

## The Game 881

### [Chapter 881 Big Brother-In-Law And The Dog Fight For Food \(1\)](#)

There was no doubt that dog food would definitely be loved by dogs if it had the attributes of taste +2 and taste +2.

there was also the +2 nutrition attribute, and the nutrition of dog food was the biggest problem.

What's more, dogs liked +2 attributes. There was probably no dog food on the market that could compare to this.

If several kinds of dog food were put together, the dog would definitely choose this kind of dog food. It might even be that the dog would not be the only one to choose this. After all, it also had the attribute of 'owner likes +2'.

In other words, if this dog food was promoted, it would sweep the pet food market.

"Wuwuwu!"

the dog wang cai barked.

It circled around Qin Lin and kept looking at him, as if urging him.

Qin Lin looked at the dog's expression and instantly understood. The dog seemed to know what he had won. Was it asking him to make this dog food for it to eat?

Qin Lin didn't waste any time and chose to use this dog food secret recipe.

In an instant, the prescription turned into specks of Starlight and burrowed into his mind.

A dense amount of information began to rush into his mind. It was about the detailed information and experience of making dog food. He also had a lot of muscle memory, as if he had made it countless times.

every time he did this, it was equivalent to him gaining an additional skill.

After receiving all the information, it also meant that he could become a master of dog food.

Then ...

Qin Lin brought wangcai out of the game and returned to the office.

"Wuwu!"

Wang Cai shouted at him again as if it was urging him.

This was almost making people wonder who the master was.

this dog is urging its master so much, isn't it afraid of being stewed?

Of course, he could not stew it. He had no choice but to leave the office and call Chen dabeai to run an errand.

"boss, what's your order?" Chen dabeai immediately picked up the phone.

Qin Lin immediately ordered, "help me buy some things, such as corn, flour, big meat buns, and some special herbs. Last but not least, I want to buy a crusher, a blender, a shredder, and an air-dryer for Zhenzhen. I also want to buy a machine for each of these. For the money, you can just get me to sign the bill."

although chen dabei was already the security manager and he should not ask him to do such trivial things, he was really used to letting chen dabei do these things. moreover, chen dabei was very careful every time, and nothing had ever happened.

Naturally, Chen dabei was more than happy to do this.

When he received Qin Lin's call, he was in a small meeting with the Department managers such as Yu Shui and sister Hong. Some work in the villa required the cooperation of various departments, so the management had to meet in the market.

He had a meeting with Gao Yaoyao and Yang Dong, the manager of the breeding base, yesterday about the new activity for the gym pigs.

When he received a call from his boss and was told to do something, he could see that Yu Shui and sister Hong both had envious expressions.

His boss liked to ask him to run errands for him. Didn't that mean that he had a good relationship with his boss? This was something that others couldn't get even if they wanted to.

Whoever did this to him would be making things difficult for him.

The first thing Chen dabei did was to find Zhao Moxi and tell him about Qin Lin's request. After getting the funds, the first thing he did was to run errands for his boss. Then, he brought some people to deliver the things he bought, the materials, and the machines to the villa and handed them to Qin Lin.

If the boss's instructions were not completed immediately, then the boss might find someone else next time. The position of the boss's trusted aide would definitely be snatched away.

Qin Lin asked Chen dabei to send the things to the workshop in the inner area.

Wangcai stuck out its tongue and followed him with snowy. Its eyes were full of expectation.

This was like a child winning an egg at school and going home to ask his mother to cook it for him. He felt a sense of accomplishment and anticipation.

After Chen dabei left, Qin Lin began to clean the ingredients for making dog food.

when wang cai saw this scene, it was obviously looking forward to it more and it was so happy that it turned around. the more it entered the game, the higher its spiritual intelligence seemed to be, as if it would benefit from participating in the competition.

When the materials for making dog food were all prepared, Qin Lin began to clean and adjust the dog food-making machine.

To make dog food, the first step was to crush the corn and big bone with a grinder, then mix these crushed materials with the flour with a mill, and finally add the medicinal materials. The order and proportion had to be correct.

After using the secret recipe, he had also obtained the relevant muscle memory. Qin Lin was very familiar with the process of making these and completed each step.

Finally, the removed dog food was sent into a special oven through the air conditioner.

chen dabe's take-off machine seemed to be a little unbalanced. the models were a little too big, and the size of the dog food was like a human biscuit. however, with the size of the dog, a bigger piece of dog food should not affect it.

He turned off the oven and a timer appeared on top of it.

The next step was to wait for the baking time to end.

Not long after, when the dog food was almost ready, Qin Lin's phone rang.

It was a call from his brother-in-law, Zhao moyun.

He hurriedly pressed the answer button.

"Qin Lin, aren't you in the manor's office?" Zhao moyun's voice could be heard.

"I'll just ring the doorbell and come up from the inner department's area," Qin Lin said.

#### [Chapter 882 First Brother-In-Law And The Dog Fight For Food \(2\)](#)

"Alright!" Zhao moyun replied and hung up.

a moment later.

The doorbell rang, and Qin Lin pressed the button to open the door. Zhao moyun also went upstairs and appeared in front of him in the workshop.

Qin Lin, this is an invitation for you. Remember to come! Zhao moyun immediately handed him an invitation.

"What is this?" Qin Lin asked, puzzled.

Zhao moyun smiled and explained,"didn't I get the news about you city's new development from you? a few friends and I found some money to start a joint venture in the development of materials, and we made some money." &Nbsp;

" now that we've contracted another section of the project, we've been discussing how to make the previous temporary company official and hold an official opening ceremony. "

"Alright, I'll be there when the time comes!" Qin Lin nodded.

He would still give face to his brother-in-law.

Moreover, because his brother-in-law had received the news in advance, he and his friends had not only made a small amount of money, but a lot.

The key was that his brother-in-law and the others were also people who wanted to do things, unlike some people who still talked about things but flew into the sky. They did not look like people who wanted to do things at all.

At this moment.

The oven beeped.

It was time to roast the dog food. Wangcai seemed to understand and urged him again.

Qin Lin looked at the dog speechlessly, then took a plate, opened the oven, and swept the dog food from the oven onto the plate with a tool.

There was too much dog food to fill a plate. He could only put the plate in his hand on the table and then take another plate.

"Qin Lin, are you making cookies?" Zhao moyun asked as he reached out to take a piece of dog food and put it in his mouth.

After a mouthful of crunchy crunching, he felt the deliciousness and texture. He was surprised and said, "Qin Lin, your cooking skills are getting better and better. These biscuits are so delicious too."

As he ate, Zhao Mo Yun reached out to take another piece and placed it in his mouth, crunching and chewing.

most importantly, it was delicious and alluring. he had never eaten such delicious biscuits before. he chewed and grabbed two more pieces and stuffed them into his mouth.

"Wuwuwu!"

Wang Cai saw this scene and became anxious. It raised its head and started to cry out at Zhao Mo Yun.

Zhao Mo Yun looked at Wang Cai in confusion, "qin lin, what's wrong with your dog? Did it want to eat the biscuit? I don't think dogs can eat biscuits, right?"

As he spoke, he picked up two more pieces of dog food and stuffed them into his mouth as if nothing had happened.

This made Gou 'Zi even more anxious.

"Wuwuwu!"

Wang Cai screamed at Zhao Mo Yun and even bared its teeth at him, as if it was eager to pounce.

"Qin Lin, is your dog really sick?" Zhao Mo Yun saw Wang Cai's fierce look and realized that something was wrong, so she quickly ran to Qin Lin's side.

