

The Game 631

[Chapter 631 Linlin Manor's Threshold Is Frighteningly High](#)

Their specialty in Western food was this kind of large lobster and sea crab.

Judging from the size and the color, they were definitely the best lobsters and sea crabs. They were also super ingredients that even a Top Chef like him could barely handle a few times a year.

Those world-class restaurants might be able to provide some of these world-class ingredients, but they definitely couldn't provide so many at once.

Now, this Linlin Manor had actually taken out so many at once. It was too amazing.

&Nbsp; Master Lin said, " it's hard to use up all these ingredients. They're usually used to make food for the boss and the boss's wife every day. The boss will add in a new batch every few days.

“ ? ? ? ” When lasda heard this, he was completely stunned. He asked, " "Are you saying that you'll cook this ingredient every day? You have it every day?"

He couldn't hold it in anymore.

He was very clear on how rare this grade of ingredient was.

Now, he was told that this ingredient was available every day, and the boss still wanted to eat it every day?

The world's richest man, a certain ruler, or a certain tribal chief would all cry if they heard this! They couldn't build it like that because they couldn't buy it even if they had money.

now, it was as if there were many of these top-notch ingredients.

Lasda suddenly realized that as a chef, even if he couldn't secretly learn cooking skills here, it didn't seem like a bad thing.

For some reason, lasda's attitude began to change.

while master lin was taking lasda to the kitchen, qin lin was in zhao moyin's office looking for tang xiuwan.

"Boss, what do you need me for?" Tang xiuwan asked as soon as she entered the room.

Zhao Mo smiled and asked Tang xiuwan to sit down, " sister xiuwan, I called you here because I have something to discuss with you. You know that our Manor is about to be opened, so we wanted to ask if you would like to stay in the treatment room or go to the manor.

Linlin Manor was a high-end recuperation Manor, so there were naturally a few treatment rooms.

In addition to the medical equipment that had already been purchased, the treatment room also needed a doctor. In addition to the daily physical examination of the patient, the medical skills required were also different from that of the treatment room in the villa.

the treatment room usually didn't encounter any serious illnesses, and they couldn't use any medical equipment.

However, it was different in a sanatorium. Sometimes, a doctor's duties were the same as that of a hospital doctor. The only difference was that the hospital doctors faced the public, while the doctors in the sanatorium only faced patients who were recuperating.

Tang xiuwan's medical skills had been excellent before she came to Linlin villa, and she could have been the department head. So, she was the person-in-charge of the manor's treatment room.

Of course, that would depend on Tang xiuwan's own wishes.

"I'll go to the manor." Tang xiuwan said decisively.

She was a doctor and had studied medicine for so many years. She naturally did not want her studies to be in vain.

In the treatment room of the villa, her medical skills were really useless.

Things were different at the manor. At the very least, medical skills were required to examine the customers' bodies, operate various instruments, and even perform emergency rescue and formulate treatment plans.

Wasn't there a saying that aside from hospitals, the best places for doctors to go were the famous nursing homes?

okay. Sister xiuwan, please recommend any of the two doctors who are suitable to be in charge of the treatment room at the villa. Zhao Mo smiled and nodded.

The manor was the best choice for Tang xiuwan. She and Qin Lin needed someone they could trust.

Of course, other than Tang xiuwan, they would need to hire another highly skilled doctor. At least two doctors would be able to save him at a critical moment.

After Tang xiuwan left the office, Qin Lin and Zhao mochen discussed the other matters of the manor, especially the staff that would be transferred to the manor.

The other two also confirmed the manor's fees.

If the manor wanted to take the top high-end treatment Manor project, the fees would naturally not be low. The entry fee was three million.

That's right, there was a threshold fee for his treatment Manor.

This meant that if one wanted to stay, they would have to top up 3 million Yuan in one go before they were qualified.

Anyone who had watched the TV series " only thirty " would know that this was also an unspoken rule of the top sanatorium. The two-million-dollar threshold sanatorium that appeared in the TV series was the 'home of firmament Supreme' sanatorium in real life.

It could be said that the entry fee for such a top-notch sanatorium was two million.

His Manor was 3 million, 1 million more than these top-tier ones. Moreover, this was only the entrance fee. After entering the manor, 500 thousand Yuan would be deducted every month.

In addition to clothing, food, accommodation, transportation, physical examinations, various expenses, and basic medicinal meals, there was also the emperor's supreme set meal, a bottle of Linlin medicinal wine, and special high-grade medicinal meals.

Of course, if you wanted to add the Emperor supreme set meal and Linlin medicinal wine, you would have to pay extra and limit the amount. Even if you had money, you couldn't use them without limit.

There were a lot of details about the services and expenses.

In fact, most of the preparations for the manor had already been completed. Now, they just had to wait for the procedures to be completed before they could open for business.

A Manor with healing properties also required the application of a sanatorium.

Their procedures had been handed over to the Department in Ming city for some time, and they were just waiting for approval.

Moreover, the procedure didn't take long. It was completed after a week.

After all, the Li family and the Wei family of Ming city were eager to have an opportunity to express their goodwill. Naturally, no one would block this procedure. They would even let the procedure pass as quickly as possible.

[Chapter 632 Linlin Manor's Threshold Is Frighteningly High!](#)

Therefore, a week later, Linlin Manor was officially opened. At the same time, the official account of the manor on mouyin also released an opening announcement.

This announcement video shocked everyone.

...

Min province.

In a hotel, eternal's legs were a little weak as he lay on the sofa and looked at the young lady who had just finished washing up and was dressed a little skimpily.

"Handsome, thank you for your concern!" A young lady waved her hand in greeting.

"Next time, just WeChat!" The other man shook his phone.

After the two ladies left, eternal took out his phone and sent a WeChat message to Wang Yan. "Old classmate, thank you for the arrangement."

"Good! I'll arrange for it next time." Wang Yan replied.

Eternal smiled.

I won't need it next time. I'll add her on WeChat.

To be honest, he was a little addicted to being arranged by Wang Yan once, but he had no connections and couldn't find this kind of service anywhere else, so he could only come to min province to find Wang Yan again.

Now that he had added the young lady on WeChat, it would be easier for him to contact her if he wanted to come to min province again next time.

