

The Game 971

[Chapter 971 Linlin Winery Is Scamming Us?](#)

But now, the sculpture in front of him was covered in Lingzhi.

After picking one, Qin Lin saw the comment of the Lingzhi:

[previous year's pure wild Lingzhi: normal]

And it was a pure wild Lingzhi from the previous year.

This Lingzhi was huge, and there was really no place to buy it.

Qin Lin also picked the other Lingzhi and put them into the bag in his hand.

[previous year's pure wild Lingzhi: normal]

[previous year's pure wild Lingzhi: normal]

...

[pure wild Lingzhi from the previous year: quality 1]

[this is a pure wild lingzhi mushroom of the previous year. It is very difficult to find and is already extremely rare. It has a special effect: Immune regulation +1, hypoglycemia +1, cholesterol +1, anti-aging +1, anti-cancer +1, protection of liver function +1, anti-coagulation +1, inhibition of platelet accumulation +1!]

After picking all the Lingzhi, there were a total of 30 or so Zhu Lingzhi, and only one was a quality 1.

Qin Lin looked at the note and could understand why the pure wild lingzhi mushrooms of the previous year were so expensive.

After all, it had so many attributes.

Some attributes could be life-saving at critical moments.

Not to mention, it also had anti-aging and tumor-resistant properties.

Especially the anti-aging attribute. Qin Lin realized that there were many items with this attribute.

For example, the Xiangshui tribute rice, the pure wild truffle, and the Lingzhi.

If people ate these things every day, they should be more effective than any health care products, beauty shots, and anti-aging shots, right?

Moreover, if he could really eat something with such an attribute effect every day, even if he went disco dancing with his granddaughter, he would be treated as a brother and sister.

Unfortunately, other than Qin Lin, no one else could eat these things every day.

After Qin Lin harvested the Lingzhi, he went back the same way he came. It took him half a day to return to the small path that led to the game. Then, he exited the game with a thought and appeared in the warehouse.

although qin lin hadn't been to this warehouse for a while, he had already bought it.

There would always be a time when it would be useful, just like today.

he placed the bag of lingzhi on the ground and looked at the screen in his mind again. he controlled his game character to return to the farm, and then entered the game with another thought, replacing the game character.

He went straight to the storage room, where there was already a lot of processed snow and beef.

He directly chose two pieces of quality 2 whole snow and beef, which weighed more than 100 catties, and brought them out of the game with a thought.

This level of full snow and beef couldn't be found anywhere in the world, but he only needed to spend some in-game gold coins to buy them and raise the young cows to be slaughtered by butchers. Under the game's special feature, he could have as much of this meat as he wanted.

After loading the two quality pieces of snow and beef into the truck, Qin Lin re-entered the game and came out with two bags of one quality piece of water tribute rice.

These were naturally for Li Fei.

Since Li Fei had the means to purchase elephants, he had to give him something in return.

For Li Fei's business, it would be best to directly wholesale these quality 2 whole snow and beef and Xiangshui tribute rice to the other party.

After Qin Lin moved all the snow, beef, and Xiangshui tribute rice out, he took the bag of Lingzhi and drove the small truck back to Linlin Manor.

As soon as his small truck arrived, the manor's security guards immediately ran forward.

he still had a good eye.

"Bring all the beef and rice in!" Qin Lin ordered as he got out of the car.

"Okay, boss." the leader of the small team immediately took action.

Qin Lin carried Lingzhi to the inner area and went to the balcony of the living room.

Because the balcony in the hall was very large, the sunlight was very good. With a layer of mat, the Lingzhi could be poured out to dry.

Lingzhi could be used for medicine, and under normal circumstances, it was good to dry it.

He was drying the Lingzhi when Lin Fen came over curiously. "lin lin, are these lingzhi?"

"Yeah, I just got it. I'm going to sun it!" Qin Lin nodded.

lin fen looked at the lingzhi mushrooms on the ground in surprise. " Lin Lin, these lingzhi mushrooms are all very big, so they should be quite old, right? are they wild? "

"Mom, I didn't expect you to have such good taste," Qin Lin said with a smile. "You're right, this Lingzhi is indeed wild, and it's aged quite well."

"How can an artificially cultivated one be this big?" Lin Fen was very pleased with her son's praise. She smiled and reminded him, " by the way, I heard from Lin ran that Motian's father's liver hasn't been good recently. This wild Lingzhi seems to be useful. She's been asking where to buy it. Send a few over in two days.

"Alright, mom!" Qin Lin replied with a smile.

After sun-drying the Lingzhi, he also left the inner area and returned to the manor's office.

Just as she sat down, her phone rang.

It was Li Fei's number.

He picked up the call. After knowing that the other party had arrived, he instructed the security guards to bring the other party in.

It was not Li Fei's first time at the Linlin Manor, but he was still amazed by the scenery around the manor. He was also curious about how boss Qin had created such a stunning scene.

When he was brought to Linlin's office by the security guard, he immediately went up to him respectfully and enthusiastically. boss Qin, I rushed over as soon as I received your call. I'm really grateful to you. The whole snow, beef, and Linlin rice are all things that luxury goods like Jin Yu Long for.

Qin Lin smiled and invited Li Fei to take a seat. boss li, sit down and make some tea. I've already prepared everything for you. There's no hurry.

Li Fei was not in a hurry, but he was a little nervous when he sat down.

Something good had happened to him. Even if boss Qin didn't have any ulterior motives, there must be something going on. Now, he must have something to say.

If he could really do something for boss Qin, that would naturally be the best. Then, his relationship with boss Qin would be closer.

He was afraid that he wouldn't be able to handle boss Qin's matter.

Qin Lin also took out a Grade 2 wild Tieguanyin and made a pot of tea for Li Fei, saying, " "Mr. Li, have some tea."

Li Fei picked up the teacup and smelled the tea. He knew it was good tea. After taking a sip, he couldn't help but say, " only boss Qin's place can provide this kind of tea. This tea is really enjoyable.

"Boss Li, I want to ask you about something." Qin Lin smiled and revealed his purpose.

"Boss Qin, go on." Li Fei saw that the main topic was here and immediately asked. At the same time, he became even more nervous. He only hoped that boss Qin would not say something that he could not do.

"Boss Li, I heard that you have a way to get elephants from Myanmar?" Qin Lin asked directly. I want to get a few baby elephants at Linlin Ranch, and I need your help."

"An elephant?" Li Fei was obviously taken aback, not because the question was too difficult, but because the question was too simple. He did have a way in this area, and he had even helped the city's zoo Run one before.

He had thought that boss Qin would ask a difficult question, but it turned out to be just this. He had been nervous for nothing.

Therefore, he immediately said, "Boss Qin, just leave this to me. I'll definitely do it well for you."

"I want those big-eared elephants," Qin Lin added.

"Boss Qin, don't worry. I'll definitely get it done for you." Li Fei promised again.

Qin Lin was relieved to see that. After chatting with Li Fei for a while, he also asked someone to bring in the quality 2 whole snow and beef and the quality 1 water tribute rice.

