Chapter 1401: Shark Tank

After the Spirit Ark passed through the gap in the Star Curtain, it didn't pass through the region of space around the Azure Sea World like before. With Yan Ming's guidance, it continued to fly through the chaotic space in an attempt to pass the Azure Sea World completely to return to the Spirit Luxuriant World.

The reason they chose to do it that way was because Shang Xia thought that the other world would have noticed their Spirit Ark when they left in the first place. The other worlds weren't stupid. If a Spirit Ark was moving out, they would most likely return with a world fragment. As such, there were most likely already ambushes set up around the Azure Sea World.

Even though some people might guess that the Spirit Luxuriant World's Spirit Ark would travel through the chaotic streams and try to stop them, the senses of experts in the chaotic streams of space were extremely limited. Moreover, not many people would be able to try to stop them.

As long as they weren't completely surrounded by countless experts and were suppressed completely in terms of combat strength, Shang Xia wasn't afraid of anyone in the Heaven Observation Field! Even the sixth tier True Immortal of the Star Observation Dao Field wouldn't faze Shang Xia.

... Of course, he could feel free to head over if he was able to leave the Star Origin Lord Manor.

Yan Ming was fine with either choice. Since they had already entered the Heaven Observation Field, Yan Ming wasn't afraid of getting lost. She was able to communicate with the Star Observatory of the Tongyou Institution with some secret art now that they were close.

Several days passed and they skirted around the Azure Sea World. They entered the region of space around the Spirit Luxuriant World and everyone finally heaved a sigh of relief. Their journey was safe, but they were on high alert the entire time.

After entering the region of space around the Spirit Luxuriant World, the last of Shang Xia's worries was gone. He wasn't afraid of anyone trying to stop them. He simply instructed Yan Ming to fly straight towards the heavenly screen.

They were also discovered by the patrol ships around the Spirit Luxuriant World the moment they left the chaotic streams earlier. Of course, they didn't bother them once they learned that it was the Spirit Ark of the Tongyou Institution.

Shang Xia silently praised the abilities of the Spirit Luxuriant World. They finally reached a certain standard required of a Spirit World to properly control the region of space around their world.

As the ark approached the heavenly screen, more and more patrol ships gathered around it. However, they no longer seemed to be trying to verify the identity of the Spirit Ark. Instead, they were trying to board it to pay their respects to Shang Xia. It didn't matter if their intention was simply to greet Shang Xia or to hear that he had successfully obtained a world fragment to hasten the growth of the world. They would be content as long as they could board the ship.

Of course... They were only curious as to what was brought back. They didn't dare to ask Shang Xia to spare them a part of the world fragment. Neither was there anyone trying to use the opportunity to get close to the Tongyou Institution.

It wasn't that they were far sighted so as not to piss Shang Xia off, or if they were suppressing their intention, but all of them knew that they didn't have the qualifications to talk to Shang Xia about such matters. In fact, they weren't even qualified to meet him!

Shang Xia wasn't surprised about the situation. He even prepared for it. He used Yan Ming, a fourth element Martial Dipper Realm expert of the institution who was also a powerful Stargazer to greet them. She was enough to send most of them away, and for the more important or senior members of the Spirit Luxuriant World, Song Zhen was sent to send them off.

Of course... It wasn't as though Shang Xia refused to meet anyone. He would personally meet the members of the Tongyou Institution who approached or their allies.

All of them went to look for Shang Xia on the request of their elders and they were sent over to report what happened in the time they were gone. They spoke about matters that happened in the recent month in the Spirit Luxuriant World, Star Origin Dao Field, Spirit Abundance World, Spirit Mammoth World, and how many people had been heading to the Azure Sea World.

When they were finally 40,000 miles from the heavenly screen, a heavyweight senior of the Spirit Luxuriant World finally arrived. This time, Shang Xia had to show his face.

"True Immortal Yang, what made you come over personally?" Shang Xia was slightly taken aback. However, he maintained a modest expression due to the difference in their seniority.

Yang Taihe broke out laughing immediately. "True Immortal Little Shang, every move you make can cause our world to tremble. It's nothing we can compare with and I'm here to try my luck..."

As Shang Xia invited him into the ship, he didn't hide whatever they were transporting. The world fragment was revealed to Yang Taihe.

After entering the interior of the Spirit Ark, Yang Taihe discovered the world fragment instantly. He looked at Shang Xia with a profound gaze and sighed, "This... This really leaves me speechless..."

Shang Xia invited him into one of the chambers and got someone to bring the tea before a smile appeared on his face, "True Immortal Yang, is something the matter?"

"I am here because of the Liang Continent... Little Shang, are you willing to give me a small portion of land from the world fragment so that the Liang Continent can reach a state of perfection?" Yang Taihe didn't beat about the bush either.

"Of course," Yang Taihe paused before he continued, "I'm not asking for you to give it to me for free. My Eternal Palace is willing to compensate you accordingly!"

"Oh?" Shang Xia raised an eyebrow in response. He wouldn't reject a trade of that level. Moreover, he brought the world fragment back in order to hasten the growth of the world in the first place. The blessing of the world would descend on him when the time came, so he wasn't worried about giving the Eternal Palace a piece of the world fragment. A smile appeared on his face and he asked, "Correct me if I'm wrong, but isn't the Liang Continent less than 7,000 miles wide?"

Yang Taihe chuckled, "It has surpassed 7,000 miles with our combined efforts. My Eternal Palace cannot compare ourselves to you, but we are still able to strengthen the foundations of a continent and allow it to grow slowly..."

Shang Xia nodded once. "In that case, you will need to increase the landmass by 3,000 miles or so. Even though the world fragment is mostly intact, a good portion will be lost during the fusion process. To allow the Liang Continent to reach a state of perfection... That will mean you will need a piece of land that is around 4,000 miles wide?"

They were experienced when it came to integrating world fragments. Also, when they were talking about the size of the world, they didn't use such exact measurements.

Yang Taihe instantly revealed an expression of joy. "Little Shang, that is a little much, but that would be great!"

Shang Xia nodded slowly. "In that case, your Eternal Palace is offering..."

...

The Spirit Ark didn't immediately enter the Spirit Luxuriant World. Like before, it hovered outside for some time.

In the days that passed, the heads of many factions took turns heading up to greet Shang Xia.

No one knew what was discussed with them or the agreements that were reached. In order to obtain a piece of world fragment from him, many factions paid a huge amount that they didn't disclose to the rest of the world.

However, one thing was clear. Shang Xia and the Tongyou Institution definitely made a killing! In fact, in the dozen or so years that will pass, the Tongyou Institution might produce even more True Immortals!

Splitting the Heavens #Chapter 1402: New Territories, 10,000 Miles Wide! - Read Splitting the Heavens Chapter 1402: New Territories, 10,000 Miles Wide!

Chapter 1402: New Territories, 10,000 Miles Wide!

From the start, Shang Xia planned to use the world fragment to reach the next level of cultivation. However, he also planned to maximize the benefits it would bring to the Spirit Luxuriant World!

Well... He was planning to maximize the benefits to himself rather than the institution, but there was no need to sweat the small stuff.

Of course, that also didn't mean that the Tongyou Institution wouldn't be able to gain anything. It would only be slightly less than what they gained from the previous integration of the world fragment.