"Who allowed you to eat its dog food!" Qin Lin put the rest of the dog food on another plate and placed it at wangcai's feet.

"? ? ?" Zhao moyun was dumbfounded when he saw this.

Dog food?

So, did he just fight with the dog for dog food?

But why was dog food so delicious?

Wang Cai immediately gnawed at the plate of dog food by its feet, but its eyes were staring at Zhao Mo Yun and the plate of dog food on the table with contempt.

Surprisingly, Zhao Mo Yun knew what Wang Cai's gaze meant.

he felt that it was ridiculous. he was despised by a dog?

what was this?

But he couldn't help but look at the dog food.

this dog food was really delicious.

Most people have never eaten such delicious food before, right?

In the end, he still quickly reached out and grabbed a few pieces of dog food.

"Wuwuwu!"

Wang Cai saw that he still dared to attack so it cried out again and was about to pounce on rang.

Zhao moyun was so scared that he ran outside, shouting, "Qin Lin, remember to come on time. I'll be leaving first."

After he finished speaking, he didn't forget to stuff the dog food into his mouth.

Qin Lin shook his head helplessly.

There were really people who liked to eat dog food and fight with dogs for it.

However, this also showed that the dog food was really delicious.

"Squeak!"

Snowy's meow was also heard. It also came to the plate and bit a piece of dog food. It squinted its eyes and enjoyed it.

Wangcai wasn't stingy with its Fox friend, instead, it pushed the plate at its feet to snowy and barked at Qin Lin again. At the same time, one of its paws kept reaching for the table.

The meaning was obvious-give that plate to it.

Qin Lin smiled, picked up the plate of dog food on the table and handed it to wangcai. He also took a few pieces of dog food and entered the game. He saw the remarks of the dog food:

[ (can be named) dog food: quality 2 ]

[ this is made with a special formula. After using it, you can obtain the detailed secret recipe. The dog food produced has a special effect: Deliciousness +2, taste +2, nutrition +2, doggy likes +2, owner likes +2! ]

Seeing this note, it meant that the dog food was very successful.

Qin Lin looked at the dog food in his hand, but for some reason, he thought of Zhao Moyun, his brother-in-law, eating the dog food happily.

It shouldn't be that good, right?

The moment this thought came to her, it was as if there was some kind of magic that she could not control.

Even though he had reminded himself, sometimes, the desire to try something was really strong.

So, in the end, he couldn't help but stuff a piece of dog food into his mouth and bite it.

'Hmm, the taste is really good.'

The +2 deliciousness and +2 texture attributes explained everything.

Looking at the other piece of dog food in his hand, he held back. After all, he was different from Zhao Moyun. He often ate things that added +2 to deliciousness and +2 to texture.

In addition, there would always be a strange psychological feeling when eating dog food.

Qin Lin also logged out of the game after learning about the situation of the dog food.

Outside.

Wangcai, the dog, was already eating dog food with Snowy. The dog food was scattered all over the ground.

Looking at Snowy eating so happily, it seemed that this dog food had many uses. Not only could it be eaten by dogs, but it could also be eaten by humans and other animals.

Deliciousness +2, taste +2, nutrition +2, that should be enough, right?

Therefore, it should not be named after dog food, but could be directly promoted as pet food, which could be used by all pets.

It was just that some animals' stomachs had high requirements for food, such as some breeds of cats, foxes, ferrets, and tadpoles.

he had to test it.

"Wuwu!"

Wangcai's call soon sounded again. It had finished its plate of dog food and was looking at him expectantly with its tongue out.

Qin Lin had to clean the ingredients again. He spent some time making two plates of dog food for Wangcai. At the same time, he took some dog food and left for Linlin's laboratory.

Li Kai had been conducting experiments in seclusion all this time. Although the low-temperature genetic experiment was a success, it would take time for the specific technology to take shape and be applied in reality.

Right now, Li Kai was handling this matter.

Chairman Qin, you're here. Do you have any orders? "

Another researcher greeted Qin Lin when he arrived at the laboratory.

Qin Lin directly handed the dog food to the other party and said, " help me test this thing to see its nutritional content. Also, will it be a problem for the pets on the market? "

the researcher looked at the dog food with some doubts, but since it was his boss's order, he wouldn't ask too much. he immediately nodded. Chairman Qin, if you want to analyze all the pet types on the market, we'll only get the results tomorrow!

"Okay, just email me the results." Qin Lin nodded.

...

The next day.

Qin Lin received an email from Linlin's laboratory. He opened it immediately and saw the content of the email. It was about the test results of the dog food.

It could be seen that the researcher was very detailed. The report almost included the food requirements of all the pets on the market, as well as the analysis of the food reports of various pets.

Because of the +2 nutrition attribute, his dog food was more nutritious than all pet food.

The key was that, through experiments, his dog food could indeed be eaten by all pets, even those who had high requirements for food.

In addition, humans could also eat, so the market for dog food was open.

This product alone was enough for Linlin food company to open another subsidiary.

On the other hand, the subsidiary company was looking for a person to be in charge, and he immediately had a candidate in mind.

As he thought about it, he gave Deng Guang a call.

#### [Chapter 883 403-Linlin's Single Dog-Dog Food](#)

A new day had arrived, and as the sun shone down, the entire you city became lively again.

The tourists who came to you city always got up early. Most of them were rushing to Linlin villa and Linlin Ranch. First, they wanted to go to the Linlin sales center to buy some. Second, there were some rooms and tents that were reserved for tourists to order offline.

therefore, if he went early, he could still book a tent and a nuptial chamber. but after coming here, he felt a little regretful that he didn't stay in the nuptial chamber at linlin mountain villa or in a tent at linlin ranch.

In addition, some people were in a hurry, so they had to eat breakfast early when they came out to play. Then, they would head to Linlin villa and Linlin Ranch, so that they wouldn't exceed their planned time.

Otherwise, they definitely wouldn't have enough time to visit all the places in Linlin villa and Linlin Ranch.

You city's breakfast shops and breakfast vendors benefited greatly from this.

Kong Lin had woken up early in the morning in his newly bought Wedding House. He was already engaged to his girlfriend, so he had to have his own house.

The house was a premium house in the Oriental commercial plaza. It was 150 square meters, 20000 Yuan per square meter, and the down payment was one million Yuan.

His parents had helped him raise the down payment. After all, he had not worked for long. However, he would return the money to his parents soon. He was now the Vice President of Linlin health company, and his salary was not low. He heard that he would get a lot of year-end bonuses as well.

After washing up in the bedroom, he saw his fiancée busy in the kitchen. Seeing this, he was full of energy. After all, he would protect this woman for the rest of his life.

However, their wedding had to be delayed for a year or two. After all, it was a critical period for him.

The fiancée's family understood this.

In you city, his fiancée's job as a bank employee was considered good, but his status as the Vice President of Linlin health company was unique among his peers.

Who could be like him and become a vice president of a company in such a short time after graduation? And he was the vice president of a company like Linlin company?

One must know that Linlin company's prospects in the country were definitely comparable to any Corporation.

This was also the most important decision he had made back then. If he had not entered Linlin's company's small factory while being ridiculed by his classmates in the group, he would not have been able to grow with the company and achieve such achievements.

After breakfast, Kong Lin headed to Linlin health company as soon as possible.

Linlin food company had its own office building in the Linlin factory Park. As a subsidiary company, Linlin health company was naturally in the same office building, occupying three floors of office space.

When he reached the company, the health maintenance company's employees had already arrived. When they saw him, they greeted him one after another.

"Director Kong!"

"Director Kong!"

"....."

