

The Game 811

[Chapter 811 It's Like Two Generations! The Whole World Is Going To Be Shocked](#)

These people had been following the livestream of Linlin villa for a long time and were waiting for this time to see the results. Most of them were balding people.

today, I'll tell everyone a piece of good news. The 20 fans who participated in the experiment have already begun to show some results. The sound from the live broadcast made the audience in the live broadcast room look forward to it.

Although the effect of a Grade 1 pill wasn't as good as a Grade 2 pill, which was too slow in the eyes of Qin Lin and Lin Lanzi, it only took four days for the pill to take effect in the eyes of the outside world. This was incredible.

Their hair loss and baldness had been treated for years, even decades without any effect.

It was also at this moment that Yan zhenfang and the other people who were participating in the experiment entered the live broadcast room. Furthermore, the camera in the live broadcast room began to pull in their heads for a close-up.

Linlin villa's livestream room used super high-definition livestreaming equipment and not mobile phones. Therefore, after the distance was closed, one could clearly see the hair follicles and hair roots that were at most visible on Yan zhenfang's and the others' heads.

"as everyone can see, there are some more black grass seedlings in the desert, right?" The voice in the live broadcast room sounded again.

Yan zhenfang and the rest were also very cooperative and used their hands to rub the top of their heads, wiping them with towels. The hair follicles and hair roots were still there, and it was not fake at all.

This made the entire live broadcast room lively.

"It'll be effective in four days. Is that true?"

it's unbelievable. Linlin's products are really amazing.

"Who can tell me when this hot spring powder will be released? Where can i buy it?"

"Same question +1"

"Same question +2"

"....."

same question +1265464 "

"....."

Without a doubt, the effect of the Linlin hot spring powder shocked everyone.

In a very high-end Business Club.

Wang Danan was watching the livestream of Linlin villa on his phone in the private room. He was a successful man, and at the age of 36, he was already the CEO of a large corporation.

However, while the heavens had given him this ability, they had also wanted to take something away from him. Furthermore, they had taken a lot from him, leaving an empty space above his head.

At his age and position, he should be the young, promising, and overbearing President on TV. Then, there was a group of fangirls in the office who looked at him with infatuation as he walked out of the office.

Unfortunately, everything was different because of his hair. The most he heard was the discussion about the top of his head.

Even a Secretary who had been subdued by him and could be toyed with as he pleased had told others on WeChat about his hair problem, which made him so angry that he fired that Secretary and hired another one.

It was not that he had not thought about getting a hair transplant.

However, he gave up after checking the information on the hair transplant. The hidden problems and possible problems could be left to the hospital to deceive ordinary people who did not know the inside story.

To hell with the overbearing CEO and the fangirl. He had already reached this position, but these seemed so far away.

At this time, Wang Danan saw the situation above Yan zhenfang and the others in the live broadcast room, and he became excited.

This was the first time he had seen a hair growth product with such an effect.

This was unbelievable. It had only been four days.

he felt that his dream of being an overbearing president seemed to be saved, and he almost subconsciously wanted to give the live broadcast a carnival!

the livestream room you're watching has turned off the donation function!

This hint made Wang Danan very sad.

Why did you turn off the gift function?

He wanted to give a reward.

He wanted to use the gifts to vent his excitement.

Wouldn't this make him unable to vent his excitement?

"King, what's making you so happy?" A Western man with an aquiline nose suddenly walked into the club and asked Wang Danan.

the aquiline-nosed white man's head was also in a bad state.

The man was a German named Filis Aude, who was also a big businessman in Germany.

Everyone knew that Germany was one of the three countries with the most severe balding in the world, with a balding rate of 42%.

In other words, four out of ten people were bald.

Wang Danan looked at Phillis Aude's head, which was in a worse condition than his own, and immediately shared, " Filis, I have good news for you. A product that can help with hair growth has been launched in our country. In just four days, it has already begun to show some results.

"What? Hair growth, four days?" Phillis Aude's eyes lit up almost instantly when he heard the news, and he subconsciously touched his head.

Then, Phillis Aude jogged to Wang Danan's side and looked at the content of Linlin's live stream with him.

As he watched the livestream, the disbelief on Phillis Aude's face grew stronger. It was known that his grandfather, father, and himself were all bald. This seemed to be inherited in their family, and after the age of 25, this inheritance would become more serious.

Moreover, this problem was very serious in their country.

If they could buy this product and even bring it back to sell in China, would many people in China go crazy?

This product would go viral, and many people would rush to buy it.

Qin Lin didn't know any of this. He only paid attention to the live broadcast of the hot spring powder. After the 20 fans who participated in the experiment used the hot spring and showed its effect, the heat of the hot spring powder reached its peak.

after that, it wasn't just tiktok, but also wechat, mobile, and various other platforms. all of them were discussing the news of the hot spring powder. even the official news had reported the news.

This also showed how big of a social problem hair was.

As the livestream in Linlin villa continued, Yan zhenfang and the other fans who had participated in the experiment had their heads look different almost every day.

Once hair grew out, it grew very quickly, one to two centimeters in a month.

It was because of the product's effect that some hair grew first and some later, so the hair would be uneven.

But even so, Yan zhenfang and the others 'black hair that grew thicker every day also made everyone more and more shocked.

It was not until almost 40 days later, when Yan zhenfang appeared in the live broadcast room again, that everyone exploded. His popularity once again soared to an extreme height.

Because this time, Yan zhenfang and the other 20 people had already gotten the hairdressers to cut their hair specially. There were no hairline problems at all, and no baldness problems at all.

This wasn't a special effect from an advertisement, but a real product's effect. All the viewers had been watching the effects of the hot spring powder step by step for more than 40 days.

Now, all 20 of them had regained their thick hair and had different hairstyles. Compared to their appearance a month ago, they did not look like one person at all. They were more like father and son.

there was a world of difference in appearance between those with and without hair problems.

It was unknown how many people would not be able to sleep tonight.

If Linlin villa's hot spring powder could really solve their hair problem, it meant that the problem that had been plaguing them for so long had finally been solved.

on the other side of the earth.

In a luxurious palace in England, an aristocrat looked dispirited. As a public figure and a noble who often had to socialize, he suddenly had a serious hair problem last year, which was very fatal.

However, he had tried countless ways in China to solve his problem, but none of them could solve it.

Suddenly, a handsome young man ran in with a Chinese man and said excitedly, "Father, perhaps there's a way to solve your troubles."

"What is it?" the aristocrat asked, puzzled.

"father, this is a live video of a product from the eastern country. their product can solve your problem.

"The handsome young man hurriedly explained and handed the phone to his father.

He knew about his father's troubles, so he also posted on the internet to ask people to find a solution to his father's hair problem.

Someone from the East had just contacted him, saying that they had a product that could solve the hair problem.

"What are these people talking about?" the aristocrat Lord looked at the livestream room and asked hurriedly.

"Hurry up and translate," the handsome young man said to the Chinese man.

The Chinese man nodded. He immediately went forward and translated the contents of the Linlin Manor's livestream.

When the noble heard that the person in the Linlin hot spring was the same person as the one in the treatment photo, and that he had used the same product, his face was filled with disbelief.

hurry up! he cried out anxiously. I want this thing, no matter what!

Although he wasn't sure if this thing was real, he had to try.

[Chapter 812 373-Fetus-Beneficial Factor! Completely Unable To Purchase](#)

Linlin Manor.

In the office.

Qin Lin's attention was already on the screen in his mind, controlling the game character to do daily tasks.

After the daily mission did not yield any results, he controlled his game character to wander around ore town, hoping to be lucky enough to encounter some plot mission.

There were no plot quests.

However, he was in luck today. When he arrived at Dr. Dott's place, he found that the doctor had started to sell medicine.

However, there was only one medicine on the list: It was a factor that was beneficial to the fetus!

Qin Lin was surprised by the medicine.

According to the game's introduction, one had to get married in the game and get pregnant before doctor Dott would start selling it.

Moreover, it was not cheap, but the player had to provide it to his wife in the game every day.