Shang Xia planned to do everything on the basis of pushing the growth of the Spirit Luxuriant World this time, and that was why he made several deals with the various factions before finally allowing the Spirit Ark to descend below the heavenly screen.

This time, Kou Chongxue wasn't there to help him split up the world fragments and the members of the Tongyou Institution didn't take up their positions in the various continents. He would have to do everything himself!

Even though he was doing it alone, others would still be able to benefit slightly.

Moreover, there were many members of the Tongyou Institution responsible for bringing the world fragment back, and Song Zhen was also involved!

After hearing Song Zhen's report, Shang Xia discovered something. The effects of the World's Will rejection on Song Zhen was growing weaker!

Song Zhen being a part of both world fragments' integration, gained huge merits for the Spirit Luxuriant World. That was probably the reason behind the weakening of the World's Will rejection.

"I am currently almost able to unleash the strength of a second tier True Immortal..." Song Zhen explained to Shang Xia. "After the fusion of the world fragment into the world... I might be able to cross the bottleneck and really unleash the might of a second tier True Immortal!"

One had to know that he was only at the second tier Martial Void Realm. Because he had been in his cultivation realm for tens of years and had multiple fortuitous encounters, he wasn't far from reaching the third tier.

"Good. This is something worthy of our attention!" Shang Xia nodded in agreement, but he didn't really know how useful it would be. After all, the extent of the weakening of the World's Will rejection only proved that he made some contributions...

After assisting Shang Xia to unseal the world fragment, Song Zhen drove the Spirit Ark away with the members of the Tongyou Institution.

After they returned to the institution, they started to digest their gains from the journey and most of them would be able to experience an increase in cultivation after they emerged from seclusion.

Not long after Song Zhen and the others left, Shang Xia started to split the world fragment.

With his Stone Rod slamming into the fragment, a piece of land that was 6,000 miles wide was separated.

In order to split up the continent, Shang Xia unleashed Breaking World, but it was slightly different from the time he used it in battle. Compared to its terrifying effects in battle, it was a lot more well-controlled and struck accurately at several points on the world fragment.

It wasn't an overkill because of the way he used it, and it could be said that with each stroke of the rod, the better he could control it.

Instead of sending the landmass that broke off to other continents, Shang Xia chose to place the first fragment in the You Continent.

Even though he prioritized his cultivation, he didn't forget to strengthen the foundations of the You Continent.

He also had a sneaking suspicion that the stronger the continent became, the more beneficial it would be for his cultivation.

The You Continent had already reached a size of 12,000 miles and was only second to the Northern Sea Continent that was 17,000 miles wide and the Yong Continent that was 15,000 miles wide, being comparable to the Jiao Continent. Its foundations far surpassed the Jiao Continent.

With the integration of the landmass, the You Continent was able to reach the size of 15,000 miles and contend for the position of the second strongest continent in the Spirit Luxuriant World.

After a continent reached the state of perfection of a spirit world, increasing its size wasn't as easy as before. A good deal of the world fragment would be wasted.

The members of the Tongyou Institution who were ready on the You Continent started its integration, reducing the wasted landmass to its minimum.

With the You Continent slowly digesting the fragment, Shang Xia changed his focus and looked at the Liang Continent Yang Taihe's Eternal Palace planned to develop.

The Liang Continent was pretty well managed under the Eternal Palace, especially after Yifan became a True Immortal with its spirituality. It reached a size of 7,500 miles and it was much stronger than before.

Expanding the continent wasn't something they could do in a short amount of time and natural disasters would be rife during the process. If no high-level experts gave their assistance to ease the fusion process, a huge piece of the landmass would be lost in the process.

Of course... After the continent had expanded, Yifan would receive the blessing of the world and even though it couldn't be compared to the benefits Shang Xia would gain, it was still significant.

Shang Xia couldn't prevent them from benefiting no matter what, and he didn't have enough energy to absorb all the benefits himself.

Splitting off another landmass, he sent it to the Qing Continent that was managed by Jiu Jing of the Divine Capital Sect!

The Qing Continent had also surpassed the 7,000 miles mark under the administration of the Divine Capital Sect, and Shang Xia gave them a landmass of approximately 4,000 miles, same as that of the Eternal Palace.

Originally, the Liang Continent and Qing Continent were ranked among the weakest in the Spirit Luxuriant World, and it wasn't actually worth it for Shang Xia to expand them. They were also very low on the list in terms of continents he wanted to help in the first place.

However... The terms Yang Taihe and Li Jidao gave were really too much that he decided to let them jump the queue for the time being!

Chapter 1403: New Territories, 10,000 Miles Wide! Pt.2

With the integration of the landmasses into the continent, Shang Xia left the rest up to the members of the 2 Elysiums.

After splitting off 3 fragments, more than half the world fragment was gone. He had to properly calculate what to do with the rest.

First, he chose the Liao Continent!

The Liao Continent was the Changbai Sect's territory, and they had been a faithful ally of the Tongyou Institution. In the past, Kou Chongxue also gave them huge support, allowing them to surpass 9,000 miles.

Shang Xia only needed to give them a small piece of land for them to reach a state of perfection, becoming the 13th continent of the Spirit Luxuriant World to do so.

That was the best way to speed up the growth of their world.

At that moment, the Northern Sea Continent, Yong Continent, Jiao Continent, You Continent, Jing Continent, Yi Continent, Bing Continent (Azure Spiritual World), Bing Continent (Azure Origin World), Hai Continent, Ji Continent and the newly ascended Liang Continent and Qing Continent had reached a state of perfection.

Naturally, even though they were giving a piece of landmass to their ally, they wouldn't be doing it for free.

Shang Xia helped the Changbai Sect expand their continent to reach a state of perfection, and the Changbai Sect agreed to give the Tongyou Institution 20 percent control over it.

In order to reassure them, Shang Xia promised that they wouldn't try to steal control of the World Origin Source even though they had 20 percent of it.

The control of the World Origin Source connected to any continent directly affected which faction had the ability to produce True Immortals.

The reason the Tongyou Institution expanded the Ji Continent back then and strengthened their control by obtaining more than 50 percent control of the World Origin Source made it such that the spirituality of the continent lay in their hands.

As for why they wanted 20 percent of the World Origin Source connected to the Liao Continent... It was because Shang Xia learned something from Gong Zhuo of the Wanyun Association back then.

A Spirit World might only be able to support a single True Immortal per continent, but after reaching an Essence World, that was no longer the case.

When that happened, the Tongyou Institution would have another quota to produce a True Immortal.

As for the Liang Continent and Qing Continent... the Eternal Palace and Divine Capital Sect didn't compromise on the World Origin Source. They were willing to pay an even higher price just not to do so.

Shang Xia guessed that they probably had an idea of the importance of the World Origin Source connected to their continents. Moreover, with True Immortals of both factions taking charge of the continents, they had full control of it.

With the integration of the landmass underway, Shang Xia set his sights on the Ye Continent next.

The Ye Continent was also reaching a state of perfection.

The Dongjun Palace that was located there held extraordinary power and without a True Immortal, they already controlled 70 percent of the World Origin Source connected to it. Facing the Tongyou Institution's goodwill, they had no ability to resist.

They paid the price of 20 percent of the World Origin Source in order to obtain the institution's assistance. They obtained a fragment and pushed their continent into a state of perfection.

