

## The Game 661

### [Chapter 661 This Tea Is Comparable To Number One! My Confidence Has Taken A Hit \(2\)](#)

The system's Tieguanyin tea had A +2 tea fragrance attribute, and the tea fragrance was very charming.

Professor Ren and academician li felt a lot better as they were surrounded by the tea.

This was the attribute effect of the grade 2 Tieguanyin:

this magical feeling alone surprised academician li.

It seemed that boss Qin's tea leaves were really amazing.

He really wanted to try it.

Not long after.

Qin Lin fried the 120 catties of tender leaves into more than 20 catties of cooked tea. He then took out 1 catty and gave it to professor Ren and academician li.

One Jin of tea leaves is enough for the two of you to soak for a long time.

Professor Ren was surprised when he saw the 500 grams of tea leaves.

He had tasted the tea leaves before and knew how good the tea made from them was.

Previously, he was too embarrassed to ask boss Qin for it, but now that he had this 500 grams, he could ask academician li to give him 50 grams. It would be enough for him to drink for a long time.

After saying goodbye to Qin Lin, professor Ren couldn't wait to take academician li to the tea room.

The tea room was specially prepared for guests to make tea. There were a few tea tables specially placed there, and there were waiters to clean it every day.

The tea table was made of quality 1 yellow Rosewood and quality 1 red sandalwood, and it was equipped with a special ceramic tea set.

These tea sets weren't simple either. They were all antique and had been put into the game a long time ago.

It had been almost a hundred years since he put it into the game.

Therefore, it could be considered an antique.

Professor Ren and academician li had come to this tea room to make tea before. Because academician li liked to drink tea, he also brought some tea leaves.

However, the two of them didn't know anything about yellow rosewood, red sandalwood, or antique porcelain tea sets. They only knew that the tea table and tea set in this tea room were really good. Even making tea on this tea table was very stylish.

"Academician Li, you do it." Professor Ren invited academician li to take a seat. After all, academician li was better at making tea.

Academician li didn't stand on ceremony. He picked up the tea set and started to make tea. There was even spring water on the side of the tea table.

A moment later, a pot of tea was brewed.

Academician li poured himself and professor Ren a cup of tea.

Professor Ren picked up the teacup and drank it. The familiar taste made him intoxicated."This is the tea. This is the taste. I didn't expect boss Qin to make it himself."

Academician li also picked up his teacup and took a sip. His eyes lit up as he said, " "this tea is so sweet."

He subconsciously took another sip, and the light in his eyes deepened. Then, there was a sense of disbelief.

The fragrance and aftertaste of the tea were not inferior to the Da Hong Pao tea leaves from the two mother trees.

He knew how precious that tea was. It was not available to most people, and only the leaders in the capital could get a little each.

because the yield of the two mother trees had decreased over the years, it was already good enough for the leaders to get a few taels each year.

He had also drunk the Da Hong Pao from a leader.

For someone like him who loved tea, he had remembered the taste after that one time.

This tea was not inferior to the Da Hong Pao tea at all. The key was that boss Qin had personally cooked it, and there was a pound of it in front of him.

If the leaders in the capital who loved to drink tea saw this, would they be jealous of him?

after qin lin finished stir-frying the tea leaves, he brought the remaining 19 pounds of tea leaves back to his office.

He put the tea leaves together with the ones from before and placed them in the cabinet.

"Qin Lin, I have something to discuss with you." Zhao Moyu came over as he sat down.

"What's wrong?" Qin Lin asked, puzzled.

"My father has been promoted to the Dean of Students. I want to celebrate with him. My mother would like to invite some of her close relatives as well. Can you cook a meal for us tonight?" Zhao moyin explained.

Qin Lin thought it was something important, so he immediately pulled Zhao mochen over and took advantage of him before saying, "What's the point of discussing this? That's our dad, isn't it right to celebrate with him?"

He had already known last year that his father-in-law might be promoted.

It was as if No. 1 middle school had asked him to guide the third year students, and they would be able to improve according to their college entrance examination admission rate.

His father-in-law had clearly achieved his goal last year, which was a happy thing.

Moreover, it was normal for family members and relatives to gather and celebrate such an event.

Qin Lin asked Zhao Moxi to make the arrangements.

He had to arrange a place to celebrate with his father-in-law.

It wasn't appropriate to put it in the manor. After all, academician Li and professor Ren were recuperating here, and there were also Lin and Liu. It wasn't just his mother-in-law's family; he still had to invite other relatives.

The restaurant couldn't be closed to tourists all of a sudden.

Therefore, the most suitable person was still to manage the restaurant, and these would be left to Zhao Mochen to arrange.

In the evening, his mother-in-law, brother-in-law, and Li Jiawen arrived first. Some of the relatives they had invited would come later.

His father-in-law, on the other hand, would only come over after he was done with school matters.

Lin Fen naturally arrived at the restaurant early too. She wanted to see if there was anything she could do to help her best friend.

"Qin Lin, I'll have to trouble you tonight." Chen Zhao told Qin Lin happily that his son-in-law was filial and wanted to personally cook to celebrate for him. Which mother-in-law would not be happy?

"Mom, what's so troublesome about celebrating for dad?" Qin Lin immediately said.

The son-in-law's words made Chen Zhao even happier. Every mother-in-law wanted such a son-in-law, right?

Qin Lin greeted Chen Mo and Zhao Moyun, his brother-in-law, before entering the kitchen.

He couldn't just cook a simple meal to celebrate his father-in-law's promotion, so he planned to cook an all-fish banquet, then some ordinary herbal dishes and egg-fried rice.

### [Chapter 662 This Tea Is Comparable To Number One! My Self-Confidence Has Taken A Blow! 3](#)

"Mr. Qin, are you going to cook tonight? I've already helped you deal with the fish." Lasda's face was full of smiles when he saw Qin Lin enter.

What was his purpose in staying in this villa as a chef? Wasn't he just waiting for an opportunity to secretly learn Mr. Qin's cooking skills?

He hadn't had the chance to see her in the kitchen for the past few days.

He was still thinking about how to create an opportunity for himself, but he did not expect the opportunity to come to him.

Qin Lin had already picked up his apron and walked over, preparing to cook the fish banquet.

Lasda's face was filled with excitement. He even took out his phone, planning to record Qin Lin's cooking process.

