

## The Game 951

### [Chapter 951 You Have To Pay The Price! Different People! 2](#)

There were still no riddles in the library today, and the goddess didn't gain anything.

Just as he was lamenting his bad luck, his phone rang.

It was Minister Lu.

Minister Lu's voice was heard as he answered, "Boss Qin, I'm really sorry for suddenly disturbing you. There's another academician who needs to be arranged to recuperate at your place."

As he spoke, Minister Lu's voice became a little awkward. "Boss Qin, this academician is different from before. I hope you can forgive him. If there's anything, just call me."

Qin Lin hung up the phone, feeling that something was wrong.

Minister Lu sounded like he hated this academician.

It was the first time he had seen Minister Lu like this.

The most important thing was that when academician Zhu and academician Li came to the manor, these seniors gave him a good impression. Minister Lu also had a good relationship with these academicians.

Not long after.

There was a knock on the office door.

Academician Li walked into the office and smiled as he said, "Boss Qin, I'm here to ask for a cup of tea."

"Academician Li, what are you saying? you can drink as much as you want." Qin Lin said as he took out a Grade 2 wild Tieguanyin and started to make tea. He then poured a cup for academician Li.

After academician Li took a sip of tea, he said, "Boss Qin, an academician named Luo is coming, please be kind!"

"??? "Qin Lin was a little puzzled and asked, "academician Li, who is this academician Luo? why do you and Minister Lu look so worried? "

"Did Minister Lu remind you?" that's true, "academician Li said with a smile. people don't like researchers who aren't pure.

"Academician Li, can you tell us?" Qin Lin was even more confused.

Academician Li sighed and said, "it's fine to talk about it. This academician Luo is different from me and academician Zhu. He prefers to bring power into scientific research. Also, he's more stubborn about ranking based on talent.

Qin Lin sat on the side and listened to academician Li's story. He roughly knew why academician Li and Minister Lu didn't like academician Luo.

If academician Li and academician Zhu were pure researchers, then academician Luo was not.

For a long time, the issue of seniority in domestic scientific research had been criticized, and many young talents were dissatisfied with the current situation in China and left the West.

Most of these people didn't have the ability and lacked confidence, but some of them were definitely capable, and very powerful at that. They had been forced to leave.

This involved the same issue of seniority.

Originally, the higher-ups wanted to take care of some old seniors who had made contributions, so they decided to rank people according to seniority.

For example, academician Hao, who had just returned, had made a lot of contributions and studied many strategic research projects with different research groups.

Even though he wasn't the leader of this research, his contributions couldn't be ignored. He was a senior who had made contributions.

Even a famous person like professor Ren was inferior to academician Hao.

This kind of seniority was originally a good thing. After all, no one wanted to be forgotten when they were old after making contributions in their youth.

However, there were two sides to everything. Some people liked to use political tactics to turn this kind of good thing into a bad thing. Therefore, it evolved into a matter of some geniuses leaving the West in dissatisfaction.

This academician Luo liked to bring power into scientific research. He suppressed young people, and even after young people read their own papers, they had to sign their own names on them.

Who could stand such a situation?

The key was that there were many such researchers in the country.

Therefore, people like academician Li, academician Zhu, and even Minister Lu didn't like this kind of people. academician Li, " Qin Lin said helplessly, " why did Minister Lu get this kind of person to come to my Manor? "

In fact, he didn't like this kind of person either.

Academician Li said helplessly, " academician Luo's ancestors made a lot of contributions to the country, so he has some connections behind the scenes. In addition, one of his research has been at a critical stage and he hasn't been able to make a breakthrough. He knows that your treatment here will help his research breakthrough, so he wants to give it a try.

moreover, he wasn't the one who was supposed to come to the manor, so he used some of his connections. Minister Lu had no choice but to hope that he wouldn't cause any trouble.

This really gave Qin Lin a headache.

In Beijing, Minister Lu was also having a headache in his office. He answered a phone call, " "Leader, I understand what you're saying. I'm just afraid that this kind of person will offend boss Qin. Who would

like someone who's so arrogant and likes to play with power? he's always thinking of himself as someone high and mighty."

leader, I know that his ancestors have made contributions, and the research is at a critical moment, so I let him go. I've also talked to boss Qin.

but leader, you should know that he's doing this for that position. Once his scientific research results achieve a breakthrough, wouldn't that be a bonus? "

to be honest, I really don't want him to be in that position. Even though he's better at scientific research, I prefer people who are pure in scientific research.

yes, yes, I understand. If he and boss Qin are not happy, then he will come back immediately.

Minister Lu heaved a sigh of relief when he hung up the phone.

Fortunately, the higher-ups still valued boss Qin more. Now that academician Luo had used his connections, he could only hope that he wouldn't have an unpleasant relationship with boss Qin.

At this moment.

On the plane from Beijing to Ming city, an old man sat down in the first-class cabin.

luo hui looked at the introduction to the linlin manor in his hand and was looking forward to this trip. this time, he had used his connections to grab the opportunity to go to linlin manor.

Therefore, he also set off with one of his assistants.

Although Minister Lu had warned him not to bring an assistant, he didn't think there was any problem.

He had gone on vacation because the environment of Linlin Manor was conducive to research. His experiment was at a critical point, so he naturally needed an assistant to help him.

"academician luo, do you think this linlin manor is really that magical?" The middle-aged man beside him asked. He was Luo Hui's assistant.

luo hui smiled. " just look at professor li kai. linlin manor isn't that amazing. he can't keep on researching. "

there's also academician Zhu and academician Fei. They've been stuck with that rocket problem for a long time. People from Western countries are also stuck with that problem, but the three of them made a breakthrough after going to Linlin Manor.

after they went back, they also introduced the situation of Linlin Manor. The Environment, Food, accommodation, and projects there are indeed helpful for research.

that's why I used my connections to go there. As long as I can make a breakthrough in my research, that position in the hospital will be mine.

The middle-aged man frowned. academician Luo, since Linlin Manor has such an effect, why don't you think Minister Lu made it our hospital's special recuperation place? every time he sends one or two people over, he still has to apply for permission from the other party? "

Luo Hui sighed. this is probably the weakness of an ideal person like him. It's the same for scientific research and doing things.

so, when I go to Linlin Manor to understand and understand the current research, once the experiment breaks through, that position will be mine.

when the time comes, I'll have to talk to Minister Lu and give me the right to arrange treatment in Linlin Manor. Only by letting me make the arrangements can Linlin Manor play its role to the greatest extent. It's not like now, where I have to apply to arrange a few people to go.

"Academician Luo, Linlin company is behind the Linlin Manor!" The assistant said with a frown.

Luo Hui didn't seem to mind. Linlin company is indeed being watched by the higher-ups, but the most important thing for a country is scientific research. Since Linlin Manor is helpful for scientific research, it should be used reasonably. It shouldn't be arranged by a businessman based on his mood.

"That's true!" The assistant felt that it made sense.

Luo Hui continued, " that's why we have to work hard this time. We have to try to solve the difficult problem of our experimental project. If academician Zhu and the others can make a breakthrough here, there's no reason we can't.

#### [Chapter 952 Why Would People Be Hated?](#)

Linlin Manor.

Qin Lin and academician li were already waiting at the door because the academician named Luo Hui was coming.

After hearing about academician Luo's character, Qin Lin didn't like him very much. However, all the previous academicians had welcomed him, so he couldn't make things too ugly.

Academician li didn't like academician Luo either. He also came to the door to welcome him.

i'll just take it as giving minister lu face.

A car quickly stopped at the manor.

Luo Hui also got out of the car with his assistant.

The reason why academician li came was that he was afraid that academician Luo's temper and high-and-mighty personality would make boss Qin unhappy.

Hence, when he saw Luo Hui get out of the car, he immediately went up to him. academician Luo, I've been waiting for you for a long time. Let me introduce you. This is boss Qin from Linlin company.

Luo Hui naturally looked at Qin Lin.

When he arrived, he already knew the other party's identity. The outside world thought that the unidentified middle-aged man on the internet was the owner of Linlin Manor, but they knew that this young man was.

However, with the help of you City County, the outside world would not know about this.

However, it wasn't normal for academicians like them to have to look at the mood of a young man when they were recuperating.

It was a pity that he did not have the ability to do anything at the moment. He could only wait until his research had a breakthrough in the Linlin Manor and after his research was completed, he would have extra points in the competition for that position.

after he won the competition, he would have the right to speak in the chinese academy of sciences, and then he could apply to the higher-ups for this right.

He wouldn't be like Minister Lu, who did nothing.

"Boss Qin, it's a pleasure to meet you." no matter how many thoughts Luo Hui had, he still smiled and shook Qin Lin's hand. at the same time, he said tentatively, "Boss Qin, this is my assistant. I'm used to living alone, can you help arrange a room for him?"

He naturally knew that Linlin Manor was a suite, so there was no problem for his assistant to live with him. Linlin Manor would not usually arrange another room for him.

he did this because he wanted to see boss Qin's attitude.

Since he had already brought it up like this, the other party couldn't possibly not give him face, right?

"Academician Luo, our Manor is a suite. It's very spacious, and there's more than one room. Your assistant can definitely stay there." Qin Lin said with a smile.

He didn't have a good impression of academician Luo, so he naturally couldn't make any extra arrangements for him.

It wasn't that he couldn't feel the other party's probing attitude, but he really didn't like it.

"That's fine," Academician Luo immediately said with a smile, but his heart was already a little gloomy.

"Boss Qin, I heard from academician Zhu and the others that your Manor's greatest specialty is the emperor's Supreme medicinal cuisine," he asked with a smile.

"I've also eaten the emperor's Supreme medicinal cuisine made by the chefs of the state banquet in Beijing, but it's far from what academician Zhu and the others described. I wonder if boss Qin can arrange a meal for me?"

When academician Li heard this, he quickly said, "academician Luo, only boss Qin knows how to make this Emperor's Supreme medicinal cuisine. Furthermore, boss Qin will only make it regularly when he's free. You can't force it.

He was just reminding academician Luo.

With boss Qin's status, it was up to his mood to make the emperor's medicinal cuisine. He could not force it.

Luo Hui also understood what she meant, but he didn't know if it was because he cared too much about his face or something else, but he still suggested, "Boss Qin, when I heard from academician Zhu and the others, I've been craving for a long time. I wonder if I can trouble you, boss Qin!"

Academician Li's head was full of black lines.

Damn it, this guy was using the same method he used to treat his team members in the hospital. It seemed like his reminder was directed at the air.

I'm sorry, academician Luo. I need ingredients to make the emperor's Supreme medicinal cuisine. I don't have any ingredients right now. I have something to do here, so I'll go and settle it first. Qin Lin now knew why academician Li said that the other party was not welcomed, so he left after saying a few words.

To be honest, he could make the emperor's Supreme meal anytime he was in a good mood. However, the other party's attitude really made him uncomfortable.

He could hear academician Li's reminder, so it was impossible for this person to not hear it. It was a bit awkward for him to make a request.

logically speaking, since he was an academician, he should not be like this.

He had decided that he would ignore this person when he was in the manor and not meet with him. It was better not to see him.

As for the moonstone, he couldn't give it to the other party to use. There was no way he could comprehend it and break through.

Seeing Qin Lin leave, Luo Hui felt even more annoyed.

He deeply felt the arrogance and rudeness of a merchant.

However, he still smiled at academician Li and said, "Academician Li, this boss Qin has quite the character."

Academician Li knew academician Luo well, so he changed the topic and said, "academician Luo, the environment of this Manor is very good. I'll show you around."

Luo Hui didn't refuse. He followed academician Li inside, and the scenery around the manor caught his eye. It was indeed amazing.

The academicians all had regular recuperating. He had been to many places to recuperate, but none of them could compare to the environment of Linlin Manor.

Everything suddenly became clear at a glance.

The clusters of flowers were gradually mesmerizing, and there was an indescribable sense of comfort. The environment of the manor had really been built to the extreme.

### [Chapter 953 Why Would People Be Hated?\(2!](#)

If this place could become the exclusive treatment center of the Chinese Academy of Sciences, he would have the right to arrange for anyone to come over for treatment. That would be great, and the academicians in the Chinese Academy of Sciences would thank him.