Whatever it was, even if the Dongjun Palace had an expert try to enter the Martial Void Realm, they could do it with their control of the World Origin Source anyway.

With that, the Ye Continent became the 14th continent to reach a state of perfection.

The Wu Continent came next. Like the others before it, it was also more than 9,000 miles wide.

After strengthening the continents to a state of perfection, the Spirit Luxuriant World grew rapidly.

The Three River Sect, whose strength was comparable to the Dongjun Palace, also paid the price to get a piece of land from Shang Xia.

It was only a matter of time before the landmasses were fully integrated for the Spirit Luxuriant World to properly possess 15 continents at the state of perfection.

...

When Shang Xia returned to the Spirit Luxuriant World with the Spirit Ark, everyone had been trying to get a piece of it.

Because Shang Xia and the Tongyou Institution held an absolute advantage in terms of strength and could suppress the entire world if they wanted, no one dared to mess with them. In the end, all dissent was reduced to grumbles and envious cries.

When Shang Xia chose to strengthen the Liang and Qing Continents, the angry cries grew in intensity and the world started to stir. However, when Shang Xia assisted the Liao, Ye, and Wu Continents to reach the state of perfection, those wagging tongues disappeared suddenly.

The Spirit Luxuriant World entered a strange state of calm and the various factions quietly watched as the Tongyou Institution did their thing.

It was as though other than the unrest caused by the expansion of the continents, the only disturbance was the increasing density of heaven and earth qi.

The benefits brought by Shang Xia bringing 5 continents to the state of perfection benefited everyone in the world. Many people received enlightenment from the increasing heaven and earth qi and the blessing of the World's Will.

It could be said that everyone in the Spirit Luxuriant World benefited from Shang Xia's actions.

Moreover, that was only what was happening at present. There would still be long-term effects that would cascade into the future.

Most of the world fragment had been distributed and there were several small pieces that Shang Xia sent to 2 different continents. This time, they were the weakest continents. The first was the Yan Continent which was controlled by the Zhongxuan Sect. They were also allies of the institution. The second was the Yang Continent where the dominant faction had pretty good relations with them.

Chapter 1404: New Territories, 10,000 Miles Wide! Pt.3

When Shang Xia was splitting up the world fragment, there were 4 other continents in the Spirit Luxuriant World other than the Liao, Ye, and Wu Continents that were close to reaching the state of perfection. For example, the Shu Continent that the Jianmen Gate managed.

According to Shang Xia's plan, the Jianmen Gate that also had a good relationship with the Tongyou Institution would also receive a piece of land, but Shang Xia was shocked that the Jianmen Gate would reject his goodwill.

He was curious about their reason for doing so, but it was quickly revealed. Both institutions had great relations and the Jianmen Gate looked as though they were afraid any deals they made would affect the friendliness between them. Moreover, they were also confident in their own abilities. After the higher-ups of both institutions communicated with each other, the experts of the Jianmen Gate vaguely revealed that they had their own method to grow their continent and might soon birth their first True Immortal!

The members of the Tongyou Institution who heard the news had their interests piqued yet again. They were shocked that the Jianmen Institution knew of a way to strengthen their continent while also producing a True Immortal! However... Every sect had their fortune and it wasn't the Tongyou Institution, or Shang Xia's place to pry further.

No matter what, their growth would only strengthen the Spirit Luxuriant World as a whole!

After splitting up most of the world fragment, the last few pieces were sufficiently big for the Yan Continent and Yang Continent to complete their growth to reach a state of perfection.

The Yan Continent used to be the smallest and most barren continent in the Spirit Luxuriant World. For them to suddenly reach a state of perfection... That would mean that they required a lot more land than the Liang and Qing Continents. Not to mention the fact that the Liang and Qing Continents had Elysium-level factions backing them and required a lot less resources...

Since the Shu Continent didn't need the Tongyou Institution's assistance, Shang Xia was able to save the remaining land for the other continents.

Splitting up the rest of the land and sending them to the Yan and Yang Continents, Shang Xia was prepared to reap the benefits from all of them after their completed ascension.

Their deal with the Zhongxuan Sect in the Yan Continent was to obtain 30 percent of their World Origin Source, and there was no objection to that.

The assistance they provided was just too important. The Zhongxuan Gate couldn't give Shang Xia and the Tongyou Institution more benefits than the Divine Capital Sect and Eternal Palace anyway and could only choose to relinquish more control of their World Origin Source.

Of course, Shang Xia and the Tongyou Institution also made the same promise to them that they wouldn't attempt to take control of the rest of the World Origin Source in the future.

As for the Yang Continent... The Lushan Sect there also showed signs of falling under the Tongyou Institution's banner in recent years. However, they were also within Shang Xia's original plan to push into a state of perfection as their continent had already reached a size of more than 8,000 miles.

Because of that, they made a deal with Shang Xia for 20 percent of their World Origin Source.

With that, Shang Xia's plan to split up the world fragment was basically complete.

Before he returned, the Spirit Luxuriant World had 10 continents that reached the state of perfection. If everything went as planned, 7 more continents would reach the state of perfection with the integration of world origin and more than two thirds of their world would have reached the standard for ascension to an Essence World.

If the information from the Jianmen Gate was reliable, they would be able to produce the 16th True Immortal of the Spirit Luxuriant World and there would be 18 continents that reached a state of perfection, bringing the Spirit Luxuriant World three quarters of the way to the standard of reaching an Essence World.

Because he didn't have Kou Chongxue's help, and the members of the Tongyou Institution weren't involved in splitting up the continent, Shang Xia used a lot more time than the last to split up the world fragment. The 28th year of the Spirit Luxuriant Calendar had already rolled about by the time he was done.

After he was done, Shang Xia returned to the You Continent. Along the way, he felt an unprecedented sense of calm and his body was exceptionally light. All his worries also seemed to disappear.

Shang Xia understood that the World's Will blessing was about to descend.

He didn't care about anything else and wanted to return to the You Continent to enter seclusion while also digesting everything he comprehended during the journey to obtain the world fragment and everything that came after.

Once that was done, his cultivation would improve accordingly and that was his main goal in the first place.

As soon as he arrived in the You Continent, he entered seclusion right away. He didn't even have the time to mention it to anyone as he activated all the restrictions around the Talisman Pagoda and sealed it off from the rest of the world.

It was rare for the Talisman Pagoda to be sealed off from the rest of the world after it was created. It wasn't as though Shang Xia had never cultivated in the Talisman Pagoda in the past, but he had only sealed off the top floor where he was and didn't affect the day to day operations of the other Talisman Masters.

Whatever the case, a Talisman Pagoda was a powerful structure that could help a Talisman Master increase their success rate when crafting talismans. It wasn't an exaggeration to call it a mighty treasure of the Tongyou Institution which was an important part of the Talisman Hall. It was also how they became a holy land for talisman crafting in the Spirit Luxuriant World.

Once it was sealed off, everyone had to find other places to craft talismans before Shang Xia emerged.

The sudden closure of the Talisman Pagoda caused many Talisman Masters to grumble outside while even the deputy patriarchs were alerted to the sudden change.

However, once they learned that Shang Xia was cultivating within and had sealed it off, all voices of dissent ceased.