Kong Lin smiled and nodded in response. He then went to his office and began to check the company's order status, as well as the production line's production and distribution Status.

The Linlin hot spring was on fire, and the orders from Linlin health company were endless. The company had even stopped taking orders.

Because there were still more than 5 billion orders waiting for production. Even with these 5 billion orders, those customers would still have to wait in line.

Therefore, they still needed to add new production lines.

It just so happened that there were two more factories in the factory Park that were about to be completed, and these two factories could be used to expand production.

Kong Lin checked the condition of the two factories and began to write an application to President Deng. He planned to let the two factories be used for the expansion of the health company.

These two factories could increase the production that the health company urgently needed!

He was about to send out the application documents when he received a call from Deng Guang.

He hurriedly picked up the call. "Hello, CEO Deng!"

He was very respectful to President Deng, not only because he was the person in charge of the head office, but also because he was very kind to him.

When he first entered the production line of Linlin factory and started from the bottom, it was because of director Deng's support that he had the opportunity to show his ability.

Now, he was able to help Chu Yue set up this subsidiary company and become the Vice President of the health care company. It was also director Deng and Chairman Qin's recommendation.

"Come out and go downstairs. Come with me to see Chairman Qin." Deng Guang's voice was heard from the phone.

"They're here!" Kong Lin hung up the phone and went out of the office immediately. When he reached the first floor of the office building, he saw the boss, Deng Guang.

"Get in the car!" Deng Guang said directly.

after getting on the car, kong lin asked curiously, " " ceo deng, chairman qin suddenly wants to see me. do you have any instructions for me? "

Although he was now the Vice President of the health company, he had not seen Chairman Qin much.

in fact, he really admired chairman qin. he studied financial management, so he naturally knew many famous people in the history of economics and modern business.

To be honest, no big Boss in the business world could be like this Chairman Qin. He didn't show his face in the company at all, but he could operate in secret and make the company bigger and bigger. He believed that Linlin company would not lose to any company in the country in the future.

if not for the limited production, the value of a health company alone could crush most companies in the country with the importance of hair and the huge market.

After closing the car door, Deng Guang told the driver to start the car. Then, he said to Kong Lin, Xiao Kong, remember to perform well when you see Chairman Qin later. You might have to leave the health company.

Deng Guang was stunned for a moment, but he did not say anything more.

#### [Chapter 884 Linlin's Single Dog-Dog Food! 2](#)

In fact, he was also a little surprised when he received Chairman Qin's call yesterday. Why did Chairman Qin suddenly want to open another subsidiary company?

However, he also knew that Chairman Qin wouldn't make any decisions under normal circumstances. However, if he had to do something, it wouldn't be a small matter. Moreover, it would always be a big matter.

He just didn't know what kind of product it would be this time.

When Kong Lin heard Deng Guang's words, his face immediately revealed a happy expression. He naturally understood what director Deng meant.

The car soon arrived at the parking lot of Linlin Manor. After the car stopped, the driver sensibly started to listen to music in the car.

He knew that this Manor was not a place where he could get out of the car and stroll around. It was not easy to find this good job of driving for President Deng.

Deng Guang led Kong Lin into the main hall and saw Gao Yaoyao already waiting for them.

director Deng, director Kong, the boss is in the inner area. He asked me to take you there! Gao Yaoyao saw the two of them and quickly went forward to lead them to the inner area.

Gao Yaoyao immediately took out a card, swiped the access control, and entered the inner area.

In the entire Linlin Manor, Linlin Mountain Villa, and Linlin Ranch, she was the only one who had the access card to this inner area.

After all, the interior area where the boss and the lady boss lived was so large that it needed to be cleaned regularly. She had to bring people up to clean it regularly and deal with it properly.

...

At the same time.

the workshop inside the manor had been locked from the inside.

Inside.

Wangcai's wuwuwu sounds kept on ringing out with joy and there were also the squeaking sounds of the snow.

This was because Qin Lin was already working on the machines that made dog food. There were already plates of dog food on the table in the studio.

However, these dog foods were a little different from the ones he had made before. At least, the colors were different. This was because he had replaced corn with other ingredients, such as cucumbers, sweet potatoes, and other vegetables.

In the secret recipe that he had obtained, those key medicinal ingredients could not be replaced with other things, but the cucumber and the other things did not say that they could not be replaced with other things, right?

Therefore, he was also doing some experiments.

Since this dog food was to be made into all-pet food, then there should be some differences between dog, cat, Fox, and pig Pixiu, right?

Even if the material and color were slightly different, it would be fine.

This was called respecting the customer.

It was impossible for the customer to buy food for his pet only to find out that the cat food was the same as dog food and pig food.

Now that there was a slight difference in color, the customer could also comfort himself, right?

After the new dog food came out of the oven, Qin Lin took out some of it one by one and brought a thought into the game. Then, he saw the remarks of these dog food:

[ Linlin dog food: quality 2 ]

【.....】

[ Linlin dog food: quality 2 ]

【.....】

[ Linlin dog food: quality 2 ]

【.....】

.....

Obviously, exchanging for some ingredients that would not affect him much, exchanging corn for other vegetables, melons, and fruits was indeed possible.

After exchanging the materials, the dog food made was also of a quality of 2, and the attributes were basically not affected.

That was reassuring.

Then, he threw the dog food in his hand into his mouth.

The corn would taste a little different if it was replaced with other ingredients. After all, the taste of corn was definitely different from that of cucumber.

However, with the +2 deliciousness and +2 texture, the taste would not be bad, nor would it taste bad.

after qin lin ate the dog food, he logged out of the game.

Then, he took out a piece of paper and wrote some notes: Lin Lin-cat food, Lin Lin-dog food

After he finished writing, he pressed them under the plates of dog food, which represented what kind of pet food they would be in the future.

Naturally, he had written it according to his mood, and there was nothing special about it.

At this moment, someone knocked on the door. He hurriedly opened the door and saw Gao Yaoyao, Deng Guang, and Kong Lin.

"Boss, director Deng and director Kong have arrived," Gao Yaoyao said.

Qin Lin nodded and invited Deng Guang and Kong Lin in.

He even took a special look at Kong Lin. This Kong Lin could be said to be a talent that Linlin company had nurtured itself. He had also been tempered many times and could be considered a true direct descendant!

Therefore, now that there was a new opportunity, he was naturally the first person to be thought of.

When Deng Guang and Kong Lin saw the biscuit-shaped dog food on the table, they probably knew that this was the product that their boss was going to sell in the new company.

However, the two of them were a little puzzled. This seemed to be a biscuit. There shouldn't be a need to open another subsidiary company, right?

after all, biscuits were considered food, so they could be promoted directly in linlin food company.

"Old Deng, come and try these," Qin Lin said to the two of them.

Deng Guang and Kong Lin did not hesitate. They stepped forward together, picked up one plate of dog food, and ate it.

After eating the dog food, their eyes lit up.

" chairman qin, these biscuits are too delicious. " deng guang said in surprise.

Kong Lin's eyes also brightened. that's right. I feel like there shouldn't be any biscuits on the market that can compare to this.

Although he was puzzled as to why Chairman Qin would open a subsidiary company for a biscuit product, it would definitely be popular if such delicious biscuits were used to open a subsidiary company.

then, the two of them tried the dog food on the plates one by one. except for the taste of the ingredients, almost every plate was delicious.

The two of them were the same as Zhao moyun yesterday. After eating, they couldn't help but pick it up and stuff it into their mouths.

The two seemed to be afraid of each other, but it made wangcai anxious. It hadn't even started eating yet, why did this man like to fight with the dog for food?

