

The Game 821

[Chapter 821 Linlin Manor Is The Holy Land Of Dao Enlightenment? Qin Lin Is Panicking](#)

Wu Han recorded the video and sent it to a group.

This group was also a gathering of the top people in the Chinese painting industry. As long as they were the top people in the Chinese painting industry and the surrounding industries, they could be found in this group.

Wu Han sent another message in the group: please enjoy the three paintings that are worth more than 1 billion. The third one is Master Wu Kai's latest painting.

As soon as the video and message were released, the group immediately became lively.

Van Gogh's "sunflower in the sea" and Picasso's "the woman with the Golden Drum" were not known to the outside world, but everyone in the group knew about them.

At this time, the most attention-grabbing thing was still Wu Kai's painting.

Although it was just a video, everyone could see that Master Wu Kai's painting was on a higher level than before, be it in terms of artistic conception or technique.

Master Wu Kai was undeniably the top artist in the country's contemporary art Circle, while Van Gogh and Picasso were also grandmasters who led the art circles of their respective countries for an era.

When these three paintings were put together, it was truly too shocking.

After seeing this, the people in the group couldn't help but share it on their WeChat moments. Then, more people found out about the three paintings. After that, some nosy people posted the video on the internet.

therefore, the next day, the news that the three paintings had exceeded 1 billion came out.

in a university.

Chen Xue walked into her classroom, preparing to write her own proposal and submit it to Linlin company.

As a native of you city, she naturally hoped that she could enter Linlin company during her internship in her fourth year and stay in Linlin company after graduation.

after all, linlin company's potential was no less than those big international groups, and the salary was not low. the key was that they could stay with their parents if they worked in their hometown.

Linlin company had opened up internship positions last year. As long as one was a senior student, they could apply for an internship. If they passed, they would have the opportunity to enter Linlin company.

The students from you city naturally wanted to enter Linlin company.

Moreover, Linlin company also allowed college students to collect suggestions, which meant that college students could write proposals to Linlin company, regardless of the size. If any of the suggestions were reviewed and accepted, they would be qualified for an internship.

Some students in your city had successfully obtained the internship qualification through this method.

Chen Xue wanted to use this method to get an internship opportunity. She was from your city, so she had an advantage over students from other places when it came to researching Linlin Company's information.

As soon as she entered the classroom and sat down, she heard a bespectacled male student in front of her holding a phone and saying, "everyone, take a look. The people on the internet really use everything to attract attention. Three paintings that cost more than one billion are placed in the hall. They're using people's intelligence to rub against each other."

The students next to him came over and looked at the bespectacled boy's phone. It was a trending news that someone had collected three paintings worth more than one billion Yuan.

A classmate asked, "what if this is true?" After all, there are many rich people, and the world of the rich is not something we can understand."

The bespectacled boy said confidently, "that's impossible. You guys don't even know that Van Gogh's 'Sunflower in the Sea' and Picasso's 'The Woman with the Golden Drum' are very famous. I've read about them before, and these two paintings have long sunk to the bottom of the sea."

"Besides, don't you guys see what the third picture is? It's obviously a modern drawing. Don't you think that the person in the drawing looks like the internet celebrity Little Qin from Linlin Manor, and the one on the ground looks like Professor Li Kai?"

"It's impossible for Van Gogh and Picasso's paintings to be real. With the addition of this third one, it's obvious that they're just trying to get the attention of the crowd."

It was obvious that this world did not lack confident people.

They would rely on the limited information they knew to judge things they didn't understand at all.

"What if this painting was drawn in Linlin Manor?" Suddenly, a gentle-looking boy in front of her asked, "what if the Van Gogh and Picasso paintings were from the boss of Linlin Company? Do you think the boss of Linlin Company needs to take this leave?"

His words caused a commotion among the students around him.

Who didn't know that the boss of Linlin Company was very powerful? Although no one had seen him in public, he had long been regarded as a Big Boss like Ren, Ma, Wang, Lei, and Zhong.

If these three paintings were from the boss of Linlin Company, then the other party really didn't need to make such a fake.

The bespectacled student was unconvinced, "you say it's the boss of Linlin Company, so it's the boss's? I can still say that my second uncle made these three paintings for a prank!"

The gentle-looking man said, "not only do I know that this painting is from the boss of Linlin Company, but I also know that the third painting was painted by the top artist in the country, Mr. Wu Kai, in Linlin Manor. Furthermore, the two paintings by Van Gogh and Picasso are real as well. However, the value of Master Wu Kai's paintings is not lower than those two."

"You make it sound like it's real," the man wearing glasses sneered.

The gentle and elegant boy shook his head and ignored the boy in glasses. Of course, he knew because his grandfather was in the industry. Those messages were from his grandfather's moments.

However, there was no need for him to say this. It was just a fact, and it was up to the other party to believe it or not.

At this moment, a woman beside him said, "it seems like the paintings are real. The great artists of the Transfiguration Association and other great artists have already spoken up. They even said that he LAN and Xi bangya wanted to get the two paintings back, and they even used diplomatic means.

[Chapter 822 Linlin Manor Is The Holy Land Of Dao Enlightenment? Qin Lin Is In A Panic!](#)

His words caused a commotion among the other students.

"How is that possible?" The bespectacled boy's face immediately turned ugly. He hurriedly went online to check, and sure enough, there were industry bosses online who had confirmed it. The news of he LAN and Xi banshou using diplomatic means to buy the painting had also been exposed.

The bespectacled man's expression turned uglier as he read the messages. He felt so embarrassed, as if the students around him were looking at him with ridicule.

This made him look at the gentle boy and question him, "You already knew, didn't you? You didn't even say it out loud and just watched me embarrass myself."

"? ? ?"A gentle and refined boy.

"? ? ?"Chen Xue!

"? ? ?"Student A.

"? ? ?"The students had already left.

For a moment, the air seemed to be filled with an awkward atmosphere.

...

On the internet, the news that the three paintings were worth more than 1 billion Yuan was also spreading like wildfire.