However, this wasn't right. After all, his game character didn't have a wife, let alone a pregnant wife.

due to the system's special nature, he had even directly cut out the game's method of picking up girls. therefore, he had not met the trigger condition at all.

he didn't expect doctor dott to sell this thing.

This surprised him.

Qin Lin controlled his game character to buy 10 items in a row. When he returned to the farm, he immediately entered the game and saw the note:

[fetus-beneficial Foundation factor: quality 2!]

[this is a medicinal liquid that is very beneficial for pregnant women. after taking it, not only will it satisfy the various nutrients a pregnant woman needs, but it also has a special effect: Quality of fetus development +2, health of fetus development +2, physique of fetus development +2, health of mother during pregnancy +2!]

Obviously, this medicinal liquid was to help the development of the fetus. The quality of the fetus 'development was needless to say. Even children born from the same parents were good-looking, ugly, spiritual, and dull.

There was no need to mention the healthy development and Constitution of the fetus. Some fetuses were born healthy and learned to speak and walk faster, while some were born with all kinds of problems, even dementia.

With this factor, there was no need to worry about these problems. The fetus would grow very healthy, and after birth, it would be healthier than other children. It would have a better physique and would not have this kind of problem.

She did not win at the starting line, but at her mother's stomach.

Needless to say, +2 to the mother's health during pregnancy was good for the pregnant woman. It was also the time when pregnant women were most likely to have problems.

It was a pity that doctor Dott only sold the finished product and not the secret recipe. Otherwise, this thing could completely improve the quality of the entire race by a large margin.

Think about it, if every pregnant mother drank this liquid, what would happen to the child that was born? At the very least, their physical fitness and Constitution were definitely of high quality.

When the entire race was like this, it was considered an overall improvement.

He was thinking about whether he should buy some of this and send it to Linlin's laboratory for brother li to help with the research.

If old brother li couldn't do it, then there was still professor Ren, who was an expert in this field.

However, the origin of this thing was hard to explain.

Even if it's about the secret formula, you've already concocted this medicinal liquid. It's impossible that you don't even know what medicinal ingredients are used in the formula, right?

Therefore, it was better to think about it.

What was the purpose of those companies to research and crack a product? In order to earn money. money wasn't that important to him at the moment. those products could already make him a lot of money.

To him, money was only a difference in numbers, so there was no need to do such a risky thing.

there were 24 bottles of medicine in total, which meant that one box could last 24 days. these 10 boxes were enough for 240 days, which was enough for zhao moyin to drink during her pregnancy.

At night.

qin lin went to the villa to pick up zhao moyin.

This was something he had to do every day.

Pregnant women were especially sensitive and would let their thoughts run wild, so they needed more care from their husbands.

At this time, if she felt neglected, she might overthink, which was not good for the pregnant woman and the child.

Therefore, if his wife was pregnant, as a man, he should go out less and go home earlier to spend more time with his wife.

As soon as they returned to the inner area of the manor, Qin Lin gave these beneficial factors to Zhao Moyi.

Now, Zhao Moyu's stomach had also started to bulge slightly.

"Honey, What's this?" Zhao Mo asked as he looked at the fetus-beneficial genes.

Qin Lin explained, " it's good for the baby. One bottle a day will do. By the way, now that I'm pregnant, I don't have to do things in the villa myself. Some things should be handed over to the people below. Let them do more.

"En!" Zhao moyin knew that Qin Lin was concerned about her, so he immediately nodded and also picked up a bottle of beneficial fetus factor and drank it.

It was very difficult for a woman to be pregnant.

At the beginning, he would often feel dizzy, weak, sleepy, narcolepsy, acid reflux, and other reactions. Especially at the place where the child was conceived, it would be a little heavy, sore, and weak.

However, after drinking this bottle of fetus-enhancing factor, Zhao mochen felt much more comfortable in just a short while, and all those feelings disappeared.

Especially the place where the baby was born, there was an indescribable sense of comfort.

It was a very magical feeling!

...

The next day.

qin lin got up and went to the warehouse to deliver the things he needed today to the villa. not long after he returned to the manor's office, deng guang, chu yue, kong lin, and lin lanzi came to him.

[Chapter 813 373! Beneficial Fetus Foundation Factor! Completely Unable To Purchase](#)

They were here for the hot spring powder.

"Tell me about the latest situation at Qin Lin pharmaceutical!" Qin Lin asked directly.

Chu Yue directly reported, " Chairman Qin, over the past 40 days of live broadcast, we have already assessed and found a few agents for the hot spring elixirs. Moreover, the production line has long been in place, and there is a lot of stock in the inventory. The first batch has already been sent to the agents. When the time comes, we will also put up a batch on the internet.

"Yes!" Qin Lin nodded.

Linlin food actually had a lot of agents, including the tomato sauce agent and the Linlin leisure tea agent.

However, the company's hot spring powder was a new agent, so they couldn't give all the benefits to the original agent.

If they wanted to compete in the future, they definitely wouldn't take the initiative to go up. This was also a big taboo, as these agents might get carried away.

Chu Yue then reported, " the current products are divided into the basic type and the premium type. The premium type is the effect of the original hot spring powder. The basic type is weakened by professor Li Kai's help.

we're using a small pack of products. One pack is about 50 yuan, and one pack can allow you to soak in it once. The cost is about 10 yuan. Based on the current calculations of the basic medicine, it will recover your luxuriant hair in about four months.

"The original effect is 1000 Yuan per pack. The recovery time is 40 days, and the cost is 30 yuan! We've already stocked up quite a lot of products of both levels, and we're just waiting to sell them."

Qin Lin nodded when he heard the price.

To be honest, 50 yuan for the basic type was not a scam. One pack a day would only cost 1500 Yuan a month, and 6000 Yuan for four months.

He could believe that those bald people would definitely spend more than 6000 Yuan on their hair.

on the other hand, 1000 yuan for a quality 1 was a little too much. it only cost 20 yuan, but it would cost 30000 yuan for a month.

this was only provided for people who didn't lack money.

These people were not short of money. If you sold it for 1000, the effect would be stronger, and people might even feel that it was better.

Even if they were baldies, they were baldies with more money and class.

If you sell it cheaply, they'll still have objections.

Moreover, with such a price, what would happen if they spent two to three years to spread the hot spring elixirs?

50 million bald people, 6000 Yuan for a treatment, this meant that they had to first contribute 300 billion Yuan in sales.

How much would 460 million people with hair loss problems contribute?

moreover, if they didn't use the hot spring powder to treat their hair, it meant that they didn't know how to use it anymore.

People who had been bald before would treasure their hair even more. They would buy and maintain their hair on a daily basis, which was the real profit.

Moreover, this would become a necessity, and it was definitely not something that Linlin ketchup or Linlin leisure tea could compare with.

He was afraid that in two to three years, his wealth would be at the top of the country and he would really be one of the big bosses.

in that case, " Qin Lin said, " we'll announce the release of the product. Please cooperate with manager Lin.

"Alright, Chairman Qin." Chu Yue nodded.

"Don't worry, Chairman Qin." Lin Lanzi immediately replied.

After that, the group of people had a meeting and went back to work.

The moment Lin Lanzi returned to Linlin villa's multimedia department, she got someone to release the video of the product launch that she had prepared earlier.

Linlin villa's official account had been livestreaming for more than 40 days, and its fans had already increased to more than 50 million, becoming one of the top accounts in the music industry.

That's right, that was it.

After more than 40 days of live streaming, as the balding condition of Yan zhenfang and the other experimenters got better and better, more and more people clicked and followed the official account of Linlin villa.

This was the effect of the product being strong enough. They didn't need to think about the content of the live broadcast, try to please the audience, or spend money to buy traffic.

Moreover, now that the livestream at Linlin villa had ended, these people were paying even more attention to Linlin villa, as they were all in a hurry to buy the hot spring powder, wanting to know when it would be released and when they could buy it.

Therefore, many people would open the official account of Linlin Manor to check the situation when they were free.

Once Lin Lanzi got someone to post the release video, many fans started to pay attention.

"Let me tell everyone a piece of good news. The Linlin hot spring powder has already started selling, and it will be released in two hours at the same time in various places. As long as you are in an area where our product agents are, you should be able to buy it at any shop.

At the same time, two hours later, we'll also put up a batch on the internet to buy the Kasaya."

As soon as the video was released, countless people were stirred up. The number of comments and likes in the comment area also increased at an incredible speed.

Many people had already opened the back-end of the Linlin villa official account and saw the link to the hot spring elixirs. However, the link could not be clicked on now, and there was a countdown on it.

but even so, many people had already kept the APP interface here, some even sitting still, looking at the countdown.

They were afraid that they wouldn't be able to get it. They didn't want to wait a second longer. They wanted to get the hot spring powder as soon as possible. Those with thick hair who didn't have this problem would never understand their worries.

Only by spending a few years, or even more than a decade, and still not seeing any effect, would people who had been under the strange gazes of others be able to understand their feelings.

Beihai No. 1 high school.

Yan zhenfang had already returned to work. What was different from before was that his head was now thick, and he had a very showy hairstyle with thick hair wax on it, as if he was trying to make up for what he had lost in the past.

His appearance naturally attracted the attention of all the students around him. These days, the new Ghost story in the school was about the balding hair growing out.

This was very surprising to those students. After all, they had been looking at Yan zhenfang's Mediterranean Sea for so long. It was quite strange that the Mediterranean Sea had suddenly disappeared.

yan zhenfang was now facing the gazes of those students with a smile on his face. his hair had grown out, and his feelings and state of mind were completely different.

After returning to his office, he sat down, opened mouyin, and clicked on the official account of Linlin villa.

Although his hair had already grown back, he was afraid that he would go bald again. Therefore, he still had to buy Linlin villa's hot spring powder for daily maintenance. However, this product had not been released yet, and he did not know when it would be released. He could only wait for the official account of Linlin villa to release a video notification.

This time, as soon as he entered the official account of Linlin villa, his eyes lit up. It was going to be released.

He immediately clicked on the purchase link and waited for the countdown.

Two hours wasn't a long time, and it passed by quickly.

Yan zhenfang was practically counting the countdown. The moment the countdown ended, he clicked on the purchase link at the fastest speed and entered the purchase interface.

In the order-placing interface, he needed to fill in information such as his name, phone number, and address.

Yan zhenfang filled in his information at almost the fastest speed possible, but he was only halfway through when a message suddenly popped up on the interface:

"The goods have all been snatched up!"

shua shua. when Yan zhenfang saw this notification pop up, his entire person's face turned ugly.

He had never thought that this would be the result. He had always thought that his speed was already very fast, but those people were too fast, right?

On the other side, in a villa, Wang Danan and his friend from Germany, Phillis ode, were waiting in front of the countdown for the Linlin hot spring powder.

Moreover, Wang Danan was rich, and he had invited many people.

He could see that in the villa's living room, everyone was holding their mobile phones, ready to go.

He didn't believe that they couldn't reach it with so many people.

So, when the countdown ended, he clicked on the snap up link with those who had been invited and filled in the order as quickly as possible.

However, as he was filling in his information, he received a notification:

"The goods have all been snatched up!"

This notification made Wang Danan's face turn ugly. He hurriedly shouted to the others, " "Did you manage to get it?"

However, those people also looked up in confusion and shook their heads subconsciously.

The people online were so fast that they had already used all their strength.

Wang Danan couldn't help but curse.

[Chapter 814 The Special Goddess Plot! The Magical Moonstone](#)

Wang Danan directly started to curse.

He thought that with so many people here, they would at least be able to get it, right? Who knew that he would find nothing.

Mr. Wang, " someone reminded him, " there are still sales points offline. Linlin company has a sales point for their products. We can go and take a look.

Hearing this, Wang Danan immediately felt a glimmer of hope. He immediately led his men out and opened the Linlin company's website to check the situation of the sales outlets.

There happened to be a sales point near him, so he brought his men to the sales point immediately.

It's so close, I should be able to get it, right?

When Wang Danan brought his men to the sales point, his face turned ugly.

There was no chance at all.

There was already a long queue outside the supermarket. It was so long that one couldn't forget the end of it. All of them were either bald or had little hair. The people at the back of the queue were all anxious, afraid that they would be gone when it was their turn.

Just as Wang Danan arrived with his men, the supermarket became noisy, and there were also people cursing.

"Everyone, I'm sorry. We don't have any more Linlin hot spring powder." The supermarket's announcement was also heard at this time.

It was obvious that the hot spring retail stores were sold out, and those who happened to queue but couldn't buy it were anxious.

It didn't matter if they couldn't buy it after waiting in line for a long time, but it was almost their turn, and they didn't have it anymore. This was very uncomfortable.

However, the people who bought it were all overjoyed. Like generals who had won a battle, they walked out with the hot spring powder in their hands.

The others could only watch helplessly.

But Wang Danan wasn't one to just stand by and watch. So, he directly walked towards a person who had managed to buy a high-quality hot spring elixir and said, "Friend, do you want to sell this hot spring powder?"

"I'm not selling!" that person said decisively.

What kind of joke was this? it wasn't easy for him to get 10 packets. This could solve his balding problem. How could he sell them?

Wang Danan saw the other party's rejection and continued, "The ones in your hands, 200000!"

"I'm selling!" That person said decisively this time.

What a joke. He had only spent 10000 Yuan on the 10 bags of premium goods. If an idiot spent 200000 Yuan on them, he would be an idiot if he did not sell them.

"Bank account number!" Wang Danan said decisively.

That person didn't stand on ceremony and directly told him his account number. Wang Danan also directly transferred the money and got the 10 bags of high-quality hot spring powder.

This scene obviously attracted the attention of other people, and another person came forward to Wang Danan and said, "Sir, I also have 10 packets of premium hot spring powder. Would you like to buy them?"

"I'll buy!" Wang Danan said decisively.

A moment later, a group of people surrounded Wang Danan and asked Jiang to sell the hot spring pills to Wang Danan.

Therefore, there were still benefits to having money. Many things could be solved with money.

When Filis ode saw Wang Danan's actions, he stood up without hesitation and shouted, "I'm buying them here too. I'll buy 10 packs for 200000 Yuan each.

His Chinese was not very fluent, but the others could still understand it. Therefore, people quickly gathered around him.

Anyone would do that if they could earn twenty times the profit in one go. The hot spring powder would only be used a few days later at most. As long as Linlin pharmaceuticals didn't stop production, there was no need to worry about not being able to buy it.

The people around them who didn't manage to get the hot spring powder were also extremely vexed. They had completely missed an opportunity to make money.

Since he couldn't make money, he would slander him.

Therefore, they all took out their phones to record videos and posted them on the internet. The title was:

a fool spent 20000 Yuan to buy a pack of hot spring powder!

"there are so many rich fools these days!"

"This is really a fool. Can't he wait a few days before buying?"

Wang Danan wasn't stupid. He was only qualified to spend money like this because of his strength. But he wasn't stupid either. He bought some and left.

Even if he couldn't buy it now, it didn't mean that he couldn't buy it after the hot spring elixirs were promoted on a large scale.

After Wang Danan returned to his villa with the hot spring powder, he went to the bathroom immediately. He put the hot spring powder in the bathtub and began to soak.

What he didn't know was that, with the popularity of the hot spring elixirs, the video of him buying the hot spring elixirs had already been uploaded to the internet and was on the hot search.

The price of 20000 per pack was a business opportunity. Indeed, hot spring elixirs were so difficult to get. It was very likely that rich people would not be able to get it, but they were willing to spend money to buy it.

They were rich and had high social status. They cared more about their image and would definitely spend more money on it.

Even if he couldn't sell it for 20 times, he could at least sell it for 10 times, right?

linlin manor.

Chu Yue and Kong Lin also arrived at Linlin Manor immediately to report this problem to Qin Lin.

Chu Yue: "Chairman Qin, the price of the online hot spring elixirs has been hyped up. The price of high-quality hot spring elixirs has been hyped up to 20000 Yuan a pack. I'm afraid that this will affect our future sales. More importantly, I'm afraid that the bottom-level merchants will hoard the goods. After all, the profit is attractive.

"How do you guys plan to handle this?" Qin Lin nodded.

Twenty times the profit, no one would be able to resist this temptation, they would definitely have thoughts about it.

This was human nature.

therefore, this matter had to be dealt with.

Chu Yue hurriedly said, "Chairman Qin, we're taking a temporary measure. We're going to collect the payment within a time limit and register the customer's information. The hot spring elixirs sold will be

bound to the customer's identity and added to the list of followers. We're also planning to create an official account for Linlin pharmaceutical.

"Mm! You guys can deal with it as you see fit." Qin Lin didn't want to get involved in the company's business.

[Chapter 815 The Special Goddess Plot! The Magical Moonstone! 2](#)

When he was afraid, they couldn't deal with things. Since they had a way, it was fine.

In that case, he would let them handle it themselves and give them enough trust.

In the blink of an eye, four days had passed.

In the past four days, the people who had bought the hot spring powder had already experienced it, and those who had used the quality 1 hot spring powder had already begun to show its effects.

Wang Danan was just like that. When he looked into the mirror, he saw that his bald head was different.

Before he could rejoice, he heard a hurried knock on the door, and an unusually urgent shout, " "King, King, open the door, Yingying!"

Wang Danan went out helplessly and opened the door. He saw Filis ode rush in. He immediately lowered his head to show him. Wang, look, is there a cricket on it? "

Wang Danan looked over, and it was true. Phillis Aude's head had also grown out. He immediately said, " "Filis, that's right, yours has also grown out."

When Filis ode got the answer, he didn't hesitate. He hurriedly took out his phone and handed it to Wang Danan. "King, quickly help me take a video. I want to send it to my clan leader!"

Wang Danan nodded. He knew how much power Filis 'family had in Germany. They were one of the tycoons that controlled the country's lifeline.

When Filis ode got the video, he didn't hesitate. He sat in front of a computer and imported the video into it. Then, he found many videos about Linlin hot spring powder on the internet, edited them, and sent them to his family.

This magical product was what their country needed, and it was also what their country needed.

On the other side.

At an international mail delivery office, a female employee who was handling mail also looked at the young man in front of her with a strange expression because the mail address he sent was: The castle complex of Balmora.

How could someone send mail here?

Because this was the castle complex where the English royal family lived, mail would usually be rejected there, okay?

The female employee looked at the young man and suddenly understood. Could this person be interested in her and was here to show off?

After all, she thought that she was pretty and had heard of such things. Some people used this method to send mail. Some silly women thought that the other party must have some skills since the place they sent things was so impressive.

This trick was too LOW.

The female employee filled in the email, collected it, and handed the form to the young man. She didn't plan to talk to him anymore.

However, the young man obviously didn't know that the female employee was thinking so much. He left after taking the order.

his cousin had asked him to buy it, saying that as long as he mailed it out, he would get 2 million pounds in return, and they would split it in half.

He still trusted this cousin of his, so he did it immediately.

.....

Linlin Manor.

Qin Lin was back in his office, looking at the game in his mind. After completing his daily tasks, he went to ore town again to trigger the plot task.

This time, he really triggered a plot quest as soon as he entered the park.

A large number of NPCs had gathered in the mine Town Park. When they got close to these NPCs, a conversation would appear above their heads.

"Is the legendary goddess ceremony about to start again?"

"It's been a long time since we've held the goddess ceremony!"

it's said that there's a statue of the goddess beside the hot spring of Mount goddesses. It's the place where the goddess worshipped the goddess a long time ago!

"There should be many young people who don't know about the goddess priest."

Qin Lin was surprised when he saw the information.

Everyone knew that 'the story of the farm' was a farming game with a fantasy theme.

In the game, the dwarves, goddesses, and Kappa NPCs were fantasy-like NPCs.

This goddess was just like that.

In the game, there was even a hidden plot where players could conquer goddesses and marry them.

The most important thing was that players could also get some special gifts from the goddess.

Qin Lin didn't expect the goddess plot to be released.

He hurriedly walked in front of the notice and clicked on it. A message notification appeared on the notice:

[the goddess ceremony has already begun. Go to the goddess mountain and find a Goddess Flower. Throw the goddess Flower into the goddess spring, and you may receive a gift from the goddess. When you throw in enough goddess flowers, the goddess might even appear!]

[do you wish to head to Mount goddesses to search for the goddess Flower?]

Seeing this prompt, Qin Lin knew that the goddess plot was a little different from the old games, but the essence of the difference was not big. They both had to throw flowers to get gifts.

Qin Lin directly selected "yes," and then another prompt appeared:

[let's head to the goddess mountain. the goddess flower has already appeared there!]

Qin Lin immediately controlled his game character to go to the goddess mountain. It didn't take long for him to find a very special five-colored flower at the top of the mountain.

The Penta-colored flower looked very different. He had never seen it on Mount goddesses before, nor had it been refreshed. He controlled his character to pick it, and as expected, a notification appeared.

[you've picked a five-colored Goddess Flower. The more colors the flower has, the more you'll be favored by the goddess. You can now go to the Jiang Goddess Flower and throw it into the goddess spring to offer it to the goddess. In the future, goddess flowers will randomly spawn on Mount goddesses!]

After receiving the notification, Qin Lin decisively took the Penta-colored Goddess Flower to the hot spring on Mount goddesses.

The hot spring of Mount goddesses was located next to the spring Mine. There was a separate building where the hot spring was located, and there was a spring beside it, which was the goddess spring.

There was a goddess statue on the goddess 'spring, but when he had come here before, he had not seen the statue. It was probably because the goddess plot had not been released yet.

this time, when qin lin controlled his game character to go to the goddess 'spring again, he found that the statue of the goddess had already appeared on the goddess' spring. He decisively took control of his character, took out the Penta-coloured Goddess Flower from his bag, and threw it into the goddess spring.

A moment later, the statue of the goddess glowed with a special light. As the light disappeared, an incorporeal prompt sounded.

[thank you for your gift. I really like these flowers. I'll give you a gift!]

Then, a treasure chest floated out of the goddess spring and landed in the game character's hand.

[congratulations on receiving the goddess 'treasure chest. After opening it, you will receive a random gift from the goddess!]

Qin Lin controlled his game character to open the treasure chest. After a while, another prompt appeared.

[congratulations, you have opened the goddess 'treasure chest and obtained a Moonstone!]

" this thing ... " qin lin's eyes lit up when he saw the notification. this thing was definitely a fantasy-like thing in the game.

In the old version, this thing had the attribute of allowing the game character to understand skills and so on.

Of course, these skills were referring to cooking skills and seed cultivation skills. He just didn't know if the new version had the same effect.

qin lin immediately controlled his game character to return to the farm and took out the moonstone.

The moonstone was actually quite large, almost reaching the waist of the game character.

he immediately locked the office door and entered the game.

Then, he saw the remarks of the moonstone:

pAnD a(-)n0ve1.com [Moonstone: holy God!]

[this is a gift from the goddess of Mount goddesses. It has a special effect in an environment with moonlight: When you are at the top of the industry, under the light of the moonstone, special comprehension +3, comprehension breakthrough +3!]

[restrictions:

[1. You need to choose a place with water flow. The effect will take effect after the selection. It will be ineffective in other places.]

[2: the water needs to contain the goddess spring's components. It will be ineffective when the components are used up!]

f * ck! F * ck! F * ck! Qin Lin couldn't help but curse when he saw the remarks on the moonstone.

This thing was different from the game, or rather, it had better attributes than the original game.

It was just like the 'my Dao stone' in some fantasy novels.

Didn't old brother Li Kai's low-temperature genetic experiment get stuck? would this Moonstone be of any help to him?

It was just that there were a lot of restrictions. First, it would only be effective when the top people in the industry needed to break through.

moreover, the other two effects seemed to be bound to him, which meant that he could only use them here and not anywhere else.

Even if he took the moonstone away, he still needed the ingredients of the goddess 'spring water.

That was something that only existed in the game.

