

The Game 801

[Chapter 801 It's Impossible To Sell It! Threats Are Useless! 1](#)

The Western barktooth appraiser was no longer calm. He also began to contact the National Museum of Spain.

Picasso's "the woman with the Golden Drum" was also a national treasure.

Moreover, this painting was Picasso's masterpiece, the best of all the paintings.

He had to buy this painting back and not let it remain in the hands of this Eastern man.

"It seems that these two paintings are real." Now that Wu Kai knew the results, he was still in awe.

"It's true!" Zhang Yuanzhi was also amazed.

"It's a little unbelievable." Zhu Sanqing, the president of the painting appraisal Association, was shocked.

The other appraisers were also not calm.

Two famous paintings that had sunk into the ocean in Western history had actually appeared in front of them at the same time.

And how did the boss of Linlin company get his hands on these two paintings?

This was too amazing.

Even if the rumor that the two paintings had sunk into the sea was false, the fact that they could remain so intact meant that they were definitely in the collection room of some great collector.

Therefore, if he wanted to obtain these two paintings, how could he possibly do so without some powerful means?

Qin Lin now knew that the two paintings were real.

He was looking forward to the lake mine even more.

The 255th floor of the lake mine was definitely enough to be a top international Museum.

He wondered how shocking it would be if he could dig out top national treasures from Western countries in the lake mine and put them in the museum of Linlin Manor.

Would those Western countries be angered to death? He should be able to take revenge for the Eight-Nation Alliance for snatching Old Summer Palace, right?

Qin Lin gestured to Chen Dabei.

Chen Dabei immediately started to put away the paintings into the box.

This made he LAN and the two appraisers from Xi bangya anxious. They wanted to go forward but were stopped by two retired soldiers. They could only watch as Chen Dabei put the two paintings away and left with Qin Lin.

Now, they could only hope that the news would spread back to their country as soon as possible.

Van Gogh and Picasso were the greatest artists in their country and the world. They were proud of that. Now that the two's most representative paintings had appeared in the world, it would be a huge blow if they were hung in the museum of this Eastern country for people to see without the citizens of their country seeing it.

It was precisely because of this that the museums in their country opened up a special area for the exhibition of the National treasure of the eastern country.

This was called a cultural insult.

Wu Kai turned to the appraisers and said, "Everyone, let's go to the Linlin villa restaurant. The boss of the Linlin company has already ordered the Emperor supreme set meal for you. Believe me, this meal will not disappoint you."

These appraisers weren't qualified to be personally served by Qin Lin. Arranging a meal for the emperor's supreme set meal was already the way to treat the guests.

The appraisers' eyes lit up when they heard the emperor's supreme set meal.

After all, the emperor's supreme set meal was very famous on the internet. It was a dish that even the rich couldn't get their hands on.

At the National Museum of West Freya, the largest museum in the country, and the head was called the star.

in the office.

The first thing he did when he received an e-mail from an appraiser was to check it.

This appraiser was the best art appraiser in the LAN, and he was especially skilled in appraising Van Gogh's paintings.

As he opened the email from the other party, he was suddenly shocked. His face was filled with disbelief.

Van Gogh's 'sunflower in the sea' had appeared in the hands of a rich man from an Eastern country?

It was impossible for this painting to exist in this world.

On the other side.

The same thing had happened at the National Museum of West Freya. They had received news of Picasso's "the woman with the Golden Drum".

In a short period of time, this news had spread throughout the painting world of the two countries, causing a huge sensation.

Furthermore, it was the same in China. After those appraisers left your city, within a few days, the news that the boss of Linlin company had two paintings, Van Gogh's "sunflower in the sea" and Picasso's "the woman holding the Golden Drum", and that they were authentic, spread all over the country. Even the internet was abuzz in a short period of time.

This was the power of the modern information Network.

...

A week passed.

Qin Lin didn't pay any more attention to this matter.

He also knew that it would be fine as long as the items dug out from the game were real in real life.

This was actually a little magical.

After all, the things that sank into the sea in reality were dug out from the game.

If that was the case, there were many treasures hidden in the ocean in reality, and they could be found in the lake mine.

In the office.

Qin Lin finished his daily tasks for the day and looked away from the game in his mind. He was not very lucky today and did not gain anything.

However, it was common for luck to be good and bad at times. It was impossible for one to take all the good things.

He got up and left the office, heading to the Linlin food company's factory Park.

Previously, he had taken out the hot spring powder and the bright white ginseng to build a separate subsidiary company for business promotion, and even let Chu Yue and Kong Lin prepare it.

During this time, the two of them were almost done with the preparation of the subsidiary company. The name of the subsidiary company would be Linlin Health Pharmaceutical Co., Ltd.

A pharmaceutical company needed a special license to operate drugs, and Linlin food company naturally had a license. It was the application for the body-increasing liquid that was arranged by Minister Lu.

[Chapter 802 It's Impossible To Sell It! Threats Are Useless! 2](#)

Later on, although he directly donated the body-increasing medicinal liquid to the higher-ups, he left behind the business photos. It just so happened that the subsidiary company could manage this kind of product.

Whether it was the hot spring powder or the Mingming white ginseng, they were both pharmaceutical products. In the future, if there were such products, he would just put them all in the subsidiary company of Linlin health care.

After Qin Lin arrived at the Linlin factory Park, he went straight to a newly built factory.

This factory was given to the subsidiary company of Linlin Health Pharmaceuticals to use for the production of hot spring powder.

Chu Yue and Kong Lin had already purchased a production line for the elixir. Today, they had purchased some materials and were ready to test the production of the hot spring elixir.

Therefore, he naturally had to come over to take a look.

As long as there were no problems with the debugging and production of this production line, they could purchase and produce it in batches.

when qin lin entered the factory, he saw that kong lin and chu yue were already giving orders to the workers on the production line. the technical staff of the production line supplier were also observing the production line. once there was a problem, they would adjust it immediately.

deng guang had also arrived long ago, but he was just watching from the side. after all, the subsidiary company was handed over to chu yue and kong lin to prepare, so he didn't have to worry about this kind of thing.