Qin Lin knew what Lasda was thinking, but he didn't care.

Master Lin had already proved that even if he wanted to learn how to cook from him, without the cooking skills given by the system, it was impossible to have the cooking attribute bonus. He still couldn't make a quality 3 dish.

Because of the cooking skills given by the system, Qin Lin's muscle memory emerged as soon as he touched the tools and fish. Then, he began to lift the pot, add oil, add the ingredients, and add the fish. His movements were skillful and smooth.

Even the number one chef of Western food, Lasse, had to admire this. Without enough skills, it was impossible to do this.

However, the more this was the case, the happier Lasda was. He excitedly watched the video on his phone.

The more this Mr. Qin showed his true ability, the more he would learn.

Soon, Qin Lin made a fish soup.

Beside him, Lasda couldn't wait to pick up the spoon and taste it. The grade 3 deliciousness made his eyes light up.

Although this taste couldn't be compared to the turtle's herbal dish, it was definitely a delicacy that he couldn't make.

It wasn't a bad idea to secretly learn this first.

Qin Lin picked up a new piece of fish and began to make a new fish dish.

He used the fish to make several dishes in a row.

Not only was Lasda recording with his phone, but his eyes were also closely watching Qin Lin's movements, trying to memorize every step, order, and operation.

After some time, Qin Lin made a fish feast out of a 2-inch-1 black carp that weighed 30 catties. Then, he started to make some ordinary medicinal dishes and finally, egg-fried rice.

After he had finished making everything, the main character of the day, Zhao Xianhong, had also arrived. Some of the close relatives of the Zhao family that Chen Xiao had invited had also arrived.

Qin Lin also asked the kitchen apprentices to serve the dishes, and then they went out to serve.

Lasda waited for Qin Lin to leave, then immediately grabbed his phone and started watching the video excitedly.

Today, the opportunity to learn secretly was right in front of him. If he didn't grasp the opportunity, he would feel sorry for himself.

Lasda took a serious look at the cooking method of the first fish soup.

He watched the video and Qin Lin's cooking method several times and felt that he had mastered it. He went into the small warehouse and took out a piece of quality 2 fish meat. Since he had secretly learned a dish, he naturally had to use the same ingredients.

Qin Lin promised to give lasda some ingredients with a quality of 2 every week for him to distribute. After all, lasda was the best Chef in Western food. He had to give him some benefits for training his chefs and apprentices for free.

Lasda started to lift the pot and add oil with confidence. He followed Qin Lin's instructions strictly, almost at the pace of the video. He copied the fish soup's cooking method without any mistakes.

Not long after, lasda had made a fish soup. When the soup was ready, his face was full of excitement. This was the first dish he had secretly learned.

Lasda picked up the spoon and tasted the fish soup expectantly. However, the moment he took a bite, his brows furrowed. "How did this happen?"

&Nbsp; this fish soup was wrong. The taste was too different. It didn't have the taste that Mr. Qin made.

"It shouldn't be. The steps are correct." All of the confidence on lasda's face was replaced by doubt.

Because in his understanding, such a situation should not have happened.

He wanted to secretly learn and imitate a dish, and he even had a video to watch him cook. Even if he couldn't win, the gap couldn't be so big.

"Something must have gone wrong." As he thought about this, he took the fish meat again and started making the same fish soup according to the video.

This time, his movements were almost exactly the same as Qin Lin's in the video, which showed that his cooking skills were very terrifying.

Lasda quickly made another fish soup. He immediately picked up the spoon and tasted it. Then, his face turned even uglier.

The taste of this fish soup was similar to the previous one.

&Nbsp; it was just as different from the fish soup that Mr. Qin made.

He wasn't willing to give up and made three more identical fish soup, but the result was the same. There was no change.

"What went wrong?" &Nbsp; lasda anxiously scratched his head. He had suddenly received a blow. This Mr. Qin had cooked in front of him, but he couldn't even secretly learn it?

There was clearly nothing wrong with that.

[Chapter 663 Xiangshui Tribute Rice Can Be Harvested!](#)

Linlin villa dining room kitchen.

Lasda was arranging herbs in front of a pot. These were the herbs needed to make a herbal dish. He had been dancing with these herbs for the past few days.

Previously, he had recorded Mr. Qin's cooking process, but he didn't know how to cook the fish banquet at all. Now that he didn't have the ingredients, he could only settle for the second-best medicinal dish.

Qin Lin had prepared a normal herbal dish for Mr. Zhao to celebrate. The cost of the herbs didn't matter to lasda.

For lasda, the most difficult thing was that he couldn't make this kind of medicinal cuisine, just like Master Lin.

These days, he had tried it over and over again, and he didn't know how many medicinal herbs he had used. The same ordinary ingredients just didn't have that kind of taste.

After tasting the newly prepared medicinal cuisine, lasda angrily threw it all into the trash can. It still did not work.

He had never thought that there would be a meal that he couldn't make.

Could it be that Mr. Qin's cooking was really magic?

In the manor.

Lin Liu and the other two walked into the villa from the manor's courtyard early in the morning with their big bellies. There were also a few waiters serving them, not daring to let the three women have any accidents.

The three women were recuperating here, and it was very comfortable. They slept well, ate well, and the air was good.

As soon as they entered the manor, the three women went to a newly opened shop on the first floor.

It had just opened a few days ago, and boss Qin would send some goods in every day. Moreover, they were all things that could not be found outside.

Li Fei's luxury goods had always claimed to be the best of the best, but compared to boss Qin's, Li Fei's goods were inferior.

This shop was naturally specially set up by Qin Lin.

Even the most high-end sanatorium and resort had such a place for sale.

The emperor's supreme set meal, Linlin medicinal wine, and special medicinal dishes provided by the manor had a limited number of times. If one wanted to enjoy them again, they could only buy them with money.

the ingredients for the supreme emperor set meal were available in this shop. as long as he bought them, master lin in the kitchen would help him make them.

in addition, the store had all kinds of quality 2 items. quality 2 strawberries, quality 2 watermelons, quality 2 okra, and quality 2 wild honey hawkbill were all essential products.

Moreover, Qin Lin would plant some different things on the Level 3 and Level 4 plots every day and pick out the two-quality ones so that the guests could have a different experience every day.

