

The Game 601

[Chapter 601 The Manor Villa Is About To Be Built! 1](#)

After receiving professor Ren's test report, Deng Guang followed Chen dabei back to Linlin Manor to tell his boss the good news about the medicinal liquid.

He naturally thought that Qin Lin didn't know the effects of this medicinal liquid and was waiting for the test results.

Therefore, as soon as he saw Qin Lin, he said excitedly, " Mr. Qin, good news. The liquid that you asked manager Chen to send for testing has an unexpected effect.

Qin Lin naturally knew the effects of the medicinal liquid, but he still put on an act and asked, " "What's the effect?"

Deng Guang immediately handed professor Ren's test report to Qin Lin. Chairman Qin, professor Ren has tested that this liquid can treat symptoms such as constipation, dry blood in the stool, weak stool, sticky stool, and rough stool.

everyone has these symptoms. Take me for example. I have to drink and socialize at work, so my feces are sticky. I don't usually waste time going to the hospital for this illness. Professor Ren said that this liquid can be made into a medicinal drink. If there is such an effective drink, I definitely wouldn't mind buying it. This is a huge market.

Qin Lin nodded and ordered, " "Since that's the case, Linlin food company should also make the early preparations."

"Don't worry, Chairman Qin." deng guang promised hurriedly.

after deng guang and chen dabei left, qin lin went to a printer in the office and started to print out pieces of paper.

these were the recipes he had found on the internet.

There were hundreds of them.

He had gotten a laxative drink through the BUG that was Dr. Dott, so he naturally had the idea of exploiting it to see if he could get other secret recipes.

After he had printed the recipes, he brought a thought into the game and placed it in the item bar.

After logging out of the game again, he controlled his game character to head over to doctor Dott's place to analyze and repair the incomplete formula.

He placed the first formula into the box.

He clicked confirm!

A moment later, Dr. Dott came up with an analysis.

[I'm sorry, your recipe is of no value at all.]

this was clearly a bad start.

He then began to place the second formula into the frame.

[this is just a useless recipe. Someone must be joking with you, Yingluo.]

...

[sorry, ran ran]

...

[sorry, ran ran]

...

The reality seemed to be cruel.

Qin Lin had found more than 100 formulas. He thought that there would be something good in them, but after clicking on doctor Dott's analysis and repair, he found that none of them were useful. They were either fake, useless, or worthless.

One had to know that he had even copied some of these formulas from the private pages of some Traditional Chinese Medicine experts.

these were all chinese medicine experts, but none of them had any f * cking effect?

did the police know that these chinese medicine experts were so powerful?

So, how could Chinese medicine not decline?

The industry was already under suspicion, and now it was being suppressed by Western medicine. The internet was filled with these fake and useless prescriptions, as well as some scammers who used the name of Chinese medicine.

Qin Lin remembered that one of the nine formulas sold by the 'leftover gold' was useful. He really had a conscience.

He couldn't help but go to the forum again and send a private message to the 'remaining gold':

I'm really sincere in buying the recipe. If there are more recipes, I'm willing to buy them at a high price!

On the other side.

The bespectacled chubby man saw Qin Lin's message again.

this made him sigh. " this f * cking fool is not willing to give up. he didn't succeed in fishing before, and now he's trying to tempt me with benefits. "

He had been on the internet for so long, was he a fool?

If it wasn't 2000 Yuan, it would be useless even if the other party cursed his father or his mother. Once it exceeded 2000 Yuan, the police would come to check the water meter.

"get lost!" Seeing that the other party was pestering him, he directly sent a word.

In the office.

Qin Lin looked at the word "get lost" in shock.

Was the other party crazy, bad-tempered, and had a problem with his brain?

he didn't even want this business?

Qin Lin could only sigh in the end.

it seemed that doctor dott's BUG was not that easy to fix. he could only think of a way later.

...

The next day.

Qin Lin got up early in the morning and spent some time with Zhao Moyu. Then, he went to the warehouse to move the things in the game out and transported them to the villa.

For the time being, he still had to continue working as a Porter.

He had just sent the things to the villa and reached the office when sun Ming, who was you Chengyi's son, came to visit.

Qin Lin smiled as soon as he saw the other party. Mr. Sun, you're here so early in the morning. Do you have good news for me? "

Sun Ming smiled and said, " I don't dare to disturb you without good news. The final renovation of the manor villa has begun. I want to invite you to see if you're satisfied with it. If there's any renovation that needs to be improved, we can cooperate.

He didn't slack off at all when it came to the manor and villa. He came to find Qin Lin as soon as the renovation began.

This was what sun Xian had personally ordered.

the county people knew that boss qin's manor villa was open to high-end guests. these people were probably rich and powerful like chen shengfei and ma levin.

The county was still counting on boss Qin to attract people. At this level, as long as they were interested in you city's investment environment, the county would make a lot of money.

When Qin Lin heard Sun Ming's news, his face also revealed a happy expression.

the manor was the only project that you chengyi had entrusted to build.

Now that the manor villa was being renovated, he naturally had to go and take a look.

Linlin villa and Linlin Ranch were already very famous in terms of popularity and the number of ordinary tourists they received. Because of the system's additional attributes, their popularity on the internet could be said to be unparalleled by any scenic spot in the country.

[Chapter 602 He Told Me To Get Lost! The Manor Villa Is About To Be Built! 2](#)

Therefore, if this Manor villa was high-end, it would be a good upgrade in terms of grade and style.

In fact, the manor villa could have been completed much faster, but on the basis of the original 20 acres, the entire Manor villa had been expanded with facilities such as a swimming pool, a healing sports field, a fishing pool, an outdoor hot spring, and so on.

There was even a small patch of forest next to the sanatorium that had been cordoned off as a private garden for strolls.

After all, they had contracted another 5000 mu of land, and most of the land was still empty. Whether it was to entertain high-end customers or for their own enjoyment, there was no reason not to make it more luxurious.

Therefore, the land that the villa and the manor had circled in had far exceeded the original 20 mu and was now close to 40 mu!

How big was the manor villa that was close to 40 mu?

Qin Lin rarely came to the manor because of the construction. He only had a rough view of the villa before. Now that the main body was built, he came back to take a look. It was very spectacular at first glance.

Just the main three-story villa looked like a Castle.

The courtyard, parking lot, garden, outdoor hot spring, and recovery field around the main body of the villa were also very vast.

The garden alone was the size of a small park. However, at this time, the entire Manor villa seemed bare except for the hard decoration.

the so-called "hard decoration" referred to the walls, ceramic tiles, doors and windows of the villa itself, as well as the flower beds, stone roads, swimming pools, basketball courts, and so on outside.

you cheng yi jian was in charge of the hard decorations, and it still had a simple retro style.

They were the ones who chose the style, and you city one key was pretty good overall.

As for the soft decorations, they would be the flowers in the flower beds, the trees to be planted in the isolation belt, the ornamental flowers and trees to be planted in the garden, and the grass for the sports field.

Naturally, he planned to make such things himself.

For example, he planned to plant a Duke king rose in each of the four flower beds. This was why he had kept four Duke king rose seeds.