[Chapter 816 Magical Effect \(1\)](#)

Qin Lin saw the attributes of the hot spring powder and knew that it was definitely a good thing.

Most importantly, this item was bound to him. Once he had chosen a place, it would be useless in other places. Even if he had chosen a place, it would still be useless without the water of the goddess 'spring.

Now, Qin Lin wanted to put the moonstone in the manor.

The moonstone wasn't small. In the animation, it reached the character's waist.

In reality, it still reached his waist, which was at least 300 pounds.

In addition, because the ingredients of the goddess 'spring water had to be included, a pond had to be built. The moonstone had to be placed in the pond, and then the spring water had to be poured in.

Thinking of this, Qin Lin logged out of the game, then took out his phone and called you Cheng Yijian and sun Ming.

"boss qin, it's an honor to receive your call. what can i do for you?" Sun Ming's enthusiastic voice came from the phone.

To him, it was an honor to be able to receive a call from Qin Lin.

Unknowingly, boss Qin had become an existence that everyone in you city looked up to.

Qin Lin also stated his purpose directly. director sun, my Manor needs some renovations. Can I trouble you to send some people over? "

When sun Ming heard this, he immediately promised, " "Boss Qin, don't worry. I'll bring some people over."

It didn't take long for Sun Ming to personally lead a group of people to Linlin Manor. He found Qin Lin immediately and asked, " "boss qin, i'll personally listen to your instructions on where you want to renovate."

At this time, Sun Ming didn't look like the boss of you city Yijian at all. Instead, he looked like an errand boy.

It was possible that other people didn't have the chance to run errands for boss Qin. After all, he had been paying attention to the hot spring elixirs recently, and it was needless to say how popular this product was.

He had calculated that 50 million bald men would provide 30 million in sales.

460 million people with hair loss, even if they only bought 10 packets a month for treatment, it would still be 230 billion.

These people would definitely buy more to maintain their health after using it up.

In addition, people who didn't have hair problems would definitely buy it as a precaution. In addition, there were drinks, tomato sauce, Linlin villa, and Linlin laboratory from Linlin food company.

With boss Qin's wealth, he believed that he would soon become the richest man in the world, and the richest man in an industry that was not listed.

Was it embarrassing to run errands for the richest man?

No, this was something to be proud of, and he could even brag about it to others.

Qin Lin also brought Sun Ming to the location of the manor Park and said, "director sun, I'm planning to transform this Park into an artificial spring water. I also want to place a strange landscape stone in it.

Qin Lin described it briefly, and sun Ming roughly knew how to do it. Then, he led his people to start working.

Academician li, academician zou, and academician Lin walked over and saw Sun Ming and the others working on the project. They couldn't help but stop in confusion.

"Boss Qin, do you still want to renovate the park?" Academician li asked. In his eyes, the flowers and trees in the park were perfect.

Qin Lin smiled. I got a strange stone. It glows under the moonlight. It's similar to a Night Pearl.

Academician li smiled and said, "it's not necessarily the same as the night-luminescent Pearl. Many volcanic rocks also glow at night. There are also Bolonia stones and quartz Pixiu that glow at night. It's just that the brightness is different.

These words made Qin ran feel that she was ignorant.

He was still thinking about how to solve the problem of the moonstone glowing when it absorbed moonlight. Who knew that there would be so many glowing stones at night? in the eyes of scientists like academician li, this was a very normal thing.

He didn't need to think too much about this.

Sun Ming's speed of renovation was also very fast. In less than a week, the park had been renovated.

There was an artificial spring in the resting area of the park. The water flow inside was connected to the water circulation system of the manor, but it had been modified.

After Qin Lin saw the transformation effect, he was very satisfied. After handing over the work to Sun Ming, he drove the truck to the warehouse. Then, with a thought, he took the moonstone out and put it in the truck.

After that, he started driving again and brought the moonstone back to the manor.

He could move 300 pounds of Moonstone with the vitality of two fruits of the tree of strength, but he still didn't show off. He found Yu Shui and moved the moonstone into the artificial spring.

When the moonstone was placed into the artificial water spring, a notification appeared in the game.

[do you wish to select the moonstone location? you can not change it after you have selected it!]

Qin Lin was surprised.

this was the first time he had encountered such a situation, but he still chose to confirm it. the moonstone was meant to be placed in this area.

[Moonstone placement area selected. Can not be changed. Moonstone attribute effects can not be triggered in other areas! [the current Moonstone lacks the condition to trigger the attribute effect!]

After Qin Lin made his choice, the system prompt sounded again.

He didn't hesitate and directly controlled his game character to carry the empty buckets, then went to the goddess's spring, filled the empty buckets with the spring water, and brought them to the farm.

After repeating this a few times, the open space on the farm had already been filled with more than a dozen buckets of goddess's spring water.

This time, Qin Lin didn't have to go through any trouble. He went straight into the inner area of the manor, entered the game, and took out the water from the goddess 'spring. He then carried it to the man-made spring and poured the water into it.

[Moonstone attribute trigger condition completed. When the moonlight shines on it, it will emit light. Under the light, the moonstone's attribute will be triggered!]

Qin Lin poured the water from the goddess 'spring into the man-made spring, and the system notification appeared again.

In other words, the moonstone would be effective at night.

Now, he just had to wait for the moonlight to come out at night, and he could test the effect of the moonstone. He had even thought of the target for the test, which was old brother li.

When the time came, he would invite old brother li over and deliberately lead him to think about the low-temperature genetic experiment. Perhaps he could gain something from it.

If this was really possible, then in the future, if any academicians in charge of major scientific research came to Linlin Manor to recuperate, they might be able to sit here at night and have some enlightenment. Wouldn't that be a contribution to national scientific research?

The more he thought about it, the more Qin Lin looked forward to it.

However, as night approached, he became a little depressed.

Because of the dark clouds in the sky, he couldn't see the moon.

Wasn't this a waste of expectations?

If there were dark clouds every day, there would be no moonlight for a long time.

However, at night, he was surprised to find that there was a frost-like white light spreading in the garden. It enveloped the surrounding area and covered the plants with a layer of frost.

This was a very strange phenomenon.

The moonstone actually worked. The moon didn't appear.

Qin Lin felt that it was a little strange, so he immediately went online to check. Unexpectedly, he gained some new knowledge, which was that the moon actually came out every day, and as long as the sun was not extinguished, the moon would actually have moonlight every day.

However, most of the time, the moon was covered by dark clouds. The dark clouds could block people's vision. Although they couldn't see the moon, they couldn't completely block the moonlight. There would always be some light shining in.

the internet even said that sometimes, there would be moonlight in the afternoon, but at that time, it was mixed with the sun, so the moonlight could not be seen at all.

However, the moonlight did indeed exist.

His knowledge had increased again.

In other words, although he couldn't see the moonlight, it did exist, so it didn't affect the moonstone. Moreover, the moonstone didn't require much moonlight. It was obvious that it only needed moonlight.

Qin Lin hurriedly walked to the man-made spring, and the soft light emitted by the moonstone immediately enveloped his body.

Under that light, it actually gave people a very comfortable feeling.

However, Qin Lin stayed in the light of the moonstone for a long time and did not trigger the special enlightenment and breakthrough skills. He even tried to think about cooking skills and various recipes in his mind, but it still did not work.

It was reasonable to say that with those cooking skills, he should be one of the best in the industry. Now that he could not trigger the attribute effect, it should be related to the fact that the skills were produced by the system.

Therefore, he could only walk out of the park and call old brother li, asking him to come over and let him try it out.

The light emitted by the moonstone was quickly noticed by the other people in the manor.

The first was the service staff. They were very surprised by the light emitted by the moonstone.

After all, they were all ordinary people with limited knowledge.

academician li, academician hao, and academician lin couldn't help but walk into the park.

They knew that boss Qin was going to get a luminous stone, but they didn't expect the luminous stone to be so bright.

Moreover, it had covered more than half of the park.

The scene of frost covering the surroundings was really beautiful.

Old man Wu Kai also saw the scene of the moonstone. The scene of the moonstone's light covering the whole area made his eyes light up.

he was a painter, so he naturally saw different artistic conceptions.

During this period of time, he had drawn a lot of paintings in Linlin Manor and had found a lot of inspiration.

Now that he saw the frosty scene in front of him that he had never seen before, he was really eager to try and draw this scene.

Therefore, he decisively took the drawing board and headed in the direction of the manor Park. He entered the location of the man-made spring and placed the drawing board.

But just as he was about to start painting, an inconceivable flash of inspiration appeared in his mind. He seemed to have gained some insight into his own painting skills.

The problem of drawing skills and art that had been troubling him for a long time seemed to have suddenly been inspired.

This made him feel incredulous.

It had been a long time since his drawing skills showed any signs of a breakthrough. He didn't expect that the moment he entered this place and wanted to draw the scenery here, he would actually have an epiphany and was about to break through.

He immediately took out his drawing board and set it up. He looked at the surrounding scenery and actually started drawing.

[Chapter 817 At This Moment In History, I Inexplicably Gained Enlightenment](#)

When Li Kai received Qin Lin's call, he was a little confused. "Brother Qin, what's the matter? Why are you calling so late at night?"

"Brother Li, come to the manor, I'll buy you a drink!" Qin Lin found an excuse.

Obviously, these words were very useful. Li Kai was immediately tempted and said that he would come over immediately before hanging up the phone.

Qin Lin wasn't stingy either. He went to the wine cellar and took out a bottle of Linlin medicinal wine and a wine glass, then returned to the garden of the manor.

A moment later, Li Kai arrived. When he saw the Linlin medicinal wine in Qin Lin's hands, his eyes lit up. "Old Brother Qin, you're really interesting!"

He felt that old Brother Qin was deliberately finding an excuse to give him the wine. Later on, he would be able to take the wine away without making a sound.

Old Brother Li, let's go to the garden and have a seat. I've made a strange luminous stone. We can enjoy it while drinking. Qin Lin said as he led Li Kai into the park and sat down at a stone table.

"Old Brother Qin, is this the luminous stone you were talking about? The range of the light is amazing." When Li Kai saw the moonstone in the man-made spring, he couldn't help but be surprised.

This gentle light covered the surroundings, covering the flowers and trees with a layer of dreamy colors.

After Qin Lin sat down, he saw Wu Kai, who was painting. The old man seemed to be immersed in his painting and did not notice their arrival at all.

"old brother qin, quickly let me have a taste of this wine." Li Kai hurriedly urged Qin Lin after sitting down.

Qin Lin passed the Linlin medicinal wine to Li Kai and placed the cup on the table.

Li Kai took the bottle and poured a cup for himself and Qin Lin.

"How's your low-temperature genetic experiment going, old brother li?" asked Qin Lin. I heard that you've been working on this project again."

there are still some difficulties that are difficult to overcome, " Li Kai said casually. even with the Linlin watermelon as a reference, there's always something missing.

"Brother li, what's the problem that's hard to break through?" Qin Lin asked again.

Li Kai subconsciously thought of the difficulties he had encountered in his experiment and the problems that were difficult to break through.

As he was thinking, he suddenly froze.

At that instant, a flash of inspiration appeared in his mind. All of a sudden, he had an epiphany. The elemental types and gene combinations that he couldn't understand before now had an idea and gushed out from his mind.

Li Kai suddenly stood up, then hurriedly took out his phone and called his experimental assistant. "Hurry up and send the experimental computer to the Linlin Manor."

As soon as he finished speaking, he hurriedly picked up a small stone and placed it on the soil of the open space where the flowers and trees were. He began to use the small stone to draw out formulas and some genetic element arrangement.

Inspiration surged in his mind and he suddenly realized it. He was afraid that he would forget it when he ran back to the laboratory, so he chose to write it down in this way.

It just so happened that he triggered the moonstone's special comprehension +3 and comprehension breakthrough +3 attributes, so his inspiration also suddenly exploded.

Qin Lin saw this scene and a smile appeared on his face.

In other words, his speculation was correct. If old brother li could trigger the attribute effect like this, other academicians would definitely be able to do the same in the future.

Then the attributes of the moonstone would be awesome.

however, the problem was how to properly display the moonstone's attributes.

Academician li, academician Lin, and academician Hao walked over and noticed the situation.

The three of them were currently in a state of leisure and were not leading any research, so they did not trigger the moonstone's attributes. However, when they got closer, they were surprised to see Li Kai drawing on the ground.

"Boss Qin, what is professor Li Kai doing?" even though academician li guessed something, he still asked in a low voice.

I don't know either, " Qin Lin said. brother li was chatting when he suddenly became surprised. It seemed like he had some ideas in the experiment.

the three of them nodded in unison. they understood that professor li kai must have had a sudden inspiration. if they recorded it down like this, they might forget it in the future.

sometimes, sudden inspiration was very important to the laboratory.

Many experiments were difficult to make breakthroughs, which troubled everyone. Then, someone suddenly had an inspiration that brought new ideas and new paths, and the experiment was finally completed.

The strategic weapon that their country first developed once had a problem that troubled everyone. It was the chief engineer who had a sudden inspiration and found a new research direction.

At that time, the chief engineer also used chalk to write down formulas and ideas on the wall. According to him, if he didn't do this at that time, he might have forgotten some things, and the experiment might not have been successful so quickly.

Now that professor Li Kai had a sudden inspiration, according to his ability, there might be a major research result coming out.

Academician li even took out his phone and turned on the recording function. He had to record the scene in front of him.

This might become a legend in the history of Chinese scientific research.

Academician Lin and academician zou were doing the same thing. If professor Li Kai's research results were significant enough from this inspiration, this scene might be written in textbooks in the future.

[Chapter 818 375!! Historical Moment!](#)

The textbook would be about professor Li Kai's praise, and there would be a few photos next to it. The three academicians, Lin, Li, and zou, were filming.

After academician li took a video, he sent it to the Chinese Academy of Sciences Software Group.

There were only academicians from the Chinese Academy of Sciences and department head Lu in the group.

When the academicians at the Chinese Academy of Sciences saw academician Li's message, they were all surprised.

They all recognized professor Li Kai.

Although professor li didn't enter the Chinese Academy of Sciences, he was one of the best in the field of Crop Research. No one could compare to him. Even professor Li Kai, who was devoted to research, had never appeared at any scientific research Exchange meetings.

it seems that professor li kai is going to come up with another major project. " when minister lu saw the video, he subconsciously sent a message.

He had never doubted professor Li Kai's ability.

...

Not long after.

Li Kai's experiment assistant brought people to carry an experimental computer into Linlin Manor.

This type of experimental computer was very large. It was not the size of a regular desktop or laptop.

Moreover, due to the experiment's requirements, it could be used for more than two days even without electricity.

When Li Kai saw the computer, he hurriedly took it and opened a special experiment deduction software. He began to type on the keyboard and fill in the form.

The software's functions were somewhat similar to the Marvel's Iron Man's software that relied on Jarvis's special program to deduce. The only difference was that Iron Man's software was three-dimensional and had virtual functions.

Li Kai's software was developed by the Chinese Academy of Sciences. It only had jumping data, and its functions were extremely LOW compared to Iron Man's.

But even so, this software was now a major help for scientific research budget deduction.

that's it, hum, that's it. In a low-temperature state, the freezing and transformation of genes are like this. Hum, why didn't I think of this before? " Li Kai's face was filled with excitement as he mumbled to himself. In the world of knowledge, once that layer of barrier was broken, he would suddenly see the light.

Li Kai was in such a situation.

A moment later, Li Kai hurriedly said to his experimental assistant, " quick, bring the computer back. I want to start the experiment immediately!

When the assistant heard the order, he immediately brought people to carry the experimental computers back.

Li Kai followed behind. He was about to enter the experiment immediately. He believed that his low-temperature genetic experiment would definitely produce results.

After taking a few steps, Li Kai seemed to have thought of something. He hurriedly stopped and turned around. He took the Linlin medicinal wine from the stone table and walked out of the manor.

No matter what, this wine must not be forgotten.

