

The Game 901

[Chapter 901 It's Impossible To Go Home And Inherit The Family Business](#)

"I wonder how this Linlin villa was built."

"....."

When Chu Ye heard his friends' words, he subconsciously nodded his head. He even said, "I've decided. I'm going to apply to be a staff member at Linlin drifting!"

"What?" Friend 1.

"? ? ?" Friend 2.

"Wanwan" friend 3.

His friends were stunned when they heard Chu Ye's words.

Are you kidding me?

You're a great young master, yet you want to be a staff member at Linlin drift?

Chu Ye said very seriously, "there must be a reason for the atmosphere of Linlin drifting. As long as I can get in and figure it out, it will be beneficial for my drifting project in the future."

"What if you can't figure it out?" a friend asked, stunned.

"Yeah, I haven't figured it out yet." Another friend said.

They never thought that Chu Ye would fall into the trap just like that after two rounds of drifting.

This was a bit of a pain in the ass.

Chu Ye continued, "if I can't figure out the way to do this after half a year, it means that I can't create the perfect drifting. I will go home and inherit the family business."

His friends looked at each other when he said this. Two of them had a look of anticipation in their eyes. After all, they had received benefits from Chu Ye and had to keep an eye on him. After all, Chu Ye's parents really wanted Chu Ye to go back and inherit the family business. Otherwise, they would not have used the method of finding Chu Ye's friends.

It would be great if Chu Ye was still unable to figure out the ins and outs of Linlin drifting in the next half a year.

Chu Ye did not hesitate. After taking a shower and returning to the hotel, he began to prepare his information and resume. Most of his resume was related to drifting, so he believed that he would be able to get the job.

Moreover, he logged into the official website of Linlin villa and found that they were planning to recruit more people because of the popularity of the drifting project.

The first thing he did was send his resume to Linlin villa, and then he began to wait for news.

What Chu Ye did not know was that at this moment, in the Linlin villa restaurant, the young master of a foreign company, lasda, had the same thoughts as him.

lasda also planned to learn the cooking skills of linlin villa in the time he had set, or he would go home and inherit the family business.

Linlin Manor Restaurant was very famous in the restaurant industry.

When it was only Master Lin, the restaurant was already very famous because of the Emperor supreme set meal made with those ingredients and the quality 1 ingredient.

After that, there was a 13-star Michelin chef, lasda, as the head chef. Not only did the emperor's supreme set meal made with quality 2 ingredients taste better than Master Lin's, but even the dishes made with ordinary ingredients were far better than Master Lin's.

Moreover, after lasda learned Chinese food, he was very good at both Chinese and Western food. The key was that he was also very diligent when he was a head chef. Qin Lin asked him to train chefs, and he did so with great care. The original ordinary chefs had greatly improved their cooking skills after his training.

In addition to the restaurant's renovation, Linlin restaurant would definitely rank among the high-class restaurants even if they didn't have the quality 1 and 2 ingredients.

With the supply of quality 1 and 2 ingredients, there would be almost no restaurant in the country that could compare to Linlin villa.

When lasda invited Qin Lin to the restaurant, he remembered that after this guy entered the Linlin villa restaurant, he almost didn't care about him except for the usual quality 2 dishes.

When Qin Lin and Master Lin entered the kitchen, they saw the chefs standing in two neat rows in their work uniforms.

Lasda was talking about something. Seeing him enter, he went up to him. "Mr. Qin, you're here!"

"mr. lasda," qin lin asked with a smile, "i suppose there's a reason why you've invited me here today?"

Mr. Qin, I've been teaching these chefs for so long, " Rasta explained hurriedly. most of their cooking skills have definitely reached the level of a three star Michelin chef. I wanted you to test them out today.

then, he shouted to the chefs, " " you can start now. don't let me down. "

Hearing lasda's words, the other chefs didn't hesitate and immediately started to act. After learning from lasda for so long, they had a lot of respect for this head chef.

After all, what lasda had taught them was true skill, and they had really learned something.

No matter what profession one was in, true ability was the most important condition to be respected.

Qin Lin could also see that these chefs were indeed different from before. Whether it was putting the pan, shaking the pan, or controlling the heat, every step was very skillful. They were much better than before.

Soon, the dishes were all ready and placed on the platform in front of them.

"Mr. Qin, please check!" Lasda immediately extended an invitation to Qin Lin.

Qin Lin also nodded. He picked up the chopsticks and tasted the dishes one by one. He had to admit that the cooking skills of these chefs had indeed improved a lot.

"Mr. Qin, what do you think?" Lasda asked.

"Yes, Mr. Rasta has put in a lot of effort." Qin Lin also nodded in praise.

The taste made by these chefs was probably better than that of ordinary chefs. Even if the ingredients were not taken into account, the cooking skills of many chefs had surpassed that of Master Lin, who was an experienced chef.

Lasda hurriedly asked, "Mr. Qin, it's been a long time since I've eaten the dishes you've cooked. Can I treat you to another meal?"

[Chapter 902 It's Impossible To Go Home And Inherit The Family Business](#)

He asked Mr. Qin to test the chef because he wanted to invite him to cook and then secretly learn again.

It had been so long, and he had followed Mr. Qin's steps, but he still couldn't make that kind of taste. He had also wasted so many ingredients. He felt that he must have made a mistake.

Now that he had proven that he had taught these chefs diligently, he could make this request.

Qin Lin naturally knew what Lasda was trying to do, but he didn't care. Without the system, if he could learn it, he would be more powerful than a cheat.

Then, he had Lasda bring out the ingredients and made an Emperor's Supreme medicinal cuisine in front of him. This Emperor's Supreme medicinal cuisine was of a higher grade than the previous ones.

In addition to his special medicinal cuisine cooking skills, it had reached a quality of 3, deliciousness +3, texture +3, special medicinal fragrance +2, special taste +2.

After Qin Lin started cooking, Lasda watched very seriously and even took out his phone to take a picture. The other chefs around him also watched attentively.

They also knew that their boss was a very good cook, but their boss rarely cooked, so they didn't have many opportunities to see him.