After all, the two paintings by Van Gogh and Picasso, who were rumored to have sunk into the sea, were actually real. After all, these were the National treasures of he LAN and Xi banya.

Did he LAN and the people from the Western barktooth not have any objections to such a painting being displayed in the hall?

Moreover, the third painting was painted by the top artist of the current era, Master Wu Kai.

The most important thing was that the painting was in the collection of the boss of Linlin company. Now, three paintings were displayed in the hall of Linlin Manor.

This move shocked everyone.

Although a lot of people complained about taking a transportation vehicle worth hundreds of billions to work, that was only their own complaints.

The boss of Linlin company had really placed 1 billion in the lobby.

Naturally, what was more eye-catching was the content of Master Wu Kai's painting. Let's not talk about the scenery, but the people in the painting.

First of all, he didn't need to pay attention to the internet celebrity little Qin who was holding a red wine glass.

She was just a small internet celebrity.

She held the red wine and a glass as if she was waiting on him.

But the others were different. The three old men standing on the side had already revealed on the internet that they were academicians from the Chinese Academy of Sciences.

The one on the ground was obviously professor Li Kai. He was writing something on the ground.

If this wasn't master Wu Kai's imagination, then what was professor Li Kai writing?

In the painting, his expression was so serious.

As if to answer everyone's doubts, a video suddenly appeared on the internet with the title: [when it comes to scientific research, professor Li Kai should not be affected at any time or place!]

In the video, professor Li Kai was drawing on the ground with a stone. He looked very serious. Wasn't this the content of Master Wu Kai's drawing?

Could it be that professor Li Kai was researching something again and Master Wu Kai just happened to draw it?

The scene before and after could easily make people think of this.

This was naturally from the Chinese Academy of Sciences.

Since professor Li Kai's popularity had risen, and it was a research-related positive matter, no one would mind adding flowers to the well.

if professor Li Kai really did some major research that night, then the number one artist and professor Li Kai would be a perfect story.

Therefore, while everyone was paying attention to this incident, Linlin laboratory suddenly published a paper, which was marked as an experimental paper.

It was a paper on the low-temperature genetic experiment that Li Kai had written countless times.

This time, he was inspired and had a new breakthrough in everything. He wrote the follow-up paper and published it.

This thesis attracted a lot of attention, especially when professor Li Kai's name was mentioned in the thesis. It was reposted on well-known Chinese forums.

Moreover, when they saw the content of the paper, everyone was very surprised.

discussing the possibility of crops growing in low temperature genetic conditions, and when the crops 'genes adapt to low temperature growth, the crops will not be restricted by seasons!

The content of the thesis was shocking.

Everyone knew that crops had different growing seasons. Spring crops could not grow in autumn or winter, and winter crops could not grow in summer.

until now, humans had only created greenhouse planting technology. no one had thought of directly changing crops.

Does professor Li Kai's paper mean that his research can change the survival of crops? With this technology, strawberries in summer could be planted in winter without a greenhouse?

Even watermelons?

Suddenly, many people thought of the Linlin watermelons. It seemed that the Linlin watermelons were also grown and sold normally last winter.

Could it be that professor Li Kai's low-temperature genetic experiment had already produced some results at that time? That was why he created the Linlin watermelon.

But this time, professor Li Kai's research had made a complete breakthrough. Was the low temperature genetic technology that could control the growth of crops going to be exposed to the world?

The news of Li Kai's cryogenic gene research quickly spread all over the internet. Professor Li Kai was indeed worthy of his reputation!

Naturally, there were a lot of people on the internet who were very creative.

Suddenly, a video appeared, "what kind of magical place is Linlin Manor?"

A very steady voice sounded in the video, "

I received news that Master Wu Kai's drawing skills have reached a new level. At the same time, professor Li Kai also made a breakthrough in the low-temperature genetic technology.

"Isn't this amazing? Whether it's master Wu Kai or professor Li Kai, they're both at the top of the industry. Master Wu Kai is the top painter in the country, and professor Li Kai is the leader of Crop Research in the country."

the two of them had an epiphany and a breakthrough in their own profession at the same time. Furthermore, they were in the same place, in Linlin Manor!

"It's as if this Linlin Manor is a place of enlightenment in the novels!"

As soon as the video was released, it became a hot search. Furthermore, it was the kind that was very popular.

That's right, no one had made the connection at the beginning.

Now, he felt that the Linlin Manor was very impressive. When professor Li Kai was in the Linlin Manor, Master Wu Kai was also in the Linlin Manor, and he recorded professor Li Kai's thoughts with his superb painting skills.

Wasn't Linlin Manor very impressive?

in the linlin manor, qin lin was also paying attention to the news on the internet in his office. when he saw this hot news, he quivered.

How could someone think of this? if they continued to think, wouldn't they think of the moonstone?

Damn it, he was in danger!

He left the office almost subconsciously, planning to take a look at the moonstone and consider whether he should take it away.

Who knew that he would run into academician li and the other two in the lobby?

Academician li immediately greeted him. boss Qin, your Manor is famous again because of old Wu and professor Li Kai. It's been treated as a place for enlightenment.

Qin Lin felt bitter when he heard this. Would the moonstone be exposed so quickly?

Professor Yan said, " however, what he said makes sense. I've asked old Wu. He said that after coming to Linlin Manor, the air and environment of the manor made him feel very comfortable. In addition, he slept well and did special fish therapy. His body and mind are relaxed and his mind is clear. His entire person is relaxed. This state of mind is the best.

Academician Lin also said, " that's right. When people are in their best state, they'll get twice the result with half the effort. It's easier to do anything. For top people like old Wu and professor Li Kai, when they're in a relaxed state, they'll be able to do better in their own industries. It's just a coincidence that the two of them broke through together.

Academician li smiled and said, " yeah, it's a bit of a coincidence. However, this also shows that the Linlin Manor's environment is really good. It's good for the body and mind to relax. So, if you encounter any problems, it's easier to have ideas and make breakthroughs in this state.

Qin Lin was stunned when he heard this.

he had thought of an excuse for him, and it was very reasonable. it was obviously a materialistic excuse, but materialism was good.