Presumably, the high-end customers who came to the manor villa would not mind admiring and discussing the Star-Spangled national flower. After all, they could not go to the White Palace, nor could they see the Duke's Rose.

in addition to the duke's roses, qin lin also planned to plant some flowers in the game and transplant them onto this flower bed.

Although the seeds in the seed shop in ore town did not have a special type of flower with a label, the ones planted in the game were all of a quality 1. If one was lucky, there was a chance of getting a quality 2.

The sea of flowers was too big to grow, but it wasn't difficult to get these four flower beds to fill up with quality 2 game flowers. It would probably be very good when the time came.

It was the same for the flower beds and green Circles in the isolation belt.

The flower beds and green Circles were specially used to separate the manor villa from Linlin villa and Linlin Ranch.

the parterre was packed together, just like a triangular plum blossom sea, making it impossible for people to cross. with the addition of a green circle to block the line of sight, tourists could not see inside.

However, for the people in the manor, it was a unique landscape.

The flowerbed and the green circle were also planted from the game and transplanted. The flowerbed would be fine as long as it was a quality 1 outer ring, but the green circle could be a quality 2 ring. At that time, he could see which kind of green trees looked better.

the next step was the garden. first, he would get a grade 3 triangular plum, then three grade 2 triangular plum for protection. then, he would plant all kinds of precious flowers from the game. similarly, he would wait for a grade 2 one if he was lucky.

After leveling up to Level 4, there were many types of plants to choose from.

Every time, he would only check if there was anything he needed or if there were any high-quality special seeds with A. He didn't check anything else.

This time, he had to check it carefully.

in addition, he planned to plant quality 2 dogtooth grass in the sports ground.

He was sure that once all of this was done, the environment of the manor would definitely be the best in the world.

"Boss Qin, do you want to take a look inside the villa?" Sun Ming also extended an invitation to Qin Lin.

qin lin nodded and followed sun ming into the interior of the main villa.

the first floor was a large hall with a dining room, kitchen, lounge, recovery room, activity room, and other facilities.

Naturally, there was also an office on the first floor.

In the future, his office would be moved to the manor villa.

The second and third floors were the living quarters. Each room was super large. Not only did they have bedrooms, but they also had their own bathroom, bathroom, lounge, studio, and other facilities.

However, there was an area on the third floor that he didn't plan to open to the public. It was separated from the entire villa area and had a special passage to go up.

This was what he kept for himself, other than for his own residence or to entertain his friends.

the other areas were used to receive high-end guests.

The interior decoration style was still simple and retro. He didn't make it too complicated. However, it was only in the final stage. The overall style would only be known after the completion.

"Where is the entrance to the underground part? Also, take me to the wine cellar." qin lin asked the question he was most concerned about.

More and more wine was being taken out of the game from the temporarily renovated wine cellar in the office area of Linlin villa.

In the game storage room, he brought in more and more wine of all ages. If he didn't get a wine cellar to store wine, he was afraid that the game storage room would be filled with wine if he continued.

In the beginning, Sun Ming had designed this Manor villa to have a lot of space. There were many functional areas, including a tea room.

In the future, the high-end guests that the manor would receive would definitely like to make tea. Naturally, this tea room did not need him to provide tea leaves.

In the future, the high-end guests that his Manor villa would receive would be of a very high level. Those who liked to make tea would definitely bring their own tea leaves. It was normal for their tea leaves to cost tens of thousands or even hundreds of thousands per catty.

what he needed to do was to provide better tea tables. later, when he encountered high-quality wood such as rosewood in the game, he would make some tea tables and place them in the tea room.

when the time came, he would make some antiques porcelain, the kind that didn't have a mark, put it in the game for a while, and take it out. it wouldn't take too long, just half an antique level would do.

this set was the best set for those who loved to make tea. it was very stylish.

Other than that, there were other functional areas such as the music and recording hall.

The most important thing was naturally the wine cellar.

He had heard Li Qing talk about his private wine cellar.

If he could fill it up with wine, his wine cellar could be ranked in the top 20 in the country in terms of size.

Naturally, if his wine cellar claimed to be second in quality, no one in the country would dare to claim to be first.

Qin Lin and sun Ming entered the wine cellar area. The space was very large, and the ventilation facilities and auxiliary wine storage facilities were also very complete.

The next thing he had to do was to move the wine racks that he had prepared in the game here one by one, and then put the wine on them until the entire wine cellar was completely filled.

"Boss Qin, what do you think? Is there anything that needs to be changed?" Sun Ming brought Qin Lin around the villa and asked.

yes, they're all good. There's nothing that needs to be changed. Qin Lin was very satisfied with the overall appearance, but he still needed to find a third-party inspection company to check if there were any problems.

Although he had worked with you Cheng Yijian for so long without any problems and he was also very confident in Sun Ming, he still had to check it.

alright, I'll tell them to hurry up and finish the renovation as soon as possible. Sun Ming and Qin Lin chatted for a while. After Qin Lin left, Sun Ming went back to give instructions to the workers in charge of the project.

After Qin Lin left the manor, he went straight to the warehouse. He controlled the game character and bought a quality 2 dog's tooth grass seed that was enough to grow the manor's sports field. Then, he entered the game and took out the dog's tooth grass seed and some special soil.

This quality 2 dog tooth grass seed would grow to be the same as the one in the ranch, so he still had to hide it.

After all, everyone now thought that the pasture of the ranch was made of this special soil, but this time, only a little of the special soil was taken.

Without the spring water of the earth, the green Dogtooth would grow even slower. It could be said that the special soil was not used much.

After bringing the special soil and the quality 2 dog's tooth grass seeds to the villa, he called Yu Shui over and asked him to plant the dog's tooth grass seeds on the sports field, then water them with the special soil.

The decorations of the flowers and plants would also have to rely on the water from the plantation Department.

Moreover, he could now start to decorate the manor.

Chapter 603

Linlin Manor.

early in the morning, qin lin moved the things from the game to the villa and returned to the office to look at the game screen in his mind. he controlled the game character to go to a level 3 land and harvest the seven-colored symbiotic triangular plum that had already grown.

In this Level 3 plot of land, he could grow 25 mature seven-colored symbiotic triangular plum flowers in one go.

Qin Lin controlled his game character to send these triangular plum flowers to the yard where they were stored. He found that he was very lucky. This batch of triangular plum flowers had a 3 grade mature flower.

He kept a Grade 3 and a few Grade 2 ones for the manor, while the rest were all sold in-game.

Then, Qin Lin controlled his character to return to the farm, to a level 2 land full of green.

The crops grown on the level 2 land were also sold in the game. Now, they were all used to grow the green plants needed for the manor.

This Level 2 plot of land was filled with bamboo.

He thought about it and decided to plant bamboo in the isolation circle in the garden.

Firstly, bamboo was a specialty of the South.

secondly, the bamboo was a good match for the simple and retro-style villa.

Thirdly, bamboo had always represented elegance since ancient times, with the saying 'it's better to eat without meat than to live without bamboo'. It was the same as 'no meat makes one thin, no bamboo makes one vulgar'.

Of course, these bamboos were not the tall Moso bamboos, but a kind of bamboo produced by the game for viewing purposes. They could only grow to about three meters tall, but their bodies were slender and beautiful, and their leaves were lush.