Some Talisman Masters who had been complaining quickly left to find somewhere else to complete their work, while others didn't leave immediately. Many of them felt that for their Hall Master to enter seclusion suddenly and seal off the Talisman Pagoda meant that something big was going on.

If something important was really going on... How could sealing off the Talisman Pagoda alone be enough?

The Talisman Masters who remained behind quickly gathered together to deploy many layers of protection around the Talisman Pagoda. There were protection formations, warning formations, illusion formations, and even some killing formations to prevent anyone from approaching the pagoda. It didn't take long for the Talisman Pagoda to become the most fortified area in the Talisman Hall.

Splitting the Heavens #Chapter 1405: Level of Extreme Harmonization - Read Splitting the Heavens Chapter 1405: Level of Extreme Harmonization

Chapter 1405: Level of Extreme Harmonization

Shang Xia naturally wouldn't know what was happening outside, and even if he did, he couldn't pay attention to them. He entered a deep state of cultivation as the World's Will blessing descended.

Along with the successful ascension of the 7 continents, the World's Will blessing Shang Xia received also reached a terrifying level. It poured into him as the World Origin Source of the You Continent. As the true essence of the world poured into him, he started to circulate the Six Harmony Flawless Rod Technique to turn the energy into his own. His cultivation started to rise at a rapid pace, and it quickly approached the next level.

At the same time, the remnant energy of the various spiritual medicines he had taken before, such as the Three Lights Water, filled his body. The energy that the Crimson Soul Tablet would return to him after refinement from other sources also arrived, pushing his cultivation up bit by bit.

Winter passed and the spring came again, as the 29th year of the Spirit Luxuriant Calendar arrived. Shang Xia reached the peak of the level of Returning to the Origin in just several short months.

That wasn't all. The blessing of the World's Will had yet to stop as world essence continued to pour into him.

That was also the reason Shang Xia chose to strengthen the You Continent first. After reaching 15,000 miles wide, the World Origin Source connected to the You Continent was much larger than before.

A continent that had barely reached a state of perfection wouldn't be able to withstand Shang Xia's consumption no matter what.

Actually, there were very few people who attempted to do what Shang Xia did. Most of them would slowly draw on the world origin and they would allow the World Origin Source connected to their continents to recover during the process. Several high-level True Immortals would even cultivate outside their world in order not to overdraw the foundations of their continents.

Not to mention the fact that Shang Xia, a high-level True Immortal who was so different from others...

He also chose to strengthen the You Continent's foundation at the very start because of something he heard from Gong Zhuo back then. The strengthening of the foundations of any continent would greatly benefit the True Immortal who ascended with the continent's spirituality...

He burned it into his memory the first time he heard it.

...

As Shang Xia reached the peak of the level of Returning to the Origin, he was in no rush to break through to the level of Extreme Harmonization. He prioritized tempering

his physical body first, and he felt that there were many ways to improve before he would attempt the breakthrough.

After all... From how Shang Xia saw it, he had been in the level of Returning to the Origin for too short of a time. He improved through many different means, but he felt that his foundations were still slightly lacking.

One had to know that every True Immortal had been cultivating for hundreds of years.

In the Martial Void Realm, every breakthrough required tens of years, and there were even some who took close to 100 years to make a single breakthrough.

From the time Shang Xia started his cultivation journey, there was no need to mention 100 years. Not even 70 years had passed!

Staying in his state of deep cultivation, Shang Xia continued to temper his physical body while cultivating his secret art. He wanted to ensure he was in the perfect state before breaking through to the level of Extreme Harmonization.

Sinking his consciousness into a state of concentration, Shang Xia didn't know how long had passed when he saw a blurred region of space before him. The veil of confusion eventually turned clear as a massive lake the color of blood filled his vision. It flowed with a constant rumble and Shang Xia couldn't help but wonder if he was staring at the veins flowing through him.

His body resembled jade of the highest quality as his veins and meridians traveled through a perfect route through them.

His bones emitted thunderous cracks in his ears as he observed what was happening and he could see streams of Six Direction Qi flowing through his body.

Is this... Is this Inner Vision?

It was unlike how he observed the condition of his body in the past. Inner Vision was something that allowed him to see every part of his body closely while maintaining an omniscient view.

One would rarely be able to experience Inner Vision when cultivating, and Shang Xia also experienced it a few times in the past.

However, this time was different from the rest. After observing his body from the inside, Shang Xia discovered that the strange state didn't end. He seemed to separate from his body as he stared at it from another point of view. Everything within the Talisman Pagoda could be seen as he saw himself cultivating on the top floor.

Why does this feel like an out of body experience?

The thought flashed through Shang Xia's mind, but he quickly rose past the Talisman Pagoda to arrive high in the air above the Tongyou Institution.

He didn't stop there. Eventually, the entire city entered his sights and eventually, the You Continent.

It was then that he felt himself becoming one with the world. He felt that as long as he willed it, he would be able to arrive at any spot in the You Continent. Everything became a part of him.

Even so, he maintained his ability to think like before and he didn't fuse completely to become a part of the world around him. He truly became a part of the entire continent...

In the past, when he first reached the Six Direction Realm, he experienced the same thing. However, back then, if he truly indulged in the feeling, he would cease to exist as he would fuse into the world around him.

After thinking about the difference, Shang Xia seemed to awaken slightly as his soul returned to his body that was in the Talisman pagoda. He opened his eyes slowly, but a profound look flashed in his eyes.

He was clear about what just happened. What he experienced was the legendary Man and Heaven as One!

The time was far too short, and after realizing what happened to him, he discovered that if he was a little careless earlier, his soul might just scatter everywhere, never to return...

After consolidating everything he gained during his time in cultivation, Shang Xia was shocked to discover that even though he had been suppressing his cultivation realm earlier to strengthen his foundations, he entered the level of Extreme Harmonization without warning!

Silently calculating the time he had been in seclusion, he discovered 3 months had passed since the time he entered the state of Man and Heaven as One!

Chapter 1406: Sixth Move

It was a wondrous feeling.

However, 3 months passed in the blink of an eye as Shang Xia managed to enter the state to observe the entire You Continent.

That wasn't all. During the process, he actually entered the level of Extreme Harmonization without facing any obstruction!

Everything happened so naturally and silently.

No heaven-and-earth qi vortex was produced, and no mighty heavenly phenomena were seen. Not a single soul was alarmed, and without anyone realizing it, the first sixth tier True Immortal of the Spirit Luxuriant World was born in the Talisman Pagoda of the Tongyou Institution!

Shang Xia quickly discovered that once he awakened from the mystical state, world essence continued to pour into him.

Even after reaching a new level of cultivation, he was still improving rapidly.

It was clear bringing 7 continents of the world into a state of perfection was extremely beneficial to one's cultivation!

Staying in seclusion for another month or so, Shang Xia consolidated his foundations and grew slightly stronger.

Nearing the end of his cultivation, the Crimson Soul Tablet in his sea of consciousness started to tremble and it no longer provided energy it refined to Shang Xia. Instead, it started to change its focus to deduce the sixth move of the Six Harmony Rod Technique.

Shang Xia had already comprehended 5 moves, namely, Harmonizing Continent, Starry Disorder, Void Emptiness, Void Seal, and Breaking World.

Once he comprehended his sixth move, he should reach the large completion stage of the Six Direction Realm!

