

The Game 981

[Chapter 981 The Xiangshui Tribute Rice Was Cultivated By Little Qin?](#)

This meant that he might be on the news.

He had already decided that when the news was broadcast, he would take a leave of absence and go home. Then, he would spend a lot of money to invite all his relatives and friends to his house for a meal. Then, he would pretend to turn on the TV by accident and let everyone see the news.

to an ordinary person, being able to be on the news once was something to be proud of.

upon hearing yu shui's words, chen li and sun xian immediately became interested and invited the few people from ming city to go forward and get the scythe.

The others were the same.

Lai Jing had been watching the whole time, and he was sure that these were Xiangshui tribute rice.

The only thing he wanted to do now was to confirm how much better the Xiangshui tribute rice produced by Linlin's laboratory was than theirs.

He brought his assistant to get a sickle and found a field. He rolled up his pants and walked in, his movements very familiar.

He had been in charge of Xiangshui tribute rice for nearly 20 years, so he naturally did a lot of things in this area.

Lai Jing looked around. While no one was paying attention, he plucked a handful of rice and began to remove the shell. Then, he stuffed the crystal-clear rice into his mouth and began to chew.

He knew the taste of his Xiangshui tribute rice when it was eaten raw. Moreover, from the taste of it, one could tell to a certain extent what it would be like when it was cooked.

but after chewing a few times, his expression became very serious.

"Ah!" Lai Jing finally let out a deep sigh.

He was glad that he had made the right choice in the end and came to Linlin Manor.

This way, they could still have the face to beg for the Linlin rice seeds. Otherwise, they would be in a very bad situation.

On the other side, Chen Li, sun Xian, and the rest had already started to harvest the Linlin rice.

The crop researchers didn't forget to observe when they were harvesting, and they were very curious.

At noon.

Linlin villa's internal restaurant served these people.

the rice was naturally the rice that they had harvested.

A Grade 1 Xiangshui tribute rice had A +1 in texture and +1 in deliciousness. It was definitely something that these people had never eaten before. They ate it with relish and praised it repeatedly.

Even Lai Jing had to admit that the cooked Linlin rice was far superior to his Xiangshui tribute rice in terms of both taste and texture.

After lunch, everyone was in a hurry to head to Zhong min hotel.

After tasting the Linlin rice, they were more interested in professor Li Kai's experimental report and how the Linlin rice was cultivated.

The lobby of the Zhong min hotel had been booked by Linlin villa today, and there were security guards in charge of keeping a tight watch.

Because there were too many tourists in Linlin Mountain Villa, the Linlin laboratory had placed the report at the Zhongmin hotel to avoid attracting tourists.

But even so, the lobby of the central Min hotel was surrounded by a dense crowd of people.

There were some who wanted to freeload traffic, some reporters who weren't invited from outside, and most of them were naturally just there to join in the fun.

Firstly, the reputation of the Xiangshui tribute rice was great.

Everyone already knew that it was a huge achievement to research and cultivate this thing.

Also, this was professor Li Kai's first experimental report to the public.

everyone knew about professor li kai. he was recognized as the most powerful crop researcher and the idol of many people.

With the development of the times, more and more people had come to realize that apart from some people born after 2000, more people were already fans of researchers like professor Li Kai, not those celebrities who spent all day in makeup.

Therefore, it was difficult for this experiment report to not attract attention.

the experiment report hadn't even started, but countless people on the internet had already started a live broadcast of the report.

Users of online Short Video platforms who only watched a few videos online were guaranteed to find live streaming rooms that were trying to gain popularity.

Naturally, the official account of Linlin Manor would also broadcast this report live. Moreover, it would be the clearest and best live broadcast.

Therefore, the livestream room of Linlin villa's official account was already packed with people, and the comments were already dense.

"I never thought that I would be able to participate in such a high-level report one day!"

"mom, i've made it! i can finally see professor li kai's experiment report today! "

I hope professor Li Kai can give more experimental reports like this and let the people in the entertainment circle know what the power of science is.

"....."

Qin Lin was also in the manor's office, watching the live broadcast on the official account of the manor.

When he saw Li Kai walk out from inside and appear in the live broadcast room, he had a smile on his face.

He was very satisfied with his arrangements.

"It's so good to have brother li as the scapegoat."

It would be better to let old brother li handle this kind of occasion. Otherwise, he wouldn't know how to make up a story if he were to do it himself.

When Li Kai appeared on the reporting platform, Chen Li, the police from Sun County and Ming city, as well as the research professors, all looked over.

Regardless of whether they were invited or not, or the live broadcast rooms that were trying to ride on his popularity, they all pointed their cameras at him.

At this moment, Li Kai was the center of attention.

Li Kai was actually a little nervous, because this was his first time doing an experiment report like this. Fortunately, this was not a professional conference, but an external report.

the difference was that professional conferences had to report academic and technical theories.

He didn't need to report this to the outside world. He just needed to make up some things. After all, no one could tell everyone about their experimental technology and data.

[Chapter 982 The Xiangshui Tribute Rice Was Cultivated By Little Qin?](#)

Li Kai took a deep breath and began his report, " as we all know, Xiangshui tribute rice is very difficult to study and cultivate because it has very strict requirements for its growing environment.

therefore, many laboratories have failed in their research and cultivation of Xiangshui tribute rice. The research and cultivation of Xiangshui tribute rice has become one of the biggest problems of the crop system.

now, our Linlin laboratory has successfully cultivated Xiangshui tribute rice and done something that no one else has been able to do. I feel very proud.

After saying this in one breath, he paused for a moment to catch his breath.

At this moment, applause rang out from all around.

In the manor's office, Qin Lin also smiled and muttered, "Old brother li is still okay. He doesn't have stage fright at all."

But Li Kai's next words stunned him.

Li Kai continued his report. however, there is one thing I must make clear. The outside world has always thought that I was the one who led the research of Xiangshui tribute rice. This is not true. I participated in it, but I was not the one who led it.

"You all know that Linlin's laboratory is doing experiments on purification grass and low-temperature gene Kasaya, but I'm too busy with these experiments. How can I lead the research on Xiangshui tribute rice? After all, I don't know how to clone myself."

These words immediately caused a sensation.

Chen Li and the others looked at each other.

They had always thought that the Xiangshui tribute rice was the product of professor Li Kai's research.

Now, professor Li Kai actually said that he wasn't the one behind it.

On the internet, the netizens who saw the live broadcast report were also stunned.

In their minds, the only person in Linlin laboratory that was impressive was professor Li Kai. Therefore, everyone subconsciously thought that the results of Linlin laboratory were all completed by professor Li Kai.

However, professor Li Kai was right. After all, professor Li Kai was only one person, and he did not have the ability to split himself.

In other words, Linlin's laboratory had other capable people.

Moreover, to be able to research and cultivate Xiangshui tribute rice, he was definitely an extremely capable person.

In an instant, the comments in the live broadcast room exploded.