Seeing these things, Li Fei was not in the mood to keep them. He wanted to bring them back immediately, but before he left, he remembered something and said to Qin Feng, "Boss Qin, I have something to tell you. It seems that Xiangshui tribute rice is investigating the purchase of Xiangshui tribute rice by Linlin Manor."

Qin Lin suddenly heard this news and frowned slightly. He wasn't stupid. He thought of the Linlin wine made from Xiangshui tribute rice that had been auctioned.

Xiangshui gongmi's investigation of this matter must be due to this reason.

At the same time, Lai Jing, the person in charge of Xiangshui tribute rice, had also received a report from his subordinate. During this time, he had investigated the general whereabouts of Xiangshui tribute rice last year.

CEO Lai, "his assistant reported, "we've been investigating for a while now, but there's no record of it flowing to Linlin villa.

"Could it be from three years ago?" Lai Jing asked again.

The assistant shook his head again. that's impossible. Our Xiangshui tribute rice has been leaked. No one can keep it for that long.

"In other words, Linlin winery's previous auction was a scam?" Lai Jing's face darkened."He's using our Xiangshui tribute rice as an excuse to make money. This is not allowed."

Using their name to sell the new wine for 700000 a bottle, this was a little too much.

Most importantly, with Xiangshui gongmi maintaining his connections, he was not afraid of offending the influential Linlin company.

[Chapter 972 There's Nothing To Talk About! It's Quite Interesting To Fight!](#)

"President Lai, it's not just the public who thinks that Linlin winery is using our Xiangshui gongmi to make wine. Those distilleries haven't given up yet." The assistant also said with some annoyance, "I've already sent people to reply to those wineries many times, but they're still asking around.

" make an announcement, " lai jing said directly. " just say that there's a record of our xiangshui tribute rice's annual production. there's no record of any winery buying xiangshui tribute rice to brew wine. "

"Alright, CEO Lai!" The assistant expressed that he understood.

Although boss Lai's announcement didn't directly mention Linlin winery, anyone who wasn't a fool would think of it.

Moreover, there was no lack of people on the internet who liked to watch the fun and didn't mind blowing things up. They would definitely stir up trouble.

Xiangshui tribute rice wasn't originally well-known, and it only circulated among the rich.

After all, the annual production of Xiangshui tribute rice was limited, and there was no need to publicize it.

However, Xiangshui tribute rice had become very famous after the Linlin Manor's exposure. Now, countless people on the internet knew that there was such a rice that they could not afford in China.

Especially after the Linlin wine brewed from Xiangshui tribute rice was sold at 700000 Yuan per bottle, the reputation of Xiangshui tribute rice grew even more famous.

Everyone thought that the reason the new Linlin wine could sell at such a high price was because of the Xiangshui tribute rice.

Therefore, when the official announcement of Xiangshui gongmi was made, many people paid attention to it.

Gong Gong hereby declares that our company has no record of selling Xiangshui tribute rice to any distillery to make wine. I hope that the public will not be deceived!

This announcement was quickly seen by many people. It was obviously pointing to something, and many people thought of Linlin winery.

Only the Linlin wine factory had auctioned off the Linlin wine brewed from Xiangshui tribute rice.

This involved Linlin company. With Linlin company's popularity, it quickly exploded and became a hot search.

There was no shortage of people who used every means possible to ride on popularity on the internet. Therefore, many videos of people riding on popularity appeared on the internet very quickly.

"Xiangshui gongmi accused Linlin winery of fraud!"

Xiangshui tribute rice refutes the rumor. Linlin winery's wine was not brewed with Xiangshui tribute rice.

Linlin winery cuts leeks, Xiangshui tribute rice personally refutes rumors!

In an instant, the entire internet was bustling with activity again. It was all Hot Searches in this area, but it troubled the internet celebrities again.

Jiuka was currently promoting the new film. Although he was ridiculed for being a tough guy who looked like a dog thief, at least he was popular.

Yi ge was also preparing to bring goods again. He even invited a female star with very strong tastes, Jie, to be a guest in the video.

But now, the popularity and traffic had disappeared.

Why couldn't Linlin company just stop? at least they had to let them know in advance when they made it to the hot search.

.....

Linlin Manor Office.

Qin Lin leaned back on the fragrant Rosewood executive chair, which was a very comfortable sitting position.

His eyes were focused on the screen in his mind, controlling his character to mine the spring Mine.

After his character leveled up, the spring Mine would open again. This time, many levels would be opened. He had already dug up to the 47th floor, but there was still no restriction that prevented him from entering the next floor.

Although he didn't get any special items, he did get a dozen bags of special soil and eight barrels of Earth Spring water.

[congratulations, you have obtained a bucket of earth spring water!]

Qin Lin looked at the bucket of Earth Spring water he had dug up and sighed. After the 40th floor, the probability of special soil and earth Spring water appearing had obviously increased.

This meant that the earth Spring water and special soil were not good things at this level. It also meant that there would be better things to be found in the future.

Just as Qin Lin was thinking about this, he heard a knock on the door.

He opened the door.

Lin Lanzi walked in and reported, "Chairman Qin, there's an incident online. It's about Linlin winery!"

As she spoke, she took out her phone and handed it to Qin Lin.

Qin Lin took the phone and read the news about Xiangshui tribute rice and Jinlin winery on the internet. He frowned slightly.

Xiangshui gongmi's sudden announcement was completely out of his expectations.

Moreover, he was obviously referring to his Linlin wine factory.

It was just that this sudden event made him feel a little helpless.

To be honest, although he was using the game's Xiangshui gongmi, he was also using the name of Xiangshui.

More importantly, he had never bought Xiangshui tribute rice from the other party.

Most importantly, no matter what the other party's purpose was, it seemed that outsiders would not be able to find anything wrong with the other party's announcement.

Now that it had been exaggerated on the internet, Linlin winery had become a scammer, while the other party's reminder had become a person-in-charge to prevent the public from being scammed.

From an outsider's point of view, the other party was not wrong. It seemed that he deserved to be targeted.

After all, no one knew that he had a cheat, and no one knew that they had already cultivated the Xiangshui tribute rice.

However, this matter was actually very easy to deal with.

after all, they were already able to grow xiangshui tribute rice and had even planted it in many counties. it was just that it was not time for harvest yet.

As long as this news was released, the matter would be clarified immediately. In that case, Xiangshui would be greatly affected.

After all, Linlin villa and Linlin winery were using the other party's name and taking advantage of their reputation. Therefore, he felt that this matter could be solved in a more tactful way, which was to talk to Xiangshui gongmi first.

[Chapter 973 There's Nothing To Talk About! It's Quite Interesting To Fight! 2](#)

Chairman Qin, how should we deal with this matter? should I send someone to respond? " Lin Lanzi asked.

Qin Lin thought for a while and said, " don't rush to respond. I'll ask someone to pass a message to Xiangshui first. We'll have a talk!

"Okay, President Qin." Lin Lanzi nodded.

