

The Game 701

[Chapter 701 Shocking, Right? Two Methods](#)

There were also women who were good at using their beauty to achieve certain goals. This was even more helpful.

Although it was only a quality 1, as long as a man's mind was upright and his self-control was high, he could naturally suppress his impulses and not be tempted.

However, Qin Lin was sure that other than a gentleman like him, no man would be unmoved by a woman's beauty and the properties of this perfume.

unless this woman weighed more than 200 pounds, it would be really hard to bear.

in addition, there were some men with special fetishes. with this thing, they would drink some alcohol. the boys around these men had to be careful, or they would be raped if they were not careful.

Therefore, it was not strange that this was restricted.

Qin Lin put down the review report and said in surprise, " then we can't promote the normal products on a large scale.

Huang Xin nodded and said, " but it's fine. I can use this perfume to develop a new series. I can extract the fragrance aspect and come up with a pure fragrance series or a simple bedroom auxiliary series. This way, I can develop in many ways.

"Yes." Qin Lin nodded. He didn't know much about this, so he left it to Huang Xin to handle.

Furthermore, this perfume was a formula, not a skill.

The skill attributes were exclusive to him, but others could still study the formula, just like how a production line could mass-produce products.

Huang Xin had a detailed recipe, so it was very easy for him to research this recipe.

Not long after Huang Xin left, Qin Lin saw his brother, Li Kai, rushing in with two bottles of Coke in his hands.

"Old Brother Qin, try these two types of Cola." The moment Li Kai saw Qin Lin, he immediately handed him two bottles of Coke, his face full of anticipation.

Naturally, he was looking forward to seeing old Brother Qin's shocked expression.

qin lin took two bottles of coke and seemed to have guessed something.

he opened two bottles of coke and took a sip from each. one of the bottles had the taste of eternal cola, which he had drunk before.

He immediately picked up another bottle of Coke and took a sip. As expected, the taste and texture of this bottle were different. He knew what this feeling was.

There was also a special refreshing and comfortable feeling.

It was the smell of Cola fruit, which should have been used by old brother li to make juice.

The Cola fruit had ripened.

It was just that the taste was obviously much worse than the ones from the previous games.

Qin Lin also knew the reason. The game's product was a quality 2, so the product in real life should be a quality 1 product.

However, even though it was only a Grade 1, it still tasted far better than the Pepsi Cola.

"How is it?" The anticipation on Li Kai's face grew.

Seeing this, Qin Lin laughed in his heart. Although he understood, he still held the bottle of Coke and juice and pretended to be shocked. "Old brother li, this eternal Cola is pretty good. When did they make such a delicious Cola?"

when li kai heard this, he immediately said in disdain, " Bullsh * t, how could they have the ability to make this kind of Coke? this is the juice I made from the blue plum, the same blue plum trees I told you about before.

"Brother Qin, isn't it shocking that a Cola-flavored juice is growing inside the blue plum? I can tell from your expression that you're shocked. I was also very shocked at the beginning."

"Yes, I'm shocked!" Qin Lin helplessly pretended to be shocked.

Then, he and Li Kai left the office and went straight to Linlin's laboratory. They stopped in front of the Cola trees.

the cola fruit tree was not tall, but there were many fruits growing on it, densely packed.

li kai stepped forward and picked a few, handing them to qin lin. " "Old Brother Qin, have a taste."

Qin Lin took the Cola fruits and put one in his mouth. He tasted the crisp flesh with a bite.

With those attributes and effects, even if the fruit was not squeezed into juice, eating it would still have a different kind of taste, but it would still be very attractive.

If it was chilled, the refreshing feeling would be even stronger, right?

A moment later, Shen Li also arrived.

Now that the Cola fruits had ripened, the Cola fruit trees would have to be planted. Then, how to manage and promote these things would be a problem.

This item was specifically made to counter eternal Cola and Coca-Cola.

Furthermore, he was confident that even if he did not target eternal Cola and Coca-Cola, once they found out that the effect was as such, and the taste was so good, the two companies would definitely target him.

Because these two companies were the capital companies of the Starstreak Kingdom. If it was purely the means of the capital, he would be in a lot of trouble.

After all, the size and capital of these two companies were too large. The combined market value of the two companies exceeded 500 billion US dollars.

It was US dollars.

This number, even excluding the US dollar, could be ranked in the top 20 in China.

In USD, even the company with the highest market value in the country couldn't compare.

And most of these values were provided by the big market in China.

Therefore, they pocketed the money and transported it back to the starstrip Kingdom, paid taxes to the starstrip Kingdom, and bought weapons that could threaten the outside world for the starstrip Kingdom.

this was also the reason why when china wanted to suppress these two cola companies, the starstreak corporation jumped up and made use of the various double-standard rules of the world trade organization.

It would be very troublesome if such a behemoth wanted to deal with you.

When Shen Li arrived, Qin Lin gave him a few Cola fruits. After he tried them, Shen Li's face revealed a look of disbelief. "This is Coke?"

[Chapter 702 Shocking! Right? Two Ways](#)

He was really shocked.

Anyone would be the same if they found Coke in a blue plum, right?

But he also knew that professor Li Kai must have found something amazing.

"You and old brother li should understand the situation of the blue plum first. Then, analyze the market situation of this thing and the possible problems that may be encountered," Qin Lin said to Shen Li.

"Alright, Chairman Qin." Shen Li nodded. He roughly understood what Chairman Qin meant.

The blue plum tasted like Coke, and there was so much juice. It could be squeezed into juice.

after the juice was squeezed, it would be coke.

The main thing was that Coke had a lot of bad substances, but this fruit juice had none.

If the blue plum was planted everywhere, would the Cola Company still have a foothold?

The two money bags of the starfish Kingdom won't allow you to do as you please.

Don't naively think that you won't attract their attention if you don't have a large scale. Their surveillance in this area is very smart.

They all had a special department to monitor the market. Any threatening products would enter the other party's eyes at the first moment, even if the other party was just a small workshop.

Otherwise, the coke market wouldn't have been wiped out by them.

The key was that the blue plum could be squeezed into Coke, which would definitely be posted on the internet. Therefore, once the blue plum was out of the market, the other party would know about it, and it was inevitable.

After that.

Qin Lin also returned to his office with a few Cola fruits. He locked the door and entered the game.

[(can be named) Cola fruit: Grade 1]

[this seems to be a mutated blue plum. After using it, juice similar to Coke will flow out. It's very delicious: Texture +1, deliciousness +1, refreshing +1, thirst-quenching +1!]