666, Linlin's laboratory is awesome. I want to know who this awesome person is!

that's right. There's already professor Li Kai, and now there's another ferocious person.

"In that case, Linlin laboratory is said to be one of the most powerful private laboratories, right?"

"..."

At the scene, Li Kai had already opened his mouth again. He smiled and said, "I'm sure everyone would like to know who researched and cultivated this Xiangshui tribute rice, right? He's a genius. He didn't major in Crop Research, but with self-study and some guidance from me, he's shown amazing talent in Crop Research, Youyou."

Qin Lin watched the live broadcast and had a Strong Bad feeling.

Li Kai continued, "everyone should have guessed who I'm talking about. That's right, he's little Qin. The research on the Xiangshui tribute rice actually originated from a discovery made by little Qin. He was the one who cultivated the seedlings of the Xiangshui tribute rice.

everyone may question his profession or his age, but this is the truth. Sometimes, scientific research requires not only talent but also luck. Obviously, little Qin has talent and luck.

BOOM!

Even if everyone had guessed it, when they really heard the news from Li Kai, everyone felt as if their heads were about to explode.

This news was too shocking.

Little Qin.

At first, everyone thought that he was just a horse tamer.

Later on, everyone knew that he was well-versed in both literature and martial arts. He did not major in Crop Research, but he could do some experiments by himself that only PhDs could do.

That was already impressive enough for everyone.

What was professor Li Kai saying now? Even the Xiangshui tribute rice had been researched and cultivated by little Qin.

here, let me show you the relevant report. As Li Kai spoke, he operated the computer in front of him, and a report appeared on the projection screen on the wall.

There were also two very conspicuous photos in the report.

these two photos were taken when little Qin was carefully observing the Xiangshui tribute rice, " Li Kai continued. you can see that he was very focused at the time.

"MMP!"When Qin Lin saw this scene in the manor's office, he stood up in shock.

This was a f * cking photo scam!

[Chapter 983 Professor Qin Jr! Will Be Forced To Be! Scammer In The Future](#)

Qin Lin really didn't expect brother li to do this to him.

He was so frightened that he frantically tried to recall if the comprehensive collection of crop gene experiments he had learned from the special stone tablet had any experiments on rice cultivation.

Some memories surfaced. Rice Research was the most important subject of Crop Research, and there were many experiments on rice in the book.

If necessary, he could still pull it off.

Otherwise, it would be a pain in the ass.

However, he had also decided not to accept any interviews and not to talk to anyone.

If someone really came to ask him, he would be f * cking exposed if he met someone who was slightly serious.

Now, old brother li really couldn't do it anymore. He had already learned how to shift the blame.

This would not do.

Next time, he would definitely make it a fact so that he wouldn't have the chance to turn the tables.

Countless people were watching the live broadcast of Li Kai's experiment report.

When they heard from Li Kai that the system was developed by little Qin, everyone could only admire him.

A person who didn't study in a related major, relying on self-study and professor Li Kai's guidance, could actually cultivate a project that the state had given up on.

This could no longer be described with the word "impressive." It was extremely impressive.

When they saw the photo of little Qin squatting down and observing the rice, they felt an inexplicable sense of admiration.

"I didn't believe in geniuses before, but now I do."

"If there's a demon in this world, I think little Qin is one!"

"little qin's studies were in vain, and so were my studies!"

I'm a Crop Research major. I also feel that my studies were in vain.

"....."

The people online were shocked by Li Kai's words.

At the Chinese Academy of Sciences, Minister Lu, academician Zhu, academician Jin, and Luo Hui were all shocked when they saw these people.

Minister Lu, academician Zhu, and academician Jin were all very concerned about Linlin company's Affairs. They felt that Linlin Manor and boss Qin were very good.

They were all dumbfounded when they saw the photos Li Kai had released.

Boss Qin had this ability?

However, professor Li Kai couldn't joke about this kind of experiment report. Otherwise, if he simply gave the credit to boss Qin, the other people in the Linlin laboratory research team would definitely have objections.

if this wasn't true, it would be impossible to hide it forever. after all, there were still many people on the experimental list.

Obviously, they didn't know that the people on the experimental list were also in disbelief. They felt as if they had been hit by a pie.

they had indeed participated in some of the research on the xiangshui tribute rice.

However, they had only participated in the data analysis of the Xiangshui tribute rice after it had been planted. They had not been of any help in the cultivation process.

They had not expected their names to appear on the list.

Or rather, in other laboratories, the names of the other people in charge were not even qualified to be mentioned.

The truth was that their names had indeed been written.

They knew what this meant. It would bring them honor and a strong resume. In the future, when knowledge about the Xiangshui tribute rice was included in the textbooks, their names would also appear.

Now they finally understood what the seed production Research team had meant. Linlin's laboratory was indeed different from other places. It was a very good place to do research.

Professor Li Kai was a really good person and was willing to help others.

For a moment, these people's sense of belonging to Linlin's laboratory was extremely strong, and their enthusiasm for work was also extremely high.

At the Chinese Academy of Sciences.

Minister Lu looked at the two photos of Qin Lin and could only sigh. "What a waste of talent! what tourism major? what mountain villa?"

He was in charge of scientific research, so he naturally paid more attention to scientific research.

Boss Qin was able to research and cultivate something like Xiangshui tribute rice by self-study. If he had studied Crop Research before, or even other research majors, he would have become famous in University.

He would have noticed that Mr. Qin was doing research for him at the Institute of Chemistry.

Now, look at what boss Qin is doing. Running a Mountain Villa, opening a company, studying Chinese medicine, cooking, and horse riding were simply not proper jobs.

Although boss Qin was also very good in these areas and was the top, his talent was scattered, right?

His scattered talents were already so powerful. If he focused his talents on scientific research ...

"Al!" Minister Lu finally sighed and said unwillingly, " "Why are you majoring in tourism?"

A few talents like boss Qin had appeared in the history of scientific research, and each of them had made great contributions to changing the era.

when Luo Hui saw Li Kai's experiment report, his face was still very gloomy.

He didn't have any grudges with Qin Lin, but he was really unhappy.

After all, he suffered a big loss at the Linlin Manor. He didn't have any breakthrough at the Linlin Manor, and he even had an unpleasant encounter with the Linlin Manor. When academician Jin went there, he had a breakthrough, and when he came back, the experimental research was almost completed.

Because of this, he was called to talk to the leader. Naturally, he was secretly scolded. He had completely lost to academician Jin.

Therefore, he was very unhappy.

Now that he saw that boss Qin, who didn't give him any face, had developed a national research project, he was naturally extremely unhappy.

[Chapter 984 Professor Qin Jr! Will Be Forced To Be! Scammer In The Future](#)

What did the other party have?

very quickly.

Li Kai's experimental report was over, but this experimental report was destined to set off waves on the internet, and the popularity would not die down in a short time.