He had already thought it through. Now that he had added two, he would only ask one of them out next time and ask her to bring one over. The next time he asked the other person out, he would also ask the other person to bring one over.

If he added her on WeChat, that would be four.

If he repeated this, he could add many more.

After resting for a while, eternal's legs finally stopped shaking. He picked up his phone and scrolled through beeping.

Because she had followed Linlin villa, she saw a video of Linlin villa after a few comments.

Moreover, the video had shocked him.

I have good news for everyone. Linlin Manor is officially open to the public, and we've already opened the application page. Our Manor is a form of recuperation. Please enjoy the overall environment of the manor.

As the video played, eternal saw an ultra-clear image taken by a drone.

It was a very vast Manor. At a glance, one could see a three-story villa in the center of the manor that looked like a super Castle.

however, compared to the surrounding scenery, the villa did not seem to be much.

The circle of flower walls, the isolated green bamboo, the grass in the sports field, the flowers in the flower bed, the various flowers and trees in the park, every single one of them could instantly attract people's attention.

In the video, these flowers and plants were like a beautiful piece of art. It was unbelievable.

apart from the quality 1 flower wall, the rest were carefully selected and planted by qin lin in the game. he even specially selected quality 2 finished products and transplanted them to the villa. every house, every tree, every bamboo, and every flower had the attribute of +2 in the mirror.

when they intertwined, it was like a battle of beauty, beautiful beyond words.

Individually, they might not be as shocking as the quality 2 patch of Dogtooth grass from Linlin Ranch, but when put together, they were more colorful and better.

Under the intertwining mirror-like attributes, the feeling was indescribable, as if he was in a Fairyland.

When eternal saw the video, he subconsciously had the urge to stay in the manor for a few days. He did not know how much he would charge, but it did not matter. With his monthly income of 100000, he could definitely afford to stay there, right?

However, as the video played, eternal was dumbfounded, especially when the charging information appeared at the end of the video.

so far, Linlin Manor has only opened up to five treatment spots. Each spot needs to pay a qualification fee of 3 million first, and spending 500000 a month is the basic qualification, Linlin Manor.

Qin Lin didn't expect to make much money from Linlin Manor. His main goal was to gain fame and let people know that there was such a top-notch place and that Linlin Manor had such a function.

Therefore, he was only accepting five guests at the moment. He would adjust the quota for more later.

However, the price of the service almost made eternal lose his grip on his phone, and he almost dropped it.

His confidence was directly hit.

just now, he thought that he could afford to play with his 100000 yuan a month, but who knew that he didn't even have the qualifications? moreover, 500000 yuan a month was his five months of hard work. it was not something he could spend at all.

Linlin Manor's announcement naturally caused a sensation on the internet at the fastest speed.

Whether it was the 3 million threshold fee or the 500000 monthly consumption, they were too shocking. It was not a place that ordinary people could go to.

Previously, some people had said that Linlin villa was very famous, but it did not have high-end spending and seemed very LOW.

Now that the high-end consumer items of Linlin Manor had been introduced, and they were too high-end, where were those people who said that Linlin Manor had no high-end consumption and was very low?

Naturally, some people were shocked by the price, while others moved as fast as they could.

Linlin Manor.

Qin Lin's office entered Zhao mochen's office and said to Zhao mochen, who was looking at his computer intently, out of the manor's five spots, we have to reserve three. Old Chen, old Ma, and old Li all called to reserve a spot for their wives. They're pregnant, so they're here to recuperate.

"Mm! the three of you are good husbands." Zhao Mo chuckled and nodded. She and the three girls had become good friends long ago. They had company when they came to recuperate for a long time, and they could chat about the length of time.

"Come and take a look. The notice has just been issued and many people have already applied." She turned to Qin Lin.

Qin Lin walked over and Zhao Moxi stood up. After Qin Lin sat down, she sat on his lap and looked at the computer page together.

[Chapter 633 Linlin Manor's Threshold Is Frighteningly High!](#)

The two of them had a tacit understanding.

The page was the Linlin Manor's application page. This was just for people to fill in their information. Moreover, whoever wanted to stay had to fill in this information first and wait for them to review it.

Perhaps because of the reputation of Linlin villa and Linlin company, many people had applied for it.

At a glance, he could see the boss of a coal mining company, the boss of a technology company, and a well-known director, Gong Jie. However, their information was very well-known, but when he checked on the internet, he passed all of them.

They were just some nouveau riche or exaggeratedly rich people who didn't have the right to stay.

Moreover, there was a very interesting application. It was from an internet celebrity, a female internet celebrity called 'explore the world'.

She was an internet celebrity who would go to any new shop opening and broadcast it to everyone. If she had a lot of fans, she could bring a lot of customers to the new shops.

What was interesting was that this female internet celebrity, 'exploring the world', had even specially marked that she had 15 million fans.

The 15 million was even written in huge font, as if to show off one's strength, one had to approve the accommodation application.

"It's true that just about anyone would come to apply." Qin Lin shook his head and directly clicked PASS.

Not to mention 15 million fans, even if you were the top internet celebrity with more than 70 million fans, you still didn't have the right to be an internet celebrity.

On a certain music platform.

At this time, a live broadcast room was very lively, because a fashionably dressed female live broadcast host was livestreaming an application.

It was the livestream room of 'explore the world'.

the title of her livestream was 'i've prepared 3 million to live in linlin manor, livestream the entire process'.

On the page was the scene she had just applied for.

everyone, be patient. There shouldn't be many people applying now. I'll be able to pass it very soon.

"When the time comes, I'll be able to bring everyone to see what Linlin Manor looks like with the 3 million threshold fee," explore the world said with a smile.

Three million, Linlin Manor, and the live broadcast were indeed a gimmick. With 15 million fans and the push, there were already tens of thousands of people in the live broadcast room.

The beeping sound of a reply came very quickly.

yes, I did. The application should have been approved. World Seeker smiled as he opened the recovery message.

I'm sorry, you don't meet the requirements to stay in our Linlin Manor. Your application has not been approved!

This content was seen by everyone in the live broadcast room.

Detective world's face froze.

What a joke.