"wuwuwu!"

gou 'zi's cries and urging sounded.

"Squeak!"

Snowy, the Fox, also meowed. It was a pure product of the game, and its spiritual intelligence was higher than wangcai. After eating the quality 2 dog food, it naturally knew that it was delicious.

Wang Cai was anxious, and so was it.

They were like two gluttonous children who were anxious when they saw the adults eating before it was their turn.

" chairman qin, are these biscuits the new company's main product? " deng guang ate another piece of dog food and asked.

Kong Lin also looked at Qin Lin curiously. After all, he was going to be the person in charge of the emergency room, a new company, and this was the product he was going to lead.

Qin Lin nodded. these are indeed the main products of the new company. However, they are not biscuits. They are dog food.

"What?" Deng Guang.

"Dog food?" Kong Lin.

The two of them didn't react to their boss's words.

Were they eating dog food just now? However, the dog food was so delicious, and he still cared if it was dog food.

If people outside knew that this thing was so beautiful, would some people claim that they had a dog at home and specially bought dog food for themselves?

The two of them felt that this was really possible.

after they had eaten the dog food, they knew that it was dog food and had the urge to take two more pieces to try.

however, not all of these will be sold as dog food. Linlin's laboratory has done tests and found that other pets can eat them too. So, all Pet Series will be promoted at the same time. Qin Lin said as he took the dog food and placed it between wangcai and Xiaoxue.

Only then did the two of them quieten down and began to chew with crunchy crunching sounds.

Qin Lin continued, "I've written down the categories under these plates. In the future, we'll just have to produce them and sell them according to the pet types, ran ran."

Deng Guang and Kong Lin immediately went over and saw the words under the plate of dog food that their boss had just given to wangcai: Linlin dog food!

Under the next plate of Green Dog food was written: Linlin cat food!

Lin Lin rabbit food

Linlin

Linlin

Linlin's single dog-dog food!

" ? ? ? "when kong lin saw the last one, he revealed a dumbfounded expression.

"Chairman Qin, this Wanwan ..." Deng Guang also asked in surprise.

It seemed that there was no such pet as a single dog in the world. No, if there was such a creature as a single dog, it did not seem to be a pet.

"You've already eaten," Qin Lin explained with a smile, "humans can also be eaten!"

"Bi an" Kong Lin.

"ge ge" deng guang.

#### [Chapter 885 Which Heart Is The Most Important! 1](#)

Kong Lin and Deng Guang were stunned by Qin Lin's words, but they were speechless.

Because they had been eating quite happily just now.

This display of affection was indeed edible.

Chairman Qin, " Kong Lin even asked, " can we exchange some materials and make it into a pink heart-shaped one? then, we can create a Linlin couple-feeding food? "

"It's up to you. I won't ask." qin lin laughed when he heard this. this was actually a good idea.

However, since he was going to hand the company over to Kong Lin, he had to let Kong Lin maintain his own initiative.

If he had to report everything and wait for instructions, then what was the point of being in charge?

Kong Lin's face was full of joy when he heard Qin Lin's words. Since Chairman Qin had said this, it meant that he was the person in charge of the company.

"Chairman Qin, I will work hard." Kong Lin also hurriedly said to Qin Yang.

Qin Lin nodded and said, " you guys go back and prepare. Let's call the subsidiary company Lin Lin pet food company. I'll sort out the information and formulas and send them to you later.

" alright, chairman qin. we won't disturb you anymore. " Deng Guang nodded and led Kong Lin out of the workshop and out of the manor.

The subsidiary was affiliated with Linlin food company. As the head of the head office, he also had to prepare and adjust.

"Xiao Kong, congratulations!" Deng Guang said with a smile as soon as he got into the car.

"Many thanks for chief Deng's nurturing," Kong Lin hurriedly said.

Deng Guang shook his head. that's your own ability. Do well this time and don't let Chairman Qin down. As for the start-up capital of your pet food company, I'll ask director Chu to transfer one billion Yuan to you.

"Thank you, CEO Deng!" Kong Lin hurriedly expressed his thanks.

Deng Guang also took out his phone and called Chu Yue.

Although the health care company's development was due to the good products, Kong Lin and Chu Yue's efforts were also there.

Kong Lin had helped Chu Yue to build up the company. Now that Kong Lin had left to prepare for a new subsidiary, the health company had transferred one billion Yuan as the starting capital. It was like adding flowers to a brocade, and they had human relations.

Naturally, it was only possible because it was a wholly owned subsidiary of Linlin food company.

In addition, after Kong Lin left the health company, he also had to think about a new vice president candidate. He wanted to poach someone from the head office or from outside.

Although he didn't graduate from a regular business School and his ability was limited, he had been the person-in-charge of Linlin food company for so long that he knew some basic business principles.

Deng Guang brought Kong Lin to the headquarters. After dealing with a series of problems, Kong Lin returned to the health company very quickly.

As soon as he returned to his office, Chu Yue, the person in charge, came. director Kong, congratulations. 1 billion has already been transferred to the account the head office made for the new subsidiary.

"Director Chu, thank you!" Kong Lin also replied.

Chu Yue smiled and said, " no need to thank me. The development of the health company is also thanks to your auxiliary dispatch. Alright, I still have to write a document to apply for the right to use the new factory from President Deng.

After Chu Yue left, Kong Lin suddenly thought of something and immediately turned on his computer.

Inside was the application document that he had written before. He wanted to apply for two new factories to increase the production line of the health maintenance company.

Now, he decisively changed the document and changed the health company to a pet food company, and then sent the document to director Deng.

Linlin Pet Company needed to prepare a factory, and it would be a waste of time if they went outside to find a temporary factory.

When Deng Guang returned to the office, he saw Kong Lin's application. Kong Lin was going to start a new company, which had just started. Naturally, he would give his greatest support.

Therefore, he also gave his instructions directly.

This made Chu Yue, who had just finished writing the application documents, dumbfounded. The two new factories had already been applied for, and the application time was just recently.

This Kasaya

...

In the past two years, you city had developed very rapidly because of the emergence of Linlin villa, Linlin Ranch, Linlin company, and Linlin laboratory.

The first was the wave of workers returning to work.

Whether it was the Linlin company, the planting project in Linlin's laboratory, or the increasing number of tourists in Linlin villa and Linlin Ranch, all of these brought more and more jobs to you city.

tourists promoted the economy, and linlin company's salary was very good, which also promoted the overall salary increase in you city.

If other companies and factories did not increase their salaries, they would not be able to retain any talents. Therefore, they also began to increase their salaries.

Naturally, the salary increase now was different from the salary increase in the past.

In the past, a salary increase would definitely be a huge loss. You city's overall economic market was like that, but it was different now. Because of Linlin company, you city's commercial value and economic market were getting bigger and higher. At this time, a salary increase would not be a loss, but was necessary.

Those companies that still held onto their original intentions and refused to raise their salaries would soon be eliminated in this situation.

As the salary increased, the economic market expanded, and you city naturally developed better.

You city's ranking was getting higher and higher in the next batch of cities.

Moreover, with the construction of the new you city zone, you city would enter a new stage of development.

The new district was connected to the east side of you city. There was a special road that connected Linlin villa and Linlin Ranch. It could be said that the new district connected you city and Linlin villa as one.

In a sense, this was not just an expansion of the city's territory.

After Qin Lin drove out of Linlin villa, he drove towards a wide road in the direction of the new district.

## [Chapter 886 Which Heart Is The Most Important? 2](#)

Because you city had put in all their effort in the construction, after such a long time, the roads in the new district were basically completed. High-rise buildings and small communities had already taken shape.

