

The Game 911

[Chapter 911 We Have To Stall For Time And Protect Boss Qin](#)

Qin Lin signed the experimental file and returned it to Li Kai.

no matter what, he would be a fool if he didn't earn free research funding.

After that, he chatted with Li Kai about the three-colored watermelon before Li Kai left the manor.

The next day.

Qin Lin also left the manor and went to you city.

The people of you city were getting happier and the reason was simple, it was because of Linlin company.

It was a magical thing for a company to make the people of a city happy.

But that was the truth.

After all, they were often the first to buy and use the things that everyone on the internet wanted to use but couldn't buy. If that wasn't happiness, what was?

For example, the purification grass had not been sold in other places. linlin's laboratory only occasionally placed a batch on the internet for people to order.

Their you city had been living in the purification grass for a long time.

for example, linlin leisure tea and linlin medicinal liquid, which could only be bought offline in many areas in the north. how long had they been drinking it?

Another example was the Linlin dog food this time. It wasn't sold offline in other places, but their you city great conditioner was already on the shelves.

Wasn't this happiness for those who could buy Linlin dog food offline in advance?

In an office of the Grand hairdressers.

manager chen thanked qin lin with a respectful face, " "President Qin, thank you so much!"

Director Chu also chimed in,"Indeed, if it wasn't for President Qin, our supermarket wouldn't have been able to sell Linlin pet food so quickly!"

The two of them were actually very emotional. They didn't expect that their fate with the okra would give them the opportunity to become friends with the boss behind Linlin company.

It must be known that the public did not even know that the young man in front of them was the boss of Linlin company.

Qin Lin also smiled and replied, " you two don't have to thank me. I'll give you a phone number. In the future, if Linlin has any problems with his products, you can directly look for President Deng of the food company. I'll give him an explanation.

he did have some history with these two. although they only knew each other for profit, he had earned his first pot of gold from big hair salon. moreover, they did give him free outdoor screen advertising time when they opened at linlin villa.

Therefore, when the other party made a rare call to place an order for Linlin's pet food, he would give them face.

However, he would come once or twice. Even if it was to settle their past relationship, if she kept calling him, he would naturally ignore her.

Therefore, he gave Deng Guang's phone number. If they had any business dealings in the future, he would let the two of them talk to Deng Guang.

After all, these two were not his friends. They were just a Branch Manager and a purchasing manager of a supermarket. He couldn't even talk to them now.

Director Chu and manager Chen naturally understood the meaning behind Qin ran's words and immediately expressed their understanding.

they weren't fools, and they didn't think that they could keep looking for this chairman qin just because they had a little friendship with him.

That's called not knowing your own limitations.

Now that he could get CEO Deng's phone number from this Chairman Qin, he was better than the others.

a moment later, qin lin also came out of the hair salon. when he came to the square outside, he saw many people carrying lin lin's pet food.

It had just been put on sale on darunfa, but so many people had already bought it. It seemed that Linlin pet food had been deeply rooted in the hearts of the people.

Qin Lin even saw a couple opening a pack of Linlin couple dog food on a long bench in the square. A dog was also eating Linlin couple dog food at their feet.

Qin ran found it interesting. This might be normal in the future.

"Wuwuwu!" The dog's barking suddenly sounded.

Qin Lin then realized that the dog seemed to be barking at him. It kept staring at him, as if it had noticed his gaze.

Even the couple who was eating the Linlin couple's dog food was looking at him.

"Ran ran." Qin Lin immediately felt embarrassed and hurriedly walked out of the square.

"Was that the internet celebrity little Qin?"

I don't think so. That little Qin has a girlfriend. Just now, she kept staring at our dog's dog food. She's a punctual single dog, but she's too embarrassed to buy Linlin's single dog food.

"Hubby, you're right."

ran ran. Qin Lin still heard this. He only wanted to say, "reasonable my ass."

after getting into the car and returning to the manor, linlin found that the three academicians, academician zhu, academician fei, and academician sun, were packing up the equipment they had brought.

When the three of them saw Qin Lin return, they also went forward to welcome him.

"Boss Qin, I've really troubled you during this period of time."

"Yeah, we didn't want to come to boss Qin's place before we came. Now that we're here, we can't even bear to leave."

"Haha, I admire boss Qin for being able to create a place like the Linlin Manor."

The three academicians spoke with sincerity. After living here for a while, they felt the good things about this Manor.

"You three, are you going back?" Qin Lin asked, puzzled.

Academician Zhu nodded and said, "we've gained some insight here. The Chinese Academy of Sciences has already entered the physical test phase. Also, the physical rocket is almost ready. We have to go back and take charge of the overall situation. When Minister Lu comes tomorrow, we'll go back together."

maybe it won't be long before boss Qin sees the news of our country's successful launch. academician sun also said.

"The three academicians have to inform me to watch the news." Qin Lin was naturally very happy to hear this news.

[Chapter 912 We Must Delay Time And Protect Boss Qin \(2\)](#)

When he had obtained the moonstone, he had wanted to silently make some contributions. It would be best if he could help the research of these seniors.

"Don't worry, boss Qin, I'll definitely let you know," academician Fei said.

To Qin Lin's surprise, academician Hao and academician Lin were also packing up.

Other than academician li, who was about to fully recover from stomach cancer, the rest of the academicians had to go back.

Academician Hao and academician Lin also had an experiment mission, so no matter how comfortable they were recuperating in Linlin Manor, they had to leave.

Their mission was to do experiments for the country's scientific research.

The next afternoon, Minister Lu arrived and said gratefully, "Boss Qin, thank you for taking care of the academicians."

Qin Lin shook his head and said, "Minister Lu, it's a little strange to say this. Go and make some tea first. I'll personally cook an Emperor's Supreme medicinal cuisine to send off the academicians in the evening."

"We'll listen to boss Qin!" Minister Lu said with a smile.

Qin Lin welcomed Minister Lu into the office, took out a quality 2 wild tieguanyin and made a pot of tea.

After drinking some tea, Minister Lu asked, "Boss Qin, you've read the document about the seed production, right?"

Qin Lin nodded. Yes, old brother Li has already told me. I've already signed it.

With Professor Li Kai's participation, I hope they can come in time! Minister Lu heaved a sigh of relief, but he hesitated.

Qin Lin noticed something was wrong and asked, "What's wrong, Minister Lu?"

"It's nothing," Minister Lu quickly shook his head and changed the topic, "Oh right, boss Qin, do you know how Professor Li Kai's low-temperature genetic experiment is going?"

Qin Lin explained, "Brother Li said it's going well. He's already handed the follow-up to the experimental assistant. It should be ready soon."

"That's great. Can you take me there now?" Minister Lu smiled.

"Alright!" Qin Lin naturally wouldn't refuse. He took out his phone and called Li Kai. After hanging up, he went to Linlin's laboratory with Minister Lu.

When they arrived at Linlin's laboratory, Li Kai was already waiting. "Old Brother Qin, Minister Lu, come this way!"