She had already prepared the money and wanted to move into the Linlin Manor to increase the popularity. She had never thought that she would not be qualified to move into the Linlin Manor.

She was a 15 million Yuan internet celebrity.

However, when the netizens who had come to join in the fun saw this message, they all became excited.

"6666"

"6666+1"

"6666+2"

"....."

For a moment, the entire screen was filled with 6666.

but from this, everyone knew that the threshold to enter linlin manor was really high. it was definitely high-end. even if you had the money, you couldn't go there. it was just like exploring the world.

So what if you have 15 million fans? He was nothing to others.

In Linlin villa, Qin Lin and Zhao Moyu continued to look at the application messages. Soon, another message caught their attention.

This was because it was also a request from an acquaintance. It was Liu Yi. This chief Liu even left a note at the end: "Boss Qin, I would like to send my father to your place to recuperate for a few days. Please give me a quota!"

"Are you going to give this to me, President Liu?" Zhao moyin asked. President Liu was a rich man in Ming city who could marry Chen and MA.

chief Liu is filial. Give him a spot! Qin Lin said with a smile. Since Liu Yi had already filled in the information to apply, he should give him a place!

Just as he was about to accept the request, his phone rang. It was Minister Lu.

Qin Lin picked up the call and heard Minister Lu's voice. "Boss Qin, your nursing home's quota isn't full yet, is it? The Chinese Academy of Sciences will pay for it, and I want to give one spot to professor Ren.

He has been spending a lot of time and energy on testing the liquid medicine, and his physical condition is not right. There is also an old academician who has made a great contribution to the research."

Qin Lin was stunned when he heard this. He didn't expect to receive such an application as soon as he opened his business.

He immediately looked at Liu Yi's application and could only reply, " chief Liu, I'm sorry. The slots are full. Please wait for the next slot!

[Chapter 634 ! Medicinal Cuisine That I Can't Learn! 1](#)

Ming city.

Liu Yi had also received Qin Lin's reply in his office. Seeing that the five spots were filled up so quickly, he could only sigh helplessly at the fact that it was too late.

Of course, he knew that the castle-sized three-story villa would definitely be able to accommodate more people, but they must have their own considerations when they set the quota of five.

his relationship with boss qin wasn't so close that boss qin would make an exception for him.

This made him a little envious of Chen shengfei and maliven.

The two of them were lucky. It was said that even the Linlin laboratory had 10% of the shares. They wouldn't have such an opportunity unless their relationship was close.

To be honest, he could tell from the few actions of Linlin's laboratory that it had endless potential. He wanted to be a shareholder. He didn't need 10%. 5% or 3% would do.

As he thought about it, Liu Yi glanced at the plate of watermelon on the desk.

This was the Linlin watermelon that his Secretary had specially bought for him.

There were already Linlin watermelons on the market now.

This Linlin watermelon alone was sold at a crazy price of 30 yuan per 500 grams.

Linlin watermelons could not be bought in many places.

This Linlin watermelon was a special supply product and was now quite famous in the watermelon market.

Linlin laboratory's profits from this alone were very high.

Unfortunately,

.....

Linlin Manor.

Qin Lin replied to Liu Yi and said to Minister Lu on the phone, " Minister Lu, there are two more slots. Fill in your application on the page and I'll approve it.

Linlin Manor could receive more than five guests. Apart from the inner area that he had separated, there were 15 rooms that could be opened to the public. Each room was the size of half a normal family with three rooms and a living room.

however, the manor had just started operating. without any experience, he did not want to open up too much.

Five was more than enough.

In the future, when things were stable, he would open up 10 slots, and leave 5 slots as backup.

However, since they had decided on five spots, they couldn't make an exception for others from the beginning.

If it was old friends like Chen shengfei or Marvin, they could make an exception if they applied late.

Liu Yi was still a little shy.

the other party's friendship with him was not very deep. at most, he could be considered a regular customer that he had met a few times.

The next time there was a quota, they would give it to the other party first. It was not enough to make an exception, even if the other party was a rich boss of Ming city.

"alright, i'll get someone to apply for it!" Minister Lu hung up the phone after that.

In Linlin's laboratory.

Professor Ren saw Minister Lu put down his phone and said, " "Minister Lu, I'll pass. I'll let the others have it first."

Minister Lu tried his best to persuade him, "professor Ren, it's useless even if I try to persuade you." i said this is your reward."

" besides, i'm going back to the capital. i'll need you to take care of things here. in addition to the athletes, the higher-ups will send a few soldiers over. you'll be busy. just take it as a work-related treatment. "

of course. The most important thing is for you to accompany academician li and talk to him. His contribution is too great, but there's nothing we can do about his current condition. We can only send him to boss Qin's place to recuperate.

"We all know that boss Qin is very knowledgeable in Chinese medicine, so maybe you can help. If the recovery effect is good, we can apply for two permanent recovery spots at the Chinese Academy of Sciences."

Professor Ren didn't say anything else.

There were many researchers at the Chinese Academy of Sciences who were very old and had made great contributions. Every year, the Chinese Academy of Sciences would arrange for some people to recuperate for a period of time to ensure their physical condition.

Some of these reatories were in the country's specialized sanatorium, while some were in the top sanatorium centers outside. It was purely up to the arrangement or the wishes of the academicians.

On the other hand, academician Li's situation was really bad. The key was that he was too old, and he couldn't receive surgery or chemotherapy. He could only receive conservative treatment.

He knew that boss Qin had herbal cuisines and he was very knowledgeable in Chinese medicine, so he could try herbal cuisines for recovery.

If Mr. Qin's treatment was really effective for academician Li, the hospital would probably fight for a place to come to Mr. Qin's treatment.

Minister Lu also took out his laptop and logged into the Chinese Academy of Sciences 'intranet.

He logged into his internal account and sent an email to someone to go to Linlin villa to fill in the information for professor Ren and academician Li to apply for treatment.

Although he could arrange this matter, the specific application and specific allocation of funds still needed to be carried out by someone. Moreover, this transfer to Linlin Manor also needed to go through the Chinese Academy of Sciences to announce the account, so he couldn't touch it.

This was a rule that he could not break.

After hanging up the phone, Minister Lu said to professor Ren again, " "Professor Ren, I'll have to trouble you to sort out the information on the body-enhancing liquid and the drug powder for treating colon cancer. I need to report it to you when I get back to Beijing."