He couldn't miss such an opportunity.

Before the Emperor's Supreme medicinal cuisine was even served, a unique medicinal fragrance filled the entire kitchen.

Just this medicinal fragrance alone was enough to make those chefs apprehensive. They really couldn't believe that the dish had such an irresistible medicinal fragrance before it was even out of the pot.

It was too unbelievable.

Lasda's expression was extremely unsightly. This medicinal fragrance was clearly even stronger than before. Could it be that this Mr. Qin had not used all his strength before?

With this guess in mind, when the emperor's Supreme medicinal cuisine was ready, he hurriedly picked up his chopsticks to taste it. His eyes widened when he swallowed the medicinal cuisine.

As expected, it was even more delicious.

However, he had also suffered a blow because he hadn't made any progress during this period of time. He couldn't make the same taste as Mr. Qin had made last time. Who knew that Mr. Qin hadn't even used his full strength before?

Why did this Mr. Qin's dishes improve every time? how many layers had he been hiding?

This was a blow to him.

Qin Lin finished making the herbal dish and left after exchanging a few words with lasda.

After that, lasda didn't hesitate. While his memory was still fresh, he started making the emperor's supreme set meal with the recorded video.

He followed Qin Lin's steps and did it almost at the same time as in the video. However, after one night, he had almost finished all the ingredients given by Qin Lin. However, he was disappointed to find that his cooking skills had not improved at all. It was still the same as before, let alone making the same herbal dish as Mr. Qin.

"Why is it like this?" lasda's face was filled with dejection. the most unbearable thing in the world was when the other party had shown everything in front of you, but you couldn't learn it at all.

"Do I really have to go back and inherit the family business?" Lasda's face was filled with unwillingness. The two years he had set had already passed so long.

He shook his head in a hurry. It was absolutely impossible for him to go back and inherit the family business in such a sorry state. Then, he studied the video on his mobile phone again until he couldn't hold on any longer and fell asleep.

On the other side.

Chu Ye had already woken up early in the morning. He opened his email and immediately saw the notice from Linlin villa that he had been accepted to interview for a position in the Linlin River Project.

After receiving the email, he excitedly said to his friends, " that's great! Linlin villa has informed me to apply for a job. You guys can go back first this time. I'll see you again in half a year's time. That's when I'll start building the world's number one drifting.

Chu Ye was very confident. He would definitely not return to inherit the family business after half a year.

[Chapter 903 The Evil Linlin Company Can't Let People Eat Dog Food?](#)

A new day had arrived.

The Linlin villa was still packed with tourists.

Many tourists followed the signs to the parking lot where they would take the drifting project.

There were two ways to get to the starting point of drifting from the mountain villa. One was to take a tour bus up the mountain, and the other was to take a sightseeing train.

The drifting program was becoming more and more popular online. Everyone knew that Lin Lin was the number one drifting, and more and more tourists who had played Lin Lin drifting expressed that the atmosphere was really good. It could make people silently immerse themselves in it, forget their troubles, and only have the joy of playing in the water.

If one person said it, it would be undetermined. If two or three people said it, it would still need careful consideration. If ten people said it, it would need to be observed. If everyone said the same, it would be the truth.

Therefore, which tourist who came to Linlin villa would not want to experience the rumored magical drifting?

Now, the most popular thing in Linlin villa was not the sea of flowers, the floating bridge, or the Linlin Ranch, but Linlin drifting.

Those who had played Linlin drifting once would definitely aim for the drifting event the next time they came.

after all, the two +3 attributes were not something that other events could compare to.

however, when the tourists arrived at the parking lot today, they found that there was a big screen there, and there was even a number on it.

That was the remaining number of drifting tickets sold each day.

"Linlin drifting's quota has been reached."

"There's actually more than half that needs to be reserved online!"

" it can't be helped. lin lin is too popular right now. "

"....."

That's right, Linlin drifting had set a limit and was only accepting 3000 people a day.

With the popularity of Linlin drifting, the number of visitors to the Linlin drifting project became extremely crowded every day. Many of them waited until dark and still could not get in line.

Therefore, there was no choice but to limit the traffic. Besides, the online reservation was also to prevent too many people from crowding around the drifting event.

It was overcrowded and not safe.

even so, the drifting project only entertained 2000 people a day, but it had increased to an additional 3000 people, which was why the drifting project needed to recruit more employees.

Linlin Manor.

Zhao moyin walked into Qin Lin's office and handed him a list of names. hubby, take a look at the list of new applicants. There's still a talent.

Zhao mochen's stomach was already starting to get bigger. Lin Fen didn't want her to go to the villa again. After all, she was carrying the Qin family's heir in her stomach and was afraid of accidents.

However, Zhao Moyu couldn't stay idle, so he had no choice. Under Lin Fen's strong request, he could only arrange an office for her in Linlin Manor.

Qin Lin took the name list. This was the new employee of the drifting project. He had also seen the talent that Zhao moyin had mentioned. The person was called Chu Ye, which was only one word different from the person in charge of their health company, Chu Yue.

Chu Ye was very familiar with drifting, and his resume was basically related to drifting. The key was that he had graduated from Harvard University.

It was somewhat inconceivable that a top student from Harvard University would apply to be an ordinary employee of the drifting project.

No one would do such a thing.

Could it be that he had fallen into drifting's trap, so he suddenly applied for the job?

Qin Yu felt that this was a possibility, so he said to Zhao Mo, "Is talent not good? Since the other party is so familiar with drifting, he might be able to bring some benefits to our drifting project."

Zhao Moyu also nodded.

The drifting project had nothing to do with the core of the villa. If the other party wanted to apply, then so be it. This kind of talent should only be playing around and would leave soon, as long as nothing happened.

If the other party had the intention to be promoted, he would not mind giving such a talent a chance.

Moreover, Linlin villa was now qualified to recruit such a talent.

time passed.

In the blink of an eye, another half a month passed.

The news about Lin Lin's drifting on the internet had also calmed down, but everyone had already heard of Lin Lin's name.

in the forums and various chat groups regarding drifting, whenever people talked about which drifting was the most fun, the person discussing it would definitely be lin lin drifting.

The popularity of Lin Lin drifting had passed, and naturally, those celebrities who sold alcohol, live streamers who worked for their families, and positive internet celebrities were all relieved.

To be honest, they were a little afraid of Linlin villa, which was always on the hot search news and dominated the screen.

At this time, everyone's attention was focused on Linlin villa. Their attention was obviously reduced. In addition, the traffic was given to Linlin villa, so their traffic was also significantly reduced.

They relied on traffic to make a living.

But what could he do? linlin's company was just that evil.

The key was that everyone knew how powerful Linlin company was. It would soon become a super giant. Which of these celebrities and internet celebrities would dare to stroke the Tiger's whiskers? Unless they thought they were dying too slowly.

However, before they could breathe a sigh of relief, a dog and dog food suddenly appeared on the hot search. Moreover, this dog and dog food were both from Linlin company.

This Kasaya

...

Zhe city.

In a small district.

Yu Lin was holding a kettle and watering a few pots of purification grass in the room,

When he had gone to Linlin villa, he had not been able to buy the first batch of purification grass online. After that, Linlin laboratory had issued several orders for purification grass, and he had managed to buy a few pots.

Just these few pots of purifying grass were much more powerful than the air purifier.

The air quality in the house was very good every day, and people were in a good mood.

At this moment.

Yu Lin heard his girlfriend shouting, " "Hubby, Bebe's food supply is running out. Remember to buy a few bags online. I want branded ones. They're guaranteed."

[Chapter 904 The Evil Linlin Company Can't Let People Eat Dog Food?](#)

Bebe was a dog, and he had to regularly order dog food for him.

"I know." Yu Lin nodded, put down the watering can, and opened the refrigerator. There was Linlin tomato sauce, Linlin leisure tea, Linlin medicinal drink, and Linlin hot spring powder.

He and his girlfriend were now loyal customers of Linlin company. After taking a bottle of Linlin leisure tea, he sat on the sofa and prepared to go online to buy dog food.

As soon as he took out his phone, Yu Lin saw a notification pop up on the screen: the linlin manor you're following has an update.

There was a new video on the official account of Linlin villa.

As a loyal customer, he naturally put the matter of buying dog food aside. He first opened mouyin and checked the official account of Linlin villa.

Sure enough, a video was updated, and the video surprised him. He saw a dog eating dog food happily.

This dog was Linlin villa's internet celebrity dog, Wang Cai.

One could see that Wang Cai was happily eating the dog food in the basin. Even its eyes were squinted. It could be seen how much the dog was enjoying it.

To Yu Lin's surprise, after wangcai finished the plate of dog food, it ran to the side and opened a cabinet. It bit out a bag of dog food and handed it to the person who recorded the video, apparently to let him open it.

The person who recorded the video naturally opened the dog food and poured the new dog food into the bowl. Wangcai started to eat happily.

At this moment, a slogan popped up on the video: wangcai personally tasted the dog food that it likes. It's honest with the old and young.

"did wangcai accept the dog food advertisement?" Yu Lin was surprised.

The internet had already said that wangcai had 25 million fans. Many dog food businessmen wanted to hire wangcai to endorse their products, but Linlin villa had rejected them.

He didn't expect that Linlin villa would still accept the endorsement for wangcai.

"Something's wrong!" Yu Lin took a closer look and clearly saw the words on the bag of dog food: Linlin-dog food!

It turned out to be Linlin company's own dog food?

Linlin company was producing dog food?

This was a shocking discovery.

This was the brilliance of this advertisement.

When Kong Lin found Lin Lanzi, she deliberately didn't say that this was Linlin-dog food in the video so that the person watching would discover it for themselves and be surprised. Only then would they remember it deeply.

With this discovery, Yu Lin shouted to his girlfriend as if showing off, " "Honey, Linlin company is selling dog food. Let's buy some dog food from Linlin company for Beibei!"

Upon hearing this, a slim woman walked out from inside. "Let me see."

She sat next to Yu Lin and was also very surprised to see the video. She immediately said, " "Then buy it. What are you waiting for? see how wangcai is eating?"

Yu Lin didn't hesitate. He immediately clicked on the video and began to order online.
on the internet.

Many people, like Yu Lin, had seen the video of Wang Cai and dog food. Some of them were official accounts with more than 30 million fans from Linlin villa, while some were dog accounts with more than 25 million fans from Wang Cai.

This attracted the attention of many people.

Firstly, Wang Cai was a famous dog.

secondly, linlin villa was more famous, and linlin drifting's popularity had just passed.

Third, Linlin company's products had always been high-end. This time, they suddenly released a dog food, so it was difficult not to attract attention.

Therefore, as soon as the video of the dog eating dog food and endorsing dog food came out, it became a hot topic in a short time. Moreover, as the number of followers increased, more and more dog owners tried to order Linlin-dog food, and the video quickly became a hot search.

with the hot search, more and more people paid attention to it, and they couldn't help but be curious about linlin-dog food. after all, everything in linlin's company was never simple.

At an internet celebrity company.

Brother Yi finished signing a contract and picked up his phone with a smile.

He was in charge of bringing in goods to sell clothes. Previously, he had already started preparing for a batch of clothes to bring in goods. They were all cheap clothes made by the factory he had contracted.

However, these cheap clothes that were sold for more than 30 miles could be sold for more than 300 miles in the live broadcast room.

to be honest, this was definitely a huge profit.

This delivery was supposed to take place a week ago, but Linlin drifting's popularity was outrageous. If he were to engage in an on-behalf purchase at this time, the popularity and traffic would definitely be suppressed.

That was why he was dragging things out. Now that Lin Lin drifting's popularity had dropped, it was time to start.

For this reason, he even invited a martial arts star, brother Zhao * Zhuo, to shoot a video with him. This could increase the popularity and attract traffic.

Now, he just needed to find brother Zhao and shoot a video together. Then, he could start the live broadcast.

After brother Yi took his phone and sat down, he started to scroll through some audio and video. As an internet celebrity, he should pay attention to the hot news on the internet.

He had only watched two videos before he saw the video of Wang Cai and dog food posted on the official account of Linlin villa. Moreover, the video was very popular, with more than 500000 likes.

After two more videos, he saw a video from wangcai's private account, which was still about dog food.

"what the hell?" Brother Yi frowned. He was a little jealous as he watched the video. After all, he had so many fans for a dog. The key was that half of his fans were actually paid for.

But this wasn't important. What was important was that this dog food wouldn't also explode the traffic pool and dominate the screen, right?

He had just spent a large sum of money to hire brother Zhao.

"Impossible, it's just dog food, not something for people to eat." Brother Yi hurriedly shook his head.

Linlin company was awesome, but if their dog food could dominate the screen, he would f * cking quit the internet.

[Chapter 905 The Evil Linlin Company Can't Feed People With Dog Food?](#)

but what happened next really made yi ge, and even those celebrities who were preparing to sell wine and the internet celebrities who brought the goods, a little dumbfounded.

Overnight, Linlin company's dog food was even more popular, because there were too many dog owners ordering dog food online.

Linlin company's past products and reputation made many dog owners choose to believe in Linlin company's dog food and buy it one after another.

This was also one of the sources of online popularity.

In Linlin pet food Co., Ltd., After the dog food began to order online, Kong Lin was completely busy. He was in charge of a subsidiary company, so the pressure was great.

however, the online ordering of dog food was surprisingly good, which made him feel slightly relieved. he also had some confidence when reporting to chairman qin.

However, Kong Lin was experienced in setting up a new company, so the online order of Linlin-dog food was also delivered at the fastest speed.

He wasn't in a hurry to find a distributor.

As long as this batch of dog food online was sold, he believed that there would be a large number of agents coming to find him.

Two days had passed.

The dog food distributed by Linlin pet food Co., Ltd. Had also basically reached the buyers.

Yu Lin and his girlfriend went home after work and went to the courier station. He had received the news that the dog food had arrived.

This time, he ordered three large bags of Linlin dog food. After he brought them home, he and his girlfriend couldn't help but open them.

Linlin company's products, even if they were dog food, were also worth exploring.

When the dog Bei Bei saw its parents coming back, it also barked and surrounded them. Yu Lin also took the dog bowl and poured Linlin's dog food into it.

After an entire afternoon, Bebe was hungry. This was his meal time.

The dog Bei Bei saw that the dog bowl was filled with dog food, and it immediately ran forward.

It knew that the dog food was suddenly changed, so the first thing it did was to sniff it and then try to bite a little bit of the dog food.

However, after a moment, the dog's eyes narrowed. It was obviously enjoying it. Then, it started to eat happily. It even barked happily as it ate, indicating that it was very satisfied with the dog food.

Deliciousness +2, taste +2, and the dog's liking +2. Dogs couldn't resist it.

This scene also surprised Yu Lin and his girlfriend. It was the first time they had seen their dog like this, which meant that it liked this dog food very much.

As expected of Linlin company's products. Not only did people like Linlin company's products, even dogs liked them.

"Take a video and promote it in the pet group!" His girlfriend immediately took out her phone to take a video. It was the first time she saw the young paparazzo so happy. How could she not share it?

Yu Lin also picked up his mobile phone to take a video and planned to post it. However, as soon as he posted the video, he found that many people had already posted videos about Linlin-dog food on the internet.

In the video, every dog was very happy after eating Linlin-dog food. It could be seen that the dogs all liked Linlin-dog food very much.

Soon, Yu Lin saw a shocking video. In the video, a dog owner poured a bowl of dog food for his dog. When the dog was eating happily, he took out a bowl for a human and filled it with dog food.

Then, something shocking happened. The dog's owner actually took a pair of chopsticks and quickly put the dog food into his mouth. He chewed it with a big mouth and his face was full of enjoyment.

"? ? ?" Yu Lin was dumbfounded.

[Chapter 906 A New Processing Machine For Single Dogs And Couples!](#)

Yu Lin was a little dumbfounded when he saw the video. "Is this person an idiot? You're snatching food from a dog!"

His girlfriend came over in confusion and saw the person who was happily eating dog food with the young paparazzo in the video.

She was also a little stunned, 'how can this person be like this? Are you trying to play to the gallery?"

It was also her first time seeing a dog owner eat dog food.

Finally, the dog owner finished the bowl of dog food. He looked up at the camera in satisfaction and said, "Do you guys think I'm crazy? did he have a problem with his brain before he snatched dog food from a dog? Don't deny it, that's what you all think."

"bi an" yu lin.

"he knows his own limits!" His girlfriend.

The two of them looked a little stunned.

But the author in the video said again, " of course. You think I have a mental problem, and I also think that you have a enjoyment that you don't understand.

you probably won't believe me, but I accidentally ate a piece of Linlin company's dog food. Then I found that it was very delicious.

it's true. You'll only realize after eating it that the biscuits and snacks on the market are far from as delicious as this dog food.

"It's up to you to believe it or not!"

After Yu Lin watched the video, he directly complained, " "As if I'd believe you."

after that, he opened the comments section, wanting to continue commenting and complaining.

However, the comments in the video had already exploded. It was very lively.

I've been hearing people say that I'm eating dog food, I'm eating dog food. I finally know what it means to eat dog food!

the author must be single. Otherwise, why would he like to eat dog food so much? "

he must have been stimulated by the public display of affection. Otherwise, why would he eat so much dog food? "

"....."

Looking at the complaints one by one, Yu Lin was a little embarrassed to complain.

The author of this video seemed to be a little pitiful.

However, new comments quickly caught his attention.

I can't believe you guys believed it. I actually believed him. I tried a Linlin dog food. It was really delicious.

"I also ate one, and then I realized that I was poisoned. I couldn't help but want to eat it again!"

it's too scary. After eating a piece of dog food, I actually want to fight with the dog for food.

"....."

" ? ? ?"yu lin and his girlfriend were dumbfounded when they saw these comments.

Jokes are jokes, but don't joke on dog food.

But for some reason, Yu Lin looked at the dog food in Bebe's bowl and suddenly had a strange thought. He hurriedly shook his head and threw this thought out of his head.

How could she try that dog food?

it would be awkward if his girlfriend thought he was an idiot.

"Honey, do you want to try one?" His girlfriend suddenly said.

"? ? ?" Yu Lin was stunned when he heard this.

However, when he heard his girlfriend say this, an idea came to him again. He nodded and subconsciously reached into the bag of dog food, grabbed one, and put it in his mouth.

As soon as the dog food was put in his mouth, Yu Lin's face suddenly showed an unusual expression, and he began to chew on it.

He couldn't believe that this dog food was as delicious as the person in the video had said.

Deliciousness +2, taste +2, being liked by the owner +2, this made Yu Lin fall for it,

This dog food was really more delicious than the rice he had eaten, or more delicious than anything he had ever eaten in his life. Only the Linlin watermelon from Linlin villa could compare to this dog food.

Oh my God.

Yu Lin felt like he was going crazy.

So, he reached into the bag of dog food again, grabbed a few grains, and put them in his mouth.

As he chewed, the deliciousness spread to his taste buds. He couldn't help but grab some more and stuff it into his mouth again, and more and more each time.

His girlfriend beside him looked at him in surprise.

yu lin was embarrassed by the stare, and he hurriedly handed the dog food to his girlfriend and said, "honey, try this dog food. It's really as good as the video said. I didn't expect it.

The girlfriend was puzzled, but seeing that Yu Lin, her boyfriend, was eating so happily, she also tried to put a piece of dog food in her mouth.

She subconsciously opened her mouth when she tried.

it was actually so delicious.

The delicious taste made her grab some more and put it in her mouth.

Then, the scene was beautiful.

The young couple leaned against the sofa and watched TV. They held a bag of dog food in their hands and kept reaching into the bag to grab it and stuff it into their mouths.

Wouldn't anyone who saw this think that there was something wrong with their heads?

Only their dog, Bebe, was beginning to grow anxious.

It had finished eating the dog food in its bowl, but it still wanted to eat more. It barked at its parents, but it found that its parents were happily eating the dog food that belonged to it.

The same scene was also happening at the other dog Masters 'places.

Moreover, as more and more people couldn't control their curiosity, more and more videos of people eating dog food appeared on the internet.

It was definitely a big gimmick for this person to eat dog food, especially with relish.

If the dog food was still related to Linlin company, it would be the data password. So, the dog food soon became out of control.

Many people who saw the video were very curious. Even those who didn't have dogs began to order dog food from Linlin pet food company.

After one night, the popularity of Linlin's dog food became even more out of control.

In a hotel.

Brother Yi had woken up early in the morning.

Last night, he had flown to this city and had taken a video with Zhao xiongzhuo. He had to livestream bringing the goods that night, and after uploading the video, it would attract a lot of traffic.

[Chapter 907 A New Processing Machine For Single Dogs And Couples](#)

To be honest, this was something he was very proud of.

After all, in this era of internet traffic, as long as you had popular fans, even if you were an internet celebrity, even if you were ridiculed as an internet beggar, you could still spend money to get celebrities to serve as your foil.

Even if the celebrity was your idol when you were young.

brother yi had just finished washing up and walked out of the room when he saw his assistant running over in a hurry. brother Yi, it's not good. Look at mouyin. Linlin company's dog food is on the hot search.

what???" Brother Yi was suddenly a little confused.

That was why he had spent so much money on brother Zhao. If the profits weren't good, wouldn't he lose money?

He said in disbelief, 'a dog food can be on the top of the search rankings? Are you kidding me? Could it be that there's someone who's eating this dog food to attract people's attention?'

The assistant had a strange expression on his face. brother Yi, that dog food man can really eat. Moreover, there are many people eating steamed buns.

" ??? "Yi ge frowned. He took out his phone and opened a certain voice channel to watch some videos. He was really dumbfounded. There were really many popular videos of many people eating dog food.

were they all f * cking crazy?

Inexplicably, yi ge felt that there was something wrong with this world.

The key was that Linlin company had strangely become the top search.

However, the popularity on the internet would not stop just because of the complaints of these internet celebrities and celebrities. A dog food was actually more delicious than the food that most people had eaten. This would indeed make people go crazy.

No one had ever eaten such delicious food before, and now the dog was lucky enough to eat it first.

The point was, this dog food was so delicious that anyone could eat it, so why did Linlin company sell it as dog food?

Soon, another video made it to the top of the search list, and in a short time, it stunned everyone. It was a video posted by a research-loving blogger:

because of the popularity of Linlin's dog food, I posted this video about it. I admit that I did it to gain popularity.

the video I posted might be different from others because I planned to examine this Linlin dog food. I also spent a lot of time examining this dog food.

the test results of this dog food are definitely surprising. This dog food doesn't contain any harmful substances to the human body, but it is rich in nutrients that are beneficial to the growth and health of animals.

that's not the point. The most important thing is that the nutrients are beneficial to humans, so Linlin's dog food can indeed be given to humans.

As soon as this video was released, many people who had eaten Linlin's dog food began to feel resentful.

it could really be eaten.

Then why did Linlin company sell it as dog food? Now that they had no choice but to fight for dog food with their own dogs, they felt that they were a little perverted.

At this time, Kong Lin asked the people of Linlin pet food company to take the opportunity to launch other varieties of pet food.

after all, they didn't just sell dog food.

This action quickly attracted the attention of the vast number of netizens, and many reminders and shared videos appeared on the internet one after another:

"Come to Linlin pet food company!"

don't blame me for not reminding you. Look at the new product launched by Linlin Pet Company!

The videos that suddenly appeared were seen by many people, and more and more people went to the official website of Linlin pet food company. Then, many people found that Linlin pet food company had launched many types of pet food at once.

This made the netizens even more resentful.

Why did he always give food to animals when he didn't have any food to eat?

Yu Lin and his girlfriend were also paying attention to the new product launched by Linlin pet food company.

Pig food, cat food, Fox food, single dog food

Wait a minute!

Yu Lin suddenly froze.

Linlin-single dog!

This product was completely different from the previous dog food and dog food. It didn't write any food, only three words: single dog.

What did he mean by single? It literally meant a dog, but there was already dog food, so it was definitely not a dog.

Therefore, the meaning of being single was obvious.

"linlin's single dog, linlin's couple!" Yu Lin saw the other product behind Linlin-single dog, Linlin-couple!

Was this for people to eat?

Indeed, this was for people to eat. Because people could eat it, there was no reason not to sell it to people. After all, there were 1.4 billion people in the country.

Naturally, the original name was Linlin's single dog-dog food! However, in order to avoid being labeled as an insult to his customers, Kong Lin and the others had a meeting and removed the word " dog food.

Just Linlin-single dog!

If he wanted to pull this off, he could do it however he wanted.

And this alone was enough for everyone to understand what he meant.

This was dog food for single dogs.

Linlin-couple, that's a couple's dog food. A couple holding this thing and eating it, it's really a display of dog food.

Yu Lin and his girlfriend understood, but they naturally wouldn't buy this single dog food. They directly bought 10 packs of couple food.

it was good that someone was eating such delicious food. he wouldn't have to fight with the dog for food.

The netizens on the internet also discovered the two types of dog food that people ate, and it became lively.

thanks to Linlin pet food company for remembering me, a single dog.

haha, I can finally show my girlfriend true affection!

"I'm really honored to be remembered as a single dog!"

"I'm finally getting the same treatment as my dog. I'm very happy!"

that's right. Otherwise, why doesn't such delicious food belong to a dog like me, a single dog? "

It could be said that Linlin pet food company became popular immediately, and the craze swept through the internet. In the next few days, Linlin pet food became the mainstream of the entire internet.

Short Video platforms and WeChat moments were almost all about Linlin's pet food. Naturally, the two products, Linlin single dog and Linlin couple, appeared the most frequently.

it was either self-pity for a single dog or a couple showing off their affection!

Moreover, with these two types of dog food for people to eat, it was much better psychologically than snatching food from dogs.

Naturally, this was followed by countless orders.

.....

Linlin Manor.

Kong Lin and Deng Guang went to Linlin's office early in the morning to report the latest situation of Linlin pet food company. Chairman Qin, the factory is already working overtime. Also, we might need to increase the production in the new factory in the future.

in this short period of time, we haven't even found a distributor yet, but the online orders alone have already reached 500 million.

Deng Guang also laughed. I didn't expect that the subsidiary company would have such results from the beginning. I'm afraid that in a few days, the head company will earn back the 1 billion we invested.

Qin Lin nodded.

The momentum of this Linlin pet food was indeed surprising.

Although the current order was related to the popularity on the internet, he believed that the future orders would not be bad since he had made a name for himself and the products were indeed delicious.

Moreover, with this product alone, Linlin pet food company could become a well-known company in the country.

After all, the current scale of the pet food market in our country has reached more than 200 billion Yuan. Moreover, the pet food company also has two products for people to eat, Linlin-single dog and Linlin-couple.

These two types of dog food would probably become the mainstream snacks for most people in the future.

Kong Lin and Deng Guang also left after reporting.

After that, Qin Lin sat down and looked at the screen in his mind again. Then, he controlled his game character to go to the warehouse where the yellow Rosewood was stored.

Zhao Moyu's office had been moved to the manor, and he had also planned to use these things to build something for Zhao Moyu's office.

However, when he controlled his game character to go to the processing machine experience bar, he was surprised to find that there was an additional processing machine in the processing machine experience Hall.

The processing machine was green in color, and there was an icon that looked like a seed printed on it.

Qin Lin hurriedly controlled his game character to go to the processing machine and immediately saw the name of the machine: Seed processing machine model 03!

[Chapter 908 Magical Effect! Increase Production! Shorten Growth Time! 1](#)

"Seed processing machine!"

Qin Lin couldn't help but look at the display again. It was a seed processing machine model 03!

It was indeed true!

Seed Processing Machines existed in many versions of the story of the farm.

this item's function was to process seeds and give them special attribute bonuses. the most exaggerated ones were doraemon's and big dream's versions of the story of the farm.

In this version, Doraemon and Nozomi had transmigrated into the story of Ranch in the mine town version, so they had to help out with the game characters in the mine town version.

this version of the story of the farm was really magical. just think about doraemon's settings.

This version of the seed processing machine could probably even process seeds that could be planted on Mars.

Thinking about it, Qin Lin was really looking forward to it. It was really Doraemon's and da Xiong's version of the processing machine. It could even transform an alien planet.

he just didn't know which version this seed processing machine was.

Qin Lin thought about it and immediately controlled the Game Corner to operate the seed processing machine. The icon of the seed on the seed processing machine immediately lit up, and a message popped up:

seed processing machine model 03: quality 1!

this is a new seed processing machine model 03. It has special effects. It can be used to process seeds, and there is a chance that it can greatly increase the output of seeds and shorten the growth time of crops.

[do you wish to proceed with seed processing?]

When Qin Lin saw the message, he knew that this was not the same processing machine as Doraemon and da Xiong's. It was just a normal processing machine.

Furthermore, it was only a processing machine that could increase the production of seeds.

&Nbsp; however, this did not mean that the seed production processing machine was useless. On the contrary, it was very useful.

In the field of Crop Research, what was the main purpose of the research other than improving the quality of crops? That was to increase the yield of crops.

it's precisely because of old senior Yuan's research that we can increase the yield of rice that we don't have to go hungry like before. Many of us can even live a happy life and find trouble when we have nothing to do.

This was something that many countries could only dream of.

Most importantly, there were still many crops in the country that were not produced enough. Some of them were even life-saving. Many scientists had been studying these things to increase the production.

Another example was the Xiangshui tribute rice. It had been planted in every county in Ming city. Even though the seeds produced by the game had adapted to the environment and were much better than those in Xiangshui, it was still at its limit. It could not be planted outside of Ming city.

Therefore, this was still due to the limited production.