Just as Qin Lin had expected, it had become a Grade 1 seed. Without the game's land, the seeds would degenerate if they were cultivated in the real world.

The next day.

Shen Li arrived at Qin Lin's office with the report in his hand.

Qin Lin looked at the information and saw two options.

One was to contract a large amount of land and secretly plant the mutated blue plum tree. Once it reached a certain scale, it would be released. This way, even if the two Cola companies knew about it, they would be prepared.

When that time came, it would be a long tug-of-war. Although Cola fruit was better than two colas, the other party would definitely not sit still and wait for death. They would cause a lot of trouble.

The other way was to cooperate with other local beverage companies and collect agency fees every year.

Linlin's laboratory had given the seeds to these companies to plant Cola fruits. These companies alone did not have much power, but together, they had a lot of power.

When the Cola fruits planted by these companies ripened, they could launch a joint attack and directly deal a fatal blow to the two money bags of the Hoshino.

At that time, Liu Chan would be able to cover all the regions in the country at the fastest speed.

As long as the operation was carried out well, the vitality of these two Cola companies would be greatly damaged once they were attacked. In the future, the Cola fruit seeds could be produced to target the products of these two Cola companies. The state would definitely support them.

After all, the higher-ups had long been dissatisfied with the two bags of money that the star-stick nation had.

Both methods had their own advantages.

The first way was to let Linlin's laboratory monopolize the benefits. Naturally, they would have to face the two behemoths alone, and face their crazy revenge alone.

The second way was to crush the two Cola companies as quickly as possible. He wouldn't have to face the revenge of these two giants alone, but the profits would have to be divided.

[Chapter 703 So Many Beverage Companies Are Here? The Big Boss Behind Linlin Company?](#)

Qin Lin looked at the two methods in the information and asked Shen Li, "President Shen, if it were you, which one would you choose?"

Shen Li didn't answer directly, but analyzed, "from a businessman's point of view, most people would choose the first option. After all, the first option would bring huge benefits if it succeeded. If they had financial help from Linlin food company, it would definitely be successful.

of course, if we choose from a rational point of view, we will naturally choose the second option. This can reduce our crisis to the greatest extent. After all, the two giants of the capitalist country do not care about martial virtue.

if other companies take the lead, we can collect the licensing fee in the form of a profit ratio. We can make a profit without losing, but the profit will be far lower than the first method.

Qin Lin heard Shen Li's analysis and nodded his head, "president shen, let's pick a suitable beverage company when we get back. we'll adopt the second promotion method. "

In the end, Qin Lin didn't choose the first method of monopolizing the benefits, because it was the path of a magnate.

A dragon-slaying warrior would eventually become an evil Dragon. This was a principle that had never changed.

Without the threat of the Dragon, the warrior was a threat.

He already had the Linlin leisure tea, a product that crushed all other functional drinks, the Linlin medicinal drink, and even the formula for the refreshing soup that he had not taken out.

These were enough for him to occupy the biggest cake in the beverage market in the future.

If he continued to occupy the Cola market, he would be a thorn in the side after the two Cola companies were defeated. The people in the country would then be dealing with him.

It was even more likely that once the Cola fruit was on the market and the two Cola companies were in conflict with each other, there would be people who would stab them in the back in an attempt to get the Cola fruit.

It was even possible to work with two Cola companies.

After all, if the Cola fruits were to be promoted, they would definitely be planted on a large scale, and it would be impossible to guard against them.

Most importantly, he did not lack money.

Linlin villa, Linlin laboratory, and Linlin food company were already making a lot of money every day. Money was just a number to him.

therefore, there was no need for him to take the path of a magnate. he might as well reduce his threat to the minimum from the beginning and unite the forces that could be united to deal with the two cola companies.

After all, when the Cola fruit first appeared, his initial goal was to deal with these two Cola companies.

"Okay, President Qin." Shen Li nodded.

He had already guessed that President Qin would choose the second method, because his boss was just like that.

This could be seen from the previous donation technique.

Perhaps his boss was an entrepreneur in the traditional sense, not a businessman or a capitalist.

this was probably what he admired the most about his boss.

If he had to make a choice, it would be difficult for him to choose between the huge profits. After all, everyone knew how much profit the two Cola companies could make. The profits were terrifying.

However, looking at the calm expression of the boss, he really couldn't believe that the other party was a young man in his twenties.

After all, in the face of capital, Boss Ma, who originally had the opportunity to be praised by everyone, would be sucked into it.

After Shen Li returned to the laboratory, he immediately instructed his subordinates to get the entire operation department of the laboratory to start.

If the boss wanted to choose the second promotion method, he would also have to carefully select the beverage companies. It was impossible for all companies to be pulled in.

Furthermore, the selection of the spots had to be done with extreme caution.

In less than two days, Shen Li had gathered all the information about the local beverage companies, including the company's situation, the person-in-charge's situation, and their contact information.

He first had to screen these companies.

Naturally, some beverage companies that already occupied a good market would not choose to do so.

These companies were very profitable, so their intention to cooperate was not so urgent.

The first to enter Shen Li's eyes were seven companies from Dongguang, including special energy, le Hu, and so fresh and cool.

The reason why he first saw these seven companies was that they originally had a focus on selling energy drinks.

Although big brands like bull and pulse had dominated the energy drinks market, these energy drinks also had a part of the market.

However, after Linlin leisure tea entered the market, even energy drinks such as Red Bull and pulse were losing their market.

the market for their drinks was even more difficult.

If Linlin's laboratory offered them the olive juice and gave them a more profitable market, they would definitely be happy to join the City.

Shen Li then picked out a few other beverage companies, including Tianfu Cola, Laoshan Cola, Shaolin Cola, and Kongtong.

After all, these Cola companies occupied 15% of the market in the gap between the two major Cola companies. They were a force to be reckoned with.

The companies that Shen Li had selected might not have much power individually, but if they were to be gathered together, they would be very powerful.

As long as he planned it well, he would definitely be able to give these two Cola companies a huge surprise.

Moreover, the two colas could make more than 15 billion US dollars a year in the country. With such huge profits, he believed that these companies would be more than happy to cooperate with Linlin laboratory.

After Shen Li had picked out these companies, he began to contact the people in charge of these companies.

...

The Super Drive beverage company was in Dongguang.

guang dong was also a city with a strong business atmosphere. although its status was not as high as shanghai, it was still a place with a business history that had lasted for more than 2000 years, especially guang zhou.

[Chapter 704 So Many Beverage Companies Are Here? The Big Boss Behind Linlin Company?](#)

Just the beverage products alone, there were a few in Guang Dong.

This special energy was one of them. It was a product that special energy food company had been promoting for the past few years. Originally, special energy had also occupied some of the energy drinks market and had a good future.

However, with the sudden appearance of the Linlin leisure tea, the original market share could no longer be maintained, and the share it occupied was getting smaller and smaller.

This made Super Drive company a little miserable.

In the office of the boss of Super Drive, Yan Lin looked at the latest market share of Super Drive and his face turned very ugly.

In a short period of time, it had dropped again.

However, there was nothing he could do.

The reason why it was still able to occupy some of the market was not that its drinks were good, but that the Linlin leisure tea had not been expanded on a large scale. Many cities still could not buy Linlin leisure tea.

if linlin food company took financing and acquired other beverage factories to expand their production scale and market, they would lose all their market share.

However, under the current circumstances, it seemed that they were going to withdraw from the market soon. After all, even red Bull and pulse couldn't stop Linlin leisure tea.

moreover, he had also used linlin leisure tea before. even if he was beaten up, he had to admit that the other party was powerful.

Sometimes, when he was having fun outside, he had to drink a bottle of Linlin leisure tea to deal with his wife before going home.

As Yan Lin was thinking, his phone rang. It was an unknown number.

He was a little confused, but he still answered the call.

Although it was very likely that he was selling insurance, it was also possible that he was a customer who came to his door.

As soon as the call connected, Yan Lin heard a voice from the other side. Hello, President Yan. I'm Lin Dong, the supervisor of Linlin laboratory. We have a collaboration to discuss with you.

when yan lin heard this, he hung up immediately. it wasn't an insurance seller, it was a swindler.

he was from linlin's laboratory and wanted to talk to him about cooperation. didn't he know that linlin leisure tea was their enemy?

Was he going to be killed by the other party?

This scammer was really brainless. Of all people, he had to impersonate someone from Linlin's laboratory.

But as he thought about it, he subconsciously opened the web page and logged into the Linlin laboratory's official website. He saw the laboratory's contact number.

What if it really was a call from Linlin's laboratory?

To Yan Lin's surprise, the phone number of the scammer turned out to be an external contact number of Linlin's laboratory.

In other words, Lin Dong was really a supervisor of Linlin's laboratory?

At the thought of this, he immediately called the number back.

what's more, it was linlin food company that caused his company to lose market share. what did it have to do with linlin laboratory?

Moreover, the people from Linlin's laboratory had just said that they wanted to discuss a cooperation.

That was Linlin's laboratory.

In Linlin's laboratory, Lin Dong was also a little bored. He had only said one sentence, and the other party had already hung up?

Just as he was thinking about it, he suddenly realized that the other party was calling him again.

He was a little confused, but he still picked up the phone.

Yan Lin's voice immediately came over, " manager Lin, I'm really sorry. There was a sudden loss of signal just now. I'm calling you back right away. What do you mean by cooperation? "

President Yan, " Lin Dong said, " our Chairman and President Shen want to discuss a partnership with you in the beverage market. If you don't mind, we would like to invite you to Linlin laboratory for a discussion.

On the other side, Yan Lin was stunned when he heard this, and then he said decisively, " "No trouble, why would it be trouble? manager lin, i'll definitely be there."

he didn't know much about president shen, but he knew who the chairman was. he was the boss of linlin food company and the owner of linlin villa.

However, this person was very mysterious. It could be said that many people in the domestic business world were very curious about this person.

However, everyone had to admit that the person behind Linlin company was definitely not simple. After all, he was able to build a business like Linlin villa, Linlin food company, and Linlin laboratory in such a short time. He was definitely not simple.

In other words, in the modern era where capital distribution was almost saturated, it was impossible for any Big Boss in the country to start this industry from scratch in a short time.

And the person behind Linlin food company had done it.

This was a super big Shot.

Now that the other party said that they wanted to discuss a cooperation with him, and that it was related to the beverage market, it was definitely not a small matter. Maybe he could hug his thigh and get a share of the profits.

sure, " Lin Dong said with a smile. President Yan, you can call us when you reach you city. We'll be in charge of receiving you.

Basically, the other beverage companies that received the call had the same attitude as Yan Lin.

After all, the big boss behind Linlin company had invited them. Anyone with a brain would know what the other party was up to.

Yan Lin even asked his Secretary to book the earliest flight to Ming city.

Because a small city like you city didn't have an airport, they could only transfer from Ming city to you city.

Although this was a little troublesome, the other party was Linlin's laboratory. No matter how troublesome it was, he could only find a way himself.

The first thing Yan Lin did when he arrived in you city was to call Linlin's laboratory contact. He was then received by the contact and checked into the Zhong min hotel.

At the Zhong min hotel, it only took a phone call for the tourists to book a room and for Linlin's laboratory to arrange a room.

The next day.

After Yan Lin got up and finished breakfast, he received a call from Linlin's laboratory. The other party had arranged for a special car to pick him up.

When he went down to the hall, he saw a person holding a sign that said Linlin's laboratory.

He found that there were people he knew next to the reception. They were the bosses of other beverage companies.

The bosses of these beverage companies were obviously a little surprised. They also knew each other and greeted each other one by one!

"President Chen, you're here?"

"President Yan, long time no see."

"Boss Li, I haven't seen you since we met in Shanghai."

"....."

After Yan Lin greeted the boss of the beverage company he knew, he followed the people from Linlin's laboratory to the car that was specially used to pick him up.

These bosses were even more surprised. They thought that they were the only ones invited, but that was obviously not the case.

To have so many bosses of beverage companies invited at the same time, it was obviously not a simple matter.

Linlin's laboratory seemed to be up to something big.

Finally, the bosses of the beverage companies were invited to the Linlin laboratory's office.

The office was still in the rented building, which was a little old, but the bosses didn't dare to underestimate it. They knew the strength of Linlin laboratory, and it was easy to build an office building.

Yan Lin and the others were brought to a conference room. When they arrived, they were curious.

President Shen Li and the others were able to find out the news and also knew the other party's information.

However, they really didn't know the boss behind Linlin company. They only had a photo of the middle-aged man.

However, the middle-aged man didn't have the aura of a boss at all. He was like a security guard.

And today, they would have the chance to meet the legendary boss of Linlin company.

Just as the bosses of the beverage companies were extremely curious, the office door opened.

President Shen walked in, and there was a young man beside him.

The key was that President Shen was one step behind the young man.

This scene stunned everyone in the office.

[Chapter 705 If Chairman Qin Wants Us To Go West, We Won't Go East!](#)

Yan Lin and the others were a little surprised to see the young man sit in the main seat of the conference room.

President Shen Li of Linlin laboratory sat in the assistant's seat.

This seemed to confirm one thing.

Everyone was in disbelief.

Before they came, they had investigated Linlin's laboratory. Under such circumstances, there was only one person who could make Shen Li a Deputy.

This young man was that person?

The boss behind Linlin laboratory!

After Qin Lin sat down, he glanced at the bosses of the beverage companies. This cooperation was the biggest cooperation between Lin Lin's laboratory.

It was also the largest cooperation Linlin laboratory had ever had with the outside world, and it was a matter of great importance.

Therefore, he, the chairman of the laboratory, had to show up this time.

After that, he glanced at Shen Li and nodded at him.

This process still needed Shen Li to be in charge.

He was not good at this place.

At this time, Shen Li also said to the bosses of the beverage companies, " bosses of the beverage companies, let me introduce myself. I'm Shen Li, the person in charge of the Linlin laboratory. This is the chairman of our laboratory, Qin Lin.

These words completely shocked Yan Lin and the other bosses of the beverage companies.

Even though they had already guessed this young man's identity, now that it was confirmed, the impact was still huge.

after all, there were many legends about the boss behind linlin company.

However, one thing was for sure. This Chairman Qin was a big Boss to them. Moreover, in terms of business, no one in modern society could replicate the way and speed of his overwhelming rise.

And now he was telling them that the boss behind Linlin company was so young?

How much of a monster would it take for someone in their twenties to do such a thing in this era?

it could be said that there was no one in the country who could do this kind of business at this age. no one.

This was also the most terrifying part.

Because he was young, he had the most time in the future.

if the other party did not make any mistakes, with the current development speed of linlin company, what kind of height would the other party stand at in ten years?

They seemed to be able to see the end of the era of the big shots, such as dang MA, Ren, Wang, and Shi Qianqian. The future era would definitely belong to this young man.

Therefore, Yan Lin and the others did not dare to underestimate Qin Lin just because of his age. Instead, they were all very cautious.

If it was possible, this was definitely an opportunity to cozy up to someone powerful.

A beverage company's boss couldn't help but ask, " "President Qin, President Shen, what are your orders this time?"

Another person immediately said,"yes, what instructions does Chairman Qin have?" We'll definitely cooperate."

That's right, they were talking about instructions.

This was also the art of words.

Although the Linlin laboratory had invited them to cooperate, it was right to show attitude and attitude to someone who was far superior to them.

"This time, there's indeed a huge collaboration that I would like everyone to participate in," Shen Li continued.

These words attracted Yan Lin and the others.

It was time to get down to business.

"President Shen, Chairman Qin, what do you mean by cooperation?" Yan Lin couldn't help but ask.

The others immediately looked over, obviously eager to know.

"Everyone, please do an experiment!" Shen Li said, then pressed a button on the conference table and ordered, " "Come in!"

After a short while.

The laboratory staff came in with trays, each with two cups of Coke.

The staff members placed the two cups of Coke in front of Yan Lin and the others.

From the outside, two cups of Coke didn't look any different.

However, what Yan Lin and the others were puzzled about was why Linlin's laboratory had brought out two cups of Coke. Could it be that this cooperation had something to do with Coke?

This guess made the owners of Tianfu Cola, Shaolin Cola, and a few other Cola companies even more surprised. They subconsciously picked up a cup of Coke and looked at it.

Linlin's laboratory was unstoppable in the energy drink market, and now they wanted to make a move on the coke market?

"Now, please have a taste of the two cups of Coke in front of you. They've been chilled," Shen Li said again.

Upon hearing this, the bosses of the beverage companies also picked up the drinks in front of them.

Yan Lin also picked up one of the cups and put it in his mouth to taste.

As a beverage maker, he was very sensitive to the taste of drinks.

With just a sip, he could tell that it was eternal Cola.

Then the other cup should be Coca-Cola, right?

But why did Linlin's laboratory give them these two brands of Coke to try?

Could it be that the cooperation Linlin's laboratory was talking about had something to do with the coke?

As Yan Lin thought about it, he picked up another glass of coke and tasted it.

However, the moment he took a bite, his face revealed an expression of disbelief.

This Coke doesn't have that kind of refreshing feeling. Why is it so tantrum?

Yan Lin was so shocked that he couldn't even describe what he was feeling right now.

The other glass was not Coke, but a glass of fruit juice.

"President Shen, Chairman Qin, why does this Coke taste so good? Is it your newly developed drink?" Not only could Yan Lin not taste the fruit juice, but he was also deeply attracted by the Cola fruit's +1 deliciousness,+1 texture,+1 freshness, and +1 comfort attributes.

After the others tasted the juice of the Cola fruit, they were also shocked.

This was especially true for the owners of Cola companies like Tianfu Cola and Shaolin Cola. They were in the Cola industry and naturally knew how awesome Cola was.

[Chapter 706 331-If Chairman Qin Wants Us To Go West, We Won't Go East!](#)

If their Cola and eternal Cola were placed together with this Coke, anyone with a brain would choose the coke that Linlin was experimenting with after drinking it once.

Shen Li smiled and said, "everyone, how does our Linlin laboratory's fruit juice taste?" it can't be worse than eternal cola, right?"

"? ? ? ?" Yan Lin was suddenly stunned.

The bosses of the other beverage companies were also confused when they heard Shen Li's words.

What did President Shen say just now?

Juice?

This Coke is juice?

Are you kidding me?

What they drank was Coke.

How could it be fruit juice?

At this moment, Shen Li pressed a button on the table and asked the laboratory staff to bring in some Cola fruits and put them in front of Yan Lin and the others.

"Everyone, try it." please. Shen Li made an inviting gesture. this is a Cola fruit. The juice is squeezed from this Cola fruit.

Yan Lin looked at the thing in front of him in shock.

This isn't lan Li?

How did it become a Cola fruit?

The others were also dumbfounded. They were all attracted by the fruits.

But they also knew that Linlin's laboratory wouldn't joke with them, so they each tried to pick up one.

Yan Lin also picked one up and put it in his mouth. After taking a bite, he felt that there was an extremely rich juice splashing out. The taste of the juice instantly made his face turn strange.

The juice inside was really Cola-flavored?

Are you kidding me?