"En!" Professor Ren nodded.

...

Linlin Manor.

Qin Lin soon received two comments on the Chinese Academy of Sciences "application. It was a very official application with the Chinese Academy of Sciences" stamp.

Professor Ren and academician Li were there to recuperate.

This application was so formal that professor Ren and academician Li's information were sent over. It was different from the applications online.

He was an old acquaintance of professor Ren, so he didn't need to look at the information.

However, academician Li made him curious. He opened the information and looked it up on the internet. Then, he was shocked.

[Chapter 635 A Medicinal Cuisine That! Can't Learn!](#)

This old academician was extraordinary. His contribution to the country was too great. He had participated in several major strategic weapon research and research projects. Although he was not the main person in charge, he was an indispensable member.

As for the specific major research, there was no information published on the internet. After all, it could be considered a strategic weapon, so one could imagine how strict it was.

Moreover, this old academician was almost 80 years old, and he was still working on the front line of scientific research.

Minister Lu had actually arranged for such an old senior to recuperate at his place. Strictly speaking, this would bring light to his Manor.

The status of such an old senior could not be measured with money.

However, when he looked at academician Li's information on the Chinese Academy of Sciences application, he frowned.

This was because academician Li's physical condition wasn't very good. He actually had stomach cancer. Perhaps it was because he was old and tired, and his diet wasn't regular.

Fortunately, academician Li's stomach cancer was only in the early stage.

however, due to his old age and his poor physical condition before the diagnosis, he could not undergo surgery or receive chemotherapy for the time being.

No matter what method he used, his body, which was almost 80 years old, would not be able to withstand it. Therefore, he could only use drugs to suppress it for the time being. He would first receive conservative treatment and recuperate. He would only undergo surgery when his body was in better condition.

Seeing this situation, Qin Lin felt an inexplicable sense of pressure.

If this kind of old senior didn't recuperate at his place, he would be too ashamed to face others.

At the same time, he also thought of the giant yellow croaker's cancer prevention ability and its two turtle-like quality of suppressing and preventing stomach cancer.

These two combined should be effective on academician Li, right?

He had some conjectures in this area before, but he had never had a goal to test it out.

Also, the system's products had never disappointed him. As long as academician Li ate some of it when he came to recuperate, it would definitely work.

Even though the price of the two-quality turtle and yellow croaker would definitely be far higher than the set price of 500000 Yuan if he ate it from time to time, he did not have to pay for it.

The key was to give this kind of old senior food that he was happy to eat. There was a saying that "no amount of money can buy my happiness. it could be considered as a repayment to the best of his ability.

After all, his stable life now was inseparable from the scientific research contributions of these seniors.

Without the successful development of strategic weapons, their entire race would not have been as confident as they were now.

If it was anyone else, there would be no way.

Other than the food they ordered, if they wanted to eat more, they had to pay.

Qin Lin immediately approved the Chinese Academy of Sciences' application and informed the other party to register at Linlin Manor for recuperation.

Three days later.

Minister Lu arrived at the villa.

He was here to register Professor Ren and Academician Li in person, and the date was naturally calculated from the day Professor Ren and Academician Li moved in.

At the same time, Minister Lu also came to say goodbye. After all, he was also responsible for a pool of very important matters. Naturally, he could not stay at Linlin laboratory all the time.

After Minister Lu left, Qin Lin went to the kitchen of the manor.

Now that the manor was about to receive guests, there was something important that Master Lin had to confirm in the kitchen.

That was the problem of the daily medicinal diet.

When Qin Lin entered the kitchen, Master Lin was already busy with his two assistants.

There weren't many guests in the manor, so the kitchen wasn't as big as the one in The Villa Restaurant. There were only Master Lin and the other two, but the facilities were very complete. The environment and tools were even more demanding than those in the restaurant.

More importantly, the ingredients were also better than the ones at the restaurant. They had prepared more quality ingredients.

"Boss!" Master Lin saw Qin Lin coming in and greeted him with a smile.

"Master Lin, how's the herbal dish going?" Qin Lin nodded and asked Master Lin.

When Master Lin heard this, he said guiltily, "Boss, I've been practicing for the past two days and I'm already very familiar with it. I didn't make any mistakes in the steps. The key is that I can't make a medicinal cuisine as delicious as yours.

As he spoke, Master Lin sighed silently.

The boss trusted him and taught him the secret recipe of the herbal dish, but he was so disappointing.

This feeling was really uncomfortable. It was like in a wuxia movie, when the world's top master gave you a secret martial arts manual, but you couldn't learn it no matter what.

Even if I gave it to you, it would be useless.

"Try it again. I'll watch from the side." Qin Lin said with a frown.

The daily diet of the manor was medicinal food.

However, it was impossible for him to make a herbal dish in the manor every day. He would only make a quality 3 herbal dish regularly, which was the special herbal dish mentioned in the service.

Therefore, he had to find a suitable and trustworthy person in the manor to teach the medicinal cuisine to and let the other party be in charge of the daily medicinal cuisine.

And there was no one more suitable than Master Lin.

he also trusted master lin.

But after hearing what Master Lin said, it seemed to be a little different from what he had expected.

Master Lin didn't hesitate. He took out a piece of quality 2 fish meat in front of Qin Lin and started to make the herbal fish.

He was obviously very skilled.

Qin Lin was watching from the side. There was indeed no problem with Master Lin's operation. He had followed the steps he had taught. Even the proportion and order of the medicinal herbs in the herbal dish were not a problem.

Very soon, Master Lin's medicinal fish was ready.

"boss, try it!" Master Lin handed Qin Lin the fish with medicinal soup that he made.

[Chapter 636 A Medicinal Cuisine That! Can't Learn!](#)

Qin Lin picked up his chopsticks and tasted it. He frowned slightly. The medicinal fish made from quality 2 fish meat was naturally delicious. After all, it had the deliciousness and texture of quality 2.

However, it was still lacking by a lot because a few of the attributes of the medicinal cuisine's Secret recipe had not been fully displayed. The special taste, special taste, and special medicinal fragrance were all lacking in meaning.