One had to know that GodV of the Great North's popularity had lasted for a very long time. Now that little Qin had researched the Xiangshui tribute rice, the influence and level of the rice had increased.

The key was that little Qin was even more handsome, especially his horse riding and spear dancing. No one else could compare to him.

all men wished they could become such a person like little qin. women could really become infatuated.

Naturally, as the news went viral, more and more Qin Lin's videos were exposed on the internet.

A man who claimed to be from Qin Lin's hometown: " Qin Lin has been smart since he was a child. I remember that he always played when he was young and always got good grades in his exams. The children who played with him in the same house always had their pants pulled off and their butts spanked after their exams, but little Qin just watched from the side with his meal!

A person who claimed to be Qin Lin's classmate: " I remember little Qin learning how to ride a horse when he was in college. I was lucky enough to see him once. He was very handsome when he rode a horse!

The self-proclaimed librarian of qinlin University: Xiao Qin's tourism major is really a waste of talent. I remember seeing him borrow scientific research books in the library. At that time, several students from the scientific research major were discussing Crop Research problems, but they were refuted by him with a few words and couldn't fight back.

Those who claimed to be students of qinlin University: 'I accidentally bumped into little Qin Wanwan when I was peeking at the women's washroom.'

Self-proclaimed Gong Jie

Various people who claimed to be Qin Lin's acquaintances, acquaintances, and acquaintances started to post videos on the internet.

In fact, most of these things were made up to ride on the popularity, and only a few of them were relevant.

Borrowing books from the library, peeking in the women's bathroom, aren't these people ashamed of making up nonsense?

However, people still believed the comments about borrowing books from the library, and the popularity and comments were very high.

This made him feel helpless. In the end, he could only say that fame brought trouble.

There was a group of people on the internet ~

...

Linlin Manor Office.

Qin Yang saw Shen Li.

"Chairman Qin, the Xiangshui gongmi people have requested for some Linlin rice seeds." Shen Li reported something to Qin Lin.

After the successful research of the Linlin rice, there were new crop gene fragments. The laboratory had applied for a patent. In the future, the Linlin rice would belong to the Linlin laboratory.

Of course, this patent application might not be necessary in the next few decades, because Xiangshui tribute rice had very strict environmental requirements, and Linlin rice was the same.

Although Qin Lin managed to get the rice to adapt to the environment once, it was still not good enough in other places. Others might not be able to plant it.

Therefore, unless someone did more research on the Linlin rice to help it adapt to other environments, it would be impossible.

Unfortunately, the cost of this kind of experiment was too high, and the country abandoned it after setting up the project. No experimental laboratory had the ability to do research.

At least, it would be impossible for him to do so for the next few decades before there was another qualitative leap in technology.

However, the Xiangshui tribute Rice's request for the seeds surprised Qin Lin. The Linlin rice had adapted to you city's environment, so it shouldn't be suitable for the Xiangshui area.

After all, the Linlin rice could not be grown outside Ming city. Even in Ming city, the plants that were further away from you city would turn yellow. One could imagine the outcome.

Linlin rice might be hard to grow in Xiangshui.

Therefore, after hearing Shen Li's words, Qin Lin wasn't stingy and smiled, " "just give them the seeds! After all, our Linlin rice was developed by the Xiangshui tribute rice."

Of course, this was what they said to the outside world. They could not let anyone know about the system and the game.

"Alright, Chairman Qin!" Shen Li nodded. After leaving the manor, he returned to the Linlin laboratory office building and informed Lai Jing to come over.

When Lai Jing first entered Linlin's laboratory, he was very shocked. Now, Linlin's laboratory was not short of money at all, and its scope was expanded again and again.

A few individual laboratories had been built, and they were divided into Crop Research teams.

Whether it was the researchers or the security personnel, they were all recruited again and again. The security guards were almost all veterans. Under Yun Fei's training, their condition was almost the same as when they were in the Army.

Even though Lai Jing was only going to the laboratory office building, he had to undergo two inspections on the way. It should be known that the office area and the experimental area were separate.

he thought of the research results in Linlin's laboratory. this was normal.

However, Lai Jing did not care about that. He was more concerned about the Linlin rice seeds.

He didn't expect the other party to be so nonchalant and agree to give them the seeds of Linlin rice when he had established the Linlin company online.

Soon, Lai Jing saw Shen Li and immediately greeted him respectfully, "President Shen, I've long heard of your name."

Previously, when he had Xiangshui tribute rice, he could ignore Linlin company and even dare to go against them. But now, even if he saw Shen Li, he had to bow and bow.

When he no longer relied on Xiangshui gongmi, the company he was in charge of was far smaller than the entire Linlin company or the Linlin laboratory.

Shen Li had a lot of things to do and didn't want to talk to Lai Jing, so he asked someone to bring the Linlin rice seeds to Lai Jing and then secretly asked him to leave.

He knew about the matter between Xiangshui gongmi and Linlin company on the internet, so he naturally didn't like this person.

Lai Jing could feel Shen Li's attitude, but he didn't care. As long as he got the Linlin rice seeds, he could take them back and cultivate them.

When the time came, they would grow it in Xiangshui. Naturally, they wouldn't call it Linlin rice. It would still be Xiangshui tribute rice, but their Xiangshui tribute rice would be upgraded.

As he thought about this, Lai Jing left Linlin's laboratory and bought a plane ticket home as soon as possible.

When he arrived at Xiangshui, the first thing he did was to call the company's research director, give the seed to him, and ask him to cultivate it as soon as possible.

Although it wasn't the time for Xiangshui tribute rice to grow seedlings and the climate wasn't right, they already had the relevant greenhouse technology, so it wouldn't affect them at all. They could even simulate the climate all year round and could grow rice seedlings at any time.

If it wasn't for the fact that the land needed to rest and recuperate, they could grow Xiangshui tribute rice all year round.

Time passed.

In the blink of an eye, a week had passed.

qin lin welcomed minister lu in the office with another person.

"Boss Qin, sorry to disturb you again." Minister Lu smiled and led the person to a seat. Then, he introduced, " "Boss Qin, this is Minister Zheng from the special procurement department."

"boss qin, i've heard a lot about you." Department head Zheng immediately shook hands with Qin Lin.

"Hello, Minister Zheng!" Qin Lin also responded. Perhaps he knew the other party's purpose for coming. It was for Lin Lin's rice.

Special purchase meant special supply.

the last time it was a director, but this time it was a department head.

Minister Zheng also took out a document and handed it to Qin Lin, saying, " boss Qin, we would like to specially purchase a batch of Pixiu. (300 words omitted, you can't write the plot of trading with **!)

...

Seeing that Minister Deng and Qin Lin had finished their discussion, Minister Lu also took out a document and handed it to Qin Lin, saying, " boss Qin, I'm here to give you something. After all, you've developed the Xiangshui tribute rice. You have to match your status. Otherwise, you'll make others feel ashamed.

Qin Lin took the document and looked at it. He was stunned for a moment."This is the evaluation document for the title of Professor."