The experimental area of Linlin's laboratory was generally confidential and not open to the public. Minister Lu was an exception.

Qin Lin and Minister Lu followed Li Kai to the entrance of a District. There was not only a work card verification at the entrance, but also trained security guards standing guard at the entrance.

As Linlin's laboratory became more and more formal, there were more and more departments and experimental projects, so the security became tighter and tighter.

When they reached the entrance, even though Qin Lin and Li Kai had come together, the security guards stopped them.

"Please show your witness and accept the inspection!" One of the security guards said.

At the same time, the other person also used a device to scan the three of them.

"How troublesome!" Li Kai grumbled and handed his ID to the security guard. Although he said that it was troublesome, he was obviously very satisfied.

After all, scientific research was most afraid of information being leaked. Even if one's research was stolen, security was the most important.

After the two security guards confirmed that there was no problem, they also said respectfully, "Professor Li, Chairman Qin, please come in."

At this time, the two security guards had a respectful expression on their faces.

Inspection was their duty.

after all, the training they had received had simulated all kinds of emergencies, including the content of the boss and professor li, who were in charge, being held hostage.

Since there was no problem with the inspection, professor li was their boss, and Chairman Qin was their boss.

After the three of them entered, Minister Lu said with emotion, " Boss Qin, professor Li Kai, the security of your laboratory is pretty good.

"It's because President Shen poached a Security Supervisor from another laboratory," Qin ran said."The laboratory that the other party was in was set up by Boss Ma."

Minister Lu immediately knew which laboratory it was. That laboratory was originally very famous in the country. Boss Ma had also recruited many talents for the laboratory.

It had to be said that Boss Ma was really good at deceiving people.

However, with the collapse of Mr. MA, the laboratory was in chaos. There was a power struggle, and all the talents were poached by other laboratories.

It seemed that Linlin's laboratory had poached a lot of them.

As they moved forward, the three of them arrived at the story of experiments. The glass door had the words 'low temperature genetic experiment' on it.

When the researchers around them saw the three of them, they all came over to greet them.

"Professor Li Kai, Chairman Qin!"

"Professor li, Chairman Qin!"

As for Minister Lu, he was ignored. After all, no one knew his identity, but he obviously didn't care about that.

If he cared, he wouldn't have come here with boss Qin in private. He would have just sent a notice of a visit for the postgraduate entrance examination. Then, he could have as much attention as he wanted to give him.

However, he didn't like such a scene. It would be best if he came in quietly with boss Qin and professor Li Kai without so many people making noise.

"Give us three sets of winter clothes!" Li Kai gave an order to a researcher, and the researcher immediately brought three winter clothes over.

Since this was a low-temperature genetic experiment, the temperature in this area was naturally simulated. It might even be lower than winter.

after qin lin put on his winter clothes, he felt a chill when he entered the inner area. he looked at the thermometer on the wall and found that it had reached-5 degrees celsius.

Li Kai also explained, "-5 degrees. This is basically enough to simulate the winter temperature of most planting areas. Any lower and the cold genetic technology will no longer be suitable. After all, the soil has turned into a concrete-like ice block.

When they reached the experimental planting area, they could see that the open land was almost covered in a thin layer of frost.

In this state of temperature, except for a few crops that were cold-resistant, there was only one outcome for the crops in other seasons, which was to die directly. Their leaves and roots were all frozen, and then they died and rotted.

but now, he could clearly see that in those fields, through the ice frost, there were young sprouts growing out. moreover, they were very strong and verdant.

Under normal circumstances, this was very illogical.

However, with Li Kai's low-temperature genetic technology, these summer crops all survived and grew well.

Li Kai also said, "Brother Qin, Minister Lu, these sprouts are all summer crops, but they are growing very well in this temperature. When they all bear fruit and the fruit is fine, this technology will be completely completed.

we're all looking forward to professor Li Kai's technology. It can change the pattern of the entire crop! Minister Lu said with some emotion. Then, he suddenly said, " "professor Li Kai, please take care of the research assistance issued by the higher-ups to increase the production of seeds. "

when he said this, minister Lu's expression became much more serious and solemn.

Qin Lin subconsciously looked over because he felt that Minister Lu's purpose in coming here was to see the low-temperature genetic technology.

It seemed that the research on increasing the production of these seeds was really important. Otherwise, Minister Lu wouldn't have said it in such a roundabout way.

Li Kai glanced at Qin Lin. He obviously understood Minister Lu's intention, which made him feel that the idea of earning free research funds that he had discussed with Qin Lin was not feasible.

The situation was obviously a little serious, and he had to do some research after getting the funding. After all, he wasn't a person without a conscience.

Therefore, he quickly expressed his stance to Minister Lu, " "Don't worry, Minister Lu. I'll lead my people to do the research."

"Hu!" Minister Lu heaved a sigh of relief after hearing Li Kai's words. Then, he strolled around Linlin's laboratory with Qin Lin and Li Kai, before returning to Linlin Manor with Qin Lin.

Since Minister Lu was going back with several academicians tomorrow, Qin Lin arranged a room for him at Linlin Manor.

Minister Lu didn't have any objections to this. Since he was already here, he would naturally listen to boss Qin's arrangements. However, at night, he received a call. When he saw the number, his face became a little solemn.

When he heard the voice coming from inside, he said with a serious expression, "please try to buy some time. I've already talked to professor Li Kai. He said that he will do his best. With professor Li Kai's ability, he might be able to produce results in a month or two.

"No matter what, that doesn't fit our moral values. Besides, boss Qin has made so many contributions, we have to protect him and not make things difficult for him!"

[Chapter 913 The Jaw-Dropping Linlin Wine Cellar](#)

Linlin Manor.

After the academicians left, only academician Li was left.

Academician Li came here to recuperate because of cancer, so he was on sick leave. Now that he was staying, it was his turn to recuperate.

In addition, he did not have any research to participate in for the time being, so he could just read the materials in Linlin Manor or read the reports and papers of the younger generation in the courtyard. It was quite comfortable.

However, after the academicians left, the manor became a little deserted.

In the recovery room.

Ling ran was seriously reading the examination report in his hand.

On the side, Tang Wan was also reading the report. Qin Lin and academician Li were the only ones waiting.

Ling ran and Tang Wan were naturally looking at academician Li's physical examination report.

Actually, academician Li's stomach cancer had already shown signs of recovery, but there were still some hidden cancer cells in his body.

This was also the reason why Western medicine would arrange chemotherapy after removing the malignant tumor. It was to eliminate the hidden cancer cells in the body.

After all the medical treatment, this time, they were going to do a thorough examination on academician Li to see the composition of cancer cells in his body.

"hu!" After Ling ran finished reading the report, he breathed a sigh of relief. "Academician Li, congratulations. Your stomach cancer has been cured."

Tang Wan nodded. not only has his stomach cancer been cured, but he's also in good condition. From the data, he's as healthy as a middle-aged man.

Both of them had a look of emotion on their faces. After all, they were both Western doctors. They never thought that a herbal dish could completely cure academician Li's stomach cancer without any surgery.