Qin Lin thought for a while and then instructed Master Lin, " "Master Lin, please use the ordinary fish meat to make another portion of the herbal dish fish."

Master Lin nodded. He took a piece of ordinary fish and started to make the same herbal fish.

The steps, order, heat control, and proportion were all the same.

soon, master lin finished preparing a portion of ordinary medicinal fish.

Qin Lin picked up his chopsticks, picked up a piece of fish, and ate it. This time, without the attribute enhancement of the game ingredients, the taste was far worse than the previous serving.

Compared to the ordinary medicinal fish, the taste was obviously very good.

However, the manor had to take the high-end route. Using ordinary fish to make medicinal fish was not enough, even if it was more delicious than the ordinary fish outside.

At the very least, it should be a delicacy of Grade 1, right?

Qin Lin thought for a while and said to Master Lin, " "Master Lin, I'll take these two fish containers back to try."

Although Master Lin had some doubts, he still followed the boss's instructions and put the two sets of medicinal fish into the food boxes.

Qin Lin returned to the office with the two servings of medicinal fish made by Master Lin.

He didn't want to eat the two portions of medicinal fish, but he wanted to see the specific attributes.

After locking the office door and entering the game, he saw the attributes of the two medicinal fish.

[medicinal fish: quality 2!]

[this is a medicinal fish made by a chef with some culinary skills: Deliciousness +2, taste +2]

[medicinal fish: normal]

[this is a medicinal fish made by a chef with some culinary skills. It's delicious and has a special taste and texture. It also has a special medicinal fragrance, and it has a certain effect on health, body, spirit, and energy recovery, blood and Qi, and strengthening immunity!]

Qin Lin understood when he saw the note.

master lin didn't seem to be able to cook as well as he did according to the secret recipe of the medicinal cuisine.

The special taste +1, special taste +1, and special medicinal fragrance +1 attributes added by the medicinal cuisine recipe had become an additional attribute.

Health and body strengthening +1, essence, Qi and spirit Recovery +1, blood and Qi replenishing +1, and immunity +1 also became certain effects, but they did not reach the level of a Grade 1.

So, was this a problem with Master Lin's own cooking skills, or was it because he didn't have the cooking skills given by the system to be able to produce some effects of these attributes but couldn't bring out these attributes to full play?

It shouldn't be. After all, the Linlin leisure tea and tomato sauce were also given by the system as a Grade 1 recipe. However, they could be produced by adjusting the production line and using the mechanical assembly line.

There must be some special reason for this. Could it be that cooking is one's own skill, and only by doing it personally can the attributes be fully exerted? It was different from the simple formula?

That was possible.

after all, when he received the herbal recipes, the information also included his cooking skills.

He had to study it carefully when he had the chance!

There was another problem that he had to solve now. Master Lin's Daily Herbal dishes could not reach the level of quality 1. He could not just pull anyone in and teach them the secret recipe.

they couldn't provide all the fish and seafood of the same quality every day.

&Nbsp; thus, to ensure that Master Lin's dishes could reach quality 1, he had to prepare quality 1 ingredients.

Qin Lin controlled his game character to go to the river, took out a fishing rod, and put on LV2 bait.

Previously, he was able to catch Grade 1 fish, but because the fishing rod was upgraded to Level 3, coupled with Level 3 bait, all the fish were Grade 2.

Now that he lowered the bait to Level 2, he estimated that he should be able to catch wild fish of Grade 1.

[congratulations, you have caught a Grade 1 wild black carp!]

Seeing this, Qin Lin also smiled. It was good that he could do it. Then, he controlled his game character to go to the fishing platform by the sea and used the same method to fish.

[congratulations, you've caught a Grade 1 large sea crab!]

Qin Lin gave it a try and then exited the game. It was good enough to catch fish and seafood of the same quality. As for the other ingredients of the same quality, there were many of them.

in the future, master lin would be the one to make the medicinal cuisines and the emperor's supreme set meal made of quality 1 ingredients. he only had to make quality 3 medicinal cuisines for the guests regularly every month.

Qin Lin logged out of the game.

In the afternoon, Chen shengfei, maliwen, and Li Qing appeared in his office.

The three of them had made an appointment to send their pregnant wives here together.

Lin Liu and the other two girls had already been led by Zhao moyin to the manor to admire.

The three of them naturally came to Qin Lin to make tea.

"Qin Lin, hurry up and bring out your good tea!" Marvin loved tea, and he had his eyes on Qin Lin's tea as soon as he arrived.

Qin Lin smiled and took out the wild Tieguanyin, which was Grade 2. He made a pot of tea and gave it to Marvin.

Chen shengfei also laughed. Qin Lin, we've taken a look at your Manor. You've made another good place. You're still the best in this area.

Marvin also poured a cup of tea for everyone and said, " that's right. I went to take a look with my wife just now. The environment outside alone is not comparable to the places that we've been to in the past.

Li Qing picked up the tea and took a sip, but he smiled and said nothing.

To him, the most amazing part of the Qin Lin Manor was the wine cellar. If the outside world knew about the wine in the cellar, all the wine lovers would go crazy.

However, Qin Lin didn't announce that he had such a wine cellar. He wouldn't tell anyone about it, not even Chen shengfei or Marvin.

Because that would be impolite.

[Chapter 637 306-The Old Senior Is Here! Insomnia Is Not A Problem!](#)

In the office.

Qin Lin, Chen shengfei, MA Levin, and Li Qing were making tea when a phone call came in.

The call was from Shen Li.

"President Shen, what's the matter?" he immediately picked up the call.

Shen Li explained, " Chairman Qin, the second batch of Linlin watermelons has ripened. Tomorrow, our laboratory is planning to inspect the situation of the second batch of watermelons in the town. Do you want to go with us? "

"Wait a moment." Qin Lin took away his phone and asked Chen shengfei and MA Levin, " old Chen, old Ma, do you want to go and see the situation of Linlin watermelon plantation tomorrow? "

chen shengfei and maliwen were obviously interested. after all, they also had 10% shares of the laboratory.

Chen shengfei smiled. it's a holiday these two days. Let's go and take a look!

Marvin also nodded.

the first batch of linlin watermelons was planted in the middle of april. because the growth time was very short, it took about two months from planting to selling.