After experiencing the strange state, Shang Xia could tell that the sixth move was definitely related to Man and Heaven as One.

Naturally, a mystical state like that wasn't so easily expressed!

Fortunately for him, he once comprehended the Man and Heaven Synergy Chapter. He had been looking into the intricacies of the principles behind it in recent years, and it was an extremely profound secret art.

The Man and Heaven Synergy Chapter seemed like a simplified version of Man and Heaven as One. In fact... It might have been an entry point to the mystical state in the first place.

With the World's Will blessing pouring into Shang Xia, he could replicate his experience when he experienced Man and Heaven as One.

Of course, the difference between that and the real thing was huge, but being able to experience it again would still prove to be of great benefit.

After reaching the Martial Void Realm, as long as one was able to touch on the state of Man and Heaven as One, they would be able to successfully advance to the next tier with the enlightenment it brought. However, there was almost no one like Shang Xia who could enter the state for 3 whole months, and replicate the feeling after that!

As the Man and Heaven Synergy Chapter appeared in his mind, Shang Xia had a strange feeling the next move of his Six Harmony Rod Technique was forming in his mind.

In his mind, the final move of his Six Harmony Rod Technique should be omniscient. Everything would be able to transform into his weapon the moment it was unleashed.

The name of his sixth move also appeared in his mind the next moment, Heaven Liberation!

Even though his sixth move was just a concept in his mind and he still had a long way to go to refine it, he stopped cultivating all of a sudden.

As he woke up from his special state of cultivation, he suddenly dispersed the heaven and earth qi that had gathered around him.

Who could have thought that Shang Xia would suddenly get rid of the state of enlightenment everyone sought so hard to achieve?

If news of what he did got out, god knew how many cultivators would pound their chests and curse him out even if he was a powerful True Immortal.

As for the reason he did that... It was because he gained inspiration from something that happened in the Essence Xing World.

In the Essence Xing World, the Chen Dynasty Emperor didn't attempt to break through to the Martial Emptiness Realm by entering seclusion. He first tried to regain control of the territory of his Chen Dynasty, taking over or kicking out any faction within.

If not for Shang Xia's interference, the Wanyun Association would have suffered the fate of having their Elysium and the floating city destroyed.

Other than that, the Chen Dynasty Emperor made a deal with the Piercing Cloud Thieves and paid a huge price in order to obtain a world fragment.

If Shang Xia didn't fuck around with that, the Piercing Cloud Thieves wouldn't have lost their world fragment along with their fourth chief.

From all the information Shang Xia gathered, the Chen Dynasty Emperor wasn't satisfied with just that. He had other plans in motion.

The reason he wanted to do that wasn't just because the Chen Dynasty's foundations weren't enough for him to break through. Instead, he wanted to sever the connection between his soul and the world, allowing him to no longer be restricted to the Essence Xing World and to gain true freedom in the sea of stars.

If Shang Xia said that he didn't plan on entering the Seventh Order after reaching his current cultivation realm, he would be lying.

Since that was the case, he would have to start his preparations as soon as he could.

The moment a cultivator stepped on their path, they would be blessed by the World's Will. When entering the Martial Void Realm, they would even brand their soul into the world through the World Origin Source.

The karmic connection with their world would grow stronger the more they cultivated. The more they were blessed by the world and the greater the assistance they received, the connection would grow even stronger. It would even become an important barrier between the Martial Void Realm and Martial Emptiness Realm, directly affecting one's cultivation.

Of course, that wasn't the only thing stopping one from entering the Martial Emptiness Realm.

Whatever it was, if a cultivator wanted to weaken the connection, they would have to do what the Chen Dynasty Emperor did. Also, weakening the connection didn't mean that they would be able to sever it completely.

In order to completely sever the connection, or for it not to hinder one's breakthrough, one could only contribute more to their world.

That was exactly what Shang Xia had been doing the entire time, but even so, after taking part in so many operations to strengthen his world, the World's Will blessing that descended on him to assist his cultivation strengthened those connections again.

The World's Will blessing was greatly beneficial to one's cultivation, and that was why Shang Xia used its assistance to break through to the sixth tier. Now that he was done, he decided to get rid of it completely.

Shang Xia's attitude to the World's Will blessing was clear. He would use it when necessary and stop once he achieved his goal.

At the very least, he felt that he had to reach a state where his contributions to the world were more than its blessing to him.

Splitting the Heavens #Chapter 1407: Martial Intent: Six Harmony Supporting the Heavens - Read Splitting the Heavens Chapter 1407: Martial Intent: Six Harmony Supporting the Heavens

Chapter 1407: Martial Intent: Six Harmony Supporting the Heavens

The connection to the world wasn't the only thing weighing down on his mind. There was something else he had to worry about.

It was the Crimson Soul Tablet that was residing in his Sea of Consciousness!

He was clear that the tablet was close to restoring itself. With his strengthened connection with the treasure, he could feel that its restoration was nearly complete.

There was another important point he was paying attention to. It was the fact that the Crimson Soul Tablet had only been recovering because it had been devouring world origin from the various worlds.

With the restoration of the tablet reaching its end, it became extremely difficult to make even a slight improvement. Its requirement for world origin was growing too high. From the start where the world origin of an Azure World was enough for it to repair itself, to the world origin of Spirit Worlds... Shang Xia also used it to swallow a third of the world origin contained in the World Origin Source connected to the Tong Continent in the Essence Xing World. The mysterious energy when passing through the Star Curtain came next...

When it was absorbing the mysterious energy when they passed through the gap in the Star Curtain, rows of blurry words appeared on its surface but Shang Xia was unable to observe what was on it.

After experiencing the state of Man and Heaven as One, the words on the tablet started to clear up.

When he came up with the general idea of his sixth move of his Six Harmony Rod Technique, the words became completely clear and the martial intent of his Six Direction Realm could be seen.

In the past, his martial intent would only appear after reaching the large completion stage, and Shang Xia felt that the reason it appeared so quickly this time was because it swallowed the world origin of the Essence Xing World and the mysterious energy contained in the Star Curtain.

Turning his attention to the tablet, Shang Xia stared at the row of words on it.

Martial Intent: Six Harmony Supporting the Heavens

Prerequisite Secret Art: Six Harmony Flawless Rod Technique

Prerequisite Martial Arts: Six Harmony Rod Technique

Essential Medium: Breath of a Heavenly Field

Essential Secret Art: World Establishing Art

Remarks: Destruction of a World or Creation of a World

Martial Intent Evaluation: Destruction and Creation is but a thought away.

Shang Xia fell into deep contemplation after looking at the martial intent recorded on the tablet, as though he was thinking about the possibility of actually comprehending it.

There was no need to mention the secret art and martial art required. He already practiced them, and the only thing he needed to do was to improve his Six Harmony Flawless Rod Technique now that he had reached the large completion stage of the Six Direction Realm.

From how his Six Harmony Rod Technique was a prerequisite martial art, it was clear his martial intent would be related to it in one way or another. And of course, he would need to use a lot of effort to fully comprehend his sixth move in order to begin the comprehension of his martial intent.

Once it was complete, he would progress to comprehending his martial intent naturally. Without it, there was no point in thinking about his martial intent.

As such, he could only slowly complete the requirements for him to start the comprehension of his martial intent one by one.