One had to know that academician Li had just arrived, and even Western medicine couldn't do anything.

"Academician Li, congratulations!" Qin Lin also immediately congratulated academician Li.

"Thank you, thank you!" When academician Li heard this news, he was very excited.

Before he came to Linlin Manor, he thought that he didn't have much time left. Now, not only was his stomach cancer cured, he felt that he could contribute to National Research for another 20 years.

Qin Lin was about to congratulate academician Li again when his phone rang.

It was Li Qing.

It had been some time since this guy had come to his place.

He pressed the answer button and Li Qing's voice was heard. "Qin Lin, I'm sorry that I have to bring someone over to disturb you this time."

"Sure, come on!" Qin Lin replied with a smile.

He and Li Qing had known each other for a long time, so he knew Li Qing's character very well.

If it wasn't for the fact that she really couldn't reject him, or if she really had something on, she wouldn't have brought people to his place.

Moreover, he felt that the possibility of something happening to Li Qing was higher.

Not long after.

Li Qing also drove a car into the city. There was an old man in the front passenger seat. The old man's brows were tightly furrowed. He had obviously encountered some difficulties.

The old man frowned. Xiao Li, this boss Qin you mentioned can really help us. Although the Linlin medicinal wine is very famous, it can't help us.

President Bao, "Li Qing said, "if he still can't help you, then there shouldn't be anyone else in the country who can help you. Those people from abroad are really aggressive this time.

"Ah!" President Bao couldn't help but sigh when he heard this.

The car quickly arrived at the parking lot of Linlin Manor.

Li Qing led President Bao out of the car and walked towards Qin Lin's office.

Along the way, President Bao looked at everything in the manor curiously, his face full of shock.

Linlin Manor's scenery was indeed as magical as it was described on the internet.

He had a lot of money and had been to many holiday manors, but when he looked at the Linlin Manor's scenery, none of them could compare to it. Or rather, he was not even worthy of carrying shoes for the Linlin Manor.

Qin Lin soon met Li Qing and President Bao.

"Qin Lin, this is President Bao of the baijiu Association. He's also a consultant for the top domestic wine industries such as Maotai and Fenjiu," Li Qing said as soon as they met.

Qin Lin was a little surprised to hear President Bao's identity.

The president of the Chinese liquor Association was not an ordinary person. After all, the production value of Maotai and Fenjiu in the country was not low.

However, none of these wine families or companies had become the chairman. Now, the old man in front of him had become the chairman, and he was even the consultant of the top wine companies like Maotai and Fenjiu.

This was enough to show the other party's ability.

"President Bao, it's a pleasure to meet you." Qin Lin shook hands with the other party with a smile.

President Bao was also full of emotion. boss Qin, I'm also very happy to meet you. When I see you, even an old man like me can't help but admire you from the bottom of my heart. I don't think we can find a young hero like you in the country.

these words were from the bottom of his heart.

he had seen many talents in his life, including the two boss ma, that blind-faced dong, and that three stone kasaya, but none of them had shocked him so much just in terms of age and achievements.

Li Qing chimed in. Qin Lin, President Bao is here to ask for your help. You're the only one who can help him this time. Or rather, you can help the entire wine industry in the country.

"Elder li, what happened?" Qin Lin asked, puzzled.

" let's get president bao to explain, " li qing said with a frown. " this is also a problem that the domestic wine industry has been facing for a long time. "

Qin Lin looked at President Bao again.

president bao sighed. " boss qin, " he said, " you should know that there has always been a competition between chinese white wine and foreign white wine. "

[Chapter 914 The Jaw-Dropping Linlin Wine Cellar](#)

"Those foreign wines can be found all over the world. Even the top-class Chinese wines like Maotai and Fenjiu, which are very famous in the country, can't go out of the country.

"In recent years, foreign wine has been becoming more and more popular in China, and it has been invading the white wine market."

"En!" Qin Lin knew about this.

After all, he had his own Linlin wine factory and he had done some research on it.

According to the latest liquor sales report, white liquor occupied only 42% of the market, foreign liquor occupied 28%, and wine occupied 14%.

In the past few years, the market share of white wine was far more than this. Now, foreign wine was even more covetous of white wine, and all kinds of publicity were emerging one after another.

Even in the mainstream places for alcohol consumption such as KTVs, bars, and nightclubs, foreign wine was becoming more and more common, and white wine was no longer seen.

This happened in a very short period of time. From the invasion to the establishment of the foreign wine, they had already snatched away such a large market.

Qin Lin didn't know the reason for this. After all, he didn't like wine, nor did he know much about it.

in fact, on the whole, our white liquor is not worse than foreign liquor, " said Li Qing. even among distilled liquors, our white liquor is the king.

President Bao nodded. generally speaking, that's true. However, in terms of publicity, and even what outsiders see, they are always the best.

Li Qing agreed. that's true. It's like a beauty contest. They will definitely send the most beautiful woman. Once a beauty from a place wins, even if that place only has these few beauties, others will still say that the beauty from that place is the most beautiful.

President Bao continued. now, the domestic liquor industry is facing such a predicament. Because of that special era, the entire liquor industry fell into a chasm. It wasn't until ten years later that it began to recover.

that's why 30 and 40-year-old liquor is very rare in China, especially those top-class liquor. Foreign liquor has an absolute advantage in this regard. Many people should have heard of 82 Lafite and 70-year-old whiskey.

" at the international wine industry exchange meeting, they brought out these top-class wines, and we were at a disadvantage. so, foreign wine suppressed white wine by drinking white wine with its taste, spiciness, and other aspects. "

"The main reason is that the aged Chinese liquor hasn't been stored for long enough. The mellow fragrance and taste can't be fully exerted yet. Naturally, it can't be compared with the top international liquor industry."

even if some people have collected some aged white wine, they are not willing to take it out to exchange for free.

"If in another ten years or so, there'll be a batch of white spirits that have been stored in the cellar for a long time, then the situation will be a little off," Li Qing said with emotion.

but the biggest problem is that we don't have that much time. Once the wine is promoted, some of the perceptions will become a fixed impression, and the market will be in their hands.

among the younger generation, more and more people have the inherent consciousness that foreign wine is better than white wine. So, this time, President Bao is here to ask boss Qin for some old white wine from your wine cellar.

In the end, Li Qing also helped President Bao state his purpose.

He had visited Qin Lin's wine cellar before and knew how terrifying Qin Lin's wine collection was.

As long as those aged wines could be brought out, even if they brought out 82-year Lafite, 70-year whiskey, or even older sample wines, the aroma and taste would be able to crush those foreign wines.

president bao saw that li qing had spoken up for him, so he hurriedly asked, " "Boss Qin, please do us a favor. We will purchase them at market price."

"Since it's for the sake of the entire liquor industry, I have no reason to refuse." qin lin nodded in agreement.

Although he didn't like wine, he didn't want his country's wine to be overshadowed by foreign wine.