Qin Lin did some research and found that there was no phone number of the person in charge of Xiangshui gongmi on the internet. Even the official website did not have the contact number of Xiangshui gongmi.

This was the special characteristic of the Xiangshui tribute rice.

They didn't need to contact the outside world. Those who knew about this thing and had the means would have to come to them to ask for rice.

So, he had to take out his mobile phone and call Li Fei. He didn't have any connections with Xiangshui, so he could only ask Li Fei to pass the message and get the other party's contact information.

Ming city.

After Li Fei returned, the luxury goods became a little busy.

The staff inside immediately began to carefully weigh the whole snow, beef, and Linlin rice and cut them into pieces.

There was a limited number of these things. Even if they had just arrived, ordinary people, or even ordinary rich people, were not qualified to buy them.

Even if no one had made a reservation, Li Fei and Lin Haiyan knew who to inform first.

Those who needed to be informed had been informed, and some people had not bought it. The rest could be promoted and posted on WeChat so that other rich people would buy it.

People were divided into different grades, so the rich were naturally divided into different grades.

They, the luxury goods, had to be polite to a group of rich people, but the rest of the rich people had to be polite to them.

hubby, " Lin Haiyan asked curiously, " that Chairman Qin gave you so much full blood, cow, and Linlin rice. What did he ask you to do? "

Li Fei sighed. he asked me to help him order a few baby elephants from Myanmar. We have to do this well. If we can't even do this, we'll be embarrassed in front of Chairman Qin.

"Yes, we have to do it well!" Lin Haiyan nodded.

As the couple chatted, Li Fei's phone rang.

"It's President Qin's!" He immediately said when he saw the number.

He hurriedly pressed the answer button again, not daring to delay any further. "chairman qin, do you have any orders? I'll contact you immediately about the elephant."

it's not about the elephant, " Qin Lin said. help me contact Xiangshui gongmi. I want to talk to them. It's best if I can get the contact information of the person in charge.

Li Fei hung up the phone, feeling a little confused.

Why did Chairman Qin suddenly want to contact Xiangshui gongmi?

"Honey, what's up with Chairman Qin?" Lin Haiyan asked hurriedly.

"Mr. Qin asked me to contact Xiangshui gongmi. It seems like something has happened," Li Fei explained.

"I think I know what's going on," Lin Haiyan remembered the video she had just watched. "The internet is full of news about Xiangshui gongmi and Linlin rice."

When Li Fei heard this, he immediately took out his phone to check and saw the news.

Then, he looked at the Linlin rice that he had just brought back. Obviously, the Xiangshui tribute rice side didn't know that boss Qin and the others had already cultivated the Xiangshui tribute rice.

If boss Qin immediately announced the Linlin rice, Xiangshui gongmi would suffer a great loss and lose its current status.

Boss Qin asked for the other party's contact information for a discussion. He might not want to announce it directly, but to give Xiangshui gongmi a chance.

After all, the Linlin rice was developed by boss Qin based on the Xiangshui tribute rice.

This was excusable.

therefore, he didn't hesitate to call president lin's number. he could only contact xiangshui gongmi through president lin.

As soon as the call went through, President Lin's voice could be heard. "Boss Li, you're here to rush the rice again? The next batch of Xiangshui tribute rice won't arrive so quickly."

Li Fei hurriedly said, " Mr. Lin, I'm not calling you about the rice. Linlin winery asked me to contact Xiangshui gongmi, so I could only contact you. Moreover, there's no harm in talking to Linlin winery about Xiangshui gongmi. Otherwise, if things continue to escalate, Xiangshui gongmi will be the one at a disadvantage. After all, they have professor Li Kai!

He was already giving her an explicit reminder.

After all, Chairman Qin hadn't announced Lin linmi's matter, so he couldn't say anything.

however, since professor li kai was mentioned, he should understand.

the linlin laboratory was capable of developing xiangshui tribute rice. after all, professor li kai was recognized as the first in the new generation of crop research.

on the other side, president lin was also in deep thought when he heard this.

He knew what kind of person Li Fei was, and there must be a deeper meaning to his words.

But he knew Linlin company well. It would definitely be one of the Giants in the future. He didn't want to offend it, so he also started to contact Xiangshui gongmi.

He did not participate, and simply relayed Li Fei's words as they were.

...

Soon, Lai Jing received the news from Li Fei.

The assistant reported to him almost immediately after receiving the news. "President Lai, Linlin company asked someone to pass on a message. They want to talk to us."

Lai Jing laughed,"are you feeling guilty?" however, we don't have much to talk about with them, unless they publicly apologize to us for using our xiangshui tribute rice to make money."

The assistant frowned. Mr. Lai, the other party also said that if this continues, we'll be the ones at a disadvantage. They even mentioned professor Li Kai's name.

"are you threatening us?" lai jing laughed when he heard this. He even mentioned professor Li Kai. Did he want professor Li Kai to cultivate the Xiangshui tribute rice immediately? Even the government has given up on this project. No matter how good professor Li Kai is, he won't be able to train it. "

[Chapter 974 440-There's Nothing To Talk About!](#)

The assistant nodded. that's true. Are you really not going to talk to the other party? "

Lai Jing shook his head and said, " we're not on the same path as them, so we don't need to worry about them. On the other hand, they're a little too arrogant for threatening us. Release another announcement saying that we've always been honest and won't accept private negotiations. We're not afraid of private threats either.

"alright, ceo lai!" The assistant replied and went to give instructions.

On the internet, the Xiangshui tribute rice announcement and the leeks harvested by Linlin winery were getting bigger and bigger.

There was no lack of people who hated the rich on the internet.

When people who hated the rich saw an electric car crash into a Maserati, even if the electric car ran through a red light and took full responsibility, they would still think that it was the Maserati's fault and find all kinds of reasons for the electric car."you're already driving this car, why are you being so calculative with the owner of the battery-powered car? It's not benevolent to be rich!"

Being blinded by jealousy and envy was actually a very abnormal mentality.

In fact, even if you received a salary of 10000 Yuan, there would be people who received 5000 Yuan and would be jealous of you. They would think that you were in the wrong for receiving a higher salary than them.

As a result, there was soon a discussion on the internet. It was said that Linlin enterprise was making so much money, but Linlin winery was still harvesting their leeks. It was being rich but heartless.

he had even compared qin lin, the boss behind the scenes, to the fallen big boss ma, who was also unscrupulous for money.

Unfortunately, these people didn't seem to understand that a bottle of wine that cost 700000 Yuan wasn't something that leeks could afford.

However, the internet was indeed a battlefield for these people to show off their power.

very quickly, xiangshui gongmi's announcement ignited the entire battlefield.

our Xiangshui gongmi has always been realistic. We will not accept any private negotiations, let alone threats!

once this announcement was made, it would be difficult for it not to blow up with such attention and popularity.

Everyone could understand the meaning behind it.

Wasn't this hinting that Linlin company wanted to negotiate in private and had even threatened Xiangshui gongmi?

All of a sudden, the negative image of Linlin's company was deepened.