Some of the faster companies had already built the residential area and started selling it.

The biggest problem in the new district was the sale of houses. People had to move in to create an economic market and maintain the city's functions.

However, to you Cheng, this wasn't a problem. He wasn't afraid of not being able to sell his house before, and he wasn't even afraid now.

Now, because of Linlin company, many people could afford to buy a house.

At least for the employees working at Linlin company, it was easy for them to buy a three-bedroom apartment of 80 square meters in you city with a down payment if they saved up a little.

The villagers who grew watermelons also hoped to buy a house in the city.

Also, because of the tourists from Linlin villa, you city benefited as a whole, and many people could afford to buy a house.

In addition, you city's economic environment was getting better and better. Many people who returned to work, as well as foreigners who were attracted here, wanted to buy houses.

Most importantly, the construction of the new district was more in line with the requirements of modern city planning. The environment of the community was better, the roads were more spacious and smooth, the facilities were better, there was the largest stadium, it was closer to Linlin villa and Linlin company, and the living and entertainment facilities were more complete.

Therefore, with all these conditions, the pre-sales of the houses in the new district were very good.

This was also the reason why Zhao moyun and a few of his friends had established an official company to contract the project after they had made money.

Zhao Mo Yun's company was called "Yun Xin Construction Engineering Co., Ltd."

Qin Lin didn't know the exact meaning of the company's name, but Yun should be Zhao moyun.

Yunxin Construction Engineering Co., Ltd. Had set up their own office in the new district. When Qin Lin arrived, he found that many cars were already parked downstairs.

Those cars were all good cars, and the BBA was the most basic.

Zhao moyun had already brought some people to entertain the invited guests. From this, it could be seen that he did have a wide circle of friends. At least, he did a good job.

Qin Lin was still driving the BMW 5 Series, so he didn't show off.

However, his appearance still attracted everyone's attention. After all, he had the identity of an internet celebrity, little Qin. Some people even analyzed how much he could earn in a month. Anyway, the analysis was clear and reasonable. They said that he could earn about 100000 to 200000 Yuan a month.

"He's that little Qin, President Zhao's brother-in-law!"

yes, it's him. I've seen him alive. It's great to be an internet celebrity. I heard that he can earn 100000 Yuan a month by doing nothing but feeding horses.

I heard that President Zhao's sister holds a high position in Linlin villa. That's why President Zhao's business is so successful!

"....."

Zhao moyun also saw Qin Lin and immediately went up to him."Qin Lin, you're here. Go and make some tea!"

He knew that Qin Lin didn't want to reveal his identity, so he welcomed him into the building immediately. There was another young man beside him, Guo Xin, who was also the other major shareholder of Yunxin Construction Engineering company.

When Guo Xin saw Qin Lin, his face was naturally filled with respect. He followed behind him cautiously.

He and Zhao moyun were partners now, so he naturally knew the true identity of Zhao moyun's brother-in-law. He was not some internet celebrity from Linlin villa, but the real boss of Linlin company.

He and Zhao moyun went upstairs, so the other guests would be taken care of by the other small shareholders. After all, none of them could compare to this person.

Qin Lin followed Zhao Mo Yun to a tea room upstairs.

his brother-in-law's company was doing very well and very organized.

Guo Xin had already tactfully gone to the side to make tea. After making a pot of tea, he respectfully poured a cup for Qin Lin and said,"Please have some tea, Chairman Qin."

"En!" Qin Lin nodded, then turned to Zhao moyun and said,"Brother, you're doing a good job with your company."

"It's all thanks to the information you intentionally revealed," Zhao moyun said with a smile.

At noon, Qin Lin left after having the opening banquet at Zhao moyun's.

As soon as he returned to the manor, he returned to his office and began to control his game character to complete his daily missions.

He was quite lucky today, as he had harvested tea leaves and a yellow pear tree.

After the daily tasks were completed, Qin Lin was greeted by Minister Lu.

"Minister Lu, why didn't you tell us you were coming?" Qin Lin pretended to complain when he invited Minister Lu into the office.

There was a middle-aged man behind Minister Lu. He wore a pair of glasses and a suit, which made him look elegant.

This was the first time he had seen such a person.

"Boss Qin, I just didn't want to trouble you with the arrangements." Minister Lu entered with a smile. He sat down and immediately introduced Qin Lin, "Boss Qin, this is Mr. Sun Zhenghe. He's a Chinese citizen of Singapore, and he's also a patriotic Chinese. He's one of the people in charge of a Chinese Chamber of Commerce,"

"Mr. Sun has made great contributions to many aspects of the country. The other party has also donated a huge amount of money each time there were several disasters in the country."

Sun Zhenghe also looked at Qin Lin. His eyes were filled with surprise, or perhaps shock.

He had actually heard of Linlin company's reputation in the Chinatowns of the starfish nation, and the effects of each of Linlin's products were even more incredible.

Of course, what made him feel the most relieved was that Linlin company had repeatedly sanctioned and banned the starjo and refused to license their products to their merchants.

Moreover, after investigating the development of Linlin company, he found it even more unbelievable that it was a company that had not even been established for three years.

But now, according to the outside world's predictions of Linlin company's potential, it would not be any worse than any domestic or even international super group in the future.

This was something that was impossible even in the Internet industry, which was known as the legend, but it had happened in real life.

It could be said that the person in charge of Linlin company was an extraordinary figure.

He had imagined the other party's invincible, domineering, or gentle and elegant appearance.

However, the young face in front of him had never thought of that.

"Boss Qin, it's a pleasure to meet you." Sun Zhenghe also immediately extended his hand to Qin Lin, showing his greatest respect.

"Mr. Sun, nice to meet you too." Qin Lin also shook hands with Sun Zhenghe in a friendly manner.

The fact that Minister Lu had personally brought Sun Zhenghe here and told him all this showed that Sun Zhenghe was a man of his word. At least, the higher-ups trusted him.

That was enough.

"Minister Lu, I wonder why you and Mr. Sun are here this time?" Qin Lin also asked in confusion.

Minister Lu and Qin Lin were familiar with each other, so he went straight to the point. Boss Qin, you should know that the star-law nation is very xenophobic and even targets our merchants. Mr. Sun's Chamber of Commerce has helped our foreign merchants a lot.

therefore, their Chamber of Commerce is also being targeted and it's difficult for them to advance. Your products can be of help to their Chamber of Commerce. Mr. Sun wants to be the agent for your products.

" of course, products like the linlin leisure tea can't be exported for the time being, but boss qin can still consider the hangover grass for hair and hangover. "

"Sure," Qin Lin immediately agreed.

He did not authorize the merchants from the star-sparred country because he did not like them, but that did not mean that he was not willing to take advantage of the star-sparred people and earn some foreign exchange.

Wouldn't it be great to be in the state of zide's will?

It just so happened that the higher-ups trusted this sun Zhenghe, so he was also happy to find a reliable agent in the xingtiao Kingdom and ruthlessly slaughter those guys.

The price might be higher than that of Germany, which was not worthy of their title as a capitalist country.

minister lu and sun zhenghe were both stunned when they saw qin lin agree so readily.

Especially Minister Lu, who had thought of many excuses to persuade boss Qin. Who knew that boss Qin would agree so easily, which made him feel that he was completely useless.

Minister Lu, Mr. Sun, shall we talk about the details? " Qin Lin said.

He could understand some things.

Some people on the internet often used nationality to talk about patriotism. This was true in most cases, but sometimes it was not necessarily correct.