In the future, he would say this to the public, and he had to tell others that this was said by academician li and academician Hao.

If you had any questions, you could ask the two academicians. No one would question them, right?

Academician Lin said,"didn't the three academicians rack their brains over the rocket depth exploration problem?" "This is the biggest competition in the current stage of rocket research among all countries, and it's also the first time we have the opportunity to surpass the Hoshino in rocket research. Since the

three of you are also stuck in that difficult situation, perhaps you can come to Linlin Manor to relax and let your mind be free of worries. There might be unexpected gains."

Academician li and academician Hao were both stunned.

Why didn't they think of this?

.....

[Chapter 823 The Request From The Chinese Academy Of Sciences!](#)

Academician li and academician Jin understood what academician Lin meant.

Just now, they were also analyzing professor Li Kai and old Wu's sudden breakthrough from the perspective of materialism.

People would occasionally have a very magical state.

he could do a lot of things in that state.

However, when you wanted to continue this state the next day, you would find that you couldn't do it. Moreover, you would find it very difficult to continue entering that state.

That state should be a state of physical and mental relaxation, a state of relaxation and emptiness.

There was an academician who once studied that a good environment with some external factors could achieve this state.

However, the environment and external factors weren't fixed, and the academician didn't do any research in this area.

Now, Linlin Manor seemed to meet this requirement.

They were sure that the environment here was absolutely unique, and they probably couldn't find such a place in the country.

In addition to the special fish therapy, the high-quality incense to help sleep, and the medicinal food to nourish the body, the body was in the best state.

This should be an external factor.

After separating from Qin Lin, they returned to the manor. Academician li and the other two gathered in a room.

Naturally, they were discussing professor Li Kai and Wu Kai.

"i think we should talk to minister lu about it." Academician Hao expressed his opinion.

but boss Qin is only opening up so many slots. Won't he be unhappy? " academician Lin frowned.

Academician li firmly said, " we have to give it a try. The rocket research that the three academicians are going to do next is too important. Academician Zhu even stayed up all night to calculate the formula and was put on an IV drip in the hospital, but the formula still hasn't been solved.

when the time comes, even if the three of us go back, we'll have to get three academicians to come. If it's really as we've guessed and the three academicians have a breakthrough, then everything will be worth it.

Academician wasn't a title, it was a form of respect.

For the talented academicians of the Chinese Academy of Sciences to call him a great academician, it showed his status, ability, and fame.

the academicians were the chief engineers of every national project.

Each of these national-level projects could have a huge impact on the country and the International world.

The most influential projects were probably the strategic weapons projects of the two big mushrooms.

therefore, academician li decisively took out his phone and called minister lu.

...

The next day.

The news about Wu Kai's painting and professor Li Kai's low-temperature genetic research became even more popular on the internet.

This was also deliberately done by mouyin.

After all, music needed popularity and needed to maintain its popularity above other platforms that were eyeing it covetously.

Whether it was painting or scientific research, these were all positive things.

moreover, it was related to professor li kai, the national idol, and the linlin manor, which was a place of great interest, so it was also very attractive.

Therefore, he would definitely give them traffic. As long as they posted related content, the system would automatically give them traffic and directly give them to this matter.

Therefore, when they woke up early in the morning, the first few videos that countless users of mouyin saw would definitely be related to Linlin Manor, professor Li Kai, the low-temperature genetic experiment, the three paintings and one billion Yuan, and so on.

I feel that with the Linlin Manor as the center of attention, with professor Li Kai and Master Wu Kai as the male leads, we can totally make a fantasy documentary film, just like the previous two movies about the ancient ginkgo tree!

The moment this video was released, it received the approval of countless people. There were even some documentary directors who had expressed their willingness to film this documentary.

At the same time, some people sighed with emotion. Linlin Manor was really a place with a lot of stories.

At the same time.

At the Chinese Academy of Sciences.

Minister Lu and another leader were also paying attention to this matter.

The leader looked at the information and news sent by Minister Lu and said in surprise, "this professor Li Kai is really amazing. He's actually doing this kind of research again. If this research is successful, it will be greatly beneficial for our country's crop storage and seasonal control.

"But the news is too amazing. A vacation therapy Manor can help professor Li Kai make a breakthrough in this kind of scientific research? This isn't a science fiction movie."

Minister Lu hurriedly explained, "leader, I don't believe it either. However, academician Li, academician Lin, and academician Jin were at Linlin Manor. The three academicians also analyzed the situation.

the three academicians said that first of all, the environment of Linlin Manor is indeed very good, and you can't find another place like it in the country. In addition, the various services and Medicinal Food in Linlin Manor can soothe one's mind and body, relax the whole body, and refresh the spirit.

anyway, the general meaning is that it can easily put people in their best state. In this state, it can indeed make people do twice the work with half the effort, and even do things that exceed their limits.

"The three academicians really said that?" The leader was shocked.

He wouldn't have cared if the netizens were talking about it, but since the three academicians were talking about it, he had to care.

If that was the case, then professor Li Kai wasn't the only one doing scientific research. There were many other academicians in the Chinese Academy of Sciences.

Minister Lu said, "leader, I think the three academicians have a point. Think about professor Li Kai. He has been able to produce such amazing research again and again. Other than his outstanding ability, does it not have anything to do with his work at Linlin villa? "

[Chapter 824 The Request From The Chinese Academy Of Sciences!](#)

he has a very good relationship with the owner of Linlin villa. They're so good that even their unborn children have to be engaged.

"And why is he willing to stay at Linlin Manor? Perhaps he already knew that he could maintain his best research state there."

His words seemed to have told the leader something, and the leader stood up in surprise.

Indeed, professor Li Kai was an example. Professor Li Kai's research had always been very fast. Even problems that the Chinese Academy of Sciences couldn't solve were easily solved by him.

Other than professor Li Kai's talent and ability, was there no other reason?

with the words of academician Li and the other two, as well as professor Li Kai's case, the leader seemed to be more and more certain about this matter. once this thought appeared, it became more and more uncontrollable.

leader, " Minister Lu said, " academician Zhu's rocket research has encountered a major problem. The three academicians are not in a good state. They seem to be getting impatient!