"I have to say, I really didn't expect Linlin company to fall so quickly."

"I really admire the person in charge of Xiangshui gongmi. He's really tough!"

indeed. If it were someone else, they would have talked to Linlin company a long time ago. Everyone knows how big Linlin company will be in the future, but the person in charge of Xiangshui gongmi didn't give them any face at all.

"....."

at the same time, the internet was full of praise for the person in charge of xiangshui gongmi and lai jing.

However, this kind of praise was easy to be dazzled. Even a figure like big Boss Ma was also dazzled by this kind of praise, and then he couldn't extricate himself, and finally fell from power.

As for Xiangshui tribute rice, the assistant reported to Lai Jing, "CEO Lai, the announcement is over. It's even more popular on the internet now. Everyone's admiring us now, saying that we're not threatened by Linlin."

yes! Lai Jing nodded and ordered, "tell the middleman that this matter must be settled easily. Tell Linlin winery to apologize!"

Naturally, Lai Jing had been paying attention to the situation on the internet.

In the beginning, he was either angry or jealous that people were using their names to make money.

But now, his attitude seemed to have changed, especially after seeing the praise on the internet. He felt that it would be interesting to compete with Linlin company.

In any case, the other party couldn't do anything to him. Instead, they could help him and Xiangshui gongmibo gain reputation.

He was surprisingly enjoying it. This was something he had never experienced before. After all, Xiangshui tribute rice had only made a fortune in silence.

[Chapter 975 Good News? You Cheng Lin Mi](#)

Linlin Manor.

Just as Qin Lin was controlling his game character to mine and harvest a bucket of underground spring water, his phone rang. It was Li Fei.

He pressed the answer button, and Li Fei's sigh could be heard from the other side. "Mr. Qin, I'm really sorry. I've already contacted Xiangshui gongmi through my connections, but they don't want to talk about it. They even asked for an apology from Linlin winery."

ran ran. Qin Lin felt a little annoyed when he heard this.

He had just hung up the phone when Lin Lanzi arrived. She handed the phone to him. "Chairman Qin, take a look at the new announcement from Xiangshui gongmi!"

Qin Lin took the phone. After reading the new announcement from Xiangshui tribute rice, he could only sigh silently.

Sometimes, it was like this. You had good intentions, but the other party didn't appreciate it at all.

Originally, he had thought that the Xiangshui tribute rice would take at least a month to ripen.

This time would allow Xiangshui gongmi's side to make preparations. They wouldn't have to suddenly make an announcement and the other side wouldn't be able to deal with it.

After all, there was no right or wrong in this matter. He had indeed used the other party's name.

but now that things had come to this, he had no other choice.

in this era, society was progressing, and so were all aspects.

he couldn't just give up the xiangshui tribute rice just because he had used it in the name of xiangshui tribute rice.

Moreover, in this society, there would always be old things that would be surpassed, abandoned, and forgotten.

But this time, it was Xiangshui tribute rice that would be surpassed.

His Xiangshui tribute rice was a product of the game. Even if its quality had deteriorated, most of it should still be at a quality 1. Therefore, it was needless to say that the Linlin rice was better than the Xiangshui tribute rice.

The only thing that troubled Qin Lin now was that the Xiangshui tribute rice would only be harvested in more than a month. Without the ready Xiangshui tribute rice, even if he released the news, it would be even more difficult to convince people.

perhaps someone would say that it was another set of lies that they had come up with in a hurry after they were exposed.

He could get you Cheng to help him, but there would still be trouble.

He could also take out a large amount of Xiangshui tribute rice from the game.

However, the Xiangshui tribute rice had been kept for experimental planting in various counties, and nothing else was left!

now that he suddenly took out a batch, it was inevitable that people would be suspicious.

So, Qin Lin looked at the game screen in his mind. The game character had dug up quite a lot of Earth Spring water this time, so he might have to rely on this thing.

With this, the Xiangshui tribute rice in the planting area of Linlin Manor could ripen a little earlier.

At that time, he would invite the people of Youcheng County to participate in a harvest ceremony for the successful cultivation and planting of Xiangshui tribute rice. He should also invite the relevant leaders in the city. After all, the villa was still experimenting with planting Xiangshui tribute rice in other counties of Ming city. He should inform the city.

By then, with the support of the county and city, there would be no need to care about the negative comments on the internet.

moreover, for rice, water quality, weather, fertilizer, and other factors would all affect the time it took for the rice to ripen.

With more than a month's time difference, the rice in this planting area would not be explored by anyone next year.

Therefore, Qin Lin sneaked out of the manor at night.

The planting area of Linlin Manor was very large, and one of the areas was specially used for the experimental planting of Xiangshui tribute rice.

The paddy field was different from other planting areas and the comprehensive sea of flowers with a watering system. There was no special reservoir, and they had to rely on drawing water into the paddy field.

Therefore, on the nearby mountains, there was a special canal that connected the water to the lower part of the river.

Qin Lin went out at night and came to the river at the end of the canal.

there were no surveillance cameras in this area, so no one would come here at this time of night. however, to be cautious, qin lin found a more remote place to enter the game.

[(rare) Earth Spring water: Mysterious!]

[this is a rather rare underground solution. It is the essence accumulated in underground springs. It is very active and has a very strong effect on the growth of plants. Restrictions: [each plant can only absorb a limited amount of energy. It is impossible to absorb energy indefinitely. Please study the specific situation on your own.]

Qin Lin looked at the remark of the earth Spring water and took out two buckets. He then went to the end of the canal and poured the two buckets of Earth Spring water directly into the canal.

With the flow of the water, the spring water would flow into the paddy fields of the planting area along the canal. Then, it would flow through the gaps in the paddy fields and flow to all the paddy fields.

According to his previous experience of watering the integrated sea of flowers and the canine grass in the ranches, two buckets of spring water were enough to make the rice in the paddy fields in the planting area mature.

Time passed quickly.

The spring water of the earth quickly flowed into the paddy fields.

Everything happened without a sound.

The night passed.

After Yu Shui went to work at the villa, she started a meeting with the planting department staff as usual, and then asked them to do the work.

He himself also left the office with a few supervisors and went to the plantation area to inspect the situation.

Although he was now the manager of the plantation Department and didn't need to work in the fields himself, he still came to the plantation area to check on the situation regularly.

If anything happened, he would be the first to know.

As soon as they entered the planting area, Yu Shui was attracted by one direction and exclaimed, " "Yi!"

It was a dazzling gold!

It seemed to be the paddy field where Xiangshui tribute rice was grown.

Yu Shui immediately led her people over.

When he got close to the paddy fields, he saw that they were all ripe and the ears of rice were bending over the stalks. He frowned and asked one of the supervisors, " "The Xiangshui tribute rice has already ripened to such an extent. Why hasn't it been reported? Aren't you in charge of observing the Xiangshui tribute rice?"

[Chapter 976 Good News? You Cheng Lin Mi?](#)

The supervisor was dumbfounded, okay?

He had just observed the Xiangshui tribute rice a few days ago. It was clearly not ripe yet. According to his estimation, it would take at least 20 to 35 days for the Xiangshui tribute rice to ripen.

What was going on now? In just a few days, the rice had grown to this extent?

This speed was against common sense. Could it be that the Guan Yin Bodhisattva had thrown some jade dew down from the Jade bottle?

Naturally, such a thing would not happen in the current society.

"Manager, I was just about to report to you. I came to check a few days ago and found that the rice is about to ripen." the manager immediately said.

It wasn't easy for him to get this position. Moreover, the salary and bonus were high. Many people in you city were envious of him.

If he said that he had speculated that it would take 20 to 35 days for it to mature a few days ago, he might be thought of as not working seriously or being unprofessional.

That wouldn't be against his salary or position.

When Yu Shui heard the supervisor's words, she didn't doubt it. She just reminded him, " "Next time, tell me earlier about this kind of situation."

"Yes, yes, manager!" the supervisor immediately nodded and heaved a sigh of relief. he was glad that he was quick-witted, otherwise his bright future would be gone.

Yu Shui had already squatted down and reached out to pick a small handful of rice from a stalk. Then, he rubbed off the shell, and very soon, a lot of crystal clear and very full rice appeared in his palm.

It was no different from the Xiangshui rice he had seen before.

Seeing this, the supervisor tried to remedy the situation again, " "Manager, the rice is much fuller today. When I came to check a few days ago, the rice wasn't this full."

yu shui nodded and immediately placed the crystal clear and full rice into her mouth to chew.

As long as the quality of the Xiangshui tribute rice produced by the game was good, it would have +1 deliciousness and +1 texture.

Yu Shui also immediately felt a good texture and taste.

He knew that the Xiangshui tribute Rice's taste and texture meant that the experiment had been a success. This made his face full of joy.

He knew about the Xiangshui tribute rice and how difficult it was to grow it. Even the country had given up on the project.

Last year's seed was not counted. It could only be considered professor Li Kai's experiment.

Now that this area had been expanded to grow crops on a large scale, the experiment would only be a success if the planting was successful.

This would definitely cause a sensation.

There might even be records of this matter in agricultural books. He didn't know if his name would ever appear. He was the one who led the planting of the Xiangshui tribute rice.

After that, he went to the fields to pick the rice, then removed the shells to taste and chew.

Almost every piece of rice in the paddy field was the same. The shape was perfect, and it had a good taste and texture even when eaten raw.

After Yu Shui checked the paddy fields, she hurriedly got up and went to Linlin Manor.

The Xiangshui tribute rice in the villa's plantation area had been successfully planted. Naturally, he had to personally report this good news to Chairman Qin.

Yu Shui arrived at the manor as fast as she could.

When Chen dabei, who was on patrol, saw them, he greeted them, " "Old Yu, what's wrong with being in such a rush?"

"I have good news to tell you, Chairman Qin!" Yu Shui replied.

In the office.

Qin Lin knew what was going on when he saw Yu Shui, but he asked, " manager Yu, you're sweating all over. What's the emergency? "

Yu Shui hurriedly said, " boss, it's not an urgent matter. It's good news. The Xiangshui tribute rice in our Manor's planting area has ripened, and the taste and texture of the raw rice are very good. It's a success.

"Really? Quickly take me to see it!" Qin Lin's skilled acting skills came online in an instant, and his face was also full of surprise.

Her acting skills should be enough to make celebrities like Kun, Jing, and Bei Bi feel ashamed.

Yu Shui immediately took Qin Lin out of the office and went straight to the planting area, to the paddy field area where the Xiangshui tribute rice was grown.

"Chairman Qin, look, these Xiangshui tribute rice are all ripe." Yu Shui said excitedly as soon as she arrived.

Qin Lin nodded. He went forward, squatted down, and picked a few grains of rice to remove their shells.

The rice grains were crystal clear, and the appearance was perfect.

He put a few grains of rice in his mouth and chewed. He could feel the texture and taste. Based on his experience, he knew that this was a Grade 1 Xiangshui tribute rice.

"By the way, who's in charge of the Xiangshui tribute rice?" Qin Lin asked again.

He had poured the earth Spring water in last night. Today, the Xiangshui tribute rice had ripened. Even if he did not have to look at the Xiangshui tribute rice every day, people would be suspicious if they noticed it.

When the supervisor heard Qin Lin's words, he stood up immediately. "Chairman Qin, I'm in charge of this Xiangshui tribute rice. I come to check it every once in a while. In fact, I came to check it a few days ago. At that time, the Xiangshui tribute rice was about to ripen and the rice grains were about to be full. It's completely full today."

If Qin Lin didn't know about the situation, if he didn't pour the earth Spring water last night, he would have believed this supervisor.

This guy wasn't realistic. He actually made up lies to deceive the leader and his boss.

However, he still smiled at the manager and said, "Well done. You and the staff in charge of Xiangshui tribute rice will get an extra three months' bonus this month."

"Thank you, Chairman Qin!" The supervisor was overjoyed.

This also made him glad that he was smart yesterday. Otherwise, he wouldn't have gotten the bonus and wouldn't have been praised by his boss. He might have been criticized for not working seriously.

[Chapter 977 Good News? You Cheng Lin Mi](#)

"Chairman Qin, should we harvest the Xiangshui tribute rice now?" Yu Shui asked.

Qin Lin shook his head. There's no hurry. This is our first batch of Xiangshui tribute rice that has been successfully planted on a large scale. We have to hold a grand ceremony. At that time, you, as the manager, have to bring someone to share your experience in growing Xiangshui tribute rice.

"Okay, boss!" Yu Shui said, her face full of joy.

This way, his name might really have a chance to be in the book.

...

On the internet.

the popularity of xiangshui gongmi and linlin winery was even higher, mainly because linlin company had not given a response. more and more people on the internet took this as a tacit agreement.

In you City County, sun Xian and Chen Li were also looking at the news on the internet with vexed expressions.

It was hard for them not to pay attention to the commotion on the internet.

This negative news didn't just affect Linlin company, but also you city.

Furthermore, Lin Lin winery was now one of their main specialty brands.

Some people who wanted to watch the show were led to you city.

The two of them knew that boss Qin had already developed Xiangshui tribute rice and had planted it in so many counties.

However, there was no response from boss Qin, which made them very anxious.

" chen li, give boss qin a call and ask him what's going on, " sun xian said directly. " if it really doesn't work, our county will help him. "

"En!" Chen Li nodded and dialed Qin Lin's number.

Qin Lin received a call from Chen Li the moment he returned to his office.

chen li's slightly anxious voice could be heard, " " boss qin, the xiangshui tribute rice is all over the internet. how do you want to deal with it? do you need our help? "

qin lin was a little touched when he heard this.

The county people really treated him as one of their own.

In fact, in terms of Linlin villa and the ranch, to a certain extent, they were no different from you Cheng's family.

The premise was that they didn't change the leader.

"Xian Chen, we will settle this matter immediately. The Xiangshui tribute rice has been successfully planted at Linlin Manor. Moreover, the quality is much better than the original Xiangshui tribute rice," he said with a smile.

as planned, this rice will be called Linlin rice from now on. We plan to hold a harvesting ceremony for the successful planting. We'll invite the county to participate and also ask the county to help invite a few city leaders.

"no problem!" Chen Li replied. He covered the phone and reported to sun Xian in surprise, Sun County, the experimental Xiangshui tribute rice in the Linlin Manor's planting area has been successfully planted. The quality of the rice there is even better than Xiangshui tribute rice. Boss Qin intends to invite us to

participate in the harvest ceremony of the successful experiment, and officially call the new rice Linlin rice.

"Really?" When Sun Xian heard the news, he stood up in surprise.

The Xiangshui tribute rice planted in the Linlin villa area had been successful, which meant that the other Xiangshui tribute rice planted in your city should also be successful.

The key point was that the quality was even better.

He knew what this meant, and he also knew how much your Cheng would benefit from it.

Sun Xian seemed to have thought of something. He anxiously asked Chen Li, "hurry up and ask boss Qin if he can add the word 'your Cheng' in front of Linlinmi."

Chen Li understood the meaning of this matter. He asked through the phone with some apprehension, "Boss Qin, the people in the county are asking if you can add the words 'your Cheng' in front of Linlinmi."

"Alright!" When Qin Lin heard this question, he thought about it and answered.

To be honest, although he had a cheat, the county had helped a lot in the development of the villa, Ranch, and Linlin company.

This was especially so for Chen Li, who had also been running around for his matters.

Adding the word "your Cheng" in front of Linlinmi didn't have much of an effect. Many well-known products also had such operations.

Therefore, he didn't mind helping others, or maybe it would be a beautiful story in the future.

"Boss Qin, thank you so much." Chen Li said to his phone in surprise and then made an "OK" gesture to Sun Xian.

"That's great." Sun Xian immediately waved his fist in excitement. He was as happy as a child because he knew how much benefit this would bring to your Cheng.

[Chapter 978 Lin Lin's Rice In Your City Becomes Qin Lin's Rice In Your City \(1\)](#)

After Qin Lin hung up Chen Li's call, he looked for Lin Lanzi and directly ordered, "The first batch of Xiangshui tribute rice has been successfully planted under the leadership of professor Li Kai. We're going to hold a harvest ceremony for the successful experimental planting. People in the county and city will be invited to attend. Make an announcement and invite the Xiangshui tribute rice to attend. Just say that you're grateful for the help of the seeds provided by the Xiangshui tribute rice."

This was also the most decent thing he could do.

No matter what, the outside world didn't know that he had the system and that the Xiangshui tribute rice came from the game. They would only think that they had developed Linlin rice from the Xiangshui tribute rice.

As long as the people from Xiangshui gongmi weren't stupid, they should know what to do. Then the online incident would stop.

if the other party still didn't accept his good intentions, then he really had no other choice.

"Chairman Qin, no wonder you're able to keep your cool." Lin Lanzi immediately revealed a smile.

She had long wanted to make a statement about the incident on the internet, but she didn't know what reason to use. She had been waiting for her boss's instructions.

This was simply an instant kill.

She went back to the villa as soon as she received the instructions.

After Lin Lanzi left, Qin Lin gave Li Kai a call.

"Brother li, what's the matter? I was just about to do an experiment." li kai's voice was heard.

Qin Lin said directly, " brother li, the Xiangshui tribute rice planted in Linlin villa is mature and has been successfully planted. They're going to hold a harvesting ceremony. People from the county and the city will be invited, and you have to make a speech. It's best to write an experimental report. After all, you're the one who led the research on the Xiangshui tribute rice. I've already asked manager Lin to make an announcement.

Old brother li had to be the scapegoat; otherwise, no one on his side could take the blame.

Linlin's laboratory.

When Li Kai heard that the Xiangshui tribute rice had been successfully planted, he was very happy for Qin Lin. It was definitely a huge success in the history of crops.

The country had once wanted to research this project but had given up. Now, the experiment at Linlin villa had succeeded.

However, the more he heard, the more he felt that something was wrong.

because the xiangshui tribute rice seedlings were clearly planted by brother qin himself.

When he discovered it, the seedlings were already very tall.

how could he claim credit for this?

When he thought of this, he said anxiously,"wait, Brother Qin, didn't you cause the Xiangshui tribute rice to be damaged?"

toot du du du!

The sound of the phone hanging up came.

Li Kai's words were suddenly stuck in his throat.

In Linlin Manor.

Qin Lin hung up the phone and heaved a sigh of relief. Then, he put down his phone.

as long as the phone was hung up quickly, the blame would be thrown quickly. even if old brother li didn't want to, he had to take the blame.

His phone rang. Seeing that it was old brother li, he chose to turn it off silently.

On the other side.

When Li Kai heard that the call couldn't be picked up for the time being, he understood.

This was because old Brother Qin didn't want to be in the limelight, but he wanted him to take the blame.

He could take the blame for other things. Although it was to cover up the special soil, and he had participated in the whole process, but this Xiangshui tribute rice was just too expensive.

It was just that old Brother Qin wanted to organize this harvesting ceremony, so he could not undermine it. However, he also had his own ideas.

Li Kai was no longer in the mood to do experiments. He went straight to the computer and began to fill in the speech form and experiment report.

He decisively wrote Qin Lin's name on the experimental report.

After thinking for a while, he filled in a few more names, which were the researchers who had later contributed to Xiangshui gongmi.

We'll take the blame together.

After some thought, Li Kai took out his phone and connected it to the computer. He pulled out two photos from his phone. They were the photos of Qin mo squatting in front of the experimental paddy field and observing the rice seeds.

In the past, he had only taken a few photos and felt that it would be useful. Now, he could directly copy the photos and paste them on the experimental report.

In any case, when the time comes, the majority of the experiments will be done by Brother Qin.

The report would be more convincing if it was posted on the Linlin laboratory's official website.

As for what was going on with the photo, if he didn't say it, how would others know?

He started with a picture, and the content was up to him.

After Li Kai finished writing the experimental report, he couldn't help but snap his fingers.

...

Very quickly.

Lin Lanzi had also brought people from the villa's multimedia department to edit and produce the public announcement video. For this video, she had even brought people to specially film the rice field where the Xiangshui tribute rice was grown. Some rice, even the rice grains after their shells were removed, were also filmed.

After that, she asked someone to upload the video to the official account of Linlin villa and then posted it.

On the internet.

The matter of Xiangshui gongmi and Linlin winery was still a hot topic, and everyone was curious about Linlin's response.

However, Lin Lin's company remained silent and did not respond.

This attitude, which seemed to be a silent agreement, made the popularity of the event even more difficult to die down.

At this time, the official account of Linlin Manor finally made an announcement. The moment the announcement was made, it instantly attracted everyone's attention.

under the leadership of professor Li Kai and with the support of the seeds of Xiangshui tribute rice, Linlin laboratory has finally successfully cultivated and researched Xiangshui tribute rice, and its quality has already surpassed that of Xiangshui tribute rice. Now, Linlin villa is going to hold the first successful harvesting ceremony in the experimental site and invite the Xiangshui tribute rice to attend. The new Xiangshui tribute rice planted in the villa will be named Youcheng Linlin rice Gege.

The moment this announcement was made, the internet went into an uproar.

[Chapter 979 You City's Linlin Rice Becomes You City's Qin Lin's Tribute Rice](#)

Especially those who thought that Linlin enterprise had tacitly admitted that Linlin winery was a fraud and had secretly encouraged it, were all dumbfounded.

It turned out that Linlin's company was not tacitly agreeing, but was preparing for a big move.

This announcement wasn't a response, but a response.

The Xiangshui tribute rice company had said that they had not sold the rice to any winery, but Linlin company had already successfully cultivated the Xiangshui tribute rice, so there was no need to find anyone else to buy it.

Didn't this mean that Xiang Shui gongmi had missed his target and made an ugly mistake?

However, he felt that something was wrong.

Linlin Manor's announcement also stated that the Xiangshui tribute rice was the source of the seeds, which was why the Linlin laboratory was able to successfully develop it.

That way, Xiangshui tribute rice would know that Linlin winery might have Xiangshui tribute rice.

That Xiangshui tribute rice isn't at Lin Lin wine factory, right?

could it be that xiangshui gongmi was targeting other wineries? Was it just a misunderstanding?

However, it seemed that no other winery had sent a message saying that their wine was brewed with Xiangshui tribute rice.

For a moment, the people on the internet were stunned and confused.

That was until an internet celebrity named 'world is sober' posted a video:

"Could it be that this is the joint hype of Xiangshui gongmi and Linlin company? The production of Xiangshui tribute rice had always been limited. Everyone wanted to increase the production of this kind of thing and sell it for more money.

Moreover, Xiangshui gongmi wine can be sold for a lot of money now, so Xiangshui gongmi has cooperated with Linlin laboratory, and even Xiangshui gongmi may cooperate with Linlin winery."

Once the video was released, everyone surprisingly thought that it made sense.

After all, this could explain why Xiangshui tribute rice was provided for Linlin's laboratory experiment, and why the announcement was made. Wasn't it a joint hype?

Do you still remember the routine of those cool PK streamers? Wasn't it just two sides scolding each other, then PK, and then cutting the leeks of the vermicelli together?

Although Linlin company and Xiangshui gongmi didn't harvest leeks, they had become famous and everyone knew about it.

companies like maotai and fenjiu also knew about the linlin manor announcement. however, the bosses of the two companies could only sigh silently after seeing the news.

They had originally wanted to rely on Xiangshui tribute rice to brew a batch of wine to see if there was a chance to wrestle with Linlin winery.

After all, the title of the best National Wine couldn't be given to Linlin wine for nothing.

Now, it seemed that they had no chance at all.

Chinese Academy of Sciences.

Minister Lu also saw the news. He knew about it and was pleasantly surprised. "We've finally succeeded. As expected of Linlin's laboratory."

This also made him look forward to it. Linlin's laboratory had a large-scale experimental planting of Xiangshui tribute rice. In addition to the planting area of Linlin villa, there were many other areas in you city and various counties in Ming city.

He didn't know what would happen when the Xiangshui tribute rice planted in these areas matured.

just as he was thinking, his phone rang. it was a call from a leader.

"Leader, is there a new mission for the Chinese Academy of Sciences?"

The leader's voice was heard. it's not a mission. I just want to ask if the news released by Linlin Manor is true. Did they really successfully cultivate and grow the Xiangshui tribute rice? " and the quality is even better than the original xiangshui tribute rice?"

Minister Lu immediately said, " leader, they have indeed cultivated it. They have already tried planting it in various counties of you city. As for the quality, at least the harvest from Linlin Manor should be the same as this batch. As for the other places to test it, we will only know when it matures.

The leader immediately added, " I'm also asked by the procurement department. If it's true, they will send someone to Linlin Manor. Since you've been in contact with boss Qin, you have to go with them.

"Alright, I understand." Minister Lu immediately responded.

He naturally knew why the purchasing department was in a hurry. After all, if the Linlin rice was of better quality than Xiangshui tribute rice, the anti-aging ingredients would definitely be better.

They would definitely have to purchase for their leader.

Hence, the you city Linlin rice would soon be changed to you city Linlin tribute rice.

...

In an office.

After settling the distribution of the new batch of Xiangshui tribute rice, Lai Jing heaved a sigh of relief.

The distribution of each batch of Xiangshui tribute rice was also a headache for him. Firstly, he could not miss out on the official portion, and secondly, he could not miss out on the other people in the capital.

The remaining portion was for the outside world to channel.

After he finished his coffee, he saw his assistant rush in. "Mr. Lai, look at the news online. The taxi company just made an announcement."

"What's wrong? They apologized?" Lai Jing asked with a smile.

&Nbsp; " it's not an apology, " the assistant said hurriedly, " President Lai, you'll know once you go online. Everyone's working with us and Linlin company to create hype.

"What?" Lai Jing was stunned. What a joke. How could they possibly conspire with Linlin company?

He also took out his phone at the first moment. Just as he turned on mouyin, a video popped up.

" i thought the person in charge of xiangshui tribute rice was a responsible person who wasn't afraid of linlin company. it turns out that we misunderstood. the two sides are working together to create a wave of hype. however, the fact that linlin's laboratory can cultivate xiangshui tribute rice can only be said to be amazing. you should know that the chinese academy of sciences used to specialize in the xiangshui tribute rice project, but they gave it up in the end. "

Indeed, many people agreed with this point in the video, especially those who had some understanding of Crop Research.

" i agree with the blogger's words. it's really amazing to be able to develop xiangshui tribute rice. as far as i know, the chinese academy of sciences gathered experts in related fields but failed to develop it. "

"Xiangshui tribute rice is one of the most difficult crops to research and cultivate in the field of Crop Science. I didn't expect it to be cultivated now."

"I can only say that Linlin's laboratory is really amazing."

"....."

Lai Jing was even more confused when he saw the video.

Linlin's laboratory had cultivated Xiangshui tribute rice? This was impossible. Since it was one of the most difficult crops to research, even the Chinese Academy of Sciences had failed. How could Linlin's laboratory have developed it?

Besides, when did he join hands with Linlin company to create hype?

There was no such thing.

He immediately opened the official account of Linlin Manor and saw the latest announcement.

However, when he saw the video on Linlin villa's official account, Lai Jing's expression became more and more serious, especially when he saw the mature rice in the video, and the crystal-like state of the rice after the husking was removed.

He had been in charge of the Xiangshui tribute rice for almost 20 years, so he was very familiar with everything about it. When he saw the mature rice, he knew that it might be the Xiangshui tribute rice. And the husked rice was the Xiangshui tribute rice. Its perfect appearance was even rounder than theirs.

But how was that possible?

Were the Linlin laboratory and professor Li Kai really that powerful?