Moreover, he owned Linlin wine factory.

if linlin wine could get the top spot in the international exchange, it would mean that his linlin wine was the best wine in the world. it would be good for him.

"Let's go to my wine cellar!" Qin Lin also stood up and extended an invitation to Li Qing and President Bao.

Li Qing's face immediately revealed a look of excitement.

She could enter Qin Lin's wine cellar again.

To a wine lover like him, even if he could only look at the wine, it was a form of enjoyment.

Qin Lin rarely entered the wine cellar himself unless it was absolutely necessary. However, as more and more wine was stored in the cellar, it was inevitable that there would be a fragrance of wine.

Moreover, the wine in the wine cellar had been stored in the game. Not only were they old, but they were also medicinal wine made from game materials, so the wine fragrance was stronger, more mellow, and more intoxicating.

As soon as President Bao entered, he was intoxicated by the wine fragrance.

Li Qing was also attracted by the scene in the wine cellar. He had been to Qin Lin's wine cellar before, so he knew that the wine rack in Qin Lin's wine cellar was filled with Linlin's medicinal wine and old wine.

But this time, he found that the Linlin medicinal wine on the wine rack was actually in silver bottles, and even bottles of wine with special wooden shells.

The bronze bottles of wine that were placed in the middle had been placed in the corners.

He knew that Qin Lin's medicinal wine was in silver bottles rather than bronze bottles, and the aged wooden bottles were more expensive than silver bottles.

then, the highest was the golden bottle, which contained an astonishing hundred-year-old wine.

This time, he actually saw a wine rack in the middle. The entire rack was filled with golden bottles of wine.

He was dumbfounded.

That was a medicinal wine that was over a hundred years old?

One must know that a bottle of this year's medicinal wine could not be found in the outside world. Qin Lin's wine was like free.

He and old Chen had long guessed that Qin Lin had a very mysterious medicinal wine inheritance, and even a secret wine cellar that they did not know about.

From the looks of it, not only was there a hidden wine cellar, the inheritance was even more terrifying.

Otherwise, the wine wouldn't have appeared out of nowhere.

President Bao, this way, please. All the White spirits are over here! Qin Lin brought President Bao and Li Qing to a corner of the wine cellar.

There were barrels of wine made of oak.

Naturally, it was filled with all kinds of white wine.

there were all kinds of products on the market, including the linlin wine made from xiangshui tribute rice.

Naturally, these wines had been placed in the game before they were taken out, and they were all very old.

"boss qin, may i know the year of these wines? in order to beat those foreign wines in the international alcohol trade, we need at least 50 years old white wine." President Bao was a little stunned when he saw the barrels of wine.

He felt that these wines wouldn't help him. 30-year-old wines were rare on the market, and 40-year-old ones were even rarer. Even if there were people collecting 50-year-old wines, they would only be sold by bottle.

Even if boss Qin was as powerful as Li Qing said, he couldn't possibly charge a barrel of wine of this year, right?

If that was the case, wine of this year would not be so rare in the outside world.

"The year of the wine has been engraved on the barrel. You can take a look at it yourself, President Bao," Qin Lin said.

President Bao immediately went forward and found that the year was engraved on the wine barrel. However, he was dumbfounded when he saw the number on it.

" 50 years old maotai, 60 years old maotai, 70 years old maotai, 50 years old fenjiu, 60 years old fenjiu, 70 years old fenjiu hehe, " president bao muttered to himself and subconsciously swallowed his saliva.

How could there be so many years of Maotai and Fenjiu in Xuanji?

Moreover, the other types of wine also had such an age.

but that was impossible.

If the wine was real, then how terrifying was boss Qin's wine cellar? Even the combined wine cellar of all the wine Masters in the country could not compare to this one.

One had to know that Maotai and Fenjiu didn't have any wine of this year in their secret wine cellars. Otherwise, they wouldn't have just sat by and watched as the foreign wine continued to occupy their share.

Currently, Maotai and Fenjiu didn't even have such aged wine, and boss Qin was using barrels to calculate?

How exciting was this?

If the bosses of Maotai and Fenjiu knew about this, they would probably go crazy.

"Boss Qin, is this 'the year of these wines' true?" When President Bao asked this, he was so nervous that his tongue was trembling.

[Chapter 915 60 Million Yuan Worth Of Wine! The Ceiling Of Hidden Wine! 1](#)

Qin Lin smiled when he heard President Bao's words. "President Bao, you can try it for yourself!"

President Bao's heart beat faster when he saw Qin Lin's confident look.

This was the truth.

Otherwise, how could boss Qin be so confident?

Besides, boss Qin had no reason to lie to him.

President Bao, " Li Qing said without hesitation. since Qin Lin asked us to taste it, we'll just try it.

His words were full of anticipation. He had directly counted himself in and turned it into them.

as he spoke, he took a wine ladle from the side, opened a barrel of 50-year-old maotai, and took out a ladle.

He immediately put it in his mouth and tasted it. With just one mouthful, he revealed an intoxicated expression."this taste, this rich fragrance"

As he spoke, he handed the wine spoon to President Bao. "President Bao, try it!"

president bao had long been shocked when he saw those years. how could he hold back his curiosity now? he took the wine ladle and put the wine into his mouth to taste it.

In an instant, the mellow fragrance and delicate taste of a 50-year-old Maotai entered his throat like thin threads.

"The real one is really over 50 years old!" President Bao was completely stunned when he tasted the year.

Li Qing had already taken back the spoon and opened the 60-year-old Maotai. He took another spoonful and tasted it. The 60-year-old Maotai made him even more intoxicated.

When he passed the wine spoon to President Bao, President Bao's expression became even more unsettled after he tasted it again.

It really was a 60-year-old Maotai.

He had only tasted a small cup of this wine when he was young. He had tasted it from a great wine collector.

The other party only had a small bottle. After that, he had not seen any Maotai that was over 60 years old.

Li Qing, who was an alcoholic, didn't care about this. He took the spoon again and began to taste the wine barrel by barrel. After he finished tasting it, he would pass it to President Bao to taste.

In the end, President Bao gradually became numb.

He even felt like he was dreaming. These wines were all real, and they were all so many years old.

"Boss Qin, how did you get these wines?" In the end, President Bao couldn't hold back his curiosity and finally asked.

The Maotai liquor company did not have any records of these years. At that time, the winery's production was not regulated at all. Even the production date of the liquor was not recorded.

Therefore, it was impossible to identify the wine from that period, let alone distinguish whether it was real or fake. It could only be distinguished by tasting.

There was no doubt that Boss Qin's wine was real.

"I don't know the specific source of these wines," Qin Lin explained. "They were all inherited from a senior. As for the others, I can't say much."

When Li Qing heard this, he immediately put on a 'I already knew' attitude and said, "Qin Lin, old Chen and I have already guessed it. Your wine-making and wine-soaking skills were also taught by that senior, right? Otherwise, the Linlin medicinal wine is not something that anyone can make."