"Chairman Qin, you're here." Deng Guang greeted Qin Lin when he saw him.

When Chu Yue and Kong Lin saw Qin Lin, they also came forward to greet him, " "Chairman Qin!"

"How's the testing of the production line?" Qin Lin also asked.

it's almost ready, " Chu Yue replied immediately. we can try to produce it immediately.

"En!" Qin Lin nodded.

After some time, the technician who had finished debugging the production line walked over. director Chu, director Kong, the production line is ready. We can start the production with the materials.

Without hesitation, Chu Yue beckoned to the person in charge of the production line and ordered, " "Bring the materials for the trial production."

The person in charge of the production line nodded and began to get people to bring the materials to the production line and begin production.

The production process of the hot spring powder was slightly more complicated than that of the ketchup, but the production process required a shorter time. Therefore, the first product was out very quickly.

Chu Yue and Kong Lin went up to take a look and sniffed the medicinal powder. Then, Chu Yue reported to Qin Lin and Deng Guang, "President Qin, President Deng, the product is out, but we still need to send it to Linlin's laboratory for testing."

Previously, Linlin's laboratory had tested the hot spring powder. Without the system's note, the subsidiary company could only rely on Linlin's laboratory to test if the composition of the materials was the same and then conduct experiments to know the effect.

Qin Lin was different. He could directly bring the finished product into the game, so he also ordered, " "Pack one for me too, I'll take it back to read."

after qin lin's instructions, the others didn't ask anything. they directly wrapped up a hot spring powder and handed it to him. after he got the hot spring powder, he went directly back to linlin manor. when he returned to his office, he saw the remarks of the hot spring powder produced by the production line:

[special hot spring powder: Grade 1]

[this is a special elixir specially provided to the nobles in ancient times. It can produce special effects when placed in water at a temperature of 30-6 degrees. Health effects +1, Hair Skin recovery +1, hair regeneration +1!]

obviously, the trial production line was a success.

However, the properties of the hot spring powder he had made with quality 2 medicinal materials were worse than the ones he had made with ordinary medicinal materials. The properties of the hot spring powder only reached the level of quality 1.

however, for this large-scale promotion of products, a quality of 1 was enough.

he even felt that the recovery effect of a grade 1 was too good.

How could she cherish the hair that she had lost so easily?

Only by spending more money and time on treatment would the hair that grew back be cherished.

Therefore, he had to let old brother li see if there was any way to dilute the effect.

Qin Lin exited the game after learning the remarks of the hot spring powder produced by the production line. He had just sat down in his office when Lin Lanzi called him. She said in a slightly anxious tone, "Boss, someone claims to be from the cultural relics Bureau. He said that he has an important matter to discuss with you. He also said that it's related to friendly international relations. He wants to bring two international friends to talk to you."

"what the hell?" Qin Lin frowned slightly when he heard this, and then said, "Bring the person over first!"

The cultural relics Bureau, with this name, was probably an official Department.

But why was the cultural relics Bureau looking for him? And with our international friends?

Could it be that he was here for the two paintings, 'sunflower in the sea' and 'the woman with the Golden Drum'?

This was also a possibility he could think of.

Not long after, Lin Lanzi came in with a few people. The one in the lead was a middle-aged man. He was covered in oil and had a big belly. He had the air of an official. Behind him was a young man carrying a bag.

He must be the head of the cultural relics Bureau and his Secretary.

Behind the two were two middle-aged white men, who were also followed by two people dressed as bodyguards. After they came in, the head of security of the manor also came in with a few others.

They were all retired soldiers. Qin Lin had found them through Minister Lu's connections. After all, the academician was recuperating here, and Minister Lu was also worried about the security of the manor.

a few retired special forces soldiers came in and stood in different positions. as long as they made a move, the two white men's bodyguards would be subdued in an instant.

[Chapter 803 It's Impossible To Sell It! Threats Are Useless! 3](#)

They didn't care who these people were, what was going on, or if they were going to cause trouble. There were so many of them, so they had to take precautions. This was their culture and also their duty.

Lin Lanzi also pointed at the greasy middle-aged man and said, "Mr. Qin, it's this Mr. Xu Wei who wants to see you."

Xu Wei also looked at Qin Lin at this time. He was a little surprised at Qin Lin's young age, but he did not forget the important matter. As soon as he saw Qin Lin, he said to him, "Chairman Qin, I'm Xu Wei, the director of the Cultural Relics Bureau. I'm really sorry to disturb you. I don't come here without a reason.

"These two foreign friends are Mr. Arsdal, the head of the Amsterdam National Museum in Helan, and Mr. Delis, the head of the Freckle National Museum."

They heard that you have 'Sunflowers in the Sea' by Van Gogh and 'The Woman Holding the Golden Drum' by Picasso. These two gentlemen would like to purchase the two paintings in your hands. After all, these are the National Treasures of their country. They hope that you can fulfill their wishes, Mr. Qin.

Hearing that the other party was indeed here for the two paintings, Qin Lin frowned and said to Xu Wei, "Director Xu, I don't plan to sell these two paintings, so I won't be able to fulfill your wish.

When Xu Wei heard this, he was clearly not satisfied.

But he knew that Linlin's company was under the attention of the higher-ups, so he didn't dare to be too direct. He could only say with a hint of threat, "Boss Qin, you should know that the LAN and Xi Ban Ya are not weak in the Western countries. These two paintings are their national treasures. If you insist on keeping them, it may cause international tension. Please consider the big picture.

These words made Arsdal and Delis agree with him.

"It's inevitable to cause tension in the relationship. We will retrieve the national treasure at all costs." It was Alstar.

We must buy back our country's national treasure. We are willing to pay any price. Delis.

The two men's words were threatening. They even looked at Qin Lin, hoping that Qin Lin would admit defeat and sit down to discuss the two paintings with them.

"Boss Qin, I hope you can seriously consider this. Don't be a criminal who destroys international relations," Xu Wei added.

"Hehe!" Qin Lin laughed when he heard this. He finally understood where the director of the Cultural Relics Bureau was sitting and where his head was turning.

He didn't expect there to be such a person in the government department.

Director Xu, the Qing Dynasty seems to have been dead for a long time. Qin Lin suddenly said, his meaning obvious.

Xu Wei naturally understood what Qin Lin meant, and this made him angry. Chairman Qin, please mind your words. I'm not joking with you.

When Qin Lin heard this, he looked away from Li and Xu Wei.

he was just the chief of the cultural relics bureau.

No matter what the other party was thinking, he really didn't need to be afraid of the other party since he would accompany two foreigners to buy the two paintings in his hands. He even called Minister Lu in front of the other party.

As soon as the call went through, Minister Lu's laughter was heard. "Boss Qin, why are you calling me all of a sudden?"

Minister Lu, I really need your help. There's a man called Xu Wei, who claims to be the director of the cultural relics Bureau. He's with two foreigners, " Qin Lin told Minister Lu what happened.

As soon as he finished speaking, Minister Lu's angry voice was heard, " "what year is it already? there's still such a soft-boned person in the team? "Boss Qin, I'm really sorry. Leave this to me. I'm just the person in charge of the cultural relics Bureau. Besides, you don't have to worry about he LAN or the head of the National Museum of Western spotted teeth. What era are we in now? do we still need to be afraid of countries of their level?"

These words were very domineering.

Qin Lin hung up the phone and looked at Xu Wei teasingly. The other party's expression suddenly turned ugly. He seemed to have guessed that there might be a problem from Qin Lin's words. The attention that the other party received from the top seemed to be beyond his imagination.

Just as Xu Wei was thinking about it, his phone rang. He was shocked when he saw the call. It was his direct superior.

Xu Wei did not dare to hesitate and answered the call. However, the moment the call connected, a torrent of curses came from the other side of the phone.

After a while, his face turned extremely ugly and he didn't even dare to reply. After hanging up the phone, he looked at Qin Lin with a sad face. Chairman Qin, I'm really sorry. It's my fault. I'll leave immediately.

Almost as soon as he finished speaking, Xu Wei fled in a fluster. He regretted coming to Linlin Manor even more.

After a phone call from the other party, his direct superior had called to scold him. This meant that the attention the other party received from the higher-ups was beyond his imagination.

As soon as Xu Wei left, the faces of arsd and delis turned ugly. They had no idea what to do with Xu Wei's departure.

Qin Lin looked at the two of them and said coldly, " "The two of you, please leave!"

Aselda was a little unwilling to accept this and was about to threaten him again when a retired Special Forces soldier walked up and blocked his way. He even made a gesture of " please ".

The other party's two bodyguards wanted to go forward, but they were surrounded by two retired Special Forces soldiers. They couldn't move at all. This made them look horrified and they didn't dare to move.

"Mr. Qin, are you really not afraid of causing unnecessary trouble?" Asked Alstar.

that's right. You'll cause international tension. Aren't you worried? " Delis also said.

Qin Lin didn't expect the two to threaten him at this time, so he said directly, " " i'm really not worried. if you have the ability to make the world nervous, then go ahead and do it. as for this painting, you'll never be able to buy it. "

With Minister Lu's words, what was he worried about?

As soon as he finished speaking, he waved at the retired Special Forces.

The retired Special Forces soldiers didn't hesitate and immediately started to drive these people away.

The faces of arda and delis were extremely ugly.

They had thought that they would be able to purchase the two paintings easily this time. They had not expected such a scene.

Why didn't the method of applying pressure in this country work?

The two of them were invited out of Linlin Manor. They unwillingly began to write a letter of protest. Unfortunately, the letter of protest they had been waiting for did not receive any response. Their letter of protest was ignored.

it was only at this moment that they suddenly realized that perhaps this country was really different.

Therefore, they could only leave in dejection and return to their own countries.

[Chapter 804 Another Protest Against Hanging It At The Door Of The Toilet! A Product That Can Help With Hair Growth!](#)

Linlin Manor Office.

Qin Lin received a call from Minister Lu. boss Qin, the matter from before is settled. No one will bother you with this matter anymore. However, he LAN and Xi bangya's people have been protesting. You don't have to worry about that. We didn't pay attention to them, so they have no right to force you to do anything.

This was also a kind of assurance in disguise, and it also gave Qin Lin a lot of confidence. He said, Minister Lu, why don't you help me pass on a message? if these people protest again, I'll hang the painting at the door of the toilet for everyone to see? "

"Boss Qin, that's not a good idea, but I can help you pass the message," Minister Lu said.

After chatting for a while, the two hung up.

when qin lin put down his phone, deng guang had also brought chu yue and kong lin to his office.

"Mr. Qin, Linlin's laboratory has already gotten the results of the hot spring powder produced by the production line." Deng Guang passed a test report to Qin Lin and explained, "However, the ingredients and data of the hot spring powder produced by the production line show that the effect is not as strong as before."

"This is fine." Qin Lin knew the difference between a grade 1 and 2. I still think that the effect produced by the production line is too high. I'll have to ask old brother Li to deal with it and make the effect weaker. Otherwise, hair will grow back too easily, and it won't show how precious hair is.

Deng Guang, Chu Yue, and Kong Lin were stunned when they heard this, but they understood what Qin Lin meant.

Chu Yue also said, "Chairman Qin, I'll apply with Linlin laboratory later. We'll ask professor Li Kai for help. The weaker ones can be treated as the normal version. The ones with the current effects can be sold as the premium version.

"En!" Qin Lin nodded.

This was a good idea.

Even if the effects of a quality 1 were too strong, it didn't mean that a quality 1 hot spring powder couldn't be sold. There were normal and premium versions of any product.

Deng Guang continued, "Chairman Qin, the hot spring powder is ready for production now. The subsidiary company has also ordered the production line and raw materials. It can be produced immediately. Now, we are short of publicity. We would like to ask the official working number of Linlin Manor to help with the publicity.

In the age of Internet Information, social media accounts were already the biggest advertising channel. Otherwise, those big internet celebrities would not be qualified to ask for more than a million Yuan for a Short Video that only mentioned the promotion of the product for a little more than ten seconds.

The number of fans on Linlin villa's official account had already exceeded 15 million, and most of them were high-quality fans. Many of them were fans of tourists and users of Linlin company's products.

Because the scenery in the scenic Area was really good, and the products were also very delicious.

It could be said that the publicity effect of the official account of Linlin Manor was the best among all the self-media accounts.

Many companies also wanted to hire the official account of Linlin villa to do advertising, but Linlin villa didn't earn this money at all. Firstly, it was unnecessary, and secondly, who knew what kind of children would come out of the advertising product?

There were many celebrities who endorsed products that they shouldn't have endorsed, and then the products had an accident, causing the celebrities to be implicated and directly let the celebrities die.

Linlin villa would not step into this trap, so they only promoted their own products.

"I'll call Manager Lin to come over." Qin Lin called Lin Lanzi's phone and asked her to come over and talk to Deng Guang and the others.

Lin Lanzi was now in charge of the official account of Linlin Manor.

After receiving Qin Lin's call, Lin Lanzi rushed to the office at the Linlin Manor as soon as possible. As soon as she saw Qin Lin, she asked, "Chairman Qin, do you have any instructions for me?"

Qin Lin also told Lin Lanzi about the hot spring powder, then said, so, we have to help Linlin food company's subsidiary do some publicity.

When Lin Lanzi heard about the effects of the hot spring elixir, she was instantly shocked. Chairman Qin, the food company has such a magical product? "

Although she didn't have to worry about losing her hair now, as she grew older, she would have to worry about it sooner or later. With this thing, she could use it to maintain her hair.

Moreover, his father was a little bald. He looked at himself in the mirror every day and looked distressed even when he was wearing a wig.

With this, she could give it to her father to try.

When she thought of this, Lin Lanzi asked, "Director Deng, it shouldn't be a problem for me to bring some of this hot spring powder back for my family, right?"

don't worry, manager Lin. There won't be any problems. Deng Guang shook his head and said that it was normal for partners to want to bring some products back to their families.

This meant that the product was really good.

"Manager Lin, you can take some directly from the manor." Qin Lin said.

If his subordinate wanted something, he did not mind giving it to him. Moreover, Lin Lanzi would be able to better plan her publicity after knowing the specific effects of the hot spring powder.

"Thank you, Chairman Qin." Lin Lanzi hurriedly expressed her thanks.

She naturally knew that anything from Linlin's company that appeared in Linlin Manor was the best.

After that, the two sides began to discuss the cooperation.

Lin Lanzi was already very satisfied with the publicity of the official social media account.

Therefore, not long after, a trailer was released on the official account of Linlin Manor.

[Chapter 805 Another Protest Against Hanging It At The Door Of The Toilet! A Product That Can Help With Hair Growth!](#)

this trailer was not a product promotion. it was just a simple paragraph: let me tell everyone a piece of good news. We'll be releasing a new product soon. Furthermore, it'll be a very magical product!

Linlin villa had a lot of fans, and their traffic was very high. Even a simple sentence like this attracted a lot of attention.

After all, every product of Linlin Manor was amazing, whether it was the medicinal honey water at the beginning, the adonaxi grass root that could cure Sima, or the beauty eggs, cucumber, and Linlin leisure tea.

Every product that was released would cause a huge sensation, and its effects would shock the entire internet.

However, when these products were released, Linlin Manor's official account did not use such a mysterious way to announce the news.

It was impossible not to attract attention. Many people even felt that this product might be more magical than the previous ones, and they were looking forward to it.

Lin Lanzi had also returned home with the products she had received from Linlin Manor. Her parents were watching TV in the living room.

"LAN Zi, you're back." "how was your work today?" his mother, chen mei, immediately got up and asked. After asking her usual question, she asked again, "By the way, are you free this weekend? your uncle-in-law knows a PhD holder, Yingluo, who does research."

Ever since her daughter came back from the big city after her emotional injury, she had been worried about her daughter. After all, her daughter was over 30 and getting older.

Most importantly, her daughter was very beautiful and had a good job. She was a manager at Linlin villa and earned tens of thousands a month. Who wouldn't be envious?

However, the more he did this, the harder it was to find a partner in you city.

This was because none of her family's friends were worthy of her, and her daughter was not in the mood to find one. This really gave her a headache.

Lin Lanzi heard her mother's words and hurriedly changed the topic. mom, I have to work overtime on the weekend. The company just released a new product, so our Department has to work overtime!

She was also afraid of blind dates.

To be honest, the men introduced by her mother either scanned her body as soon as they met or loved to brag.

She had seen all kinds of storms and waves, so she could immediately tell whether he was bragging or not.

She had a blind date with a man her family had arranged for her. The man's surname was Chen, and he kept calling her during dinner, saying that he had business orders worth hundreds of thousands or even millions of Yuan.

However, when it was time to pay the bill, because they were eating at a high-end restaurant, he did not make it clear at all. He even went to the side to make a phone call, and it took him a long time to pay.

Either what he said just now was all bragging, that it wasn't even enough to pay for coming out to play, and he even had to call people to make a cash flow.

Nowadays, there were quite a few men like this who came out all by their mouths. Many people boasted to the heavens and took it seriously when they boasted, thinking that the whole world was stupid.

To be honest, in her current situation, she didn't care how much money the man earned, but she was really disgusted with this kind of man.

Moreover, so what if the man really had orders in the hundreds of thousands or even millions?

Just the way he did things and took half a day to pay the bill was hard for most people to accept, regardless of gender.

And before that, there was a man with the surname Chen. He came out for a meal, but because of a few quarrels, he would call this person out and say that he wanted to fight. He made it seem like he was a powerful big brother.

This kind of person was actually the most obvious. Women also saw through this kind of man the most.

What kind of society was this? if you were smart enough to punch me and I fell to the ground, you would have to pay tens of thousands of Yuan. How could this matter be over?

If you're stupid enough to kill someone, Won't You Be paying for it for the rest of your life?

Any woman with a brain would not have a good impression of such a man.

Lin Lanzi hurriedly changed the topic and said to her father, Lin Haijun, "Dad, I brought you a gift. This is for you."

Lin Haijun took the hot spring powder and asked in confusion, "LAN Zi, What's this?"

Lin Lanzi hurriedly explained, "father, this is a new product from Linlin company. It can regrow hair. Moreover, it's very effective.

When Lin Haijun heard this, he hurriedly said, "This product again? None of them were effective."

He was frowning. To be honest, a bald man was still very concerned about this kind of thing, especially when his job required him to show his face.

However, he had tried many methods, but there was no way to recover. The products with such functions were basically lies.

Therefore, he didn't have much hope for this gift from his daughter.

Lin Lanzi naturally understood her father's meaning. She immediately said, dad, this product is different from the others. It's a new product developed by professor Li Kai.

"professor li kai?" Lin Haijun's eyes lit up. He knew professor Li Kai. He was an amazing scientist.

The other party had already produced many impressive scientific results.

If it was a product from professor Li Kai's research, then it would be something to look forward to.

"Daughter, how do we use this thing?" Lin Haijun asked anxiously.

Lin Lanzi immediately added, "dad, just pour it into the bathtub. Keep the water temperature at about 40 degrees. Remember to tell me the effects.

Hearing that it was so simple, Lin Haijun began to try it that night. He scattered the hot spring powder into the bathtub and then began to take a bath.

Moreover, Lin Lanzi had brought back a Grade 2 hot spring powder, which was very effective.

[Chapter 806 Another Protest Against Hanging It At The Door Of The Toilet! A Product That Can Help With Hair Growth!](#)

In just three days, Lin Haijun woke up early in the morning and felt that something was wrong when he touched his head. It was rough to the touch, as if something had grown out. It was completely different from the bald and smooth feeling he had before.

Lin Haijun was clearly stunned for a moment. He hurriedly ran to the mirror to look and saw that there was indeed a New Black hair on his head. His eyes were filled with disbelief.

"As expected of professor Li Kai, he really did grow bones." Lin Haijun mumbled to himself. He quickly took out his phone and took a picture of his head, then sent it to his daughter.

His daughter had told him to tell her about the effects. The effects were really strong.

You city.

In a small district.

Lin Lanzi also finished washing up and got a house. She bought this house for tens of thousands of Yuan a month. A year's time allowed her to pay the down payment for a house in you city.

She had just left the house when she received a WeChat message. Seeing that it was from her father, she immediately opened WeChat to check and saw the message from her father.

The moment he saw the message, he was stunned.

Had his hair already grown out?

"The effect is so fast?" Lin Lanzi exclaimed softly. Although the hot spring powder for her father was from Linlin Manor and its effect would be better than the ones produced by the production line, the effects produced by the production line would definitely not be weak.

She immediately changed her previous publicity strategy. With a new idea in mind, she hurried to Linlin villa and made arrangements.

Hence, not long after, Linlin Manor's official account released another promotional video. sorry to keep you waiting. I'm sure you're all curious about Linlin company's new product. It's a product developed by professor Li Kai that can regrow hair. In order to let you know better about the effects of our product, we'll find 20 fans with hair loss problems to experience this product for free! "If you are willing, you can apply for participation through the link at the back of the official account. After that, we will live-stream the product's effects."

As soon as the promotional video was released, it attracted the attention of many fans. Furthermore, the fans who saw the video were all in disbelief. Many of them even subconsciously touched their heads.

It was already very obvious that her hair was growing again and that she was having trouble growing it.

there was a lot of social pressure nowadays, and people needed hair. many people had problems with hair growth. there were many such products on the market, but the effect was very small.

The products on the market were basically unbelievable, even if it was the endorsement of a big star.

After all, there was once a product that could grow hair, and it was even endorsed by the International superstar Chenglong. It was the dung-dung-DUNG-DUNG-product. In the end, didn't it still fail badly?

But this time, it was different. This was a product of Linlin company, a product of professor Li Kai's research.

This was because Linlin company and professor Li Kai had such a reputation.

yan zhenfang grew up at the same age as beihai no. 1 middle school. he had been troubled by the problem of hair growth. the top of his head was basically bald, and many students had even given him the nickname " mediterranean " behind his back.

this made him very uncomfortable, but as a teacher, he couldn't cause trouble for his students, let alone say anything. therefore, he had always wanted to have some products to restore his hair, but none of them were effective.

He was looking forward to the products from Linlin villa. He knew how powerful professor Li Kai was, and his products would not lie. This would not be good for professor Li Kai's reputation, and his family would definitely not agree.

Hence, Linlin company only dared to promote the product in such a way when it was really effective.

When Yan zhenfang thought of this, he hurriedly opened the official account of Linlin villa and found the link to participate. Then, he immediately clicked on it and chose to participate.

Almost at the same time, many people made the same choice as Yan zhenfang.

After all, it was the product of professor Li Kai's research.

On the internet, those who saw the video were also looking forward to it. This kind of thing was not only for baldies.

this also made countless people look forward to linlin's company's live broadcast.

[Chapter 807 370-Admit Defeat, Terrifying Data](#)

In the Netherlands.

At Amsterdam's National Museum, arsdad had been restless ever since he returned. If he did not get Van Gogh's " sunflower in the sea " back, he would feel like there was a thorn in his heart.

"How did our protest go?" Arsdad quickly asked his Secretary.

the secretary shook his head. " there's no news at the moment. the other party seems to have ignored our protest again. "

When Asda heard this, he said with a dark expression, " "Send another protest!"

He was really a little annoyed.

When did their protests become useless against the eastern country?

In the past, when they had encountered such a situation, the other party would have been apprehensive. They would have considered his protests from the big picture.

His usual methods had not worked, and he suddenly felt very uncomfortable.

The Secretary didn't dare to hesitate. He quickly went to the side and sent another protest email to the diplomatic side.

The diplomatic side would send his protest to the other country.

this time, the secretary realized that not long after his protest was sent out, there was a reply from the diplomatic side. it was that country's response.

"director, the diplomatic team has replied," the secretary hurriedly said to arda.

After hearing this, arda smiled. I knew they wouldn't ignore me forever. Now that they can't hold on any longer, they've started to respond.

Based on past experience, the other party must have chosen to look at the big picture and asked them to buy back the painting.

Arsda immediately opened the email and looked at its contents.

However, when he saw the content, the smile on his face instantly disappeared and his expression became gloomy.

the other party had actually returned the documents they had protested without moving.

The meaning was obvious. He was going to ignore the protest.

Furthermore, the other party had brought along a piece of information, which was that the merchant who had Van Gogh's painting had the intention of hanging it at the entrance of the toilet for everyone to admire.

pA(nd)A no ve1 "how dare he do this?" Arda's expression changed drastically, and he slammed the table.

His hand was red and swollen from the slap, but he didn't have the time to care about it.

If Van Gogh's painting was really hung at the entrance of the toilet for people to see, it would be a trampling on the dignity of their country's art and their culture.

He would not allow such a thing to happen.

just as arda's anger reached its peak, he saw another piece of news at the end of the email.

When he saw the news, his expression changed again.

The news was about the Hoshino.

That rich man from the East even had the national flower of the star rule country, Wang Meigui.

Naturally, arda knew what the Duke's Rose represented to the Star-Spangled Kingdom. It was something that represented glory and faith.

however, in this news, the rich man from the east had actually placed the duke's rose in the toilet for people to admire.

this was definitely trampling on and provoking the starstrip kingdom.

However, the key was that the Duke's Rose was still in the hands of that rich man from the East, and the xingtiao Kingdom's protest was actually useless. They could only make that rich man from the East move the Duke's Rose from the toilet door to the garden.

After reading the news, arda suddenly kept silent.

that was because it was the starstreak kingdom.

What were they compared to the starfish Kingdom?

What else could they do when the star-law nation had already compromised?

All of a sudden, arda felt powerless. This Eastern country was really different.

"Continue to protest!" after a moment, arda continued.

yes, " the Secretary said. I'll send another letter of protest.

"don't be scared," arda said hurriedly. change the content of the protest. We strongly object to the other party hanging Van Gogh's painting at the entrance of the toilet!

"? ? ?"The Secretary was stunned.

this protest

...

Qin Lin didn't know about this. He was looking at the names and information sent by Lin Lanzi.

these were the people lin lanzi had chosen to participate in the experiment of the hot spring powder.

Moreover, these people were all very carefully selected, and each and every one of them was very balding.

He was in full agreement with Lin Lanzi's suggestion to find the participating fans and livestream the entire process. This would be the most intuitive effect.

The effect of the hot spring powder would definitely be known to everyone. By then, there would be no need to promote it anymore. People with hair loss problems would rush to buy the product.

"Manager Lin, let's go with your plan!" After Qin Lin finished reading the publicity plan, he also signed the document and handed it back to Lin Lanzi.

"Okay, boss!" Lin Lanzi left the manor after receiving the documents. She returned to the office of the multimedia department and made arrangements to inform the selected fans.

...

Beihai No. 1 high school.

As usual, Yan zhenfang patrolled the year one students. This was also his daily job. The students' living conditions were also something that he had to observe and master as the year leader.

If anything happened to the students, he would have to stop them in time.

They had just turned a corner when Yan zhenfang saw a male and female student pair walking over while playing around. They were even holding hands. From their intimate looks, he knew that this was another pair of puppy love.

This made his face turn gloomy.

He was not against love. After all, his son could not find a girlfriend now, and he was worried to death.

However, puppy love was not encouraged. Firstly, it would affect her grades. Secondly, she was too young to understand what love was.

The moment the pair of students saw Yan zhenfang, it was like a mouse meeting a cat. Their expressions changed immediately, and they hurriedly let go.

Yan zhenfang walked over with a dark expression, but he only stared at the two of them for a while, then said to the boy, "Go back and write 5000 self-criticism."

[Chapter 808 370-Admit Defeat, Terrifying Data](#)

The boy felt guilty and immediately ran away without looking back, leaving the girl to face Yan zhenfang alone.

Yan zhenfang's dignity as a senior made the girl a little anxious, and her face was also very pale.

She loved to call her parents. If her parents knew that she was in a relationship, they would beat her to death.

It was only then that Yan zhenfang said to the girl, "do you think that after meeting me, the teacher, the boy abandoned you and ran away alone? he doesn't dare to face it with you. In the future, when you face other places, will he be able to protect you?"

When the girl heard this, she gritted her teeth and felt an inexplicable resentment towards the boy.

At this time, Yan zhenfang said to the girl, "as a student, you're still so young. You might not even be able to get four multiple choice questions right. You're looking for one out of 1.4 billion people. Did you find the right one, Yingluo?"

Yan zhenfang started to earnestly preach.

to be honest, he was very troubled by these rebellious students who were in puppy love. these students loved to go against the teachers. they were good at smoking, fighting, skipping classes, and so on.

these students didn't know that they weren't going against their teachers, but their own future and their parents.

The point was that girls at this age liked boys like him. They felt that they were heroes for daring to go against their teachers. They would only realize how stupid they were now when they were a few years older, but by then, it would be too late for many girls to regret it.

Towards these students, not only were their teachers anxious, but their parents were also anxious. He even knew that some of these students' parents had even formed a group called: "the father's worries alliance!"

They were discussing how they were going to save their children.

"Give me the 5000-word reflection when you go back." Yan zhenfang lectured the girl and said at the same time.

The girl left in a hurry, her eyes red from the lecture.

yan zhenfang also continued to patrol, but he had not walked far when he could faintly hear the voices of the students behind him. "

Lin Xiaofeng from Class 5 and Wang Hai from Class 7 were caught by the Mediterranean just now.

I saw it. That Wang Hai ran away. The woman is being lectured by Mediterranean.

"The Mediterranean is too free, Yingluo."

These faint voices made Yan zhenfang extremely vexed, but as a teacher, he could only pretend that he didn't know anything and sigh deeply.

Although he could have lectured the students without respecting the teachers, he really cared about his baldness, so he chose to ignore the matter.

back in the office, yan zhen had just sat down when his phone rang with a message ringtone. when he saw the message he had received, his face revealed a look of surprise.

it was his application to participate in the linlin villa's hot spring elixirs that had been approved, and he had been informed to bring photos of his past life to linlin villa.

He asked for photos of his daily life to prove that he was bald and not fake.

Otherwise, the effect would be more obvious, and others would think that it was fake.

yan zhenfang went to the school to ask for leave at the first moment, then bought a ticket and rushed to you city.

The school also took his hair problem seriously. With the reputation of Linlin company and professor Li Kai, the school immediately agreed.

The school naturally knew about Yan zhenfang's nickname of the Mediterranean. This was not good for the school's atmosphere, but this nickname of the Mediterranean could not be blamed on Yan zhenfang's age.

Therefore, the school also hoped that Linlin's company's hot spring powder would be effective.

Yan zhenfang rushed to Linlin villa at the fastest speed possible and dialed the contact number on the message.

Not long after, a staff member from the media department came out to pick up Yan zhenfang, and he was brought to the nuptial area.

For this event, Lin Lanzi had reserved 20 nuptial rooms with the villa for the 20 participating fans.

When Yan zhenfang arrived, he discovered that there were also people in the nuptial chambers around him who also had hair problems, and all of them were bald.

When these people saw Yan zhenfang, they looked at each other silently, then looked above each other's heads, as if they had confirmed that they were comrades, and then nodded slightly to each other.

After the participating bald fans settled down, Lin Lanzi's side also began to prepare a live broadcast room.

Every day, the villa would send the 20 participating fans the hot spring powder produced by the Linlin health maintenance factory. Then, they would gather at the same place every day to report and let everyone see the latest effects of the hot spring powder they had used.

The next day.

As soon as Yan zhenfang and the others arrived, they were informed to go to Linlin villa's multimedia department to sign the contract and participate in the live broadcast.

Not long after.

Many fans who followed the official account of Linlin villa noticed that the avatar of the official account was lit up with circles of red light.

That meant that Linlin villa had started their live broadcast.

The fans who saw this scene were all shocked.

Linlin villa usually didn't do live broadcasts, and they all knew why this was a live broadcast.

Although no one knew the exact effects of the hot spring elixir, it was already very popular on the internet. Countless people who were troubled by hair had seen it and rushed into the Linlin villa's live broadcast room at the first moment.

In a short time, all the viewers could see that the number of viewers in the upper right corner of the live broadcast room had begun to increase rapidly, and soon, the number showed 200000 +.

This was the number of online viewers.

As soon as the audience came in, they saw the scene of 20 participating fans signing the contract. Moreover, these fans were introduced on the live broadcast screen, and there were photos of their past lives.

[Chapter 809 370-Admit Defeat, Terrifying Data](#)

Many of these photos could be traced back to more than ten years ago, which meant that these people had really gone bald a long time ago. These people really had hair problems, and not fake ones from Linlin villa.

Since Linlin villa dared to do a live broadcast like this, it undoubtedly showed that they were very confident in their products, which made countless people start to look forward to it.

Linlin villa's livestream viewers were still increasing. As the number of viewers increased, the traffic pool also increased the traffic of Linlin villa's livestream room, attracting more people to enter.

Soon, the number of viewers in the entire live broadcast room broke through the number of one million. This was a terrifying number.

this was because linlin villa did not buy any robots. they were commonly known as cheater, and this was the real number of people online.

This showed that the quality of the fans who followed Linlin villa was really good. At the same time, it also showed that there were many people who had hair problems.

At this time, countless people with hair problems had entered Linlin villa's live broadcast room.

and as the flow increased, the value became higher and higher.

This number naturally shocked the music department's officials.

Chu Lei was the data Director of a certain live broadcast. Due to some rectification by the government, the live broadcast data was very uncomfortable. First of all, they no longer allowed fake online viewers to deceive people. At least, the fake viewers had to be maintained offline.

In addition, there were restrictions on the content of the live broadcast. There were also restrictions on traditional live broadcasts such as PK live broadcasts and teasing. Therefore, it was very difficult to have the same live broadcast data as in the past.

Before there was a limit, many internet celebrities 'live streams could reach 500000 + viewers at the same time. Even a few top internet celebrities could reach 1.5 million + viewers at the same time.

Although this number was very fake, and most of them failed, the data was created. Moreover, the reward income from live streaming was also very terrifying.

These were the numbers that they had publicized.

Now that everything was back on track, and those PK streamers had all given praise, it was not easy to do the data anymore.

Just as Chu Lei was thinking about this, he saw his assistant rush in from outside the office. "Director Chu, there's another live broadcast that has over a million viewers."

Chu Lei was surprised. "Which host is it? Was it Wu * or Lin *? Or is it Li Ziqi or Liu genghong?"

" none of them, " the assistant hurriedly said. " it's the official account of linlin manor. "

"Linlin villa?" Chu Lei was surprised.

Of course, he knew about Linlin villa, because it was a popular topic. Anything that it created would become a hot search.

Moreover, it was a hot topic, so they would also give Linlin villa a certain amount of traffic.

It was just that Linlin villa rarely livestreamed, so he didn't expect that the number of online viewers would break a million the moment Linlin villa started livestreaming.

"How many pieces of metal did they hang?" Chu Lei asked hurriedly.

"There's no cheating, they're all active users," the assistant hurriedly said.

"let's go and take a look." Chu Lei was in disbelief.

In the past, those live streamers who had more than a million viewers online had died a lot.

Now, he was told that Linlin villa, which had over a million online viewers and did not live stream often, did not die?

Were the fans of Linlin villa so high quality?

Chu Lei followed the assistant to the multimedia database to check the data. However, when he saw the number of online viewers from Linlin Manor, he was shocked.

It had already exceeded 3 million online users, and they were all active users.

This was too unbelievable!

Chu Lei was in disbelief!

However, he did not know that with the increasing social pressure, the number of people who suffered from hair loss had reached 460 million, and more than 50 million people were bald.

therefore, how could these people not stay after seeing the contents of the message in linlin villa's live broadcast room?

Once such a problem appeared, who would be able to face it calmly and who would not want to find a solution?

Moreover, after seeing Linlin Manor's confident performance, they naturally stayed to watch the situation.

Therefore, after Linlin villa's livestream room broke the 3-million mark, the number naturally increased.

Even mouyin herself was shocked by this data. A streamer with this kind of data could completely turn the tables and make them worship her.

This was too unbelievable.

[Chapter 810 It's Like Two Generations! The Whole World Is Going To Be Shocked](#)

Of course, this was only the official rough statistics.

The total number of people who were truly bald, half-bald, or beginning to bald should be far more than this number.

moreover, people would start to lose hair at the age of 30, and almost no one could avoid it. even those handsome and beautiful stars could not escape the fact that their hairline was getting higher and higher.

Therefore, when such people saw the contents of Linlin villa's livestream room, they would also stay and investigate.

Mouyin wasn't the only one who was shocked by the number of people online in Linlin villa's live broadcast room.

Even the online audience found it unbelievable.

Therefore, in the end, the traffic of this live stream would be so high that even if countless users opened " mouyin ", almost no more than three videos would be able to see Linlin villa's live stream.

This was the terrifying heat caused by hair loss, hair loss, and various hair problems.

At the same time, the words " Linlin Health Pharmaceuticals 'live stream of hot spring powder trial " were also seen by everyone in the live broadcast room.

So, this was a new company of Linlin company?

linlin health pharmaceuticals also clearly stated what the company did.

The hot spring elixir should be the first product of this company.

Moreover, if the hot spring powder was really effective, no one would doubt that another Linlin company would rise.

it was also under this kind of heat that the experiment of the hot spring powder began.

Linlin villa's staff began to distribute the hot spring powder to Yan zhenfang's fans who had participated.

These were all quality 1 hot spring powder produced by Linlin health pharmaceutical factory.

Although the hot spring elixir was broadcasted live, the effect was not that fast. Therefore, when Yan zhenfang and the others went back to use the hot spring elixir and rest, the live broadcast room would repeatedly broadcast the information of Yan zhenfang and the other participating fans, letting people passing by the live broadcast room know the purpose of Linlin villa's live broadcast.

The night passed.

The next day, the most searched news was undoubtedly related to Qin Lin villa again. Moreover, the top five most searched news were all about Linlin company.

"linlin pharmaceutical company's hair growth products!"

"Hot spring powder!"

"Another Linlin company!"

"Linlin Manor's livestream numbers are off the charts!"

"Linlin company's hair growth experiment."

This kind of popularity was something that the products of Linlin villa and Linlin company had never experienced before.

It also showed the attraction of the hot spring powder and everyone's expectations.

There was a good saying, "blood can flow, head can be broken, but hair can't be messy!"

This also showed the importance of hair.

She could skip the drinks and tomato sauce, and she could use other beauty products, but she really had to use products that could help with hair growth.

Soon, Yan zhenfang's 20 or so fans who had participated in the experiment appeared on the live broadcast screen again.

In the experimental contract they signed, they were required to appear on camera once a day to let the fans and audience watching the live broadcast see the experimental situation.

On the first day, there were naturally no changes.

A Grade 1 hot spring powder wasn't that effective.

The next day, there were still no changes.

People's enthusiasm and attention to something were often limited, especially when they didn't see the results they expected.

The third day.

Three days had passed, and the attention and number of people online in Linlin villa's live broadcast room had begun to decline.

Even though everyone knew that hair growth products couldn't take effect so quickly, sometimes, one's mind was a subconscious action that couldn't be controlled.

...

Another day passed.

Linlin Manor.

Nuptial chamber.

Yan zhenfang once again woke up in the nuptial chamber. Because he was participating in an experiment, his clothes, food, accommodation, and transportation were all free.

These few days, he had been living quite comfortably.

The daily rest in the nuptial chamber in Linlin villa really made him understand why it was so difficult to book the nuptial chamber in Linlin villa.

After brushing his teeth and washing his face, Yan zhenfang began to apply a hot towel to the top of his head, and then he had to tie up the long hair on both sides of his head to cover it.

This was also what he did daily.

Although there was no point in doing so, it could at least give him some psychological comfort.

However, this time, when he looked into the mirror, he could clearly feel that something was different.

he could see some black dots above his head in the mirror.

Those black dots were very prominent.

Although the attributes of a Grade 1 hot spring powder were worse than a Grade 2 one, it was still effective.

This made Yan zhenfang stunned for a moment, and he leaned into the mirror in disbelief.

However, when he got too close, he realized that he could not see the top of his head.

Yan zhenfang hurriedly went out of the nuptial room and knocked on the door of a fan who was participating in the experiment.

The experimental fan opened the door and the two of them met. They said the same thing in unison, "

"Help me look above my head!"

"Help me look above my head!"

The two of them were stunned when they heard each other's words, and then they looked at each other and smiled.

"Let me see!" as the test subject spoke, he hurriedly helped yan zhenfang check the top of his head. when he clearly saw that some hair follicles and hair roots had indeed grown on the top of yan zhenfang's head, his face was full of surprise. it's really growing out. Help me take a look!

As he spoke, he lowered his head. Yan zhenfang also looked at the top of the other party's head and also saw some hair follicles and hair roots. It was very clear that they had really grown out.

Looking at the other party's head, Yan zhenfang was full of smiles, as if he was looking at his own head, his face full of relief.

Soon, the others also came out, with the same understanding smile on their faces.

...

In Linlin villa's livestream room, as the time for the 20 people participating in the experiment arrived, the number of viewers in the livestream room began to increase rapidly.