After all, some celebrities were Chinese citizens, but they donated money, promoted, and flattered the Star-Spangled nation all day long just to suck up to Hollywood.

Some companies were also domestic companies, but they did things like acknowledging their fathers and disgracing the people of the country.

However, many Chinese seniors of the Starline nationality had shed their blood for their country overseas and made indelible contributions to the construction of their country. They had even given up all their wealth and even their lives.

Therefore, in this case, the bloodline and the heart in the body were the criteria for judgment.

Once a person disdained their own bloodline, their heart would be crooked. Even if they had a nationality, it was just A \*\*.

[Chapter 887 Why Does This Watermelon Have Three Colors?](#)

The discussion between Qin Lin, Minister Lu, and Sun Zhenghe was very pleasant. Qin Lin also called Deng Guang and Chu Yue. Whether it was the hot spring powder or The Hangover grass, the food company and the health company had to negotiate with Sun Zheng.

Deng Guang and Chu Yue also left Sun Zhenghe's office with him and went to the guest room in the villa to discuss the specific matters.

"Boss Qin, thank you for your support. Mr. Sun's chamber of commerce is very useful to us," Minister Lu said.

Qin Lin understood and didn't want to probe further, so he said, "Minister Lu, I understand. Let them discuss the details. We'll make tea.

As he spoke, he took out a quality 2 wild Tieguanyin and made a pot of tea for Minister Lu.

In the next two days, Deng Guang and Chu Yue had been discussing related matters with Sun Zhenghe and signed the contract.

As for the price of the hot spring elixirs, it was 20% higher than that of Germany.

They should treat the capitalist countries with the same price as them.

After that, Minister Lu left with Sun Zhenghe.

In the following time, Kong Lin's side also began to fully invest in the preparation of the pet food company.

From time to time, Deng Guang would bring Kong Lin over to report on the latest situation.

Other than that, Qin Lin was more relaxed. Other than staring at the game in his mind, he had nothing else to do.

...

Another few days passed.

It was close to noon.

As usual, Qin Lin was in the office looking at the virtual screen in his mind, controlling his game character. Suddenly, he heard a hasty voice. "Boss Qin, I've missed you so much."

He saw Li Kai walk in with a smile on his face. His face was full of confidence and pride.

In the past, he was just a scapegoat. He had no research results himself. He knew what was going on with the projects that were rumored to be his.

Therefore, he was very weak.

He even felt the weight on his back getting heavier and heavier when others praised him.

However, things were different now. He had his own research and the success of the low-temperature genetic technology. This was not any less than any of the blame he had previously taken.

With this low-temperature genetic technology, even if he had to bear all the blame, he would be able to keep his back straight.

Qin Lin was also surprised to see Li Kai. old brother li, your low-temperature genetic experiment is complete. Can it be put to use now? "

almost, " Li Kai explained. we've already performed genetic fusion for several summer crops and made them survive. This means that these summer crops can survive in the winter like Linlin watermelons. All we need to do now is to finish the work. We'll leave it to a few assistants.

"Congratulations, old brother li!" Qin Lin nodded.

"Old Brother Qin, you can't just congratulate me with your mouth. I've been eating plain food all this time," Li Kai said with a smile.

"I was planning to cook this afternoon. Brother Li, you came at the right time." Qin Lin smiled.

He stood up and walked out of the office to the kitchen.

Li Kai followed him with a happy expression.

He had only been focusing on his research during this period of time, and he really missed brother Li's cooking.

qin lin entered the kitchen. the chef saw him and asked, " "Boss, are you cooking today? What materials do I need to prepare?"

He knew that under normal circumstances, the boss would not come to the kitchen. Once he came to the kitchen, it was definitely to cook or to experiment with something.

"We're making the emperor's Supreme herbal dish today," Qin Lin said.

"alright!" Master Lin nodded and immediately ordered two apprentices to prepare the things.

After the two apprentices had prepared everything, Qin Lin also began to make the emperor's Supreme medicinal cuisine. After a set of smooth and natural operations, the emperor's Supreme medicinal cuisine was also ready.

However, he didn't stop. He continued to cook. Since he was already cooking, he wanted to make a meal for academician li and Lin Liu.

At the same time.

In Linlin Manor's plantation Department, Yu Shui had also brought people to the plantation area, where Linlin watermelons were planted.

The batch of high-quality watermelons that he had planted earlier was almost ripe. He had to bring people to confirm it and then pick the high-quality watermelons.

Some of these high-quality watermelons were to be sold at Linlin's sales center, while the rest were to be carefully packaged and shipped to the capital.

The high-quality Linlin watermelons were tribute watermelons, so they were different from the ordinary Linlin watermelons grown outside. Every batch of high-quality watermelons ripened, a batch would be sent to the capital.

For Yu Shui and the other employees in the plantation Department, it was easy to confirm whether a watermelon was ripe or not. They could tell by knocking on the watermelon skin.

"Pick two watermelons and cut them open to see!" Yu Shui ordered.

high-quality watermelons were the signature of the villa and also a tribute. naturally, he had to taste them personally. this was also his right as the manager of the plantation department. other members of the plantation department were forbidden from eating them secretly.

There were surveillance cameras all around. If they were caught, they would be fired.

The plant Department employees naturally didn't dare to do this kind of thing. Once they were fired, they would definitely not be able to find a better job than Linlin villa in you city.

" eh, manager, there's something wrong with this melon. " A plantation Department employee suddenly said in surprise.

"What's wrong?" Yu Shui walked over doubtfully. When she saw the planting department staff cut the melon, she was stunned for a moment, and her face also showed surprise.

What did he just see? The watermelon that was cut open actually had three colors.

### [Chapter 888 How Come This Watermelon Has Three Colors \(2\)](#)

a watermelon with three colors ... was there a problem with the watermelon?

"Manager Yu, there's something wrong with my melon too." Another member of the plantation Department said with a frown.

Yu Shui looked over and saw that the watermelon also had three colors of flesh.

This made his face a little ugly. He hurriedly picked two more watermelons and cut them open, but the meat inside still had three colors.

.....

in the kitchen of linlin manor.

After Qin Lin had finished preparing everyone's Emperor's Supreme medicinal cuisine, he asked someone to bring it out.

"I can smell it and I know that boss Qin cooked it himself." Academician Li said in surprise as he entered the restaurant.

"That's right, this medicinal smell is definitely made by boss Qin." Academician Lin also said.

A few academicians came to the table with anticipation.

The three girls were also pleasantly surprised when they smelled the medicinal fragrance.

Only boss Qin could make this kind of herbal dish. They didn't think any other chef could make such delicious food.

Li Kai was already eating with great relish.

To tell the truth, the so-called sumptuous meals he had eaten when he was in seclusion in the laboratory were simply like pig's feed compared to the medicinal cuisine prepared by old Brother Qin.

Qin Lin sat down and was about to eat some Medicinal Food with Li Kai when Yu Shui rushed in. Boss, professor Li Kai is here too. I have something to tell you. Those high-quality watermelons seem to have mutated again.

"What's wrong?" Li Kai stopped talking and asked.

Academician Li and the others also subconsciously looked over.

The mutation of the watermelon ... This must be some kind of research that professor Li Kai was doing, right?

Qin Lin knew what was going on subconsciously. If Yu Shui hadn't come to report to him, he would have almost forgotten that the three-colored watermelons had ripened.

Previously, he had excavated a special seed stone in the lake mine and exchanged it for these three-colored watermelon seeds. After that, he had found an opportunity to mix those seeds with the quality 2 watermelon seeds. This way, no one would notice.

