send' button and sent a message to the other party:

"Hello, are you there? The 9 formulas from before are very useful. Do you have any other formulas?"
on the other side.

A bespectacled, slightly chubby man was playing games in a small rental room. It was obvious that the chubby man had serious myopia. Even though he was wearing glasses, his head was still very close to the computer.

Moreover, judging from his body shape, he should also be an otaku who often stayed at home. However, he was in a very good mood. After all, he had just rushed to 1800 in the game, and his game character's combat power had greatly improved.

It was always a happy thing to meet a fool on a forum and pick up so much money for nothing.

It seemed that there were still many fools in this world.

As he was playing the game, he received a private message on the forum.

He immediately opened it and saw that it was a message from that fool who wanted to buy the formula from him.

He couldn't help but laugh when he saw the message. The other party actually said that his nine formulas were effective and wanted to buy them from him?

That formula of his was clearly from another place, alright?

The other party was treating him like an idiot.

She must have known that he had cheated her of 1800 Yuan and was unwilling to give up, so she wanted to fish for him.

He couldn't file a case for 1800 Yuan for nine formulas, but he could file a case for 2000 Yuan for another one. He wasn't that stupid.

"I'm sorry, there's nothing else." He directly replied.

This meant that he was clearly telling the other party not to think of himself as a fool and that he had cheated him of 1800 Yuan.

After replying, he started playing the game again.

Qin Lin received the reply from the 'last gold' and sighed slightly.

It seemed that this useful formula was not always available. It was understandable.

Therefore, he decided to search for it on the internet. There were many incomplete formulas on various forums and posted on the internet.

Perhaps there would be some unexpected gains.

So, for the next three days, he spent all his time on the internet until the pharmacy called and told him that the medicine he ordered had arrived.

After receiving the call, he immediately went to the pharmacy and brought the medicine he had ordered to Linlin villa.

Although the laxative drink didn't require a lot of medicinal herbs, the proportion of the ingredients was a little complicated.

But it wasn't a big deal.

With the information and muscle memory that the system had imprinted into his mind, the configuration was very easy no matter how complicated the proportion was.

He also took out the medicinal herbs he had bought before. It didn't take long for him to make a bottle of laxative drink.

After that, he called Chen dabeí over.

"Boss, what's your order?" Chen dabeí asked as soon as he arrived.

[Chapter 600 Another Chinese Medicine Formula? This Effect Is Really Strong?](#)

Qin Lin pointed to the bottle of pooping medicine and said, "Take this bottle of medicine to Linlin's laboratory for testing!" He ordered.

Although the laxative drink was only a medicinal drink, it was also related to medicine. If he wanted to test the medicine, he would need a medicinal drink with no problems and a test report of the medicinal effects.

Chen dabeí immediately drove to Linlin's laboratory.

Outsiders could no longer enter the Linlin laboratory, even if Chen dabeí was the security Manager of Linlin villa.

When he arrived at the laboratory, he was also examined. Yun Fei called Qin Lin to confirm before he was let in. Then, he was brought to the laboratory.

In the laboratory.

Professor Ren, Minister Lu, and director qu were all there. They were usually very busy and it was impossible for them to leave their posts and stay in a small county for so long.

However, the situation was different now. After the matter of the medicinal liquid was reported, there was only one sentence: He had to confirm the effects of the medicinal liquid as soon as possible and leave the rest to the others.

From this, one could see the significance of this medicinal liquid.

At the side.

Li Kai and Shen Li, who were in charge of the laboratory, were also there.

Naturally, Deng Guang, the person-in-charge of Linlin food company, was also there.

the liquid was bought by chairman qin personally. although it was being tested in linlin's laboratory, the product would still be produced by linlin food company in the end.

The main reason was that they could use this opportunity to give Linlin food company a brand of medicine production. Otherwise, ordinary companies would not be qualified to produce medicine.

So, as long as the medicine was effective, Linlin food company would immediately apply for a brand. Minister Lu would definitely help them. After all, if the medicine was really effective, the higher-ups would definitely place an order. By then, Linlin food company's status would be slightly different.

After Qin Lin discovered the BUG in Dr. Dott, he was naturally interested in the brand of the medicine. This was also the reason why Deng Guang was here.

Otherwise, Linlin food company might not even have the qualifications to produce laxative drinks.

Deng Guang did not know anything about experiments, but he still had to keep an eye on what he should, even if it was just for show.

At the side.

A few athletes were running on the treadmills at an extremely fast speed.

Professor Ren, Li Kai, and the others had tested the liquid several times and confirmed that it had no harmful substances to the human body. They could let the athletes take a small amount first to determine the effect of the liquid and the cells.

After making sure that there were no problems, he gradually increased the dosage.

They didn't have a system like Qin Lin, which could directly confirm that there was no problem with the medicinal liquid. This process was more troublesome.

Moreover, the medicine would only take effect after five hours of extreme exercise, so it would be up to the athletes to work hard.