Therefore, he had to work hard this time and try to make more breakthroughs in his experiment.

He knew that academician Zhu and the others didn't like him for their ideal scientific research.

But this time, he wanted to prove that if the other party could do it, he could too.

The other party proved that Linlin Manor was helpful for scientific research in half a month, so he had to use an even shorter time to enter the state that academician Zhu and the other two had described.

academician Luo, I've already arranged a room for you. There will also be fish therapy arrangements. Gao Yaoyao walked up to Luo Hui and academician li when they entered the hall.

Even though Qin Lin didn't like academician Luo, he still had to make arrangements.

The kiss fish project had always been a feature of the manor, and it was something that academician li had been looking forward to.

He would be at ease after having fish therapy twice a day.

This was Luo Hui's first time experiencing kiss fish, and he felt a sense of carefreeness. Almost half a year's worth of fatigue disappeared in an instant, and he entered an indescribable state of relaxation.

This made him believe the words of academician Zhu and the other two even more. That kind of perfect environment, coupled with this kind of relaxed mental state, was really too perfect.

It would be much easier to study it in such a situation.

Luo Hui couldn't help but ask academician li,"academician li, since this Qin Lin Manor is helpful for scientific research, what do you think about applying for it to be our hospital's exclusive sanatorium?" You're fighting for the benefits for all of us."

Academician li felt helpless and said, " academician Luo, Minister Lu is in charge of this. We don't need to worry about it.

He felt like academician Luo was not putting himself in a good position.

He was also an academician like him. Even if he wanted to compete for that position, he hadn't succeeded yet.

Could it be that the other party still wanted to be the master of Linlin Manor?

Moreover, didn't the other party like to do scientific research with power? could it be that he couldn't see how much the higher-ups valued boss Qin?

One had to know that people like him, who only cared about research and didn't care about others, could see that boss Qin had punished the Overlord country of the West several times. His actions must have won the hearts of the higher-ups!

Luo Hui also smiled without saying anything.

Minister Lu was now in charge, but he could still apply for this right if he could complete his experiment and win the competition.

"Academician Li, I'm going to go back and do some research." Luo Hui could feel academician Li's attitude, so he went back to his room.

it was hard to communicate with these people who were full of ideals.

However, he had to focus on his research first.

He felt that his current state was very good. He had to study it with his assistant. Maybe there would be a surprise.

After he returned to his room, he and his assistant started to read through his experimental data.

However, he obviously didn't know that if he wanted to break through in Linlin Manor, he didn't have to rely on the manor itself, but on the moonstone. Moreover, whether the moonstone would work or not would depend on Qin Yang's willingness.

thus, Luo Hui and his assistant naturally did not gain anything after a night.

If it was so easy to make breakthroughs in experiments at the level of the Chinese Academy of Sciences, there wouldn't be so many experimental problems that took years or even decades to overcome.

Luo Hui wasn't someone who was dejected. This was only the first night, and there was still half a month to go.

therefore, the next day, he continued to enjoy the manor's environment, scenery, and fish therapy. he breathed in the perfect air, and at night, he even had incense to help him sleep deeply, so that the quality of his sleep was perfect.

When he was in his best condition, he would bring his assistant to study his experimental data.

Qin Lin naturally didn't like this person, so he didn't appear.

However, as the days passed, Luo Hui slowly became more and more irritable.

this was because he would study his experimental materials with his assistant every day when he felt that he was in the best state. he would delve into the problems that he encountered in his research, but in the end, he had no results at all.

In the blink of an eye, 14 days had passed.

"Why is it like this? It shouldn't be!" An annoyed voice came from Luo Hui's room.

He didn't lose to anyone in his life, and he also hated people like academician Li and academician Zhu who were full of their ideals.

This time, he wanted to enter the state that academician Zhu and the others talked about in half a month. He wanted to make a breakthrough in the experimental difficulty and prove that he was not worse than them.

After all, academician Zhu's rocket research was more important than his research.

Even if they had the same amount of time, he would still lose.

it had already been 14 days, just a little short of the half a month he had expected.

The result seemed to be different from what he had expected, and it seemed to prove that he was really not as good as those guys in their ideal state?

This made him even more frustrated.

The assistant next to him suddenly said, "academician Luo, I received news. It seems that professor Li Kai's low-temperature genetic experiment breakthrough and professor Zhu's breakthrough were both in the park of the manor. Should we try it there? "

Luo Hui felt that this was nonsense. How could scientific research have anything to do with the local area? The most important thing was still to rely on one's own ability.

however, he was very frustrated now, so he could only reply, "Let's go take a look."

Linlin Manor's Park was very beautiful. Every plant was a product of the game and had the attributes of the game. It could be said that there was no other place like this in the country.

### [Chapter 954 Why Would People Be Hated? 3](#)

Luo Hui and his assistant found a place to sit down and continued to study the materials. They thought about the formula to solve the difficult problem, but in such a beautiful environment, it was still of no help to him.

Without any cheats, any research needed to rely on real talent and the ability of the researcher. If one couldn't break through, it meant that they were not capable enough or had not found the right direction.

Therefore, in Linlin Manor, without Qin Lin's help, everything would be in vain.

A baby's cry rang out, causing Luo Hui to be even more upset.

It was Lin Liu and the others who were also walking over from the park. It was normal for children to be distressed when they were young, but at this time, Luo Hui's mind was in a mess and he really felt that it was ear-piercing, so he impatiently said to Lin Liu and the others, "you guys, if the child is troubled, bring him back to his room. You're interrupting my thoughts."

These words made the three girls slightly dissatisfied. After all, everyone was recuperating in this Manor.

However, they knew that he was an academician, so they didn't want to bother boss Qin. The three women left the park.

Luo Hui's thoughts were completely lost after being disturbed by the child. He could only helplessly walk out of the park and see Lin Fen and Zhao Moshu taking a walk.

This made him shake his head even more, saying, "Since this place is helpful for scientific research, and we academicians are recuperating here, why are there a group of women and children here? What if they interrupt us when we have any inspiration?"

The assistant frowned. academician Luo, this is his place. It's his freedom to make the arrangements.

"Hmph, I have to tell boss Qin about this." Luo Hui snorted and walked towards Qin Lin's office.

His heart was in a mess and he was holding his breath. He wanted to find someone to make him feel uncomfortable. Besides, he felt that what he asked was normal.

In the office.

Qin Lin was controlling his game character to carry pieces of wood and put them into the wood storage warehouse. Today, two more yellow Rosewood trees were refreshed on goddess mountain, and he got several pieces of yellow Rosewood of Grade 2 and 1.

Now, when it came to fragrant Rosewood, there was probably no one in the country, or even no company, that had more fragrant Rosewood than him.

There was a knock on the door.

He called for Luo Hui to come in and saw him walking in with his assistant.

this made him frown. why was it this person? after he found out what kind of person this person was, he had been avoiding meeting him, afraid that he would not be able to help but scold him.

After Luo Hui sat down, he directly stated his purpose, " boss Qin, since we academicians have come to your Manor, you should ensure that we have a good thinking environment.

Qin Lin was puzzled,"academician Luo, is the environment of my Manor not good?" Or are you saying that our Manor's kiss fish and other projects are not good?"

luo hui immediately shook his head and said, " boss qin, it's not that there's a lot. i just feel that academicians like us will think and research in the market. just like professor li kai or academician zhu's research. they're just inspired in the manor and then do calculations and research on the spot. "

if they were interrupted in this situation, you should know how big of a loss it would be for the research. Like this time, if academician Zhu's thoughts were interrupted, then rocket research wouldn't be able to make a breakthrough, and they wouldn't be one step ahead of the West.

"academician luo, i still don't understand what you're talking about!" qin lin frowned and looked at luo hui.

When Luo Hui saw this, he went straight to the point. boss Qin, our scientific research is really important. This time, I was studying the materials in the park and had some insights. It would definitely help me make a breakthrough in my experiment, but suddenly, my thoughts were interrupted by the crying of the child.

All of a sudden, Luo Hui seemed to have found a way out for himself and continued to say with confidence, " "do you know how bad this is for me? I really suggest that there shouldn't be too many women and children in your Manor. There are even unrelated elderly and pregnant women, which is not good."

" ? ? ? "Qin Lin looked at the other party with a dumbfounded expression.

[Chapter 955 Asking For Humiliation And The Greatest Humiliation](#)

Qin Lin didn't find it strange.

It would be strange if academician Luo had a breakthrough.

The moonstone would not work now.

He still had the face to say that his comprehension was disturbed.

Moreover, the woman he was talking about was probably Lin Liu and Tang xiuwan. The old man was his mother, and the pregnant woman was his wife, Zhao moqian.

he now knew why academician li and minister lu didn't like each other.

He was already giving face to Minister Lu by letting him stay in.

What was the other party doing? He even had a problem with his friend's wife, his mother, and his wife?

Luo Hui continued, " boss Qin, I hope you can handle my suggestion. After all, I don't want any academicians to be disturbed when they're deep in thought like me. In the long run, no academicians will dare to come to your Manor to recuperate.

Obviously, he felt that if the academician came to recuperate and compared it with a few women and children, the academician would know how to choose. If it were the boss of any recuperating resort, he would also know how to choose.

It was very meaningful for an academician to go to a place to recuperate.

Qin Lin laughed. academician Luo, if that's the case, then I'm really sorry. My place might not be suitable for you academicians to recuperate.

"If you feel like you're being disturbed, I can help you check out. As for the cost of your treatment, I'll return it to the Chinese Academy of Sciences!"

Luo Hui was stunned when he heard Qin Lin's words.

He had come to give his opinion, and the other party should have said that they would deal with it. What was going on? did they even have the intention to let him leave?

The more Luo Hui thought about it, the more he felt something was wrong. He frowned and said, "Boss Qin, what do you mean?"

Qin Lin didn't answer the question. Instead, he smiled and said, " let me introduce you, academician Luo. The woman you're talking about is the wife of my friend and brother. One of them is probably professor Li Kai's wife.

and the old woman you're talking about should be my mother, and the pregnant woman is my wife. What do you think? why can't they stay here? "

Luo Hui didn't expect this, but he still said, " boss Qin, even so, you opened this sanatorium, and our academicians have to ensure that we have a good environment. For someone like me who suddenly had inspiration and my thoughts were interrupted, you know how bad my research is.

"Academician Luo!" Qin Lin interrupted Luo Hui's words this time and stared at him coldly. There are two types of people in this world. The first type is the capable, like my brother professor Li Kai and academician Zhu.

They were able to gain enlightenment in my Manor because they have the ability. I don't blame the women and children.

As for the other type, they don't have any abilities and only know how to blame this and that. Only they themselves know whether they have any insights!

These words were already mocking and hinting.

Qin Lin didn't give him any face at all.

How could he be interrupted at this time?

He knew if the moonstone's effect was activated or not.

They were both academicians, but this guy's character was really worse than Academician Li and Academician Zhu.

Luo Hui naturally understood the meaning behind Qin Feng's words. He actually felt a little guilty and could not say a word for a long time.

Then, he was a little annoyed.

The other party was obviously questioning his ability to defeat Academician Li and Academician Zhu.

Who was he looking down on?

However, when he saw Qin Lin's cold eyes, he couldn't do anything. This made him even more annoyed. He seemed to be stunned by this young man.

"Hmph!" In the end, Luo Hui could only snort heavily and leave the office.

Qin Lin frowned and stood up. He called Master Lin and asked him to prepare the ingredients for the emperor's Supreme medicinal cuisine.

Some people really didn't give face.

Therefore, don't blame him for not giving the other party face. He only hoped that the other party would back off.

It was a very simple thing for Qin Lin to make a Supreme Emperor's medicinal cuisine.

When he reached the kitchen, Master Lin had already prepared the ingredients. He put on the scarf and started working. After a while, the special medicinal fragrance spread in the kitchen.

After Qin Lin had finished preparing the emperor's Supreme medicinal cuisine, he instructed Master Lin, "Master Lin, get someone to bring this medicinal dish out!"

Master Lin looked at the herbal dishes and asked, "Boss, it seems like we're short of two servings!"

Qin Lin smiled. It's fine. I only cook for my friends. I don't like the two new ones!

"Eh!" Master Lin immediately knew who he was talking about.

The new student was professor Luo.