These bamboos were all Grade 1 seedlings, so there was a chance of a Grade 2 seedling.

qin lin controlled his game character to pick the bamboo for viewing and sent it to the yard where he stored it.

Most of the bamboo was of Grade 1, but there were enough plots of land, so there were quite a few of Grade 2 bamboo.

He sold all the grade 1 ones in the game and kept all the grade 2 ones.

Then, he looked at a large area of Level 1 land.

These Level 1 plots of land were originally sold in the game to grow crops, but now they were all used to grow flowers. Golden Celebration was a type of shrub species that was very suitable for making flower walls.

once it was made into a flower wall, it could bloom very dense double-petal flowers and give off a pleasant fragrance. in addition to a large number of flowers, it could also bloom in many seasons.

Qin Lin also harvested the Golden Celebration and transported them to the courtyard that was specially used to store them. Moreover, there were also grade 2 and Grade 1 golden celebrations.

However, it was only the outer flower wall, and the separation area was large, so he did not insist that all of them were of 2.

A quality of 1 could be used.

After picking the two crops, Qin Lin locked the office door and entered the game with a thought. He went to the yard where the plants were stored and saw the information of the two crops:

The first was to admire the bamboo:

green bamboo for aesthetic purposes: 2

[this is a special bamboo for viewing from the game: [aesthetic +2, aesthetic +2, photogenic +2, elegant and unique +2!]

4 attributes weren't a lot, but they were all suitable for landscape decoration.

It would take some time to collect the quality 2 bamboo.

[decorative Golden Celebration: Grade 1]

[this is a special kind of shrub that is very suitable for building flower walls: [aesthetic +1, beauty +1, entry +1, rich floral fragrance +1.]

It was also suitable for viewing, and the size of the Golden Celebration shrub was just right for the flower wall.

Qin Lin was relieved, so he logged out of the game and planted more bamboo and Golden Celebration on the Level 1 and Level 2 lands.

At the same time, he controlled his game character to go to the seed shop in ore town and check out the other plants. The manor and villa were so big that the flower beds needed to be planted with all kinds of flowers, and the garden also needed all kinds of green plants.

In the game, there were ornamental palm trees, ornamental locust trees, and ornamental Osmanthus trees.

In the past, because it was troublesome to transport these green plants, Qin Lin had never thought about these game green plants.

This was the only time he had to decorate the manor and villa. Naturally, he wanted to use the items from the game to make sure everything was to its best.

In the next half a month, Qin Lin repeated these things almost every day. The courtyard that was stored as a plant in the game was also full.

...

linlin manor.

after qin lin delivered the goods to the villa early in the morning, he went to the wine cellar to get a bottle of linlin medicinal wine and returned to the office.

Not long after, Huang Xin arrived. He said impatiently, "Qin Lin, where's the wine?"

qin lin passed the wine to his old classmate and teased, " "You rich second generation kids are so weak, you have to rely on external forces at such a young age."

Huang Xin was obviously dissatisfied with this statement. "Qin Lin, you're just being sarcastic. You know that Ms. Chu is older than me, and she's almost at the age of a Wolf. Let's see if you can still make such sarcastic remarks so easily when your Zhao mochen reaches this age."

"Hehe, I'm not worried." Qin Lin shook his head.

"Are you kidding me? as a man who has eaten two fruits of the tree of strength, do you think I'm afraid of my wife being as fierce as a Wolf or a Tiger?"

yes, you can make Linlin medicinal wine. You're so proud. Huang Xin expressed his disapproval of Versailles. He had clearly misunderstood. After chatting with Qin Lin for a while, he left.

After investing the 100 million that his family had given him to practice in you city, he didn't dare to slack off. Now, he was busy all day long.

Not long after Huang Xin left, Qin Lin also left the office and headed to the warehouse.

Chapter 604

Another half a month had passed, and the people from you city construction had completely left. The third-party company hired by the villa had completed the inspection. Previously, they were afraid that some things would be damaged by the renovation workers, so they had some concerns.

For example, the yellow Rosewood in the game, the red sandalwood wine rack, and the Duke's Rose.

Now that the people of you city had left, he had no more worries.

Qin Lin arrived at the warehouse and entered the game as soon as he could. He took out the four Duke King roses, as well as the wine rack made of yellow Rosewood and red sandalwood.

there were already a lot of wine racks left, and he couldn't finish pulling them all in one go with his truck. it would take a few times to finish them.

Moreover, these wine racks were basically antique or half-antique in value. According to the time ratio in the game, the oldest one was more than 100 years old, which was definitely valuable in the outside world.

Putting these wine racks in the wine cellar would definitely fill up the awesomeness exp bar.

In the future, if wine lovers came to visit, they would probably be shocked by these wine shelves.

This was too extravagant.

Of course, these wine racks were not enough to fill up the entire wine cellar of the manor villa, so they had to be replenished slowly in the future.

on his first trip, he only brought four duke king roses and a few wine racks. when he reached the villa, he called yu shui and chen dabeı over.

He asked Chen dabeı to move the wine rack to the wine cellar in the manor and Yu Shui to transplant the four Duke's roses to the four flower beds in the manor.

Yu Shui recognized the Duke's Rose and knew how precious it was. She hurriedly brought people to carefully move the Duke's Rose down and transport it to the manor villa.

After Chen dabeai moved the Rosewood and wine racks down, Qin Lin drove to the warehouse. After a few trips, he finally moved all the Rosewood and wine racks out of the game and transported them to the manor.

After transporting all the wine racks to the villa, Qin Lin had to think about another problem, which was the shrubs and bamboo for the Golden Celebration, as well as a few green plants for the viewing, such as the Osmanthus tree, locust tree, and palm tree, that had been left over for half a month.

Although this was not enough to decorate the entire villa, it was already a lot. He could move it out and let Yu Shui transplant it first.

However, he couldn't rely on his small truck to transport these things. If he really wanted to transport them, he didn't know how much effort and how many years it would take.

Therefore, in the end, he used the old method, which was to go to Ming city, find a large warehouse in the suburbs with few people, and finally let the transport team Zhao Liyuan bring professional people and a fleet of vehicles to transport it.

Qin Lin was a man of his word. After explaining to Zhao Moyi, he went to Ming city like before and rented a remote warehouse without surveillance.

Naturally, it was different from the place he had rented previously. He did not go to the same place to avoid suspicion.

after checking the warehouse and making sure that there were no surveillance cameras, he entered the game and began the difficult moving work.

There were quite a few bushes for the Golden Celebration and bamboo for viewing in the past half a month.

It took Qin Lin a lot of time to move all the bamboo to the warehouse. After that, he informed Zhao Liyuan to bring a team to the warehouse in Ming city to transport the stalks back to the villa and let Yu Shui transplant them.

The second day after he returned to you city, he called Chen dabeai over and asked him to bring all the wine that he had taken out from the temporary wine cellar in the office to the wine cellar in the manor.

It took some time for Chen dabeai and his men to move all the wine to the manor and put it in a corner of the wine cellar.

Most of the wine he brought out was in barrels, and the size was not suitable for the wine rack. They were all placed in the corner of the wine cellar. As for the bottled wine, they were all placed on the wine rack.