However, if the seed processing machine could be used to process the Xiangshui tribute rice, it would also greatly increase the production of Xiangshui tribute rice.

There were also the quality 1 vegetables in Linlin villa. As more and more tourists came to the villa, the original production was still in short supply.

Now, as long as the seeds were processed, the production could also be greatly increased.

The same land could produce more yield, which was of great significance in itself. If the yield was increased enough, it could even cross the era.

It was just like how senior Yuan had researched the yield of rice.

The key was that the processing machine could increase the production of seeds and shorten the growth time of crops.

With that in mind, Qin Lin went out of the manor and went to the seed market. He bought more than 20 kinds of common crop seeds, which were also the most common crops for families.

What surprised him was that 16 of the 20 seeds were imported from foreign countries. Was this seed store worshipping foreign countries?

Otherwise, why would most of the seeds be imported?

He really didn't notice this when he came to buy seeds.

However, it was the boss's freedom to sell what kind of seeds he wanted, so he didn't have the mood to care.

After all, he only wanted to buy some seeds for his experiments.

Back at the manor, he controlled his game character to return to the farm, locked the office door, and entered the game with a thought, bringing the seeds into the game.

When he logged out of the game, his character backpack was already filled with the seeds he had bought.

Qin Lin immediately took control of his game character and left the farm. He went to the seed processing machine in the processing machine experience hall in Ore Town and started operating it.

[Do you want to proceed with seed processing?]

Qin Lin chose "yes" directly this time. The next moment, another prompt popped up.

[Please select the seed to process!]

Qin Lin immediately controlled his game character to put a set of broccoli seeds into the box that had jumped out. There were about a dozen seeds, and then he clicked the "confirm" option.

The broccoli was a seed from overseas.

[Broccoli seeds in the process of processing, Yingluo, I'm very sorry, the processing of the seeds has failed!]

Obviously, there was a chance of success. It was really just a chance. The first attempt failed.

Qin Lin immediately put in another batch of broccoli seeds.

[Processing of Pi Xiu seed failed!]

[Processing of Pi Xiu seed failed!]

He failed twice in a row.

The success rate didn't seem high.

Seeing that there were still quite a few seeds left, he put in another batch of seeds.

[Yingluo, congratulations. You have successfully processed broccoli seeds. You have received an attribute bonus of 20% increase in production and 10% reduction in crop growth time!]

"I've finally succeeded once!" Qin Lin heaved a sigh of relief.

However, if there was only a 20% increase in production and a 10% reduction in growth time, the increase in production would be limited. It would only save costs and would not be too sensational.

[Chapter 909 Magical Effect! Increase Production! Shorten Growth Time! 2](#)

As he thought about it, he divided the last bit of broccoli into several portions and processed them one after another!

[engine processing failed!]

[engine processing failed!]

[Yingluo, congratulations. You have successfully processed the broccoli seeds. You have received an attribute bonus of doubling the output and reducing the growth time of crops by 20%!]

Double the production and shorten the growth time by 20%?

qin lin's face immediately lit up.

Previously, he had thought that the production rate would only increase by 20%, but it seemed that this was not the case. The probability of this increase was random.

However, if the production rate was doubled and the growth time was shortened by 30%, the significance would be huge.

If this seed were to spread, it would definitely cause a sensation. Perhaps no one would buy the same kind of seeds on the market.

After processing the broccoli seeds, Qin Lin immediately controlled his game character to take out corn seeds for processing.

The corn was also a foreign seed.

[engine processing failed!]

[Richard, congratulations. Corn seeds have been successfully processed. You have gained a 20% increase in production!]

.....

[Richard, congratulations. Corn seeds have been successfully processed. You have received an attribute bonus of 50% increase in production!]

.....

[Richard, congratulations! The processing of corn seeds has been successful. You have received an attribute bonus of doubling production and reducing growth time by 20%!]

.....

[engine processing failed!]

After processing all the purchased corn seeds, the highest yield would still be doubled, and the growth time of crops would be shortened by 20%.

Next, Qin Lin used the processing machine to process the carrot, sweet pepper, and coriander seeds.

Similarly, after these seeds were processed successfully, the increase in yield and the shortening of growth time could only double the yield at most and shorten the growth time by 20%.

.....

Then, Qin Lin went to Linlin's laboratory and took out some of the grade 1 seeds he was studying. At the same time, he also took out the grade 1 and 2 Xiangshui tribute rice seeds and the grade 2 Linlin watermelon seeds that he had prepared in his collection.

After bringing the seeds to the office in the villa, he locked the office door and brought all the seeds into the game.

Qin Lin then processed the seeds one by one with the seed processing machine.

[engine processing failed!]

...

[congratulations, you have successfully processed a quality 1 eggplant seed. you have received an attribute bonus of increasing production by 3 times and reducing growth time by 30%.]

When the latest processing results came out, the highest attribute bonus increased again.

Ordinary seeds could only double the yield and shorten the growth time by 20% after processing. Now, after the successful processing of this Grade 1 seed, it could increase the yield by three times and shorten the growth time by 30%.

Qin Lin immediately processed the other seeds.

[Youyou, congratulations. You have successfully processed a quality 1 white radish seed. You have received an attribute bonus of increasing production by 3 times and reducing growth time by 30%.]

[congratulations, Youyou. You have successfully processed the quality 1 water tribute rice seed. You have received an attribute bonus of a 3x increase in production and a 30% reduction in growth time.]

as expected, after he processed all the grade 1 seeds, each seed could achieve a maximum of three times the yield and 30% shorter growth time.

The key was that the production of water tribute rice seeds would increase by three times with a grade of one. This was already very impressive.

Xiangshui tribute rice was rare and could only be grown in a small area of Xiangshui. Now, he could grow it in all the counties of Ming city.

If the yield could be increased by three times, the annual yield of Xiangshui tribute rice would be much higher.

Moreover, judging from the processing results, the better the quality of the seeds, the better the effect of the processing machine.

What about a Grade 2 seed?

Qin Lin immediately controlled his game character to take out the quality 2 Xiangshui tribute rice seeds for processing.

