

The Game 731

[Chapter 731 What An Amazing Young Man! What Is You Cheng Doing?\(3\)](#)

The purification grass could not be planted for a long time. The life of any plant was limited.

The purification grass was the same even if it was a product of the system.

According to the tests in the laboratory, the life span of the purification grass was about three to four years. When the time came, they would have to re-plant it, and you Cheng would have to order it again.

Moreover, once Linlin's laboratory started to plant the seeds on a large scale, the security forces would have to be increased again to prevent the seeds from being leaked.

It wasn't until a few days later that the two sides finally finished discussing everything.

This was also because you Cheng and Linlin company had always been close, and Linlin company had chosen to give up on many aspects of interests, not planning to make money.

Otherwise, there wouldn't have been enough time for the discussion.

...

A new day had begun.

Your city once again welcomed tourists. Yu Lin came out of the train station with his girlfriend. They lined up for more than 10 minutes and got on a taxi, then went directly to Linlin villa.

He had specially chosen to come here after New Year's Day.

In his mind, people who traveled on New Year's Day and National Day were idiots.

However, this was probably because these people had no way of deciding their own vacation.

As he thought of this, he suddenly felt a sense of superiority.

At least he could decide on his own holiday. At this time, when he went out to play, he wouldn't encounter such a terrible thing as a traffic jam.

As he was thinking, Yu Lin found that the car had stopped, and there was no sign of moving forward at all.

"Master, what's going on in front?" Yu Lin asked.

"I think there's a traffic jam," the driver said with a frown.

hehe, " Yu Lin suddenly felt that his mood was very bad.

What the f * ck is this?

more importantly, the traffic jam had lasted for quite a long time.

When the car finally moved forward, Yu Lin saw the cause of the traffic jam. The road in front of them was under construction, and the flower beds and green trees on the roadside were surrounded by fences, which caused the traffic jam.

The workers could also be seen planting pink mess grass with pink hair.

This scene made Yu Lin want to curse. I've seen the news on the internet about you Cheng dragging down Linlin Manor. I didn't expect it to be true.

I've heard that you city's streets are prone to traffic jams. Many tourists have complained that you city's people are not doing anything. Now, they're even creating an artificial traffic jam.

The chauffeur was embarrassed.

As someone from you city, he naturally didn't want others to say anything bad about you city. No matter how bad his family was, he didn't want others to say anything bad about it.

However, when he heard the tourist say that you Cheng was dragging Linlin villa down, he immediately smiled and echoed, " yeah, this traffic jam is quite annoying. The county has not improved.

Compared to Linlin Manor, you Cheng was put aside. After all, Linlin Manor was a rice bowl.

Most importantly, with the traffic jam, he would have to make two fewer trips and earn less money.

Therefore, this point of view must be supported by the tourists.

With the driver's agreement, Yu Lin was obviously more enthusiastic. you guys should complain. You city is just trying to keep up appearances by planting these flowers and plants. They don't even know where they stand.

" tourists don't come to you city to look at the environment. they come for linlin villa and linlin ranch, not to look at the flowers and plants in you city. you just have to get the traffic right. "

it's really a waste of Linlin villa's good scenic spot to meet you Cheng.

After the car passed the flower bed, Yu Lin took out his mobile phone, took a video, and uploaded it to beo.

Title: " you Cheng is dragging Linlin villa down again!

as soon as the video was uploaded online, yu lin found that his video had a lot of likes and comments.

Because he was not the only one who had posted the video.

You Cheng's transformation of planting that day had caused many tourists to take photos and upload them to mouyin, and it had become very popular because Linlin villa had a natural popularity now.

Naturally, the hot topic was directed at you Cheng.

you Cheng is being stupid again. He played a good card until it was smashed!

"That's right, with Linlin villa as a good card, you're still dragging us down."

the tourists don't want to see you city plant any flowers. We are here for Linlin villa. You just need to ensure the transportation.

I feel like we should check you city's officials. They know that teaching transportation isn't good, but they still planted this cosmetic chaos grass. As everyone knows, this kind of image project is the most fishy.

" that's right. i support the investigation. investigate all the people who are involved in this matter. "

there's absolutely reason to suspect that there's some shady deal going on. I strongly request an investigation!

"....."

This was the anger of the tourists who didn't know the background of the purification grass due to the traffic jam, and then it caused people who didn't know the situation to follow. The call for an investigation was getting louder and louder, and it almost caused public opinion.

when chen li saw this news, his face was filled with bitterness. after all, he was the one who handled this matter.

[Chapter 732 Everyone Knows About The Purification Grass! Someone Has Their Eyes On The Purification Grass!](#)

Chen Li was truly a little dumbfounded and even felt a little flustered.

That was because the city had called sun Xian.

It was the age of internet and media now. Once it became popular on the internet, especially when it was a hot topic that required an investigation of who, who, who, who, who, who, it couldn't be ignored. The relevant departments would definitely give a response.

So, people from the city came.

He felt more wronged than anyone else. What did those people on the internet know? when they found out the details of the purification grass, their jaws would probably drop.

Sun Xian didn't expect this to happen either. He could only say into the phone, " leader, there's no such thing. Our you city's modified planting this time is a cooperation with Linlin's laboratory, Yingluo.

After a long time, County sun finally hung up the phone and said to Chen Li, it's fine. It's just a routine interrogation. We'll just issue a public announcement to explain.

Chen Li heaved a sigh of relief.

However, the curses on the internet continued.

Yu Lin had been paying attention to this matter since he arrived at Linlin villa. He even replied to the comments of his video one by one, hoping to get an answer.

Because he was angry.

After being stuck in a traffic jam for the entire morning, it was already noon when they arrived at Linlin Manor. It was a waste of time, and most importantly, his good mood was gone.

Therefore, he just wanted to add to the fire. If there was a problem, it would be best if he could get the relevant departments to investigate the face of this grass. Even if there was no problem, he could vent his anger.

at that moment, yu lin heard his girlfriend say, " "Look, you city has made an announcement."

Yu Lin also took his girlfriend's phone and looked at it. It was really an official announcement from you city:

regarding the high-level discussion on the internet about our you city's cultivation transformation, our you city has the concept of the public having the right to know. We would like to explain this transformation project!

" this project is a transformation project that our you city and linlin's laboratory are cooperating on. what's more, we're not growing cosmetic chaos grass, but a new crop developed by professor li kai, called purification grass. "

as for the purification grass, it's a plant that can perform special photosynthesis and purify the air under the sun or fluorescent light. I'm sure everyone knows that the air in Linlin Manor is better than outside because the purification grass is planted there.

after planting this purification grass in you city, it will completely change the air quality of you city!

Once this announcement was made, the voices of doubt on the internet were all in an uproar.

This was because professor Li Kai was involved.