The title of Professor was usually awarded by universities, and each University had its own evaluation standard. However, the Chinese Academy of Sciences could also evaluate this title.

Moreover, the Chinese Academy of Sciences 'evaluation of professional titles was more important.

"Ran ran." Qin Lin's mouth was slightly open when he saw the document.

He felt that old brother li and Minister Lu were working together to mess with him.

how would he dare to take this kind of job title document? He knew his own capabilities.

Wasn't this making him a super big liar of cultural knowledge?

[Chapter 985 A Completely Different Rice Seedling](#)

Linlin Manor.

Qin Lin saw off Minister Lu and Minister Yu. He was a little depressed as he held the evaluation document in his hand.

He was unable to describe his current feelings.

Not long after, academician li also came to his office.

"Boss Qin, congratulations. I should be calling you professor Qin now." Academician Li said as he entered.

He naturally knew the purpose of Minister Lu's visit.

Qin Lin's appointment as a professor had been recorded in the file of the Chinese Academy of Sciences before Minister Lu came with the document. All the academicians and professors of the Chinese Academy of Sciences could see it.

Qin Lin sat down with academician li and said, "Academician li, don't make fun of me. I'm not qualified to be a professor."

Academician li shook his head. boss Qin, you've already developed the Xiangshui tribute rice. If you're not qualified to be a professor, how can other people claim to be professors? "

"Ran ran." Qin Lin didn't know how to answer this question, so he simply kept silent.

...

Under normal circumstances.

A piece of trending news could be trending for a week, and a super hot news would be trending for more than ten days. However, this law did not apply to Linlin company.

Even after a week had passed, the popularity of the sweet and sour rice and little Qin was still explosive.

With the two official announcements, the popularity of the red millet and little Qin increased again.

One of them was naturally a professor evaluation announcement from the Chinese Academy of chemistry. Little Qin had actually been promoted to a temporary professor.

For a moment, no one could react to this because little Qin was too young. However, when they thought about the research on Xiangshui tribute rice, everything seemed to be natural.

So, it would be professor Qin junior in the future?

the other was an official special purchase notice.

Everyone knew what special purchase meant.

It was specially reserved for the higher-ups.

But it seemed normal. Xiangshui tribute rice was tribute rice, and Linlin rice was better. There was no reason it wasn't tribute rice.

But surprisingly, this time, they didn't just purchase Linlin rice, but also the new vegetables from Linlin villa that had medicinal value.

In this way, including the Linlin watermelons from before, how many crops would Linlin company have in special supply?

You city's Linlin offering rice? special supply of linlin watermelons, special supply of linlin radishes, special supply of linlin eggplants, special supply of okra, special supply of linlin spinach?

How awesome was this?

Linlin villa was about to welcome another wave of popularity.

How could they eat vegetables when they went to Linlin villa to buy these things? He was simply enjoying the life of an Emperor.

Compared to the liveliness here, the atmosphere at Xiangshui tribute rice was a little stagnant. When Lai Jing came to a greenhouse experimental field, his expression was very ugly. "Why is it like this? Did you make a mistake in your experiment?"

the head of research frowned. "ceo lai, even if there's a mistake in the research, it can't be that everything is wrong. after all, we've simulated the environment all year round, and there are more than a dozen experimental plots. "

now, all the seeds in these experimental plots have rotted. There is no way for them to germinate, let alone plant them.

"How did this happen?" Lai Jing's face was full of dejection. Wasn't this the same scene as when they cultivated their Xiangshui tribute rice in other places? because the environment was not good, it could not be planted at all.

But how did this happen? The Linlin rice was clearly developed from their Xiangshui tribute rice. Why couldn't they grow Linlin rice here?

On what basis?

...

Linlin Manor.

After Qin Lin and Zhao Moyi finished their lunch, they found a bag and went to the balcony to put more than ten lingzhi mushrooms that had been dried.

It was the weekend, so his father-in-law Zhao xianhong was on leave. His mother had heard from his mother-in-law, Chen Zhao, that his liver was unwell from staying up late, so she wanted to buy some Lingzhi to nourish it.

Naturally, he had to send some of the dried Lingzhi over.

Moreover, how could the Lingzhi bought from outside be as good as the one he had taken from the game? even if it was ordinary, it was not comparable to the ones sold outside.

"Why don't you just stay?" Qin Lin said as he looked at Zhao moyin, who had her makeup done and had a big belly. He really didn't want her to travel back and forth now, even though the manor was not far from you city.

"It's fine. It's not like I can't go out." Zhao Mo sneered as he put his arm around Qin Lin's neck. Which woman wouldn't want to go back to her parents 'home sweetly with her husband?

Even though her family was only a short distance away, and the two families often met.

However, the sense of ceremony was different.

When Lin Fen came out, she also said, " Lin Lin, don't just bring Lingzhi. Bring some of your newly developed Linlin rice as well. Also, bring other vegetables, meat, and so on.

Although she often brought these things with her when she asked Chen Zhao out, they were in a relationship. Her son was different as a son-in-law.

Young people nowadays didn't pay much attention to formalities, so she couldn't help but remind them. Mom, I know. I've already prepared everything. Qin Lin responded with a smile. His mother was too naggy sometimes.

However, wasn't it a happy thing to be nagged by an old man?

When he thought of his deceased father, he wanted to be scolded again, but there was no way.

Qin Lin picked up the lingzhi and brought Zhao Moyin downstairs.

When they reached the parking lot of the manor, Chen Dabeai was already waiting for them with two bags in his hands. "Boss, the vegetables, duck meat, fish, face-nourishing eggs, and Linlin rice are all in the bag."

"En!" Qin Lin opened the trunk and asked Chen Dabeai to put the things in. Then, he got into the car with Zhao Moxi and headed to you city.

When they arrived at you city's Dongfang Ming Yuan, Qin Lin spent a long time finding a parking space in the community.

There was an underground parking lot in the community, but the developer of the community obviously didn't expect that you city would change so much in just one or two years.

Because of the economic impact of Linlin villa and Linlin company, the people in you city were making more and more money, so more and more people bought cars.

As a result, the underground parking spaces in the community were short of space in a short time. Therefore, the open spaces in the community became parking areas, and almost every household had a car.

It was quite difficult to find a parking space in the neighborhood.

Qin Lin finally found an empty seat and parked it, then helped Zhao Moyi out of the car. He took out all his things and walked towards the Zhao family's house.

When they entered the elevator, several people came out. They were stunned to see Qin Lin and felt that he looked familiar.

They only reacted after Qin Lin had brought Zhao Moyi into the elevator.

"Was that person little Qin?"

"Which little Qin?"

"The little Qin who's very popular on the internet right now, the one from Linlin's laboratory? The other party seems to be a professor now!"

I think it's him. He's younger and more handsome than in the news.

"..."

Obviously, the double impact of Li Kai's experiment report and the Chinese Academy of Sciences' title evaluation was still very big, at least in the short term.