"Arrange for them to go to Linlin Manor." the leader immediately stood up. " go and tell academician zhu and the others immediately. force them to go over. i have to go and talk to the higher-ups about this. "

if all of our speculations are true, we'll have to treat boss Qin with a new attitude. After all, he's going to be the leader of a future entrepreneur. He's also studied Traditional Chinese Medicine, provided us with body-enhancing liquid, and built a place like Linlin Manor. He's not just amazing.

The leader left in a hurry after he finished speaking.

Minister Lu also left and returned to the Chinese Academy of Sciences. He then entered a secret department of the Chinese Academy of Sciences.

As the era entered the 21st century, the sense of crisis of earth's resources became more and more intense, and the desire to explore space became more and more intense.

Almost every year, there would be news of various countries launching satellites into space for exploration.

However, one thing was certain. Although various countries had released satellite detectors to detect the distance, there was no specific and detailed information. Most of the information was just speculation from information and pictures.

due to technical reasons, rockets at the current stage were always limited in terms of technology in order to carry and detect space scenes in detail.

Everyone had encountered a difficult problem.

If any country made a breakthrough in this area of research, they would lead the world in this field of research in the future.

Now that we're on the same level, our nation has the chance to surpass the starfish Kingdom.

Unfortunately, this kind of breakthrough often took a few years, or even ten years.

the worst news was that the starstreak kingdom had mentioned many times that they were going to make a breakthrough. although there was no concrete news, who knew if it was true or if they were just trying to influence the rhythm of others?

Now that academician li and the other two talked about Linlin Manor, the leaders agreed to let the three great academicians make a trip. If they really couldn't make it, they could just take it as a break. It was better than the three of them collapsing from exhaustion.

Minister Lu swiped his card and entered the research department accompanied by a guard. He then called three old men.

The three old men were academician Zhu, academician Fei, and academician sun.

The three of them witnessed the rise of domestic scientific research and then slowly became the pillars of space rocket research.

"Minister Lu, why are you here today? do you have any orders?" Academician Zhu asked with a smile when he saw Minister Lu.

When Minister Lu saw the three academicians, he found that they were obviously Haggard and didn't rest well. He went straight to the point and said, " "Academicians, pack up. I'll arrange a place for you to recuperate."

Academician Zhu, academician Fei, and academician sun were anxious.

"Minister Lu, are you joking?" academician Zhu quickly said. We're at a critical moment in our experiment and we're in a hurry to compete with the other countries. How can we go on a vacation and waste our time?"

The other two also nodded firmly, indicating that it was impossible to go on a vacation.

"To Linlin Manor." Minister Lu suddenly said.

The three academicians paused for a second. They had naturally heard of Linlin Manor.

The owner of Linlin Manor provided the body-strengthening liquid that shocked the entire Chinese Academy of Sciences. It could also be used as a medicinal diet to treat academician Li's stomach cancer.

Also, the news from academician li and the others said that Linlin Manor was really a good place for people to recuperate.

Now, the academicians in the hospital had all applied to go to Linlin Manor when they were on vacation.

However, after a short hesitation, academician Zhu said, " Minister Lu, our research is at a critical moment. We really can't go.

After all, with the current state of the research, they were not in the mood to take a vacation and recuperate.

Even though she knew that going to Linlin Manor was good for her body.

Minister Lu sighed. He knew how stubborn the three academicians were on this research.

however, the more he thought about it, the more he could only say, " academician Zhu, academician Fei, and academician sun, you guys should prepare to go to Linlin Manor. This is the leader's order, and I'm just passing it on. You three don't want to make the leader angry, right? "

After he finished speaking, he didn't give the three old seniors a chance to speak again. He turned around and left. He was decisive. After he finished speaking, he didn't give the other party a chance to wrangle.

Oh, " academician Zhu.

Academician Fei.

Wanwan " academician sun.

the three old seniors were instantly numb. wasn't this using power to oppress others?

Chapter 825 The Request From The Chinese Academy Of Sciences And The Activation Of The Controllable Moonstone

They didn't want to go, but they were forced to go.

However, when they were thinking of how to decline, they were shocked to find that Minister Lu had already sent people to help them clean up.

This Kasaya

.....

Another two days passed, and the popularity of Linlin Manor on the internet finally dropped slightly.

Linlin Manor.

As usual, Qin Lin arrived at the villa after delivering the things. As soon as he entered the manor, he received a call from Minister Lu.

He hurriedly answered the call. Minister Lu, you're a busy man. You must have something important to tell me.

Minister Lu was a little embarrassed and said, "Boss Qin, I'm really sorry, it's an embarrassing request. The Chinese Academy of Sciences wants to bring three academicians to your place to recuperate. These three academicians have been working on a very important project for the past few years, so they're a little tired and not in a good state."

This immediately reminded Lin Qin of the rocket research project that academician Li and the other two were talking about yesterday.

Moreover, he immediately understood Minister Lu's meaning.

Although the Linlin Manor was just a joke, with the analysis of academician Li and the other two, even if they didn't know it was the attribute effect of the moonstone, the Chinese Academy of Sciences would still be tempted to let people try it out.

Thinking of this, Qin Lin was about to agree, but he also pretended to be embarrassed and said, "Minister Lu, I actually haven't opened up too many slots for the time being."

There were some things that he could agree to with reason and psychology, but there were still some things that he had to express.

Minister Lu heard Qin Lin's words and quickly said, "boss Qin, please make an exception this time. If you really can't, we can call back academician Li and the others. We won't make it difficult for you."

Qin Lin said, "Minister Lu, there's no need to call back academician Li and the others. Academician Li still needs to go through the last treatment for stomach cancer. Let's make an exception this time. Let the three academicians come over. I'll make arrangements."

"thank you, boss qin!" Minister Lu immediately expressed his gratitude and hung up the phone after a few more words.

Qin Lin put down his phone and was a little distressed. Once the three academicians came again, they would immediately trigger the attribute effect of the moonstone. If those academicians were together, it would be easy for them to associate it with the moonstone, right?