President Bao didn't doubt Li Qing's words. Instead, he felt a little emotional. The senior that Boss Qin was talking about must be a very impressive hermit expert.

Otherwise, he wouldn't have left behind so many good wines that people in the wine industry were envious and even crazy about.

President Bao didn't forget what he was here for. He said, "Boss Qin, please sell some aged wines to our Association. With these wines, we will definitely be able to rectify the name of baijiu in this international alcohol exchange."

He was the president of the Chinese white wine Association. He knew that for this International Wine trade exchange, the foreign wine Chamber of Commerce had brought a batch of special foreign wine from a famous Palace.

That batch of wine was very old and well preserved. It was better than the wine that had been brought out in previous international exchanges.

the other party was planning to take advantage of this opportunity to give their domestic liquor a hard blow. at that time, they would wantonly promote that white liquor was not as good as their foreign liquor and occupy more of the market.

Therefore, this time, the 50-year-old liquor might be a little uncertain. A 60-year-old liquor was definitely enough, and a 70-year-old liquor was definitely a bully.

As long as boss Qin was willing to sell him some 70-year-old white wine, whether it was Maotai or Fen, or even other types of wine, the foreign wine merchants' goal would be in vain.

Qin Lin laughed when he heard this. I can sell you some vintage wine, President Bao. But it's not Maotai or Fenjiu. It's Linlin wine. President Bao, follow me.

president bao and li qing were both stunned by this.

Didn't Linlin wine just come out a while ago?

Especially Li Qing, who knew when Linlin wine was released.

However, the two of them weren't fools. They immediately thought of it.

This Linlin wine was not brewed by Qin Lin, but by that senior. It might not even be brewed by that senior, but by that senior's master.

In the past, this wine was not called Linlin wine. Now that it was in Qin Lin's hands, it was called Linlin wine if he wanted to.

President Bao and Li Qing followed Qin Lin to another corner, where there were also several barrels of wine. On them were written Linlin wine and the year it was made.

"50 years, 60 years, 70 years!" Even though Li Qing had already guessed it, he was still surprised when he saw that there was a 70-year-old Linlin wine.

Under the temptation of the liquor worm, he also took the wine spoon and opened the 70 year Linlin wine. He filled the spoon and tasted it.

"this wine!" li qing subconsciously handed the spoon to president bao.

President Bao saw that there was something wrong with Li Qing's face. He took the wine spoon in confusion and tasted it. He was also surprised. "This wine is even more mellow, tastes better, and tastes better than Maotai and Fenjiu!"

[Chapter 916 60 Million Yuan Worth Of Wine! The Ceiling Of Hidden Wine \(2\)](#)

He was a Master of Wine like Li Qing, so he could naturally taste 70-year-old wine. This Linlin wine was good for a long time.

This was for sure!

After all, this Linlin wine was brewed from the grade 2 Xiangshui tribute rice, and it already had the attributes of +2 deliciousness and +2 taste.

Moreover, after 70 years of cellaring, Li Qing could not taste the ingredients in the wine, let alone know that this was the batch of wine he had brewed.

Of course, even though they were all 70-year-old wines, Maotai and Fen were far inferior to Linlin wine.

After President Bao recovered from his surprise, he also hurriedly said to Qin ran, " "Boss Qin, please sell us a batch of this 70 year old Linlin wine!"

"Alright!" Qin Lin nodded. He had this intention all along.

"Thank you, boss Qin!" President Bao didn't hesitate. He took out his phone and made a call immediately. The Association had to fork out money to buy the wine.

Therefore, the money should be used by the members of the Association.

After hanging up the phone, President Bao looked at the 70-year-old Linlin wine in surprise again and said, " "boss qin, this 70 year old linlin wine should be the best wine in this cellar, right?"

Before Qin Lin could answer this question, Li Qing said, " President Bao, you're wrong. Boss Qin's good wine is in the middle of the wine cellar.

When President Bao heard this, he looked towards the center of the wine cellar in disbelief. He saw that the wine racks were filled with wooden bottles of wine, and there were even golden bottles of wine. Moreover, in the middle, there was something like a safe. There were two types of wine inside.

Looking at the wine, he was in disbelief.

This 70 year old Linlin wine and all kinds of older white wines could make all the wine collectors in the country feel ashamed.

Now, he was actually telling him that these wines were only a foil in this wine cellar?

Then how good would the wine in the middle be?

President Bao was filled with curiosity, but in the end, he sighed. He had already achieved his goal, so no matter how curious he was, he did not ask any further.

He understood the ways of the world.

...

When Qin Lin came out of the wine cellar with President Bao and Li Qing, Li Qing was already holding two bottles of wine in his hands, his face full of smiles.

qin lin was still a good friend. every time she entered his wine cellar, she would get a full harvest.

President Bao was also holding three bottles of wine in his hand. The top was a special oak Bottle of year 70 Linlin wine.

He would also take these three bottles of wine back to the International Wine industry exchange.

Moreover, the white wine Association had also spent a huge sum of money on these three bottles of wine.

After a while, President Bao received a call and smiled at Qin ran. "Boss Qin, the money will be transferred to your account immediately!"

Sure enough, not long after President Bao's flowers fell, Qin Lin's phone also rang with a text message.

" your last digit" has earned 60,000,000.00 yuan "

60 million!

This was the price that the baijiu Association had set for the three bottles of 70-year-old Linlin medicinal wine.

This price was based on the highest price of the bottle of aged white wine, Lai Mao wine, which was 10.7 million Yuan.

10.7 million Yuan a bottle was also the highest price in the country.

This 70-year-old Linlin wine's taste, aroma, and taste were definitely far better than the 60-year-old Lai Mao wine. Therefore, it was definitely not a problem to offer 20 million for a bottle.

On this issue, the people from the baijiu Association would not be ambiguous or deliberately give a low price. Instead, they would give a higher price.

If he gave a low price, it would be depreciating the entire Chinese liquor industry. If he gave a high price, then when Linlin medicinal wine defeated those foreign wines at the International liquor exchange, it would be equivalent to pulling up the entire Chinese liquor industry.

Naturally, by that time, the 70 year old Linlin wine would also be renowned all over the world, and the price would be far more than 20 million.

One must know that the most expensive Western wines were frighteningly expensive. The most expensive one, amaffey Supreme liquos, was 44 million US dollars (about 300 million!) Per bottle.

this was probably the most expensive bottle of wine in the world. although the wine was gone, the record was still there.

Therefore, when Linlin wine became famous all over the world, the price of this 70 year old Linlin wine would be even higher.

At that time, the brand Linlin wine would also be extremely glorious, and even have more collectible value than Maotai.

Even if the Linlin medicinal wine was stored in a bronze bottle, it could no longer be bought for a few hundred thousand Yuan.

however, after president bao and li qing left qin lin's wine cellar and were arranged to stay in the manor, they still couldn't calm down.

Even at his age, he couldn't help but take a picture of the three bottles of 70-year-old Linlin wine like a young man and post a title:

three bottles of wine worth 60 million yuan, and a visit to the private wine cellar of the boss of linlin company was truly shocking! Only then did I know what the ceiling of alcohol is!"