When they arrived outside the Zhao family's house, Qin Lin rang the doorbell.

A moment later, Chen Zhao opened the door and was overjoyed to see the two. "Qin Lin, Motian, you're here!"

Chen Zhao could not hide the happiness on his face.

Although she often went to the villa to see her daughter and son-in-law, she was happy that her son-in-law brought her daughter to her house.

When Qin Lin entered the room, he realized that other than his mother-in-law's family, there were two other people sitting beside Li Jiawen.

"Qin Lin, you're here?" When Zhao Xianhong saw Qin Lin, the smile on his face grew even wider.

He was getting more and more satisfied with this son-in-law of his. The fact that he was rich didn't count. After all, the outside world didn't know about this.

But this time, the other party had really given him a huge boost in reputation.

Now that the teachers in No. 1 middle school knew that Professor Qin Junior was his son-in-law, they had praised him a lot, which made him happy.

The principal even planned to invite Qin Lin to visit his alma mater as an alumnus.

However, the principal also knew that this matter had to be considered carefully, so he only put Qin Lin's photo in the famous alumni room of the school first.

Moreover, he had chosen Qin Lin's photo himself and hung it up.

Chen Zhao welcomed Qin Lin in and said to the two, "In-law, in-law, let me introduce you. This is Qin Lin, husband Motian."

"Uncle, Auntie." Qin Lin knew that the two of them were Li Jiawen's parents, so he immediately greeted them.

Li Jiawen's parents immediately stood up and responded with a respectful look in their eyes.

They had no choice. The couple had learned from the woman the true identity of their son-in-law, who was the boss of Linlin company.

He wasn't a member of the Zhao family. He was only a relative of the Zhao family. Even with the Zhao family's connection, it was difficult for them to maintain a normal attitude when facing such a person.

Qin Lin felt it and felt helpless. He could only shift the Chinese to Chen Zhao and said, "Mom, I brought you something."

As Qin Lin spoke, he put down the vegetables, duck, and fish. Then, he took out the Lingzhi and said, mom, dad's liver hasn't been well recently. I went to find some Lingzhi to nourish his liver.

Chen Zhao took the bag of Lingzhi and was surprised when he opened it. "Qin Lin, these Lingzhi are so big. They must be quite old, right? I've been in the main hall for so long, but I haven't bought one this big."

"yes, it's not a bad year." Qin Lin nodded.

Zhao xianhong's curiosity was piqued. He leaned over and saw the big Lingzhi inside. He couldn't hold back his smile as he said, "qin lin, you've put in a lot of effort."

Who would not be happy to have such a son-in-law?

Meanwhile, Zhao Moyu had already sat down next to li Jiawen.

Li Jiawen got pregnant before her, and her belly was much bigger than hers. The two women, who were both pregnant for the first time, began to chat.

"Jiawen, you're that tired?"

yes, my back hurts, but the babies will be out soon. Your brother pulled some strings to check on them. There are two princesses.

"Ah, twin sisters?"

qin lin was attracted by their conversation.

Brother-in-law is a girl too?

He felt that something was wrong. Old Chen's was a girl, old Ma's was a girl, Li Qing's was a girl, old brother Li's was a girl, and even his brother-in-law's was a girl.

Why did it sound like they had discussed it beforehand?

Could it be that Zhao Mo's lover was also a girl? It should be impossible.

However, it didn't matter if it was a boy or a girl. They were both his children anyway.

it's good to have a daughter, " Chen Zhao said. you can find a good husband like Qin Lin. You won't be like your brother, always making people angry.

" ? ? ? ? "Zhao moyun, who was at the side, felt as if he had been unjustly accused. He was sitting here perfectly fine, so who had he offended?

He looked at Qin Lin and could only sigh helplessly. He didn't know when it started, but Qin Lin seemed to have become his own son. He had picked him up from the trash can.

in the afternoon, qin lin returned to the manor with zhao moyin.

.....

In Linlin's laboratory, in an experimental field, Liu Hui and his men were maintaining the Linlin rice seedlings and recording the situation as usual.

Although the Linlin rice had already been successfully cultivated in the manor's experimental land, the subsequent diversity had to be guaranteed, and the research had to continue.

Professor Li Kai had set up some experiment possibilities, so after these experiments were carried out, he was poached as an Associate Professor. Now, professor Li Kai had arranged for him to be in charge of this matter.

"Professor Liu, there's something wrong with this one!" A researcher suddenly asked Liu Hui in surprise.

"What's wrong?" Liu Hui walked over in confusion.

The researcher quickly pointed to a rice seedling and said, " professor Liu, there's something wrong with this seedling. It's much higher than the other seedlings.

Liu Hui hurriedly looked over. Any different variable in scientific research could produce inestimable results.

Therefore, he had to pay attention to any variables.

However, when Liu Hui saw the rice seedling, his face also revealed a look of disbelief.

That rice seedling was far higher than the other rice seedlings, alright!

[Chapter 986 The Pavilion's Support Effect \(1!](#)

Liu Hui looked at the rice seedling with a face full of surprise.

logically speaking, the same patch of rice seedlings should have been planted at the same time, in the same soil, and with the same nutrient solution, so they should have grown in the same state.

Now that a different one had appeared, it could be a special case of good luck.

Sometimes, scientific research also required this kind of luck.

This kind of luck often gave a great push for a scientific experiment.

"The roots and leaves of this rice seedling are also larger than ordinary rice seedlings." Liu Hui observed and hurriedly said to a researcher, " let's quickly inform professor Li Kai and Chairman Qin. Tell them this news. It might be another amazing Rice Research result.

The researcher nodded and immediately took out his phone to make a call.

...

Qin Lin returned to the manor and entered the office. He looked at the game on the screen in his mind and began to do his daily tasks. He had just finished controlling his game character to shop around the goods area of Mount goddesses when he received a call from Linlin's laboratory.

A possibly mutated rice seedling was found in an experimental field.

Qin Lin immediately thought of the special rice seed that had been processed by the seed processing machine.

The rice seeds could grow as tall as sorghum, and the seeds they bore were as big as rice grains.

As long as this special rice could be cultivated, the entire world's food distribution would change.

After such a long time, the seed had obviously grown into a seedling and was discovered by the researchers in the laboratory.

Qin Lin left the manor and drove to the experimental field where Lin Lin's laboratory was.

When he arrived, Li Kai and his men were observing the special Paddy.

It seemed that because the rice was too shocking, when he went to the field, he was so anxious that he didn't even roll up his pants and soaked them in the water.

This was enough to show his dedication.

the genes of this rice plant have definitely mutated. it's the same, " Li Kai said with certainty. just from the stem and leaf bud lines, it belongs to the rice line we know.

"Indeed," Liu Hui also nodded his head and then asked,"Professor li, what do we need to do now?"

"Clear out all the other seedlings and surround this area," Li Kai said directly."We'll use it to cultivate this one."

When Qin Lin saw this, he silently took out his phone and took photos of Li Kai.

this was the evidence that professor li kai had worked hard on.

The researchers quickly cleared out the other rice seedlings in the field and began to surround the rice seedling with a special shed-like technique.

Li Kai looked at Qin Lin and immediately invited him. Brother Qin, you're here. Come and take a look. This seedling is really different.

Qin Lin naturally knew that the rice seedlings were very different because he was the one who put the seeds in. However, he did not want to go in at this time.

He knew that old brother li had learned how to take photos secretly. If he took two more photos, old brother li would use them to cheat him again.

"Old brother Li, I still have something to do, so I'll go back first. Besides, this is just a seedling." Qin Lin said with a smile and walked out.

Li Kai was a little dumbfounded. Why wasn't old Brother Qin curious about how magical this rice seedling was?

this rice seedling was not in the existing rice plant. if this was known by the relevant research institutes outside, they would be shocked.

the last time a new line of rice was discovered was by that senior, and it was in the rice industry that he established a new world.

This time, a new strain of the rice lineage had been discovered. How astonishing!

Qin Lin didn't care about that. After he left Linlin's laboratory, he called Lin Lanzi. come to the manor Office later. I have something for you to do.

Previously, old brother li had used a photo to stab him in the back.

Now, they would just look at the photos.

It was as if someone didn't know how to take photos.

When Qin Lin returned to the manor's office, Lin Lanzi was already there. She greeted him when she saw him."Chairman Qin!"

qin lin also sent the photos he had just taken to lin lanzi through wechat and ordered, professor Li Kai has cultivated a new mutated rice seedling. Perhaps a new species of rice will be cultivated in the future. You should use the official account of Linlin Manor to make a video to congratulate him!

"Okay, boss." Lin Lanzi also went back to the multimedia department as soon as she received the instructions and got people to start producing the video.

In the experimental plot, Li Kai was carefully using a tool to extract the genes from the special rice seedling.

He wanted to study the genes of the Paddy, but he could not destroy the structure of the Paddy to prevent affecting its growth.

After extracting the gene, Li Kai brought his men back to the laboratory and began to analyze it. After some time, they obtained a shocking result.

from the genetic data, not only did the new rice plant grow very fast, but it also grew to an unexpected extent. it was a thick rod-shaped plant.

but how could rice be a thick, rod-shaped plant? As everyone knows, rice is a plant with a thin stem.

However, he did not want to destroy the inediately-tissue. This was all he could analyze.

However, one thing was for sure. After this rice plant grew, even without looking at the ears of the rice, it would still be very shocking.

for the time being, pay close attention to this rice seedling. Treat it as the most important thing. Li Kai finally gave instructions to Liu Hui and the others.

[Chapter 987 446! Taking The Blame For Everything! The Pavilion's Support Effect](#)

After they left, he sat down and heaved a deep sigh of relief. He had tested so much. Although he couldn't tell Liu Hui and the others, he knew that it must be the effect of the special soil.

Liu Hui and the others thought that the soil was specially prepared by him, but it was actually special soil.

based on the current situation, the paddy would definitely not be simple after it matured. he suspected that he was going to be the scapegoat again.

However, it would still take time for the rice to fully mature. If there was a chance, he could drag old Brother Qin into the water again. After all, it was old Brother Qin who had discovered the special soil.

He should be taking the blame together.

Now, he had some experience in shifting the blame.

As Li Kai was deep in thought, his phone rang. It was Tang xiuwan.

"Xiuwan, what's wrong?" he picked up immediately.

"Senior li, congratulations on developing a new type of rice!" Tang xiuwan's happy voice could be heard.

"Xiuwan, how did you know?" Li Kai asked in surprise.

"The official account of the villa is sending you a video to congratulate you!" Tang xiuwan explained.

" ? ? ? "Li Kai hung up and took out his phone to check the video on the official account of Linlin Manor. There was indeed a new video.

" congratulations to professor li kai for developing a new type of rice seedling. this rice seedling may change the future pattern of food! "

The video was not long.

It contained several photos.

The photos were of him observing the new rice seedlings. There was even a close-up of his wet pants that he had not completely picked up.

What did this mean?

Li Kai's mood soured as he watched the video.

Was he going to strike first or suffer later?

Most importantly, the video had already made it to the hot search.

Everyone on the internet was congratulating him.

professor Li Kai is still being modest. When little Qin cultivated the Xiangshui tribute rice, he said that he didn't have time. Now, he has researched and developed a new rice.

Linlin's laboratory has just developed the Xiangshui tribute rice, and professor Li Kai has cultivated a new rice plant. They are still going against rice.

congratulations, professor Li Kai. At the same time, I'm very curious about the results of your cultivation of this new rice plant.

"Congratulations, professor Li Kai!"

Li Kai looked at these comments and felt even more helpless. It seemed like he couldn't push the blame.

When the congratulatory video went viral on the internet, many people at the Chinese Academy of Sciences also noticed it, especially Minister Lu, who was now paying close attention to the Linlin laboratory.

He had also not expected that Linlin's laboratory would be able to cultivate new rice after just developing the upgraded Xiangshui tribute rice.

Did professor Li Kai and little Qin want to have a competition on Rice Research?

He just didn't know what kind of results professor Li Kai's cultivation of this rice seedling would produce.

After all, it had not grown ears of rice, so it had not borne fruit yet.

However, Minister Lu also called someone over and ordered, " on the official website of the Chinese Academy of Sciences, I would like to congratulate professor Li Kai on his new progress in Rice Research.

No matter what the final result of this rice plant was, to be able to develop a new rice plant meant that there were infinite possibilities.

Even if he didn't succeed on this one, there would definitely be results in the future.

Therefore, there was nothing wrong with congratulating him.

Li Kai naturally saw the congratulations from the Chinese Academy of Sciences.

His face fell.

This time, he had to take the blame even if he didn't want to.

Qin Lin, on the other hand, was very satisfied. This matter was confirmed, and it could be considered revenge for old brother Li's previous backstabbing.

when this special rice plant grew, grew ears of rice, and was harvested, old brother li would know how big the black pot was.

He Xia is dreaming of a cool dream!

Old brother li would be shocked by that time, right?

Qin Lin was secretly happy and then left the manor villa.

Chen dabei was already giving orders from the pavilion, " "Clean the pavilion and the corridor."

After all this time, the yellow Rosewood Pavilion and corridor were finally completed.

The pavilion was next to the moonstone and contained two stone tables. It had a retro and simple roof.

In addition, the entire Manor itself had a retro and simple style, and there were plants and bamboo flowers all around, so it didn't have much impact on the overall situation.

The corridor was connected to the main body of the manor.

Even on a rainy day, they could walk directly to the pavilion from the corridor outside the manor villa.

now that the gazebo was built, chen dabei ordered his men to clean up the place.

Beside him, Chen shengfei was looking at the pavilion and the corridor with bright eyes.

as a person who liked this kind of famous wooden object, this pavilion and corridor were charms in his eyes.

Old Chen and old Ma had stayed in the manor villa for a while. Old Ma had to go back to his company to attend to some matters. Old Chen had stayed a little longer to see the gazebo built with his own eyes.

"Qin Lin, just looking at your Pavilion and corridor is enough to make one envious." Chen Sheng Fei saw Qin Lin and walked towards him with envy in his eyes.

These yellow Rosewood and red sandalwood were all aged. Many people in the outside world wanted to find such aged materials, and they needed some connections.

However, someone had used such materials to build such a large pavilion and corridor.

Not long after.

Chen dabei led his men to clean the pavilion and corridor.

After the pavilion was built, professor Li, Lin Liu, and the other girls were naturally attracted and came out to take a look.

Chen shengfei had already taken out his phone and took a photo of the pavilion and corridor, then sent it to a group.

[Chapter 988 446! Taking The Blame For Everything! The Pavilion's Support Effects](#)

The people in that group were all rich people who liked to collect wood. Many people would share their collection of wood items in the group.

The yellow Rosewood desk that Qin Lin had given him before was one of the most valuable items in the group.

Chen Sheng Fei immediately took a photo of the pavilion and the corridor and sent it in. At the same time, he sent a message: Share it. The pavilion and the corridor were built with aged yellow Rosewood and red sandalwood. Shocking, right?

As soon as this news came out, the group became lively.

you must be joking again, director Chen. How could such a large pavilion and corridor be made of Rosewood? "

"Director Chen, you're just joking with us!"

I do hope there's a Pavilion and corridor like this one built with aged yellow Rosewood and red sandalwood.

"It's a pity that no one can get so many old yellow Rosewood and red sandalwood."

"....."

Obviously, no one in the group believed Chen shengfei's words, because in everyone's inherent understanding, this was simply impossible.

Chen shengfei did not explain. These people did not know who built the pavilion and corridor.

who was this qin lin? He might be able to do something that no one else could.

Chen shengfei immediately entered the corridor and began to observe it closely. At this time, the attraction of the corridor and Pavilion to him was even greater than his wife.

Therefore, he hurried past his wife and entered the corridor without saying hello. The woman's eyes were filled with anger and she silently made up her mind not to let him sleep with her today.

Academician li and the other girls entered the pavilion.

Qin Lin also walked in with Zhao Moyu.

Because it was made of pure wood, it didn't use any paint-type harmful substances, so there was no problem to go in directly.

"Qin Lin, there's a very good smell." Zhao mochen said in surprise as soon as he walked into the corridor.

The others naturally smelled it as well. The fragrance was very pleasant and made them very comfortable.

Qin Lin naturally knew that this was the fragrance-lowering effect of the yellow Rosewood. The quality of the yellow flowers was 1, and the fragrance-lowering effect was +1.

Academician li sighed. boss Qin, this Pavilion is really well built. I don't know if it's just my imagination, but I feel a lot calmer when I enter.

Chen shengfei added, " academician Li, you're right. I can feel it too. This means that the structure of this Pavilion is very good. The red sandalwood already has the effect of calming people's minds, not to mention there are so many red sandalwood pieces placed together.

Qin Lin smiled. Elder Chen was right.

quality 1 purple sandalwood has the attribute of tranquility of the mind +1. this attribute and the attribute of fragrance reduction +1 could be felt the most intuitively.

He suddenly thought of something.

Before the moonstone was activated, academician Jin had been able to gain insight from his own experiments due to the manor's recuperation project and environment.

Now that he had this Pavilion, wouldn't it be even more helpful?

after all, doing experiments and research required a calm mind. the more calm one was, the clearer one's thoughts would be.

Academician li suddenly said, " the recovery program in the manor can already relax the whole body and mind, and the environment is the same. Now that there's this Pavilion, the effect should be better, right? "

Academician Li became more and more certain. After all, everyone was more or less impatient when they encountered problems in their experiments.

He felt that he should talk to Minister Lu about the pavilion.

[Chapter 989 Returning Home To Inherit The Family Business!](#)

the value of a person is to live for meaning, not to stand out!

If the person who said this was an ordinary person, then this person was definitely looking for him.

In today's impetuous society, who didn't live for money? Who didn't want to stand out?

If this sentence was said by a Big Shot, it would be different. It would more or less cause people to ponder, because this Big Shot had lived to be like this.

Qin Lin was holding his phone and watching a TikTok stream curiously.

The live broadcast was by a Big Shot.

The other party was teaching a physics class.

Moreover, the other party's physics class was very in-depth.

People who didn't know him might think that he was a physics teacher.

However, his real identity was a rich man, a Big Shot.

He used to be the idol of one of the big bosses, and he almost became the boss of another big boss. Big bosses Li also established the largest web portal in the country because of him.

It could be said that this Big Shot was probably the most carefree one out of all the big shots.

Qin Lin put down his phone and felt that he should learn from this Big Boss. In the future, he shouldn't be bothered by trivial matters and shouldn't give up on being free and easy.

Just as he was thinking, Qin Lin's phone rang. It was an unexpected call from Liu Yi of Ming City.

He had some friendship with this rich man.

Previously, the other party's father had come to the manor to recuperate for a period of time.

He picked up the phone.

"Boss Qin, sorry to bother you with this call," Liu Yi laughed.

"Chairman Liu, you're too polite." Qin Lin replied with a smile. Although his relationship with the other party was not like that of old Chen and old Ma, he had a good impression of the other party.

"Boss Qin, do you still remember Douglas?" Liu Yi asked. He wants to visit you at Linlin Manor and treat you to a meal."

Qin Lin was a little surprised, "Douglas?" Why would he want to treat me to a meal?"

He remembered Doughty.

The man was lasda's father. He seemed to be in the International food business and had cooperated with Liu Yi.

When lasda first came to Linlin villa to compete in cooking, he had also come with them.

right now, lasda was the head chef at linlin villa.

As for Doughty, he hadn't seen him since the last time he came.

Who knew that this Doughty would actually come to visit him and even invite him to dinner?

Could it be because of lasda?

Liu Yi continued, "boss Qin, isn't lasda the head chef in your villa?" This lasda has always been a problem for Douglas. He only has one son, but he's obsessed with cooking and refuses to go back to inherit the family business."

who knew that lasda would call back a few days ago and say that he's going back to inherit his family business? Douglas thinks it's because of you, boss Qin.

lasda felt that he couldn't surpass you in cooking, so he was disheartened and wanted to go back and inherit his family business. So, Douglas wanted to thank you properly and help lasda resign.

Qin Lin didn't know whether to laugh or cry after he hung up the phone.

He had never thought that he would be thanked for this.

However, it was also destined that lasda's cooking skills couldn't surpass his. His cooking skills were all external, and with external attributes, how could lasda surpass him?