If this was true, what was the point of their argument?

A clown?

"Mr. Lai, everyone's talking about it online. We can't just sit back and do nothing," the assistant said.

"Yes, we can't just do nothing." "Yes." Lai Jing nodded and said to his assistant, "Send out a response notice immediately. Say that our Xiangshui tribute rice will be on time to attend the harvest ceremony at Linlin Manor."

The assistant was stunned and asked, "CEO Lai, aren't we fighting back?"

"How should we fight back?" Lai Jing asked angrily.

The other party had invited you city and Ming city's officials to participate, so it was impossible for them to fake the Xiangshui tribute Rice Research.

Otherwise, if things got out of hand, the other party would not be able to clean up the mess.

He added, "I'd like to clarify that our previous announcement wasn't aimed at Linlin winery. It was because we received news that some wineries couldn't buy our Xiangshui tribute rice. They wanted to use ordinary rice to lie that it was our Xiangshui tribute rice that made the wine. I hope that everyone won't be fooled."

"President Lai," the assistant said, "this will really make everyone think that we're working with Linlin to create hype."

"What else can we do?" Lai Jing said helplessly, "let them think that way if they want to. Now that Linlin's laboratory has really developed a better quality Xiangshui tribute rice, what we need to think about is how to please Linlin's laboratory and get the new seed. Otherwise, with better things, what status will our Xiangshui tribute rice have in the future? "

Obviously, after calming down, Lai Jing already knew what the best choice was.

"I understand." Only then did the assistant notice the seriousness of the situation, so he hurriedly nodded and went out to handle the matter.

Lai Jing sighed helplessly.

He had always thought that after the country's failed research project on Xiangshui tribute rice, no one would be able to develop Xiangshui tribute rice.

Who knew that the Linlin laboratory and professor Li Kai were so perverted?

Even the country had been researching and developing crops that could not be cultivated, but they had actually succeeded.

[Chapter 980 The Xiangshui Tribute Rice Was Cultivated By Little Qin?](#)

Ningcheng County was still very famous among the counties in Ming city.

a part of the fame was naturally because ning city was the only one who had successfully poached a girl from you city.

When ning city poached the Linlin leisure tea from you city, it gave all the counties hope of poached from you city.

You city had also been on guard against other counties for this, afraid that they would be poached.

However, you city couldn't prevent the experimental planting of Xiangshui tribute rice. After all, you city only had so much land.

"Everyone's here, let's go!" Liang Cheng got into the car with his men and left the Ningcheng County government.

After you Cheng poached the Linlin leisure tea, his right to speak in ning city had also increased a lot.

Linlin leisure tea was now almost available all over the country. Linlin company had also expanded its Linlin leisure tea factory in ning city, which had solved many jobs.

Of course, the most important thing was the high salary of the Linlin factory's employees.

This had greatly improved the People's livelihood and economy of Peace City.

this time, the city of liang naturally received the news of the success of the xiangshui tribute rice in linlin manor.

therefore, he hurriedly gathered people to check on the situation of the xiangshui tribute rice that linlin's laboratory had planted in ning city.

Very quickly, Liang Cheng brought his men to the experimental plot of Xiangshui tribute rice.

The few entrances to this experimental plot had been blocked long ago, and there was no way to enter from the outside.

There were even special security guards and patrolling police officers who would often pass by.

When Liang Cheng arrived, he turned to the person beside him and said, " chief Wang, take some people with you to check it out. The Xiangshui tribute rice has been successfully planted in you city. We're the closest to you city, so it's impossible for the planting to fail, right? "

"Alright, Liang County." Director Wang nodded immediately.

He was in charge of agriculture, and this was related to him. He immediately led his people into the experimental site and began to check it out.

not long after, director wang came out with a happy face and reported to liang cheng, " "Liang County, according to the time, these Xiangshui tribute rice should take another month to ripen,"

however, we also found some rice that has begun to form grains. Although the grains are not full, after chewing, they are very good. Our Xiangshui tribute rice should be successfully planted.

"That's great." Liang Cheng clenched his fists when he heard the news.

I can't let you Cheng take all the good things.

Ning city wanted a share in the Xiangshui tribute rice project of Linlin's laboratory.

In fact, Liang city was not the only one doing this.

All the counties were actually very concerned about the Xiangshui tribute rice trial planting.

If the Xiangshui tribute rice could be successfully planted in his county, with its reputation and price, it would definitely be extraordinary.

Therefore, now that the Xiangshui tribute rice had been successfully planted in the Linlin Manor area, the people of each county were mobilized.

Naturally, they were also looking forward to the success of the Xiangshui tribute rice in their County. They all checked the situation of the Xiangshui tribute rice experimental plot in their County.

...

In the blink of an eye, a few days had passed. You city had become more and more lively because of the Xiangshui tribute rice harvest ceremony at Linlin Manor.

It was unknown how many related reporters and bloggers had come to you city to gain popularity.

Some crop researchers had also applied to Linlin's laboratory, hoping to attend the event, especially the old research professors who had participated in the Xiangshui tribute rice project.

They knew how difficult the research of the Xiangshui tribute rice was. Back then, they had been led by the number one researcher in rice, but they had all given up in the end.

now, linlin's laboratory had succeeded in their experiment on their own. they couldn't help but be impressed.

Lai Jing had also arrived at you city as fast as possible with his assistant.

The internet was now completely convinced that they and Linlin company were working together to create hype, but he wasn't in the mood to pay attention to this at all. He was only thinking about how to get the seeds of the new product from Linlin's laboratory.

The assistant looked at his phone and saw that he had received a message. He reported to Lai Jing, " CEO Lai, Linlin's company has sent word that they've arranged rooms at the Zhong min hotel. As for the harvest ceremony, it'll be at noon tomorrow. After the harvest, it'll be professor Li Kai's report on the experiment.

"En!" Lai Jing nodded.

He wanted to go to professor Li Kai's report. After all, he was the one who had developed their Xiangshui tribute rice.

...

The next day.

Lai Jing was notified once again and brought his assistant to Linlin Manor to attend the harvest ceremony of Xiangshui tribute rice.

As soon as they arrived at Linlin villa, they took out the online invitation they had received and were led to the planting area of Linlin villa by a professional.

The plantation area was already very lively, and many people had already gathered there.

Among them were experts in domestic Crop Research.

There were also news reporters from the government.

These reporters were different from the reporters outside. They were the ones who reported the official records truthfully.

Other than that, there were sun Xian and Chen Li from you city, as well as Gong Jie from Ming city (warned, delete 1000 words, can not write it to the city level, sigh!)

...

Yu Shui smiled and said to everyone, " everyone, take your Sickles here. After you've harvested, we'll help you remove the shells. At noon, the kitchen of the villa will use the Linlin rice to make rice for everyone to taste. After that, professor Li Kai will give you a related report in the lobby of the Zhongmin hotel.

He was very motivated now.

Just now, not only did the police from Ming city shake hands with him and ask about the cultivation of Xiangshui tribute rice, but there were also reporters who asked and took pictures of him.