Also... There was the mysterious requirement of the Breath of a Heavenly Field. From what he could come up with, he felt that it was probably the mysterious energy that appeared when he passed through the Star Curtain back then, or it might be related to the Origin Source of a Heavenly Field.

That was the reason he released the phantom of the Crimson Soul Tablet when passing through the region in the first place. He didn't know if it would be required in the future, but it seemed his bet paid off.

Also, if it wasn't enough, he could always go back for more...

Finally came the World Establishing Art. After reading the remarks, a strange expression appeared on his face.

The World Establishing Art seemed to be some sort of spatial art that at the very lowest level, consisted of the creation of an individual space separate from the rest of the world. From the creation of a small space to a Mysterious World, to a Holy Land, and finally an Elysium... That was what he could think of. However, he recently learned that there was a Dao Field above an Elysium, but the Crimson Soul Tablet didn't say what he had to create.

If he really had to establish a Dao Field... The requirements were much higher than an Elysium, and Shang Xia couldn't help but feel his heart pounding when he thought about the Tongyou Elysium's ascension.

One had to know that the Tongyou Institution didn't even have a full inheritance to establish an Elysium. In fact, not a single faction possessed a complete inheritance on the creation of the 3 great Holy Artifacts required to establish an Elysium.

They couldn't see how the Spirit Luxuriant World had 7 Elysiums with the Tongyou Institution plotting to secretly establish the eighth, but they actually didn't have the ability to create everything required for it. The way they obtained the Holy Artifacts required was by paying a huge price to trade for them, or getting their hands on those treasures when adventuring ancient ruins outside.

The moment he revealed the existence of the World Establishing Art, it would be the most guarded secret art of any faction! Shang Xia was completely confused by the requirement but knew that he gained a treasure nonetheless.

What has the World Establishing Art had anything to do with my martial intent?

Am I supposed to use his martial intent to create a separate region of space?

Hmm... Speaking of which... The Stone Rod is a Heaven Supporting Jade Pillar in the first place.

After lengthy consideration, Shang Xia decided to not think so much into it. He chose to focus on his Six Harmony Rod Technique for the time being and felt that after reaching the large completion stage of the Six Direction Realm, it would come to him naturally.

He felt that leaving seclusion was the thing to do at the moment. After all, he sealed off the entire Talisman Pagoda for fear of being disturbed back then and the inconvenience he caused was pretty huge.

Splitting the Heavens #Chapter 1408: Rank Five Talisman Seal - Read Splitting the Heavens Chapter 1408: Rank Five Talisman Seal

Chapter 1408: Rank Five Talisman Seal

As he entered seclusion too suddenly back then and sealed off the Talisman Pagoda, he greatly affected the workings of the Talisman Hall.

In recent years, the Spirit Luxuriant World's efforts to deal with the Yuhai Sect achieved great results and things were drawing to a close. In order to prevent the Yuhai Sect from causing too much damage since they were cornered, the consumption of high-level talismans by the experts of the various factions increased drastically.

Because the Talisman Pagoda was sealed off, the operations of the Talisman Hall were affected and no one dared to bother Shang Xia who was in seclusion, the Talisman Hall could only dig into their reserves in order to maintain their support for the operation against the Yuhai Sect.

"Don't tell me we can't craft any talismans without the Talisman Pagoda!" Lou Zizhang, the deputy hall master, who was also one of the 2 rank five Talisman Grandmasters of the Talisman Hall barked at the Talisman Masters who came to ask for help due to the closure of the pagoda. "If all of you rely so much on the Talisman Pagoda, you won't be able to improve! What will you do if you no longer have its support?"

The Talisman Masters who came to look for him started to mutter softly to themselves, but eventually, someone stepped out and asked, "Instructor Lou, it's not that we're relying too heavily on the Talisman Pagoda. It's just that those outside have been placing too much pressure on us to produce talismans. Ordinarily, we would be able to produce talismans even without its support. However, they require too many talismans and we can't produce so many without the support of the pagoda. That is why we came to you... All of us received the Hall Master's teachings and we wouldn't dare to bother him, but as you can see, the situation..."

"Hmph!" Lou Zizhang snorted once and stopped them from saying any more. He turned the tip of his spear to the members of the Tongyou Institution dealing with the Yuhai Sect and started to grumble, "Damn it! The disciples of the institution are losing their bloodthirst. They no longer have the might of our deputy patriarchs and the Hall Master when they rampaged against the world back then. Heh... They're just dealing with a bunch of sea spiritual beasts and foreign cultivators... How many high-level experts do they have? They can't destroy the enemy's faction even after so long even with the support of multiple True Immortals. Heh, they can't rely on their own abilities and turn to talismans or other spiritual treasures in their battles... Hmph, if we face strong adversaries in the future, will they still have the courage to put their lives on the line and fight to the death?"

The Talisman Masters who heard him replied in unison, "Yes, yes. Those who are facing the Yuhai Sect are really burning up talismans too quickly!"

"Do they really think it's so easy to make them?"

“They don’t know how to cherish what they have at all. If this keeps up, we won’t be able to supply them with enough talismans no matter how much resources we are given.”

“Fighting with the Yuhai Sect was a way to train them to begin with... If they simply chuck high-level talismans at the enemy, what’s there to train?”

“...”

The serious atmosphere in the hall was instantly broken with many of them complaining about the battle against the Yuhai Sect.

“What are all of you talking about? Why is it so lively here?” A voice rang through the air, silencing everyone in the hall.

Lou Zizhang revealed a face full of joy and quickly took a few steps forward and yelled, “Hall Master, you’re finally out from seclusion! Did everything go alright?”

Shang Xia smiled in response. “It’s alright. You’re not too bad yourself. You have already become a rank five Talisman Grandmaster!”

Lou Zizhang felt as though he was floating on a cloud after receiving Shang Xia’s praise. However, he quickly composed himself. “If not for the pointers I received from you, I wouldn’t be able to reach my current state.”

Shang Xia burst out laughing, “There’s no need to be so modest. Right, I was hearing your conversations earlier and it seems like you were talking about the training our disciples are going through against the Yuhai Sect?”

No one dared to hide anything as they quickly reported everything they knew to Shang Xia.

“So that’s what’s happening... Well, I left seclusion, and the Talisman Pagoda is open. You can go ahead and craft talismans with peace of mind now. As for the matter of there not being enough talismans...” Shang Xia paused slightly and reached into the void beside him. A small stone seal that was 5 inches wide appeared in his hand the next moment and he tossed it at Lou Zizhang. “This is a rank five Talisman Seal I made recently. In the hands of Martial Dipper Realm experts, you should be able to make 50 to 70 talismans. As long as you have enough talisman paper and ink, feel free to play around with it.”

Lou Zizhang nearly dropped the item in his hand and he stared at it in shock. “Talisman Seal?! Rank five Talisman Seal?”

Snapping awake suddenly, he gasped, “You.. You... You actually managed to craft rank five Talisman Seal?”

Shang Xia waved his hand causally and muttered, "If not because I was held back with other matters and had to travel to so many places, I should have completed this a long time ago. Also, this rank five talisman is a Space Calming Talisman and it's a very ordinary rank five talisman. It's only useful because of what they are doing now."

Lou Zizhang's expression changed slightly and he quickly thanked Shang Xia.