[engine processing failed!]

[Richard, congratulations! You have successfully processed a Grade 2 water tribute rice seed! [you have obtained an attribute bonus of doubling production and reducing growth time by 10%!]

.....

[engine processing failed!]

Continuous processing and continuous failures. The attributes of the quality 2 Xiangshui Gong rice after being successfully processed did not seem to be very good.

Even after processing all the two-sound water tribute rice seeds, the data was still not amazing.

Therefore, he went to get the second batch of quality two resonance tribute rice seeds that had adapted to the outside environment and continued to process them.

[Richard, congratulations! You have successfully processed a Grade 2 water tribute rice seed! [you have obtained an attribute bonus of 3x production and 40% reduction in growth time.]

Finally ...

When the second batch of Xiangshui Gong rice seeds, which were suitable for the outside world, was about to be processed, a batch of surprising attributes appeared.

Increases yield by 4 times, and reduces crop growth time by 40%.

With these stats, even if he only planted it in the small plot of land at Linlin villa, it would have four times the yield. He could keep it for himself and use it however he wanted.

Qin Lin didn't hesitate. He went back to you city to buy more seeds. Then, he brought back the seeds of Grade 1 planting and Xiangshui tribute rice.

Even if the processing was successful, there would only be a few dozen seeds per set. This number was too small.

Therefore, Qin Lin spent the whole day between the seed processing machine and the seed processing machine. He only stopped after processing more than ten servings of each type of seed.

In front of him were bags of processed seeds.

These seeds didn't look like much, but no one knew the production of these seeds. If they knew, it would probably cause a huge uproar in the entire seed market.

Qin Lin immediately called Yu Shui. He needed Yu Shui to lead the planting Department to plant the seeds.

[Chapter 910 Magical Effect! Increase Production! Shorten Growth Time! 3](#)

After hanging up the phone, he thought for a while and entered the game again. He took out half a bag of special soil and put it on the ground.

There had to be a reason for the sudden increase in the production of these seeds, so he decided to push it to this special soil.

Yu Shui arrived not long after. His boss called him personally, so he naturally didn't dare to dawdle.

"Chairman Qin, do you have any orders?" Yu Shui asked respectfully as soon as she entered.

Qin Lin pointed to the seeds on the table and asked Yu Shui to bring the seeds and special soil. Then, they left the manor together.

Yu Shui didn't ask much. She just had to follow her boss's instructions.

This was what he learned from manager Chen.

Linlin villa had initially contracted 5000 mu of land for the expansion of the villa and the ranch. The rest of the land was used for planting.

Later on, because of the increase in quality 1 crops, the villa and You Cheng contracted 10000 mu of land as a planting area.

You Cheng naturally gave the best location to Linlin villa at the first opportunity when Qin Lin, a big taxpayer, a big job provider, and a famous big client applied for a contract.

Now, the entire planting area was in the shape of a fan, surrounding Linlin Manor. Looking from the sky, it was a lush and magnificent sight.

It could be said that the total area of Linlin villa, Linlin pasture, and these planting areas would not be smaller than any 5A scenic area.

For this reason, the plantation Department and the security Department had recruited a lot of people. The plantation Department had to maintain the plantation area, and the security Department had to patrol the plantation area.

Even if a wall had been built, they still had to prevent some disgusting things from happening.

When they arrived at the new planting area, Qin Lin asked Yu Shui and her people to specially isolate an area. Then, when they turned the ground, they mixed the special soil in and finally planted the seeds.

Yu Shui immediately took action with his men and planted the seeds seriously. He didn't know how big of a stir the seeds he had planted would cause.

Qin Lin watched as Yu Shui and the others finished planting the seeds before returning to the manor. As soon as he reached the office, he saw Li Kai. As soon as he entered the door, he told him the good news, "Brother Qin, let me tell you two pieces of good news. That three-colored watermelon can be used for low-temperature genetic technology. When I brought people to experiment with it, the fusion between the low-temperature gene and the three-colored watermelon was very successful. In this case, as long as we perform a puplication, we can develop a seedless three-colored watermelon that is not limited by the seasons.

This was indeed good news.

The three-colored watermelon would definitely become very popular in the future. This way, they could protect the source. Otherwise, once the three-colored watermelon was released, someone would be able to get the seeds. Then, wouldn't they become the wronged seeds?

"Brother Li, what's the other piece of good news?" Qin Lin asked.

Li Kai took out a document and handed it to Qin Lin, saying, "The higher-ups are going to send money to our laboratory."

"The higher-ups are giving us money?" Qin Lin was puzzled.

I don't know what happened," Li Kai explained. The higher-ups suddenly issued a notice to our Crop Research laboratories to assist in experiments. The research direction is to increase the production of some crop seeds. Also, every laboratory will issue a lot of research funds wholesale.

There's a group of researchers in our laboratory who are specialized in researching quality 1 seeds. Although they didn't find anything useful from the quality 1 seeds, with the reference of the quality 1 seeds, they can still increase the production of ordinary seeds by about 15%.

In other words, with this money approved, even if our laboratory doesn't do anything, as long as we post the data, we will earn it for nothing.

"You can make money from the laboratory like this?" Qin Lin couldn't help but feel a little surprised. After all, he had just gotten the seed processing machine, and the seeds that were processed would increase production.

"This isn't really making money," Li Kai explained. "After all, we've spent a lot of money and energy on our previous research. It's just an offset."

However, with such a large scale announcement, something big might be happening. Furthermore, it might have a huge impact and it's related to the production of seeds.

Otherwise, the higher-ups wouldn't make such an urgent announcement. Of course, our laboratory needs your signature on the research assistance documents.

Qin Lin also took the research document and read it. However, he was stunned when he saw the request to study the seeds to increase production.

broccoli, corn, cilantro

He seemed to have processed all these seeds.

Moreover, if he remembered correctly, these seeds seemed to be imported!

This matter did not seem simple, but he would not investigate it. No matter how big the matter was, it had nothing to do with him.

Qin Lin finally signed his name on the document, but he would never have thought that he was directly involved in this matter.