The first batch of ripe watermelons had already been on the market. Moreover, director Chu of da runfa was in a favorable position, so he ordered a large batch and sent them to the various branches of da runfa.

Also, the princes of the chain supermarkets that Wang Yan knew knew about these watermelons, so they asked Wang Yan to make connections and split up a large batch.

Linlin watermelons had appeared in these supermarkets, and their sales were very good. This directly drove the sales of Linlin watermelons, and other sales channels also came to them one after another.

It could be said that the Linlin watermelons didn't have to worry about sales.

It was now September, and the second batch of watermelons had ripened. Previously, Chen shengfei and Marvin had been busy with their own group's Affairs, so they had not paid attention to this matter.

Now that they were free, they could go together to take a look and relax.

Seeing that the two of them were interested, Qin Lin also said into the phone, President Shen, I'll be going with old Chen and old Ma tomorrow. They'll send a car to pick us up.

"Alright, Chairman Qin!" Chen Li immediately replied.

The next day.

Linlin's laboratory car arrived at the mountain villa and picked up Qin Lin, Chen shengfei, and MA Levin.

There were 15 towns in you city, and Linlin watermelons were planted in batches in turns. Only three times were allowed. It was necessary to ensure that there were two to three months for each planting to allow the land to rest and grow. At the same time, fertilizer and plant ashes had to be mixed to maintain the fertility of the land.

This time, it was the second batch of villages and towns.

Xiaxian town was one of the towns. Moreover, Xiaxian town was one of the towns in you city with a lower economy, and there were two poor villages.

Therefore, after discussing with you Cheng, Linlin's laboratory and you Cheng decided to give special support to the two villages for the second batch of planting.

Dayin village was one of the poor villages.

When Qin Lin and Chen shengfei arrived at dayin village, the whole village was busy. Large trucks were parked on the open space, and the villagers were weighing and registering ripe watermelons for harvest.

The scene was very lively. Every villager's face was full of joy. After all, the news of the first batch of Linlin watermelons had long spread to the villages.

In their batch, every family made money because after it was listed, the price was higher than expected. Each family had five acres of land and took care of watermelons for less than two months, but they made nearly 60000 Yuan by selling it.

Planting three times a year would earn him 180000 Yuan. A diligent family would be able to live a good life even if they were poor.

Seeing the car from Linlin's laboratory, all the villagers were attracted.

The young village chief Ren Yu, who was in charge of maintaining order in dayin village, came forward to welcome them. When he saw Shen Li and Qin Lin get off the car, he said, "Are you the leaders of Linlin laboratory? Welcome, I'm Ren Yu, the village chief of the great sound village."

Shen Li smiled and asked, "village chief Ren, we're just here to take a look and understand the situation. How's the watermelon harvest in your village?" You guys should be able to accept the statistics, transfer, and payment methods, right?"

When Ren Yu heard this, he immediately said, "Leader, don't worry. We will definitely cooperate with Linlin's laboratory. We won't cause any trouble like Xiazhai village."

What a joke.

After the experience of the first batch of villages and towns, now everyone was afraid that they would not be able to grow Linlin watermelons like Xiazhai village, so how could they not accept it?

Besides, Linlin laboratory's payment was not harsh.

"Village chief Ren, is it okay for me to go and pick a few watermelons to taste?" Shen Li also smiled and said.

Ren Yu hurriedly replied, "there won't be any problems. Don't worry, leader. We've put a lot of effort into growing the watermelons in our village. I guarantee they'll be sweet."

Shen Li went forward and randomly picked three watermelons. Then, he asked someone to cut them open and invited Qin Lin, Chen Shengfei, and Ma Levin to taste them together.

Chen Shengfei ate some and laughed. "These watermelons are not bad. However, they are much worse than the ones in the villa."

Qin Lin also nodded. The three watermelons were all of the standard quality of 1, which was indeed very delicious to the outside world.

However, there were quality 2 watermelons in the villa. Chen Shengfei and the others had come to eat quality 2 Linlin watermelons. Naturally, quality 1 watermelons couldn't be compared to them.

He asked the people in the laboratory to spread out and check the plantation in the village. Then, he led Qin Lin and the others to the next town.

...

A few days later.

Qin Lin, Li Kai, and Professor Ren had been waiting at the entrance of Linlin Manor since early morning.

To be able to make them wait like this, it definitely wasn't an ordinary person.

This was because the old academician Li was about to arrive.

Qin Lin rushed over as soon as he received the call.

[Chapter 638 306-The Old Senior Is Here! Insomnia Is Not! Problem](#)

To be honest, if it was someone else, even if the other party was a rich man, he would not personally come to welcome them.

However, he was full of admiration for this kind of senior who had dedicated his life to scientific research and made great contributions to the country.

A moment later.

A special business car drove to the manor and stopped.

Three people came down from above.

One of them was a staff member from the Chinese Academy of Sciences. He was responsible for sending Academician Li over and setting up an account at Linlin Manor.

The other person was a doctor in a white coat. This was arranged by the Chinese Academy of Sciences. He would check on Academician Li's physical condition with the other doctors in the manor.

From this, it could be seen how much importance the higher-ups placed on an old man like academician li.

Professor Ren greeted the old man who got off the car last and said with a trace of respect, "Academician Li, you're finally here. The journey wasn't too tiring, right?"

For an old man like academician li, even if he had some achievements in the Chinese Academy of Sciences, it was nothing.

Qin Lin also looked at academician li.

There was only a brief description and a few simple photos of academician li on the internet. Moreover, the person in person was somewhat different from the photos.

Academician Li's face looked a little Haggard. After all, he was almost 80 years old, and he had stomach cancer. Even if it was only in the early stages, it was still a torture for people of his age.

Academician li shook his head and said, "Little Ren, you're mocking me. It's just a plane ride and a car ride. I used to do research, and all of them were more tired than this."

Professor Ren smiled bitterly.

How could this be the same?

However, he didn't respond to academician Li's question. Instead, he said, "academician li, let me introduce you. This is the manor's boss, Qin. And this is professor Li Kai.