Everyone knew that professor Li Kai was amazing.

Many people were convinced by this person who chose to kneel in the mud and do research instead of enjoying the life of a second generation.

Many people admired professor Li Kai because he was researching on how to cure the Sana disease with adonaxi vegetation for the sake of love.

It could be said that if the younger generation had an idol, professor Li Kai would be one.

Now that professor Li Kai had developed something new, the effect of the purification grass on purifying the air was amazing.

In an instant, the entire atmosphere on the internet changed. Everyone was curious about the purification grass and were discussing it.

The most curious ones were, of course, the tourists who had arrived at Linlin villa, because they could feel that the air here was very good.

When they heard that Linlin villa was planted with purification grass, the tourists started to look for it out of curiosity.

Yu Lin and his girlfriend were like this. The sudden change made his anger disappear. He pulled his girlfriend up and said, " "Let's go and take a look at the purifying grass."

His girlfriend nodded and followed Yu Lin around the villa.

Because there were purification grass planted everywhere in Linlin villa, the two quickly found it. It was a flower bed, and the entire flower bed was surrounded by several circles of purification grass.

Yu Lin came to the front with his girlfriend. There were already many people around, and one by one, they took out their mobile phones and took pictures of the purification grass.

"Standing next to the purifying grass, I really feel that the air is better than anywhere else!"

indeed. My breathing is smoother now. I can feel it clearly.

" the most important thing is that this purification grass is very beautiful. if i could put a pot in the office, it would be perfect. "

professor Li Kai is too amazing. He actually developed such a thing.

"....."

Yu Lin naturally felt that the air here was better, so he immediately pulled his girlfriend to join in the filming of the purification grass.

The same thing was happening around the purification grass planted everywhere in Linlin villa.

More and more tourists took videos and uploaded them to the website.

The purification grass in the villa was of Grade 2. Not only did it have the air purification +2 attribute, but it also had the attributes of +2 appearance,+2 aesthetic,+2 attraction, and +2 photogenic.

these attributes not only made the video look beautiful to the naked eye, but the video shot by the mobile phone was also artistic, becoming a high-quality video.

this kind of video would easily become popular.

therefore, under the traffic pool's calculation, more and more videos about the purification grass became popular. naturally, the purification grass also became a hot search in a short time, and it was even in the top three.

There was a tourist whose video was the most popular. This tourist was a travel blogger who was wearing an AQI air quality detection instrument.

Every time he arrived at a place, he would write down the local travel notes, check the air quality, and then record it down.

He tested the air quality in you city, went to Linlin villa, and then tested it next to the purification grass.

The three air quality values were 55 for you city and 28 for Linlin villa. When they were a few meters away from the place where the purification grass was planted, the air quality actually reached the single digits of 5.

[Chapter 733 Everyone Knows About The Purification Grass, And Someone Is Eyeing It](#)

They were both of the same quality, 2, but not as good as Manor 1. The reason was that the entire Linlin villa was too big, the air flow was too high, and the number of plants was not as many as that of the manor.

More importantly, there were many tourists.

But even so, the air quality of 5 was still shocking.

this was because no city in the country had air quality that could reach the level of planting. even if more than 1500 air purifiers were used, it would still be difficult to achieve such air quality.

It could be said that this blogger had gained a lot of traffic in a short time, and also let people know more about the power of the purification grass. It also made people who had no way to see the purification grass online even more curious.

Within a short period of time, the purification grass had become well-known on the internet. It couldn't be any more famous. Many companies and brands were envious of this.

After all, no matter how much effort they put in to promote a new brand, it would not have much effect.

but look at him, the moment the item came out, it became a hot search and everyone knew about it.

at this moment, many people on the internet suddenly found a link to buy potted purification grass in the shopping link on the official account of linlin villa.

Yu Lin and his girlfriend took a few videos of the purification grass and were uploading them on the internet when they heard a cry of surprise from the side, " hurry up and go to the official account of Linlin villa. There's a link to buy the purifying grass there.

Yu Lin and his girlfriend didn't hesitate when they heard this. They immediately logged into the background of Linlin villa's official account and saw a link to buy purification grass.

Moreover, the purification grass in the pot cost 300 yuan each.

No one would be so stupid to buy a stalk of grass for 300 yuan, but if it was a purification grass that could purify the air and looked good, it was still acceptable to countless people.

After all, a good air purifier on the market cost more than 1500 Yuan, and it might not even achieve a very good effect.

However, after filling in the buyer's information, he realized that the link couldn't be purchased normally. It was still counting down and could only be opened after the countdown ended. The number of links was limited.

Didn't this mean that they had to rush and compete with hand speed?

There would definitely be a lot of people.

then he would go all out.

Before they reached Linlin villa, the curious people couldn't wait to buy a pot.

Moreover, with the popularity of the purification grass, he could buy a pot, take a few videos, and upload them to gain popularity.

Therefore, before the purification grass was even available for purchase, there were already countless people waiting with their phones.

The purification grass had caused a huge commotion on the internet, so Minister Jin naturally knew about it.

He immediately went to Minister Lu and said with a frown, "Minister Lu, did you see the news on the internet?"

Minister Lu nodded with a smile, "how could I not know about the huge commotion caused by the purification grass?" you city is a good experimental city. once the results are good, you can go to linlin laboratory and cooperate with them. the air control problem in the capital can be solved."

Minister Jin frowned and said, "Minister Lu, that's not what I'm worried about. After all, I've already seen the effects of the purification grass. I'm just afraid that foreign people have found out about it. That Evans from the Starchief is still in the capital. I heard that he has been asking around for information about the purification grass. He must have found out by now.

"That's a problem." Minister Lu also frowned and said, "Let's talk to the leader together and then talk to boss Qin. This purification grass can be freely traded in China, but it must be a special and restricted grade when it goes abroad."

He knew very well that the world's air problem was getting more and more serious, and all countries would need the purification grass, especially those big industrial countries with haze.

This thing could be regarded as a flexible strategic weapon to a certain extent.

the special r-level restricted the export of this thing. if you wanted it, you could negotiate. otherwise, don't even think about it.

The Western countries had always targeted these kinds of restricted items.

The commotion caused by the purification grass was indeed huge. Evans also saw the news of the purification grass somewhere in the capital, which made him very proud. I really didn't expect that this thing wasn't developed by the Chinese Academy of Sciences or those air management research companies, but by Linlin Manor. It's a waste of our time.

"mr. evans, linlin manor is going to sell purification grass soon. as long as we can get it from the auction, we can cultivate the remaining seeds ourselves. my good friend, professor dade, is an expert in this area," said dr. abo.

evans nodded, and a moment later, he was welcomed by a middle-aged man.

seeing this middle-aged man, evans immediately greeted him warmly, "Mr. Liu, you're finally here."