As the president of the white wine Association, President Bao naturally knew a lot of people in the wine industry, and many of them were big shots.

Li Qing was the first to like it.

Ding Maotai: " three bottles of 70-year-old wine worth 60 million Yuan. I really want to try it. But my private wine cellar is not bad either!

This was the owner of Maotai, a very famous private wine cellar.

"Haha, old Bao, I wonder how the Linlin company's owner's wine cellar is compared to my private wine cellar?"

This was the owner of Fenjiu, and he had the largest private wine cellar!

Drunkard Master Chen: " old man Bao! Are you exaggerating? "

This Master Chen was definitely the number one wine collector in the country. No one could compare to his collection of aged wines.

Many comments appeared. They were all famous alcohol collectors in the country who had their own wine cellars. When they heard President Bao praise the wine cellar of the boss of Linlin company, they naturally felt a little more confident.

[Chapter 917 60 Million Yuan Worth Of Wine! The Ceiling Of Hidden Wine! 3](#)

However, President Bao's unified reply left everyone speechless. "All of your wine cellars added together can't even compare to a corner of his wine cellar!"

He even tagged ding Maotai and the others behind the comments.

The entire wine industry in the country was in an uproar.

The CEOs of Maotai and Fenjiu, as well as the wine collectors, could not believe it. Whose wine cellar was more impressive than all of them combined?

However, when they thought of the three bottles of Linlin wine that cost 60 million Yuan, they all fell silent.

They were also members of the baijiu Association, so they naturally knew that the three bottles of wine were 70-year-old wines. They were going to represent baijiu in the International alcohol exchange meeting.

If this kind of wine could be easily taken out to be sold, President Bao could guess how much more good wine they had in their wine cellar without saying.

the next day.

Just as the popularity of Linlin's dog food dropped, everyone was surprised to find that Linlin's company was on the hot search again, and this time, it was because of the wine of the boss behind Linlin's company.

Someone must have posted President Bao's post on the internet.

However, the netizens didn't care about the wine cellar at all. Their attention was all on the three bottles of 70-year-old Linlin wine that cost 60 million Yuan.

Although it was a little tacky, the netizens were more concerned about this.

A bottle of wine that cost 20 million was something that countless people couldn't believe. Once the video was released, it could be said that the entire internet was blown up.

"really? A bottle of Linlin wine costs 20 million? Wasn't the Linlin medicinal wine only worth a hundred thousand Yuan before?"

it's definitely a gimmick. The internet really doesn't treat money as money these days.

"I'm afraid the person above doesn't know what a 70-year-old wine means!"

haha, there's actually someone who doesn't know President Bao. Is it better than knowing the boss of Maotai? The owner of Fenjiu?"

exclusive news. A bottle of Linlin medicinal wine is worth 20 million!

As the video went viral, the price of 20 million per bottle of Linlin wine was quickly confirmed.

Many people rushed to the cabinets and took out the Linlin wine they had bought. Richardson was one of them. He ran to a cabinet and took out a box of Linlin wine.

He had ordered this before, but after seeing the hot search on the internet, he saw a business opportunity in this box of Linlin wine.

This wine might be more valuable as a collector's item than Maotai, and its price would probably rise soon.

Richardson didn't hesitate and left the house immediately. He should buy more Linlin wine at this time, as there weren't many of them on the market.

Of course, this was just the ordinary Linlin wine brewed by the Linlin winery, and it was not brewed with Xiangshui tribute rice.

however, not many people outside knew about this. therefore, the market was in a frenzy to buy this ordinary linlin wine.

These were all smart people.

A month passed in the blink of an eye.

An International Wine Exchange had attracted the attention of many people.

At this exchange meeting, President Bao brought the 70-year-old Linlin wine, representing that the domestic liquor had defeated the foreign liquor at the exchange meeting as expected, and it was a crushing defeat.

Linlin wine became the most valuable wine in the world.

this news became a hot topic after the international alcohol fair ended.

when this hot search news came out, linlin medicinal wine became a world-class wine.

In the country, Linlin wine's brand directly surpassed top-tier wines like Maotai and Fenjiu, and its price also rose.

Naturally, the internet was even more lively. One by one, popular videos with bragging rights appeared:

haha, I knew this would happen. I bought two boxes of Linlin wine. It's a huge profit!

"I bought a batch of Linlin wine and earned a car from selling it!"

selling houses to stock up on Linlin wine a month ago, we can sell three apartments now!

Indeed, many people who hoarded Linlin wine, even if it was just ordinary Linlin wine, still made a lot of money.

You City County also heard the news immediately.

The first thing Chen Li did was to inform sun Xian about the news.

"That's why it was the best choice to sell the winery and give it to Linlin villa," sun Xiandu said.

Back then, the winery was already half-dead and almost closed down. However, the winery was still the original wine cellar and the original winemaker. After it fell into boss Qin's hands, the brand Linlin wine was created.

boss qin was the only one.

Moreover, this was a good thing for you city. They had another good thing to promote.

In the future, when they publicized it, they could proudly say that this Linlin wine was a specialty product of their you city.

Chinese Academy of Sciences.

In Minister Lu's office, he had also seen the news about Linlin wine. He smiled and said to his Secretary, "hehe, boss Qin's food is always good. Even his wine is better than the others.

"Yeah, Linlin wine is the best wine in the country now." The Secretary chimed in. He knew that his boss was talking about Linlin company and boss Qin the most.

minister lu smiled and said, " this is also a good thing. previously, the share of foreign wine in the domestic wine market was getting higher and higher. this is not good for our own country's wine industry. now that linlin wine has intervened, this situation can be contained. "

Minister Lu's phone rang. He picked it up immediately when he saw the number, " "Leader, what are your orders?"

A serious voice came from the other side. it's been delayed for a month. We can't suppress it anymore. We have to deal with it now. You have to appease boss Qin when the time comes!

Minister Lu's expression turned serious when he heard this. "Leader, then I'll go and talk to him personally!"

"Alright, you must handle this matter well!" The leader replied.

After hanging up the phone, Minister Lu sighed. Time was too tight, and they had to come to this step. But no matter what, he had to drag it out. If he could drag it out for more time, he might have a solution to the problem.

This was the only thing he could do for boss Qin at the moment.

[Chapter 918 The Seed's Predicament!](#)

Time flew! Another period of time passed.

With the change of seasons, many plants began to enter the influence of the seasons, which could not be adjusted. Some plants began to grow madly, while others began to wither.

they all had their own seasons.

However, many tourists also realized that this law of nature did not seem to have much effect on the triangular plum blossom sea of Linlin villa, the duckweed in the floating bridge Scenic Area, and the pasture of Linlin Ranch.

The treatment room in Linlin Manor was a little busy today because Tang Wan had moved in by herself. She should be giving birth soon.

As the person-in-charge of the treatment room and professor Li Kai's fiancée, Ling ran and the nurses did not dare to be negligent.