Academician li immediately smiled and said, "I know you two. before we came, minister lu told me a lot about boss qin. thanks to boss qin's knowledge in chinese medicine, our chinese academy of sciences has the body-increasing liquid and the drug that can treat colon cancer."

and professor Li Kai, I've been hearing about him since I was at the Chinese Academy of Sciences. I've been wanting to meet him for a long time. It's great that our research has a rising star like professor Li Kai, very great!

Academician li looked at Li Kai with admiration.

for someone like him who had dedicated his entire life to scientific research, nothing was more satisfying than seeing such an excellent junior.

He was only afraid that after his generation left, no one would be able to carry the banner of scientific research and fall behind the West.

As someone who had been through his generation, he knew how difficult it was for his own scientific research to reach this point.

Li Kai was a little embarrassed by the praise and hurriedly added, "it's just a small matter. It's nothing compared to your generation, academician li.

"You're too humble!" Academician li smiled.

Professor Ren said, "academician Li, let's go into the manor first. We still have to go through the check-in procedures. Boss Qin can make the arrangements for us later.

"Yes, cooperate with them first." "Then I'll leave my small body to boss Qin," academician Li said to Qin Lin with a smile.

"Academician Li, please." Qin Lin immediately invited them in and led them into the manor.

Academician Li was supported by the doctor as they entered the manor.

In fact, he didn't have much hope for coming here to recuperate.

The Chinese Academy of Sciences had arranged for him to go to a lot of sanatorium and resort, and they were all similar.

This time, he had come to see what professor Li Kai and Mr. Qin were thinking, much more than the treatment.

All the old guys in the Chinese Academy of Sciences had heard of Li Kai, a rising star. Adonaxi flora and Heavenwood Tonghui were great contributions.

And this boss Qin, he donated both of these research. These old guys couldn't help but admire him.

Boss Qin didn't have any other thoughts about the body-increasing liquid and the drug powder for treating colon cancer. He passed them to Minister Lu as if they had nothing to do with him.

With such a transcendent mind, it was no wonder that Minister Lu kept talking about boss Qin when he went back to report.

Really, even the old guys had to respect this young man.

However, the moment academician Li entered the manor, he froze for a second. A different look appeared in his eyes.

these flowers and plants are a little different from what I thought, "academician Li said.

At his age, he had seen everything. It was nonsense to say that the scenery could attract him.

No matter how beautiful the scenery was, it couldn't be compared to the interest he had in reading a few lines of research materials.

He had to admit that he was attracted to the manor the moment he entered, whether it was the flowers and plants or the verdant bamboo.

He didn't know how to describe it. After all, he wasn't good at literature. He just felt that it was beautiful, very beautiful.

The most important thing was that after entering this environment, he felt his body and mind relax. This seemed to be the effect of the environment.

He had not felt this way for decades.

These quality 2 plants all had the attribute effects of +2 ornamental,+2 aesthetic,+2 beauty,+2 attractiveness,+2 open-minded,+2 carefree,+2 physical and mental comfort. Even people like academician Li would be affected by this.

"Academician Li, how do you feel about this environment?" Professor Ren obviously understood academician Li's feelings, so he smiled and asked.

The first time he had entered the manor, he had also been attracted by the scenery.

[Chapter 639 306-The Old Senior Is Here! Insomnia Isn't! Problem](#)

"It's so beautiful! At my age, this is the first time I've seen such an attractive view." Academician Li was also generous with his praise. I have to say, boss Qin is really amazing. No one else can create such an environment.

academician Li, you're too kind. I major in Tourism Management, so I like to research on this aspect. Qin Lin knew academician Li was telling the truth. After all, he didn't have a system, but he still had to be humble in front of an old man.

The group walked in and arrived at the location of the four flower beds.

This time, academician Li also stopped and looked at the Rose in the middle of the four flower beds. these four must be the national flower of the Starstreak Kingdom, the Duke's Rose, right? "

Professor Ren was responsible for explaining. academician Li, you're right. There are still six stalks in the sea of flowers in Linlin Manor. You also know that because of these flowers, the people from the xingtiao nation have come to find us.

I'm sure many of them are so angry that their noses are crooked. The singtiao people have a deep grudge against Linlin villa. After all, they themselves can't even see the national flower, but now that it's placed in this Scenic Area, everyone can see it.

Academician Li was obviously in a good mood. "This matter is beautifully done!"

After entering the manor, Qin Lin took academician Li and professor Ren to check in and arranged rooms with the best environment for them.

After that, Tang xiuwan visited professor Ren and academician Li for a routine check-up.

In particular, he had to pay special attention to academician Li's physical condition. He also had to take a blood pressure test.

after tang xiuwan returned to the treatment room, the doctor who accompanied academician Li came to see her. the doctor's name was duanmu ruiyang.

there were very few people with four-character names in their daily lives.

Duanmu ruiyang saw Tang xiuwan hand over a document and explained the purpose of their visit, " Dr. Tang, I'll tell you about academician Li's condition. This is the specific situation. I'll cooperate with you for the daily examination.

Tang xiuwan didn't dare to disobey. She quickly took the documents and read them.

The boss already told him about academician li.

Academician li was in the early stage of stomach cancer, which was accompanied by many other conditions. First, he would not have a good appetite. This was something that the boss and Master Lin could worry about.

In addition, there were also examinations related to conservative treatment. These examinations had to be done frequently to keep track of academician Li's physical condition.

"Does academician li often suffer from insomnia?" tang xiuwan suddenly said as she looked at the form.

Duanmu ruiyang nodded. yes, the elderly have insomnia. With this illness, it's even more difficult for them to fall asleep. They all need to rely on medicine to help them sleep.

Tang xiuwan frowned. sleeping pills are not good for the elderly. Stop taking them. We have a better way to help them sleep.

arrange a fish therapy session for academician li tonight. Let him relieve his fatigue, adjust his nervous system, promote metabolism, and relieve insomnia and dreaminess.

When she was transferred to the manor, she was also very surprised by the fish therapy. Fish therapy was very popular in the outside world, saying that it had various effects, but she knew very well that the effects of fish therapy were not as great as they were exaggerated. Most fish therapy did not even have any effect.

However, the fish that the boss had brought were different. The effect of the fish therapy was amazing, and she had personally experienced it.