It would be great if he could control the moonstone's attribute effect.

If he couldn't activate it at the moonstone, he could activate it when he wanted to control it. Everyone would only feel that they had gained some insight and wouldn't associate it with the moonstone.

However, he had no way to control the moonstone. Whether or not it could trigger its attribute effect depended on whether the person who triggered it was at the top of the industry or in a state that was difficult to break through.

Qin Lin thought about it and went to the moonstone to think about what to do. When he reached the moonstone and touched it with his palm, he suddenly received a system prompt in the game in his mind.

[the moonstone lacks the water of the goddess 'spring, so it has temporarily lost its attribute-triggering effect!]

had the water from the goddess's spring been used up?

He thought that the water would remain in the same state after being poured into the man-made spring, and that the moonstone would only lose its attribute activation condition after the water evaporated.

But now, it didn't seem so.

Since it was used up so quickly, it meant that someone had been using up the water of the goddess 'spring while they were trying to comprehend it.

Now, he had to take out more water from the goddess's spring from the game and pour it in to trigger the moonstone's attributes.

Didn't this mean that he could control the attributes of the moonstone?

[Chapter 826 379 1](#)

another night passed.

in min province, yu hong woke up as usual and turned on his phone. the first video was about linlin manor again.

Linlin Manor had been really popular these days.

However, he was looking forward to professor Li Kai's low-temperature genetic experiment. He liked to eat fruits, but they were not available in many seasons.

In addition, the cost of greenhouse technology was very high, so no one was willing to produce some fruits out of season.

If professor Li Kai's low-temperature experiment was successful, then he could eat any fruit he wanted in any season.

Professor Li Kai was really amazing to be able to develop such technology.

yu hong scrolled through the video and walked over to the bed to water the pot of purifying grass. he was lucky enough to buy it online.

With this pot of purifying grass, the air around his bed really became better.

Then, he walked to the kitchen. Just as he was about to cook some noodles, he realized that Linlin's ketchup was gone.

He liked to eat tomato sauce. In the morning, he cooked some noodles with tomato sauce. It was more cost-effective than the bowl of noodles downstairs, which cost 15 yuan but was not full.

He had no choice but to go downstairs to the small supermarket to buy a new ketchup. When he arrived at the supermarket, he was surprised to find that a new Linlin ketchup, which was 30 yuan, was 15 yuan more expensive than the previous one.

Only then did he remember that Linlin food company had released the news of a new ketchup product, but after the business war with the two foreign ketchup brands, there had been no news of the new product. He didn't expect that it would be released quietly.

Yu Hong was a die-hard supporter of Linlin ketchup, so he immediately bought three bottles of new ketchup with one-third of his daily salary.

When he got home, he couldn't wait to start cooking the noodles. Then, he opened the new tomato sauce and started eating.

"My Yingying's food is too delicious, right?" Yu Hong couldn't help but exclaim after tasting it. The taste of this new tomato sauce was not comparable to the previous products.

The taste was not on the same level. At this moment, he felt that the noodles he cooked were even more delicious than the dishes made by those star chefs.

This almost made him feel like he was floating.

After a full meal, he left the house. When he passed by the supermarket, he went into the supermarket and bought a few bottles of Linlin leisure tea.

as a renovation worker, he had to make sure that he had enough physical strength to do work. this way, he could finish his work early and have time to go out and find his girlfriend.

However, he felt that the company seemed to have integrated into his identity. He slept with the company's purification grass, worked with the company's leisure tea, and ate with the company's Linlin tomato sauce.

Even the news videos he watched were all about Linlin's company. In the future, perhaps even the fruits he ate would be cultivated by Linlin's company.

Not only Yu Hong, but many ordinary people also realized that more and more things from Linlin company had been integrated into their lives, especially the people around min province.

Because Linlin's products were indeed useful, they almost all recognized Linlin's products and didn't want any other products.

...

Linlin Manor.

Qin Lin welcomed Deng Guang in the evening. He came to report that the new tomato sauce had been released. However, there was no special advertisement for it. Firstly, there was no need for it. Secondly, the production was limited.

however, even so, the new tomato sauce was completely sold out in a day.

It could not be helped that they were only relying on Qin Long's plantation to provide the ingredients. Once the other plantations ripened, they would be able to produce the tomato sauce on a large scale and would not have to worry about running out of stock.

When the time came, the quality 1 tomato sauce would also be handed over to the partners of Skysea company to produce and then be labeled.

They just had to focus on producing quality 2 ketchup.

After listening to Deng Guang's report, he was about to send the other party out when his mobile phone rang. He picked it up and saw that it was Minister Lu calling again.

"Minister Lu, are the three academicians here?"

"Yes, I'm here. I'll have to trouble boss Qin to prepare dinner." Minister Lu's voice was also heard.

However, Qin Lin could hear a hint of helplessness in Minister Lu's voice. It seemed that something had happened.

"Chairman Qin, you're busy. I'll go out myself." Deng Guang said after Qin Lin hung up the phone. He then took his leave respectfully and walked out of the manor.

when the sun had completely set, qin lin picked up minister lu and the three academicians at linlin manor.

However, when a long convoy of cars drove into Linlin Manor, some of which even had the words "escort" printed on them, Qin Lin was a little dumbfounded.

He thought that Minister Lu would bring three seniors, or at most two cars. After all, he was low-key when he sent academician Lin and academician Hao here.

This time, it was a convoy and even an escort vehicle. What the hell was this?

However, in such a situation, they could only stop outside the manor.

Minister Lu was also helpless when he got out of the car. As soon as he saw Qin Lin, he took the initiative to approach him and said, " "boss qin, i'm afraid i'll have to trouble you to prepare some more places this time. i really didn't expect the three seniors to do this."

"Minister Lu, what are these things?" Qin Lin asked curiously. They're even being escorted?"

Minister Lu explained, " it's a long-distance connected multimedia equipment, a special experimental computer, and some tools that I don't understand. The three seniors were supposed to come to Linlin Manor to recuperate, but they look like they're going to continue working here. It's really frustrating.

[Chapter 827_2](#)

As if afraid that Qin Lin would have an opinion, Minister Lu explained, " boss Qin, please forgive us. The three seniors are too responsible. Their research is also very important. It is related to future space exploration.

whether or not we can conduct space exploration like in the movie will depend on the research of these three academicians.

also, even if the three academicians can't make us enter the era of space exploration, their research can lay a solid foundation for future generations and help them.

Minister Lu said a lot. Basically, he meant that the research of the three academicians was very important. He knew that boss Qin was a person who looked at the big picture and wouldn't be dissatisfied.

Qin Lin understood what chief Lu meant. He nodded and said, " "Since the three seniors" research is so important, I'll properly cooperate. Moreover, I'm very impressed with the three seniors "research attitude."

At this moment, academician Zhu, academician Fei, and academician sun also came down.

The three of them looked at Minister Lu with pride.

Minister Lu and the leader were using their authority to pressure them.

It's not like they can't be flexible.

Since they were leading experiments at the Chinese Academy of Sciences, because they were older, they had to grasp specific directions and goals, calculate formulas, prove conjectures, and other brain-based problems.

The specific experiments would be handed over to the young people. They did not have the physical strength to do the experiments themselves.

When they saw them, they said that they were the brains and their limbs were other people.

Therefore, when the leader forced them to come to Linlin Manor, they could at most change their location to work. With the multi-media and remote video equipment, they could still remotely command and lead the experiment.

Back when elder Qian was sick, he had also used this method to remotely lead the experiment for a period of time.

When Minister Lu saw the three academicians coming down, he had no choice but to run over and say, "The three of you, I asked you to come here to recuperate. Why did you bring these over?"

Academician Li, academician Hao, and academician Lin had been waiting for a long time. When they saw the three academicians, they immediately greeted them and started chatting.

They were all academicians. Even though academician Li and the others were respectfully addressed as the three great academicians, there was no hierarchy between them. They were all colleagues and comrades in scientific research.

After chatting for a while, academician Li also invited academician Zhu and the other two over to Qin Lin. "Boss Qin, these three are academician Zhu, academician Sun, and academician Fei, who we were talking about the other day."

"Three seniors, welcome!" Qin Lin immediately greeted him with a hint of respect in his tone.

He had always respected these seniors who had been fighting on the front line of scientific research.

The country was strong, and he had a stable life, which was largely due to these researchers.

In the new era, the power of scientific research was the fist that a country displayed to the outside world.

"You're welcome, boss Qin!"

"Boss Qin, the three of us have been looking forward to meeting you for a long time!"

"Boss Qin is really young and promising."

Academician Zhu, academician Fei, and academician Sun had already read Qin Lin's information before coming here. They weren't too surprised by Qin Lin's age, except that he was really amazing.

However, after entering the Linlin Manor, they were really surprised.

Although she had heard that the environment of Linlin Manor was very good and the scenery was very beautiful, seeing it with her own eyes gave her a different feeling.

Especially the quality of the air, and when they saw the green field in the manor, under the afterglow of the setting sun, they actually had a kind of feeling of relaxation and carefreeness.

This was the effect of the quality 2 dog tooth grass.

At this moment, the three of them remembered what Minister Lu had said on the way.

If academician Li's analysis was correct, this Manor could indeed relax one's body and mind. This kind of state was indeed helpful for scientific research.

Now that they were experiencing it for themselves, they suddenly felt a little anticipation.

During dinner time, Qin Lin also prepared an Emperor's medicinal cuisine to welcome the three new seniors.

Academician Zhu, academician Fei, and academician sun weren't people who enjoyed eating and drinking. They had also eaten the emperor's medicinal cuisine made by the National banquet chefs at the Chinese Academy of Sciences.

He had to admit that the medicinal cuisine was very delicious. After taking it a few times, he could clearly feel that it had great benefits to his body.

However, after eating Qin Lin's grade 3 herbal dish, the three seniors couldn't help but Marvel.

The herbal dish prepared by boss Qin was much more delicious than those made by the National banquet chefs. Moreover, he had only eaten it for a short while, and the incredible warmth he felt was not a joke.

that warm feeling was very comfortable.

However, the medicinal cuisine could actually take effect so quickly?

This speed was even faster than the Rockets they were researching.

The emperor's medicinal cuisine gave the three of them a new understanding of Linlin Manor, and they also knew why academician li and the other two were so impressed.

In the night.

Academician Zhu and the other two followed academician li and the other two to the garden in the manor.

Since the three of them had come to Linlin Manor, they naturally wanted to see the place where professor Li Kai and artist Wu Kai had their breakthroughs.

The moonstone was still emitting a soft white light in the night, still illuminating the surroundings with a frosty dreamlike scene.

However, without the spring water of the goddess "spring, the moonstone couldn't be used.

The gentle light emitted by the moonstone enveloped a large area, but it was still shocking.

"What's this luminous stone? The light shrouding this place really has some artistic conception!" Academician Zhu was curious.

[Chapter 828 379 - 3](#)

"linlin's laboratory did some research on it, " academician li explained. " it's just an ordinary luminous stone. it doesn't have any radiation damage. "

"En!" Academician Zhu nodded and didn't probe too much.

Following that, academician Zhu and the others also looked at the place where Li Kai had previously written down the formulas and data.

For them, this kind of scientific research event could easily arouse their interest.

Naturally, because of the lack of the spring water, the moonstone could not trigger its attributes, and they could not make any breakthroughs.

In the manor, in the two rooms on the second floor near the corner of the passage, Minister Lu was busy with the installation of the equipment for the three academicians.

When the equipment was almost ready, Minister Lu came out and solemnly said to Qin ran, "Boss Qin, the higher-ups have a presumptuous request for me to pass on."