The manor didn't receive many guests anyway, so he just had to prepare a little every day.

"Let's see what's on the menu today." Tang Wan said.

Lin Liu nodded. After the shop opened, they had another kind of fun, and that was to stroll around.

Buying things was also a woman's pleasure.

Moreover, this shop could be considered to be even more high-end than Li Fei's luxury goods, and now it was as if it was open to them.

The things that the visitors of Linlin Manor's sales center wanted to grab, they could casually choose. This was also a very good experience.

Therefore, every day, they would buy high-quality cucumbers for beautifying purposes. They would also buy high-quality big beauty eggs for Master Lin to make egg custard.

In the Linlin villa's sales center, it was said that this kind of high-quality beauty cucumber had to be bought early in the morning every day. The high-quality big beauty egg also had to be won with a voucher, and only with the voucher could one be qualified to buy it.

Lin Liu and the other two girls entered the shop, and the first thing they saw was the big beauty egg in the middle.

Qin Lin had secretly replaced a batch of ducks, among which was a quality 2 beauty duck that could now lay eggs.

Therefore, now, the villa's sales center supplied one beauty egg, the manor supplied one, and one was left for Zhao moyin. If they were lucky, they could even leave one or two to hatch the duck Cubs.

Moreover, it was now certain that the ducklings cultivated from a Grade 2 cosmetic egg would degenerate to a Grade 1.

As for the Ducks cultivated with a Grade 1 appearance-enhancing egg, almost all of them had degenerated to ordinary ducks, and only a few of them could maintain a Grade 1.

Therefore, if he wanted to increase the quality by 2, he could only use the method of stealing a beam and replacing it with a pillar.

He just didn't know if the grade 1 appearance duck cultivated from a Grade 2 appearance-enhancing egg would degenerate after laying the egg. After all, it had already degenerated once.

"There's another premium beauty egg!" Lin Liu said in surprise as she entered the shop.

tang wan nodded her head in surprise. " yes, i can eat it every day. the egg and the cucumber salad have a great beautifying effect. it's better than any other skincare products. "

"Hey, there's even wine today." Lin Liu suddenly looked at an exquisite shelf. On it were three bottles of wine in an ancient bronze bottle, as well as some wine from other brands.

Of course, the Linlin medicinal wine was also a surprise provided by Qin Lin. However, it was not provided every day. After all, the wine was limited and was only provided occasionally.

Moreover, the price would be different every time, because the year might be different.

however, the other brands would provide more wine. moreover, they were also brought out from the game, so they were not old.

He had as much of this wine as he wanted. He had bought it outside and put it into the game, and it was not old either.

The three girls ignored the other wines and only saw the Linlin medicinal wine.

They both knew that their husbands liked to drink this wine. Moreover, they felt very comfortable after their husbands drank it.

Tang Wan immediately took a video of the Linlin medicinal wine and sent it to her husband.

Ming city.

In the Office of the Chairman of the blue ocean Group, Chen shengfei was also dealing with some documents. His wife was recuperating in Linlin Manor, and he missed her.

#### [Chapter 664 Xiangshui Tribute Rice Can Be Harvested](#)

Just as he was thinking about it, he received a message on WeChat.

Seeing that it was from his wife, he immediately picked it up to check. When he saw the video sent by Tang Wan, he was shocked.

In the video, there were three bottles of Linlin medicinal wine. They seemed to be placed on the shelves.

he was very clear about the effects of the linlin medicinal wine, so he immediately sent a message to ask, " "Honey, what's with this Linlin medicinal wine?"

Tang Wan's reply came very quickly. hubby, there's a binggui shop in boss Qin's Manor. You can buy many things that you can't buy outside. These three bottles of Linlin medicinal wine are available today.

Chen shengfei's eyes lit up when he saw the message and hurriedly sent a message: honey, then hurry up and buy these three bottles of wine. Hide them secretly and don't let Lin Liu and the others know.

"They're just next to us!" Tang Wan replied with an awkward emoji.

When Chen shengfei saw this message, he could only helplessly reply, " then there's no other way. Let's split it equally. Don't let others buy it.

Lin Liu had already gone to get the wine.

even if their husband didn't mention it, he would still take the initiative to buy it. as for the price, it didn't matter to them.

.....

In the office.

Qin Lin also called Lin Lanzi over and asked, "Have you sent the flower basket and congratulatory banner to Charming Fragrance?"

The Charming Fragrance company was the company that Huang Xin had invested 100 million to open in your city. The factory had not been built yet, but the office had been built in the Economic and Trade Building, and they would move in today.

Therefore, he naturally sent flower baskets and congratulatory banners to his old classmate's company.

However, the name 'Charming Fragrance' made him want to curse.

He did not know how Huang Xin had come up with such a name.

He was probably bad at giving names.

Lin Lanzi nodded. The order has been sent. It should be here by now.

"Alright, go ahead then, Manager Lin!" Qin Lin left the office after Lin Lanzi left, heading directly to your city's Economic and Trade Building.

As soon as they arrived, they saw three large banners hanging on one of the floors. They were all congratulatory banners for Charming Fragrance.

The Economic and Trade Building was often occupied by companies, and there were also often companies that closed down and left. Several companies might change on the same office floor in a year.

Therefore, the people who worked here wouldn't find it strange if there was a company opening in this Economic and Trade Building.

However, the company's opening today would make people take a few more glances at the congratulatory banner.

The congratulatory banners were also a way to show the connections of a company. Some people who were concerned about their reputation would even make many congratulatory banners and hang them with the names of a few companies.

It didn't matter if there were any companies like these. Outsiders didn't know about it anyway, and it would seem very cool.

Therefore, companies that only hung three congratulatory banners either appeared to have no connections or that the boss of the company was not flexible.

However, even though this company called Mei Xiang only had three congratulatory banners, no one would think that this company had no connections.

Because these three banners were all very impressive. The first one was made by Millennium Prize.

Everyone in your city knew that this was the number one advertising company in your city. The gift was because it didn't count as a business deal, but the two congratulatory banners were awesome.

One of them was actually an official congratulatory banner from you City County. This was not something that ordinary companies could enjoy. Only companies from the county that had attracted investment had the qualifications. This also showed that you city attached great importance to it.

And this was nothing.