Now, the tricolor watermelon had ripened.

Moreover, the three-colored watermelon not only had three colors, but also three flavors.

A watermelon with three different flavors was definitely very magical.

"What happened?" Li Kai asked hurriedly.

Yu Shui hurriedly explained, "I brought someone to collect watermelons today. I took a watermelon and opened it to try. I found that there was more than one color in the watermelon flesh. There were three colors in total. And it was not just one color. Many watermelons were like this.

Three-colored melon meat?" Li Kai was a little surprised.

Academician Li and the others were a little curious.

How could the same watermelon have three different colors of flesh? Unless there was something wrong with the melon, or it was rotten.

After all, it was impossible to graft the watermelon meat.

However, that was not right. If it was rotten, it would be understood as one or two. If there were a lot of them, it would be a bit wrong. It couldn't be that many of them happened to have three colors, right?

"Let's go and take a look!" Li Kai couldn't care less about the herbal cuisines. After all, he was also a scientific researcher in the traditional sense. His low-temperature genetic experiment had been carried out on Linlin watermelons.

now that the linlin watermelons had mutated again, he would always subconsciously link it to his low-temperature genetic experiment.

The group of people also directly left the manor.

Ma Hong saw that the academicians were leaving the mountain villa, so he quickly followed them.

qin lin also called chen dabei and asked him to bring some people over to maintain the security.

After all, there were six academicians and three big academicians. If something happened to these seniors, it would definitely be a big deal.

...

Linlin Manor's plantation was much larger than it was in the beginning.

Even if it was just the watermelon planting area, it was also boundless.

By the time Qin Lin, Li Kai, and the six academicians arrived, Ma Hong had already spread out his men to guard the area. Chen dabei, on the other hand, had brought security guards to guard the area.

Chen dabei knew the importance of the six academicians, so he only called the elite veterans of the Special Forces and the villa.

With the identity of these six academicians, it wasn't too much to do anything about their safety.

yu shui had already walked over to the planting department staff and brought two cut watermelons to qin lin and the others. " " boss, professor li kai, look. this is the watermelon. "

Li Kai took the melon and found that it had three colors, and it didn't look rotten at all.

Academician li and academician Lin were surprised. This was the first time they had seen three distinct colors.

Moreover, the three-colored regions of the two watermelons were evenly distributed. They were not random at all, as if they had always been like this.

this watermelon seems to be a little magical. Academician Hao stepped forward and said.

"It's indeed magical, but I don't know if it can be eaten." academician fei also said.

Academician li took half of the watermelon and sniffed it. He was surprised. this is the smell of fresh fruit. It's not rotten.

Li Kai didn't hesitate when he saw the magical tri-colored watermelon. He took out his phone and called Linlin's laboratory, asking his assistant to bring some testing equipment over.

He put down his phone and asked Yu Shui, " "Can you tell which watermelons have this kind of tri-colored color and which ones don't?"

Yu Shui nodded. yes. The vines that grow these three-colored watermelons are thicker, and the leaves are bigger. The leaves are also divided into three corners!

As the person in charge of the plantation Department, he was very good at plant cultivation. He had already observed it when he went to report to the boss and professor Li Kai.

Li Kai nodded and started searching the watermelon fields according to Yu Shui's instructions.

He picked a few watermelons and cut them open. As expected, they were all three-colored watermelon flesh.

The other watermelons around him were just the original red flesh.

It didn't take long for Linlin's laboratory to send over the testing equipment.

The first thing Li Kai did was to take the tri-colored watermelon and test it with the equipment. The first thing he had to do was to make sure that the watermelon did not contain any harmful substances.

If it was confirmed that there were no harmful substances, the watermelon was basically edible.

Li Kai was an expert in the field of plant cultivation, so it was very easy for him to detect whether the watermelon had any harmful substances.

After some time, he managed to detect ten different three-colored watermelons. &Nbsp;

Moreover, he quickly came to a conclusion. this watermelon doesn't contain any harmful substances to the human body. Moreover, it's very fresh and can be used directly.

also, these watermelons seem to have two grades because they contain different ingredients. You'll only know after eating them.

Of course, Qin Lin knew this would happen. The three-colored watermelon was edible, and the two levels meant that a quality 2 seed would degenerate to a quality 1 seed after being planted.

However, when a Grade 2 seed was planted, there would always be lucky ones who could adapt to the geographical environment and maintain the grade 2.

In that case, when cultivating seeds, he could only plant quality 1 three-colored watermelons from the quality 1 seeds. If he collected quality 2 seeds that had adapted to the soil environment in the real world, he would be able to plant quality 2 three-colored watermelons.

However, he couldn't say this out loud, so he immediately ordered Yu Shui, " in that case, cut out a few watermelons and let everyone have a taste of this new watermelon.

Naturally, there were three different flavors. Old brother li and academician li would be shocked after eating it.

In a moment, Yu Shui had cut the watermelons into pieces and brought them in front of everyone. Moreover, each piece was cut to a very high standard, and there were three flavors of watermelon meat on each piece.

Li Kai immediately picked up a slice of watermelon and placed it in his mouth, biting down on the red meat.

The red watermelon meat was very delicious, but it was no different from the Linlin watermelons.

Li Kai took another bite of the yellow melon meat. However, when he swallowed it, he was stunned for a moment. He said in disbelief, "Banana flavor?"

#### [Chapter 889 The Kappa Is A Little Anxious?](#)

Li Kai was really stunned for a moment. He tasted banana from eating watermelon?

He immediately took another bite of the same-colored melon, and as expected, the banana taste filled his mouth again.

It was true.

The watermelon started to taste like a banana.

at this moment.

professor Li Kai, "academician Li said in surprise, "this watermelon actually has three flavors. The watermelon you're researching is amazing!

that's right, "academician Lin chimed in. this is the first time I've had three flavors of the same watermelon. No wonder it's three colors.

"Professor Li Kai is amazing!" academician hao said.

When Li Kai heard this, he felt a little embarrassed. This really had nothing to do with him. Fortunately, he had taken the blame many times, so he really did what he wanted and did not expose himself.

However, he was a little puzzled this time. The previous crop mutations were due to special soil, but there was no special soil at all in the planting site this time.

But now, these watermelons had mutated, and even turned into such special watermelons with three colors and three flavors. &Nbsp;

This was even more impressive than relying on special soil to undergo genetic mutation.

Could it be that there was a chance for crops that had been mutated in special soil to mutate again?

If that was the case, then it was really amazing.

maybe after the low-temperature genetic technology was released, he could do some research on it and see if he could come up with four, five, six, or even seven colors.

In the future, the watermelons would no longer be just watermelons.

Li Kai also took a bite of the third-colored melon meat and chewed. He immediately felt a sweet peach flavor.

in addition to the original taste of the watermelon, the watermelon also had two flavors, banana and nectarine.

In other words, eating this watermelon was equivalent to eating three kinds of fruits.

The main point was that the banana and peach flavor of this watermelon was different from normal bananas and nectars. This was because the watermelon meat was still watermelon and watermelon juice, but the taste was still banana and peach.

This was another experience different from the banana and nectarine.

eat watermelon and enjoy the taste of the three fruits! "Boss Qin, it seems like your Linlin laboratory is going to produce another popular product," academician Li said.

Qin Lin nodded.

He had known about these three smells for a long time.

Moreover, putting aside the fact that the watermelon was as delicious as the Linlin watermelon, now that it had three colors and three flavors, it was a very big gimmick.

Anyone who saw such watermelons for sale would buy them out of curiosity.