They were from the Hoshino, and without their local ID and mobile number, there was no way for them to register their information to purchase, so they could only ask for help.

This Mr. Liu could solve his problem.

Mr. Evans, " Mr. Liu said hurriedly, " my father's cerebral infarction is still not getting better. He's coming from the hospital. Sorry to keep you waiting.

Mr. Liu, it's not a big deal, " Evans immediately said. how's the thing I told you about? "

Mr. Liu immediately said, " don't worry, Mr. Evans. I've already asked the people from the computer company to stop what they're doing. I've already registered the information. When the online countdown ends, we'll immediately buy some. We'll definitely be able to buy some.

" haha, mr. liu, thank you so much. the liu family will always be our friend. " Evans smiled smugly when he heard this.

Therefore, even if the other party was on the defensive, there would always be people who would help them for the sake of money.

Very quickly.

While countless netizens were waiting, the countdown on Linlin Manor's official website ended, and countless people rushed to buy it.

This time, Linlin's laboratory didn't sell too many pots of purification grass. It was just a supplement to the advertisement of the purification grass. They only sold these 2000 pots.

As such, the moment the countdown ended and the purchase link was released, all 2000 pots were sold out.

Yu Lin had just clicked on the purchase button, and the screen had just popped up when he was shocked to see that the number had been reduced to zero.

"This group of people have the hand speed of a single man who has been single for ten years, right?" he complained.

The internet was also in an uproar. It happened too quickly.

f * ck, I heard from my wife that it's starting. I just picked up my phone and it's gone.

"My girlfriend and I were just about to start, but it f * cking ended."

"brother upstairs, you've made me misunderstand."

"This hand speed, I admit defeat!"

"..."

The people who didn't manage to get one caused a ruckus, while those who managed to get one naturally showed off their sales slips. This was also something to show off. After all, they had managed to get one out of two thousand out of countless people.

beijing.

The moment the bidding ended, Evans also hurriedly asked Mr. Liu, " "How is it? Did you manage to get it?"

"I'll ask." Mr. Liu immediately picked up his phone and made a call.

A moment later, he smiled and said to Evans, " Mr. Evans, congratulations. We've snatched a total of three purification grass potted plants. We're just waiting for them to send them over.

"That's great." Evans instantly clenched his fist. He was getting closer and closer to successfully obtaining the purification grass.

That Jin guy actually mocked them and asked them to go and ask for help. What a joke.

When they got the purification grass and cultivated an even better one, he really wanted to see the expression on her face.

After the purchase of the 2000 pots of purification grass provided by Linlin's laboratory, Linlin's laboratory was the first to take action.

Shen Li had already asked the plantation Department of the villa to transplant 2000 castrated purification grass. He had also contacted the courier company and the delivery staff.

The first thing he did was to send the potted plants according to the buyer's information.

so, it didn't take long for the people who were close to them to receive express delivery one after another, and they all moved the purification grass into their homes to start the test.

At the same time, in the capital.

Evans and Mr. Liu had also been staring at the delivery numbers of the three pots of purification grass.

When the delivery numbers of the three pots of purification grass entered the capital, Evans immediately asked Mr. Liu to bring people to pick up the delivery.

the closer he got to the express delivery, the more anxious he became.

[Chapter 734 The Purification Grass Transformed A City](#)

Evans was anxious.

Naturally, Mister Liu did as he was told.

An ID card was required to receive the delivery. He called over the staff who had won the three pots of purification grass and went to the delivery point together.

It didn't take long for him to bring three pots of purification grass to Evans.

Evans looked at the three pots of purification grass on the table with joy.

Didn't he rely on himself to get this thing?

He could only say that the other party was too careless.

This kind of thing was actually not strictly controlled. If it was the starjo, they would have already put restrictions on this thing.

"Mr. Evans, let's test the effect first." Dr. Aibo said with a frown. He did not look happy. After all, the sudden appearance of the purification grass made his research a joke.

Evans didn't hesitate. He got someone to bring an AQI detection device and placed it in the middle of the three purification grass. Then, he pulled the curtains and turned on the fluorescent light.

Almost in an instant, the three pots of purification grass began to photosynthesize, and the surrounding air began to be purified.

The value on the AQI detector also started to drop.

The speed was much faster than those air cleaning machines.

Evans and Mr. Liu were naturally overjoyed to see this.

This meant that the item was real.

Only Dr. Aibo was in a bad mood. He felt defeated.

When the value of the AQI detector in the three purification grasses jumped to the single digits, Evans finally couldn't help but ask Dr. Aibo, "dr. aibo, when will the person we're looking for arrive?"

Dr. Aibo immediately said, "we'll be there soon. He was professor Dade's student when he was studying abroad. He's not satisfied with the salary in their country and wants to go back to star-stick to work. It's very easy to tempt people who have studied in star-stick and are not satisfied with the current salary.

Evans nodded.

He had to bring it back for Dr. Dade to study and cultivate a new species. He had to first determine the condition of the purification grass and make sure that it could be cultivated normally.

Not long after, a young Chinese man in his 30s arrived.

Dr. Aibo immediately welcomed the man to Evans and said, "mr. evans, his name is sun qi!"

"Mr. Sun, I'll have to trouble you." Evans also smiled and welcomed Sun Qi in, saying, "as long as you do this well, I'll arrange a job for you at Dr. Dade's side. We'll acknowledge you if you study in our Hoshino.

At the same time.

The other netizens who had managed to get their hands on the purifying grass also received it.

Zhu Yunyun left the company as soon as she received the express delivery. She went to the commercial building to collect the purifying grass and then returned to her desk happily.

She opened the package and saw the purification grass inside. She placed it on her desk immediately.

She could see that there were other small potted plants on her desk.

This was because she was a girl with ample breasts.

Under the company's fluorescent light, these small potted plants could also photosynthesize and release some oxygen.

zhu yunyun placed the purifying grass on the table and waited expectantly for the purifying effect.

It didn't take long for her to notice the abnormality. The air around her had indeed become much better.

This made her very surprised.

Although the purification grass was only a quality 1, its effect was obvious on her small desk.

As she felt the rapidly improving air quality, Zhu Yunyun's mood brightened up. Working under such conditions was truly an enjoyment.

As she thought about it, she took the Linlin medicine beside her and took a sip. This Linlin medicine was also very refreshing. It was a perfect match.

After that, she felt that her work was very smooth, and her mood was even better.

Unknowingly, Zhu Yunyun felt that something was not right behind her. She raised her head and saw a fat woman standing behind her.

"Manager!" She hurriedly called out.

The manager nodded and said, "yunyun, i want to borrow something from you!"

"Manager, what do you want?" Suddenly, Zhu Yunyun's mood turned sour. She had realized something.

"This potted plant is not bad. I was thinking of putting one in my office." The manager said as he looked at the purification grass.

hehe. Zhu Yunyun felt bitter. In the end, she could only watch the manager borrow the purification potted plant from her desk with gritted teeth.

She knew that she would definitely not be able to return it.

This made her so angry that she took Linlin's medicine and drank it again.

His head was about to explode from anger, so he had to wake up.

After finishing Linlin's medicine, she decided to go on a one-hour break. She took out her phone and started to watch Short Video.

The manager had just taken her purification grass, and she still had the cheek to criticize her?

however, after scrolling through two videos, she saw a video of her contact list friend,'fat woman', recommended by the system. this was her manager.

When he saw this post, " my luck is off the charts! I managed to get a purification grass potted plant! . She felt like she was going to explode again.

Did the other party snatch this?

it seemed like he had used his position to snatch it from her.

Looking at the comments expressing their envy, she was full of regret.

She had actually forgotten to take a video just now.

Ah!

He was mad!

...

On the internet.

Many of those who had received the purification grass also posted their videos immediately. With the popularity of the purification grass, many people's videos became popular in a short time.

Under this kind of hot search, other people would find a video about the purification grass after a few videos.

[Chapter 735 The Purification Grass Transformed A City](#)

Moreover, with these videos, the role of the purification grass was more clearly known to everyone.

Some people even did a test.

The hall of a 90-square-meter house was about 17 square meters. As long as a pot of purification grass was placed, the air in the entire Hall would be purified to a very high quality.

Moreover, its quality was even better than the air cleaning equipment online, which cost thousands of Yuan.

According to the layout of a 90 square meter house, as long as eight to ten potted plants were placed, the air quality of the entire house could be purified to a single-digit value.

The price was only about 2400-3000 Yuan.

The air purification equipment was about the same price, and the purification range was not that large, and the effect was not that good.

With this comparison, everyone knew which one was better.

someone even posted a video of him buying purification grass and smashing the air purifier at home.

This was done to attract attention, and it was not a good behavior. It could easily lead to a war with the purification grass.

Naturally, Linlin's laboratory was not afraid of this.

The news about the purification grass was getting more and more popular on the internet. Many people who needed air purification equipment at home were also looking forward to it and wanted to buy a few stalks of purification grass to keep at home.

This was especially true for those who lived in Beijing, where the air quality was really bad.

Unfortunately, there was no place to buy purification grass now.

At the same time, with the high popularity of the purification grass, you city also became the main focus.

after all, you cheng was transforming and growing purification grass.

This was the transformation of a city by the purification grass.

Everyone wanted to know how effective this would be.

If you city's air quality could be greatly improved by the purification grass, it would be of great significance to the entire human race, especially when the world's air problem was getting more and more serious.

This was a problem for sun Xian and Chen Li.

After all, they didn't want to be noticed by others. It was too easy to make a small matter big. There were some troublemakers on the internet who had nothing to do all day.

There was a Construction section where a few workers were taking a normal break after eating lunch boxes. They were photographed and uploaded to the internet, saying that the project was lambasting, that there was a problem with you city, or that the supervision was not in place, and finally, it was related to some insider trading.

It was really a headache.

even if it was construction, it couldn't be carried out 24 hours a day. they needed to rest.

Therefore, as the officials of the county, they were afraid of being exposed on the internet, not to mention ordinary people.

exposure on the internet was really scary, especially for those who had been exposed for no reason. it was common for people to fall into depression or jump off a building.

The keyboard man's merciless keyboard was to blame.

The main point was that it was too popular, and you city was the center of attention, so it was hard to ignore it.

Due to this situation, you city had to communicate with various parties and increase the construction cost. They hired people to take turns 24 hours a day and completed the transformation of the entire County in just a week.

it was because of that video that the funds for you city's reconstruction had increased by a lot.

Therefore, the tourists who came again found that the streets of you city had returned to normal, but they could see beautiful purification grass planted everywhere.

It had to be said that the grade 1 purification grass also had the attributes of +1 beauty,+1 aesthetic,+1 attraction. It was really beautiful to use it as a green decoration in the city.

The tourists who passed by the streets couldn't help but take out their mobile phones to take pictures of the purification grass. It was as if the entire you city's streets were much more beautiful.

Sun Xian and the others naturally noticed it, especially with the tourists 'filming, the purification grass planted in you city street became the hot search again.

This also made sun Xian and Chen Li's group smile like flowers every day.

It was definitely the best move to find boss Qin to discuss the cooperation project of transforming the purification grass.

The streets of you city had become a lot more beautiful because of these purification grass embellishments. Just being a hot search, you city's reputation had been further improved, which was a great thing.

Of course, the beauty of the purification grass was one thing, but what everyone really cared about was the role of the purification grass and its effect on the air quality of you city.

After the construction was completed, sun Xian sent people to test the air quality values in you city. Some you city locals also bought some simple AQI detection instruments.

Naturally, there were also many tourists who wanted to ride on the popularity of the show.

On the first day of the modified planting, you Cheng's AQI value was 45.

seeing this value, sun xian and chen li knew that it was effective because you cheng's value had been between 53 and 58 before.

Even though it had only dropped a few numbers, the air quality had changed from good to good. This was a great effect for a city.

Good air quality and high-quality air quality were fundamentally different. High-quality air quality meant that most of the substances that affected the human body were gone.

Moreover, the purification grass had been surrounded during the renovation. Many of them couldn't get sunlight and couldn't photosynthesize. Therefore, after the construction was completed, the purification grass could start to purify the entire you city.

This was just the beginning.

The next day.

you city's air quality test was once again exposed on the internet, with a value of 38.

This number had dropped by a large margin again.

The local residents could clearly feel the difference in you city's air condition. It was much better than before.

On the third day.

the air quality in you city had dropped again, reaching 33, which was close to the air quality of a large area in linlin villa.

And in the area near the purification grass, it had reached around 20 points, which was very terrifying.

Even the prices of nearby houses had changed a little.

However, this value had already reached its limit. The time that followed also stabilized at this value.

First of all, you city was huge, and the amount of purification grass planted could only purify to this extent.

Secondly, a large area of the city's air quality was enough to reach this value. Any further increase would require more money and large-scale reconstruction of the city. Otherwise, there would be no more space for planting.

From 55 to a minimum of 20, this already showed that the modification was very successful.

For those cities that were suffering from air quality problems, they would be satisfied if they could manage the air quality to reach 49, let alone 20.

After all, they had been governing for years and spent countless funds, but they had not been able to reduce the air quality below 50.

Even in many industrial cities, even after spending so much money every year to maintain good air quality, the value was still around 70 or 80.

The results of you city's renovation were naturally delivered to the offices of the various urban environmental management departments at the fastest speed.

Minister Jin, who was in the capital, had been paying close attention to this matter and was naturally the first to receive the news.

He immediately found a leader and reported the results, " leader, this year, the 10 billion Yuan for air treatment in Beijing must be given to Linlin laboratory. You city's success has already demonstrated the effect of the purification grass.

The leader nodded. I'll leave this matter to you. Also, the proposal regarding the special restrictions on the purification grass that you reported earlier has been passed. However, before that, you have to communicate with Linlin's laboratory.

"I understand!" Minister Jin hurriedly nodded.

He naturally knew that this special restriction was actually equivalent to harming the interests of Linlin's laboratory. After all, the whole world needed this purification grass. If it were to be exported, the benefits would be unimaginable.

However, there were bound to be special restrictions. This kind of thing was a great killing weapon, and sometimes it could become a key means.

Evans was naturally paying attention to the matter of the purification grass transforming you city, and the success of the air quality transformation in you city naturally made him even more eager to bring the purification grass back to the star law Kingdom.

evans walked directly to a room. sun qi, who he had found, was doing an experiment. these days, he had been helping him test these purification grass.

moreover, he could see that the number of purification grass had increased from three to more than ten, which was made by the other party through the technique of splitting and grafting.

He had to bring the purification grass seeds back to the star-sparred Kingdom.

[Chapter 736 I Refuse To Authorize Any Foreign Company!](#)

Evans looked at the dozens of grafted purification grass and went up to Sun Qi with a face full of joy. sun, it seems like you've successfully grafted the seeds. When can you get the seeds? "

Sun Qi's expression did not look good. Mr. Evans, I'm afraid it's not that simple. During my research, I found that the three purification grass have been tampered with. There's no way to pollinate and form seeds.

This news made the joy on Evans 'face disappear. He hurriedly asked, " "Then what about the grafting? Can we use this method to cultivate it on a large scale?"

When sun Qi heard this, he frowned even more. "Mr. Evans, I'm afraid that there's no way to graft the plants either,"

what? " Evans hurriedly asked, " didn't you already cultivate more than a dozen? "

" mr. evans, " sun qi sighed. " there are more than a dozen of them here. haven't you noticed that the air quality hasn't improved at all? "

These words stunned Evans. The air quality was indeed very bad, just like the normal air quality in the capital.

It shouldn't be.

There were more than a dozen purification grass here, so the air quality should be able to reach single digits.

Evans did not believe it and hurriedly took out an AQI detector. After the test, the air quality value was: 78.

seeing this, evans immediately asked, " "How did this happen?"

I'm not sure about the details, " Sun Qi explained. after grafting these three purification grass potted plants, they actually lost their air-purifying effect.

Obviously, a Grade 2 seed produced in the game would become a Grade 1 seed in real life. If it was used for grafting, the genes would have changed. How could it maintain its original effect?

Without experimental testing, Linlin's laboratory would not be able to sell them at ease.

Of course, Sun Qi and Evans would not know about this.

However, Evans was a little anxious.

He had thought that he could use the purification grass he had bought to cultivate the seeds and bring them back. Now, it seemed that it was too easy.

Evans immediately found that Mr. Liu and said with a frown, " Mr. Liu, I'm afraid I'll need your help again. The other party has done something to the purification grass. The purification grass can't form seeds. Even if it's transplanted through grafting, it will lose its effect of purifying the air.

"Mr. Evans, what do you want me to do?" Mr. Liu was also surprised to hear this, but thinking of the rumors about professor Li Kai, it didn't seem strange for him to take precautions with his ability.

Mr. Liu, Linlin laboratory must have developed this purification grass to make money, " Evans said directly. I want you to try and see if you can get an authorized agent from Linlin laboratory.

Hearing this, Mister Liu frowned. After a moment, he said, " "Mr. Evans, the Linlin company has previously sanctioned Western countries for the Linlin leisure tea. I'm afraid it'll be difficult to get the authorization."

however, I can apply for a trial with Linlin laboratory. After all, this is a capitalist society. There's no one who doesn't love money. It just depends on how much we give and if we can move the other party's heart.

Mr. Liu was also very confident about this. After all, the Liu family was also the pillar of the National brand in the past. Just like Linlin company, they also scoffed at Western capital.

However, the other party had really given him too much.

In this era where capital was rampant, the Liu family could not refuse.

Therefore, he believed that the other party was the same. As long as he gave enough at all costs, he would eventually relent.

Mr. Liu, money isn't a problem, " Evans immediately said. the key is to get the item.

"Then I'll arrange for someone to try it out." Mr. Liu said as he took out his phone to make arrangements.

...

Linlin's laboratory.

Qin Lin and Chen Li were in a laboratory, watching as Li Kai and a few researchers fiddled with the purification grass.

The purification grass had transformed you city, making the air in you city sublimate by a large amount.

However, a lot of problems arose soon after. After all, one purification grass cost 300 yuan. Now that there were so many of them outside, some people were already thinking about it.

Even though they were surrounded by fences and high-definition cameras were installed everywhere, some people still thought they could get away with it.

Someone had stolen a few last night and had been photographed, and then caught in the morning.

He wouldn't be able to escape a year.

However, this kind of thing had to be put to an end. After the county learned about it, they came to Linlin's laboratory for help.

An HD camera could only help the police catch a thief quickly, but if someone bought it, someone would be bold enough to steal it.

Therefore, he had to find a way to make the thief steal it and not sell it, or make others not dare to buy it.

Then the problem was resolved.

On the other hand, Shen Li had thought of a way, which was to give these purification grass for the city transformation a serial number.

The purification grass had already matured and would not grow any further. If they were labeled, the label would not disappear just because they grew.

Now, the researchers were testing how deep and how big the label should be without affecting the survival of the purification grass.

Moreover, this is a plant, so you can't grind away the serial number like other things. If you grind it, you might kill the purification grass, which is even more strenuous and unrewarding.

With this serial number, whoever stole and sold it would know that it was dirty, and it would be serious if they bought it knowing that it was dirty.

Those who covered up, concealed, or purchased the stolen goods despite knowing that they were stolen would be sentenced to three years of imprisonment, criminal detention, or supervision. In serious cases, they would be sentenced to three to seven years of imprisonment and a fine.

[Chapter 737 I Refuse To Authorize Any Foreign Company!](#)

After all, it was only 300 yuan, so it was not worth it.

This would minimize the risk of such a thing happening.

Of course, if there were really brainless people or lucky people, they would be caught as a classic example.

A moment later, a researcher ran over to report and came to a conclusion. He already knew how deep the number could be engraved would not affect the purification grass.

After the conclusion was reached, the rest was left to Shen Li to handle. This was considered after-sales service.

He would communicate with the county and send someone to mark the purification grass in your city with a serial number, then enter it into the police database of your city.

This was also an experience for the laboratory. In the future, for such urban transformation, the purification grass must be engraved with a number first.

after sending chen li off, qin lin also found yun fei, the head of the laboratory's security, to ask about the security situation.

Now that the purification grass was known by everyone, the security had to keep up as much as possible. Moreover, it would take a lot of money to get the security.

After all, they were sure that there would be a lot of people eyeing the purification grass in the future.

Naturally, some people would also say that if they knew that they would be targeted, they should have hidden it and not let others know, instead of taking it out and publicizing it.

It was a good idea, but don't forget that it was the age of Internet Information.

As long as you used it and promoted it, it was inevitable that the whole internet would know about its magical effect of purifying the air.

Unless you don't use it, but what's the point of hiding it?

Yunfei's security was very strong because Linlin's laboratory was willing to pay for their salary and high-tech equipment. Their security measures were all the same as the Army's.

Qin Lin and Yun Fei got a general idea of the security situation and prepared to return to the manor.

at this moment, shen li ran over in a hurry, " "Qin Lin, I have something important to report to you."

"What's wrong?" Qin Lin looked at Shen Li's anxious appearance and asked doubtfully.

Shen Li reported, " President Qin, someone wants to apply for the authorization to act as the agent for the purification grass. It's a very unexpected person. The other party is from the Liu family.

"The Liu family? which Liu family?" Qin Lin was stunned.

He didn't expect that as soon as the purification grass was promoted, someone would have the idea of giving him the agent license. However, Linlin laboratory didn't intend to give him the agent license.

They all knew the value of this thing, and it was impossible for them to give the authorization agent.

Shen Li explained, "it's the Liu family who wants to give us the right to distribute the computers." &Nbsp;

"What?" Qin Lin was stunned when he heard this. "Is there something wrong with the Liu family's brain, or do they think I'm sick in the head? You actually want us to sell you the purification grass?"

Who didn't know how bad the Liu family's position was?

Previously, when the other party wanted to earn money that was against his conscience, he even helped Minister Lu use Dr. Dott's BUG to come up with a secret cure for cerebral infarction.

She heard that President Liu, who was in his 70s, had been admitted to the hospital because of a stroke. Why did the Liu family still want to cause trouble?

He wasn't a fool. The Liu family didn't do business in air purification at all. If they suddenly wanted the authorization of the agent, it was obvious that they were working for their father.

Shen Li smiled and said, " they even hinted that as long as we give them the authorization, the price is not a problem. They are even willing to give us the shares of a computer company. The other party is trying to use money to smash us.

f * ck, do they think their computer company's shares are worth a lot of money? " Qin Lin couldn't help but swear when he heard this. He then turned to Shen Li and said, just make an announcement and say that we don't give any authorization to the outside world, and we don't intend to sell the purification grass abroad. In the future, we will only consider opening our agents to friendly countries.

"Okay, President Qin." Chen Li replied with a smile.

In fact, he knew this would be the result when he reported this matter. He was very clear about his boss's style of doing things.

Wasn't the Liu family asking for trouble by coming to their door?

When Shen Li returned to his office, he called for the person in charge of publicity and gave instructions to him.

On the other side.

Beijing.

That Mr. Liu was already reporting to Evans, " Mr. Evans, I've already sent an application to the other side, and I've already offered enough chips. I'm even willing to give out our company's shares.

Evans nodded.

He still believed in this. After all, the person in front of him was the best example. There were only a few people in the world who were not moved by capital.

It was a pity that the two of them seemed to have too much faith in their abilities.

There would always be people in this world who would be disdainful of capital.

While the two of them were waiting for a reply from Linlin's laboratory, a middle-aged man rushed in and whispered something into Mr. Liu's ear.

"What?" mr. liu immediately exclaimed again. he hurriedly took out his mobile phone and logged on to the internet. he found a new hot search video.

"Mr. Liu, what's wrong?" Evans asked with a frown.

Mr. Evans, things are different from what we thought. This is the latest public announcement from Linlin laboratory. Mr. Liu handed the phone to Evans with an ugly expression and played the video.

this laboratory hereby states that we will not give any authorization to any foreign company or force regarding the technology of the purification grass. Furthermore, we have no intention of selling the purification grass to any country. We will consider selling it to friendly countries in the future!

linlin laboratory's announcement was not long, but the meaning was very simple and easy to understand.

When Evans saw this announcement, his eyes immediately widened. His eyes were filled with uncontrollable anger, and he almost roared, "sh * t! Is this a punishment for us?! What right did they have? Who gave them the courage?"

Mr. Liu looked at the angry Evans with an equally ugly expression. He didn't think that there would be someone who didn't care about capital and even scoffed at them and the company shares.

One must know that their company also controlled three capital investment companies, and their investment scope covered all aspects.

Did the other party know how much these shares were worth?

While Evans was furious, the people on the internet were in an uproar when they saw the Linlin laboratory's announcement. As soon as the news came out, there were dense comments.

6666, as expected of Linlin company's brother unit!

I've seen punishment again. I'm happy to see it. Previously, it was Linlin leisure tea. Now, it's purification grass!

previously, when they tried to sanction the Linlin leisure tea, Linlin company retaliated. I didn't expect that they would still remember this grudge and punish them again with the purification grass.

"Can I say that the boss of Linlin company holds grudges? But I want to say that it was beautifully done."

I can only say that the boss of Linlin company is so ambitious. Whether it's the Linlin leisure tea or the purification grass, the International market is definitely going to be very profitable. He just rejected them.

"Just for this punishment alone, I've decided to buy 10 purification grass. Who can tell me where I can buy them?"

"Supporting the commenter above, I also want to buy it!"

"Support +!"

"....."

It could be said that the announcement made by Linlin's laboratory was well-received by the people. To be honest, no company would do such a thing.

Those companies now, even those super-large groups, were all focused on the International market. No one was willing to give up on this market.

Even if they were not sure if they could make money in the International market, there were still countless companies that wanted to enter this market.

however, the products of linlin company, whether it was the linlin leisure tea or the purification grass, were all guaranteed to make money internationally.

However, not only did they give up, but they also imposed sanctions and blockades on the International market. it was domineering!

This was something that no other company in the country could do.

Beijing.

Minister Jin was talking with a special department when he received the news. He was thinking about how to talk to boss Qin about the special restrictions on the purification grass. Who knew that boss Qin would come up with this restriction himself? he didn't need to waste any more effort to persuade boss Qin.

Minister Jin thought about it and asked the person from the special case Department for a few more things before seeing him off.

This person from the special department was very special. As for how special he was, he couldn't be described.

Now that the purification grass was known by everyone, it was conceivable that some people would try to get it. He believed that boss Qin's security could solve the problem by normal means, but he would have to get rid of the special department by some abnormal means.

Since there was a special restriction on the purification grass, he had to take precautions.

Minister Jin returned to his office chair and made another call. "Call everyone for a meeting to discuss the plan to cooperate with Linlin laboratory."

This year, the higher-ups had allocated 10 billion Yuan for the management of Beijing's air quality. Naturally, it had to be put to good use.

The purifying grass was the blade of the sword.

[Chapter 738 Give 10% Of The Shares And Completely Tie Up The Black Pot](#)

Early in the morning, Qin Lin returned to the manor Office after delivering the goods. He picked up his phone and scrolled through the news about the purification grass.

These days, the purification grass had been dominating the screen.

What was worth mentioning was that you city had more people these days. Many people came to you city to experience life with high-quality air.

He just strolled around you city and stayed there for a few days, doing nothing else.

The air quality was indeed very good, which caused you city's rental business to explode. The rental prices were obviously much higher.

However, Qin Lin saw an unexpected hot search news.

The celebrity couple with the surname Zhang were being investigated for being involved in multi-level marketing.

This was really something to watch.

He had seen the couple's Affairs a long time ago, and from the beginning, he felt that they were like multi-level marketing.

It was a pity for the celebrity with the surname Tao. He still liked the role she played in the past, the dragon girl.

Qin ran scrolled through the video, put down her phone, and went to Linlin's laboratory.

The second batch of purification grass was about to be planted, so he had to understand the situation.

At noon, Minister Jin came to visit again.

Qin Lin cooked a meal for director Jin and then welcomed him into his office.

He knew that the other party must have come for something important.

Director Jin also took out a document and handed it to Qin Lin. "boss qin, take a look at this letter of intent. we have a request to make of you."

Qin Lin had already guessed the reason when he took the letter of intent.

The purification grass had successfully transformed you city, and Minister Jin was in charge of air management. The air condition of the capital was also under his control, so he must have come for the purification grass.

he took the letter of intent and saw that it was indeed the case. furthermore, the planned amount was really shocking.

It was a total of 10 billion.

"Minister Jin, we're willing to accept this order." Qin Lin put down the letter of intent with a smile.

For the sake of the money, he had to accept the cooperation.

The dirty money thrown out by the Liu family could be disdained, but the money earned openly was justified.

However, the situation in the capital was different from you city. If he really wanted to change the air condition of the capital, he would have to plan it carefully and take a long time. Moreover, the new batch of purification grass could only be planted after the new year.

alright, I'll send you the cooperation agreement after I return to Beijing. Seeing that Qin Lin had agreed, Minister Jin left with satisfaction.

Intention was only intention. It was just to confirm whether boss Qin would accept the project. It was just a process.

Therefore, he had to go back and prepare for the cooperation, and then send an official document to Linlin laboratory.

after minister jin left, qin lin looked at the letter of intent for the 10 billion project. the option reward issue was about to be solved.

After all, both the Linlin laboratory and the Linlin food company were growing.

Needless to say, Linlin food company's share of the energy drinks and tomato sauce market was growing.

linlin ketchup had also occupied more than 8% of the market share not long ago, squeezing out one of the top ten brands and ranking sixth.

the linlin leisure tea still occupied a large part of the domestic market before it was fully developed. this was because linlin food company was unwilling to raise funds, which caused the initial promotion to be slow.

However, after the initial accumulation of funds last year, Linlin food company's new factory with a large area would be completed. Linlin leisure tea should be able to spread all over the domestic market and occupy the largest market for energy drinks.

Needless to say, Linlin's laboratory had made a lot of money from the promotion of Linlin watermelons, the large-scale experiment on Xiangshui tribute rice, and now the purification grass.

At this stage, the company was already very big, so the option rewards had to keep up.

When a company reached a certain level, the thoughts of the top management would change, and the goals they pursued would also change.

The Headhunters 'targets were usually the higher-ups in this state.

Therefore, companies that really wanted to become big and strong would implement option rewards to retain talents at this time. Otherwise, the faster and better the development, the easier it would be for people to poach the talents.

After the option reward was implemented, it could gather people's hearts and burst out with greater enthusiasm for work.

for a hands-off manager like him, the matters of the two companies were basically left to shen li and deng guang. at least, the option rewards for these two people in charge had to be implemented first so that they could continue to be loyal to him.

As for the option rewards for the other management and core employees, it would depend on the specific situation.

Naturally, even if he gave the option reward, he would not be able to get it immediately. There were some other restrictions and a buyback agreement.

This option reward could not be taken away when he left his job. He could only enjoy the equity dividends in the company.

In addition, there was also a 10% equity agreement for brother Chu.

This 10% equity agreement was intended for old brother li. It could be considered as a technical cooperation.

Not for anything else, but because the other party was a good scapegoat and easy to fool.

and he was happy to.

Moreover, in the eyes of the outside world, those technologies were all developed by professor Li Kai. This seemed to be necessary.

...

The quanjing law firm was the most famous law firm in the country. The head of the firm, Robin, used to be the top business lawyer in Asia. However, after becoming the head, he gradually stopped participating in specific legal business.

Quan Jing was also having a business partners Summary meeting today because the new year was approaching.

Chu Feng had already officially become a business partner of the Quan Jing law firm, so naturally, he was also a member of the meeting.

[Chapter 739 Give 10% Of The Shares And Completely Tie Up The Blame](#)

"This year, our firm still has a lot of business to expand and strive for." Robin looked at Chu Feng and said, " Chu Feng, especially on your side, you must sign a contract with Linlin company this year. If you have any needs, all the lawyers in the law firm will support you.

These words also caused the other business partners to look at Chu Feng with envy in their eyes.

The company with the most potential and the most rapid development last year was undoubtedly Linlin.

But this year, almost everyone knew that Linlin company would become a giant in the future, so many law firms had their eyes on Linlin company's legal business.

who would have thought that the boss behind linlin company was actually chu feng's junior brother?

Because of Linlin company's legal business, the number of legal assistants assigned to Chu Feng by the law firm had increased to five.

Linlin's company was developing too quickly, and the legal needs were growing.

Just as they were talking, Chu Feng's phone rang. He looked at the number and immediately said to Robin, " "Director Luo, there's a call from Linlin company."

robin nodded. " go and pick them up. if there's an emergency, you don't have to come back for the meeting. "

"En!" Chu Feng nodded and went out to answer Qin Lin's call.

after knowing qin lin's purpose, he immediately booked a plane ticket to you city and rushed to linlin villa overnight.

The next day.

Qin Lin received the option reward documents and the share documents for brother li from senior brother Chu. After senior brother Chu explained the details, he called Shen Li, Deng Guang, and brother li to the manor for a meeting.

He called the people to the manor for a meeting, but it was not too formal. He just made tea around the tea table.

Deng Guang and Shen Li were a little confused. They didn't know why their boss had suddenly called them over.

"Chairman Qin, what instructions do you have for us?" Deng Guang asked respectfully as soon as he sat down.

He was very respectful to his boss. He knew very well that without his boss, he would not be where he was today.

If the boss hadn't taken him in when he bought the small factory, he might have moved to another small factory and continued to work as a factory manager with a moderate salary.

It was impossible for him to become the CEO Deng that everyone had to respect.

As Linlin food company grew bigger and bigger, the outside world thought that he had made a great contribution. In fact, only he himself knew the effects of the products made by his boss.

This was because the products were heaven-defying and basically crushed the market. At most, he had done a little hard work, but he did not dare to claim credit for it.

It could be said that in the entire Linlin company, only Chairman Qin was the boss. No one else had much of an impact.

At this time, Qin Lin also took out two documents and passed them to Shen Li and Deng Guang, old Deng, President Shen, take a look at this document too.

Deng Guang and Shen Li took the document in doubt. When they saw the contents, they couldn't help but reveal an excited expression.

This was actually an option reward document.

Shen Li had long known that he would be rewarded with a fixed term reward, but when he actually received this document, he couldn't control his excitement.

Actually, he knew that he had asked for too much from Chairman Qin. He didn't know that professor Li Kai was so good.

The development of Linlin's laboratory had also far exceeded his expectations.

However, he didn't expect that Chairman Qin would still give him option rewards according to the original requirements.

This made him feel touched and even grateful.

Deng Guang had heard about the option rewards before. When he read the document, he felt that it was surreal.

But at the same time, he was even more grateful to his boss.

he knew that with his ability, if he had not met his boss, he would not have been able to get such treatment.

To be honest, when he saw the contents of the option reward, he felt that he did not deserve it.

However, he had no choice but to accept the options.

First, no one would give up such treatment.

secondly, if he did not accept it, what would he do with the option rewards from the other management of the company in the future?

Therefore, he could only work harder for his boss in the future.

Qin Lin asked Deng Guang and Shen Li to sign the option reward document. He could feel that after signing the document, the two of them were obviously more motivated.

Qin Lin continued, " as for the option rewards for the company's internal management talents, brother Chu will follow up with it later. You guys cooperate with him. Try to make a set before the end of the year.

Deng Guang and Shen Li hurriedly expressed their willingness to cooperate with Chu Feng.

Qin Lin handed over the 10 billion Yuan letter of intent from Minister Jin to Shen Li and said, " President Shen, this is the letter of intent from the capital. They will send over the official cooperation documents later. You are in charge of following up.

alright, Chairman Qin. I'll personally take charge. Shen Li took the letter of intent and said hurriedly. One could see that his face was full of enthusiasm.

At this time, Qin Lin took a document from Chu Feng and handed it to Li Kai, who was drinking tea, saying, " "Old brother Li, you should take a look at this document too."

"What is this?" When Li Kai received the shares document, he was clearly stunned. When he opened it and read the contents, his face revealed a shocked expression."Brother Qin, what are you doing?"

This document was one of the agreements regarding the 10% shares of Linlin laboratory, and it was for him.

Brother Qin was giving him 10% of the shares.

Qin Lin smiled. brother li, this is 10% of the shares for your technology. You'll be one of the shareholders of Linlin's laboratory from now on.

[Chapter 740 Give 10% Of The Shares And Completely Tie Up The Blame \(3\)](#)

"Brother Li, I don't have the right to take the shares." Li Kai knew very well what his so-called skills were all about. It was all thanks to that special soil.

brother li, everyone knows you're capable. Why don't you have the right to do so? besides, you're the only one I trust. Besides, Dr. Tang is pregnant. You have to leave something for the child in the future.

Tang xiuwan and the child had clearly triggered Li Kai.

Qin Lin took the time to persuade him. brother li, don't worry about it. You're indispensable in my laboratory. You won't be able to run away from me in the future.

He definitely had to keep this excellent wok firmly by his side.

To be honest, he wouldn't believe it if it was someone else who had passed away.

Knowing the effects of the special soil and wanting Linlin's laboratory's products and benefits, it was possible that they would get into trouble.

He was most afraid of trouble.

"Old Brother Qin, then I'll sell all my flesh to you." Li Kai nodded his head in the end. He had made up his mind. Since his old Brother Qin was so loyal to him, he could not let him down.

After talking about the options and shares, Qin Lin didn't ask many people to stay. He then called Chen shengfei and Marvin.

The two of them were the shareholders of Linlin laboratory. Although he had full authority to make decisions, he still had to inform them.

Chen shengfei and Marvin naturally had no objections to Qin Lin's decision.

For the two of them, their initial investment of 200 million to obtain 10% of the Linlin laboratory's shares was already the most successful investment they had made.

Many rich people in Ming city were envious of their investment.

Linlin company had already shown its terrifying potential. The value of these 10% shares would probably soon exceed the value of their shares in their own group.

On the other hand, the two of them and Qin Lin had reserved a place in Linlin Manor to recuperate because their wives had already given birth and they planned to let them stay there until the new year.

Qin Lin naturally agreed and helped them make the arrangements.

when li kai went back, he immediately told tang xiuwan about the document. tang xiuwan was shocked. she knew the value of 10% of linlin laboratory's shares.

She didn't expect her boss to give 10% of the shares to senior brother li.

After that, Li Kai gave old master Li a call. After all, he still had to inform his family about the 10% shares. If necessary, his family would still have to report to the higher-ups.

Ming city.

The Li family.

Old man Li had been very happy recently, because his eldest son, Li Zhen, had been confirmed. His eldest son had steadily improved in his grade, and his future path would be easy.

his younger son's contribution to scientific research and the donation from linlin's laboratory had also benefited his eldest son greatly.

In addition to the recent incident with the purification grass, his youngest son had shown his face again. This really brought glory to the Li family.

If she had known that her son had such abilities, she would have let him do scientific research instead of doing it at home.

Old man Li's phone rang. Seeing that it was his youngest son, he immediately picked up and said with a smile, "What's the matter, you brat?"

When he heard Li Kai's report about the 10% shares of Linlin laboratory, the old man was shocked.

In the past, boss Qin had to rely on the Li family's status and power, but now he didn't need to at all. Linlin laboratory had long entered the eyes of the higher-ups, and no one dared to lay their hands on it.

Now, this boss Qin had even given his youngest son 10% of the shares. This was a great show of affection and friendship.

If it was in the past, the younger son taking 10% of the shares would definitely cause trouble for the Li family. However, it was all fine now.

The younger son had also caught the eyes of the higher-ups, and with the report, they did not dare to bring the matter of the younger son taking the shares to the Li family.

"In the future, do your experiments well in Linlin's laboratory." old master li also gave an order to the person on the phone.

He knew that his youngest son was now completely tied to Linlin's laboratory.