What Qin Lin didn't expect was that Douglas and Liu Yi arrived the next day.

He met Liu Yi and Doughty in the villa.

"boss qin, we meet again." When Liu Yi saw Qin Lin, he immediately took the initiative to shake hands with him. His attitude was more or less a little humble.

After all, whether it was wealth, fame, or status, boss Qin was far superior to him. In the face of someone who was more powerful than him, it was necessary to maintain a certain level of humility.

"Mr. Qin, it's a pleasure to meet you." When Doughty saw Qin Lin, he sincerely thanked him. also, I'm grateful that you've dealt a heavy blow to lasda's confidence, making him willing to go back and inherit the family business. This has also fulfilled one of my wishes.

Qin Lin didn't know how to answer this question and could only say, " "Mr. Douglas, you're too kind."

After chatting for a while, Qin Lin took Liu Yi and Douglas to the Linlin villa restaurant.

If Douglas wanted to treat him to a meal, it would naturally be at The Villa Restaurant, and today, lasda would be cooking personally.

However, if he were to eat in the restaurant now, he would definitely attract the attention of the tourists. Therefore, he could only eat in the inner restaurant.

Lasda was already waiting for them. Seeing the three of them, he walked up to them. "Mr. Liu, dad wants to talk to Mr. Qin!"

When he greeted Qin Lin, he was obviously very conflicted.

when he came to linlin villa, he swore that he would surpass mr. qin in cooking. however, mr. qin cooked in front of him, so he couldn't learn his cooking skills. on the contrary, every time mr. qin cooked, his cooking skills would reach a higher level.

it was obvious that mr. qin had been hiding his true strength and had never displayed his cooking skills.

He couldn't even figure out what level the other party's cooking had reached, so it would be a joke to say that he could surpass the other party.

After the last video, he had been practicing hard. However, after a long time, he still couldn't make that delicious dish.

Now, he was already a little disheartened and planned to go back and inherit the family business.

Most people would choose to retreat when faced with a mountain that they could not climb.

After the three of them sat down, lasda solemnly walked to the kitchen. This might be the last meal he would cook in Linlin Manor.

This meal might be his last pride in his cooking, so he would put in a lot of effort.

[Chapter 990 Returning Home To Inherit The Family Business! The Happy Elephant That Can't Grow Up 2](#)

Not long after, lasda had finished cooking Chinese food and brought it out. One of them was a medicinal dish.

This was the emperor's Supreme medicinal cuisine. He had been studying it from the video he had recorded on his phone.

Unfortunately,

Lasda sighed in his heart before saying, " Mr. Qin, dad, Mr. Liu, try this fish. This is probably the best meal I've ever made in my life.

Liu Yi, on the other hand, was attracted by the herbal dish because of the strong herbal fragrance. None of the herbal dishes he had eaten could compare with this.

after getting a bowl, liu yi couldn't help but praise, " "Lasda, your fish is too delicious. But ..."

he didn't finish his sentence, but what? Naturally, it was because the difference between what he did and what boss Qin did was too great.

His father had gone to the manor to recuperate, and he had been lucky enough to eat boss Qin's medicinal cuisine once. Lasda's food was delicious, but it was far from boss Qin's.

Upon hearing his son's words, Douglas immediately got himself a bowl of medicinal cuisine.

Although he was worried that his son would not go back to inherit the family business, he still recognized his son's cooking skills. After all, he was the best Chef in the West.

In his mind, it would be best if his son could go back to inherit the family business and cook for him from time to time.

After eating lasda's Medicinal Food, Douglas was in disbelief. His son's cooking seemed to have improved a lot.

It was also the first time he had eaten such delicious food made by his son.

He was even more shocked that his son could make such delicious food, so why would he be disheartened and want to go back to inherit the family business?

lasda, " Douglas couldn't help but say, " your herbal dish is too delicious. I don't think anyone can make something as delicious as this, right? "

Lasda's face was filled with shame. " dad, my herbal dish is far worse than mr. qin's. to me, mr. qin is a mountain that i can't climb over. it's even higher than mount everest. aiyoyo. "

In the end, lasda could only sigh.

Douglas looked at his son and then at Qin Lin in shock. He couldn't imagine how delicious Mr. Qin's food must be for his son to describe it in such a way if the herbal dish his son made was already so delicious.

Qin Lin was also savoring the herbal dish lasda made.

After taking a few bites, he was also very surprised. The taste of lasda's medicinal fish was almost at the level of +3 deliciousness.

Although this was partly because of the quality 2 wild fish, this was definitely not something that Master Lin and other chefs could do.

In other words, lasda was almost going to use his own cooking skills to add +1 to the deliciousness attribute.

This ability was enough to show the other party's talent in cooking.

It was a pity that it was still a little short. He could not really achieve the ability to give food +1 taste. Now, the other party was disheartened and planned to go back and inherit the family business.

Mr. Qin, " lasda said to Qin Lin, " I'm really grateful for your help these days. Although I can't surpass you, you've allowed me to see the pinnacle of the cooking world.

These words were from the bottom of his heart. He had changed a lot from the arrogant and overbearing attitude he had when he first came to the villa.

While the four of them were chatting, a group of people walked into the internal restaurant. It was obvious that they had just taken a shower, as their hair was still wet. These were clearly the employees of the drifting project. After getting off work, their bodies were all wet from the river. They would first take a shower in the drifting project's bathroom before coming over to eat.

Among these employees, a handsome young man was obviously the manager, and the others followed behind him.

When a few of them walked in, they asked the handsome young man, "

"leader chu, why do you personally go down the river several times a day? Aren't you tired?"

"Yeah, you bring your notebook with you every day, but you don't seem to remember anything."

"Leader Chu must have his reasons. Didn't you see that all the suggestions he gave the manager were accepted?"

"....."

The handsome team leader Chu sighed after he sat down.

was he to blame?

Every time he wanted to record something and discover the ins and outs of Linlin villa's River drift, he would forget everything as soon as he entered the river.

Chu Ye also did not understand the reason.

He had truly never seen someone like drifting who could enchant him so much.

He had been hired by drifting and had been promoted to team leader all this time, but he still had not found any clues.

However, the more he thought about it, the more he felt that drifting's Dao was very deep.

Now, he was no longer bothered by the river. He felt that it had something to do with the mentality of the tourists who came to Linlin Manor to play.

Due to the online publicity, tourists who came to Linlin villa had a very good sense of anticipation for the drifting event. After realizing how fun drifting was, that anticipation would turn into a happy mood.

This kind of happy mood was very infectious, and it made everyone happy and have fun to their hearts 'content.

He felt that this might have something to do with psychology.

Therefore, he felt that he should read some books on psychology.

After Chu Ye sat down, he ignored everyone's chatter and took out his phone. He had a lot of WeChat messages.

Some of his good friends asked him when he was going back.

He also replied to them one by one.

How could he possibly return before he could figure out drifting's true intentions? he had already set a time for himself.