As Li Kai walked past, academician li, academician Lin, and academician Hao squatted down and started taking photos of Li Kai's data and company. Perhaps these were also worth remembering.

After that, Qin Lin, academician Li, and the other two noticed Wu Kai. This old man was still drawing seriously, as if he was a natural.

He really had the air of a Grandmaster.

Qin Lin and the other three were a little curious. They walked behind old master Wu and watched him paint. Old master Wu still didn't notice them at this time, completely immersed in the painting.

Qin Lin and the other three looked at old man Wu's painting, and their eyes immediately showed surprise. Although it was dark, they could clearly see the content of the painting with the help of the park lights.

The painting was of the night view of the park. However, in the old man's painting, the night view of the park was full of artistic conception.

More importantly, they saw Li Kai drawing on the ground, Qin Lin looking at Li Kai with a glass of wine in his hand, and academician Li and the other two people taking photos of Li Kai with their phones.

The painting seemed to come alive, and even academician Li and the other two were shocked.

The three academicians had seen a lot, but they had never seen someone draw to this level. It was really amazing. No wonder he was the number one artist.

It was no wonder that his painting could be sold for such a price.

However, the three academicians obviously didn't know that Wu Kai had made a breakthrough in his drawing skills. He had already surpassed his original level. Otherwise, even his original drawing skills wouldn't have been able to reach this level.

In the past, the old man and Leng Jun's painting skills had been on par with each other. Now, Leng Jun had been surpassed by the old man.

If this painting were to be auctioned, it would probably be sold for a shocking price in the painting world. It was definitely not something that any of the old master's previous paintings could compare to.

Of course, more importantly, this painting was recording a historical moment of a major scientific research achievement.

Qin Lin could even imagine how sensational this painting would be in the future, because he knew how awesome old brother Li's low-temperature genetic experiment was. It could completely change the temperature requirements for the growth of crops.

In the future, when planting out-of-season crops, they would no longer need to rely on the greenhouse. They could directly rely on old brother Li's technology.

Moreover, in the future, the nation would be able to use this technology to regulate all sorts of crops, which would allow them to control the planting of crops on a grand scale. This would be of great significance.

Now that Wu Kai had drawn this scene, and the old man was the best artist in the country, the meaning was very different.

Moreover, the artistic sense and artistic conception displayed by the old man's painting were clearly not ordinary paintings.

The old man's state just now seemed to have been affected by the moonstone.

Then, when Li Kai's research was released and Wu Kai's painting was also interviewed, one could only imagine the sensation.

Most importantly, all of this had happened in the Linlin Manor. It would change his Linlin Manor and give it a special color.

In the future, when it came to this painting and research, Linlin Manor would always be mentioned.

After a while, the old man finally drew his name on the painting, his face filled with uncontrollable excitement.

For a full two years, his painting skills and painting skills had been unable to break through. In fact, his condition had been somewhat terrible for the past two years. Who would have thought that he would have such a sudden realization tonight, which actually raised his painting skills and painting skills to a new level.

This feeling was very strange to the old man, as if there was some kind of power that was helping him.

"Boss Qin, academician Li, you guys are here too." Old man Wu Kai asked in surprise when he noticed Qin Lin and the others.

Qin Lin smiled. old master Wu, you were too serious when you painted just now. Besides, your painting is really amazing. You've brought the scenery and people in the painting to life.

Wu Kai laughed. boss Qin, I've had a breakthrough in my painting skills at your Linlin Manor. I'll give you this painting.

He had a feeling that his breakthrough today was related to the Linlin Manor.

This painting was the first one he had made after his breakthrough. He felt that it should be left in Linlin Manor.

[Chapter 819 3 Paintings For 1 Billion! 1](#)

qin lin didn't expect that old man wu kai would give this painting to him. this painting would definitely be worth hundreds of millions if it was sold.

"Old man, this painting is too valuable." qin lin said.

Wu Kai shook his head. I've already found something more important than this painting in Linlin Manor. The breakthrough in my painting and drawing skills is the most important thing to me. Boss Qin, please accept it!

"Alright, then I'll take it as small." "Old master, you've made a breakthrough in your drawing skills. I'll make an Emperor's medicinal cuisine for you to celebrate tomorrow!" Qin Lin said with a smile.

Academician Li, who was next to him, said, "Boss Qin, there's a saying that goes, 'whoever sees it gets a share.'"

"That's right, you can't forget us three old guys." Academician Hao also echoed.

Academician Lin also nodded.

The three academicians weren't gluttons, but boss Qin's food was simply too delicious, especially the emperor's herbal cuisine.

Although Wu Kai didn't know what the emperor's herbal dish was, he could guess something from the attitude of the three academicians.

The three academicians were old, what haven't they seen and eaten? A dish that could make the three academicians like this must be extraordinary.

"Three old men, aren't you joking?" Qin Lin laughed. I'm already cooking, how can I miss you guys?"

This made the three academicians laugh.

"It's all thanks to Mr. Wu this time."

yes, it's not Mr. Wu's painting. It's hard to get boss Qin to cook the emperor's medicinal cuisine.

"that's right, it's rare!"

The three academicians were all smiling.

boss Qin, remember to frame this painting and protect it well. If you don't know anyone in this field, I can recommend one to you. He's very skilled, "Wu Kai said to Qin Lin.

The painting had already been given away, but he still hoped that it could be preserved better.

"Sure, old man, please recommend one!" Qin Lin nodded with a smile. In fact, he was also thinking about this problem, but he really didn't know where to find an old master in this field.

old master Wu Kai's painting was so valuable that he couldn't just find someone to frame it.

He had already set up an exhibition stand in the manor. It was made of tempered glass, so the people outside could clearly see the paintings inside. When the time came, he would display the old man's painting.

There were already paintings by Van Gogh and Picasso inside. The value of the old man's painting would definitely not be cheaper than those two antique paintings.

Old man Wu Kai was also a decisive person, so he immediately helped Qin Lin contact the relevant mounting expert.

The next day.

Qin Lin got up and sent the things in the game to the villa. Then, he returned to the kitchen and began to prepare. He was ready to make a quality 3 Emperor's medicinal cuisine.

With the +3 Emperor's herbal dish and the special herbal fragrance attribute, the moment the herbal dish was ready, the kitchen was filled with a pleasant herbal fragrance.

The kitchen staff was used to this. After all, it was their boss who was cooking.

Only the boss knew how to cook this kind of medicinal cuisine.

their head chef, master lin, and a few other chefs had yet to learn how to cook ordinary medicinal cuisines.

After Qin Lin finished preparing the emperor's medicinal cuisine of quality 3, he ordered his servants to bring it out. At the same time, he also asked Master Lin to make some side dishes. The Xiangshui tribute rice of quality 2 was almost ready.

In the restaurant.

Wu Kai and the three academicians were already sitting together and chatting. The relationship between the four of them was obviously a lot closer.

old Wu, the herbal dish is here. You'll know how delicious it is after you try it. Academician li smiled.

Academician Hao also nodded and said, " that's right. Old Wu, if you're the number one artist, boss Qin is definitely the number one chef. This medicinal cuisine is boss Qin's specialty. Even those national banquet chefs who used better ingredients than boss Qin could not make the emperor's medicinal cuisine with 40% of the effect.

Wu Kai knew that Mr. Qin's cooking was very good. He had tried his cooking on the first day.

At that time, he felt that he had never eaten such good food in his life, but he really did not expect that it was not the best performance of boss Qin's cooking.

The key was that even a national banquet Chef with better ingredients couldn't make a four-point effect. That would be really amazing.

Obviously, they didn't know that the materials used by Qin Lin were the best. They were all produced by the game and couldn't be found in the outside world.

Qin Lin had someone place the emperor's medicinal cuisine on the table and smiled. "Four old men, have a taste."

Academician li and the other two were already familiar with Qin Lin, so they didn't need to be polite with him. With the delicious taste of the emperor's medicinal cuisine, they started eating.

Old man Wu Kai also filled a bowl with the emperor's medicinal cuisine and tasted it.

He finally understood why the three academicians were so fond of the emperor's herbal dish.