The recovery room in the manor already had specialized pre-examination equipment and a room for pregnant women.

Lin Fen was worried about Zhao moyin, so she asked Qin Lin to buy it. Ling ran and the nurse could do the pregnancy test. As for the child after that, they could just invite a professional doctor.

After all, it was normal for doctors to be invited to treat patients in other hospitals. Naturally, those who were invited were the top doctors with excellent medical skills, especially those professors.

this was considered an extra income for doctors.

If Linlin Manor's recovery room wanted to invite a doctor to the manor to help with childbirth, there would be many people who would fight to come. No matter how skilled the doctor was, he could be invited.

It could be said that this Manor's treatment room was becoming more and more formal. At least, it was equipped with all kinds of examination equipment, and even the equipment was better than some hospitals.

However, before Zhao moyin could experience it, Tang Wan had already.

With Qin Lin and Li Kai's relationship, everything was fine now that Li Kai had spoken.

In the recovery room.

Not only had Li Kai come, but even Lin Fen and Zhao Moyu had come.

Lin Fen was naturally here to check out the situation. In the future, her daughter-in-law, Zhao mochen, would also be giving birth here.

"how's the bed? is it comfortable?" Lin Fen asked as she looked at Tang Wan lying down. She was naturally asking on behalf of Zhao mochen. If it wasn't comfortable lying down, she would ask her son to buy a new bed.

His daughter-in-law was the most important thing right now.

"auntie, it's very comfortable to lie down." Tang Wan answered with a smile.

"that's good, that's good!" Lin Fen smiled and nodded.

Zhao Mo smiled as she watched from the side. In fact, she was a little nervous in her heart. After all, it was her first time pregnant.

Dr. Tang's pregnancy test was normal, but according to her condition, she should be giving birth soon. The fertility doctor Who was invited came in with the test report and said.

"Okay, thank you, doctor." Li Kai thanked her. After Tang Wan's check-up, he was completely relieved.

After that, Tang Wan and Zhao mochen went to talk about things to take note of for pregnant women. Qin Lin also invited Li Kai to the office to make tea.

After they sat down, Li Kai started talking about business."The Chinese Academy of Sciences approved us to help in the research of seed production. Over the past month, I've been working on it with my people, but the progress hasn't been great. The seed production problem can't be solved in a short time."

In this regard, he could do nothing about it. Thinking back to the time when the country supported rice production to increase production, how much time did it take to achieve the present results?

as li kai was thinking, there was a knock on the office door.

Yu Shui came in with a face full of surprise and reported, " Chairman Qin, good news. The seeds that we planted before, the radishes, eggplants, and cilantro, can be harvested, but the yield is incredible.

qin lin laughed when he heard the news.

Under normal circumstances, it would be difficult to increase the production of seeds. However, he had a seed processing machine. After processing the seeds, he could increase the production and shorten the growth time.

Looking at the time, some of the faster growing crops should have matured by now.

Although Qin Lin knew this in his heart, he still pretended not to know and asked, " "What's wrong with the production?"

Yu Shui explained in a hurry, " Chairman Qin, let's not talk about the eggplants. I've asked someone to weigh them. The production is three times the normal output. The production of the White radishes and coriander has also doubled.

"What?" When Li Kai heard this news, he stood up in shock. His face even had an expression that said, " are you kidding me? "

He had been studying in the laboratory for a while, but he had not gained anything in increasing the production of seeds.

Who knew that Linlin Manor's plantation Department had grown crops that had increased production by two or three times?

What kind of joke was this?

They were professionals, not as good as laymen.

"Manager Yu, quickly take me and Brother Qin to take a look." Li Kai said to Yu Shui anxiously. Under such circumstances, he naturally wanted to see the specific crops as soon as possible.

Yu Shui immediately nodded and led Li Kai and Qin Lin out of the manor. Then, they went to the plantation area that had been specially isolated.

There were already many employees of the plantation Department waiting there, all of them looking very surprised.

Most of these employees came from the countryside and used to be farmers. They were naturally familiar with crops like white radishes, coriander, and eggplants, and knew their production.

Now, the mature crops really surprised them.

They had never seen an eggplant that could produce so many fruits.

Li Kai, Qin Lin, and Yu Shui soon arrived. He crawled to the plantation area and asked Yu Shui, " "Are these the eggplants, coriander, and radishes?" he asked.

yes, professor li, " Yu Shui quickly nodded. these are the seeds you've researched.

" ? ? ? "When Li Kai heard this, he was stunned.

[Chapter 919 The Seed's Predicament! Trouble Is Coming! 2](#)

He researched it?

when did he start his research?

Why didn't he know about it?

Yu Shui continued, " when the boss gave me these seeds, I knew that the seeds you developed would be extraordinary. Now that I've planted them, it's true. I didn't expect the yield to be so high.

Li Kai opened his mouth and felt the weight on his back getting heavier. He was completely unaware of this.

Li Kai subconsciously looked at Qin Lin and walked up to him. He pulled Qin Lin to the side and asked in a low voice, " "Old Brother Qin, what exactly is going on?"

Seeing that Li Kai had asked, Qin Lin could only make up another story. old brother li, it's a little complicated. I read the Qimin Yaoshu that Jia Sixie wrote in ancient times. There's a special secret in it. Medicinal herbs can be used to make a potion that can soak seeds and increase the production of seeds. I tried it.

"Is it that 'great seed secret water'? Isn't that a fake?" Li Kai exclaimed in surprise.

Qimin Yaoshu was a famous agricultural book in ancient China. It talked about many aspects of farming, grains, vegetables, fruits and vegetables, trees, animal production, and the brewing of steamed bun.

One of them was about increasing the production of crops. Some special medicinal herbs were used to soak seeds in medicinal water, which could increase the production of seeds.

It was rumored that Jia Sixie had used this method to increase the production of seeds during the eastern Wei period, but it was unknown how it was lost later on, and no one had ever used this method to increase the production of seeds.

he had made this kind of medicine in the laboratory in ming city, and other related laboratories had also done it. even senior yuan's team had done it before.

However, it was a pity that the 'great seed potion' was useless, and it had already been proven to be fake.

" ? ? ? "Qin Lin just wanted to push it to this book, but he didn't expect it to have such records.

He didn't hesitate and immediately started to make things up. it shouldn't be fake. It's just that the proportion of the medicinal herbs and the age of the medicinal herbs are very high. I made it several times and only succeeded once. After soaking these seeds, I didn't make any more effective potions.

also, the seeds that were soaked in the same batch produced normal yield when they were planted by Yushui previously. This time, I gave them some special soil for them to grow the seeds first and then plant them. The yield has increased.

When Li Kai heard this, he seemed to understand. that is to say, other than the potion, it is also related to the special soil? "

As he said that, he felt that it was only right. perhaps it's really because of all these factors. During the northern Wei era, the soil that Jia Sixie planted might have been more fertile or slightly different. It's no wonder that the previous laboratories couldn't produce any results.

