

The Game 621

[Chapter 621 Boss Qin, It's Definitely An Effect You Can't Imagine](#)

.....

Hearing Minister Lu's words, Qin Lin told him the truth. Minister Lu, the secret recipes you gave me are almost useless. Many of them are just for nourishing the body. They have no medicinal effect at all.

"Sigh, it's within my expectations." Minister Lu sighed when he heard this.

"But it's not like we didn't get anything," Qin Lin said. "There's a secret recipe that contains some good stuff."

As he spoke, he handed the two secret recipes to Minister Lu.

One of them was the original secret recipe of the intestinal energy restoration powder, and the other was the secret recipe that Dr. Dott had analyzed and repaired.

"Really?" Seeing this, Minister Lu hurriedly took the two recipes from Qin Lin. When he saw the original recipe, he was even more surprised. "Boss Qin, is this recipe really useful? This recipe was the first one to be abandoned by the people from the Chinese Medical Association."

Qin Lin explained, "yes, this is a prescription. When I first saw the herbs in this secret recipe, I felt that they were very strange. I found that many of the medicinal properties of these herbs were neutralizing each other. This is not right.

so, I used a special method of elimination to remove the neutralizing drugs, and the remaining medicinal materials obtained the formula of this elixir.

I've analyzed the formula. The elixir should be used on the intestines. Minister Lu, take this formula and ask the people from the Chinese Medical Association to formulate the elixir. Then, we'll test the effect of the elixir.

When professor Ren heard this, he was immediately interested and said, " " boss qin, you can't trouble two people for the same thing. why don't you help me make this medicine, and i'll personally test it? "

He was very curious about the elixir.

Boss Qin brought over two bottles of medicinal liquid, one for strengthening the body and the other for laxatives. This Chinese medicine had also aroused his interest.

Minister Lu also nodded in agreement. that's right. Boss Qin, please help me to the end. To be honest, I'm also very disappointed in the people from the Chinese Medical Association.

Minister Lu's request was a small matter to Qin Lin, so he agreed. to make the elixir, I need to buy some specialized tools and medicinal herbs.

"I'll get someone to make the arrangements immediately." As Minister Lu spoke, he took out his mobile phone and dialed a number to make arrangements. Moreover, Minister Lu's men were very efficient.

It didn't take long before the tools needed to make the elixir and the medicinal herbs needed for the intestinal energy restoring elixir were all bought.

Qin Lin also asked Shen Li to arrange a place and started to prepare.

Because of the system, the intestinal energy restoration powder was printed in his mind and muscle memory. Therefore, he was very familiar with the process of formulating it.

Even when it came to the proportion of medicinal ingredients, he had to rely on his hands and feelings. He didn't need to weigh them, and that was all thanks to muscle memory.

This scene made Minister Lu and professor Ren think that he was a person who had done a lot of research on Chinese medicine.

"boss qin's ratio doesn't even need to be weighed," professor ren said in surprise. "it seems that he has a deep understanding of this medicinal material."

that's true," Minister Lu nodded. boss Qin could tell if the medicinal herbs were good enough just by tasting them with his mouth. He even found fake herbs.

"It's that powerful?" Professor Ren couldn't help but be surprised.

When Qin Lin finished the intestinal energy restoration powder, the two of them immediately went up to check.

It was a small bowl of gray medicinal powder, which exuded a strong medicinal smell.

There were actually some differences between medicinal powder and medicinal liquid. Medicinal liquid was to boil out the medicinal properties of the medicine, while the medicinal herbs and dregs had to be thrown away.

As for the elixir, it was made by using the medicinal tools to make the medicinal herbs into elixir and was directly consumed.

"boss qin, is this the elixir made with the secret recipe that can be used directly?" Minister Lu asked curiously.

Qin Lin didn't give a definite answer, but said, "in theory, yes, but I can't guarantee that there are no other toxins in this powder. After all, it hasn't been tested on clinical trials. We still need to do a thorough test to know.

Naturally, it was impossible for poison to be poisonous.

If it was poisonous, the system would have given it A +1 attribute.

It was just that some things couldn't be said too confidently, and he had to leave some room for himself.

Minister Lu and professor Ren didn't care about this. Professor Ren immediately picked up the elixir and said, "i'll go and check."

As he spoke, he took the intestinal energy restoration powder and left for the laboratory for testing.

Intestinal Guiyuan powder was a drug that could treat cancer, but it was obviously not as easy to test as laxative liquid. So, after waiting for two to three hours without any news, Qin Lin left Linlin's laboratory.

Anyway, he knew the results before professor Ren finished the test.

In the laboratory.

Professor Ren, on the other hand, was already busy with his assistant. He was checking the ingredients and effects of the powder with several instruments.

professor ren had to admit that the drug powder this time was much more complicated than the laxative liquid. however, he was very excited because they had found several special properties in the drug.

"Professor Ren, come and take a look at the composition of the medicine." An assistant suddenly said excitedly.

Professor Ren hurried over to check the composition displayed by the assistant. After reading it, he said in a hurry, " hurry up and find Minister Lu. Ask him to send over the data from the Chinese Academy of Sciences on colon cancer.

The research data of the Chinese Academy of Sciences was confidential to the outside world, and it was top secret. It was impossible to even connect to the outside world, let alone access the information inside, let alone send it out.

[Chapter 622 Boss Qin, It's Definitely An Effect You Can't Imagine](#)

It was data that the country had spent a lot of money on, and even professor Ren couldn't use it outside.

Only those above Minister Lu's level could apply.

When Minister Lu received professor Ren's request, he immediately rushed over and said with excitement, " "Professor Ren, is boss Qin's elixir very powerful? Is it about colon cancer?"

Professor Ren said, " this is just one of the drug tests. I can't be sure yet. However, it is very similar to some data from our life and health Research Group's group study on colon cancer. I need to make a comparison.

"Alright, I'll apply for it immediately!" Minister Lu first found a laptop and logged into an email. Then he took out his mobile phone and called a leader.

With the leader's help, the data could be sent over as soon as possible.

Boss Qin said that the medicine might be effective for the intestines, but who knew it would also be effective for colon cancer?

The cost of treatment for this illness was high. Even if some medicine was included in the medical insurance, the treatment cost was still high due to the high prices of those pharmaceutical groups.

The Chinese Academy of Sciences had also spent a lot of money on the research of this disease.

It would be amazing if the effect was confirmed. Not only would it prove that the body-increasing liquid was not the only one, but it could also cure colon cancer.

This was simply a double kill.

It took almost an hour for the Chinese Academy of Sciences to send the relevant data to Minister Lu's email.