It wasn't just a matter of taste and texture. After eating the medicinal cuisine, he felt a warm feeling all over his body, especially at his waist. It was as if the weakness of his old body had disappeared for a while.

This medicinal cuisine seemed to be able to let people feel the effects just by eating it.

He was really too powerful.

Naturally, he did not know that the true effect of this 3 grade Emperor's medicinal cuisine was to extend one's lifespan by +3.

Wu Kai's connections and reputation in the painting industry were very big. The mounting master he invited arrived very quickly. He was also an old man and a master of mounting famous paintings. His name was Wu Han.

Wu Han had been in the painting mounting industry for decades, so he was very familiar with it. Moreover, he could almost be said to be the master Wu Kai's personal mounting master.

[Chapter 820 3 Paintings For 1 Billion! 2](#)

This was because both of them had the same surname, Wu, and were from the same place.

This time, he had rushed over directly from the capital, where he had his own famous art Company.

After Wu Han left the train station with a toolbox, he lined up and got on a car.

"Old Sir, where are you going?" The driver turned his head and asked with a smile. His attitude was very good, which gave the tourists a good impression.

You city's taxi driver and online taxi driver had become the most popular industry in you city, and now, they must be trained and registered by you city's government before they could take up the post.

There was even a complaint system in the county. Once a tourist complained about a driver once a month, the driver would have to go to the county to learn how to treat tourists, how to serve tourists correctly, and how to create a tourist city that tourists would forget to return to.

It could be said that learning was more troublesome than deducting points from a driver's license.

Moreover, once a complaint was filed twice in the same month, not only would they have to study, but they would also have to stop their service for a week. They would have to serve the tourists for free at the train station or on the streets.

If you were to receive a complaint three times a month, then sorry, your information and qualifications would be revoked. Otherwise, you would only leave a bad impression on more and more tourists.

If the taxi drivers from other cities were to face this, they would have long protested. At most, they would not do it.

However, by relying on the tourists of Linlin villa, each driver could earn 20000 to 30000 Yuan a month, and the more diligent ones could even earn more.

Who would be willing to give up?

you city had even spread the news that as long as linlin manor didn't fall, taxi drivers and online taxi drivers who registered their information in the county would get an iron rice bowl that people envied.

"Sir, let's go to Linlin Manor," Wu Min said after hearing the driver's words.

The driver was surprised to hear this.

There was no one in you city who didn't know Linlin Manor.

However, Linlin Manor wasn't open to the public, so the people of you city could only watch from afar. Moreover, everyone knew that those who could enter Linlin Manor were definitely not simple people. Ordinary people were not qualified to go.

Now that the old man had gone directly to Linlin Manor, he was definitely not an ordinary person.

The driver immediately became more enthusiastic and friendly. "Old Sir, please sit down!"

It was enough for them to suffer if the tourists complained, but if the guests of Linlin Manor complained, they would definitely be in for a barf.

The car left the train station and entered you city. Wu Han felt the refreshing air the first moment he entered.

You city's air was indeed as good as what the internet said.

The purification grass was really amazing.

Many streets in the capital had recently been renovated and planted with the purification grass provided by Linlin's laboratory.

This made him look forward to it.

When the purification grass from Linlin's laboratory improved the quality of control in Beijing, the 25 million people living in Beijing would have to thank Linlin's laboratory and professor Li Kai.

When they were about to reach Linlin Manor, Wu Bing called Wu Kai. When the taxi arrived at Linlin Manor, old master Wu Kai was already waiting at the entrance.

After the security guard registered, Wu Kai welcomed Wu Han in.

After entering the manor, Wu tuan said with an envious look, "Master Wu Kai, no wonder you've been to the Linlin Manor for such a short time and managed to draw a painting."

"The air here, the environment here is really like a Fairyland. Anything done here would be twice the result with half the effort, right? It's just a pity that I couldn't get through even after applying twice."

Wu Kai couldn't do anything about this. He knew the rules of Linlin Manor. The class and threshold of this place were there, and there were academicians. There was no way to rely on connections to persuade anyone to live here.

Otherwise, it would be completely against the rules if everyone started talking.

Breaking the rules was very impolite. As long as one understood the ways of the world, they would not do such an impolite thing.

"Wu Han, don't be too surprised when you see boss Qin later!" Wu Kai reminded as he walked in with Wu Ju.

"Master Wu Kai," Wu Ju laughed, "although the owner of Linlin Manor is very mysterious and has a high status, I'm already so old. There's no need to be surprised to see someone, right?"

Wu Kai quickly brought Wu Han to Qin Lin. "boss qin, this wu han is a famous painting mounting master! Wu Min, this is boss Qin of the Linlin Manor."

Wu Bin was stunned when he saw Qin Lin. His face was filled with surprise. Perhaps he understood what Wu Kai meant. How could he be so young?

"Master Wu, I'll have to trouble you this time." Qin Lin also smiled and shook hands with Wu Han.

Only then did Wu Ju return to his senses.

After that, Qin Lin brought Wu Gan and Wu Kai to the living room to get Wu Kai's painting.

When Wu Han arrived at the hall, he was obviously attracted by a display stand. The cylinder was made of tempered glass, and two paintings were displayed inside.

"Grandmaster Wu Kai, are these the two paintings?" Wu Yin could not help but walk to the front of the exhibition stand. The two paintings by Van Gogh and Picasso had long since spread in the art world, but the outside world did not know about it.

Otherwise, if these two paintings appeared in the hands of the same person, anyone who had a little understanding of paintings would be surprised.

Qin Lin took out Wu Kai's Manor painting and handed it to Wu Han.

Wu Han had already put on his gloves. Compared to Qin Lin's casual attitude, he was obviously much more professional. He carefully unfolded the painting. When he saw the content of the painting, he subconsciously looked at Wu Kai. "Master Wu Kai, did you have another breakthrough in your drawing skills?"

It was no wonder that he was surprised. This painting was different from Master Wu Kai's previous paintings. The art and skill contained in it seemed to give the entire painting an indescribable artistic conception, as if it had brought the things in the painting to life.

"This is the first painting after my breakthrough. I gave it to boss Qin," Wu Kai nodded.

Wu Han was speechless. He knew how valuable Master Wu Kai's paintings were. The highest they could be sold for was 300 million. Now that he had a breakthrough in his painting skills, he would definitely be able to sell for more money, especially since this was his first painting after the breakthrough.

At Wu Kai's age, his painting skills should be at their peak. After he passed away, this painting would definitely be regarded as a work of great skill, and its value would be even greater.

Moreover, with the artistic conception and the vivid feeling of the painting, he was not sure if Master Wu Kai could draw another painting of this level.

After all, painters also relied heavily on inspiration.

Old man Wu Kai actually gave this painting away just like that. Generally, if the conditions were right, the artist would keep this painting for himself.

Wu Gan was very good at framing. He put the painting away, opened the toolbox he brought, and framed the painting. He did it very carefully.

After some time, Wu Kai's painting was mounted and he handed it to Qin Lin.

Without hesitation, Qin Lin opened the display stand in the manor's Hall and put Wu Kai's painting in it. He then placed the three paintings together.

Wu Ju couldn't help but be surprised when he saw this scene. He couldn't help but step forward and take a video of the three paintings.

After all, it was almost impossible for any collector to get their hands on these three paintings at the same time. Needless to say, there were only a few of the masterpieces of Van Gogh and Picasso. Other than the owner of Linlin villa, there were no other two paintings in the collection of the same person.

Moreover, Master Wu Kai's breakthrough in his painting was not something that others could collect. These three paintings together would be a wonder, and a wonder that could not be seen anywhere.

The most important thing was the value of the painting.

the total value of these three paintings could be auctioned for more than one billion. what did one billion mean? Many of the items in small museums did not even add up to a billion.

Moreover, it was impossible for ordinary people to see three paintings of this level even if they wanted to.

Now, as long as the guests of Linlin Manor came in, they would be able to see it once they entered the hall. How grand was that? That would be as high as the sky.

Which place would dare to say that you would see something worth 1 billion in my lobby?