The third banner was the most awesome one. It was a gift from Linlin villa.

everyone in you city knew that linlin villa had a lot of people. not to mention the 20000 daily customers, many people in you city had benefited from this.

Moreover, everyone knew that the owner of Linlin villa also owned the Linlin food company, which was famous for its Linlin ketchup, Linlin leisure tea, and Linlin medicine.

Everyone knew that with these three products, as long as Linlin food company had a stable market share, it would be a giant company once it was listed.

Now, this newly opened charm fragrance company actually had a banner from Linlin villa. How awesome was this? This also meant that this company was definitely not simple.

When Qin Lin arrived at the charm Company, Huang Xin personally came out to welcome him into his office.

To Qin Lin's surprise, there was another person in Huang Xin's office. It was his childhood friend, Qin Ren.

"Aunt." When Qin Ren saw her, he smiled and greeted her.

"Da Ren." qin lin replied with a smile.

He knew that Huang Xin had given the business to Qin Ren's company, so it wasn't strange for Qin Ren to be here after Huang Xin's office was completed.

"Qin Lin, take a look at how I'm doing." huang xin pointed at the office's decorations. he wanted to show off, but when he thought of the things in qin lin's office, he said, "Forget it. It's nothing compared to the yellow Rosewood and purple sandalwood in your office."

Although his office was exquisitely decorated, anyone could afford it.

Qin Lin's Red sandalwood tea table, yellow Rosewood desk, yellow Rosewood shelf, and yellow rosewood board were things that you couldn't get even if you had money.

"You've done a pretty good job with your office." Qin Lin said with a smile.

This was also the truth.

Huang Xin's office was also something that countless people yearned to own.

let's make tea. I've learned how to make tea since I came to you city. There was also a tea table in Huang Xin's office. He immediately called Qin Lin and Qin Ren to the tea table.

Qin Lin and Qin Ren didn't stay at Huang Xin's place for too long.

## [Chapter 665 Xiangshui Tribute Rice Can Be Harvested!](#)

However, when he left, Huang Xin gave him two bottles of perfume each, to bring back for Zhao moyin to use.

This was a product that his company would release in the future, and it was also a perfume that he had developed himself.

Qin Lin was a little curious about this. So, as soon as he returned to the manor's office, he locked the door and entered the game. He saw the remarks of Huang Xin's product:

[ charming perfume: normal! ]

[ this is an ordinary perfume that has reached the basic standard of the market, but there is nothing special about it. Without the brand's support, it will be difficult to break out of the market! ]

"Tsk." Qin Lin couldn't help but worry for Huang Xin when he saw the note.

This old classmate of his seemed to be a little worried. After all, he had just graduated and it was his first time in this line of work. He also did not have the support of a brand.

However, when he thought about how the other party could still go home and inherit the family business after losing 100 million Yuan, he realized that his worries were in vain.

100 million was a dream figure for many people, but for some people, it was just a practice.

As soon as Qin Lin logged out of the game, Li Kai came over in a hurry.

When Li Kai saw Qin Lin, he said excitedly, "Brother Qin, we now know the reason why those genetically mutated pistachios can purify the air."

I've brought some people with me to test and study them. We've discovered that these cosmetic chaos grass can release a special gas. This gas contains a variety of substances that can be stimulated through photosynthesis.

it's precisely these substances that can purify the surrounding air during photosynthesis. If this thing can be cultivated on a large scale, it will definitely be a huge contribution to the management of the air and environment.

Qin Lin naturally knew the reason why the purification grass could purify the air, but when he heard Li Kai's words, he instantly went into acting mode. He said in surprise, "if it's photosynthesizing, doesn't that mean that it'll be effective as long as there's sunlight? old brother li, how are the seeds?"

I've already planted them, " Li Kai explained. quite a few of them have already germinated over the past few days. Now, we're just waiting for this batch of seeds to grow.

Qin Lin nodded and remembered something. "By the way, old brother li, that batch of Xiangshui tribute rice is about to ripen."

The Xiangshui tribute rice was a late-ripened rice. Although the game didn't have a season limit and the time it took to grow was relatively short, it still took a long time to ripen after being planted in batches.

Moreover, these Xiangshui tribute rice were all of Grade 1, which was definitely more delicious, more nutritious, and had more anti-aging substances than the tribute rice from Xiangshui.

simply put, it was crushing a level.

He just didn't know if there was a way to spread the quality 1 Xiangshui tribute rice seeds on a large scale after he harvested them again.

Think about it, if everyone could eat Xiangshui tribute rice every day, even if it was just ordinary Xiangshui tribute rice, how much would the nutrition and anti-aging effect have in the long run?

That would be awesome just thinking about it, right?

However, he would have to wait until he harvested the seeds again and tested them in other places in you city.

"It's about to mature?" Li Kai's eyes lit up when he heard this.

This was Xiangshui tribute rice, and even old Yuan and his men couldn't produce it.

Moreover, he had personally cultivated this batch of Xiangshui tribute rice when he first started.

if this batch of xiangshui tribute rice was successful and the harvested rice was as delicious as that of xiangshui, it would be awesome and cause a sensation.

Of course, before he harvested anything, he didn't know what was going on with the rice. It could also be that it tasted sour and the cultivation had failed completely.

After all, no one had ever succeeded.

After elder Yuan's failure, no one was stupid enough to study it, and no one thought they would succeed.

#### [Chapter 666 Xiangshui Tribute Rice Is Actually Grown? And Its Quality Is Even Better? 1](#)

When the tourists of Linlin villa passed the floating bridge View area and the comprehensive sea of flowers, they would see a field of rice.

Many tourists were puzzled. After all, in a Scenic Area like Linlin villa, this kind of paddy field did not seem to match.

More importantly, the rice fields were tightly surrounded. Not only were there railings outside, but there were also warning signs. It seemed that the rice was not simple.

The tourists who came to the villa these days could see that the rice fields were golden, and the rich and dense rice had pressed down on the rice plants.

The next day.

Qin Lin and Li Kai had arrived very early, along with Yu Shui and the planting department's staff. They were all here to help harvest the rice.

Even Chen dabeai had come early in the morning.

One had to know that he was the one who had slipped through his pants and participated in growing the seedlings of the rice.

"I'll go down and take a look." Li Kai was the first to enter the paddy field. He squatted in front of a rice plant and reached out to pick a few grains of rice, then removed the shells manually.

After a while, a few green, Jade-like, crystal-clear rice grains appeared in Li Kai's hands.

the appearance of these grains of rice was the same as the xiangshui tribute rice that old brother qin had taken out previously.

Li Kai's eyes lit up when he saw this, and he subconsciously put the rice grains directly into his mouth.

A sweet and delicious taste instantly overflowed in his mouth.

Although the uncooked rice was still somewhat relevant, Li Kai could immediately tell that the Xiangshui tribute rice had been successfully cultivated.

Li Kai immediately said to Qin Yang excitedly, "Brother Qin, it's done, it's done. This Xiangshui tribute rice is done. Now, let's see what level the quality can reach."

Qin Lin naturally knew that the Xiangshui tribute rice would be ready. Seeing Li Kai's excitement, he went back into acting mode and said with a face full of surprise, "Really?"

Li Kai nodded heavily and immediately plucked a few grains of rice to remove their shells. He placed them near Qin Lin's mouth and said, "Old Brother Qin, have a taste. It's not even cooked yet, but it already has a sweet taste."

After a few grains of rice entered his mouth, Qin Lin could taste the dry and sweet taste. If they were cooked, they would definitely taste very good.

Just from the taste, he knew that the Xiangshui tribute rice had a quality of 1.

Li Kai turned to Yu Shui and the others and said, "you can come in and harvest now. calculate the area of each mu and record the yield."

"Okay, professor li." Yu Shui quickly nodded and then called the planting department staff to enter the paddy field to harvest.

most of the employees in the plantation department were older, and almost all of them had worked in the fields before, so harvesting rice was not a big deal for them.

After half a day, Yu Shui and the planting department's staff had finished harvesting the rice and began to weigh it.

"What's the yield per mu?" Li Kai saw that Yu Shui had finished weighing the items and quickly asked.

"One mu can produce 1500 catties of rice," Yu Shui said in surprise.

"So many?" Li Kai was shocked.

This was because it was a high yield.

According to the information he had found, the tribute rice in Xiangshui was only 1000-1200 Jin per mu. There was an additional 300 Jin.

Li Kai excitedly grabbed a bunch of rice from the pile and said, "Brother Li, I'll go to the laboratory to test the composition of the rice and see if there's any difference with the test data in Xiangshui. You can ask someone to remove the shell and see how it tastes at noon."

Qin Lin nodded. After Li Kai left, he asked Yu Shui to take the Xiangshui tribute rice to be removed from the shell. The plantation Department had already prepared the shell removal machine.

Qin Lin asked Yu Shui to take the Xiangshui tribute rice to the plantation Department for unshelling. He followed Yu Shui to check it out, and then returned to the manor's office with a bag of unsheathed rice.

He locked the door and entered the game. He saw the remarks of the Xiangshui tribute rice:

Xiangshui gongmi (can be changed): Grade 1 "

[ this is a special kind of rice that has been secretly cultivated. It is extremely rare and has rich nutritional value. Rich nutrition +1, taste +1, delicious +1, vitamin TPP anti-aging +1. ]

Obviously, it was of the same quality as the Xiangshui tribute rice grown from the game seeds.

This was also the first time such a scene had occurred.

In the past, the quality of the seeds that he had taken out from the game would deteriorate after planting them.

The Xiangshui tribute Rice's seed was a Grade 1 seed. After successfully planting it in the real world, it was still a Grade 1 seed and had not degraded.

This should be related to the fact that the seeds produced by the game had a chance of mutation and could adapt to the attributes of a change in environment.

In the beginning, the Xiangshui tribute rice could not grow anywhere else, and it was only by relying on special soil that the probability of mutation was triggered and it adapted to the environment of Linlin Manor.

Since it had adapted, its quality would not decline.

However, only the seed of the game could adapt to this kind of change in environment.

He just didn't know if the Xiangshui tribute rice seeds planted in this Manor could be planted in other places.

after all, it was still xiangshui tribute rice, which had very strict environmental requirements.

Qin Lin took the bag of Xiangshui tribute rice out of the game again. Then, he took the bag of Xiangshui tribute rice to the kitchen and gave it to Master Lin.

...

It was noon.

In the manor's dining room, academician Li, professor Ren, and Lin Liu were all in the dining room. They were all curious.

This was because the waiter had informed them that boss Qin wanted to invite them to try the rice that he had grown in the villa.

This was something they were very curious about.

Lin Liu and Tang Wan were also discussing curiously, "

[Chapter 667 Xiangshui Tribute Rice Is Actually Grown? And Its Quality Is Even Better? 2](#)

"Do you think boss Qin is going to treat us to Xiangshui tribute rice?"

"I think so. Didn't professor Li Kai and boss Qin train this before?"

Yeah, I heard from Li Qing that it didn't germinate at the beginning.

The three women had arrived at the villa very early and knew about the rice seedlings in the backyard of the original Hall. The key was that Chen Shengfei, Ma Levin, and Li Qing were frequent visitors of the villa. Li Qing, in particular, had been there for a period of time and knew more about it. He knew that Qin Lin and Li Kai were cultivating the Xiangshui tribute rice.

However, they also knew what Xiangshui tribute rice was and how rare it was. They heard that even old Yuan and his men failed to succeed.

They weren't sure if the Linlin Manor would be able to produce Xiangshui tribute rice.

However, their words attracted the attention of academician Li and professor Ren.

The two of them looked at each other.

Professor Li Kai was cultivating Xiangshui tribute rice?

Did this mean that the rice grown in the villa that boss Qin wanted to treat them to was Xiangshui tribute rice?

The two of them couldn't remain calm.

This was Xiangshui tribute rice.

Because of the rich nutrients and anti-aging substances in Xiangshui tribute rice, it was once listed as a key research project by the Chinese Academy of Sciences. The leader of the project was elder Yuan.

The result was obvious. The project was unsuccessful. In the end, because the research cost was too high and the experiment was too harsh, it was called off.

The Xiangshui tribute rice was greatly affected by the environmental factors.

The environment in other places could not meet the conditions at all. In those experimental plots, most of the rice seeds could not germinate. Even if they did germinate, they would taste bitter. There was not much nutrition in them, so they were inedible.

Now, Linlin Manor could actually grow Xiangshui tribute rice?

This seemed like a fantasy, but when he thought about professor Li Kai's nurturing abilities, it seemed possible.

Academician Li couldn't help but ask the three girls, " "You three, are you saying that professor Li Kai is growing Xiangshui tribute rice?"

The three girls had been recuperating in the manor for a long time, so they naturally knew the identities of academician Li and professor Ren.

When Lin Liu heard academician Li's question, she respectfully replied, " academician Li, I'm not sure. Boss Qin was indeed planting the Xiangshui tribute rice.

professor ren and academician li looked at each other again.

There was an inexplicable sense of anticipation in their eyes.

If Linlin Manor really managed to grow Xiangshui tribute rice, then it would be really awesome and would cause a sensation in this industry.

finally, while they were waiting, qin lin brought the waiter to serve the dishes. in addition to the usual medicinal dishes, the bowls of rice today directly attracted the attention of academician li and the others.

Academician li and professor Ren couldn't wait any longer. They stood up and walked up to him. They curiously picked up a bowl of rice each.

"Boss Qin, is this the Xiangshui tribute rice that you grow in your villa?" academician li asked hurriedly.

"Academician Li, you know that this is Xiangshui tribute rice?" Qin Lin nodded.

"Is this really Xiangshui tribute rice?" academician li was excited.

"You really managed to grow this thing?" Professor Ren said as he took the chopsticks and quickly put two mouthfuls into his mouth.

the next moment, he tasted the rice.

Xiangshui tribute rice was more delicious than ordinary rice.

A Grade 1 Xiangshui tribute rice had the attributes of +1 deliciousness and +1 texture, so the taste was naturally easy to taste.

"Although the taste of this rice can't be compared to the high-quality ones that boss Qin brought out before, it's almost the same as ordinary rice," professor Ren said immediately.

Naturally, the premium dish that professor Ren was referring to was the quality two resonance water tribute rice. The special medicinal cuisine was the rice that was paired with the quality two resonance water tribute rice.

the normal ones were the quality 1 xiangshui tribute rice.

in fact, he didn't know that ordinary xiangshui tribute rice wasn't so delicious. a grade 1 rice was one grade higher than the ordinary one, and a grade 2 rice was two grades higher.

Academician Li also picked up his chopsticks and took a few bites. He also felt the delicious taste.

"Boss Qin, have you tested the Xiangshui tribute rice?" he immediately asked.

Although the taste and texture were up to standard, the biggest reason why Xiangshui tribute rice could be called tribute rice was not because it was delicious.

After all, there were several types of rice that were more delicious than Xiangshui tribute rice.

The Xiangshui tribute rice was known as tribute rice mainly because of its rich nutrients and anti-aging vitamin, TPP.

Only with these could one truly have Xiangshui tribute rice.

Otherwise, it would still be a failed product. It would just be rice that was a little more delicious and had a better texture.

"Old brother Li is already doing the test," Qin Lin explained. "With the test data of the Xiangshui tribute rice as a reference, the test should be done soon."

Lin Liu and the other two girls didn't care about this anymore. After the waiter served their food, they couldn't wait to start eating.

To them, the taste and texture were already very good.

Moreover, the quality 1 Xiangshui tribute rice was hard to come by. In the past, they could not even buy much from Li Fei's luxury goods.

Most importantly, Li Fei had even used inferior products to fool them. The taste and texture were far worse than what they were eating now.

If boss Qin could grow the Xiangshui tribute rice himself, they would definitely be able to buy it in the future. They would be able to eat Xiangshui tribute rice every day, which was something they had never dared to dream of before.

After that, academician Li and professor Ren lost their appetites.

Both of them were looking forward to Li Kai's test results. Academician Li even anxiously urged Qin Lin to call Li Kai.

It was no wonder they were like this.

As researchers, nothing was more exciting than this.

Finally ...

In the afternoon, Li Kai finally finished testing the Xiangshui tribute rice grown in Linlin Manor. He brought the test report to the manor.

The moment Li Kai saw Qin Lin, he said excitedly, "Old brother Qin, can you guess the test results of the Xiangshui tribute rice planted in this villa? You'll never guess."

Qin Lin saw that Li Kai was keeping him in suspense and was about to say something, but academician li, who had been waiting for a long time, hurriedly said, " "Professor Li Kai, don't keep us in suspense. Tell us the test results."

When Li Kai saw that academician li had spoken, he immediately said, " "I've brought someone to test the Xiangshui tribute rice planted in the villa and then compared it with the test data of the Xiangshui tribute rice in Xiangshui."

in terms of various nutritional data and anti-aging components of vitamin TPP, the Xiangshui tribute rice grown in the villa is several times higher than that in Xiangshui.

Qin Lin wasn't surprised to hear this. It was normal for the Xiangshui tribute rice to be higher than normal Xiangshui tribute rice.

However, when academician li and professor Ren heard the results, they subconsciously walked over to Li Kai, wanting to see the test results.

It was difficult to cultivate Xiangshui tribute rice, and it was even difficult to cultivate inferior quality rice. How could Linlin Manor have grown better quality rice?

#### [Chapter 668 317-Follow Up With Full Force! The Benefits Are Hard To Estimate! 1](#)

Academician li and professor Ren took the test report from Li Kai's hand.

They could easily understand the contents of the report.

The Xiangshui tribute rice grown in Linlin Manor contained various nutrients and anti-aging ingredients, which were several times more than the test data from Xiangshui.

the two of them couldn't help but be amazed.

"Such test data can be regarded as a new variety of rice," professor Ren said in surprise, "it can not be completely regarded as Xiangshui tribute rice."

" professor li, what's the progress of the xiangshui tribute rice? " academician li asked li kai. " can it meet the requirements for large-scale cultivation? "

Li Kai naturally wasn't sure about this, so he could only say, " "Academician Li, I don't know yet. We still need to test it everywhere. After all, the Xiangshui tribute rice has high requirements for the planting environment."

"Then we'll only know next year?" academician li frowned.

He knew that the Xiangshui tribute rice was a late-ripened rice, and the planting time had passed this year. Otherwise, when winter came, the rice would not be able to survive.

we don't have to wait until next year, " Li Kai explained. our Xiangshui tribute rice is not restricted by seasons. It should be able to survive in winter.

When he had tested the Xiangshui tribute rice, he had discovered that it contained a special substance similar to the Linlin watermelons.

He was very familiar with this special substance. After all, he had done a lot of research on Linlin watermelons during his low-temperature genetic experiments.

This special substance was the reason why Linlin watermelons were not restricted by the seasons and could grow normally in winter.

Now that the Xiangshui tribute rice also contained this special substance, it meant that the Xiangshui tribute rice could also be grown in winter.

This was another aspect of tribute rice that was more powerful than that of Xiangshui.

Moreover, he knew that the Linlin watermelon and Xiangshui tribute rice were both grown from the special soil, so it was not surprising that they had some similar characteristics.

Qin Lin was the only one who knew the exact reason.

That was because the Xiangshui tribute rice seeds and watermelon seeds produced by the game had attributes that were not limited by seasons.

When academician Li heard what Li Kai said, he quickly asked, "Professor Li, when does your Linlin laboratory plan to start the experiment?"

we'll have to wait until the rice seeds are harvested," Li Kai explained. also, we'll have to go to other places to contract the paddy fields for the experiment.

Even though most of the Xiangshui tribute rice had been harvested, some were still left as seeds.

Under normal circumstances, rice seeds had to be carefully selected. However, this batch of Xiangshui tribute rice had very full rice. After some observation, there was no need to specially select.

Xiao Li, " professor Ren said hurriedly, " when you have contracted the paddy field, remember to inform us. We would like to see the situation.

Li Kai also nodded.

This was a small matter.

Qin Lin also wanted to know if the Xiangshui tribute rice, which had adapted to you city's environment, could be grown elsewhere.

Therefore, he also informed Shen Li at the first moment and asked him to bring people to various places in you city, even to other counties and towns in Ming city to contract some paddy fields, planning to test it in different places.

He planned to promote the Xiangshui tribute rice in the laboratory.

Firstly, Shen Li and the others had more experience. The mountain villa did not have the ability to promote this, and it would be a waste of time to force it to stay in the mountain villa.

However, the villa had previously contracted 5000 mu of land, and most of it was still empty, so they could open more artificial paddy fields.

Moreover, he could also contract more land to grow Xiangshui tribute rice.

No matter how harsh the Xiangshui tribute Rice's environmental requirements were, it had already adapted to the environment here. The new rice would definitely be planted closer to Linlin Manor, so it would be easier for it to survive.

As long as the Xiangshui tribute rice was planted on a large scale, it would be the best cover. When the time came, he could take out as many Xiangshui tribute rice from the game as he wanted, and no one would suspect him.

Secondly, they had to continue their research on Xiangshui tribute rice. Even if something happened to the newly harvested rice in other places, Linlin's laboratory could continue to study it. Perhaps one day, they could even produce an improved variety.

As for the 100% shares in the villa, the shares in the laboratory, and other shares, it didn't matter to him now.

Only by placing it in the most suitable place could its value be displayed.

Only the laboratory could do research on improved species.

however, the ownership of the cultivated xiangshui tribute rice also needed to be shared by the villa.

This way, the degree of freedom for the operation would be much higher, and he would have the final say.

after that, it was time to collect the rice seeds.

Harvesting rice seeds had different requirements from harvesting rice seeds. The rice seeds had to be exposed to the sun, and the water content had to be controlled to 15%.

As for the reason, Qin Lin didn't know.

This was the research and conclusion of elder Yuan's generation.

Yu Shui's plantation Department could handle these things. They were good at this.

Moreover, in the following time, Yu Shui would have to lead the planting Department to open up new paddy fields to plant Xiangshui tribute rice.

When Shen Li received Qin Lin's instructions, his expression was a little dazed.

This was because he had not received any news before. How could professor Li Kai suddenly come up with something like Xiangshui tribute rice?

He didn't know about Xiangshui tribute rice before he came to you city. After all, this luxury rice was too far away from his life.

However, after coming to Chairman Qin's place, he naturally knew and had eaten it. He knew how rare this thing was and how difficult it was to cultivate.

[Chapter 669 317-Follow Up With Full Force! The Benefits Are Hard To Estimate! 2](#)

Now, professor Li Kai had actually managed to cultivate the Xiangshui tribute rice.

This would be the second brand product of Linlin laboratory after the Linlin watermelon.

However, it would not be called Xiangshui gongmi anymore. It would be called Linlin rice.

If there was a special order from the higher-ups, it would be Linlin's tribute of rice.

Therefore, Shen Li also brought people to you city at the first moment to contract the experimental paddy fields in the surrounding counties.

He also wanted to know if there was a way to mass-produce the Xiangshui tribute rice.

Shen Li's actions were naturally known to you city, ning city, and the other county government officials.

After taking away the Linlin leisure tea from ning city, the surrounding counties had their eyes on Linlin's company and Linlin's laboratory, wanting to see if there was any chance to steal the chicken.

As long as it was successful, with Linlin company's past achievements, they would be able to solve the employment problem and increase their income.

Especially after Linlin's watermelons hit the market, people from other counties had already contacted Linlin's laboratory, wanting to see if they could get the laboratory to grow watermelons in their area.

For this reason, the few people in charge of the management under Shen Li would often have those people from the county come to try to establish connections.

Watermelons could not only be grown in you city, but also in other places.

Now, Linlin's laboratory had suddenly contracted paddy fields in various counties of Ming city with great fanfare. It was obvious that they were up to something big.

Therefore, people from all the counties were also inquiring about the situation.

You Cheng was the most direct. When he received the news, he immediately asked Chen Li to rush to Linlin Manor to ask.

He still couldn't see Qin Lin in the villa.

Qin Lin's office was no longer here.

He had to make a call before Qin Lin arranged for Gao Yaoyao to bring him to Linlin Manor.

Chen Li was rather curious about the Linlin Manor.

Everyone knew that Linlin Manor was a high-end place, and even if you had money, you wouldn't be qualified to live there.

However, the county people didn't know much about Linlin Manor, because they hadn't entered it yet. They didn't send people to inquire about it, but they had seen it from the publicity videos.

Chen Li followed him to the manor and saw the garden wall of the Golden Celebration ceremony that was isolated from the outside.

These flower garden walls were very stunning at first glance. Although they couldn't be compared to the interior scenery in the video, they were still very special as walls.