"Boss, do you have any other orders?" After Chen dabeai and his men had finished moving the wine, he asked again.

"It's fine, you can take your men and do your own things," Qin ran said.

Chen dabeai immediately understood that his boss wanted him to leave. He waved his hand and left with the security guards.

Qin Lin then locked the wine cellar door from the inside.

The lock of the wine cellar door was a double safe, which required a password and a key to open. He was the only one who had the password and key now.

After locking the door, Qin Lin entered the game with a single thought.

There were no surveillance cameras in the wine cellar, and even the manor villa had no surveillance cameras. He was the only one who could enter and exit the wine cellar, which made it very convenient for him to enter the game and retrieve wine.

Now, the other employees were not allowed to enter the wine cellar, and they would not keep an eye on the manor. No one would pay attention to or suspect this.

A moment later, Qin Lin appeared in the wine cellar again, a bronze bottle of medicinal wine in his hands.

He disappeared and reappeared again with two more bottles of medicinal wine in his hands.

After repeating this process, he brought out two bottles of medicinal wine with antique wine bottles and placed them on the wine rack, filling it up quickly.

These bottles were all made in the game. Qin Lin had mined and made them in the game before, so he had a lot of them.

Not only were there Antique Bronze wine bottles, but there were also antique silver and gold Wine bottles.

It was even a wine that marked a special year.

he had also moved out the various brands of wine that had been moved into the game and placed them around. because these wines were placed in the game at different times, their current years were also different. some were over ten years old.

Naturally, he also took out the Linlin vital Qi wine and Linlin child-giving wine and put them in a specially built safe in the middle.

Chapter 605

These two wines were the most precious.

When Qin Lin took out the wine from the game one by one, the wine cellar was already quite well-built.

Moreover, the wine stored inside was of high quality. None of them were less than ten years old, not to mention Linlin medicinal wine that was more than a hundred years old.

A person like Li Qing would drool if he entered this wine cellar.

If the outside world were to find out about the wine in this wine cellar, it would truly be shocking.

After he was done with the wine, Qin Lin left the wine cellar and closed the door completely. He then returned to his office in the villa.

After that, Qin Lin started to plant the Golden Celebration and bamboo for viewing, as well as the green plants needed for the manor villa.

Just like that, a month passed by. He went to Ming city twice to move his things out, and then asked Zhao Liyuan to bring a fleet of cars to Ming city to bring back the things. After such a long time, he finally managed to gather all the plants needed for the manor villa.

Qin Lin and Zhao Liyuan transported the last batch to the villa. Not long after they returned to the office and sat down, Deng Guang arrived. As soon as he came in, he said, " chairman qin, please approve this document. then, i'll send the linlin herbal drink to wang xiang. "

the linlin medicinal drink was a laxative liquid.

In addition to the manor villa, another month had passed. At Linlin food company, Deng Guang had also finished the production of the laxative liquid. After applying for the pharmaceutical brand, it entered production as soon as possible.

Normally, the approval process would not take so long, but the higher-ups were more anxious about the body-strengthening potion. They also hoped that the potion could be produced as soon as the test was over, so they naturally rushed Linlin food company's application.

Moreover, in the past month, the effect of the first substance of the body-strengthening drug had been determined. After the athletes took the drug at a normal dose, the effect of the drug was visible to the naked eye after five hours of training.

This was already worth a lot.

Now, he just had to wait and see if the second substance could help people break through the upper limit of their physique.

This time, you Cheng also seized the opportunity and didn't let people dig out the factory of the laxative medicinal liquid. He caught it immediately. All the procedures of the factory, the selection of the factory, the purchase, and the transformation had to be monitored at all times.

Qin Lin took the document, read it, and signed it.

Lin Lin medicine had already started advertising, and the first batch to be released would naturally be through wang yang. After all, among Lin Lin's beverage channels, wang Yang's channels were the most mature.

After Deng Guang left, Qin Lin looked at Twilight in his mind again to see if there were any other useful potted plants!

After all, the interior of the manor villa could still be used. For example, it was always good to have some flowers on the balcony.

Moreover, after some selection, he found that it was useful. He directly bought the seeds to plant in the field. He also found that the Xiangshui tribute rice in two paddy fields had ripened and could be harvested.

Qin Lin thought of the Xiangshui tribute rice he had grown in the villa.

Xiangshui rice was a half-late rice and would mature in 5 months. However, due to the geological reasons, Xiangshui tribute rice was a late rice and would mature in over 200 days, which meant that it would mature once a year. This explained why Xiangshui tribute rice was rare.

Qin Lin controlled his game character to harvest the mature Xiangshui tribute rice. Then, he kept the grade 2 rice and sold all the grade 1 rice.

However, the instant the grade 1 tribute rice was sold, he looked at the screen in his mind in shock.

This was because a notification had appeared-character level up!

[Chapter 606 Special Kiss Fish! This Effect Is Too Powerful! 1](#)

Qin Lin didn't expect to level up so suddenly. He hurriedly looked at the upgrade message.

with this upgrade, he could develop 12 more level 1 plots and 6 more level 2 plots.

The Level 3 and Level 4 areas didn't have any movement.

The herb garden had not been opened to level up either.

However, the two paddy fields that had not moved for a long time now notified him that they could be upgraded. Also, the ranches also notified him that they could be upgraded to Level 3 ranches.

Qin Lin put the farm to the side and looked directly at the paddy field.

After all, Level 2 paddy fields could already breed quality 2 eels and quality 2 mudskippers. He didn't know what would happen if he leveled up to Level 3.

Wild game in the fields had always been something he missed.

Qin Lin controlled the game character to upgrade the paddy field to Level 3. Then, he controlled the game character to go to the seed store in ore town to see what could be planted in the level 3 paddy field and what could be used for farming.

There were obviously more things that could be planted in Level 3 paddy fields, such as purple flowers, alfalfa, water bamboo, water chestnuts, mushrooms, and so on.

There was one more thing that could be used for breeding: Bastard.

turtle seedling: Grade 1 "

[this is a type of turtle with extremely high nutritional value. After it grows up, its meat will be very nutritious and delicious. The only problem is that it has been raised for a long time.]

Qin Lin's eyes lit up when he saw the tortoise.

However, could tortoises be cultivated in paddy fields?

however, it was understandable that it had been raised for a long time. otherwise, why would it be called an old turtle?

However, this wasn't important. The important thing was that he was tempted by the sight of the turtle. He immediately controlled his game character to buy the turtle.

When he lived in the countryside as a child, his favorite thing to do was to follow his father to the river with a flashlight to catch wild game. Back then, wild chickens and turtles were the most delicious things.

Especially the tortoise.

The taste of stewed turtle meat with rice wine and medicinal herbs was very nourishing. Eating too much of it would cause people to have a nosebleed.

Unfortunately, the wild beasts on the market were extremely expensive.

It was alive.

A catty of them with shells would cost a few hundred Yuan.

However, when Qin Lin flipped to the next page, his eyes suddenly lit up.

there was an unexpected item in the list that caught his eye.

[wild kiss fish: special]

Kiss fish?

Not to mention anything else, just the name alone made people feel special, not to mention the symbol with a".

This was another special item that spawned randomly.

However, this was the first time he had heard of kissing fish.

He only knew what was going on after seeing the note.

[this is a special type of wild aquatic fish that seems to have mutated. After the fish experts in ore town caught them, they found that they have very good aquatic effects, so they cultivated them and needed to be raised separately.]

It turned out that this thing was a hydrotherapy fish. No wonder it was called kiss fish. It was somewhat appropriate to say so.

The hydrotherapy fish was naturally used for fish therapy SPA.

This was a function that could be found in many situations.

In fact, fish therapy had gradually become a trend in many sanatorium.

But could these aquatic fish be raised in the paddy field?

The game was really awesome.

Moreover, Qin Lin's interest was aroused.

There was a swimming pool in the manor villa, which was divided into the children's area and the adults 'area.

To be honest, the children's area had almost no use for his high-end treatment. He could totally use it as a fish treatment area first and make changes to it after the hot spring area was completed.

Qin Lin controlled his game character to buy the baby kiss fish and then returned to the farm.

The two paddy fields had been upgraded to Level 3. One was just nice for breeding turtles, and the other was for breeding kissing fish.

On the other hand, the kiss fish could not be cultivated with Xiangshui tribute rice, so it could only be cultivated in a level 3 paddy field alone.

With the appearance of the kiss fish, Qin Lin immediately went online to check the information about fish therapy.

Furthermore, he realized that the fish therapy actually had many effects.

.....

At noon the next day.

Those turtles were not mature yet, but the kiss fish had already indicated that they were mature.

Qin Lin directly controlled the game characters to harvest this batch of kissed fish and put them in the game storage room. Then, he entered the game with a thought.

When he arrived at the game storage room, he saw the kissing fish.

The kiss fish was not big, only about the size of two fingers.

There were about a hundred of them in this batch.

The most obvious feature of these kiss fish was that their mouths were round and pointed. It was very strange, so they should be used by relatives.

However, some of them were clearly larger and more lively, so they were separated from the others.

Seeing this scene, Qin Lin thought of something and immediately looked at the remarks of the fish.

[Fish Kiss: quality 2]

[this is a special type of hydrotherapy fish. It likes to eat dead skin and can perform special hydrotherapy actions on people: Clean skin +2, relieve fatigue +2, promote metabolism +2, regulate the nervous system +2, relieve insomnia +2, heat resistance +2, exuberant vitality +2!

...

[Fish Kiss: quality 3]

[this is a special type of hydrotherapy fish. It likes to eat dead skin and can perform special hydrotherapy actions on people: Clean skin +3, relieve fatigue +3, promote metabolism +3, regulate the nervous system +3, relieve insomnia and dreaminess +3, heat resistance +3, exuberant vitality +3!]

Qin Lin was a little surprised to see these remarks.

This was because these remarks were actually effects that had been mentioned in the online fish therapy. However, in the information on the internet, other than cleaning the skin and relieving fatigue,

the other effects of promoting metabolism, regulating the nervous system, and relieving insomnia and dreaminess were only indicated to have some effects.

[Chapter 607 Special Kiss Fish! This Effect Is Too Powerful! 2](#)

Obviously, the so-called fish healer was not sure about this.

However, the fish produced by the system clearly had these effects, and they were all +2. Even the quality and attributes of the fish were +3.

In modern society, it was common for people to suffer from nervous system disorder and insomnia. Even rich people like Chen shengfei and Marvin were no exception.

Sometimes, the problems of these big shots were even more serious, because the pressure they exerted was simply unimaginable to ordinary people.

Moreover, the older he got, the more serious the problem became.

That was why high-end nursing homes and holiday resorts were so popular with the rich.

Because the market was really there.

The most interesting thing about it was its heat resistance.

Aquaheal fish were very heat-resistant because many aquaheal centers put their fish in hot springs during winter, and the temperature could go up to 40 degrees.

Now that the fish had the attributes of heat resistance +2 and heat resistance +3, it was likely that people could swim freely in higher temperatures.

This was a little strange. It couldn't be that the fish was completely fine at a temperature that could cook human skin, right?

But no matter what, with these attributes and effects, when the manor villa was opened, the kiss fish would definitely be a very popular project.

However, there were only a little more than 100 of them, especially not many of the grade 3 ones.

Therefore, Qin Lin wasn't in a hurry. He controlled his game character to go to ore town again, bought the baby kiss fish, and raised them in the empty paddy field.

Another day passed.

at noon, the second batch of cultivated kiss fish was ripe and harvested.

Unfortunately, the tortoise was still not mature.

It was indeed growing slowly, but it didn't matter. No matter how slow it grew, it would still be eaten one day.

Qin Lin controlled the game characters to harvest the batch of fish and put them in the storage room. Then, he went out of the office, found two big buckets, and went to the storage room. He planned to take these fish out of the game and experience the effect.

when they arrived at the warehouse, qin lin entered the game with two water buckets. he put all the kiss fish into the water buckets and then took them out of the game with a thought.

after bringing the fish back to linlin manor, he immediately called chen dabei and asked him to bring a tow truck over.

There were more than 250 quality 2 and 3 kiss fish in total, and with the big bucket of water, it would be really difficult for him to carry them over.

Moreover, the swimming pool had not been cleaned yet, so someone had to clean it first.

The first thing Chen dabei did when he received a call from his boss was to bring the tow truck over. There were also many security guards behind him.

"Boss, what are we going to do?" Chen dabei brought his men to Qin Lin and asked.

"Go clean the swimming pool and pour the fish into the children's area," Qin Lin ordered.

Chen dabei climbed up the truck and saw the two buckets of fish. "Boss, this fish isn't big, and its mouth is a little strange. What fish are these?"

"aquatic fish!" Qin Lin also explained.

Chen dabei's curiosity was satisfied. He immediately brought his men to move the kissing fish to the swimming pool. Then, he went to find some tools to clean the pool.

Chen dabei was very good at this kind of work. It did not take long for the large swimming pool to be cleared out. Whether it was the adult or children's area, they began to fill it up.

Because it was a newly built pool, the water was only used to wash the pool for the first time. After that, the pool could only be used again.

When Qin Lin saw that everything was settled, he turned to Chen dabei and said, " "Pour all the fish in!"

Chen dabei and his men poured the two buckets of fish into the children's swimming pool.

In an instant, these fish had more space, and they immediately swam happily, scuttling around in the water.

After the fish was put away, Qin Lin asked Chen dabei to get some people to do their work while he left the manor.

although she wanted to experience these kissing fish immediately, she had to have swimming trunks, otherwise, she was afraid of accidents.

He wasn't afraid of being seen. He had a lot of money, so it wasn't a problem. As for what he was afraid of, everyone should know.

Therefore, Yu Liao was forbidden from not wearing any defense, especially women. Otherwise, something embarrassing would happen.

Qin Lin went to the supermarket and bought a stack of swimming trunks for men and women. No matter what, he had to buy more in case he needed them.

Qin Lin entered the manor villa, found a room, and changed into his swimming trunks. Then, he came out and lay in the swimming pool.

At that moment, the water in the pool splashed everywhere and the densely packed kiss fish surrounded him. They were like gun food, and in an instant, they pecked all over his body with their somewhat strange mouths.

This kind of Peck was not heavy, but it gave people a very comfortable feeling.

If it was only comfortable at the beginning, then as more and more fish were pecked, it was as if more and more acupuncture points were pecked. It also gave him a comfortable feeling, and his whole body slowly became comfortable.

Qin Lin couldn't help but close his eyes and lay down to enjoy it. Even the nerves of his whole body relaxed.

He knew that this was definitely the effect of his nerve regulation attribute.

It was hard to believe that a group of kiss fish could make people feel this way.

Especially when the group of Grade 3 kiss fish surrounded him and pecked, the feeling was even stronger.

Although his kiss fish had the system's attribute, it also showed that fish therapy was indeed a skill. No wonder it was popular.

As he was enjoying himself, his phone rang. Qin Lin picked up the phone and saw that it was Deng Guang.

Deng Guang's voice could be heard from the other end of the phone. "Chairman Qin, where are you? I didn't see you in your office."

"Come to the manor villa, I'm here." Qin Lin replied.

The fish therapy was too comfortable, and he didn't want to get up.

Of course, Deng Guang knew about the manor villa. It was like a big Castle with more than 20 rooms, each of which was almost as big as a three-bedroom house for an ordinary person.

After hanging up the phone, he left the villa with a document and went straight to the manor.

After entering the manor, he was shocked to see his boss lying in the pool in a pair of swimming trunks.

When he got closer, he said in surprise, "Chairman Qin, is this fish therapy? You're in such a good mood."

Qin Lin smiled and said, "These fish are not ordinary. Come down and try them. There are swimming trunks in the hall. Find a room and change."

Deng Guang would not reject his boss's invitation.

Soaking in a hot spring with the boss, having fish therapy, and looking for sex, this should be what any subordinate would want.

This meant that he had a good relationship with his boss, and his boss also valued him.

"Chairman Qin, I need you to sign this document. Take a look first." Deng Guang handed a document and a pen to Qin Lin respectfully, then went into the living room to get a swimming suit. He went upstairs to find a room to change.

Qin Lin took the document and looked at it. It was about the wage adjustment for the production of Linlin medicine. Previously, the wage for Linlin medicine was the same as the wage for Linlin leisure tea.

However, after the actual production, the Linlin medicinal liquid was more complicated and difficult, so the wage by piece would naturally have to be raised.

Qin Lin naturally wouldn't shortchange his employee's salary. He signed the document with a pen and put it aside.

Deng Guang came out very quickly and also lay down in the children's pool. The moment he laid down, the kissing fish immediately gave up on Qin Lin and swam towards Deng Guang like sharks who had smelled the fishy smell.

This meant that Deng Guang's dead skin was more fragrant and more abundant. At the same time, it also meant that Deng Guang had more problems.

In an instant, Deng Guang was surrounded by a dense sea of kiss fish. At first, Deng Guang was not used to it, but soon, a very comfortable feeling swept through his body.

It was as if all the acupuncture points in his body had been pecked by them, and he felt extremely carefree.

The Linlin potion had been keeping him busy recently, and he had been under a lot of mental pressure. Now, as the fish were being treated, he felt that the mental pressure was slowly disappearing. His nerves were relaxed, and he was very relaxed.

MMH, MMH, MMH. Deng Guang couldn't help but let out a mumble. It was enough to show that the effect of the fish therapy was very comfortable.

Soon, Deng Guang's breathing became even and he even started to snore.

She had fallen asleep from the comfort.

Seeing this, Qin Lin felt a little emotional. This showed that Deng Guang had been really tired during this period of time. At the same time, it also showed how strong the effect of the fish therapy was.

as deng guang was too tired, he adjusted his nervous system and fell asleep as soon as he was relaxed.

[Chapter 608 The Expensive Wagyu Beef! He Likes To Target Other People's National Treasures! 1](#)

While Qin Lin and Deng Guang were enjoying the sweet and sour fish, another beverage boom was spreading in the provincial capital of min province.

In a supermarket on the third Street, the boss, Chen chuanzheng, was packing up the goods as usual. He put the Linlin leisure tea in the most conspicuous place in the refrigerator.

The Linlin leisure tea was already the most popular functional drink in the entire min province. Sometimes, without the drink, customers would leave without even looking at it.

Some customers would turn in at the sight of the Linlin leisure tea, so it was necessary to make it conspicuous.

After filling the table with the Linlin leisure tea, Chen chuanzheng took out two new boxes of drinks with the words " Linlin medicinal drinks " written on them.

It was a new drink released by Linlin company, and miss Jiang Lingling had asked him to do the sales statistics for the past two days.

Not long after the goods arrived yesterday, because of the reputation of the Linlin leisure tea, this medicinal drink was also quickly snatched up.

He didn't dare to disobey miss Jiang Lingling's order. After all, the Linlin leisure tea was always the fastest to arrive because of her.

This was also thanks to him tipping off the other party that the three drinks stores were going to encircle Linlin leisure tea.

Moreover, he knew that this Linlin medicine must be a hit. The description printed on the packaging was: This medicinal drink was effective for constipation, dried blood in the stool, weak stool, sticky stool, rough stool, and so on.

it was unbelievable that a drink could have such an effect.

If it were any other beverage company, it would have been suspicious, but Linlin company's drinks were different. After all, they had a drink like Linlin leisure tea.

Most importantly, he had drunk it himself yesterday.

That kind of carefree feeling was really hard to describe.

Chen Chuan was still thinking about it when a man came over.

"Mr. Mei, you want leisure tea again?" Chen chuanzheng looked at the other party with a smile.

He knew this man. He seemed to be in the media industry. He had been making eyes at a few of his female anchors. The key point was that the other party's taste was really heavy. Those anchors were really not good.

Therefore, the other party often came to buy Linlin leisure tea.

other than the Linlin leisure tea, give me a Linlin medicinal drink from last night as well, " Sir Mei said hurriedly. this thing is really useful.

I had a spicy hot pot with my employees the day before yesterday. I felt that something was wrong and my pooping was quite uncomfortable. I felt better after drinking this medicine last night. I'll buy some for my employees today.

Chen chuanzheng naturally knew the effects of the medicinal drink and understood Sir Mei's thoughts. Even if he opened a supermarket and could stock up at any time, he would still keep one for himself.

Mr. Mei left with a cup of Linlin leisure tea, and a moment later, someone came. boss, I got some Linlin medicine from yesterday. I've brought it home to prepare. My son always likes to eat hot food.

As soon as this one was sold, Chen chuanzheng saw a neighbor come over. old Chen, get me a Linlin herbal drink. The effects of this thing are really not a lie. With this at home, I can eat the spicy crayfish to my heart's content.

Not long after, Chen chuanzheng realized that the Linlin herbal drinks that were delivered today were all sold out.

moreover, after experiencing it yesterday, why did these returning customers buy it piece by piece?

They all said to keep it at home.

Was it really being used as medicine?

However, he immediately took out his phone and made a call. He wanted miss Jiang Lingling to deliver the goods as soon as possible.

This thing would sell as well as the Linlin leisure tea. If he didn't prepare more, the customers would run to other places if they came and asked for it.

On the other side, Jiang Lingling also received a call from Chen chuanzheng. She knew that the goods that were delivered to the third workshop and Seventh Street were all sold out.