Qin Lin immediately agreed. yes, yes, it should be like what old brother Li said. I can't think of a reason. Old brother Li is a professional. You know the reason immediately.

Li Kai sighed. but if that's the case, this method can't be replicated. Whether it's the medicine or the special soil, outsiders have no way of verifying it. We can only keep it a secret and not let outsiders know.

In other words, he was going to be the scapegoat again.

however, he was used to such things.

so, he didn't hesitate and returned to the plantation area. he said to yu shui, manager Yu, apart from the seeds that were kept, all of them were harvested. If we calculate the average yield, is it that high? "

"Alright, professor li!" Yu Shui replied happily. He felt honored to be able to participate in professor Li Kai's research.

He wondered if professor Li Kai would mention Yu Shui's name in his book.

After all, he had helped professor Li Kai plant it many times and carefully took care of it.

Yu Shui's action was still very strong. With the staff of the planting Department, they quickly picked all three mature crops.

After that, he calculated the total yield of those crops.

This time, Li Kai personally watched over the production of the eggplants. As expected, the production of the eggplants had increased by three times, and the radishes and coriander had also doubled.

In other words, Brother Qin had really managed to create a seed that could increase the production by so much by accident.

If these seeds were to be spread, it would simply be an era-transcending event.

Li Kai thought of something and immediately ordered Yu Shui, " manager yu, help me prepare some crops. i need to go back and check the gene fragments. "

he was an expert in this field, so he could naturally tell that these were all grown from foreign seeds. however, if that was the case, he had to conduct an inspection in this area.

Whether it was a crop gene fragment or a seed gene fragment, if it was the same as those foreign seeds, they would have already applied for patents.

However, with the increase in production, there would definitely be changes. As long as the gene fragments were a little different, they could apply for their own patents again.

At that time, those foreign seeds should just die.

When Li Kai brought the crops back to Lin Lin's laboratory for testing, Qin Lin brought some radishes, coriander, and eggplants back to the manor's office.

As soon as he entered the office and locked the door, he brought the things into the game and saw the message:

[coriander: normal!]

[white radish: normal!]

[Chapter 920 The Seed's Predicament!](#)

[Linlin eggplant: quality 1!]

After the production of the seeds increased, the quality did not change. The radishes and cilantro were grown with ordinary seeds, so they were still of ordinary quality.

The Linlin eggplant's yield was increased by three times, and it was planted with a quality 1 seed, so the fruit was of a quality 1.

After reading the message, Qin Lin walked out of the office and went to the living room. He saw academician li reading the news with a serious expression.

Academician li even said, "damn it, the starstrip empire is determined to destroy me!"

"Academician li, what's wrong?" Qin Lin stepped forward and asked doubtfully. don't let this old senior get angry.

Academician li held the remote control and frowned as he played the video. He said, "Boss Qin, take a look at this news!"

'The Star-Spangled Kingdom's Meng Sandu seed company will suspend the import of seeds to us and restrict us from continuing to plant seeds related to the gene fragments of Meng Sandu.'

Willis seed company of the Star-Spangled nation announces that they will no longer supply seeds.

Western seed company, Qianqian "

Qin Lin immediately frowned.

This is the video about the seeds. It seems that the Western seed company wants to sanction us and not sell us seeds.

"Something big is going to happen." Academician Li said angrily.

they had already guessed that such a problem would arise, and they had indeed started to use this matter as a document again.

"Academician li, is this bad?" Qin Lin asked, puzzled.

Academician li nodded. when this news came out, the internet was probably in chaos. Some people should be talking about it now. Go and take a look!

Obviously, academician li didn't want to talk about this topic; he was really angry.

Qin Lin could only frown and take out his phone. He logged into mouyin, and sure enough, the news was all about this seed.

After watching a few videos, including two popular science videos, he finally understood what was going on.

Even now, when we're strong, there are still many things that are controlled by others.

It's not just technology that we're stuck at, but also farming.

For example, shouguan in the Eastern Province was the largest vegetable distribution center in the country. The export of agricultural products here reached 155 billion Yuan, accounting for 22% of the country.

It could be said that in the North, six out of ten people ate the dishes of the pass of longevity. However, behind this powerful vegetable-growing force, the lifeline of the pass of longevity's seeds was in the hands of foreign countries, especially some countries led by the Seijo nation.

Among the thousands of vegetable species in shouguan, more than 80% were foreign seeds, which had been suppressed for a long time.

The predicament of the longevity pass was only a microcosm of it. The current state of agriculture in the country was mostly like this.

although we are a big agricultural country, our crop seeds are almost all controlled by foreign companies, which is ridiculous.

For example, the patents for common seeds such as broccoli, eggplant, celery, coriander, big red tomato, white radish, sweet chili, and so on are not ours. The foreign wage workers have long applied for gene fragment patents.

The Starstreak country was the largest export country of seeds and a technological powerhouse.

The sales of all 5800 seed companies in our country added together are not even as good as the dream mountain Capital seed company in the stargazing state in the news. It's even less than one-third.

Seeds, on the other hand, were at the forefront of the agricultural industry chain and one of the fundamental driving forces for agricultural production increase. However, seeds in this area had been monopolized, and even the right to supply and price were in the hands of others.

Our entire agriculture industry was stuck at the throat, and it was almost difficult to breathe.

Therefore, the price of these foreign seeds was far higher than that of domestic seeds. Some seeds could even be dozens of times higher.

Perhaps some people would ask why they had to use others' seeds. Couldn't they buy their own seeds?

This was related to the production, because the production of other people's patented seeds was far higher than that of domestic seeds, which was an indisputable fact.

The production of one grain is equivalent to 10 grains of yours, so how do you choose?

if he used domestic seeds, he would have to pay ten times the price to grow the same yield. he had no choice but to choose other people's seeds.

To a certain extent, being held back in this aspect was even worse than being held back in terms of technology.

Qin Lin finally understood why academician Li said something big was going to happen.

If that was the case, this was indeed not a small matter, and it could even shake up the entire farming industry.

However, the other party had done such a thing, so their goal was definitely not simple. If they had no goal, they would not be at the mercy of others now. The other party's loss would not make up for the gains.

At this moment.

Beijing.

At the Chinese Academy of Sciences.

Minister Lu was also in a terrible fix. He had seen the news, so he tried his best to stall for time, but in the end, he had no choice.

Up until now, there was no news from any laboratory that there was a breakthrough in the seed growth experiment.

of course, he knew that the other party was flipping the table. the seed punishment was not their goal. they just wanted to use this method to get what they wanted from boss qin.

At this moment, Minister Lu's phone rang. He looked at the number and quickly answered it. Hello, leader!

The other party immediately said, " the other party is already dissatisfied. We can't drag this on any longer. Otherwise, there will be a very bad problem. Go to the other party immediately to discuss with them. If it doesn't work * let them see boss Qin *

"Alright, leader!" minister lu hung up the phone helplessly, got up, and left his office.

Sometimes, being controlled by others was just so uncomfortable.