"Please speak, Minister Lu!" Seeing Minister Lu's serious look, Qin Lin also nodded.

boss Qin, "Minister Lu said, "while the three academicians are recuperating in the manor, can you please not open the quota to the public? the higher-ups will compensate for it.

in addition, the higher-ups want to send some special people to your Manor to apply for a job. Of course, boss Qin, don't misunderstand, it's not that they want to place people here, it's just that the three academicians are too special.

the research they are leading is too important. If they really gain enlightenment in Linlin Manor and the outside world finds out, some people will go crazy and do anything.

don't worry, boss Qin. Those people who came for the job will not affect anything in the manor. They will also cooperate with you. If you have any orders, they will do it without breaking the rules.

Qin Lin could guess who chief Lu was going to send to apply for the job after hearing his words. After all, he did not watch movies for nothing. Li Lianjie had once acted in a movie of this type.

Moreover, he also understood what Minister Lu meant.

There were six academicians recuperating in his Linlin Manor, and they were all in charge of very important research. There were even three big academicians.

If this was known by some people, they would definitely do something crazy and earn a lot.

Also, the three academicians' rocket research was facing difficulties in various countries. If he could use the moonstone to help them, they would definitely be able to break through.

This made the foreigners find out about this matter, and it was even in a Holiday Manor in a small county. It was easy to guess what would happen.

Thinking of this, Qin Lin immediately nodded and said, "I understand what you mean, minister Lu!"

"Thank you for your understanding, boss Qin!" Minister Lu heaved a sigh of relief. In fact, there was one thing he didn't say. This arrangement was also meant to protect boss Qin.

Because boss Qin had shown more than just the potential to be a leader of entrepreneurs.

if those conjectures were confirmed and the linlin manor could really help the three academicians make a breakthrough, what would happen to the person who built the linlin manor if the outside world knew?

If he was captured, would he be able to build another Linlin Manor?

To Qin Lin's surprise, Minister Lu came to his office with more than ten people the next day.

There were men and women among the dozen people, but they were a little different from what he had imagined. They all looked like ordinary people.

Just like those who were looking for a job through an ordinary interview.

If Minister Lu had not told him in advance, he would not have known the identity of these people.

[Chapter 829 380-Birds Of! Feather Flock Together](#)

Qin Lin could tell that these people were extraordinary from this alone. He also said to them, "Welcome, everyone. Please take care of me in the future. If you have any requests, you can also tell me. I will definitely satisfy everyone if I can."

A middle-aged man walked out from the crowd. "Mr. Qin, please prepare a bigger training room for us. We'll buy some training equipment later."

The middle-aged man had some stubble, but his body was very strong. He was not as muscular as those in the gym, but the kind that was full of toughness and flexibility.

Obviously, he should be the person in charge of these people.

boss Qin, his name is Ma Hong, " Minister Lu explained. he's the captain of these people. You can just ask him for anything in the future.

Qin Lin nodded and turned to Ma Hong. I'll have to trouble you in the future, Captain MA. There's a special forging room in the manor. It's very spacious, and you can use it at any time.

"Thank you, boss Qin." Ma Hong also nodded politely.

After that, Qin Lin called Gao Yaoyao over and asked her to arrange work for Ma Hong and the others.

As for the information and registration, it was impossible for these people to give him the real information.

Therefore, he would ask Minister Lu to give him some superficial information, and he would send it to the Human Resources Department.

although gao yaoyao was puzzled as to why the boss still hired so many people when there were already enough people in the manor, she didn't ask much and made arrangements for these people. most of the positions were naturally arranged for gemstones, followed by the kitchen and waiter.

a few days passed.

Chief Lu had already gone back, while Ma Hong and the others stayed in the manor. They worked like ordinary employees and had already become friends with the manor's employees.

Ma Hong had even become familiar with Chen dabei, the security Captain who often patrolled the manor. They could even smoke with their arms around each other.

chen dabei only knew that the new security captain was pleasing to the eye, but he did not know that he had a special identity.

In the office.

Qin Lin looked at the game in his mind. He had just finished today's daily task of harvesting a red sandalwood tree and a Grade 2 ornamental fish when he received a call from Lin Lanzi. "boss, there's a man called wang danan who wants to see you. he also brought a foreigner with him and said he has a big business deal to discuss with you."

"Wang Danan?" Qin Lin was a little confused.

He didn't know who it was, so he turned on his computer and logged into the internet to look for Wang Danan.

Now, not everyone could see him just because they wanted to. Otherwise, if anyone came to his door and said that there was a big business, wouldn't he be busy to death?

Wang Danan, on the other hand, had a lot of information on the internet. He was known as a rare business genius of the younger generation. He was the president of Nanhu Feiyang group at such a young age.

The FEI Yang group's assets were not small, even higher than Chen Sheng Fei's Tianhai group's. This showed that Wang Da Nan was indeed capable.

But how could this person be bald at such a young age?

Looking at the bald man, he could guess what the big business was. Perhaps it was for the hot spring powder.

Qin Lin thought for a while and said into the phone, " manager lin, take him to the guest room of the villa. i'll be there right away. "

"Okay, boss!" lin lanzi replied.

Qin Lin put down the phone and walked out of the manor. In the manor, the three girls, Lin and Liu, were holding their children in the living room, tasting the quality 2 fruits bought from the shop.

For them, the vacation and recuperation in Linlin villa was really a kind of divine enjoyment.

When they saw Qin Lin, they also greeted him.

Qin Lin responded to the greeting. When he walked out of the hall, he saw academician li, academician Lin, and academician Hao with the three new academicians. They were observing the manor's quality 2 purification grass.

"The air around us is really hard to describe." Academician Zhu sighed.

yeah, academician Li's genetic research is unparalleled. "It can be said that the purification grass is more valuable than the entire Crop Research Department of the Chinese Academy of Sciences," academician Fei also praised.

Obviously, professor Li Kai had slowly become a legend on the internet, and then, he was gradually recognized by the respected seniors of the Chinese Academy of Sciences.

Qin Lin was a little happy to hear these words.

Old brother Li's shield was getting thicker and thicker.

"Boss Qin!" When academician Li saw Qin Lin, he smiled and waved at him.

The other academicians were the same.

"seniors, i'll prepare another emperor's medicinal cuisine for you tonight." Qin Lin said with a smile, then left the villa.