She put down her phone and sat on Wang Yan's lap. She wrapped her arms around his neck and reported, " boss, it's the 15th call. They're all sold out. Linlin food company is really amazing. They've made another hit.

Wang Yan said helplessly, " sister Lingling, just report it. Don't mess around. You'll get angry.

"I'll help you put out the fire!" Jiang Lingling said seductively. Then, she got up and squatted down quietly.

wang yan's face was filled with distress.

This kind of life was really torturous.

this woman would torture him.

Then, he picked up his phone and made a call.

He had to report the situation to President Deng, but he gasped after the call ended.

...

Linlin Manor.

Deng Guang was enjoying the fish massage when he heard his phone ring. He picked up the phone and saw that it was a call from the king.

Wang yang had reported to him the sales situation of the Linlin medicinal drink, and the effect was naturally surprisingly good.

It was just that this guy's voice sounded a little off. He was so rough when making a phone call.

Were young people nowadays so weak?

he put down the phone and reported to qin lin, "chairman qin, wang yan said that the sales of the linlin herbal drink are booming."

"En!" Qin Lin nodded.

This was also expected. With those attribute effects, it was impossible for the medicinal drink not to be popular.

"chairman qin, i'll go back to the company first. i still have a meeting to attend." Deng Guang also woke up after enjoying the fish therapy.

Although the fish therapy was very enjoyable, today's meeting was very important. They were going to discuss the personnel issues of the director of Linlin pharmaceutical factory.

He had to go back.

"En!" Qin Lin nodded. He looked at Deng Guang and said, by the way, director Deng, I'll ask senior brother Chu to go to Linlin food company for an inspection in a while. It'll be about the share rewards in detail. Please cooperate with us.

[Chapter 609 The Expensive Wagyu Beef! He Likes To Target Other People's National Treasures! 2](#)

Equity rewards were inevitable for every company in the later stages. In fact, brother Chu had already prepared the equity reward document, but the details had to be revised by the company according to the actual situation.

This was not something that could be done in a short time.

"Good, good!" When Deng Guang heard this, he couldn't help but reveal a happy expression. Suddenly, he was full of energy as if he had been injected with chicken blood.

Although he already knew that Chairman Qin had promised the Lab's President Shen a share reward, and that the food company would also give out a share reward sooner or later, and he would definitely have a share, it was hard not to be excited when he heard it from Chairman Qin.

After Deng Guang left, Qin Lin's attention was once again attracted by the system notification in his mind.

[Ranch upgrade completed!]

Qin Lin hurriedly looked at the screen in his mind.

After leveling up, apart from the two paddy fields, the farm could also be leveled up.

Just now, he clicked on the farm to level up, and now the farm had also been upgraded.

Qin Lin controlled the game character to go to the farm to check on the status after the upgrade.

After the upgrade, two more buildings could be built on the ranch. One was the sheep pen, and the other was the cowshed.

In other words, he could now raise sheep and cows on the ranch. He just didn't know if there would be a cow that could produce strawberry-flavored milk like in the game.

Qin Lin controlled the game character to build a sheep pen and a cowshed immediately. Unfortunately, the cowshed was just a normal cowshed, not the kind that cows lived in.

Even a level 3 farm wouldn't produce a cow that could produce strawberry-flavored milk.

A moment later, Qin Lin received a system notification. The sheep pen and cowshed had been completed.

He immediately controlled his game character to go to the NPC store in the ranches and opened the list of items that he could buy now.

There was nothing special about the sheep. It was just a common kind of raised sheep.

However, when he saw the list of cattle, he was shocked. Other than the ordinary cattle, there was a special breed of cattle.

Qinlin had heard of this beef before because it was the most expensive beef in the world. He couldn't even afford to eat it before.

Moreover, this Wagyu beef was also one of the most special delicacies in the small day Kingdom.

The Wagyu of the small country was recognized as the best quality beef in the world today. Its meat had obvious marbling patterns and was also known as " snowflake meat. because the meat of the Wagyu of the small country was juicy, tender, and had a unique taste, the content of saturated fatty acid in the muscle fat was very low, and the nutritional value was extremely high, it was also regarded as a " national treasure " in the small country.

since it was the national treasure of the xiaotian country, the price was naturally very expensive. the top-grade beef exported to our country was either 20 yuan per gram or more than 3 million yuan per head.

How could he have eaten this kind of beef in the past? They didn't even have the right to see this kind of beef.

It could be said that because of this Yakushi, the small country of Japan had a unique position among the world's meat delicacies.

In fact, when others mentioned beef, they would first mention the beef from the small day Kingdom.

This was also the pride of the small country. His status in the small country was not lower than the status of dark circles in our country.

It could even be said that he Niu's status in the small day Kingdom was higher than that of the people of the small day Kingdom. Someone even joked, " Humans can't kill cows, but cows can kill people and nothing will happen.

Although it was just a joke, it was enough to show the status of this bull.

Moreover, the Xiaoji country was very strict with cattle. Other countries had no way to raise them. Even if they bought live cattle abroad, they had been castrated.

Naturally, when there was no way to resist, they had to export some complete cattle to Western countries, but they were all of poor quality.

Therefore, the beef of other Western countries was far inferior to that of the small country.

Qin Lin looked at the game's purchase option with the calf and suddenly smiled.

This was Xiao Tian's national treasure.

Apart from the fact that the beef was expensive, it was also delicious. It was probably related to the control of the small country.

If he raised a large number of Wagyu beef, and the beef was no longer unique to the small country, what would happen? It should be able to bring down the price of beef in the small country, right?

Wouldn't that be interesting?

The key was that if they found out that they had beef, would the people of the small day Kingdom go crazy with anger?

In particular, the Wagyu beef from his game would definitely have attribute bonuses. It would be more delicious than the best Wagyu beef in the small country, right? More delicious, right?

it was very interesting just thinking about it.

Qin Lin didn't stand on ceremony and immediately bought the young cow.

[congratulations on buying two Wagyu calves. Go back to the ranch and have a look. Maybe they've already arrived!]

After Qin Lin bought two heifer Cubs, he also bought two sheep for the sheepfold.

Then, he sat in front of the computer and went online. He logged into a website that sold agricultural animals and searched for cow Cubs.

He naturally knew that it was impossible to buy young Wagyu cows online, but the internet was not short of scammers.

He also needed to buy a few certificates to buy a few young cows.

The key thing was that there really were options to sell and sell young cows. Interestingly, this was a Ranch opened by someone with a background in the small country.

The introduction was, "selling authentic and young cattle."

The introduction also included a picture of the real Wagyu beef.

The price was not cheap. One Cub cost 15000 Yuan.

It was a little black-hearted to sell a fake at such an expensive price.

Qin Lin was sure that the other party's Wagyu was fake. However, the other party dared to sell it like this. It was possible that he had crossbred Wagyu with an ordinary cow. Cows indeed had the genes of Wagyu cows.

However, a hybrid Wagyu obviously couldn't produce a real Wagyu.

Therefore, the ranch was still a scammer, but it was so scamming that no one could say anything.

Qin Lin knew that it was fake, but he still placed an order and bought 20 so-called young Wagyu cows in one go.