The blue plum had a Cola-flavored juice, and the key point was that this taste was far better than Pepsi. Even if the juice was diluted a lot, Pepsi Cola couldn't compare, right?

The others were also dumbfounded as they took a bite of the blue plum in their hands. They looked at the dark brown juice that spilled out. Wasn't it the same as Coke?

it was really fruit juice.

If they were asked what the most amazing thing they had ever encountered in their lives was, it should be what was in front of them.

Cola was actually growing inside the blue plum.

Was there anything more inconceivable than this?

How did he do that?

"Chairman Qin, did professor Li Kai come up with this?" Yan Lin could not help but ask.

The others also reacted.

There was also professor Li Kai in Linlin laboratory.

This professor Li Kai was also a famous and amazing person. It was rumored that many of Linlin company's projects were developed by him.

He just didn't expect professor Li Kai to be able to develop a blue plum that could grow Coke.

Qin Lin didn't deny it. He nodded and said, "The Cola fruit was indeed discovered by professor Li Kai, and the cooperation that our Linlin laboratory wants to discuss with you this time is related to the Cola fruit. What do you think about the comparison between the Cola fruit and the Cola? Especially when compared to the two Cola companies in the star-chalked country?"

These words stunned Yan Lin and the others, and then, all of their faces revealed a happy expression.

they understood what chairman qin meant.

The Cola fruit was much better than Coca-Cola and Pepsi.

The texture and taste were definitely stronger.

Moreover, the reason why Coke was so popular was that it was a carbonated drink. Drinking it would give one a sense of comfort.

however, this fruit juice was even more refreshing than carbonated drinks. in fact, the refreshing feeling was not something that coke could compare to.

The most crucial point was that under such conditions, the coke in Starlight had been exposed to have a huge amount of carcinogens. They even treated their local and foreign customers differently. There were almost no carcinogens in Starlight's customers, and every time it was exposed in the country, it was because the amount of carcinogens had increased.

As long as they seized this point to promote, in addition to the fact that the Cola fruit juice was naturally harmless and the various vitamins, they would be able to promote it.

As long as the scale was big enough, in this situation where they were stronger in all aspects, these two Cola companies might be done for.

Yan Lin and the others suddenly reacted and looked at each other.

That was their scale.

After that, everyone was eager to try. After all, the amount of money that the two Cola companies made every year was too terrifying. Even if many people stopped drinking Coke because of the exposure of the carcinogen, it was still more than 15 billion US dollars.

If it didn't have any carcinogens, one could drink it with ease. Coke was still very popular after being chilled, and it was possible to reach 20 billion US dollars.

The Cola fruit could completely replace Coke.

A Cola company's boss asked expectantly, " "Mr. Qin, are you saying that Linlin's laboratory is giving us the rights to the Cola fruit?"

Qin Lin nodded. that's right. We're giving you the authorization to do the retail business. Our Linlin laboratory will only charge you a certain percentage of the profits as the licensing fee. Naturally, compared to the large market that is Cola, the licensing fee is nothing.

When the owner of Sky Mansion Cola heard the news, he hurriedly asked, " Chairman Qin, may I know the cost of the Cola fruit? "

Qin Lin explained, " according to the data given by professor Li Kai and the budget of President Shen and the others, the cost of the same amount of Cola juice will not be much higher than that of the LEGO. More importantly, once the two colas in the Hoshino nation are impacted, everyone can produce the Cola juice. It can be diluted as long as the quality is better than the original two colas.

Obviously, the last point was a little unscrupulous.

However, he was also clear that if he really got rid of the two Cola companies in the Starstreak Kingdom, even if he didn't say anything, these people would still join forces to do so.

This was the nature of a businessman.

Since that was the case, he might as well just say it out loud right now, and it would become a huge temptation. Furthermore, if they could get a better drink than eternal dominion Cola and Coca-Cola at the same price, the people would not lose out at all.

Yan Lin and the others had already seen the huge market for Cola fruits, so they were very enthusiastic about Qin Lin's proposal to cooperate. They would not have any objections at all.

Not long after, Qin Lin signed the relevant cooperation contracts with the bosses of these beverage companies, as well as a confidentiality agreement with a huge compensation amount.

Everything had to be kept a secret until he showed his sword to the two Cola companies in the startsyore Kingdom.

As for the seeds, they would be provided by Linlin's laboratory after they were cultivated.

Before that, these beverage companies could choose their land and carry out initial development.

This was not something that could be done in a short period of time. Even if they did, it would take next year. By then, Linlin's laboratory would be able to cultivate a batch of seeds for them.

After the cooperation was discussed and signed, Qin Lin asked lasda to make an Emperor's Supreme meal for Yan Lin and the others.

It was also Yan Lin's first time eating the Emperor supreme set meal. He had to admit that it was indeed as delicious as it was advertised on the internet.

In particular, the wine provided by Chairman Qin was actually all good wine. They were all brand wines of the previous year. It could be said that this kind of wine was very rare in the world, and many people couldn't buy it even if they had the money.

He was one of the people who could not be bought with money.

It was said that this kind of decades-old wine could only be bought in a special circle besides being rich. These people were all rich and liked to collect wine, so they were famous in the wine industry.

He could not.

However, they didn't expect that Chairman Qin would treat them with such good wine that had been aged for decades. The wine for this meal alone was enough for them to brag about.

This meal was served by Shen Li, and when they were halfway through, he also said, "Everyone, please keep this a secret when you go back."

Yan Lin and the others naturally agreed, "

"President Shen, please tell President Qin not to worry. We'll definitely cooperate with his plan."

that's right. In the future, when Chairman Qin says to head east, we'll definitely head east first.

"We'll all listen to Chairman Qin!"

"....."

At this moment, there was a hint of respect in the words of Yan Lin and the others.

They really admired this Chairman Qin.

After all, they knew very well that if Linlin's laboratory spent money on promoting the Cola fruit themselves, and if it took a long time, Linlin's laboratory would monopolize the profits.

It was obvious that Chairman Qin's plan did not care about the gains and losses. He was targeting the two Cola companies in the starjo country, and there seemed to be a special meaning behind this.

However, they had to admit that they respected this kind of person. Moreover, they were the beneficiaries of this plan.

They could even be sure that when Chairman Qin's plan succeeded and the two Cola companies in xingtiao were impacted, everyone would be shocked by Chairman Qin's huge spending.

At that time, the reputation of the Linlin laboratory would be extremely high.

Naturally, so was Chairman Qin.

[Chapter 707 You Say This Is! Small Matter? The Approval Of The Leader](#)

In the following days, Qin Lin handed over the cooperation with the beverage company to Shen Li. Naturally, he was the hands-off manager again.

Time flew by, and in the blink of an eye, it was already half of December.

In the planting area of Linlin villa.

Qin Lin and Li Kai had already arrived at a newly developed field.

Brother Qin, " Li Kai said as he squatted down to observe, " this batch of seeds will be enough for mass production. In a few days, when the second batch of seeds is harvested, you can use them to plant another batch.

"Yes." Qin Lin watched as Yu Shui planted the seeds into the ground.

These were, of course, Grade 1 tomato seeds.

After planting the seeds for a while, the tomato seeds from the experimental plot had been harvested. There were many seeds in one tomato, so the quality 1 tomato plant had a lot of seeds.

Moreover, after planting one seed, he could harvest more seeds.

After Yushui harvested the seeds for this batch of tomatoes, the tomato plantations that cooperated with Linlin food company could plant the quality 1 tomatoes in batches three months later.

The seeds of the tomatoes were not gone after one batch, because new tomatoes would grow, and they could continue to be planted.

Therefore, he planned to plant the next batch of seeds in Qin Long's plantation.

We'll first harvest a batch of tomato sauce and provide it to Linlin food company to make quality 1 tomato sauce.

as he was thinking, qin lin's phone rang. it was qin long. he immediately answered, " "brother long, you're here? Alright, I'll head over now."

Qin Lin went to the office area of Linlin villa and saw his mother entertaining Qin Long when he arrived.

The work that the mountain villa arranged for her mother was very relaxing, so when people from her hometown with good relations came, she would warmly welcome them personally.

Sometimes, she would call the wives of Qin Dashan and Qin shuigen to visit the villa and entertain them.

In the past, the other party's family had helped her family. Now that her son had made a name for himself, they should keep in touch more. Women should interact more often.

Beside Qin Long was li Jiawen's best friend, Shan Shan, who was now Qin Long's girlfriend.

Lin Fen held Shanshan's hand and praised her. "Dalong, your girlfriend is so pretty. She's so cute just by looking at her. You have such good taste this time."

Shanshan was a little embarrassed by his compliment.

however, the praise from her boyfriend's village elders always made her feel happy.

After a while, Qin Lin also arrived.

Qin Long greeted Qin Lin immediately with a hint of respect and seriousness.

Although the two were from the same village and their families had a good relationship, he now relied on Qin Lin for a living. Because of Qin Lin's help, his plantation was very prosperous. In a place like you city, he was a boss Qin when he left.

in the face of his parents, he couldn't just take it for granted that they were from the same village and had a good relationship.

Even between husband and wife, there were times when they couldn't take things for granted, or they would get divorced sooner or later.

Therefore, he had to show the right attitude.

Qin Lin also greeted the two of them. Naturally, he could sense the respectful attitude of Qin Long.

This made him feel a little helpless, but he had no choice.

Even Qin Ren had the same attitude towards him now.

This was something that was inevitable because the gap between their statuses was getting bigger and bigger. Even if he didn't care about it at all, he couldn't do anything.

"Lin Lin, entertain Qin Long and Shanshan. I'm going to take wangcai and Xiaoxue for a walk," Lin Fen said when she saw Qin Lin.

Qin Lin also brought Qin Long and Shanshan around the villa.

Qin Long knew that Qin Lin must have called him over for something. As he walked, he asked, "Qin Lin, what's the matter?"

Qin Lin nodded. brother long, we have a new variety of tomatoes growing here. We would like you to plant a batch of them in your plantation first. I'll have someone send the seeds to you later.

Qin Long nodded immediately. yes, the seeds have arrived. I'll bring people to plant them immediately.

Hearing Qin Lin's words, Qin Long also took it very seriously. He knew that Qin Lin had specially called him over to tell him about this. This new breed of tomato must be very important.

He had to take it seriously.

While they were chatting, Qin Lin suddenly received a call from Minister Lu.

Outside Linlin Manor.

A car stopped at the same time. Minister Lu got out of the car with a phone in his hand and said, "Boss Qin, I'll bring some people into the manor first. You can come back when you're done."

in the car, two more old men came out. one of them had a head full of white hair, and the other was completely bald.

Minister Lu hung up the phone and said to the two old men, "Academicians, let's go in first!"

these two academicians were arranged to recuperate at Linlin Manor, and they were the first to find him.

According to the rules, academician Li and professor Ren had to go back.

However, academician Li's condition was special, so professor Ren still had to pay attention to the body-strengthening medicine at Linlin's laboratory. It was considered a part-time job, so both of them would stay.

Therefore, there would be three academicians and a quasi-academician recuperating at Linlin Manor.

"the air here is really good."

the scenery is the same. Academician Li didn't lie to us.

The two academicians started talking as soon as they entered the manor.

The two of them were good friends with academician Li, so they had heard about the situation at Linlin Manor from academician Li.

Now that he was here, he knew that academician Li was right.

Minister Lu led the two academicians into the living room of the villa.

A moment later, Qin Lin also arrived and met with Minister Lu and the two academicians.

Minister Lu also introduced the two academicians to Qin Lin. One was academician Lin, and the other was academician Hao.

Both of them were from the same generation as academician Li, and they were both in weapon-related research.

Moreover, academician Hao had also participated in the research of those two weapons.

Qin Lin was naturally very respectful to these old seniors, so he personally checked in and made arrangements for the two academicians.

As for the reception, academician Li and professor Ren took over.

"boss Qin, I've been entrusted by a leader to ask you something," minister Lu said to Qin Lin.

Qin Lin nodded and led Minister Lu to his office.

.....

[Chapter 708 The First Battle Of The Body-Increasing Medicinal Liquid To The Outside World](#)

Linlin Manor.

A few days later, Qin Lin received Minister Lu in his office.

Minister Lu also brought a special document with him this time.

The document was actually about Cola fruits.

"Boss Qin, please don't misunderstand this document. The leader approved of your plan after he found out about it." Minister Lu saw Qin Lin reading the document and explained, " "but this is not a small matter. with the effect of the cola fruit and the support from the higher-ups, it should be no problem to keep the money that the two cola companies make every year in the country."

so, it's important to keep this matter a secret. Otherwise, no one would watch their money bag be robbed. If they don't kill it in one shot, it might not just be a game between companies.

Qin Lin heard Minister Lu's words and nodded."I understand, Minister Lu!"

When he saw the document, he immediately knew that he had been too naive.

The fact that the higher-ups placed so much importance on it was enough to show that his previous plan was lacking in many areas.

Now that he thought about it, he understood.

if the Cola fruit plan succeeds, it won't just be the two money bags of the starjo that will be destroyed. It might be taken as a signal by the capitalist countries. After all, they have more than two money bags to make money in our territory.

Once the other party had the opportunity to counterattack, he might be able to use any means, many of which he could not bear.

The document was indeed a form of protection for him.

Thinking about it, if the Cola fruit really destroyed the two Cola companies, he would probably never be able to leave the country for the rest of his life.

Fortunately, he had never thought of going abroad.

boss Qin, " Minister Lu said with a smile, " the higher-ups will help you with your plan. Let's go to the laboratory together.

"Minister Lu, please!" Qin Lin nodded and invited Minister Lu to go out with him.

As for how the special document would be implemented, he did not ask much.

This was because he was not good at this at all.

at least one thing was certain. with the higher-ups watching, this plan would not go wrong.

Qin Lin and Minister Lu went straight to Linlin's laboratory.

Minister Lu came here this time not only to talk about this matter, but also to understand the experiment of the body-increasing medicinal liquid.

Now, he naturally had to go and see the latest situation of the body-increasing medicinal liquid.

Although Qin Lin had already decided to give the potion to the higher-ups, he had been in his laboratory the entire time.

Today, su ye, the other athletes, and the soldiers were going to undergo the latest tests.

More importantly, su ye was about to participate in the preliminary stage of the Golden Grand Prix in track and field.

This was also the first time that the athletes trained by the body-increasing liquid had entered actual combat.

This golden legends was called the Maya Gold sprinting competition, which was also a rather famous international sprinting event.

of course, no asians had ever participated in the golden legends. it was a competition specially held for the westerners because if asians participated, they would not even pass the preliminaries. the 100m sprint was not an asian's specialty.

The fastest 100-meter sprinter in the country, Su Bingtian, had participated in it before. Unfortunately, he had also lost in the preliminary stage and was not even qualified to participate in the official competition.

Later on, he changed his way of running and managed to run after 9.82 seconds. However, he did not participate in it again because he was too busy and he was getting older.

Therefore, there were almost no reports on the Maya Gold sprinting competition in China, just like how many Western countries did not have any reports on table tennis.

However, once someone in the country could get a good result in the Maya Gold sprinting competition, the competition would quickly become popular in the country and then be widely publicized.

People always liked to show off their achievements.

As for their weaknesses, they would rather hide them.

su ye, who had been using the body-enhancing potion for so long, was going to participate in the gold sprinting competition in maya. he was going to change the structure of the world sprinting competition.

...

The location of the laboratory was different from before.

The outer walls had also been renovated to make it look high-end, Grand, and high-end.

A ring Road was also built around the wall to allow employees to take a walk and relax. The greenery was very good.

Naturally, there were a lot of surveillance cameras and patrolling security guards around.

These security guards were obviously different from the security guards in the villa. They were more well-trained.

Yun Fei, the head of security, was really good.

After Qin Lin and Minister Lu entered the laboratory, they saw a perfectly built modern road that led directly to several huge buildings in the distance.

a few of them were semi-circular in shape and were still under construction. these were naturally the main body of the laboratory. a few of the semi-circular buildings represented laboratory no. 1 and a few others.

The functions and research directions of these laboratories would naturally be different in the future. However, the current Linlin laboratory's experimental power was only enough to activate laboratory No. 1, and even the building of laboratory No. 1 could only be used in a small area.

However, he had to make preparations for the future, right?

behind these laboratories was an office building that had been capped and was under renovation.

Once the office building was built, all the staff of Linlin's laboratory would move in from the rented building.

All in all, Linlin's laboratory was very vast and magnificent. It also had various sports facilities, including an outdoor sports stadium and an indoor sports hall that was still under construction.

[Chapter 709 The First Battle Of The Body-Increasing Medicinal Liquid To The Outside World](#)

These were all provided for the staff.

the scale of linlin's laboratory was huge, even in an international metropolis.

when the new area of you city was completed, linlin's laboratory would be connected to you city. then, people on the road would be able to see this place from afar. it would probably become a landmark building in you city.

Qin Lin drove Minister Lu to the outdoor stadium.

previously, because there was no venue, they had to borrow you city stadium for the test.

Now that the outdoor stadium near Linlin's laboratory was ready, they could test it in the laboratory directly.

When Qin Lin and Minister Lu arrived, director Hao, who was in charge of the athletes, was already looking at the data with professor Ren.

When he saw the two of them, director Yan immediately greeted them. "Minister Lu, boss Qin!"

Professor Ren also raised his head and greeted the two of them. Then, he lowered his head and continued to look at the data.

"professor ren, how's the test going?" minister lu asked.

professor ren explained, " except for su ye, the rest of the tests have been completed. these athletes have been doing extreme exercises every day for a long time. with the help of the body-increasing liquid medicine, their results have improved very quickly. almost all of them have the ability to compete for the world championship in their respective competitions. "

those soldiers are also improving quickly, but they are different from the athletes.

because of their training, those athletes are far more professional than those soldiers.

but the overall improvement of those soldiers far exceeds that of the athletes.

"After all, one is for the competition, the other is for the battle."

Minister Lu understood what professor Ren meant.

An athlete's training was specialized, and breakthroughs and improvements were also related to this.

The soldiers were trained as a whole, and it was an all-rounded training, so they were improved on an overall level.

For example, if they were to compete in the 100m sprint, those soldiers would definitely not be able to outrun su ye. However, if they were to compete in other aspects, be it strength, endurance, boxing, squats, or long-distance running, su ye would definitely be inferior to those soldiers.

If the soldiers could make a breakthrough in this aspect, it would be much easier to train Special Forces soldiers. Those who originally had the chance to become Special Forces soldiers, with the help of the body-increasing medicinal liquid, would become elite Special Forces soldiers and Soldier Kings.

Of course, the king of soldiers here was not the kind of King of soldiers who had returned, could dodge bullets, or could defeat thousands of people by himself. He was a King of soldiers in the conventional sense.

A team that was trained in this way could crush any seal, alpha, Delta, or Sasu team.

If they wanted to destroy such a team, they could only use a wide-area destructive bombardment.

While they were talking, su ye had already reached the track to make preparations.

the others went back to their training after the test, but su ye had to go to the gamaya gold sprinting competition today for a special test.

Moreover, he had to test it several times.