"Professor Ren." Minister Lu immediately opened his email and handed the notebook to professor Ren.

professor ren didn't hesitate. he quickly took the notebook and looked at it. then, he took the assistant's test data and compared it.

After a long time.

"professor ren, what do you think?" minister lu couldn't help but ask.

Professor Ren's face was already filled with joy. "The fragmented data is the same, but the research progress at the Chinese Academy of Sciences is limited. It's still far from the effect of treating colon cancer. As for this drug, we need to do in-depth testing to confirm it."

Professor Ren didn't pay any more attention to Minister Lu after he finished his words. He and his assistant started to analyze the samples again. They continued to do the analysis until it was dark.

professor ren stayed up all night for testing at his age, which showed how dedicated he was.

Until the next day, professor Ren couldn't help but be surprised. haha, it's really effective! This medicine is amazing!

Minister Lu, who had been with professor Ren the whole night, was dozing off in his chair. When he heard professor Ren's words, he instantly became energetic and said excitedly, " "Professor Ren, can this medicinal powder really treat colon cancer?"

This time, professor Ren said with certainty, " yes, it has been confirmed. It can treat colon cancer. Furthermore, the effect has met the expected standard. Sigh, I didn't expect this illness to be cured with a Chinese medicine recipe.

His words were filled with emotion. After all, he knew very well how much time, energy, and money he had spent to develop the drug to treat liver cancer.

The Chinese Academy of Sciences had invested a lot of money into the research of colon cancer, but the progress had been unsatisfactory. Now, this medicine powder had solved everything.

No matter what the other properties of the elixir were, just this alone was already very terrifying.

"That's great." When Minister Lu heard the good news, he clenched his fist and jumped up. He said with emotion, " it's all thanks to boss Qin for discovering the secret of this prescription. With the help of the people from the Chinese Medical Association, this prescription was the first to be abandoned.

Professor Ren smiled and reminded him, " Minister Lu, don't be too happy. You should tell boss Qin the good news first. He must be waiting for the good news.

"Yes, yes, yes! I almost forgot about this. Let me tell boss Qin the good news first!" Minister Lu quickly nodded and took out his phone. He knew who it was all thanks to.

Boss Qin was the biggest hero.

Minister Lu's first call was not connected, indicating that boss Qin was not in the service area. After three consecutive calls, the call was connected.

In the warehouse.

Qin Lin had just moved the last item out of the game when he received a call from Minister Lu. He answered the call and heard Minister Lu's excited voice. "boss qin, i have good news for you. the efficacy of the elixir has been tested. you can guess the effect, but you won't be able to guess it. "

Qin Lin couldn't help but laugh when he heard this.

How could he not know the effects of the elixir?

However, he still pretended not to know and asked, " " minister lu, seeing how excited you are, the elixir should have a great effect. don't sell it. i'm very curious about you. "

Minister Lu laughed when he heard Qin Lin's curiosity."Mr. Qin, you would never have thought that the drug could cure colon cancer. It's so amazing. It also proves that the body-increasing drug isn't unique. It also solved a big problem that the Chinese Academy of Sciences has been researching for a long time. Qin Lin, thank you so much. I owe you a big favor."

"Minister Lu, don't say that. I'm just doing what I can." qin lin had a smile on his face. everything was within his expectations.

"Anyway, thank you very much." Minister Lu thanked him again.

After hanging up the phone, Qin Lin got back into the truck, started the engine, and transported the things to Linlin villa.

On the other side, in the kitchen of a Western restaurant, a white foreigner was skillfully cooking some rice eels in a pot.

[Chapter 623 Boss Qin, It's Definitely An Effect You Can't Imagine](#)

Lasda was very serious, and every step was very careful.

All this time, he had challenged a Chinese chef to learn Chinese food. He had made a deal with the other party that as long as he won, the other party would teach him a Chinese dish that he was good at.

After defeating a few famous top Chinese chefs, he also learned some Chinese food.

The rice eel was one of them.

Moreover, he had been practicing this dish recently, because he would think of the fish ingredient he had eaten from time to time.

The meal he had at Linlin villa was also the most delicious food he had ever eaten.

Although he was already the number one three-star Michelin chef, had defeated some top Chinese chefs, and even his own country's people had been promoting him as the world's number one chef, he was still a chef. However, he knew very well that the world's number one was just a joke.

After he had learned how to cook the fish, he had been practicing hard so that he could make such a delicious dish.

After a while, the fish in the pot was finally ready. After it was taken out of the pot, he immediately picked up a piece of fish with his chopsticks and put it into his mouth.

To be honest, he wasn't very familiar with chopsticks yet, but after learning these Chinese dishes, he had no choice but to learn how to use chopsticks.

however, after learning chinese food and combining it with the western food he had learned, his cooking skills had improved a lot.

This also made him realize that he couldn't be like the idiots in his own country who thought that Western food was the best and was the world trend and looked down on Chinese food or other countries 'dishes.

Every country had its own food culture, and each had its own advantages.

He had just learned Chinese food, but it was already of great help to his cooking skills. He made up for his shortcomings.

He felt that this word was very good, even if it was difficult to learn.

But the moment the fish entered his mouth, lasda's face was filled with dejection."Far from it, far too far from it!"

Then, he felt a little vexed.

during his closed-door cultivation, his cooking skills had improved. those three star michelin chefs were not on the same level as him, but he still couldn't make that kind of delicious food.

They were both fish, but the fish he made with his heart and soul still felt like junk food compared to the one at Linlin Manor.

He couldn't go on like this. No matter how much he learned, he wouldn't be able to cook that kind of dish. Perhaps, perhaps, he had to go to Linlin villa to learn how to cook.

Although he was arrogant, he had a humble heart when it came to cooking.

At this moment, a white man in a suit walked in. "Rasta, is this a new dish you made?" he asked.

As he spoke, the white man grabbed a piece of the fish and put it in his mouth. It was obvious that he did not know how to use chopsticks.

Lasda shook his head. This was his Food Manager, Doug. He was the one who had contacted the other chefs about the competition.

Otherwise, he would not have the time.

As soon as the eel entered his mouth, Dao GE praised it with a smile, " lasda, your cooking has improved again. This Chinese dish is so delicious. You've widened the gap between the other three star Michelin Masters again.

Lasda wasn't very happy about this. He didn't care about the other three star Michelin Masters. The only one he respected was the one from Linlin villa.