The boss did this on purpose. He didn't know what academician Luo did to offend the boss.

Qin Lin did it on purpose.

He had already done this without giving them any face. Those with a little self-awareness would have left by themselves, right?

When the time came, he could only apologize to Minister Lu.

Who asked this guy to look for trouble and even have a problem with his mother's wife?

However, he also knew to leave a way out, so he ordered, "Just say that the ingredients aren't enough and that they have to line up for the emperor's Supreme medicinal cuisine. They'll have to wait for the next time they have the ingredients."

"I understand, boss!" Master Lin nodded.

His heart was clear.

as for when the boss would get the materials, it was up to the boss.

The sky was getting dark.

Academician Li received a call from the manor's Hall when he was in his room. When he heard that there would be Emperor's Supreme medicinal cuisine tonight, he was very excited.

He washed his face and went out of the room, just in time to see Luo Hui and his assistant coming out.

#### [Chapter 956 Asking For Humiliation And The Greatest Humiliation \(2\)](#)

He didn't like Luo Hui, but he didn't express it in front of him. He immediately smiled and said, "academician Luo, we're in for a treat tonight. Boss Qin has personally prepared the emperor's Supreme medicinal cuisine.

this Emperor's Supreme medicinal cuisine is definitely the most delicious thing in the world. Even the higher-ups and the richest people have never tried it before.

it's just that it depends on whether boss Qin is in the mood to make the emperor's Supreme medicinal cuisine. Usually, you can't eat it even if you want to.

Academician Li was really happy.

after all, he had eaten the emperor's supreme medicinal cuisine more than once.

Who wouldn't be interested in good food?

Luo Hui was obviously attracted as well.

He had eaten the emperor's Supreme medicinal cuisine before, but the one he had eaten was made by the chefs of the state banquet in the capital, and it was indeed very delicious.

It was also the first time he had eaten such delicious food.

However, he had also heard from academician Zhu and the others that the emperor's Supreme medicinal cuisine prepared by this national banquet Chef was not as good as 40% of the Linlin Manor's.

The academicians couldn't possibly lie about this. They could only say that the medicinal cuisine in Linlin Manor was really delicious.

Therefore, he was looking forward to it.

Moreover, now that he wasn't affected by his emotions, he thought more. After all, he liked to bring power into his research.

This was a habit.

He didn't think that the young man would make some medicinal cuisine for no reason. The other party had said that he would not easily cook.

It might have something to do with the fact that the other party had dissed him today.

Perhaps the other party wanted to use this method to ease the tension, which was also an alternative way of apologizing.

It seemed that the other party still knew what was more important between the academician and women and children, and he was not an idiot.

As he thought about it, Luo Hui realized the possibility.

When they arrived at the restaurant, both Luo Hui and academician Li smelled a strong medicinal aroma.

This medicinal fragrance made Luo Hui's eyes light up.

He had indeed never smelled such a pleasant medicinal fragrance before. Just this alone was enough to know that it was extremely delicious.

It seemed like academician Zhu was telling the truth.

Academician Li immediately went to his seat and opened the lid. The smell of the medicine was even stronger, making him drool.

Lin Liu and the other two girls were also overjoyed.

This Emperor's Supreme medicinal cuisine was something they had been looking forward to.

"Boss Qin is cooking again today."

"Really. I look forward to what he makes every time."

"Hurry up and eat. Don't talk too much."

Luo Hui sat down with his assistant.

He looked at the three girls, who were still frowning.

He felt that with his status and academician Li's, sitting with women and children was really disrespectful.

However, now that he had the emperor's Supreme medicinal cuisine, he couldn't be bothered with this matter for the time being.

However, when he looked at the food on the table, he frowned. Just like before, he didn't see any Emperor's Supreme medicinal cuisine.

There was obviously a different kind of food container on the table of academician Li and the others. It was definitely filled with the emperor's Supreme medicinal cuisine.

Luo Hui was annoyed and asked the waiter beside him, " why do they all have the emperor's Supreme medicinal cuisine, but we don't? "

After the waiter was done, he hurriedly said, " " sir, i'm very sorry. this emperor's supreme medicinal cuisine is actually a free service from our boss. moreover, there are only so many ingredients this time, so it's on a first come, first served basis. sir, you can only line up and wait for the next time. "

Academician Li and Lin Liu looked over.

Lin Liu and the others knew that once boss Qin had prepared, he would never miss out on anyone. Moreover, there shouldn't be a problem of not having enough materials.

This was because this person was being targeted.

Academician Li also noticed. He frowned and sighed. He tried his best to remind academician Luo, but it seemed like Qin Chu was still targeting academician Luo.

He didn't know how the other party had offended boss Qin.

However, he didn't want to care about it. He quietly ate his herbal dish. Everyone knew that boss Qin was a good person and had a good temper. If boss Qin deliberately targeted someone, it must be academician Luo's own doing.

Luo Hui naturally knew that the waiter was making an excuse. He was being targeted.

This was the first time he had been treated this way.

however, his magnanimity did not allow him to lose his temper. even if he was about to explode in anger, he could only smile at the waiter."Sorry to trouble you, I understand."

However, he lost his appetite immediately.

qin lin no longer paid attention to Luo Hui. since things had already come to this, a smart person would probably make a sensible choice.

He looked at the screen in his mind again and began to control his game character to go to ore town to see if he could encounter the plot mission.

The next day.

Qin Lin, on the other hand, received some good news. Luo Hui had left with his assistant early in the morning to check out.

It seemed that this person still wanted face.

Qin Lin was not afraid of offending an academician, so he took out his phone and called Minister Lu.

When the call was connected, Minister Lu's voice was heard, "Boss Qin, what happened? That Luo Hui sent a message saying that he's coming back today, did something happen?"

Qin Lin could only say helplessly, "Minister Lu, please don't let such people come to my Manor again. I'm afraid that if they come again, I'll close the manor and won't accept any guests in the future.

boss Qin, how can we do that? we can't do without your Manor now. Minister Lu hurriedly appeased him and didn't ask any more questions. He knew what kind of person Luo Hui was.

As expected, he had caused trouble. He should not have let the leader off the hook before.

On the other side.

### [Chapter 957 Asking For Humiliation And The Greatest Humiliation! 3](#)

Luo Hui quickly returned to Beijing. When he arrived, a few academicians who liked to bring politics into scientific research came to him and asked, "

"Academician Luo, what about Linlin Manor? Will it be of any help to your experiment this time?"

yes, there are some difficulties in my experiment. If it's useful, I'll go to Linlin Manor with my connections.

it's definitely going to work. Academician Zhu and the other two are about to launch their latest rockets.

when Luo Hui heard these words, he said in annoyance, "what's the use? it's just a rumor. Academician Zhu and the other two were just lucky. What does it have to do with Linlin Manor?"

not only did he fail to make a breakthrough, but he also made himself angry. he didn't want to let it go, so he took out his phone and sent some messages to the Chinese Academy of Chemical Sciences 'internal APP group:

I just came back from Linlin Manor. Let's talk about my feelings. The environment itself is not bad, but the staff is too complicated!

"We academicians need peace and quiet when we recuperate, but the other party is a group of women and children. The children are so noisy, it's impossible to calm down."

I've been gone for half a month. I finally had an epiphany, but I was interrupted by crying. So, academician Zhu and the others were just lucky, and it has nothing to do with Linlin Manor.

also, everyone, don't spread rumors blindly. What Linlin Manor can help with research is all nonsense.

Luo Hui's act of spreading this news was quite satisfying, but it also caused an uproar within the Chinese Academy of Sciences.

After all, when academician Zhu and the others went to Linlin Manor, they had some inspiration. Professor Li Kai was the same. Everyone already knew about this.

And now, you're saying that it's a coincidence?

At the first Department of the Chinese Academy of Sciences, academician Zhu and the other two students were resting. They naturally saw the messages in the internal APP group. Seeing this, the three of them could only shake their heads.

This Luo Hui.

Minister Lu also saw the news and was a little annoyed. After all, it was reasonable for Linlin Manor to have auxiliary functions. Luo Hui, you can't break through now because your ability is limited. What's the point of saying this now?

He felt that it was time to give this guy a beating.

He made a phone call.

He naturally knew that Luo Hui was competing for the position with others. He was calling Luo Hui's competitor, who was the same type of person as academician Li and academician Zhu.

Linlin Manor.

academician Li awkwardly went to Qin Lin's office and said, "Boss Qin, this academician Luo is actually doing a fist salute."

"Academician Li, why are you apologizing?" Qin Lin asked. You are you, and he is him."

After all, we're all from the Chinese Academy of Sciences," academician Li said helplessly. This academician Luo went back and said a lot of bad things about Linlin Manor.

"What bad things can he say? You said that you can't have a breakthrough in our Manor? Is it all nonsense?" Qin Lin could only think of this.

After all, the other party had repeatedly said that his comprehension had been interrupted. In fact, he had not comprehended anything and just wanted to give him a way out. When he returned, he could only say the same thing.

"You guessed it?" academician Li was stunned.

Qin Lin smiled and said, "what else can a person like him say other than this?" By the way, academician Li, our Manor still has a quota. Is there anyone in your Department who has a competitive relationship with Luo Hui?"

Academician Li didn't know how to answer. After all, this wasn't something that could be told to outsiders. But the other party was boss Qin, so he awkwardly said, "Recently, an academician Jin has been competing with the other party again. Academician Jin is very popular."

"Then I'll ask Minister Lu if academician Jin is coming. I still have a slot!" Qin Lin said with a smile.

Since Luo Hui had been badmouthing his Manor, he didn't mind doing some simple things even though he didn't want to.

The best lesson for this guy was that his opponent came to Linlin Manor without any gains, but his competitor came to have a breakthrough.

Then, it would not be a problem with his Linlin Manor, but with the other party's own ability.

this was the greatest humiliation to a talent like Luo Hui.

Furthermore, the other party's competitors would definitely have some enlightenment.

As he was thinking, his phone rang. It was Minister Lu. He picked it up and heard Minister Lu's voice, "Boss Qin, there's another academician Jin in our hospital who wants to go to your place for a recuperation. Please make the arrangements."

"Alright!" Qin Lin agreed immediately. Although Minister Lu didn't mention Luo Hui, the two of them tacitly knew their purpose and hung up the phone in harmony.

Chinese Academy of Sciences.

Minister Lu hung up the phone and sent a message to the internal group: academician Jin, get ready. We're heading to Linlin Manor for recovery.

This simple news stunned the people at the Chinese Academy of Sciences.

If academician Jin had a breakthrough in Linlin Manor, it would be fun.

Luo Hui and his assistant saw the message. He understood what it meant, so his face turned gloomy.

Academician Luo, what does Minister Lu mean?" The assistant asked with a frown.

he thinks he can be of help if he goes," Luo Hui sneered. what a joke.

he had been to linlin manor and seen the women and children. he was sure that there was no effect.

Academician Zhu and the others were just lucky.

But now, he was blowing that place up like that. He really shouldn't have!

When academician Jin returned from the Linlin Manor empty-handed, it would prove that the Linlin Manor was useless.

That kind of place shouldn't enjoy the honor that academicians brought to them.

### [Chapter 958 Using Yellow Rosewood To Build! Pavilion \(1!](#)

Linlin Manor.

Qin Lin and academician Li were waiting at the entrance of the villa again.

A car stopped in the parking lot, and an old academician walked out. It was academician Jin.

"Academician Jin, I've been waiting for you for a long time." Academician Li smiled and walked forward. He was obviously very happy.

After all, this Manor was good, but he didn't have a companion to recuperate alone. Since academician Jin was here, he could discuss some academic current affairs.

After all, academician Jin was not the same kind of person as academician Luo. He was also a researcher who was very popular.

If Minister Lu didn't insist on using his name to fight with academician Luo, he wouldn't even have the intention to do this.

Qin Lin could naturally feel academician Li's attitude toward academician Jin. It was completely different from how academician Li treated Luo Hui.

"Boss Qin, sorry to disturb you." When academician Jin saw Qin Lin, he also shook hands with him humbly, which gave him a different feeling.

Just like academician Li and academician Zhu, he made people feel comfortable.

This was probably why there were two words, 'senior' and 'taking advantage of your seniority'. Academician Jin and academician Li were worthy of the word 'senior', but Luo Hui was completely taking advantage of his seniority.

Qin Lin welcomed academician Jin into the manor.

"Boss Qin, you're amazing. I've never seen a place with such a good environment." Academician Jin couldn't help but praise as he walked.

The surrounding scenery was really hard for him to describe. He could only say that it was intoxicating.

When people were old, they liked pleasant scenery. However, it was the first time they had seen a scene that could make people feel shocked and heartache.

From this, he roughly knew why Minister Lu, academician Li, and academician Zhu had such a high evaluation of boss Qin.

There were many things that could reflect one's heart.

Only a person whose heart was filled with beauty and peace could create such a beautiful scene.

If one's heart was filled with darkness and schemes, they would definitely not be able to create such a beautiful scene.

Gao Yaoyao had been waiting for a long time. She started to arrange a place for academician Jin to stay.

After Qin Lin received academician Jin, he also returned to his office. He looked at the game in his mind and controlled his character to go to the goddess 'spring and get a bucket of water.

After controlling his game character to return to the farm, Qin Lin locked the office door and entered the game. He brought out the bucket of goddess's spring water and placed it in the office.

Now, he just had to find an opportunity to activate the moonstone's effect and help academician Jin comprehend it. At that time, academician Luo's expression would be very interesting.

On the other hand, it was good for academician Luo to make a scene.

After all, everyone had previously confirmed that the Linlin Manor had a good environment and good projects. It could make people feel comfortable and relax their spirits perfectly. It was beneficial to scientific research and could help people realize breakthroughs.

It gave people the feeling that anyone could take a look at it.

Now that academician Luo was making a scene, this was no longer an absolute.

everyone would think that linlin manor could keep people in their best condition, but scientific research still depended on personal ability and even luck.

Therefore, not everyone could do it.

This was actually better.

He could also choose to open the moonstone.

Academician Jin had just arrived, so Qin Lin wasn't in a hurry. He left the goddess spring in his office and went to the villa to take a look.

"He's little Qin, right?"

"It seems so!"

"He's little Qin!"

Shortly after entering the villa, Qin Lin was surrounded by mobile phones that were taking pictures of him.

Now, little Qin, who was well-versed in both literature and martial arts, was definitely very famous. Even if he wasn't in the internet celebrity circle, he was still more famous than many internet celebrities.

He could only sigh and return to the manor dejectedly.

It was hard to leave the villa now.

those tourists who came to the mountain villa to play would first make guides and know a lot about the mountain villa, including him, little qin.

Time passed. In the blink of an eye, two weeks had passed.

In these two weeks, Qin Lin was not in a hurry to open the moonstone.

However, academician Jin was in a good mood. He felt that his physical and mental condition was getting better and better.

boss Qin, your Manor is really amazing. After two weeks, I feel like my condition is getting better and better. It's true that it's helpful for scientific research. When academician Jin saw Qin Lin, he couldn't help but say, " usually, when faced with a difficult situation, academicians will actually be impetuous. When the pressure is too great, their nerves will be tense. This is not good for scientific research.

"that's why the hospital often arrange for people to recuperate. but most of the time, even if they go to recuperate, it's difficult to alleviate the situation, because during recuperate, the academicians have been troubled by the problems they've been researching."

"Boss Qin's Manor is really amazing. No wonder academician Zhu and the others could have a breakthrough."

academician Jin, you're overpraising me, " Qin Lin said. that academician Luo came to me, but he didn't learn anything either.

Academician Jin shook his head and said, " you can't say that. Linlin Manor is very helpful for people like us to adjust our state of mind. Through recuperation, this kind of relaxed state is very beneficial for scientific research. As for whether we can gain anything from it, that's our own problem.

Qin Lin's impression of academician Jin improved even more.

It was natural for some people to be hated.

However, there were some people who deserved sincere admiration for no reason.

Academician Jin had already taken out his phone and started taking pictures of the surrounding scenery.

This was probably one of his hobbies.

they wanted to film some things and share some beautiful scenery.

[Chapter 959 Building! Gazebo With Fragrant Rosewood \(2!](#)

Almost all of his moments were about the scenery.

Even if it was just a flower on the side of the road, he would sometimes take a video or a few photos when he was in the mood.

If one only looked at the content on his WeChat moments, no one would know that academician Jin was an academician and a researcher.

But if it wasn't necessary, who would like to post about work on their WeChat moments? Wasn't it good to share your interests and hobbies and share some good feelings?

After all, there were only a few people who liked to vent their negative emotions on their moments.

At this moment.

Many people at the Chinese Academy of Sciences were also paying attention to academician Jin.

After all, Luo Hui did not gain anything from his trip to Linlin Manor. If academician Jin went and gained anything, it would not look good for him.

In Luo Hui's office, the assistant frowned and said, " academician Luo, that academician Jin posted on his WeChat moments again. He still said that the environment of Linlin Manor and the treatment project are suitable for researchers to adjust their physical and mental states. He's completely different from what you said before. He's simply singing a different tune.

Hmph! Luo Hui snorted when he heard the news. you make it sound so nice, but you still haven't gained any insight or broken through in half a month.

His words were filled with disdain.

He hated this kind of person. They would end up in the same situation as him, but they had to play such tricks. The other party directly went against him, and he even thought highly of him.

A day passed.

the next day was half a month since academician jin arrived at linlin manor.

After lunch, Qin Lin came out of the office with a bucket of goddess's spring water. He planned to activate the moonstone and help academician Jin achieve a breakthrough.

However, when he was about to enter the park, he found that Ma Hong had already led some people to guard the entrance.

qin lin came forward, and academician li also came out. he immediately said, " boss Qin, I'm sorry, I asked Ma Hong to guard the entrance. Academician Jin is inside looking at experimental data and suddenly figured out an experimental problem. He's currently calculating the data, and I don't want to disturb him.

" ? ? ? ""Did academician Jin have a breakthrough?" Qin Lin subconsciously asked.

academician li nodded and said, " yeah, in the past two weeks, academician jin has been saying that he's getting better and better. he's completely relaxed, and it's like he's reached an ethereal state. some of the experimental problems have also become clearer. just now, he suddenly had an inspiration and figured out some of the problems that have been bothering him. "

Qin Lin subconsciously looked at the bucket of water from the goddess's spring in his hand.

he probably didn't pour any water in before.

The moonstone's effects were off.

In other words, academician Jin didn't rely on the moonstone's attributes, but on his own ability to comprehend.

This was awesome.

It also meant that the scenery of his villa and the treatment project would be helpful to the academicians even without the moonstone.

What a surprise.

Qin Lin returned to his office and put the goddess's spring water back into the game. Then, he went to the park again.

When he entered, he saw academician Jin writing something in his notebook and operating a computer on the stone table.

academician Li, can you help me check the latest data of VRG342? " Academician Jin didn't forget to ask academician li for help.

the two of them were similar in scientific research, so academician li could easily act as an assistant.

qin lin walked towards the moonstone. when he touched the moonstone, he received a notification.

[ goddess 'spring water does not contain enough ingredients. Moonstone attributes can not be triggered! ]

"Academician Jin is really amazing!" Qin Lin sighed in his heart.

The other party was really relying on his own ability.

Qin Lin didn't disturb academician Jin and left the park.

The next day.

qin lin got up and went to the manor hall. academician jin had already packed his luggage and was about to leave. he even said goodbye to qin lin. " boss qin, thank you for your hospitality. i really want to stay in your manor for a few more days, but my research is different. i have made some progress, so i have to go back and experiment immediately. "

After saying goodbye to Qin Lin, academician Jin left.

he had already informed minister lu that the latter would arrange for the plane tickets and car for him.

naturally, the news that academician jin had a breakthrough and was rushing back to the chinese academy of sciences quickly spread.

This made the academicians of the Chinese Academy of Sciences focus their attention on Linlin Manor again.

Previously, Luo Hui had returned empty-handed from the Linlin Manor, saying that the manor had been exaggerated and had no use.

But now that academician Jin had gone there, he had a breakthrough in Linlin Manor and was in a hurry to come back for an experiment, which was interesting.

Luo Hui also received the news very quickly, and he was dumbfounded.

This should not be the case.

he had lived there for half a month and was very clear about the situation at linlin manor. how could the other party have comprehended and broken through in that kind of environment?

Now that he couldn't go, but academician Jin could, didn't that mean that he wasn't as capable as academician Jin?

It couldn't be.

How could he be inferior to him?

...

Time flew by.

Sometimes, people couldn't grasp time. The more you wanted to grasp time in your hands, the more time would slip away silently.

In the blink of an eye, a week had passed since academician Jin left.

Academician Li naturally told Qin Lin some good news. It was that academician Jin's experiment had a complete breakthrough, and Linlin Manor had made another big contribution.

Qin Lin returned to his idle state. He was completely in charge of the company. The most he did every day was control the game characters to do daily tasks or run around the map, hoping to trigger plot tasks.

### [Chapter 960 Using Yellow Rosewood To Build! Pavilion \(3!](#)

after finishing his daily tasks for the day, qin lin also got up and walked out of the office. as soon as he reached the living room, he ran into zhao mochen and lin fen, who had just come back from a walk.

zhao moyu had to take a walk every day. this kind of gentle exercise was good for both pregnant women and children.

"Qin Lin, I have something to tell you!" Zhao moyin said when he saw Qin Lin.

"what's wrong?" qin lin hurriedly asked.

Zhao Moyu pointed at the park and said, " the weather is getting hotter and hotter. Should we consider building a pavilion in the park? otherwise, we won't be able to enter during the day. If it rains, we can't just lock everyone in the manor. Should we build a wooden corridor between the manor and the park? "

qin lin nodded when he heard this suggestion.

under the scorching sun, it was a different kind of taste to appreciate the plants produced by the game system. it was certainly a good idea to enjoy the beautiful scenery with a plate of iced watermelons in the pavilion under the hot sun.

On a rainy day, walking along the corridor and looking at the plants in the park that were produced by various games, he was sure that they were not bad. He could even listen to the rain in the pavilion.

However, the idea was good. These plants were all products of the game, so ordinary wooden corridors definitely wouldn't work. Ordinary wood would be a waste here.

this made him think of the rosewood and red sandalwood in the game warehouse.

The game's Wood would definitely serve as a foil to the plants.

After such a long time, the wood had almost filled up the warehouse. Building a Pavilion and a wooden corridor was not a problem.

However, the amount of yellow Rosewood and red sandalwood was a little shocking, so he couldn't take them out directly in you city. He had to find a place further away.

Therefore, he went directly to Ming city. This time, he also rented a large warehouse suburbs the remote suburbs without surveillance for half a month.

The reason why he would rent it for half a month was to make sure that no one would come during his work.

After Qin Lin made sure that there were no problems, he entered the game with a thought and went to the wood warehouse of the ranch.

In real life, the wood warehouse was no longer a small Animation Building material icon, but a very large warehouse.

It was already filled with yellow Rosewood and red sandalwood, which would take a lot of time to transport.

[ yellow Rosewood: Grade 1 ]

[ this is wood cut from a special type of yellow pear tree: Scent-lowering +1, wood hardness +1, texture +1, insect repellent +1. ]

[ red sandalwood: Grade 1 ]

[ this is also wood cut from a special type of red sandalwood tree: Pacifying the liver and replenishing Qi +1, dispelling evil and avoiding evil +1, calming the mind +1, texture +1, wood hardness +1, tranquility of the mind +1! ]

Qin Lin touched a piece of yellow Rosewood and moved it out of the warehouse with a thought.

He repeatedly entered and exited the game. In the warehouse in reality, the quality 1 yellow Rosewood and quality 1 red sandalwood were stacked into two small mountains.

Qin Lin naturally couldn't take out the quality 2 yellow Rosewood and quality 2 red sandalwood to build the pavilion and wooden corridor. Therefore, he only chose quality 1 wood.

Even if they were only of Grade 1, it was still shocking to produce such a large amount of fragrant Rosewood and red sandalwood of this age, even if they were just ordinary ones. Basically, no one could do it.

Moreover, the yellow Rosewood and red sandalwood produced by the game also had fragrance lowering, insect repelling, liver calming, and Qi replenishing properties that could be felt intuitively.

It was a pleasure to sit in a Pavilion.
