

The Game 681

[Chapter 681 Try And Test It Out! Increase The Medicinal Cuisine's Attributes! 2](#)

yes, this herbal dish has a strong effect of strengthening the body, treating weak body and energy, and prolonging life. However, the medicinal herbs are not cheap. Moreover, it has to be aged for a certain amount of time before it is effective. Ordinary people really can't afford to eat it. Qin Lin didn't mention the attributes of strengthening yang and kidney. As he spoke, he went to the stove and started fiddling with it.

minister lu also nodded when he heard the effects of the herbal dish.

It could be said that the three attributes of strengthening the body, treating the weak body and energy, and prolonging life were indeed in line with the requirements of the position of Emperor.

Especially when the Emperor was getting older, these three effects were especially important.

Moreover, even in the modern world, the properties of this medicinal cuisine would be very useful when the leader was older.

Just the effect of extending one's lifespan was astonishing.

Seeing that Qin Lin was about to start making the herbal dish, Master Lin was already focused. There was a look of excitement and conflict on his face.

he was excited because the boss was going to make a new herbal dish.

This was really rare.

He was at a loss because even if his boss taught him this medicinal cuisine, he wouldn't be able to make it with the same effect as his boss.

This was a huge blow.

Qin Lin had already started to seriously prepare this special Emperor's medicinal cuisine.

This time, he used a quality 2 wild fish.

because of the system, he was quite familiar with every step.

Master Lin and Minister Lu just watched from the side.

The two of them had to admit that Qin Lin's cooking was really natural and smooth, and it was very enjoyable to watch.

After a series of operations, Qin Lin also covered the pot and entered the final stage of stewing the fish.

A thick medicinal fragrance quickly spread out from the pot.

Master Lin was surprised when he smelled the medicinal fragrance.

This was because it smelled much better than before.

Qin Lin also smelled it.

This unique medicinal fragrance was indeed better than the medicinal cuisine he had made before.

this clearly showed that if the quality 1 medicinal herbs produced by the game were replaced, the medicinal cuisine would obviously have a better attribute effect.

Soon, the pot of emperor fish banquet's medicinal cuisine was ready.

Master Lin asked someone to bring the herbal dish out and put it in the main hall.

The restaurant was empty since it wasn't mealtime, but Qin Lin still asked the waiter to invite the three girls, professor Ren, and academician li.

Since it was already made, he would let everyone try it together.

"Boss Qin, you're making medicinal cuisines again?" professor Ren was surprised.

"It's not time for herbal dishes today," academician li also said. Qin Lin explained, " it's a herbal dish recipe given by Minister Lu. It's a special herbal dish used by the ancient emperors. I made it for everyone to try.

"The emperor's medicinal cuisine? Then I want to try it. It's all thanks to Minister Lu today." Professor Ren's interest was piqued.

After all, in ancient times, the profession of an Emperor really had a special meaning. Anyone who heard about the origin of this medicinal cuisine would be very interested.

boss Qin, " academician li asked curiously, " this herbal dish recipe was personally sent over by Minister Lu. The effects of this herbal dish shouldn't be simple, right? "

He had tasted boss Qin's herbal dish at Linlin Manor and knew its effects very well.

Therefore, the medicinal cuisine used by the Emperor must be extraordinary, right?

Qin Lin nodded and explained, " the effect of this herbal dish is not simple. It can even prolong one's life. As for how strong the effect is, we still need to test it to know.

professor ren's interest was piqued and he immediately said, " leave this to me. I'm good at testing. I'll take some to Linlin's laboratory for testing after eating.

Qin Lin nodded and said, " eat them all. No matter how effective the herbal dish is, it must be eaten. The most important thing is that it's delicious.

Since old brother li wasn't here, he could only trouble professor Ren.

After hearing Qin Lin's words, the others also started to eat.

Lin Liu and the other two girls waited quietly for the others to fill their bowls before going forward to fill their own.

They knew that this was just a side-trip, and that they had freeloaded this medicinal cuisine.

however, when they heard that it was a medicinal cuisine that only ancient emperors could eat, the three women were also very curious and looked forward to it.

After eating it, the three girls were surprised. They could clearly feel that the taste and texture were much better than before.

Especially the special medicinal fragrance, which was even better.

"Today's medicinal cuisine is even more delicious." Professor Ren could also tell.

Academician Li also nodded in approval.

The one who was the most surprised was Master Lin.

The boss's medicinal cuisine had reached another level, but he couldn't even learn the boss's previous level. Who knew that the boss hadn't shown his true ability before?

Naturally, Qin Lin also felt it.

This made him even more certain that the medicinal herbs planted in the game should be able to improve the attributes of medicinal cuisines.

This Emperor's medicinal cuisine was clearly enjoyed by everyone.

After professor Ren finished eating, he brought some herbal dishes to Linlin laboratory for testing. Minister Lu and academician Li followed him.

Qin Lin naturally returned to his office with some medicinal cuisine. He locked the door and entered the game to see the remarks of the emperor's medicinal cuisine:

special Emperor's medicinal cuisine: quality 3 "

[this is a special Emperor's herbal dish. It's very delicious and has a special effect: Deliciousness +3, taste +3 special deliciousness +2, special taste +2, special medicinal fragrance +2, body strengthening +2, yang boosting +2, kidney nourishing +2, treatment of body weakness +2, longevity +2]

After reading the notes, the original attributes of fish banquet + fish cooking remained unchanged.

However, the attributes of the medicinal cuisine recipe had changed. The special taste, special texture, and special medicinal fragrance had all changed from +1 to +2.

[Chapter 682 Try And Test! Increase The Medicinal Cuisine's Attributes! 3](#)

The increase in the quality of the medicinal ingredients could indeed affect the attributes of the medicinal cuisine.

&Nbsp; however, the other 4 effects did not increase.

However, these were all made from quality 1 herbs. If he kept planting herbs and chose quality 2 herbs that had a probability of appearing before making them, the four medicinal properties of the herbal dish might be increased again.

If it had the longevity +3 attribute, coupled with the quality 2 anti-aging attribute, it was possible to become immortal by eating it often.

Perhaps he would have no problem dancing with his grandson in a few decades.

Naturally, this was off topic. He didn't even have a child.

however, it was certain that such a combination would be very powerful.

qin lin logged out of the game, finished the herbal dishes he brought back, and asked the waiter to bring the bowl to the kitchen.

On the other side, professor Ren brought the herbal dish to Linlin's laboratory for testing. Academician li was his assistant.

It was definitely a rare thing for an academician-to-be like professor Ren and an academician like academician li to test a herbal dish together.

Minister Lu had nothing to do, so he sent all the three recipes that Qin Lin gave him back to the newly established Chinese Medicine Department of the Chinese Academy of Sciences. He also arranged for people to make the herbal dish and have it tested in the chemical Academy.

In the newly established Chinese Medicine Research Department of the Chinese Academy of Sciences, several old Chinese doctors quickly informed each other to meet in a conference room.

chu qingfeng was one of them. he was also quite old, and his hair and beard had already turned white.

He came from a family of Traditional Chinese Medicine Practitioners. A few generations ago, his ancestors had even been Imperial physicians.

However, in his generation, Western medicine was popular, and they needed a medical qualification certificate. He could pass the test, but he didn't want to suffer, so he simply gave up.

When he went for an examination, the examiners were still a few Western medicine students. They even checked him here and there, suspecting that he was cheating. They even looked down on Chinese medicine.

what the hell?

He wasn't going to take this lying down at his age.

Therefore, he agreed to his son's suggestion to change to herbal cuisine. However, after making herbal cuisine, the family earned more money than before.

this time, if it wasn't for minister lu's sincerity, he wouldn't have come out.

after chu qingfeng and the other old chinese doctors sat down, he saw minister lu's assistant take out some printed papers and distribute them. at the same time, he said, " Dear Seniors, Minister Lu went to seek help from a highly-skilled Chinese medicine practitioner regarding the recipe that you were arguing about. The results have been out. It's indeed the recipe for medicinal cuisines.

Chu Qingfeng's eyes lit up when he heard this because he had also analyzed that this was a medicinal cuisine.

When the old Chinese doctors heard this, they also took the three slips of paper that the assistant had given them.

They could tell that one of them was the previous recipe, so they immediately looked at the other two recipes.

When they finished looking at the formulas, they were all surprised.

"The combination of this medicinal cuisine's medicinal theory seems to be very reasonable."

indeed, this might really be the recipe for the herbal dish!

Hmph! Chu Qingfeng snorted. they even found out the origin of this medicinal cuisine and even marked which Emperor's Secret recipe used it. What does it seem to be? what does it mean? "

moreover, the medicinal ingredients in this formula are obviously effective in strengthening the body, boosting yang energy and nourishing the kidney, and treating weak body and Qi. It doesn't clearly meet the emperor's needs.

These words made the others feel a little awkward.

The assistant immediately said, "senior Chu, Minister Lu has already served the herbal dish. He's testing its effects." &Nbsp;

senior Chu is good at making herbal dishes. Minister Lu would like to ask senior Chu to make a herbal dish for the Chinese Academy of Sciences to test.

yes, help me prepare the medicinal herbs. Chu Qingfeng nodded. In his heart, he was a little curious about the person that Minister Lu was looking for, and he also admired him.

After all, he had only analyzed that it might be a secret recipe for herbal cuisines. He had been looking it up for the past few days but had no clue. Who knew that the person whom Minister Lu had found not only had researched it but also found the source?

This was something that couldn't be done without a deep understanding of Chinese medicine.

He wondered which family of Traditional Chinese Medicine Practitioners the other party came from.

[Chapter 683 A Malicious Monopoly? 1](#)

Time passed.

In Linlin's laboratory, professor Ren and academician li kept on testing, and they finally got the test results of the liquid medicine.

The two of them looked at each other subconsciously when they saw the test results.

Professor Ren was surprised. this liquid really does contain ingredients that can increase cell vitality and increase the number of cell divisions. After comparing it with the data from the Chinese Academy of Sciences, it really does have the effect of prolonging life.

Minister Lu subconsciously asked, " "Professor Ren, Are you sure?"

Professor Ren nodded. yes, it's confirmed. Also, according to the test results, the effect is somewhat unbelievable.

Academician li added, " professor Ren has checked. The Chinese Academy of Sciences also has relevant records of this substance. However, those records are far from the effects of this herbal dish.

Minister Lu, congratulations on finding another good item. Although it's hard for ordinary people to use it, the higher-ups have already made use of it.

Minister Lu naturally knew about this.

Many of the leaders were old and busy with important matters. They often stayed up late and had various physical problems. Developing drugs to treat their physical conditions was also the task of the medical research Department at the Chinese Academy of Sciences.

Moreover, the task of this Department was very important.

Now, this herbal dish seemed to be able to solve this problem perfectly. Moreover, this herbal dish was much stronger than the medicines developed by Western medicine.

Once the herbal dish was placed on the leader's table, Chinese medicine would be valued even more.

After experiencing all this, he felt that it was better for Chinese medicine and Western medicine to go hand in hand. He could not be biased towards one side.

Perhaps, after Chinese medicine became popular again, the unspoken rules of Western medicine, such as treating patients randomly and charging fees randomly, could also be improved.

After all, it didn't matter if one of them was the only one in power, but it was a different story if there were external threats.

Minister Lu took out his phone and made a phone call. He wanted to rush the Chinese Academy of Sciences to get the results as soon as possible.

Not long after, Minister Lu also received a report from his assistant. The assistant reported excitedly, " department head, we've already studied and tested the results. This medicinal cuisine is very effective in strengthening the body, boosting yang and kidney, treating weak body and energy. It even has the effect of prolonging life.

This was something Minister Lu already knew. When he heard the report, he urged them to send the test results over. Then, he handed the test results of the Chinese Academy of Sciences to academician li and professor Ren.

The two of them took the two reports and looked at them. They were stunned.

"How did this happen?" Professor Ren said with a frown.

there's such a huge difference. Did the test go wrong? " academician Li said in disbelief.

Minister Lu had a bad feeling when he heard their conversation. He asked, " "Professor Ren, academician li, is there a problem with the test?"

Professor Ren nodded and explained, " the results of the hospital's test are much different from ours. If we say that the longevity-extending effect of boss Qin's herbal dish is 10, the results of the hospital's test are only 3.

"Why is there such a big difference?" Minister Lu instantly frowned.

Professor Ren frowned and said, "could it be that the age of the medicinal herbs used is too young?" Boss Qin said that the herbs required for this dish are very old."

Minister Lu nodded and felt that it was possible. He immediately called his assistant.

as soon as the call went through, he asked, " Master Chu, what year are the herbs used to make the herbal dishes? "

" director, " the assistant asked, puzzled. " master chu said that he's already using the best medicinal herbs on the market. "

then why is there such a big difference in the results of the hospital's tests? " Minister Li was puzzled and ordered, " "Ask Master Chu and see if he knows the reason."

At the Chinese Academy of Sciences.

After hanging up the phone, Minister Lu's assistant immediately went to find Chu Qingfeng to ask about the situation.

At this time, Chu Qingfeng was also studying the emperor's medicinal cuisine secret recipe in his office.

After he had personally concocted the herbal dish, he had analyzed the theory of the medicine. He had to admit that the herbal dish was amazing. It was probably much better than the herbal dishes at home.

However, this secret recipe was destined to be used by the leaders in the future to nurse their bodies. He had signed an agreement when he came to the Chinese Academy of Sciences. It was no problem for him to make this herbal dish often, but it was impossible for him to sell it at home. He was not that insensible at his age.

Seeing Minister Lu's assistant come in, Chu Qingfeng also asked, " assistant Xiao He, what's the result of the test for the herbal dish? "

Assistant Xiao He frowned. senior Chu, the department head said that the herbal dishes you made are very different from the ones made over there. He asked me to ask you what could be the cause of this.

"Why would I?" Chu Qingfeng stood up in surprise. I followed the recipe completely. If there's really a big difference, it might be that the heat control, the proportion of the medicinal materials, and the time are not right. I have to see the other party's operation with my own eyes to be able to perfectly copy it.

after getting chu qingfeng's reply, assistant xiao he immediately reported it to minister lu.

In the manor's office.

Qin Lin looked at the game in his mind's screen. A herb planted in the level 2 herb garden had matured again. He controlled the game character to pick it up, and then controlled the game character to go to the storage room immediately.

When he reached the storage room, a smile appeared on his face. He had just harvested this type of medicinal herb. Other than the quality 1, he was lucky to have found some quality 2 ones.

[Chapter 684 A Malicious Monopoly? 2](#)

Although there weren't many of them with a quality of 2, they were still very rich if they were kept to be used for medicinal cuisine.

Qin Lin controlled his game character to go to the herb garden and planted another herb in the garden.

This herb garden did not produce quality 2 herbs in every batch. Therefore, it would take a little more time to gather all the quality 2 herbs.

Whether or not this Emperor's medicinal cuisine could gain the longevity +3 attribute would depend on these quality 2 herbs.

Just as he planted the medicinal herb, a knock sounded on the door.

Qin Lin opened the door and Minister Lu came in hurriedly. "Boss Qin, I'll have to trouble you with another matter."

"What's wrong, Minister Lu?" Qin Lin asked, puzzled.

Minister Lu explained, "I've sent back the secret recipe of the emperor's herbal dish. An old Chinese medical doctor who is very good at making herbal dishes has made the herbal dish according to your recipe. However, the test results are far inferior to yours. So, I want to record a video and let the other party try making it again according to the video."

Qin Lin understood the reason when he heard this. This was not something that could be learned by recording a video.

He had taught Master Lin step by step. Master Lin had been practicing for so long, but he still couldn't create the attributes given by the system.

However, he couldn't say it out loud in this situation. Seeing that Minister Lu had spoken, he could only nod and agree, "Minister Lu, let's go to the kitchen!"

"Thank you, boss Qin," Minister Lu said with a happy face.

Qin Lin went to the kitchen and asked Master Lin to bring him the herbs needed for the emperor's medicinal cuisine that he had brought from the game.

Master Lin heard the instructions and picked up the herbs one by one. He even took the initiative to help Qin Lin wash the pot and prepare the tools.

Seeing Qin Lin start to make the herbal dish, Minister Lu also took out his phone and started to take pictures from the best angle.

Chu Qingfeng, a senior practitioner of Traditional Chinese Medicine, had said that as long as he recorded a video and saw how boss Qin did it, he could perfectly replicate it.

Master Lin seemed to have guessed Minister Lu's intention, but he shook his head. He couldn't even learn it if his boss taught him step by step.

Lasda, the number one chef in Western food, also recorded a video to learn, but he didn't manage to learn it.

Minister Lu's plan was destined to fail. Naturally, he wouldn't be so insensible as to remind him.

Soon, Qin Lin made the herbal dish again. Minister Lu also filmed the whole process.

After the herbal dish was ready, Qin Lin called professor Ren and the others to eat it together.

This time, Minister Lu sent the video back as soon as he ate the herbal dish.

At the Chinese Academy of Sciences.

Minister Lu's assistant, Xiao He, looked for Chu Qingfeng as soon as he received the video. senior Chu, Minister Lu has taken a video of the other party making medicinal cuisine. I've already sent it over. Take a look.

Chu Qingfeng took the video curiously. He was quite curious about the Chinese medical doctor Who had researched the secret recipe of the herbal dish. This time, he could finally see the real face of the doctor.

However, when he saw the video, he recognized that the person who made the herbal dish in the video was a very young man. This made him ask in confusion, " "Who is this young man?"

Assistant Xiao He quickly explained, " this is boss Qin. He's the one who discovered the secret recipe of the herbal dish. Before this, he also cracked the body-strengthening liquid and the colon cancer treatment liquid that is currently in clinical trials in the hospital from those secret recipes.

he's too young, " Chu Qingfeng said in surprise. which family of Traditional Chinese Medicine is he from? "

He had thought that the person who had developed this herbal dish was an old Chinese medicine doctor like him.

Moreover, he had heard of the body-strengthening liquid and the liquid for treating colon cancer. In order to encourage them, Minister Lu told them some information about these two Chinese medicine liquids.

Even though he was surprised when he first heard that Chinese medicine had something like body-strengthening liquid, it was the first time in his life that he had heard of it.

At that time, he thought, how high must the Chinese medical knowledge of the person who could find and accurately research this liquid from a Chinese medical recipe that no one could confirm be?

He had never thought that the other party would be so young.

This was unbelievable. Normally, it was impossible for such a young man to have such high attainments in Chinese medicine.

Unless the other party was a genius.

"Senior Chu, the other party is the owner of Linlin villa!" Xiao He's assistant immediately said.

"Linlin medicinal wine!" Chu Qingfeng said in surprise.

He knew about Linlin villa because he had paid attention to the Linlin medicinal wine.

Back when the Linlin medicinal wine was so popular on the internet, many people from Traditional Chinese Medicine families must have inquired about it. According to the effects described on the internet, it might have been produced by another Traditional Chinese Medicine family.

However, there was too little Linlin medicinal wine on the market, and they had no way to buy a bottle for research.

who knew that the owner of linlin villa was so young.

Chu Qingfeng didn't dwell on this matter. He immediately started to watch the video. After watching it carefully a few times, he said with confidence, " assistant Xiao He, please help me prepare the ingredients. I'm confident that I can make it perfectly now.

Xiao He's assistant nodded and immediately went to prepare the medicinal herbs.

After the ingredients were prepared, Chu Qingfeng began to prepare the medicinal liquid. He handed a portion of the medicinal liquid to Xiao He's assistant, " assistant Xiao He, go and check again. It should be almost done.

Assistant Xiao He nodded and immediately went to test the liquid.

Chu Qingfeng began to wait. He even started to look forward to it. After all, they were all Chinese medicine doctors. He didn't want to lose to a young man in making this kind of medicinal cuisine.

[Chapter 685 A Malicious Monopoly? 3](#)

So, the next day, when Xiao He came with the test results, Chu Qingfeng asked in a hurry, " Assistant Xiao He, how did it go?"

Xiao He's assistant frowned. senior Chu, the result of the lunch box was the same. The difference between your medicine and boss Qin's medicine is still too big.

"Why would I?" Chu Qingfeng's expression turned ugly. "What's wrong? Assistant Xiao He, please help me prepare the medicinal ingredients!"

Assistant Xiao He nodded and began to prepare the medicinal ingredients for Chu Qingfeng.

Chu Qingfeng was not willing to admit defeat and started to make the herbal dish again. Once the herbal dish was done, he handed it over to assistant Xiao He for testing.

However, in his anticipation, Chu Qingfeng once again received the results that little he had brought. The difference was still huge.

This time, Chu Qingfeng was puzzled. He had always prided himself on his Chinese medicine skills, but how could the medicinal cuisines he made be so different from boss Qin's?

Was he really not as good as a young man?

Chu Qingfeng was unconvinced. He asked assistant Xiao He to prepare the medicinal ingredients and make the herbal dish again, but the result was obviously the same.

This time, he had really suffered a blow.

However, he had given him the recipe and the video. If he couldn't make it, it meant that he was not capable enough. He didn't suspect that boss Qin had tampered with the herbal dish.

After all, he didn't care about the body enhancement liquid or the medicine for colon cancer at all.

Although he wasn't convinced, he wouldn't measure a gentleman's heart with his own mean measure.

In the end, Chu Qingfeng had no choice but to look for external help, which was the other old Chinese medical doctors in the hospital. Couldn't these old guys work together?

Chu Qingfeng did as he said. He immediately informed the old Chinese doctors and told them about the medicinal cuisine.

These old Chinese doctors were shocked when they heard this. After all, they knew of Chu Qingfeng's abilities.

"How can a young man be so powerful?"

"Everyone, let's do it together. I don't believe that a young man like him can do it. We old guys can't."

"....."

Following that, these old Chinese doctors and Chu Qingfeng began to study the emperor's medicinal cuisine recipe and the video.

Not long after, these people worked together to make a herbal dish and then let assistant Xiao He take it for testing.

But when the results came out, these people were completely embarrassed, because the test results were still the same.

The old Chinese medicine doctors could no longer remain calm.

"How could this be? it's a little strange!"

the steps and proportions are all correct. Why is the result so different? "

"I don't believe it. Let's try again!"

"....."

Chu Qingfeng let out a deep sigh. He already had a premonition that even if all of them worked together, they still wouldn't be able to deal with that young man.

The result was obvious.

These people tried again, but the final result was the same.

...

Linlin Manor.

Minister Lu was naturally also Xiao He's assistant. He got the information about Chu Qingfeng and the others preparing the medicinal cuisine, which made him sigh silently.

These old Chinese doctors didn't seem to be as good as boss Qin. Otherwise, why would the effects of the herbal dishes be far inferior to boss Qin's?

However, when he thought about how boss Qin had easily researched the formula that these people had been fighting over, he seemed to find it normal.

After hanging up the phone, Minister Lu could only sigh helplessly. However, it was better than nothing to be able to produce 30% of the effect of boss Qin.

As Minister Lu was thinking about this, he suddenly received a call. After picking it up and hearing the news from the other side, his face changed. "What? Tobidong pharmaceuticals was acquired and controlled by Xian Sheng pharmaceuticals? Damn that X company!"

When Minister Lu heard the news, he didn't even have the mood to think about the emperor's herbal dish. He immediately ordered someone to book a plane ticket. He wanted to return to the capital immediately.

It was no small matter that Tobidong pharmaceuticals was acquired by Xiansheng pharmaceuticals. This company had a medicine called batromase injection, which was the only medicine in the country that could treat cerebral infarction.

This Xiansheng pharmaceuticals was a pharmaceutical company of the Association. The other party had always wanted to acquire this Tobidong pharmaceuticals and obtain the batrion injection to complete the monopoly of this type of medicinal liquid.

However, Tobidong pharmaceuticals had always refused. They knew the purpose of raising the liquid medicine first and colluding with the Liu family behind the scenes.

However, just last year, through foreign channels, United X helped Tobidong medical liquid to obtain the sole agent for the raw materials of batramerin injection in the country.

Tobi Dong, whose raw materials were cut off, couldn't hold on any longer. Xiansheng pharmaceuticals even threatened to acquire it. Because of this, the only Emergency Medicine in the country that had brain problems was forced to stop production after last year. Thousands of patients had no way to seek medicine, and countless people lost their lives.

Because of this, the higher-ups even fined Xiansheng medical company 100 million Yuan.

However, Xiansheng pharmaceuticals and the Liu family Alliance X didn't take this matter to heart. They even released a company announcement saying that this case wouldn't affect the company's finances and that everyone should rest assured.

He didn't expect that the other party didn't care about the attitude of the higher-ups at all and still bought Tobidong pharmaceuticals.

This was equivalent to saying that the first aid medicine for cerebral infarction in the country was completely monopolized by Xiansheng medical company. What was this Liu guy trying to do?

But now that the situation was like this, he had to go back immediately to understand the situation. If he really had no choice, the Chinese Academy of Sciences would have to fully invest in the research of this first aid medicine to treat cerebral infarction.

He couldn't let the other party do whatever he wanted.

He just didn't know if there was such a formula among the ancient Chinese medicine recipes.

If there was, it would be much faster to find it.

[Chapter 686 What Is The Three-Colored Watermelon? 1](#)

Three days passed in the blink of an eye.

Linlin Manor, the sun was shining brightly. The purification grass was slanted in the direction of the sun, wantonly purifying the air in the manor.

Professor Ren and academician Li were taking a walk under the sun.

In Qin Lin's office, he looked at the virtual screen in his mind and controlled his game character to harvest the herbs in the herb garden.

This time, his luck was pretty good. This batch of medicinal materials had a good chance of producing some quality 2 medicinal materials.

Now, planting medicinal herbs every day and waiting for his luck to produce a quality 2 medicinal herb had become his daily task.

Moreover, after so many days of planting, most of the ingredients that could be used to make the emperor's medicinal cuisine were of Grade 2. He could also try to see if he could make the longevity +3 attribute.

Qin Lin went out of the office and went to the warehouse to put the quality 2 herbs in the game into a bag and took out the quality 1 herbs that he had grown recently.

Anyway, these herbs were prepared in the manor and would be useful. Even if Master Lin couldn't produce the system's attributes, he could still produce some effects with the quality of 1 materials.

Qin Lin drove back to the manor and saw three luxury cars parked in the villa. They were Chen Shengfei's and his two friends' cars.

He didn't expect the three of them to arrive so quickly.

They were naturally here to pick up their wives.

Lin Liu and the other two girls were already in their last one or two months. No matter how good this Manor was, it was too far away from Ming city. They didn't have the equipment and ability in this area.

In the manor.

Chen Shengfei, MA Levin, and Li Qing had already gathered with Tang Wan and the other two girls in the hall.

To be honest, the three of them were a little surprised to see their wives this time.

During the time they had spent recuperating in Linlin Manor, they had clearly discovered that their wife had become more beautiful, her skin had become fairer, and she had become much younger.

A woman in her 30s was already mature and charming, and now she was even more attractive.

This was naturally the effect of the two-grade cosmetic eggs and two-grade cosmetic cucumbers.

In this Manor, no one would even fight with them for these things.

That was very satisfying!

Naturally, other than the fact that their wives had become more beautiful, the three of them were most happy about the wine.

"Honey, it's all thanks to you." Chen Sheng Fei held the bottle of Linlin medicinal wine in his hand and said with a smile.

Li Qing and Marvin were the same.

They really did not expect Qin Lin to sell this medicinal wine in the shop in the manor.

Although they could get the wine from Qin Lin if they wanted it, they could never have too much of it. An unexpected harvest would always be more pleasant.

Li Qing was naturally the most surprised. There were already several bottles of wine in front of him. In addition to the Linlin medicinal wine, there were also other brands of wine that were older than the year.

After all, he was a Wine Master, and wine was not the only thing that he was interested in. Other wines were treasures to him as well.

Moreover, this kind of aged brand wine was very rare in the outside world.

Now, he had taken all of them in one go, and there were several bottles.

It had been a long time since he had been in such an excited shopping mood.

"old chen, old ma, old li, i knew it was you three when i saw the car outside." Qin Lin came in with a few bags.

When they saw Qin Lin, Chen shengfei and the other two immediately went forward to greet him.

"Qin Lin, I heard that you've come up with a new type of Emperor's herbal dish. I wonder what flavor it is?" Chen shengfei asked with anticipation.

Qin Lin laughed and immediately understood. He took the bags in his hand and said, " you guys came at such a good time. It's almost noon. I'll cook a meal for you guys to try as a welcome.

These words made the three of them look forward to it even more.

To be honest, after eating Qin Lin's cooking, they really felt that the delicious food outside was trash.

Qin Lin's food really made people think about it day and night.

Qin Lin chatted with the three of them for a while before going into the kitchen. The bags in his hands were all filled with quality 2 herbs.

The quality 1 one was still in the car. He would ask Master Lin to bring someone to bring it in.

"Boss, are you going to cook again?" Master Lin asked as soon as he saw Qin Lin. After all, Mr. Chen and the other two were outside.

"Help me prepare!" Qin Lin nodded. He picked up the quality 2 herbs and began to fiddle with them. At the same time, he ordered, Master Lin, prepare some special jars and place these herbs in one place. These herbs are all older.

"Okay, boss." Master Lin knew that the boss had specifically instructed him to do so, which meant that the age of this medicinal herb was definitely not ordinary.

Qin Lin started to make the emperor's herbal dish again. He used the quality 2 fish meat and a large number of quality 2 herbs.

With a skillful and smooth operation, the pot of Emperor medicinal fish was ready soon.

After that, Qin Lin asked Master Lin to make some more dishes with the quality 2 ingredients before sending the Emperor medicinal fish out.

"It's here. Just the smell alone is enough to make people drool." Chen Sheng Fei swallowed his saliva when he saw the emperor's medicinal cuisine.

It wasn't that he was praising her, but that the special medicinal fragrance really made his saliva secrete faster.

"Try it." Qin Yang said.

Chen Shengfei and the other two naturally did not stand on ceremony. They picked up the bowl and filled it with medicinal cuisine and ate it.

The medicinal cuisine made from the quality 2 herbs was obviously more delicious.

"Qin Lin, your cooking skills have gotten even better." Chen Sheng Fei.

"Yeah, it's more than just a little better than the previous ones," Li Qing added.

This really surprised them.

At first, they thought that Qin Lin's fish banquet was already very good and even compared him with old man Yang.

[Chapter 687 What Is The Three-Colored Watermelon? 2](#)

who knew that Qin Lin's cooking skills would get better and better.

Now that he was eating the emperor's herbal dish, the red door banquet that old man Yang had prepared before would fall to a lower grade and could not be compared with Qin Lin's herbal dish at all.

After Qin Lin greeted Chen shengfei and the other two, he also took some of the medicinal cuisine made from these 2 quality herbs back to the office and brought it into the game.

[special emperor's medicinal cuisine: quality 3]

[this is a special Emperor's herbal dish. It's very delicious and has a special effect: Health +3 longevity +3]

qin lin saw the remarks and knew that he had achieved his goal. most of the emperor's medicinal cuisine made with quality 2 herbs had no changes in other attributes, but the attributes of strengthening the body and prolonging life had become +3.

Therefore, if he ate the emperor's medicinal cuisine often and went to the disco with the young people decades later, he might be able to dance better than the young people.

In the evening, Chen shengfei and the other two left with their wives.

In other words, Linlin Manor's recuperate quota was now three.

qin lin sat in front of his desk, turned on his computer, and went to the linlin manor application page. a new number of sanatorium quotas were announced.

At the same time, he took out his phone and called Liu Yi.

The other party had already applied last time. He wanted to recuperate his father for a while, but because of the sudden arrival of academician li and professor Ren, he rejected Liu Yi's application.

Now that the quota was empty, he intended to give it to the other party.

although they weren't as close as old chen and the other two, they knew each other after all. the other party's attitude had always been good.

Ming city.

Liu Yi was also entertaining two cooperative clients who had been working with him for many years. Today, they needed to sign a contract for a new cooperation project.

after signing the contract, his phone rang. seeing that it was boss qin, his face lit up with joy. he hurriedly told his two business partners and then went to the side to pick up the phone.

This made the two clients a little confused.

they knew that liu yi's group was quite powerful in ming city.

Whose call was it that made this President Liu so anxious?

Liu Yi went to the side and answered the call. He said, "Boss Qin, what's the matter?"

He still owed boss Qin a favor because of the cooking competition with lasda.

If the other party had any orders, he would definitely do it.

Qin Lin's voice also rang out. chief Liu, last time you applied for a place for father's treatment at Linlin Manor. Now, there is an empty place. Your application has been approved.

Liu Yi didn't expect this, and his face immediately showed surprise, "Really? boss qin, thank you so much."

After hanging up the phone, Liu Yi's face was full of smiles. He returned to the tea table and sat down. He said to the two clients apologetically, "I'm sorry, I have to answer this call."

chief Liu, "one of the clients said in surprise, "whose call is this? it actually made you so happy."

"It seems like something good has happened to you, chief Liu," another client chimed in.

Liu Yi didn't try to hide it. He smiled. it's good news. I applied for a place to recuperate in Linlin Manor. Now, Mr. Fang called me and said that I have a place.

"Linlin Manor?" I heard that it's hard to apply for treatment at this Manor, "the first client said in surprise. I know a boss who wanted to go, but his application was rejected.

Liu Yi smiled. it's very difficult. Ordinary people can't go. I'm lucky that I have a good relationship with Mr. Fang.

"I didn't expect chief Liu to know the boss of Linlin company. he's not a simple person, but he's always been mysterious. "The other customer was a little envious.

Everyone knew that Linlin's company was not simple.

The market share of the Linlin tomato sauce, Linlin leisure tea, and Linlin medicine was getting higher and higher. It could be said that they were making a lot of money every day.

There's also Linlin's laboratory.

Anyone with a good eye would know that once Linlin company's power was revealed, their companies would be nothing.

Now, not only did boss Liu know the boss of this company, but the other party had also called him personally. This was really an enviable network.

Liu Yi also smiled and said nothing. He wouldn't say much about boss Qin's information. After all, boss Qin chose to keep a low profile and didn't want the outside world to know. He wasn't an insensible person.

In the evening, after he entertained two customers at a big restaurant, he went home to tell his father the good news.

Although the group had grown in his hands, it was also thanks to the good foundation laid by his father. For this Foundation, his father had also fallen ill and had poor health.

...

The next day.

Qin Lin returned to the office after delivering the things. He sat in front of the computer and looked at the application to stay in Linlin Manor for recuperation.

after one night, there was a long line of people who applied, and these people who could apply could basically afford to pay the three million threshold fee.

This was because the manor's application had already been set up to pay a security deposit to screen and eliminate those who wanted to join in the fun.

Otherwise, if anyone applied, just looking at the application information would be a headache.

Unfortunately, after the night passed, the applications were all ugly. The only one with better information was someone who surprised him.

It was actually that young master Wang.

That's right, it was the man who was known as the nation's husband.

Although he knew that this Manor would attract such people after it was opened, he didn't expect it to be so fast.

However, Qin Lin still rejected the application. It would have been better if it had been the other party's father, Wang Yiyi.

This little Wang was really not qualified.

He was famous, but compared to Liu Yi, he was a super younger brother.

After looking through all the applications, none of them passed. In that case, he would leave the quota empty.

The manor was not for the sake of making money. Even if there were no guests, they would not let people of lower class in.

After reading the application information, Qin Lin looked at the screen in his mind again and controlled his game character to go to the lake mine to mine.

When he had leveled up earlier, he had only dug the sixth floor of the lake mine. He had not dug the rest yet.

this time, he directly controlled his game character to enter the seventh floor and began to dig.

Unfortunately, even after the seventh floor was excavated, there was no harvest, only gold, silver, and copper.

After that, he controlled the game to enter the eighth floor, and then the ninth floor.

Other than a few pieces of diamond ore, there was still no harvest.

This made Qin Lin sigh at his bad luck today and he wanted to control his game character to leave.

it's not a good day to dig.

However, in the end, he still controlled his game character to enter the 10th floor and continue digging.

Fortunately, he didn't control his character to leave. After digging the first square on the 10th floor, an unexpected system notification appeared again.

[congratulations, you have discovered a special planting stone!]

It was this thing again. This meant that he could buy another special seed.

To have such a harvest at the beginning of the 10th floor, he immediately pursued the victory and controlled his game character to dig again. Get up, maybe all his luck was on this floor.

however, it was a pity that after the tenth floor was excavated, there was no further harvest. moreover, when he was about to control the game character to enter the eleventh floor, he received a prompt about the level limit.

He had no choice but to control his game character to leave the lake mine, head to the seed shop in ore town, and click on the seed shop owner.

[wow, it's really this kind of stone. Can you give it to me?] [with this stone, I can develop a special plant!]

It was the same conversation as last time.

For some reason, Qin Lin felt that this NPC was a little exaggerated. This was the first time he had such a conversation, and he was repeating it the second time. The game producers were really lazy. Was it so difficult to think of a few more sentences?

Despite his complaints, Qin Lin still chose "yes."

The next moment, the special seed stone disappeared. When he clicked on the seed store owner's option again, he saw that there was another special plant on the list of plants sold by the seed store owner.

But when he saw this special seed, he was a little dumbfounded.

What the hell was this?

[three-colored watermelon seed: quality 2]

[this is a special seed that was cultivated by the owner of the seed store with a special seed stone. It's a very special watermelon!]

[Chapter 688 Three Colors And Three Flavors! There's Actually A Quality 1 Tomato!](#)

This was the first time Qin Lin had heard of the three-colored watermelon.

Could watermelons grow into three colors?

Otherwise, he wouldn't have given it a tricolored name for no reason.

However, one thing was certain, and that was that a seed with a 'seal' was definitely not ordinary.

He had spent a special seed stone to get the special seed. Qin Lin decisively controlled his game character to buy the three-colored watermelon seed.

A quality 2 three-colored watermelon seed still needed a level 3 plot to be planted.

Qin Lin directly controlled his game character to plant the three-colored watermelon on a level 3 plot of land.

The growth time of the three-colored watermelon was the same as that of ordinary watermelons. Half a day later, Qin Lin received a notification that the three-colored watermelon had ripened.

He immediately looked at the screen in his mind and controlled his game character to pick the watermelons. However, when he reached Level 3, the appearance of the ripe watermelons was no different from the previous watermelons.

The three colors that he had guessed were not there.

could it be that the three colors are still inside the watermelon? " Qin Lin was confused. After locking the office door, he entered the game and went to the storage room.

the storage room's platform was already filled with quality 2 three-colored watermelons that had just been harvested.

Qin Lin picked one up.

[three-colored watermelon: quality 2!]

[this is a special type of watermelon. It has mutated due to a special seed stone and has three flavors: [deliciousness +2, sweetness +2, texture +2, aftertaste +2!]

Qin Lin was stunned when he saw the note.

It didn't seem to be any different from the description of the quality 2 watermelon.

However, after taking a closer look, he discovered the difference.

The three-colored watermelon had three flavors.

A watermelon with three different flavors?

qin lin was really curious. he immediately found a knife and cut the three-colored watermelon in his hand.

When the flesh of the fruit was revealed, his face revealed a look of surprise.

Because it really was three colors.

Other than the normal red flesh, there were yellow and purple.

the three colors intersected at the center and were clearly separated.

This was really surprising.

It was Qin Lin's first time seeing this kind of watermelon. The three flavors should mean that each color represented one flavor.

He immediately cut the watermelons into pieces. Each piece had three colors intertwined together, so each piece contained three different flavors.

After he was done, he immediately took out a piece and put it in his mouth.

He took a bite of each color, and as expected, there were three different flavors.

moreover, with the +2 deliciousness,+2 sweetness,+2 texture, and +2 aftertaste, each flavor was very delicious, as if he was eating a different watermelon.

To be honest, with the same attributes, the addition of the three colors and three flavors seemed to increase the grade of the watermelon by a notch.

If he could make it, it could become a more high-end series of Linlin watermelons.

The three colors and three flavors alone were a huge gimmick.

However, now that he had to think about how to take out the seed reasonably, it seemed normal.

...

The next day.

After Qin Lin delivered the game to the villa, he went to see Tang xiuwan and Li Kai. Both of their faces were filled with happiness.

After the two of them returned from Ming city, they openly stayed in the same nuptial room and probably lived a shameless life.

Qin Lin also greeted the two of them, " "Old brother li, Dr. Tang, what good news do you have this time?"

Li Kai smiled and waved The Little Red Book in his hand.

Qin Lin understood.

They had registered their marriage.

Old brother li had finally achieved his goal.

Brother Qin, " Li Kai said, " let's go to Linlin's laboratory in the afternoon to take a look. Many of the seeds we planted before have matured. If there are any genetic mutations, we can keep them for future use. You'll have a few more crops in your villa that can't be found outside.

also, I plan to plant some more seeds of the previous genetic mutation to see if there is a chance for genetic mutation to occur again, especially the seeds of the beauty cucumber and Linlin watermelon. Maybe we can study a series of branches.

Qin Lin's eyes lit up when he heard this.

He was not giving him a chance to take out the tri-colored watermelon seeds. &Nbsp;

Moreover, there were a lot of seeds planted in the experimental plot. No matter how unlucky they were, there should be at least a few that mutated, right?

As long as a few more types of genetic mutations were produced, they could grow quality 1 crops. Then, Yu Shui and her team could plant them in batches and harvest them when they matured.

Then, he could completely get rid of the fate of being a delivery boy every day.

At that time, his daily life would be much more relaxed.

In the afternoon.

Qin Lin went to Linlin's laboratory. When he arrived, Li Kai was already busy with his lab assistants.

The land had also been mixed with special soil.

seeing that qin lin had arrived, li kai greeted him, " "old brother qin, you've arrived."

qin lin nodded and walked over. after watching li kai and the others busy themselves for a while, he looked at the seeds placed at the side. " "Let me see these seeds!"

The seeds were placed on a small shelf. There were ordinary seeds bought outside, as well as the seeds of the beauty cucumber and Linlin watermelon that had been cultivated before.

There were also the mutated okra and eggplant seeds in the artificial field.

Li Kai and his assistants didn't suspect anything and continued with their work ...

Qin Lin had already grabbed some watermelon seeds from the pile.

moreover, he could recognize that these were watermelon seeds of grade 2.

Currently, the watermelon seeds with a quality of 2 could only be grown in Linlin villa. The ones planted in you City County were all at a quality of 1.

[Chapter 689 Three Colors And Three Flavors! There's Actually A Quality 1 Tomato! 2](#)

It would always ensure that Linlin Manor had things of a higher level than the outside world.

After Qin Lin grabbed these quality 2 watermelon seeds, he quietly changed the three-colored watermelon seeds in his pocket and put them back on the shelf without anyone noticing.

After Qin Lin secretly replaced the watermelon seeds, he also pretended that nothing had happened and watched Li Kai and the laboratory assistants plant the seeds.

After a while, Li Kai also planted the watermelon seeds.

qin lin watched this scene with a smile on his face.

when li kai and his men were done planting the seeds, they went to the experimental plots where they had planted the seeds.

As soon as they arrived, Qin Lin first looked at the place where the Cola fruits were.

to his surprise, the cola fruits were already covered in flowers, and he could even see one or two small fruit buds.

The Cola fruit seemed to be growing very quickly.

Li Kai walked to the center of the Cola fruits and explained with a smile, " "old brother qin, do you see these plum trees? I've found something unusual about these trees and conducted some tests."

it's almost certain that these genes have mutated. I just don't know what the fruit will be like after they grow.

When Qin Lin heard Li Kai's words, the smile on his face widened.

He just needed this kind of confidence from old brother li. He wondered what kind of expression old brother li would make when he found out that Coke could be found in the fruit when it ripened.

li kai observed the cola trees for a while, then brought people to pick the mature crops in the experimental plots.

These included Chinese yam, green beans, carrots, scallions, cabbage, vegetables, broccoli, tomato cream, and so on.

This time, they had harvested a total of 23 kinds of mature vegetables.

After Li Kai brought the vegetables to the laboratory, he planned to test them one by one to see if there were any genetic mutations.

Qin Lin naturally had a faster way.

He also made an excuse to go back to the manor's kitchen and try to make some dishes. He brought some of each vegetable back to the manor. Then, he went to the office, locked the door, and brought the vegetables into the game.

As soon as he entered the game, he could easily see the remarks of these vegetables.

[yam: normal!]

...

[green bean: normal!]

...

[radish: Grade 1!]

[this is a genetically mutated radish plant. it has a special effect: Taste +1, deliciousness +1, stomach conditioning +1, digestion +1, phlegm dissolving +1!]

after looking at three vegetables in a row, qin lin was surprised by one of them. apparently, the radish had undergone a genetic mutation.

He continued to look at the remarks. Most of the vegetables that followed were ordinary, but there were also some that had genetic mutations, such as green vegetables, cauliflower, and chili.

What surprised Qin Lin the most was the last genetically mutated crop.

"Tomato: Grade 1"

[this is a special quality tomato: Taste +1, deliciousness +1, appetite enhancement +1! *

The quality 1 tomato really surprised Qin Lin.

the linlin ketchup was popular because it had the attributes of taste +1, deliciousness +1, and appetite +1.

Now, a Grade 1 item had these attributes. In addition, it also had an additional attribute of +1 to induce diabetes and +1 to quench thirst.

The key was that if he planted the grade 1 tomato and used it to make Linlin ketchup, the quality of the ketchup would definitely be higher, right?

This made him think of the top ten brands of ketchup.

The top ten brands of ketchup must have been investing a lot of money to crack Linlin ketchup.

When they spent a lot of effort to crack the recipe of Linlin ketchup, the quality of Linlin ketchup would immediately be upgraded. Would these people be dumbfounded?

By then, if they could control the quality of the tomato seeds, it would be even more difficult for these people to develop quality 1 tomatoes as raw materials.

A higher quality tomato sauce could dominate the market more unscrupulously.

The foreign tomato sauce brands would not be able to resist at all.

Moreover, with the replenishment of these quality 1 crops, he could really put down his part-time delivery job after Yu Shui and his people planted these things.

He believed that more genetically mutated crops would appear in Linlin's laboratory, and those that did not need to be promoted on a large scale could be added to Linlin villa.

When the number increased, it would be more than what he could move out of the game every day.

Two days later.

Li Kai also brought a test report to Linlin's office. "Brother Qin, I've brought you good news. This time, we've harvested quite a few crops that have undergone genetic mutation. Moreover, there's one that you absolutely need, and that's the tomato. If we plant these tomatoes in large quantities, the ingredients will be even better. Your Lin Lin tomato sauce will definitely be even more delicious."

Although Qin Lin already knew about this, he was still excited after hearing Li Kai's words. He put on a show again and said in surprise, " "Old brother li, are you serious? Did the tomato gene mutate?"

Li Kai really thought that Qin Lin didn't know, so he immediately handed the test report to Qin Lin. Brother Qin, take a look for yourself. For the last item, I compared the test report of the tomatoes with ordinary tomatoes. It's much better.

Qin Lin took the information and pretended to read it.

Li Kai smiled. I've already asked people to pick the crops that didn't mutate. These mutated crops and tomatoes have been planted. We can plant a lot of them. If we keep more, we can promote the planting on a large scale.

...

While Qin Lin was having a delightful harvest, Minister Lu was already frowning.

In the newly established Chinese Medicine Research Department, Minister Lu frowned and said to Chu Qingfeng, "Senior Chu, how is it? did you manage to find any useful secret recipes?"

Xiansheng pharmaceuticals acquired tobidon pharmaceuticals and monopolized the only Battili that could treat cerebral infarction from upstream to downstream. Even a fine of 100 million Yuan couldn't stop the other party.

If they were able to come up with the appropriate medicine when Xiansheng pharmaceuticals rereleases the batrameran injection, then they would be able to deal a heavy blow to Xiansheng pharmaceuticals, directly making the huge sum of money they spent on purchasing tobidon liquid medicine go to waste.

This was the real lesson.

In the past, Minister Lu and the leaders did not dare to have such an idea because the medical research Department could not achieve such a thing. They could only try their best to do so.