Academician Li looked at Lu Zhou and said, " " this boss qin is also amazing. at such a young age, he has already managed a large business. after a few years, i'm afraid that no businessman in the country can compare to him. "

more importantly, he has top-notch culinary skills and a deep understanding of traditional Chinese medicine. Even the Traditional Chinese Medicine families in the country can't compete with him in terms of medicinal cuisine and medicinal wine.

Academician Zhu agreed. birds of a feather flock together. Otherwise, with professor Li Kai's ability, why would he be so close to boss Qin? they're more like brothers. That's because both of them have abilities that ordinary people don't have. They acknowledge each other and appreciate each other.

Academician sun sighed. the key is that boss Qin is really young. Professor Li Kai is also in his Prime. It's a great thing for the country to have such young people.

The others nodded in agreement.

Yes, this was a good thing.

It was obvious that not only Li Kai, but the seniors were also used to Qin Lin.

[Chapter 830 The Balding Leaderboard \(2!](#)

when one thing was regarded as normal, then no matter what he did, it would not arouse any suspicion.

This was because in the eyes of others, this was normal. Otherwise, it would be abnormal.

This was something Qin Lin didn't know. Of course, even if he knew, he wouldn't let himself go. He would still choose to be careful.

qin lin quickly entered linlin villa. it was still very lively inside with many tourists.

Nowadays, the tourists who came to Linlin villa, even if they did not go out to play, just sitting in the rocking chair, swing, and so on in the leisure area to enjoy the air of Linlin villa was also excellent.

As soon as he entered the office, Qin Lin heard a high-spirited square dance song, "little apple," accompanied by the barking of dogs.

Qin Lin looked over and saw that wangcai was dancing a demonic dance with the accompaniment of little apple.

Today was obviously the day that the multimedia department was shooting videos for the three little guys, wangcai, red hair and snowy.

The three little fellows were now very famous animal celebrities on the internet.

Back in the doggie disc flying competition, he had obtained the doggie pet skill to listen to music and dance. After listening to 10 songs, he could dance to the rhythm of the music.

With this skill, wangcai's individual account had reached 25 million fans.

Many advertisers came to seek cooperation, wanting wangcai to endorse dog food. The price for a video was a few million Yuan.

Lin Lanzi had told him about this, but he didn't agree.

He still didn't trust other people's products. What if the store was black-hearted and there was a problem with the dog food, which would harm other people's dogs?

Unless one day he could get his own pet food recipe, he could open his own pet food company.

While wangcai was dancing, the white fox Xiaoxue was also jumping around behind wangcai.

It was mainly there to join in the fun.

After such a long time, it had become familiar with all the employees in the office. It knew that the people here would not hurt it and would take care of it like a princess. Its timid character had also changed a lot.

However, it didn't matter whether snowy danced well or not. The important thing was that netizens liked to see such scenes.

Many netizens compared wangcai to the dog 'Liu Yinghong'.

Some people even posted videos of themselves watching Liu cihong's fitness exercises and bought a TV for the dog to show wangcai's demonic dance.

In any case, there was no lack of weird netizens online.

Red hair had been gnawing on a nut at the side. When it found Qin Lin, it jumped a few times and landed on Qin Lin's shoulder. It waved its hands and cried at him, and pointed at Wang Cai from time to time.

Wangcai suddenly stopped and barked at red hair in dissatisfaction.

Although Qin Lin didn't understand what the two little ones meant, he knew it wasn't anything good.

He could even imagine:

Red hair thought,"this stupid dog is embarrassing himself again."

Wangcai,"who the hell are you calling embarrassing? come down if you have the guts."

When snowy found Qin Lin, she barked happily and ran straight to his thigh. With a leap, she was in his arms.

Qin Lin hugged Xiaoxue.

The little fellow rubbed her head against his chest affectionately.

The staff of the media department greeted their boss when they saw him.

Qin Lin played with the three little ones for a while before heading to the living room of Linlin villa.

When he arrived at the living room, Qin Lin saw Lin Lanzi making tea to entertain the two men.

One of them was a foreigner.

He recognized Wang Danan.

However, compared to the photos on the internet, Wang Danan's head had grown a lot of hair.

He didn't even need to think to know that he must have used the hot spring powder. He would probably regain his thick black hair very soon.

Moreover, the foreigner beside him was also the same, but he seemed to be even more bald than Wang Danan.

Wang Danan and Phillis ode were stunned when they saw Qin Lin walking in.

Wang Danan had some understanding of Linlin villa before he came and knew that this was the internet celebrity, little Qin.

When Filis ode saw Qin Lin, he thought that he was here to report to him. After all, he was too young.

It was only when Lin Lanzi stood up and respectfully called out "boss" that the two of them were shocked.

wang danan was even a little dumbfounded.

He had always thought that he was a genius. He had become the president of the flying Sun Group at a young age, so he usually didn't care about his peers.

He was the best.

But now that he knew Qin Lin's identity, he suddenly understood. What did it mean that there was always someone better?

The future Big Boss and future richest man predicted on the internet was actually this young man in front of him who was so much younger than him?

In front of the other party, the status of the CEO that he was so proud of seemed to be nothing.

"Boss, this is Mr. Wang Danan. Mr. Wang Danan, and this is our boss, Qin Lin." Lin Lanzi started the introductions.

Wang Danan finally came back to his senses and said with a humble attitude, " Hello, Chairman Qin. I'm so surprised that you're so young.

This was how the business world operated.

He was well aware of this.

There was nothing wrong with this attitude when facing someone stronger than him.

Qin Lin also sat down and let Lin Lanzi continue to make tea. At the same time, he asked, "Mr. Wang, tell me about the big business you mentioned!"

Wang Danan saw that Qin Lin was so direct and immediately introduced, " Mr. Qin, this is Filis Aude. He's from the Aude family in Germany. His family wants the right to distribute Linlin hot spring powder in Germany.

"Germany, the Ode family?" Qin Lin subconsciously glanced at Filis Aude. No wonder he was so bald.