Damn... He's just acting cool at this point...

Shang Xia continued, "Right, I just emerged from seclusion and I should help you guys out, but there are too many things I have to do... I can only leave the Talisman Seal with you to use however you please."

After he spoke, he nodded slightly to those in the hall before taking his leave.

Everyone bowed and after watching him disappear from the hall and into the void, they turned back to Lou Zizhang.

"Deputy Hall Master, do you feel that something is different about the Hall Master?"

Lou Zizhang looked at the person who spoke and said in a matter of factly, "He has been in seclusion for almost a year... It's nothing strange for there to be something different about his aura."

"No, no, no... Deputy Hall Master, I think you don't understand what I mean. Did you notice that when he left, every action he made seemed to resonate with the world around him? It's as though the world itself is operating around him, but everything flowed so naturally that it didn't seem strange..." The Talisman Master who spoke explained.

Lou Zizhang knew that the person who was speaking had already reached the Martial Dipper Realm and had cultivation even higher than his, and he asked in a low voice, "What do you think the Hall Master's cultivation realm is right now?"

Reeling in fright, the person who spoke earlier gasped, "I wouldn't dare to estimate his cultivation realm right now. It's just... It's just that... Nevermind. I can't put it in words."

Nodding slowly, Lou Zizhang looked in the direction Shang Xia left and felt that the rank five Talisman Seal in his hand grew several times heavier.

Splitting the Heavens #Chapter 1409: External Projection - Read Splitting the Heavens Chapter 1409: External Projection

Chapter 1409: External Projection

Of course, the rank five Talisman Seal wasn't something Shang Xia completed on a whim.

Actually, he had been working on it for a long time, but he just wasn't able to put in too much effort into its research due to everything he had been through.

His experience accumulated, and it reached the extreme level after he entered the level of Extreme Harmonization. With the feeling of enlightenment, he completed his first rank five Talisman Seal.

As soon as he came to fruition, he suddenly had a feeling that he took a step forward in the art of talismans. At the very least, it would greatly boost his success rate when crafting rank six talismans. It was also one of the effects of experiencing Man and Heaven as One.

More than a year passed since he entered seclusion and sealed off the Talisman Pagoda. The 30th year of the Spirit Luxuriant Calendar also rolled about.

Hovering in the skies above the You Continent, Shang Xia didn't leave the heavenly screen.

He expanded his divine soul and covered the continent, feeling exceptionally at ease because of his comprehension of the Man and Heaven Synergy Chapter.

What he found interesting was he could accurately control which part of the You Continent he wished to project his divine soul. He didn't have to appear himself, but his divine soul would be able to congeal a clone with the heaven and earth qi at his target location. Also, the clone would possess the strength of...

Shang Xia carefully felt the effects and when he abruptly opened his eyes again, a look of shock appeared in them.

Fourth tier True Immortal?!

Shang Xia thought that he was mistaken, and he quickly tried to project another clone in a location he chose.

He wanted to see if the feeling was real, and if the clone would be able to possess the strength of a fourth tier True Immortal.

Along with Shang Xia's continuous tests, pure streams of energy gathered to form an energy vortex above the sea on the eastern front before turning into a humanoid figure.

As the figure became clearer, it started to exude a majestic aura as formless spatial ripples spread around its body. The sea that was rolling about chaotically calmed down in an instant and became as still as a mirror.

The aura the figure emitted rose from the Martial Extermination Realm to the Martial Dipper Realm, and then to the Martial Void Realm.

As the figure grew increasingly real, his aura also rose from a first tier True Immortal to a second tier True Immortal...

As his aura continued to rise, the calm sea below started to churn once again. Massive waves that were dozens of feet tall formed and rushed towards the shore.

Before they could get far, a formless power stopped them and forced the surface of the sea to return to its original calm.

In the skies above the You Continent, or more accurately, above the Tongyou City, Shang Xia opened his eyes helplessly. It seemed as though his test failed.

Whenever he created a clone in the past, he would infuse a part of his divine soul and some of his energy. It was something he had a lot of experience doing and his clone would be formed instantly.

Ordinary True Immortals would require some time to create their clones, and after it was produced, they would have to use some time to restore the energy they used up while in seclusion.

At his current level, Shang Xia was able to create clones as easily as drinking a cup of tea. He could create several clones at the level of first or second tier True Immortals, and he could even create clones with combat strength in the third tier.

However, the creation of his latest clone seemed different from every other time before. That was because he wasn't creating the clone right beside him where he could infuse whatever energy or divine soul as he wished. He was trying to create the clone in the eastern region of the You Continent, which was thousands of miles away from him!

If he was able to master the ability to create clones such a large distance away, he might be able to accomplish the same thing when he was still above the heavenly screen.

Of course... It wasn't something he could achieve in a day.

Shang Xia continued to attempt creating clones in the east and he eventually created a clone with strength of a second tier True Immortal. However, the clone couldn't last for long, and he used far too much energy to justify its existence.

If that was all he would be able to do, Shang Xia felt that there was no point trying further.

If he created a clone where he was, he would be able to create at least 2 clones with the strength of third tier True Immortals. Moreover, they would be able to exist as long as he wanted.

No matter how he looked at it, Shang Xia's attempt wasn't worth it.

Reluctant to give up, Shang Xia had a feeling he could use the state of Man and Heaven as One to create his clone, but he didn't know how to do it.

After all... He still had the strange feeling that he would be able to create a high-level True Immortal clone that way.

Fortunately, he wasn't foolish. He stood in the air above the You Continent while making his attempts, allowing him to quickly replenish the energy used while improving his methods of clone making.

Several days passed like that, and Shang Xia tried several times to create his clones. In the end, all he managed to do was to make his clone last longer. His clone also only had combat strength in the first or second tier of the Martial Void Realm and he failed to improve his technique.

In a state of frustration, he controlled the clone he created to send a slap at the water below.

Boom!

A huge splash burst out from the surface, and water rained down on the clone that Shang Xia was about to get rid of.

"Huh?" The clone that was drenched shared his thoughts with Shang Xia through their connected divine soul. "After the seawater fused into me, I felt a lot sturdier than before. Even the energy in my body feels a lot more controlled..."

"Could it be?" Shang Xia thought of something and didn't disperse the clone he created. Instead, he sent a stream of water into his clone and suddenly felt that it could grow even stronger.

Realizing something, Shang Xia sent a thought through their shared soul to tell the clone what to do.

Heaven and earth qi started to gather around the clone before turning into another massive vortex.

His clone's aura, which had been stagnant at the second tier for some time, started to show signs of growing. After reaching the level of a third tier True Immortal, his clone suddenly exploded before turning into a burst of energy that filled the lands.

Shang Xia might have failed again, but a burst of joy filled his heart.

Earlier, he thought of a way to strengthen the clone. Since it could grow stronger, the problem of it not being able to remain intact for a long time wasn't a problem.

If he couldn't use sea water, he would simply use spiritual liquid! If it wasn't enough, he would add some spiritual wine into the mix since they were all liquid anyway and it contained even more concentrated essence. If push came to shove, he would simply infuse several drops of Three Lights Water into the clone.

If he was truly able to create a clone that possessed the strength of a high-level True Immortal that could survive for a long time, he felt that there was a need to change the way he addressed it. It would no longer be a clone due to the way it was formed. Rather, it would be more appropriate to call it an External Projection.