The laboratory had already discussed with the county to borrow the stadium. In these two days, they could go to the official Indoor Stadium of you city to test it out.

After all, this experiment was not something that could be done in a short period of time. It would take a long time to break through the upper limit of his physique with the help of this medicinal liquid.

It was also at this moment.

Yun Fei walked in with Chen dabei and said to Shen Li, " President Shen, President Qin asked manager Chen to bring a portion of the liquid medicine over. He asked you to arrange for someone to test the ingredients.

These words naturally attracted everyone's attention. Professor Ren, Minister Lu, and the others were now a little sensitive to the word medicinal liquid.

"Boss Qin, what medicinal liquid did you make this time?" Minister Lu immediately asked.

li kai had a guess and explained, " the prescription that Jin Daming changed was a bit mysterious, and I don't understand many of it. Also, there are a lot of medicinal materials, and it seems like there's more than one prescription. Maybe Brother Qin has researched and formulated another medicinal liquid. He doesn't know the effects, so he can only come and test it.

"I'll do the testing!" professor ren immediately agreed.

Now that he had confirmed that the medicinal liquid that could increase one's Constitution and break through the limit of one's Constitution was effective, who knew if this medicinal liquid would bring him another surprise?

Seeing this, Shen Li nodded. Originally, he could have just found an ordinary researcher to do the test. Professor Ren wanted to do free labor, so he had no reason to refuse. Otherwise, he would be regarded as not giving face.

Professor Ren did not hesitate. He took the medicinal liquid from Chen dabei and started to test it.

The substance contained in the laxative medicinal liquid was obviously not difficult to detect, and it was not as complicated as the body-increasing medicinal liquid, so the results were determined at the fastest speed.

"This medicinal liquid is truly extraordinary." Professor Ren said in surprise when he got the test results.

"This medicinal liquid is good stuff again?" Minister Lu was immediately interested.

Professor Ren explained, " it's not what we expected. However, boss Qin is going to make a fortune again. Through the test, this medicinal effect should be effective for constipation, dry blood in the stool, weak stool, sticky stool, and rough stool. Moreover, the effect is not weak. It can also be made into a medicinal drink.

These words stunned the people around them.

This was a medicine that specifically targeted feces?

Deng Guang's eyes lit up when he heard this. Although Linlin food company now had two heavyweight products, tomato sauce and Linlin leisure tea, the variety of products was limited.

Wasn't this a new product?

After hearing what professor Ren said, he knew how big the market would be.

"Professor Ren, can you help me come up with a test report?" he hurriedly asked professor Ren.

"Naturally." Professor Ren nodded.

boss qin had sent this thing here for testing because he wanted to know the effects of the medicine.

Since he had taken charge of everything, he would definitely have to give the other party a copy of the test report.

After professor Ren typed out the test report, Deng Guang left with Chen dabei. He wanted to tell Chairman Qin the good news.

moreover, with professor ren's report, they could immediately launch this product after they applied for the brand of medicine production. by then, it would be popular in the market again.

"Professor Ren, this Chinese medicine seems to be really magical." As Minister Lu spoke, his palm inadvertently took the remaining medicinal liquid and didn't put it down.

when professor ren and the others turned their attention to the athletes again, he sneaked out to a place where no one was around and drank the liquid in one go.

Although it had a medicinal smell, it was not bad.

The pressure he was under was too great. In the long run, not only would it dry up, but it would also become thick and weak.

it was very uncomfortable every time he went to the toilet.

After drinking the liquid of bowel control, Minister Lu took out his phone and dialed a number. He had already confirmed the results of the liquid of bowel control, and he had to report the situation to his superiors.

More than two hours had passed since the report.

After listening to his report, the higher-ups solemnly asked him to keep an eye on this matter.

he didn't dare to hesitate and immediately went to find professor ren to make arrangements. however, as he was making arrangements, his expression didn't look right. he walked out in a hurry and went straight to the toilet.

the first thing he did when he reached the toilet was run into a cubicle.

" achoo, ochoo! " minister lu's carefree voice was heard.

after a while, he walked out of the cubicle feeling refreshed.

It was just as professor Ren had said. The laxative effect was too strong. It was much stronger than those Tongluo and aloe vera capsules.

At the same time, his expression was grave.

In such a short time, he had learned of two such magical Chinese medicine formulas. If the wastrel of a Traditional Chinese Medicine family had not used these formulas to exchange for wine with boss Qin, and if professor Li Kai had not coincidentally tested them and let them know about them, these two formulas might have been lost.

Perhaps he should really suggest to the higher-ups to pay more attention to the cultivation of Chinese medicine. Just this medicine that could break through the body already explained the problem.

With this formula, wouldn't there be other formulas in the 5000 years of history of their great country?

Even if he could find out more of the laxative medicinal liquid's formula, it would still be of great significance.

Minister Lu was a man of his word. He immediately went to the temporary office that the laboratory had arranged for him to write a proposal.

.....