Since the other party wanted to be a scammer, then he would let the other party take the blame!

As long as this Cub had the genes of a Wagyu cow, he could say that it was because he had eaten the quality 2 Dogtooth grass from Linlin Ranch that his genes had been optimized to become a real Wagyu, and his meat had become more delicious.

He didn't know if the information that the boss was from a small country was true or false.

If it was true, wouldn't it be interesting when the people of the small country found out that the cattle were imported from the other side into Linlin Ranch?

Qin Lin thought that it would be very interesting.

It was like if someone secretly sold dark circles to the small day Kingdom, he would be condemned and even be regarded as a traitor.

After Qin Lin placed the order, a short man in a Ranch received a report. Mr. Shanmu, someone's been tricked again. He's ordered 20 crossbred cow offspring, and he's already paid a deposit of 50000.

"Lord Chu, we've made a fortune again." When Lord Mountain wood heard this news, he stood up with a face full of smiles.

He was from the Xiaoji country, and Chu Jun had met him when he had gone to study abroad.

It just so happened that he had two not-so-good Wagyu in his house in the small country.

After Lord Chu learned about the status and price of the Wagyu cows, he proposed to open a Ranch here and used his connections to transport the two Wagyu cows over.

They crossbred the two not-so-good Wagyu cows with ordinary ones and sold the offspring as if they were Wagyu cows.

He really didn't expect this business to be so good.

with his background as a country bumpkin and the information of two real wagyu cows, many people bought the young.

Someone had placed an order for 20 Cubs.

That would be 300000 Yuan.

"Mr. Shanmu," Lord Chu said with a smile, "we'll arrange for 20 Cubs to be sent to them."

The two of them were naturally very enthusiastic about this business. They went to choose 20 young animals immediately. These young animals had been quarantined long ago, and the documents were all complete. They could be shipped immediately.

Shan mu naturally went through the procedures happily.

However, he didn't know that these 20 Cubs would make it impossible for him to return to the small heaven Kingdom for the rest of his life.

On the other side, Qin Lin also received the news that the 20 young cows had been shipped out. He was relieved.

Now, they just had to wait for the 20 young cows to arrive, and then they would replace them.

[Chapter 610 There's Also A Difference In Beef! I've Been Tricked Again 1](#)

After Qin Lin had bought the bull's growth in the game for one and a half days, there was a notification that it could be sold or slaughtered by the butcher in the mine town. Of course, the turtle still did not have any notification that it could be harvested.

He controlled his character to go to the farm. In the game, the price of selling a whole cow and finding a butcher to slaughter it was not much different.

Most players would not go to the butcher to kill them.

It was just that sometimes, some missions and sacrificial activities required meat, so they needed butchers to slaughter for meat.

Naturally, this also made things convenient for Qin Lin.

He could just let the butcher slaughter him in the game and bring the meat out of the game.

It was just like slaughtering a face-preserving duck for Medicinal Food.

Otherwise, it would be very troublesome for him to find someone to kill the bull if he brought it out.

Qin Lin controlled his game character to take a Wagyu cow out of the cowshed and headed to ore town to find a butcher to kill it.

it didn't take long for some of the characters to obtain pieces of beef in their backpacks.

However, he felt that something was wrong when he looked at the meat.

Because there was only meat.

The bull head, bull penis, and bull hooves were all gone.

wasn't this bullying?

It's fine if you embezzled the bull's head and hooves, but don't embezzle everything!

Qin Lin controlled his game character to click on butcher, and butcher's conversation appeared:

[I've already given you the meat. Please come again next time!]

More!

[I've already given you the meat. Please come again next time!]

"chi." qin lin.

He could only blame this damned game mechanism. Otherwise, this butcher would definitely not live long.

Qin Lin had no choice but to take the beef and beef in his backpack back to the ranch. He put the meat in the storage room, then locked the office door and entered the game with a thought.

As soon as he entered the game, he went straight to the storage room and saw the Wagyu beef.

the meat was the color of a peach, as white as the fat, and the oil was very dense.

Based on his knowledge of beef, even an outsider could tell that it was good beef.

Qin Lin focused his attention and saw the remarks of the beef:

[whole snow and beef: quality 1]

[this is one of the most expensive types of beef. It is said that only a limited number of quanxuehe beef can be produced every year. The texture is as dense as marble, and it has a smooth texture like butter. It is oily but not greasy, tender and tasty. Because of the game's improvement, the quality is even better. Taste +1, deliciousness +1, nutritional value +1, immunity +1, anemia prevention +1, accelerated metabolism +1!]

...

[whole snow and beef: quality 2]

[this is one of the most expensive types of beef. It is said that there is a limited number of whole-snow cattle every year. The pattern is as dense as marble, and it has a smooth texture like butter. It is oily but not greasy, tender and tasty. Because of the game's improvement, the quality is better. Taste +2, deliciousness +2, nutritional value +2, immune system +2, anemia prevention +2, accelerated metabolism +2!]

Qin Lin was a little surprised by these notes.

The meat of the same Wagyu cow was actually divided into quality 1 and quality 2.

After thinking about it carefully, he felt that it made sense. After all, there were indeed some parts of a cow that had better meat quality.

It was just that the way a quality 2 appeared was a little different from before.

However, no matter if it was a quality 2 or 1, with these attributes, if it were to be promoted on a large scale, the beef from the Xiaoji Kingdom would have to be cooled.

Even if the quality was 1, it had +1 in texture and +1 in taste. In terms of enjoyment, it was not comparable to the beef in the small country.

Moreover, there were the additional effects of the other four attributes.

the key was the price of the beef. even if the quality was 1, it would still be a sky-high price, right?

In the real world, the most expensive of all the snow and beef was 20 yuan per gram, which was 10000 Yuan per 500 grams. 6 500 grams was equivalent to his Emperor's supreme set meal.

and this was the normal snow and cattle outside.

His Grade 1 equipment could be sold at a higher price, right?

However, he didn't plan to do that. When he replaced the original and gave the ranch his own Wagyu, he would cut down the price of the whole snow Wagyu.

He remembered that there were international and beef competitions, and the small country had always been the champion.

When the time came, he would go and smash the market. First, he would grab the title of the best beef in the small country, and then he would reduce the price on a large scale. He would make the National treasure of the small country worthless.

This was the truest thought in his heart. He didn't know if this thought was normal or not, or if he would be scolded.

Qin Lin didn't hesitate. He touched the quality 2 whole snow and beef and the quality 1 whole snow and beef, and then brought them out of the game.

These two pieces of beef were at least 50 pounds each.

He had brought out a Grade 1 and Grade 2 full snow and beef. Naturally, he wanted to compare them with the normal full snow and beef to see how big the difference was.

however, after bringing the two pieces of snow and beef out of the real world, qin lin remembered that he did not have beef in the real world, nor did he have any channels to buy it.

This way, there was no way to make a comparison.

Although he complained about how expensive the beef in the small country was, he had to admit that it was really hard to buy it.

Qin Lin took out his phone and called Chen shengfei.

Old Chen was a rich man in Ming city. He was also an old lady who loved good food. He might have the means to buy beef.

on the other side.

chen shengfei was in the middle of a business meeting with a long-term client when he heard his phone ring.