Perhaps what the boss was doing was the real fish therapy, and those in the outside world were not real fish therapy.

Furthermore, after the fish therapy, there was also sandalwood incense that helped with sleep, so insomnia was not a problem.

When Duanmu ruiyang heard about fish therapy, he frowned and said, " Dr. Tang, academician li has actually tried this fish therapy many times. The sanatorium also let him try it before, but it didn't have much effect every time. Now that academician li is a little disgusted with fish therapy, should we not do it for him anymore? "

to be honest, he was suddenly a little disappointed with the treatment manor.

Although he had to admit that the environment was very good, recuperation was not about the environment.

The moment he opened his mouth, he mentioned fish therapy again. It seemed to be no different from other sanatorium. It was all useless old tricks.

However, this was the treatment arranged by Minister Lu, so he could only remind the other party.

[Chapter 640 Academician Li Is Convinced! He Fell In Love With This Place In One Night! 1](#)

Tang xiuwan heard Duanmu ruiyang's words and explained, the fish therapy in our Manor is different from other places. I believe it won't disappoint you, academician li.

Duanmu ruiyang sighed to himself.

It was the same as what the sanatorium and the sanatorium said.

they were all very confident and thought that their fish therapy was awesome.

fish therapy might have a relaxing effect on ordinary people, but it really didn't work on patients like academician li.

Moreover, it wasn't a good thing for older people to be in the water for too long.

However, he had already warned them in other people's territory. There was nothing he could do if they didn't listen to his advice. He didn't want to argue with them.

Tang xiuwan had already taken out her phone and dialed a number. Yaoyao, get someone to prepare a hot spring fish therapy. How about two? let professor Ren do it together.

Gao Yaoyao was the service department Manager, and the manor did not have a supervisor or manager position. There were only ordinary waitresses and foremen positions. Moreover, the position and treatment were promoted by one level.

In other words, an ordinary waiter was equivalent to a Foreman, and a Foreman was equivalent to a supervisor.

Gao Yaoyao had been doing a good job after being promoted to the service manager of Linlin villa, so she had let her manage the waiters in the manor.

Although Linlin Ranch had hired a more experienced service Manager, Zhao moyin still felt that Gao Yaoyao was a veteran. She was doing a good job and was willing to give her more opportunities.

Fish therapy was also a regular service in the manor. The manor would provide two sessions a day, and it was up to the guests to choose whether to do the fish therapy or not.

Tang xiuwan put down her phone and walked out of the medical room. She went to academician Li's room.

Seeing this, Duanmu Rui Yang could only follow.

When they arrived at academician Li's room, the door was open. They could hear the conversation between professor Ren and academician li. Obviously, professor Ren had come to visit as soon as he checked in.

"Academician li, since you're here, just rest well. Don't you like to drink tea? I'll ask boss Qin for some tea leaves later. I'm sure you've never tried that kind of tea before."

"Boss Qin likes to make tea too? But professor Ren, you're exaggerating. I've even drunk the Da Hong Pao from the two trees at the head's place."

Minister Lu and I drank a type of Tie Guan Yin at boss Qin's place. I'll ask for some for you to try, academician li.

Tang xiuwan and Duanmu ruiyang walked in.

Academician li and professor Ren were sitting on the sofa in the living room. The living room was very large. After all, every room in the manor had its own living room, room, bathroom, and entertainment room.

"Dr. Tang, I'll have to trouble you with academician Li's future checkups." Professor Ren smiled and greeted Tang xiuwan. He also introduced her to academician li, " "Academician li, Dr. Tang is professor Li Kai's girlfriend. You should have heard of her."

Academician li was obviously attracted by this. He said in surprise, " I've heard of the love story of professor Li Kai and Dr. Tang, the female lead of adonaxi vegetation root.

tang xiuwan and li kai had been together for a long time, and they'd had sex countless times, but she still felt embarrassed when others mentioned it.

However, she didn't forget what she was here for. She explained, " academician li, professor Ren, our Manor has a regular fish therapy. It's very effective in relieving fatigue and adjusting the nervous system. It can also promote metabolism and relieve insomnia and dreaminess. I've already made arrangements for the two of you, so you can give it a try.

When academician li heard this, he frowned and said, " "Dr. Tang, can we not do the fish therapy? I've been to many places, and every time I'm tormented, I feel uncomfortable in the water."

Duanmu ruiyang shook his head when he heard this. He knew it would be like this.

Professor Ren, on the other hand, was very interested. academician li, boss Qin's medicine is different, and the effect is generally stronger than the outside world. Since Dr. Tang has arranged it, it will definitely be effective. There's no harm in trying.

Professor Ren's words made academician li nod and say, " "Then, I'll have to ask Dr. Tang to help me arrange it."

Tang xiuwan didn't waste any time. She led professor Ren and academician li to the hot spring fish therapy area.

The manor's hot spring area had existed since the beginning, but after the addition of the fish therapy program, the hot spring program had been transformed into a hot spring fish therapy area.

Moreover, the hot spring area was divided into male and female areas, one on the left and one on the right. This had to be clearly divided.

They definitely couldn't have mixed-gender hot springs like those places with negative energy. They even found some women with special professions to soak in the hot springs full-time.

When they arrived at the hot spring area, Gao Yaoyao was already waiting for them with a waiter. When she saw Tang xiuwan, she went up to her and said, " "Sister xiuwan, I've prepared two hot spring pools."

tang xiuwan nodded and led the professor and academician li into the fish treatment area.

There was a changing room inside where he could change into a special fish treatment outfit.

Professor Ren and academician li went into the changing room to change into special fish therapy clothes under the guidance of the waiter.

When they arrived in front of the two hot springs, there were already a dense number of kiss fish swimming in them, and they were very active.

Academician li tested the temperature of the hot spring and said in surprise, " "This is interesting."

The water temperature had already exceeded 40 degrees, but these fish were still so active. Even the most heat-resistant fish would be a little dispirited at this temperature, right?

"These fish are very heat-resistant." Professor Ren also nodded.

The two of them lay down in the hot spring with the help of the waiter.

They were old people, and there was a lot of dead skin on their bodies. As soon as the two lay down, the dense group of kiss fish swam over like sharks that smelled blood and began to gnaw at the two.