"Chen Xian, please come in!" Gao Yaoyao welcomed Chen Li into the manor.

Chen Li was rather curious about the scenery inside the manor. The scenery in the video was extremely beautiful.

However, when he entered the manor, the beautiful scenery was secondary. The special air quality as soon as he entered the villa made him feel a lot more refreshed.

It had been a long time since he had experienced the feeling of breathing smoothly. The air quality was only like this in the countryside when he was young, right?

manager Gao, the air in the manor is so good? " Chen Li couldn't help but be surprised. With this kind of air quality and the beautiful scenery, recuperating here would definitely be an extremely enjoyable experience, right?

Gao Yaoyao explained, " it seems that professor Li Kai has developed a new kind of pimple grass. This grass can purify the air. There are many of them in the manor, so the air quality is very good.

"Is there really such a grass? Then can we plant this makeup mess grass in batches now?" Chen Li was shocked. His eyes were filled with disbelief.

He knew how bad the air condition in the country was.

You city sought development, but as the number of factories in the industrial area increased, the air quality also decreased.

If there was such a powder chaotic grass that could purify the air, he would definitely recommend that the entire Sun County plant it.

Air quality was also very important to them for their regional tourism plan.

Moreover, he knew the value of this. In a city like Beijing, the cost of treating the source of the haze this year would be 760 billion.

Of which, purifying the air in the city cost more than 10 billion.

This was a terrifying expenditure.

If he could have this kind of powder mix grass, as long as he planted it in all the flower beds, beautiful plants, beautifying areas, and other places in the capital, how much money could he save to buy planes and cannons?

Even if it was used to benefit the people of the country, it could also greatly improve the various benefits of the people.

Gao Yaoyao shook her head. Chen Xian, I don't know the details. However, I don't think the research was successful. If it was, Linlin's laboratory would definitely make a move.

These words gave Chen Li a reminder.

Wasn't Linlin's laboratory doing something now?

Could it be that this kind of powder mix grass that could purify the air had succeeded in his experiment, so he had to find a place to plant it?

If that was the case, then Linlin's laboratory had really made another amazing thing.

This also made him look forward to it.

Chen Li followed Gao Yaoyao to Qin Lin's office and saw the three girls.

He naturally knew the three women. He had met them a few times in the villa. The three women's husbands had also left their names in you city, so he had to pay attention to them.

Two of them had invested 400 million Yuan in you city and were the best investors in you city. The county had always wanted to get in touch with them and build a relationship with them, but they had never had the chance.

As for Li Qing, he was professor Li's nephew and a member of the Li family in Ming city.

Chen Li was surprised to see professor Ren and an old man.

He naturally knew of professor Ren, as Linlin Manor had been on the hot search before.

However, the old man made him curious. "Manager Gao, is that professor Ren? Who was the old man beside him? Professor Ren seems to be very respectful to him."

### [Chapter 670 317-Follow Up With Full Force! The Benefits Are Hard To Estimate! 3](#)

Naturally, Gao Yaoyao knew the details of the guests in the manor. She explained, "that's academician li, the Chinese Academy of Sciences arranged for him to recuperate in this Manor. He's involved in the development of many strategic weapons, and the boss and professor Li Kai are very respectful of him.

chen li was also shocked when he heard about strategic weapons research. he now knew how important academician li was.

He also respected this kind of academician.

It was thanks to the research of these old Seniors day and night that the country was peaceful now.

very soon, chen li met qin lin. as soon as he saw him, he explained his intention, "Boss Qin, I'm here today to ask about Linlin's laboratory contracting land. I wonder if it's to try planting the powdered mess grass that can purify the air?"

"Chen Xian knows about this grass?" Qin Lin smiled. but the laboratory has contracted the land to try planting Xiangshui tribute rice. Our laboratory has succeeded in cultivating and growing Xiangshui tribute rice.

Chen Li was stunned when he heard about the Xiangshui tribute rice. He then said in shock, "Boss Qin, you're saying you can grow Xiangshui tribute rice?"

The county had always been paying attention to Linlin villa, so they naturally knew about the Xiangshui tribute rice. They also knew the significance of the Xiangshui tribute rice better than anyone.

It was a pity that Xiangshui tribute rice could only be grown in the area of Xiangshui. It had not been successfully grown in other places.

Now, boss Qin had actually grown this kind of thing in you city?

Once this thing appeared, how much attention would it bring to you city? That was almost unimaginable.

She had known that it could purify makeup; He was already surprised by the mess grass, but he didn't expect there to be Xiangshui tribute rice.

After Chen Li received the news, he did not stay any longer. After chatting with Qin Lin about the related matters, he left in a hurry and returned to the county and sun County.

Sun Xian was the one who was most concerned about this matter. When he saw Chen Li return, he immediately asked, "You got the news? Why did Linlin's laboratory contract those paddy fields?"

Chen Li hurriedly explained, "sun Xian, Linlin's laboratory is about to do something new. They can cultivate and grow Xiangshui tribute rice. They contracted the paddy field to experiment with growing Xiangshui tribute rice.

"Wait, you mean Xiangshui tribute rice? that kind?" Sun Xian was suddenly taken aback and asked with uncertainty.

"Yes, that's the kind." Chen Li nodded his head with certainty.

When sun Xian heard this, he said without hesitation, " immediately order people to follow up on this matter. Also, get people to cooperate with the official procedures.

He knew about the Xiangshui tribute rice and knew what it would mean if it could be grown in you city.

at the same time, not only you city, but also ning city and other people He County had also heard the news about xiangshui tribute rice from the people in charge of linlin's laboratory.

He was going to start the experiments in various places. There was no need to keep it a secret. Letting the counties know would be like letting them know and making them pay attention to this matter. Then, the future experimental planting in the laboratory would be more smooth.

However, when those counties in ning city knew about the news, how could they not pay attention to it? As long as they knew what the Xiangshui tribute rice represented, they would value it more than anything else.

Once this kind of thing could be successfully tested and planted in his own County, he would beg and beg for Linlin's laboratory to come to the county to plant it.

who wouldn't be envious of the benefits the people of you city got from working with linlin's laboratory to plant linlin watermelons?

If this kind of rice could be grown on a large scale, not only would the price be high, but it would also be easy to sell. The benefits that it would bring would be unimaginable!