After all, it was the first time that the athletes created by the body enhancement potion were going to show up in public.

Professor Ren continued, " su ye has a talent for running 100 meters. His physical fitness and explosive power are better than most people. So, among the athletes, his physical breakthrough is the fastest and most obvious.

The judge also walked over to su ye and asked him to get ready.

This made Qin Lin and professor Ren focus their attention on su ye.

Su ye was also very nervous.

When he had been selected to work at Linlin's laboratory, he had still been in the training selection period. He had not even participated in an international competition.

But now, he was about to participate in the Golden legends of Maya.

In the world of sports as a whole, this event might not be as good as the Olympic Games, the Asian Games, and the world Championship, but in the 100m run alone, it was definitely a grand event.

No one in the country had ever officially participated in this competition.

He was the first one.

He also knew what his competition represented.

After a moment, they were ready, firing, starting, and accelerating.

Su ye dashed out like an accelerated sports car.

It seemed that the extreme sprint under this kind of pressure had made his physique break through again.

He had also drunk the body-strengthening medicinal liquid today.

Su ye's legs moved like a shadow. In a short time, his figure leaped over everyone's line of sight and crossed the finish line.

At this moment, everyone's eyes were fixed on the electronic timer at the finish line.

The timer was the most advanced, almost the same as the standard of the Olympic Games.

It was 9.71 seconds!

A shocking number appeared on the timer.

This speed made director Yan's jaw drop. "It's 0.02 seconds faster than the previous test."

0.02 seconds seemed like a very small number, but when a person reached their limit, it would be difficult to increase it by even 0.01 seconds.

How many people could run 10 seconds, but it was very difficult to run 9.99 seconds?

Now, su ye had made another breakthrough.

And what did this result represent?

The world record for the 100m sprint was 9.72 seconds.

Su ye's result was the fourth in the world's latest 100m sprint record.

Professor Ren said, " it was against the wind just now. The wind was quite strong. According to the rules of your sports competition, the score should be added, right? "

When director Yan heard this, he was stunned.

That would be 0.02 seconds.

Su ye's time was 9.69 seconds.

This was the second place in the world record for the 100m sprint.

The previous Olympic champion's time for 100 meters was 9.80 seconds.

In other words, su ye would be a world champion if he participated in a competition now, and his results would crush everyone else.

[Chapter 710 The First Battle Of The Body-Increasing Medicinal Liquid To The Outside World](#)

In the past few years, there hadn't been any amazing geniuses in the world of 100-meter sprinting.

Then, they would let their athletes lead Feng Feng.

The key point was that professor Ren had predicted that su ye's physical limit had broken through and had the potential to reach the future. Before he reached his limit, he might have the chance to run the bolt flyer in 9.58 seconds.

And who was bolt? he was a monster that was hard to come by even in a few hundred years, but they were able to train him by relying on the body-increasing medicinal liquid.

Most importantly, su ye would not be the only exception.

There were many 100m sprinters in their country. What would happen if these athletes also used the body-increasing liquid in batches after the experiment?

There were also athletes from other sports.

Su ye trembled with excitement when he saw the results.

He had made another breakthrough just now.

director yan also came to su ye excitedly and ordered, " let's relax for a while and take the test two more times. Then, we'll go back to the capital city Sports Bureau to report and get ready to fight in the Golden PUBG Golden League of Maya.

"Yes, director Yan." yes! su ye replied immediately, his face filled with anticipation.

...

Maya's gold sprinting competition would be held in Canada, which was also a loyal ally of the Star-Spangled nation.

Canada was also a country that loved to host various international sports events.

Other than the competitions that they really couldn't apply for, they would try to apply for any sports event that they could come into contact with.

The Maya Gold sprinting competition was held in Canada at the Ghana National Stadium.

Since the Maya Gold sprinting competition required a preliminaries, the 100m sprinters from various countries had already arrived and were all registering for the preliminaries.

Moreover, there were many athletes who came to participate in the competition. After all, it was called the Golden competition, which meant that the prize money was really rich.

When the sprinters of various countries were registering, a young figure attracted everyone's attention. The five-star national flag symbol on his body was too eye-catching.

It was the athlete from the eastern country.

As a person in the sports world, the news of the eastern countries cheating with a drink had long been known to the whole world.

Everyone knew that the people of this country had won many gold medals by cheating.

Therefore, when they saw the athletes from this country, all the athletes looked at them with disdain and sneered, "

"The people from the eastern countries are also participating in the competition? Doesn't he know that he doesn't have the right to do so?"

" in the 100-meter race, unless su is here, no one else is qualified to even pass the preliminaries. it's a pity that su is old. "

"maybe the other party thinks that they can cheat by using that drink!"

that kind of drink is useless in the 100-meter race. If the other party wants to embarrass himself, then I'll help him!

"....."

Su ye followed behind director Yan and walked straight to the official registration area.

The person in charge of registration looked at su ye and was stunned for a moment. He asked, " "Are you here to participate in the competition?"

Su ye and director Hao furrowed their brows at her words. They would know if it was a competition after checking it out, but there was obviously another meaning behind her words.

Since he was in the other party's territory, Department Director Yan could only say, yes, we're here to participate in the competition. We have the information on the competition.

The registration staff also checked and then said in surprise, " the athlete from the eastern country? " Then, he reminded her, " cheating is prohibited in our competition. You're also prohibited from using prohibited drinks. So, before the competition, you'll be under strict control. We don't want to see any cheating.

Director Yan naturally knew that the other party was talking about the Linlin leisure tea. In the end, he nodded and agreed to this somewhat unreasonable request.

Su ye clenched his fists tightly. When he was still in the team, he had heard that foreign competitions discriminated against them, but he did not expect it to be true.

After the registration, director Yan also reminded him, " su ye, you don't have to feel burdened. This is normal. When your seniors went abroad for competitions, they were even more outrageous. It's only in these few years that they started to restrain themselves. What you have to do now is to teach them a lesson.

"Yes, director Yan." Su ye immediately nodded.

After director Hao and su ye were done with the registration, the person in charge of the registration also reported to the person in charge of the competition.

The person in charge of the competition was will, a typical arrogant white man.

When he received the news, he immediately laughed. did that guy from the eastern country cheat in the Asian Games with that kind of drink? keep a close eye on him. If he uses that kind of drink, we'll make him withdraw from the game.

I heard that su has already retired. So, as long as we don't give him a chance to cheat, a yellow-skinned person can't even make it into the preliminaries of the Maya Gold sprinting competition.