Splitting the Heavens #Chapter 1410: You Grow Stronger, You Grow Stronger, Everyone Grows Stronger! - Read Splitting the Heavens Chapter 1410: You Grow Stronger, You Grow Stronger, Everyone Grows Stronger!

Chapter 1410: You Grow Stronger, You Grow Stronger, Everyone Grows Stronger!

When Shang Xia was giving it his all when creating clones, the joint operation of the various factions against the Yuhai Sect had reached its end. The final conclusive battle was about to take place.

Actually, if not for the fact that the factions of the Spirit Luxuriant World wanted to use the opportunity to train their disciples, they would have long since sent in the big guns to wipe out the troublemakers.

In the Tongyou Institution's stronghold in the Hai Continent...

Sun Haiwei rushed into the main hall and saw Ge Qingzhu who had been waiting for some time.

"Has everyone gathered? Did we also set the time we're going to do it?" Ge Qingzhu placed a batch of high-level talismans in his hands down on the table before asking her casually.

Sun Haiwei poured herself a cup of tea and regained her composure before revealing, "It's pretty much set. We should be moving out in 2 days. Actually, we True Immortals are the ones setting the time. Everyone will move out according to our directions, but they're just going to take part in the smaller miscellaneous battles. Oh? What talismans are you holding? Why do they look exactly the same?"

She raised her eyebrows when staring at the batch of talismans in his hand and asked curiously.

Ge Qingzhu laughed in response. "These are rank five Space Calming Talismans. As for why they look exactly the same... That's because they were created with a Talisman Seal!"

"Rank five Talisman Seal?" Sun Haiwei gasped. She seemed to have realized something and she continued, "Did he emerge from seclusion?"

Ge Qingzhu stared at her with a profound gaze before laughing to himself while nodding. "He clearly took another huge step in his path of cultivation. Originally, I thought that we wouldn't have enough talismans during the operation and we might suffer huge losses. This batch of talismans solved my worries."

Sun Haiwei thought for some time before she spoke again, "When he brought the world fragment back, he basically completed the ascension of the various continents by himself. All the benefits should go to him and his cultivation would definitely grow. I only wonder if he has already reached the level of Extreme Harmonization..."

"That's the sixth tier we're talking about..." Ge Qingzhu couldn't help but sigh softly. "Both of us are stuck at the first tier... We naturally understand how difficult it is to grow in the Martial Void Realm, but that little guy seems to be growing faster the higher his cultivation realm is!"

Sun Haiwei giggled to herself. "Let's not talk about him anymore. How are things on your side? Are the members of the Tianya Pavilion still pestering you to hurry up?"

"Heh... I was wondering why you left me to deal with the matters regarding the Tianya Pavilion and went to communicate with the rest of the factions. I thought that you were looking out for your senior, but as it turns out, you were just avoiding trouble!" Ge Qingzhu pointed at her and started to shake his head slowly.

"Hehe..." Sun Haiwei didn't deny it. "Don't you know that ever since the Tianya Pavilion heard that there might be the remains of a destroyed Elysium in the world fragment of the Spirit Dusk World we integrated, they have been pushing for us to destroy the Yuhai Sect? All of them are using the excuse of how they gave up the opportunity of nurturing a True Immortal in the Hai Continent to me and the promise Patriarch Kou and Shang Xia made to ask us to obtain the remnants of the destroyed Elysium. They annoyed me to no end! The only person in the Tianya Pavilion who is at least a little civil about it is

Lady Yu. They might not be biting the hand that feeds them, but they sure are annoying!”

Ge Qingzhu laughed softly, “Alright, alright. The final battle is upon us. We don’t have to waste our time listening to the members of the Tianya Pavilion barking at us any longer...”

A look of regret flashed through Sun Haiwei’s eyes all of a sudden. “We thought that we would be able to use the Yuhai Sect to train our disciples a little more... It’s a shame the moment news of a destroyed Elysium residing in the remains of the Spirit Dusk World destroyed the peace. The various factions can no longer bother with training their disciples and want nothing more than to get their hands on those remains to get a chance to become the 8th Elysium of our world.”

Ge Qingzhu added, “It’s a pity they don’t know that they wouldn’t be able to create the 8th Elysium even if they obtain some treasures from the remains.”

A light flashed in Sun Haiwei’s eyes. “Has there been progress in the Jiao Continent?”

Nodding, Ge Qingzhu explained, “I received news from the institution right before you came back. Little Shang provided a complete set of inheritance for the institution to create a Mysterious World, a Holy Land, an Elysium, and even a Dao Field! He even provided 3 different methods to craft the Holy Artifacts required to establish an Elysium. All of them will allow us to create the most perfect combination of Holy Artifacts!”

“Oh?” Sun Haiwei gasped. “Does that mean that the inheritance will be a secret of the highest level?”

Ge Qingzhu nodded, but he seemed to have thought of something and he revealed with some sense of pride, “Of course we have to keep it a secret. However, things like how to establish a Mysterious World and Holy Land will be revealed to you. However, the way to establish an Elysium or Dao Field might not, but they will most definitely be revealed to me!”

Sun Haiwei laughed in a hoarse voice, and she quickly played along, “Yeah, yeah, you’re the most important True Immortal in our institution now! You have the authority to learn any secrets related to the institution. Even Patriarch Kou and Shang Xia can’t compare to you in that regard. Sorry for offending you, mighty Tongyou Elysium’s True Immortal!”

Both of them roared with laughter at their banter.

As an Elysium True Immortal, Ge Qingzhu was naturally tasked with protecting the inheritance of the institution. He had the qualifications to learn about every single secret as he was the last line of defense, and the insurance the institution had to pass down their legacy.

The promised time passed in a flash and the high-level experts of the factions taking part in the operation against the Yuhai Sect gathered. Under the lead of Ge Qingzhu, Sun Haiwei, Yifan, Jiu Jing, and Fei Xuzi, the experts of the various factions followed behind the 5 True Immortals and completely surrounded the Yuhai Sect.

After the True Immortals gathered, they were ready for a massive fight, but Ge Qingzhu and Sun Haiwei suddenly realized that the True Immortals of the other Elysiums were much stronger than themselves.

“What fortune did they run into? I really envy them for being able to raise their cultivation so quickly...” Sun Haiwei muttered to herself, but she didn’t remain in the dark for long as they simply asked the True Immortals of the other Elysiums.

All 3 pairs of eyes communicated with each other and eventually, Jiu Jing, who was the oldest among the other True Immortals, explained, “We have to thank True Immortal Little Shang for our accelerated cultivation speed... Because of the growth of our world, we also gained a blessing from the World’s Will.”

Fei Xuzi also added, “Even though the Northern Sea Continent didn’t grow, the growth of the world is also very beneficial to all of us. Also, we received a lot of assistance from our factions.”

Everyone knew that before the Tongyou Institution’s rise, the Northern Sea Mystic Sect was the undisputed strongest faction in their world.

Bitter smiles appeared on the faces of Sun Haiwei and Ge Qingzhu.

It was then that Yifan informed them of something new. “Right, not too long ago, Zhang Jianzi has already become a second tier Elysium True Immortal. He should be consolidating his foundations in the Heavenly Star Elysium and he won’t make it for this battle.”