However, things were different now. Because Chinese medicine had entered the field of vision, there might be such a liquid in those Chinese medicine recipes.

Chu Qingfeng saw Minister Lu's anxiety and immediately explained, "Minister Lu, we've been looking through all the Traditional Chinese Medicine and found more than 30 secret recipes for treating the brain. However, we don't know if they have any effect on the cerebral infarction. We have to test them slowly.

Minister Lu nodded. With so many secret recipes, he could at least research a way to treat cerebral infarction, right?

Moreover, just one was enough.

Xiao He's assistant rushed in and reported, "department head, there's news. Xiansheng pharmaceuticals has completed the composition of the tobeidong liquid, and the official website has announced that they have restarted the production of battilise.

"He's really unbridled." Minister Lu snorted coldly and hurriedly said to Chu Qingfeng, "Senior Chu, make a copy of the secret recipes for me and I'll go out for a while."

These words made Chu Qingfeng and the old Chinese doctors look at each other.

The previous Emperor's herbal dish had really hit them hard. They had worked together to make countless herbal dishes, but the best result was only 40% of the other party's effect. After that, they had no other way.

This time, they couldn't lose to that young man again in the research of these secret recipes, right?

...

Promote pharmaceuticals first.

At this moment, their person in charge, Lin Tong, was on a video call with an old man in his 70s.

Lin Tong said to the old man respectfully, Chief Liu, the production of the batrameri injection has been restarted, and it will be ready for sale soon. Your plan has been completely completed.

President Liu smiled proudly. Although the cost is huge this time and we were fined 100 million, it's good that we got the medicine. The profit will come back sooner or later. We will have the funds to buy the next target soon.

"It's all President Liu's plan," Lin Tong nodded.

Although they had to pay a fine of 100 million Yuan for the acquisition this time, the ultimate goal was what they wanted.

After that, similar plans could be replicated.

Although he knew that this time, it was against humanity and many patients were cut off from their medication, in the face of capital, money was King. Other things should be given up.

Moreover, he wasn't worried about being targeted. After all, Chief Liu was there to handle everything.

[Chapter 690 This Time! We'll Win, Right? 1](#)

Linlin Manor.

Qin Lin looked at the screen in his mind. He controlled his character to appear in front of Seibala again and inserted the blueprint of a diamond ring.

He clicked 'confirm'.

A moment later, Seibala had finished making a diamond ring.

[congratulations, you have received a four-carat diamond ring!]

Qin Lin used all the diamond ore he had excavated from the lake mine to make a diamond ring.

In the market, a four-carat ring was worth 600 to 3 million Yuan depending on the quality.

A four-carat ring produced by this game must be of very good quality and would definitely be worth more than three million Yuan. However, if it were to be sold outside, it would probably not be able to sell for ten thousand Yuan.

The reason why diamonds were said to be the biggest scam was very simple. Foreign jewelry companies would sell you a real diamond ring for 3 million Yuan.

If you wanted to sell it again, even if you had the other party's certificate, you could only sell it for less than half the price. If the certificate was from China, sorry, you could only sell it for 20% -30% of the price.

The Chinese company that issued the certificate had to have cooperation with them.

If they didn't have a certificate, then sorry, the real one was also fake. Naturally, if they were judged to be fake, they would also pay some money to buy it.

This was because after the acquisition, they would produce a certificate to sell, which would be worth another 3 million.

If this wasn't a scam, then what was?

It was something that was completely up to the seller and judge.

Qin Lin didn't care about this. He didn't want to make money by selling the diamond ring. He just wanted to use it to make a new one.

Qin Lin turned his attention back to the kitchen and left the office for Linlin Ranch.

He first went to the breeding area to check on the condition of the young cows.

After all, this was targeted at Xiao Jue, a national treasure.

As soon as he arrived at the breeding area, he saw Yang Dong. He was observing a calf, and beside him was an old man.

The old man was even more straightforward. He kept touching the bull's body with his palm as if he was taking advantage of it.

Yang Dong stood up and saw Qin Lin. He immediately went up to him. "Boss, how come you're free to come today?"

I want to see the condition of these Wagyu cows. Did you find any genetic mutation? " Although Qin Lin knew that most of the young cows were real, he still put on an act in front of his employees.

Yang Dong explained, " boss, these cows have grown a little during this time. I noticed that many of them are different. They're different from a small group of cows. I think there might be some changes, so our breeding Department invited a master cow breeder to take a look. It's master Wang Dabao.

Linlin villa and Linlin Ranch were already very large and on the right track, so each department had their own special department funds.

The managers of the finance department could freely distribute the funds, even if it was to give bonuses to someone or to build something.

Naturally, the funds were all in the department's card. Before using them, he had to write an application and Zhao moyin had to sign it.

Although there was such a process, it was also a kind of power for these managers.

Master Wang Dabao also stood up after a moment, and said to Yang Dong with a face full of disbelief, " manager yang, this is unbelievable. How did Linlin farm get all these cows? "

Yang Dong had heard his boss mention it before, so he explained, " there's a man from the small country who opened a Ranch to sell young cattle. I bought these there.

the boss knows that they're liars. These are crossbreeds at most, and some of them have the blood of cows. However, if they have the blood of cows, then there's a chance to breed them. You know that our Linlin Ranch has a special pasture that professor Li Kai has cultivated.

Upon hearing this, Wang Dabao exclaimed, " " once these cows are raised, perhaps the people of the small country won't be able to return to their own country. "

yang dong wasn't stupid and understood what he meant. he said in surprise, " "Master Wang, Are you sure?"

Wang Dabao nodded his head with certainty. I've studied in the small country of Japan and seen real Wagyu cows. I can't be wrong. There are more than a dozen of them. Their growth, appearance, and meaty feel are all very good. The meat quality may even be better.

With that, he said to Yang Dong with some excitement, " "Manager yang, do you still need a breeder to raise cows on your Ranch? Do you think I can?"

It was no wonder he was like this.

As a cattle farmer, he knew very well what these Wagyu cows represented.

Imagine if the giant panda in your own country became a family pet that anyone could raise overseas. How would you feel?

More importantly, this Panda was cuter and prettier than the ones in their own country!

Yang Dong didn't expect Master Wang to make such a request out of the blue. He knew how difficult it was to invite Master Wang.

But now, he suddenly wanted to join Linlin Ranch.

Yang Dong subconsciously looked at the boss.

"Make your own decision." Qin Lin was not familiar with Wang Dabao. Moreover, since Yang Dong had been officially promoted to the manager of the cultivation Department by Zhao moyin, some things could be left to him to decide.

After taking a look at the young cows, Qin Lin went to the race track.

when he arrived at the race track, there were already a lot of tourists gathered there. they were all lining up to ride horses and take pictures.

The business at the racecourse was quite good. Most of the apprentices had finished their apprenticeship and were able to ride horses freely. Some of them could even entertain tourists by themselves.

When they were lucky, they could even receive services where some young ladies asked to bring their horses, which was to ride horses with them.

There was also a service of posing and taking photos in ancient costumes.