" right, i've also helped you issue a challenge to a chef from a mountain villa, " doug added. " the chef seems to be very famous. a meal can be sold for more than 60000 dollars, which is more than 9000 dollars per meal. the other party even gave the meal a very famous name, the emperor's supreme set meal, which can be translated as the president's set meal. "

" ? ? ? "When lasda heard the description, he suddenly froze. He felt that something was wrong.

&Nbsp; " right, that villa is called Linlin villa, " Dao GE added. I've already booked a ticket for you. We're going to catch a plane later.

"what?"Lasda's eyes instantly widened.

Who did Doug say he was going to challenge?

Wasn't this destroying him?

[Chapter 624 This B * Stard Is Awesome! He's Admitting Defeat Before The God Of Cookery Competition?](#)

[1](#)

Doug thought that lasda didn't understand, so he explained, " the next stop is a place called Linlin Manor. It's the place where our Duke's Rose is. I'll go and see the Duke's Rose, and you'll go and fight with the other chef.

by the way, teach the other party's chef a good lesson. I'll promote it for you when the time comes. After all, the Duke rose incident has caused some resentment in the country. You'll be seen as a hero when the time comes.

"shit! Who asked you to help me challenge that chef from Linlin villa?" Hearing Doug's words, lasda grabbed his collar.

Did the other party know what that place was?

If this world was a Holy Land for cooking, then Linlin villa was one for him. To be able to make such delicious food was definitely the dream of all chefs.

He still wanted to go to Linlin villa to study, but that bastard Doug was trying to ruin him.

Doug looked at him in confusion."Rasta, why are you so excited? However, in the next battle, the opponent will still be your defeated 'person'. "

Before he could finish his sentence, lasda's fist rapidly grew in size before his eyes. Then, he felt a sharp pain. He couldn't help but cry out in pain.

"shit! I'm dead because of you." Lasda immediately left the kitchen while cursing.

...

Linlin Manor.

Qin Lin had just arrived at the office when he saw Lin Lanzi walking in.

She reported in shock, "boss, did you see the email I sent you on the villa management APP?" There's a three-star Michelin master who wants to challenge our villa's chef. I've checked his information and found that he's very famous. Some people even shouted that he's the God of Cookery in the Star-Spangled nation."

"? ? ?"Qin Lin immediately looked puzzled.

Why did Lin Lanzi's description sound like that lasda?

He logged into the mountain villa APP and saw Lin Lanzi's email. It was a letter of challenge.

He looked at the content. When he saw the name lasda, he was stunned.

It was really this guy.

The other party had left dejectedly the last time he came. Did he not learn his lesson? Or was it that the other party's cooking skills had really improved and could make a quality 3 dish?

However, it should be impossible.

The other party didn't have a system.

yes, I know. If they really dare to come, I'll just teach them a lesson. Qin Lin looked at the letter of challenge and smiled at Lin Lanzi.

If lasda was really looking for a beating, then don't blame him for being impolite. This time, he would make a complete fool of his opponent.

Didn't the people of the starfish Kingdom proclaim that he was the number one in the world and the God of Cooking? By then, it should have stopped.

At noon, Qin Lin went to Linlin's laboratory again after lunch.

Since Minister Lu had made a phone call to report the good news, he naturally had to put on a show and not remain indifferent.

When they arrived at Linlin's laboratory, professor Ren had already fallen asleep on the simple bed in the laboratory. However, his assistants were still busy with the examination and took turns to rest.

Minister Lu was so excited that he couldn't sleep.

Even though he had stayed up all night with professor Ren, he was still in high spirits.

Seeing that Qin Lin had arrived, he went up to him with a face full of surprise. "Mr. Qin, you're here. I have another piece of good news. Just now, professor Ren and his team discovered another drug besides the one used to treat colon cancer. This drug seems to be effective for gastrointestinal stromal tumors as well."

"Gastrointestinal stromal tumors are also a type of malignant tumor located between the gastrointestinal and digestive system. It's also a disease that is difficult to solve. The effect of this medicinal powder is more important than you think."

The more Minister Lu spoke, the more excited he became. He could even imagine the expressions of the higher-ups when he made his report.

This time, there should be no leaders who would doubt whether the body-increasing medicinal liquid was an exception.

Qin Lin looked at Minister Lu's excited face and played along. "Minister Lu, I didn't expect this elixir to have such a magical effect. I thought it could only cure some intestinal diseases."

"Yeah, I didn't expect that." Minister Lu was also full of emotion, and then he thanked again, "however, it's all thanks to boss Qin. Otherwise, this prescription would have been thrown into the trash can."

As they were chatting, Qin Lin's attention was suddenly drawn to the game on the screen in his mind. He was a little surprised because the tortoise that he had been watching for so long suddenly told him that he could harvest.

This turtle was also the one that he had grown and raised for the longest time.

Therefore, he didn't chat with Minister Lu for long before leaving Linlin laboratory.

Returning to his office in Linlin villa, he looked at the game in his mind's screen and controlled his character to harvest the bastard in the paddy field.

After he was done, he locked the office door and entered the game with a thought. He went to the storage room and saw those bastards.

The shells of these turtles were grayish-black in color, and the shells seemed to be formed by pieces of hexagonal diamonds, just like the eight trigrams.

Now, they were crawling in the pool of the storage room. Some of them were even stacked together, and each of them weighed more than ten pounds.

At a glance, the number of harvested in this paddy field was close to 30.

Moreover, in the pool next to it, there were two that had darker shells, longer tails, and stronger limbs. They were probably more than 20 pounds.

This surprised Qin Lin.

Because of the natural growth rate of the environment, artificial breeding would cause a tortoise to grow about 10 pounds in five years. A tortoise that weighed more than 20 pounds would take a long time to grow. It was impossible for ordinary artificial breeding to have such a weight.

[Chapter 625 This Bastard Is Awesome! He's Admitting Defeat Before The God Of Cookery Competition?](#)

[2](#)

However, the system's products were different. They had been raised in the same time, but two such big turtles had been born.

[turtle: Grade 1]

[this is a very nutritious animal. Its meat is also a common food for diet therapy and has many effects: Deliciousness +1, taste +1, rich nutrition +1, treatment of dizziness +1, treatment of night sweats +1, treatment of heat deficiency +1, nourishing yin and lowering fire +1, treatment of cardiovascular blockage +1, clearing blood flow and dispersing blood stasis +1, strengthening the kidney and building bones +1! [waist strengthening +1!]

Therefore, this turtle was very popular, and it was normal for many people to like eating it.

Not to mention the taste, texture, and other attributes, just the two attributes of nourishing the kidney, building the bones, and strengthening the waist were enough to make everyone want to pursue it.

He realized that many of the system's items liked to have such attributes.

This was simply too much!

To be honest, these things that were released in the past could be used to make a table of yang boosting and kidney nourishing meals.

Qin Lin then looked at the other two bigger turtles.

[turtle: Grade 2]

[this is a very nutritious animal. Its meat is also a common food for diet therapy and has many effects: Deliciousness +2, taste +2, rich nutrition +2, treatment of dizziness +2, treatment of night sweats +2, treatment of heat deficiency +2, nourishing yin and lowering fire +2, treatment of cardiovascular blockage +2, clearing blood flow and dispersing blood stasis +2, strengthening the kidney and building bones +2! Waist strengthening +2! Prevention and treatment of stomach cancer +1]

Quality 2 tortoise's remarks were the same as quality 1, but its attributes were all +2.

However, at the end of the attributes, it was a little different.

Qin Lin's eyes even showed surprise.

The attributes of nourishing the kidney, building bones, and strengthening the waist seemed to have become somewhat unattractive.

Prevention and treatment of stomach cancer +1!

This attribute was even better than the grade 2 yellow croaker's cancer prevention +2 attribute.

Although this attribute was only +1, and it was only for stomach cancer, other than prevention, the +1 suppression attribute was awesome.

Even if it was only stomach cancer, if the outside world knew about it, they would go crazy fighting for it.

"This thing actually has such an effect." Qin Lin had heard that tortoiseshell could cure cancer, but those who ate it had no effect.

Now, this Grade 2 turtle actually had this attribute.

the key was that a grade 1 turtle did not have this attribute.

Qin Lin had some speculations about the reason for this. It should be that it had to grow to a certain level to have such an attribute.

To a certain extent, suppression was equivalent to treatment. It could suppress stomach cancer. If there were treatment drugs, even if the effects of the drugs were not very good, it was possible to cure stomach cancer.

However, this was only his guess. Without any experiments, who knew if it would work?

but no matter what, this turtle was a good thing.

Qin Lin directly grabbed the two Grade 2 pets and put them into the bag that was previously prepared in the game storage room. He then took them out of the game with a thought.

He would have to rely on these two turtles to satisfy his appetite tonight.

after moving from the countryside to the county, he had not tried it again. he kind of missed the time when he was a child with a flashlight and his father catching wild turtles.

When they arrived at the villa, Qin Lin took the two turtles to the kitchen and handed them over to Master Lin for him to take care of them.

The two Grade 2 turtles were big enough to invite Minister Lu and professor Ren to their seats.

Master Lin was surprised to see the two huge turtles. "Boss, these two are almost 30 Jin. They must have been wild for decades, right? It's hard for even artificially cultivated ones to grow to this size."

qin lin just nodded and didn't explain.

It was hard to explain anyway.

He would let Master Lin misunderstand.

Master Lin didn't ask much. Anyway, he was already used to boss bringing all kinds of good things.

however, as a chef, being able to process such high-end ingredients was also a kind of enjoyment.

This kind of enjoyment was hard for ordinary people to understand.

After handing the two turtles to Master Lin, Qin Lin went back to his office. He looked at the game in Twilight in his mind again and controlled his character to go to the spring Mine to continue mining.

Previously, he was unlucky and didn't find anything good in two consecutive layers. Today, his luck should be turning around, right?

With that thought in mind, Qin Lin controlled his game character to start digging in the mine. Unfortunately, his luck didn't seem to improve. After digging two layers in a row, he didn't even find a bucket of spring water, except for a few pieces of jade and a few bags of special soil.

Qin Lin tried to control the game character to enter the 18th floor, but there was no resistance.

With this upgrade, it seemed like the spring Mine had opened up to more levels than before.

He continued digging.

After entering the 18th floor, his luck seemed to have improved. After digging a few more plots, he found a piece of Jade ore and a bag of special soil. Then, a notification appeared.

[congratulations on obtaining a special stone slab of mystery. It seems to contain some kind of cooking information. You can go to the town and find a passing gourmet to appraise it!]

"My luck has gotten better." Qin Lin immediately controlled his character to put the special slab of mystery into his bag.

Based on his previous experience, he didn't even need to appraise it to know that this mysterious stone slab was very likely going to give him another cooking skill.

However, he wasn't in a hurry. Instead, he continued to control his game character to dig.

Taking advantage of his good luck, he greedily wanted to dig up more good things. Unfortunately, he couldn't be too greedy. After digging for the rest of the 18th floor, there were no good things other than gold, silver, and copper.

When he was about to control his character to go to the 19th floor, the system prompt that restricted access appeared again.

[Chapter 626 This B * Stard Is Awesome! He's Admitting Defeat Before The God Of Cookery Competition?](#)
[3](#)

So, this time, the spring Mine field would stop.

fortunately, the harvest of the mysterious tablet of cooking was more or less a comfort.

Qin Lin controlled his character and left the spring Mine. He went straight to ore town to find the gourmet to solve the mystery slab.

The gourmet wasn't usually in the town. He would only appear in special circumstances. For example, the lost tablet of culinary type had been dug up and needed to be appraised, so the gourmet had appeared.

[you're the owner of the ranch. We meet again. What's that in your hand?] [it seems like you've found something good. Do you need me to help you identify it?]

Since the gourmet was so enthusiastic, Qin Lin naturally chose "yes."

A moment later, the gourmet's voice rang out again.

[congratulations, this mysterious stone slab has recorded unknown cooking knowledge. It has a deep meaning. Can I exchange it with a shell-type cooking skill experience book?]

Qin Lin saw the 'yes' and 'no' notifications and decisively chose 'yes'.

he was still a little surprised. although he knew that this mysterious cooking slate was definitely related to cooking, it was really a coincidence that a shell-type cooking skill experience book had appeared.

Crustacean-type culinary skills went without saying. It was based on ingredients with shells such as lobsters and crabs. Naturally, turtles should also be considered crustacean-type and reptilian-type.

So, wasn't this a coincidence?

Moreover, turtles were suitable for food therapy. Therefore, with the addition of quality 2, medicinal recipe, and cooking skills, his food storage had increased again.

qin lin controlled the game character to go back to the farm and entered the game.

[this is a special cooking skill book. After using it, you can obtain cooking skills and experience for shell-type ingredients. You can make all kinds of shell-type ingredients. Texture +1, deliciousness +1, appetite +1, fragrance +1, aftertaste +1!]

The skill's attributes were the same as the previous skills for egg-fried rice and fish.

Qin Lin chose to use a shell-type cooking skill book.

That mysterious feeling appeared again, and after a moment, he mastered the shell-type cooking skill.

in the evening, qin lin went straight to the kitchen.

Today, he had suddenly obtained shell-type cooking skills. Naturally, he wanted to personally make medicinal meals out of the two Grade 2 turtles. He wanted to taste the deliciousness of the two grade turtles, the medicinal recipe, and shell-type cooking skills.

At the same time, he also invited Li Kai, Shen Li, director Lu, director Hao, professor Ren, his assistants, and a few athletes from Linlin's laboratory.

After the two turtles, which weighed nearly 15 kilograms, were made into a medicinal cuisine, together with the senior management of the villa, it was enough for everyone to have a taste.

However, professor Ren was obsessed with the intestinal energy-returning powder. He wanted to confirm the effect of the medicine on gastrointestinal stromal tumors as soon as possible.

Minister Lu was also waiting for the results, so he politely declined the invitation. He could only say that he did not have the Fortune to eat.

Director Yan also declined politely. The diet of athletes was controlled, especially the one who was using the body strengthening drug to exercise to the limit. He forbade them from eating. Therefore, he accompanied a few athletes and did not come.

Li Kai and Shen Li, on the other hand, received the invitation and immediately went to Linlin villa. They knew about Qin Lin's culinary skills, and they would be letting themselves down if they didn't enjoy the food.

Qin Lin entered the kitchen and saw that Master Lin was already washing a pot of turtle meat. He asked, "Everything's settled?"

"boss, are you going to do it yourself?" master lin nodded.

"En!" "My hands were itchy all of a sudden, so I came to the kitchen," Qin Lin nodded with a smile.

haha, that's great. We'll have a good meal again. I'll help the boss. Master Lin handed the washed turtle meat to Qin Lin with a smile on his face.

This once again attracted the attention of the chefs in the kitchen. Everyone knew that the boss was a master chef. Every time the boss cooked, his skills were so skillful that it made people exclaim.

To be honest, it was quite a blow for them, chefs who spent most of their time in the kitchen, to not have as good a cooking skill as their boss.

However, he had to admit that chefs were still very happy to work for such bosses.

After Qin Lin took the turtle meat, he went to the stove where the medicinal herbs were placed before. Then, he took out the pot and began to boil the medicinal soup.

At the same time, just like last time, he used the crustacean-type cooking skill he had just obtained to fry the turtle meat.

This way, the stir-frying would give the turtle meat a kind of frying fragrance when making medicinal meals. It would also give the turtle a shell-type cooking skill: Texture +1, deliciousness +1, appetite +1, fragrance +1, aftertaste +1! Attributes.

at that time, with the special attribute of the secret recipe, it would be deliciousness +3, texture +3, special taste +1, special taste +1, and special medicinal fragrance +1.

Due to the skill of crustacean-type cooking and the muscle memory of medicinal cuisines, Qin Lin's cooking was as smooth as floating clouds and flowing water. He was like a veteran chef who had been working for decades.

Master Lin said that he was an assistant, but he was actually just watching from the side and couldn't help at all.

When the herbal soup was almost ready, Qin Lin took a few special boiling pots that Master Lin had prepared for the tortoiseshell and lit the fire at the same time. Then, he poured the fried tortoiseshell meat and the herbal soup into several boiling pots. Finally, he sealed the pot and began to boil it.

Not long after, the fragrance of the medicinal cuisine wafted through the air.

Qin ran felt that it was time, so she opened one of the pots, and the medicinal fragrance that drifted out became stronger.

Master Lin had already handed him a small bowl. At the same time, he was also holding a small bowl in his hand.

Qin Lin smiled. He took a small bowl and scooped out a small bowl of soup and turtle meat from the pot, then tasted it.

As soon as it entered his mouth, a delicious and medicinal fragrance spread. With just one bite, he was sure that he had reached the attributes he had expected.

Master Lin also got a bowl for himself and tasted it. After a while, he praised while eating, " "It's really so delicious again. Boss, your cooking skills are really too shocking. The same ingredients, but every time you cook, it's even more delicious. It makes me feel like I've been a chef for decades in vain."

Qin Lin smiled. After finishing a small bowl, he ordered, " "Get everyone to move out!"

Master Lin also immediately ordered a few apprentices to come and move the things and followed Qin Lin out of the kitchen.

In the restaurant, Chen dabe, Gao Yaoyao, and the other higher-ups had already arrived when they heard that the boss was giving them an extra meal.

Zhao mochen and Lin Fen were also waiting.

Li Kai and Shen Li, who had come from Linlin's laboratory, were also there.

When the boiling pots were brought out and opened, a rich medicinal fragrance spread out. Everyone felt their appetites greatly stimulated, full of appetite.

Qin Lin sat down and was about to let everyone start eating when he suddenly saw Lin Lanzi walk in with two foreigners.

Seeing the two foreigners, Qin Lin froze for a moment. One of them was lasda.

Lin Lanzi walked to Qin Lin with a frown. boss, that's lasda, the one who challenged the mountain to a cooking competition with the villa's chef.

Qin Lin also looked at lasda.

He really didn't expect this guy to really come.

then don't blame him for being impolite.

Lasda could smell the medicinal aroma the moment he entered. As a chef of his level, he immediately determined that this was definitely a delicacy. His eyes couldn't help but shine.

Behind Rasta was Doug, who was staring at him with red and swollen eyes.

When Doug entered, he looked like a tiger eyeing its prey.

Although he had been punched by lasda for no reason, and lasda had ignored him the whole way, it was still a good thing that lasda could come to Linlin Manor to challenge him to a cooking competition.

Because of the incident with Duke rose, the people of constellation had a grudge against Linlin Manor. As long as lasda won in a cooking competition, he would definitely cause a sensation in constellation, and his influence would rise to a higher level.

Doug was about to step forward and help lasda express his challenge. After all, lasda was already known as the God of Cookery in the Star-Spangled Kingdom. His challenge would naturally be the same as before. He would be in charge of it, and the judges and reporters would be invited. Only then would it be enough to cause a stir.

However, lasda was one step ahead. He hurriedly walked past Doug and went straight to Qin Lin. Then, in front of everyone, he gave Qin Lin a deep bow and said with sincerity, I'm very sorry. I didn't send the letter of challenge. Please forgive me!

qin lin was still thinking about how to deal with this guy, but the other party's sudden move made him unable to do anything.

Dao GE was also instantly dumbfounded, not daring to believe the scene in front of him.

What happened to the duel? it hasn't even started yet, so why is the master chef apologizing?

Furthermore, what was going on?

Doug opened his mouth, but for a moment, everything he wanted to say was stuck in his throat.

[Chapter 627 The Magical Oriental Delicacies! The Manor Is About To Open! 1](#)

"Rasta!" Doug called out subconsciously when he came back to his senses.

Lasda immediately explained to Qin Lin, Sir, that challenge was sent by my manager. I didn't give any instructions. After all, I'm not stupid enough to come here and challenge you. Please accept my sincere apology again.

With that, lasda bowed again, his attitude proper.

Without waiting for Qin Lin to speak, he immediately expressed his position again, "To express my apology, I'm willing to work for you at the Linlin Manor Restaurant for free for two years."

"what?" dao ge was shocked.

He knew how much money lasda could make in a year with his current reputation. He also knew that his father had a large corporation waiting for him to inherit.

This kind of person actually said that he wanted to work for free for two years?

He would definitely go crazy.

Lin Lanzi was also surprised.

She had done some research on lasda and knew that his cooking skills were the best among the ten three-star Michelin chefs.

If this kind of person could become a chef in Linlin villa, it would cause a sensation and definitely be another eye-catching publicity point.

Her occupational habit was acting up again. After she became the media department manager, she would think about the promotion of the villa from time to time.

Naturally, lasda had his own goals.

He wanted to learn the other party's Chinese cooking.

However, after competing with those top Chinese chefs, he also knew that these top Chinese chefs would not be willing to teach their best dishes.

in the beginning, he didn't want to compete with those top chinese chefs.

He just wanted to learn Chinese food from them.

He felt that Western food had reached a bottleneck. It could be said that the system and cooking method of Western food could not allow him to make such delicious dishes.

Therefore, he had the idea of learning Chinese food.

However, those chefs were not willing to teach him, so he could only use the method of competition. If the other party lost, they would teach him a dish.

Those chefs were all very confident, but they all lost to him.

Therefore, he knew that if he were to ask the gentleman in front of him to learn Chinese food, the other party would definitely not be willing to teach him.

However, he definitely couldn't beat his opponent in a fight, nor could he beat his opponent and get him to teach him a dish.

That was why he paid a high price and stayed by working for free.

in these two years, as long as he had the opportunity to observe her cooking, he believed that he would be able to learn her cooking skills.

If two years didn't work, he would try another two years.

He was persistent in his pursuit of cooking.

Clearly, lasda had a good idea. Unfortunately, he didn't know that the skill he was trying to learn was a cheater. Without something called the system, it was impossible to learn.

"Please give me a chance to apologize. I'll work hard for the next two years." lasda said seriously and sincerely.

This made Qin Lin feel embarrassed.

No matter what, the other party was still the best Chef in Western food. How could he work for him for free?

But was he the kind of person who needed people to work for free?

The salary of a chef was still affordable.

we'll talk about this later. Since you've come from afar, you're also a guest. I'll treat you to a medicinal meal. Qin Lin didn't immediately agree.

He might have guessed that the other party wanted to secretly learn his cooking skills.

wasn't this how the plot of a movie was supposed to be?

But he didn't have any cooking skills, he had to rely on the system.

It would be a wonder if the other party could learn it.

However, he also had his own thoughts. It was a good time to let the other party try this turtle's medicinal cuisine and know the difference.

He was the best Chef in the West. If he could work for his villa, he could add some style to the villa. The key was that he had the opportunity to trick him into teaching disciples.

In this case, the standard of his Linlin villa's chefs should also be raised to a higher level.

To be honest, the skills of Linlin villa's chefs were still far from those of the top restaurants. Most of the chefs used to work in small places like you city.

Master Lin's cooking skills were already not bad, but he had never been a head chef in a top restaurant.

When ordinary tourists ordered, most of the ingredients were not from the system. To be honest, the dishes were a little unsatisfactory and could not keep up with the reputation of Linlin villa.

moreover, linlin villa was becoming more and more famous. the diversity of service in the restaurant was also important. in addition to chinese food, it was also possible to add some top-notch western food as a supplementary menu.

After all, after becoming a 4A scenic spot, Linlin villa could now enter the recommendation website for foreign guests. Foreign tourists could see the information about Linlin villa on the recommendation website, and more and more foreign tourists came to visit.

"Thank you for your forgiveness." Lasda immediately said after hearing Qin Lin's words. Although Qin Lin didn't agree to let him stay as a chef, the challenge was over.

Only Doug had a bitter expression on his face. How were they going to promote this situation? The people in the country had a grudge against Linlin Manor because of Duke Wang rose.

And now, lasda, who was known as the God of Cookery in the country, was actually going to work for Linlin Manor for free. If this news were to spread, the resentment of the people in the country would be even deeper.

"all right, have a taste of the herbal dish i just tried," qin lin said to the others.

How could Li Kai and the others still be polite? affected by the +1 appetite attribute, they were already hungry after smelling the medicinal fragrance.

therefore, when they heard qin lin's words, they couldn't wait to start eating.

master lin also showed the magnanimity of a nation of etiquette, as he personally took a bowl and a pair of chopsticks for lasda and dao ge.

[Chapter 628 The Magical Oriental Delicacies! The Manor Is About To Open! 2](#)

Lasda had long since smelled the medicinal fragrance and knew that this was definitely a delicacy. He didn't stand on ceremony and poured a bowl of turtle medicinal cuisine from a pot, then eagerly tried it.

However, after taking a sip, his face instantly turned dejected.

This was because this dish was even more delicious than the last one he had eaten. The special taste and medicinal fragrance didn't affect the taste of the food at all. Instead, it made the food even more delicious.

How did the other party do it?

He had thought that after he had a breakthrough in his culinary skills and won over all the other three star Michelin chefs, the gap between their culinary skills would narrow a little.

Now, he suddenly realized that it didn't seem to have shrunk. Moreover, the other party didn't seem to have shown his true ability last time.

He suddenly received a blow.

&Nbsp; Doug awkwardly held the bowl in his hand, unable to react to everything that was happening.

Lasda looked at him and sighed deeply. "Dao GE, you'll know how stupid you were after eating this bowl of medicinal cuisine."

Doug could only pour a bowl of turtle medicinal cuisine into a pot and eat it.

A moment later, he opened his mouth in a daze and exclaimed, " "Oh my God, this taste is so sweet!"

He finally understood what Lasda meant.

it was simply unbelievable.

How could there be such delicious food in this world?

that texture, that deliciousness, even after a mouthful, there was still a strong aftertaste in his mouth.

Even Lasda, the number one chef in Western food, couldn't make something as delicious as this.

No!

Lasda simply couldn't do it.

&Nbsp; Doug quickly picked up the herbal dish in his bowl and quickly finished it. He didn't even care about manners and got himself another bowl.

Heavens!

This Eastern country actually had such a magical delicacy.

Qin Lin and Li Kai didn't pay any more attention to the two foreigners and also began to eat their herbal cuisines.

Even Qin Lin himself ate it with great relish.

...

The next day.

After Qin Lin delivered the goods to the villa, he returned to his office. Not long after, that Lasda was brought over by Lin Lanzi early in the morning.

Lin Lanzi reported, " boss, this Mr. Lasda came to the villa early in the morning. He said he wanted to see you. I can't do anything to him.

"Sir, please accept my apology and let me work for you for free for two years!" Lasda once again brought up this matter when he saw Qin Lin.

After eating the delicious food yesterday, he was even more determined to stay.

This was the only place where he could make a breakthrough in his cooking skills.

Therefore, he had sent Doug away last night and then came to Linlin villa early in the morning.

Qin Lin looked at lasda with a smile that was not a smile. lasda, our country doesn't allow the exploitation of labor. So, I won't let you work for free at Linlin Manor.

Lasda's face turned ugly.

Was he being rejected?

However, if he was rejected, how could he stay and learn cooking?

"However, our villa's restaurant would like to hire a head chef!" Qin Lin said.

When lasda heard this, he asked anxiously, " "Can I apply for the job?"

However, Qin Lin said, " the head chef of our villa restaurant also has requirements. In addition to being responsible for the daily affairs of The Villa Restaurant's kitchen, he also needs to be responsible for the training of the chef, apprentices, and disciples. I also check the cooking skills of the chef and apprentices regularly. If they don't meet the requirements, we will ask the head chef to leave.

"I can do this." Without hesitating, lasda hurriedly said, I can train chefs, and I can also teach disciples. I'm very good at this kind of business.

Qin Lin looked at lasda's eager expression and a smile appeared at the corner of his mouth. It didn't matter if he was trying to secretly learn cooking or not. He was quite persistent in cooking. If he didn't make good use of it to improve the overall standard of The Villa Restaurant, he would be letting him down.

"Alright, I'll give you a chance! Come with me to the kitchen to make a dish first, it'll be a test of your cooking skills." Qin Lin said with a smile.

He naturally wanted to see what kind of food the other party could make with the ingredients produced by the game.

Lasda's eyes lit up when he heard Qin Lin's words. His sincerity had finally been exchanged for an opportunity.

Qin Lin didn't waste any more time. He brought lasda to the kitchen.

Lin Lanzi also followed him curiously. If this number one chef in the West became the head chef in the villa, it would definitely cause a sensation.

When Master Lin saw Qin Lin bring lasda into the kitchen, he asked Qin Lin in confusion, "Boss, you're not really going to keep him, are you?"

Master Lin, "Qin Lin said with a smile, "take out some fish for the Emperor supreme set meal and let him cook a meal first. We'll talk about the rest later.

Master Lin nodded at the order. He went to the storage and took out a piece of wild fish of quality 2 and put it on the chopping board.

"Let's use this piece of fish to make a dish. Let's see how good you are at cooking," Qin Lin said to lasda.

"Yes, sir." Lasda nodded and walked over to the cutting board. He picked up a knife and began to work on it. Then, he said in surprise, Oh my God, the quality of this fish is incredible!

As a Top Chef, he was very good at identifying ingredients.

Lasda could immediately tell that this fish was a top-grade ingredient. Furthermore, the quality of this fish was definitely better than the ones he had made in the past.

Fish meat of this level was definitely very rare.

even lasda's expression became more pious. after all, the more top-tier a chef was, the more stringent their pursuit of ingredients would be.

[Chapter 629 The Magical Oriental Delicacies! The Manor Is About To Open! 3](#)

Even a chef of his level could not handle this kind of ingredient often.

He had never thought that he would be given fish of this level when he was asked to try cooking a dish.

However, this kind of ingredient could better display his cooking skills.

Qin Lin nodded.

Although this lasda man was arrogant and gave a very bad impression when they first met, his cooking skills were really good.

it was obvious that he knew the quality of the fish meat easily.

A moment later, lasda was also done processing the fish. He then began to make braised fish.

This braised fish was also learned from a top Chinese chef he had defeated, and he had already made it better than that chef.

Not long after.

Lasda picked up a piece of fish with his unfamiliar chopsticks and put it in his mouth. He tasted it, and his eyes brightened.

It was because this fish was much more delicious than the ones he had made before. It could be said that with his cooking skills, whether it was Chinese or Western, he had never made such delicious fish before.

the quality of the fish meat was indeed amazing.

Lasda quickly placed a plate of braised fish in front of Qin Lin. "Sir, please have a taste."

"Let's try it together," Qin Lin said to Master Lin.

Master Lin nodded and picked up a pair of chopsticks. He and Qin Lin picked up the fish and tried it.

After a mouthful of fish, he couldn't help but sigh. "Boss, his food is better than mine. It seems that he lives up to his reputation."

After Qin Lin took a bite, he naturally realized that the fish was more delicious than Master Lin's.

lasda's fish was of the same quality, but it tasted better. this was the difference between their cooking skills.

&Nbsp; however, lasda's fish was still far from the quality 3 dish he made.

In other words, the fish that lasda made was still at a quality 2, but it was much more delicious than the one master Lin made.

This also showed how difficult it was to make a quality 3 delicacy.

After all, even a world-class chef like lasda couldn't make a quality 3 dish with the help of a quality 2 wild fish, let alone other chefs.

"How is it, Sir?" asked lasda anxiously. Is my fish good? Can I stay and be the head chef of the restaurant?"

Mr. Rasta, you've passed. However, you'll have to sign a contract with us first. Qin Lin said, then turned to Lin Lanzi beside him and instructed, "Manager Lin, please take Mr. Lasda to the HR department to sign the contract."

"Okay, boss!" Lin Lanzi nodded, then invited lasda. "Mr. Rasta, please!"

Lasda didn't hesitate at all. He followed Lin Lanzi with a face full of joy.

as long as he signed the contract, he would be able to stay.

He would definitely have the chance to steal her cooking skills.

If two years didn't work, then four years. If four years didn't work, then six years. If six years still didn't work, then he would go back and inherit his father's family business. If he couldn't make that kind of delicious food in six years, he didn't want to be a chef anymore.

"Boss, are you really going to keep him as the restaurant's head chef?" Master Lin asked hurriedly after lasda left. Naturally, he wanted to ask what he was going to do as a head chef if lasda was already a head chef.

Qin Lin smiled and said, "Master Lin, isn't the manor about to be opened?" Those are all high-end customers, and I don't feel at ease letting someone else take care of it. I want you to take care of the kitchen there."

of course. You'll have to manage this villa restaurant as well. I let lasda be the head chef because I want him to teach his disciples and train the villa's chefs to improve the overall cooking skills of the

restaurant. You'll be the head chef in the future, so you'll have to supervise him from time to time and observe the chef's cooking skills.

Master Lin was happy to hear that. He smiled and promised, " "Don't worry, boss. I'll definitely supervise him well and make him teach his disciples well. He can't be lazy."

he was happy to do this.

Qin Lin smiled. He quietly brought the plate of fish lasda made back to the office, locked the door, and entered the game.

[braised fish: grade 2]

[this is a braised fish made by a Top Chef: Deliciousness +2 cream, taste +2, rich nutrition + delicious]

After seeing the attributes, Qin Lin knew why lasda's fish was more delicious than Master Lin's.

Lasda's deliciousness attribute was 2.

The +2 attribute had an additional "" sign.

With lasda's cooking skills, he knew that this was probably the limit of a normal person's cooking. Unless one had a system like him, it would be very difficult to make A +3 grade dish.

qin lin exited the game and sat in front of the computer. he logged into the management APP of the villa to check the information and situation of linlin manor.

In the past few days, Zhao moyin had been looking for people from all over the villa to serve the manor.

As the manor required absolute high-end service, those who could enter the manor to work, even if they were basic waitresses, would automatically be promoted by one rank, comparable to a Foreman, and the salary would be higher than the average position.

Therefore, there were still many employees applying for the manor position.

[Chapter 630 Linlin Manor's Threshold Is Frighteningly High!](#)

It was now September.

the university had also reopened.

Chen Xue and her roommates had arrived at class early in the morning.

Many of her classmates had arrived and were greeting her warmly.

She was obviously very popular in the class.

After all, during the summer vacation, these students wanted to go to Linlin villa and Linlin Ranch, but they couldn't book nuptial rooms and tents at all. It was even difficult to book a hotel in you city. They all stayed at her house, and she received them and accompanied them throughout the whole trip.

She couldn't be more familiar with Linlin villa now, and she was even thinking about whether she could go to Linlin villa for her internship next year.

Moreover, this idea was becoming more and more firm. Her Linlin villa, like Linlin food company, opened an internship for you City University students.

Chen Xue sat down and took out her phone to check the official account of Linlin villa. This was also her daily routine.

After all, as someone from you city, many people he knew would ask him questions about you city.

As soon as he opened the video, he saw that the official account of Linlin villa had posted a new announcement video:

our Linlin Manor restaurant's normal menu service has been upgraded. We've hired a new head chef, lasda Bingying.

At first, Chen Xue was a little confused when she saw the video. Why did Linlin villa have to release a video just to hire a head chef?

He was just a head chef.

Did the person in charge of Linlin villa's publicity not have anything else to give out?

However, when she finished watching the video, especially when she saw the comments section, she realized that this lasda was not as simple as he seemed.

"At first, I thought we were just recruiting a head chef!"

I did a special search. This lasda has a very high status in the West. He's the most amazing three star Michelin chef. Even the people of the xingtiao nation have called him the God of Cooking.

Linlin villa is awesome. The best Chef of Western food is the head chef. Lasda is the heir of a big foreign corporation.

“...”

When Chen Xue saw these comments, she curiously went to check on lasda's information. Then, she was also shocked.

It was unbelievable that such a person would be the head chef of a restaurant in Linlin Manor.

on the internet, there were many people who were as shocked as chen xue.

Linlin Manor had said that they had invited lasda to upgrade their normal menu, which meant that all the normal dishes in Linlin Manor's restaurant would be made by the best three star Michelin chef?

This was awesome.

Lin Lanzi had achieved her goal.

With the popularity gained, they also promoted the restaurant in the villa.

At this moment.

In Linlin Manor.

Lasda had already followed Master Lin into the kitchen. He was wearing the special chef's uniform of Linlin villa, and his face was full of excitement.

He finally stayed.

The chefs in the kitchen naturally turned to look at lasda.

Naturally, they had all heard the news and were even more curious about the number one chef in the West.

Master Lin also clapped his hands to get everyone to look over. Then he said, " as everyone knows, Mr. Lasda will be the head chef of the kitchen from today onwards. He will also train and teach you cooking. Everyone, please cooperate with him.

"Master Lin, what about you?" A chef asked hurriedly. They were all brought out by Master Lin and what they were most concerned about was naturally whether Master Lin would stay or leave. They couldn't let a foreigner take Master Lin's place.

Master Lin smiled and said, " the boss has promoted me to head chef. In the future, I will be in charge of the kitchen at the manor. Naturally, I will also be in charge of this side. I will come over from time to time to supervise and test your cooking skills. Don't be lazy. Learn cooking from Mr. Lasda. This is an opportunity that the boss has created for you.

The chef heaved a sigh of relief when he heard that.

It was good that Master Lin had been promoted. As for lasda becoming the head chef, he naturally had no objections. After all, his cooking skills were excellent.

Mr. Rasta, let's go to the vault. I'll give you the key to the vault later. Master Lin then led lasda to the storage.

Lasda nodded and obediently followed Master Lin to the storage. Master Lin opened the little storage and found that it was filled with quality 2 ingredients.

Qin Lin would now prepare some quality 2 ingredients in the kitchen regularly so that he would not go into the game to get them when he needed them.

Lasda looked over and saw okra, Chinese yam, fish meat, and other fish. There were also fish and wild fish in the pond.

He was puzzled. These ingredients didn't seem to be as good as the ones around him. At least, there were ingredients like abalone over there. Weren't they better than the Chinese yam?

Mr. Lasda, " Master Lin explained, " these are all ingredients for high-end dishes. The quality is the same as the fish I made for you yesterday.

"What?" hearing this, lasda's puzzled expression turned into shock. he subconsciously moved forward to check.

What kind of joke was that? he was very clear about the quality of the fish meat he had eaten yesterday.

The fish brought out his cooking skills perfectly, and the fish he made was more delicious than ever.

Now, he was actually telling him what quality these ingredients were?

It must be known that even if he wanted to taste ingredients of that quality, or even if they were one grade lower, it was not easy for a chef like him to have them.

But as he checked, the expression on lasda's face became more and more incredulous.

He had never seen the quality of these ingredients before, especially the fish meat. It was the same as the one from yesterday. Looking at the gap, it was obviously the same fish.

What surprised him the most was the lobsters and crabs.