Once the three-colored watermelons were planted, it would be difficult for them not to become popular.

Qin Lin thought of a problem and asked Li Kai, " old brother Li, can the low-temperature genetic technology be used on which three-colored watermelon is this? "

Unlike Linlin watermelons, the three-colored Western watermelons did not have a seasonal attribute.

Therefore, the tricolor watermelons could only be planted during this season. After that, they would be like normal watermelons, which could not be planted without using greenhouse technology.

"There's no problem in theory, but I'll have to go back and try it out!" Li Kai explained.

"En!" Qin Lin nodded.

After that, they tried some watermelons. In the end, Ma Hong sent the academicians back.

Li Kai took a few watermelons back to Linlin's laboratory.

No matter what, the watermelon had mutated again. He had to test it to see if he could find the cause. Similarly, he had to try to verify the low-temperature genetic technology that Brother Qin had mentioned on the watermelon.

This way, he could maximize the benefits of the watermelon.

After all, he also had 10% of the laboratory's shares. He couldn't let Brother Qin down after taking these shares for free, could he?

Qin Lin also returned to the inner area of the manor with a few watermelons.

The colors of the skin of these watermelons were different. One was lighter in color, while the other was darker.

He felt that this should be the difference between quality 1 and 2.

When he brought the watermelons into the game, he immediately saw their attributes:

[ three-colored watermelon: Grade 1! ]

[ this is a special type of watermelon. It has mutated due to a special seed stone and has three flavors: [ deliciousness +1, sweetness +1, texture +1, aftertaste +1! ]

[ three-colored watermelon: quality 2! ]

[ this is a special type of watermelon. It has mutated due to a special seed stone and has three flavors: [ deliciousness +2, sweetness +2, texture +2, aftertaste +2! ]

There were indeed two grades, and just as he had guessed, the darker color was Grade 2.

After confirming, he called Yu Shui to ask her to come over.

Yu Shui came to the manor as soon as she received the call. "boss, what's your order?"

Qin Lin immediately ordered, " use all the three-colored watermelons for future use. The ones with deeper skin are the high-quality ones, and the ones with lighter skin are the ordinary ones. You can distinguish them clearly when the time comes.

"Okay, boss, I'll arrange it now!" yu shui left as soon as she received the order to make the arrangements.

He didn't dare to delay his boss's order.

After Yu Shui left, Qin Lin turned his eyes back to the game screen in his mind. He controlled his game character to go to the beach to fish, but they were all common grade 2 fish, and there were no special fish.

The next day.

li kai arrived at linlin villa early in the morning, his face full of surprise. " Brother Li, I did a test last night and found that there are several strange plant genes in the tricolor watermelon. It is because of these strange genes that a watermelon can have three colors and three flavors.

#### [Chapter 890 The Kappa Is A Little Anxious \(2\)](#)

if this genetic code can be deciphered, it can be used on other crops in the future. Not only can watermelons have three colors and three flavors, but cantaloupe and winter melon can also be deciphered. If it can be used on rice, it's not impossible for rice to produce rice with three flavors!

however, I've tested those genes and found that it should be very difficult to decipher them. Therefore, I'm going to recruit two more experts in this field.

"Okay, I'll get Shen Li to cooperate with you." Qin Lin said with a smile. He could see that brother li was very excited when he talked about the research, even with Great Expectations.

However, he also thought of something and immediately said, " old brother li, this tricolor watermelon isn't seedless. If we promote it in the future, it'll be difficult to control the source. Is there any way to control it? "

Li Kai answered the question without hesitation, " Brother Qin, that's easy. We just need to change the size of the watermelon. It's not a problem for our laboratory. However, I need to get the seeds first. Then, I'll apply the low-temperature genetic technology on the tricolored watermelon. After that, I'll change the size of the watermelon.

"Okay, then I'll have to trouble you, old brother li," qin lin nodded, feeling relieved.

Half a month later.

Yushui had also completed the breeding of the three-colored watermelon. They had collected the seeds and informed Qin Lin.

Qin Lin also gave all the seeds to Li Kai.

After obtaining the seed, Li Kai once again entered seclusion. Due to the completion of the low-temperature genetic experiment, he was now full of enthusiasm for research.

The success of the low-temperature genetic experiment didn't bring him achievements, but the confidence in his research.

This kind of confidence allowed him to be confident in any crop-related experiment.

Sometimes, scientific research required this kind of confidence.

After handing over the tricolor watermelons to Li Kai, there was good news from Kong Lin.

During this time, the new factory's production line had arrived, and one of the production lines had been calibrated to produce the first batch of dog food.

"Boss, have a taste of this dog food!" Kong Lin also sent the dog food that had been produced to Qin Lin as soon as possible.

These dog foods were all wrapped in exquisite packaging, and there were different types of products written on them. Dog food, cat food, pig food, and single dog food were clearly distinguished.

After Qin Lin kept the dog food, he chatted with Kong Lin for a while before Kong Lin left. After all, there were a lot of things to do in the new subsidiary, and it was enough to keep him busy.

Qin Lin locked the office door and entered the game with the dog food. Then, he saw the information of the dog food.

[ linlin dog food: quality 2 ]

【.....】

[ linlin cat food: quality 2 ]

【.....】

[ Linlin pig food: quality 2 ]

【.....】

...

[ Linlin's single dog food: quality 2 ]

【.....】

Obviously, the dog food produced by the pet food company was in a qualified state and had a quality of 2.

This also made him feel at ease.

Now, they just had to wait for the Linlin dog food to be completely sold.

Qin Lin exited the game and sat down on the office chair. Then, he looked at the game on the screen in his mind.

He had completed his daily quests for the day, so he planned to control his character to head to ore town as usual to see if there were any plot quests.

The rewards for plot quests were usually more abundant.

His luck today seemed to be quite good. Before he could control his character to go out to the farm, he saw Thomas, the village chief, appear at the gate of the farm.

Usually, this person would come with a plot mission, and the reward would be very generous.

qin lin immediately controlled his character to go to thomas's place. when facing such a big boss, he had to be more enthusiastic and welcome him as soon as possible.

The game character appeared in front of Thomas, and with a click, a conversation immediately appeared.

[ that's great. You're at the ranch. I'd like to ask you for a favor. The river in the town has risen recently and is a little turbid. It doesn't seem to be a good situation.

There's a legend in our ore town that a Kappa lives at the source of the town's River on Mount Saint missus. The abnormality of the river water may be related to the Kappa. There's also a record in the town that the Kappa likes cucumbers.

[ I would like to ask you to plant some cucumbers. Go to the source of the river on Mount Saint missus and throw the cucumbers into the river every day. If there's a Kappa, it will accept the cucumbers. If the Kappa is happy, it may get a gift! ]

When Qin Lin saw Thomas's conversation, he thought of the story of the monster of the farm.

the story of the farm " was a semi-fantasy farming game. There were many fantasy colors in the game, such as the goddess and the dwarves.

The Kappa was also a mythical being, and it was also a female, just like the goddess.

In the male version of the story of the farm, players could not only control their game characters to make goddesses their wives, but they could also make River children their wives.

Being a wife was literally a marriage in the game.

Of course, under normal circumstances, players could also get a lot of gifts from the Kappa. In the old version, there were things like the fruit of the strength tree, the fruit of the agility tree, and so on.

He didn't know what was in the new version. After all, it was a new plot.

[ are you willing to help? Who was it? [ no? ]

Qin Lin directly chose "yes."

This was actually a Hooligan's question.

Could the players still choose no?

After making the choice, Thomas's conversation appeared again:
