

The Lord 761

Chapter 761: Aquatic Beast Tide

Large numbers of aquatic beasts started to head over. Even though they were all less than 1,000 meters long and not as terrifying as the ones that had just invaded, they were still quite powerful. What was more important to note was these aquatic beasts were under the Fish Scale people's control — unlike the ones before.

Millions of aquatic beasts controlled by the Fish Scale people started to charge and gave off terrifying auras as they rushed towards the human army.

“Get in formation!” the human commander yelled. Everyone started to move into their positions and roared, exploding out with might as traces of aura rose up from their bodies.

These auras gathered above them which formed an azure dragon, a black tortoise, a vermilion bird, and a white tiger. These holy beasts stood around the human army and gave off monstrous auras and brilliant lights.

Four energy barriers appeared around the human army which were azure, black, red, and white. They represented different energies.

Boom!!

The world-destroying aquatic beast tide of millions of aquatic beasts smashed against the energy barriers. Even though the barriers madly shook, they were still able to block the beast tide's assault.

This allowed the human army to give off a sigh of relief. However, the sound of countless conches being blown could be heard as the aquatic beasts seemed to be stimulated. Their eyes became red, and they gave off terrifying auras as they once again started to smash against the energy barriers.

Soon, the energy barriers shattered, and the ferocious aquatic beast tide rushed at the human army. The human players and soldiers were greatly shocked, and the Shieldbearers once again roared as they defended with all of their might.

Bang! Bang! Bang...

Many Shieldbearers were knocked away, but they were able to greatly slow down the momentum of the aquatic beasts. The large numbers of Infantrymen behind them madly attacked and stabbed their weapons into the aquatic beasts' bodies. One after another was killed. The aquatic beasts' corpses drifted downwards, and the entire region was filled with blood.

Bang! Bang! Bang...

The remaining aquatic beasts madly sent the Infantrymen at the front flying. But in the next moment, more Shieldbearers roared as they charged up with their shields to reduce the momentum of the aquatic beast tide once again. At the same time, the Archers continued to let loose arrows.

The massive beast tide was unable to destroy the human army's formation and was instead gradually weakened. However, the price that the human army paid was quite great. They had lost 120 million people.

However, they had made great gains. They had killed seven million or so aquatic beasts and destroyed the tide. There were not many left, and they were easily hunted down by the human army.

Seeing this, the Fish Scale people's commander quickly withdrew the surviving aquatic beasts. Moments after, the Fish Scale Cavalry gathered once again to charge from the front, left, and right.

Apart from the Cavalry, large numbers of Fish Scale Archers and Infantry also appeared, and they had much more than the human side.

As the Fish Scale Cavalry started to charge, countless Fish Scale Archers started to fire off arrows as the Fish Scale Infantrymen roared and followed behind the Cavalry.

The two sides quickly clashed, looking like a massive wave crashing against a big mountain. However, the human side's formation was already weakened by the aquatic beast tide. As the Fish Scale Cavalry charged, they dealt an even greater blow to the human army.

The human army could not defend against a simultaneous charge from three sides, and their formation was completely destroyed. Adding on the countless arrows, things became even more chaotic.

As the Fish Scale army continued to ferociously press forwards, the human army started to collapse, and they could only retreat. They quickly rose to the surface and got onto the ships waiting for them there. All the ships had magic formations on them, so it would be much faster than swimming.

As the humans ran for their lives, the Fish Scale people continued to chase after them while shooting arrows out toward the ships which caused soldiers to fall into the world. They were abnormally excited, and it was as if they were hunting animals.

Out of the one billion people who had set out, only 500 million people returned. 400 million players had died, and 100 million Stage 1 soldiers had died. It was only because of the Stage 1 soldiers they had been able to put up a good fight. Else, the human army would not have been able to stop the Fish Scale Cavalry at all.

On the other hand, the Fish Scale people only lost approximately seven million people. It could be said the humans were crushingly defeated.

The humans who returned were all quite terrified after being crushed like that; they had basically been one-sidedly slaughtered.

In contrast, the Fish Scale people were incredibly happy. They had won a resounding victory and lost only seven million people to destroy 500 million humans.

None of the Fish Scale factions thought such a thing was possible. Even though they knew they would destroy the humans in the water, the humans were much weaker than they had expected. Their Fish Scale army had completely slaughtered the human army.

“Let’s see if we can use this victory to continue attacking. The humans just suffered a crushing defeat, and their morale has plummeted. If we suddenly invade, we’ll be able to make great gains. Moreover, we don’t need to directly fight with them and only need to destroy their dikes.

“Right now, the water at the dikes has risen to about 30 meters. If the dikes are destroyed, we will be able to instantly flood more than 100 regions, and we can use the seawater to continue to invade the human world. We won’t give them an opportunity to build more dikes. This way, we’ll be able to conquer the human world,” a white-haired elder said to countless Fish Scale people.

The ugly fat man grinned as he nodded in agreement, “Yes! And, we should continue to gather more soldiers to deal a big blow to the humans. With enough soldiers, we’ll be able to defend against any tricks they have as well as any death throes!”

The enchanting woman smiled and said, “In that case, should we talk about how to divvy up the human world? Back when we lured over the aquatic beast tide, they destroyed many system main cities, but the City Lord Seals were devoured by the aquatic beasts. Let’s try to avoid that; it’s quite a pity to see so many cities go to waste.”

“That’s easy! Whoever takes the city, town, or village will get to keep it. We’ve flooded approximately 400 regions in the human world, and there are still many towns and villages left,” the fanged man said.

A handsome young man smiled as he said, “This is not a bad suggestion; those who put in more effort should receive more. This will also make everyone more motivated to invade the human world. However, for fairness, no one should take any villages or towns until we’ve dealt with the dikes.”

The Fish Scale people all grinned, and they accepted this decision. Then, they held more discussions and made some more detailed plans.

After this battle, they had enough confidence to destroy the human world. The humans were just like livestock to them that could be killed whenever they wanted. That was how confident they were.

Indeed, with the results of this battle, they had the right to feel this way.

This time, they sent out three billion Fish Scale people. With so many people in the Fish Scale army, just one look at them would make most humans terrified to the point where they did not dare to fight.

Chapter 762: Dikes

It was a starry night, and countless stars twinkled in the sky. Even though the moon was not out, it was not dark at all, and it was possible to see far into the distance.

After this battle, the human army's morale plummeted. They lost all battle intent and were not as excited and passionate as they had been before. Before, they had not known the Fish Scale people's true strength, and after this fight, they understood just how terrifying the Fish Scale people were.

Now, everyone felt quite afraid of the Fish Scale people, and if they could not overcome this fear, they would lose before they even fought the Fish Scale people the next time.

This total defeat rocked the entire human world. Everyone felt a sense of crisis, and the commoners started to feel terror as well. Unease filled the entire human world, and more and more people became willing to head to the Southern Continent to defend against the Fish Scale invasion.

Now, many countries appealed to people's sense of patriotism, hoping that more people would join the resistance.

There were only one billion people standing guard on the dikes, and none of them felt that confident. It was at that time that the Fish Scale people started to attack.

Arrows shot out from the water towards the humans on the dikes. Many people were caught off guard and hit by the arrows, causing blood to splatter everywhere. Cries of pain tore through the beautiful night; this was the beginning of another big battle.

The humans quickly responded, putting up shields to block the arrows. At the same time, the Archers started to fire back.

The human side quickly counterattacked, while the Fish Scale people leisurely attacked. Their plan was to destroy the dikes, not actually fight with the humans – the Archers were just a distraction while the other soldiers destroyed the dikes from underwater.

The Fish Scale people slashed out with their weapons, causing icy lights to slam against the dikes made of mud, trees, and rocks. However, because the dikes were reinforced by talismans and runes and protected by a barrier, a glow appeared on the dikes to defend against the attacks. Otherwise, a Stage 3 General would be able to pierce through the dikes. Without the reinforcements, the dikes were simply too weak.

However, the power of the talismans, runes, and barrier could not last forever. They were gradually whittled away by the constant attacks and would soon break.

As the Fish Scale people continuously attacked, the glow on the dikes became weaker and weaker. Seeing this, many humans realized what was happening and yelled in fear, “There are Fish Scale people underwater attacking the dikes!”

Only then did everyone understand what was going on. The Archers immediately started to aim towards the bottom of the dikes, but the Fish Scale people were prepared – many of them carried large shields.

After being shot 30 meters into the water, the arrows were already greatly weakened, and with the large shields, it was very easy for the Fish Scale people to defend against the arrows. As such, they were able to continue attacking the dikes without any pressure.

While the humans’ attention was on the bottom of the dikes, the Fish Scale Archers once again started to ferociously attack. Countless arrows shot out of the water, resulting in many deaths, and howls continuously sounded out.

As the countless Fish Scale people attacked underwater, the glow on the dikes became fainter and fainter. If this went on, the dikes would definitely be destroyed.

Above, 10,000 City Lords exploded out with power and unleashed their City Lord Seals, wanting to stop the Fish Scale people underwater. However, the Fish Scale City Lords also responded in kind, and a battle between City Lords erupted in the air.

Explosions continuously sounded out, and a destructive aura could be sensed throughout half of the Southern Continent.

The human side finally thought of a way to deal with the Fish Scale people underwater – they started to throw down large amounts of Ice Powder. The player factions had used it when attacking Great Qin before, and after the powder fell onto the water, it quickly started to freeze the water.

As the Ice Powder landed on the water, ice began to spread at a rate observable by the naked eye, and traces of cold air started to rise. The Fish Scale people underwater were greatly startled and quickly retreated, but those who reacted slowly were completely frozen.

In just an instant, the 50 meters in front of the dike were frozen into thick ice, forcing the Fish Scale people back. Seeing this, the human side was greatly delighted.

However, the Fish Scale people did not seem fazed. Soon, people wearing robes and holding coral staffs walked out, and there were countless soldiers gathered around them.

The soldiers gave off powerful auras and sent their strength into those people, who raised their coral staffs. They started to chant incantations, and an extremely dangerous aura spread out. The seawater started to roil, and everyone could tell that the Fish Scale people were doing something dangerous.

“Hurry and stop them!” the human commander yelled. Everyone looked quite frightened as they drew their bows and shot towards the robed Fish Scale people.

However, the Fish Scale army was prepared, and Fish Scale Shieldbearers holding reef shields easily blocked the arrows.

“Sea God!” the robed Fish Scale people shouted in unison, and an enormous aura rippled out like a massive wave. Tens of millions of aquatic beasts were formed out of water, and they gave off monstrous power as they rushed towards the thick ice.

Of course, the aquatic beasts formed out of water could not compare to the aquatic beast kings, but they were not weak at all. The 50-meter thick ice was instantly shattered, causing ice shards to fly everywhere.

Following this, the aquatic beasts continued to charge into the dikes, causing the dikes to violently tremble and for the glow on the dikes to become even dimmer.

Boom!!

The aquatic beasts once again crashed into the dikes, causing them to start to crack. The barrier had already been dispelled, and if the aquatic beasts rammed into the dikes again, they would collapse.

“Hurry and retreat to the second line of dikes!” seeing that they had already lost, the commander immediately loudly yelled out an order. Everyone hurriedly headed to the teleportation channels they had prepared and went to the second line of dikes that had been recently constructed.

As the human army retreated, the Fish Scale people did not hold back anymore and attacked the first line of dikes with their full power.

Boom!!!

A shocking explosion sounded out as the grand dikes collapsed, allowing seawater to surge forwards and instantly flood countless more regions.

The Fish Scale people were delighted to be able to break through one of the human side's last defensive lines without any great losses. Soon, they received news that the humans had already constructed a second line of dikes.

This caused the Fish Scale people to feel quite surprised; how could the humans have constructed a second line of dikes so quickly? However, they did not care too much. Since they had broken through the first line so easily, why did a second line matter? They would confidently destroy it as well.

Originally, the human side had wanted to use firm rocks to build the second line of dikes. However, because the situation was so urgent, they could only continue to use mud, trees, and rocks to build it.

Chapter 763: Counterattack

The final battle was about to begin, and both sides waited in anticipation. In that battle, the human side had lost another 100 million people, and there were only 900 million humans standing on the second line of dikes.

The area below them was completely filled with Fish Scale people, and their army numbered roughly three billion. They had not lost many people from the battle before.

The Fish Scale people felt incredibly confident, and looking at the dikes that were even simpler than the first ones, they all looked incredibly condescending. They felt that victory was already in their hands.

The fanged man laughed as he pointed at Tina Pendragon and called out, "From now on, you'll be my woman. As long you serve me well, I won't eat you. You're the prettiest woman I've met, and I want you to be my slave and to do you every day!"

These words made Tina Pendragon, who was very well-tempered, quite angry, and she slightly frowned.

The ugly man laughed as he also chose one and pointed at Masanori Hano, saying barbarically, “You’ll be my female slave. I don’t want to bother saying too much, so as long as you’re willing, I’ll spare you and your family’s lives. Otherwise, I’ll skin you all to make decorations.”

The enchanting woman dissatisfiedly harrumphed seeing that two of the prettiest ones had been taken. However, many of the remaining men were not bad either, so she pointed at Si Ji and Geoffrey, saying, “Both of you can be my slaves! You humans have no chance of beating us, so as long as you’re good slaves, I’ll guarantee your safety!”

The two people’s words made Masanori Hano, Geoffrey, and Si Ji incredibly angry. Masanori Hano’s expression became completely icy, while Si Ji and Geoffrey glared at the enchanting woman.

“I’ll give you all one last chance. If you’re willing to submit to the Fish Scale race, you humans can survive as slaves. Otherwise, all of you will perish!” the white-haired elder said domineering with his hands behind his back.

Tina Pendragon did not say anything. Instead, slashed out a shocking golden sword light. This sword seemed to dye the entire world golden, and it flew toward the white-haired elder and the others.

This officially began the battle, and seeing that the humans were not willing to surrender, the Fish Scale people started to attack. Countless arrows filled the sky and descended, while the majority of the Fish Scale people dove underwater to destroy the dikes’ barriers.

With three billion Fish Scale people attacking 900 million humans, the humans had already lost in terms of morale. They were greatly outnumbered and were innately weaker, so they were completely suppressed by the Fish Scale people.

However, the situation quickly changed – countless Fish Scale people suddenly coughed up blood and immediately died.

This made countless people feel incredibly shocked, and the Fish Scale City Lords in the air looked completely dumbstruck. None of them could understand why countless Fish Scale soldiers had suddenly died.

Even many of the humans felt confused, not knowing what was going on. However, the 20 or so people most important to the Southern Continent alliance, including the Legatees, knew what was happening and grinned.

Geoffrey heavily sighed while Tina Pendragon remained silent, and Masanori Hano smiled as she looked at the ugly man, feeling quite pleased.

The Fish Scale people realized that they had fallen for the humans' trap, but there was nothing they could do about it now. Every second, tens of thousands of Fish Scale people died, and the surface of the water was already clumped with corpses. Their expressions were all quite terrifying, causing the rest of the Fish Scale people to feel horrified.

At that moment, one of the Fish Scale City Lords cried out, "There's an intense poison in the water!"

This made all of the Fish Scale leaders' expressions to become grim. They had never expected the other side to use such insidious means, and they immediately ordered their soldiers to use their Cultivation power to suppress the poison in their bodies. The countless soldiers did so, but it was completely useless.

One of the Fish Scale soldiers yelled as he coughed up blood, "This poison's too intense; I can't stop it at all!"

This caused the Fish Scale leaders' hearts to sink. They could only order their soldiers to leave the water with the poison. However, they were unable to do this at all, as they could not fly – only City Lords could fly using their City Lord Seals' power.

In just a while, 1.5 billion Fish Scale people were poisoned to death, making the Fish Scale leaders angry to the point they felt like they were going mad. They yelled, "Attack the dikes! Only then can we escape from the poison!"

A black ray of light, bringing with it an immense aura, suddenly appeared above the dikes, followed by thousands of City Lords. Immediately, everything fell silent.

As soon as this person appeared, the Fish Scale Legatees' expressions fell, because from his aura, they could sense that he was the one who had sealed the eight aquatic beast kings.

The humans looked at this person and started to cheer, “Great Qin’s Legatee! Great Qin’s Legatee! Great Qin’s Legatee!”

Zhao Fu ignored them, took out 100 bottles, and opened them before pouring them into the water. Following this, the City Lords behind him also took out barrels of poison and poured it all into the water. At the same time, barrels were delivered to the soldiers on the dikes, who also started pouring them into the water.

Now, the water was being poisoned in the front and the back. Anyone who entered the region filled with poison would be poisoned to death, as this poison could enter one’s body through one’s skin.

This was the trump card that the humans had been hiding this entire time, and only the important leaders knew of this. This plan had been suggested by Zhao Fu and carried out by him – he had been collecting poisons all this time just for this day.

If they poured the poison into the Fish Scale world, because of how big it was, the poison would be quickly diluted and would not have much of an effect. However, they had constructed dikes in the human world, keeping the water in one place, making this poison plan quite effective.

After all, Zhao Fu had collected poisons from all over the human world and refined all of them using the Ten Thousand Poison Divine Cauldron, making them even more toxic.

Because of how much poison it had refined, the Ten Thousand Poison Divine Cauldron had leveled up to a Level 2 Saint Armament and was now the same level as the Sin Dragon Sword.

This was the reason why Zhao Fu and the Legatees had not appeared when the Fish Scale people had attacked the first line of dikes. The human world’s plan was to suffer a defeat and lure the Fish Scale army in before killing them all.

In other words, they were trading the lives of 600 million humans for the lives of three billion Fish Scale people.

The Fish Scale people’s ferocity surprised Zhao Fu, and if they did not use such methods, the humans definitely would not be a match for the Fish Scale people. If they properly fought directly, the humans would definitely lose.

The poison spread incredibly quickly, and the Fish Scale people trapped there died in horror and despair. None of the Fish Scale City Lords could do anything about this.

Now, there were only 300 million Fish Scale people. The Fish Scale City Lords' hearts ached, but they could only abandon them. They had already lost and could only escape. However, they only left after hatefully looking at Zhao Fu.

However, how could the human side allow them to just run like that? Countless City Lords filled with battle intent excitedly flew forwards, and Zhao Fu also shot towards the Fish Scale City Lords.

Chapter 764: Spoils of War

Zhao Fu rushed up and unleashed the Great Qin Seal's power, releasing a massive aura and killing almost one City Lord with each strike. All of the human City Lords also chased after the escaping Fish Scale City Lords, who could only desperately run.

This was human territory, so there many more human City Lords than Fish Scale City Lords. What's more, there were even more human City Lords hurrying over, and they were also supported by countless soldiers. As such, the Fish Scale City Lords did not dare to stay here at all.

After this round of wild hunting, the human side lost 100 or so City Lords, but they had killed 4,000 or so Fish Scale City Lords. Zhao Fu alone killed 150 of them, obtaining 150 City Lord Seals. However, it was a pity that he would only be able to obtain their cities if he went to the Fish Scale world.

That would be incredibly dangerous, as both sides were still at war. If he was discovered, he would be surrounded and killed.

This time, the human side had killed three billion Fish Scale people and 4,000 Fish Scale City Lords, dealing a heavy blow to the other side. The Fish Scale people most likely would not dare to do anything for a while.

After hunting down and chasing away the remaining City Lords, Zhao Fu looked down at the countless corpses in the water. Zhao Fu had the ten million soldiers he had brought to start collecting corpses. All of them had Water Repelling Pearls and were safe from the poisoned water.

The Water Repelling Pearls were much more powerful than ordinary Water Pearls, as Water Pearls were unable to keep the poisoned water away – the toxicity of the poison would quickly erode the membrane that the Water Pearl created.

Even if the equipment on the corpses was worth around one gold coin each, that would be three billion gold coins in total. In reality, a set of equipment on each of the corpses would be worth around six or seven gold coins, so that would be at least 18 billion gold coins realistically.

Even though this battle had immense risks, they had also made incredible gains. What's more, Zhao Fu was also interested in the system main city soldier corpses.

After the previous battles, Zhao Fu had secretly collected one billion system main city soldier corpses – he could only do this secretly; otherwise, he would be viewed with enmity by the entire Southern Continent. After all, these were their soldiers.

Each system main city had sent around 500 soldiers, so even though losing one billion people sounded like quite a lot, each system main city did not lose too many people.

If it wasn't for the fact that these corpses were very important to Great Qin, Zhao Fu would have wanted to properly bury them. After all, they had died for the safety of the human world.

However, Great Qin desperately needed Stage 1 Blood God Pills, as Great Qin could no longer buy corpses so easily. As such, Great Qin could only collect corpses itself. Zhao Fu did not mind – as long as Great Qin could become powerful, doing anything was fine.

As everyone watched Great Qin's soldiers collect the Fish Scale corpses, they immediately realized how much the corpses were worth. However, most people did not dare to enter the water, as some people who had done so had been poisoned to death.

As such, they could only look at Great Qin's soldiers, who were quickly storing corpses into their spatial rings, with envy.

The other Legatees and City Lords understood how much these corpses were worth. Even though they could pick up corpses while in the air, they all had noble statuses; how could they collect corpses just to earn a bit of money? Moreover, they would not be able to collect many by themselves.

The one who had benefitted the most from this battle was definitely Great Qin, while Great Qin had not sent a single soldier to fight. Great Qin's Legatee had only put out a bit of effort but had received so many benefits, making most people feel quite dissatisfied, and they looked at him angrily.

"Great Qin's Legatee, aren't you embarrassed for taking so many of the corpses?" one of the City Lords said after looking around at the others.

If it was just him alone, he would not dare to say anything to Zhao Fu, but since there were other people feeling the same way, things were different.

Someone from the Southern Continent also said from a distance, "That's right! All of the benefits were taken by you, and we weren't able to get anything. Aren't you going too far?"

Some people were quite angry and looked at Zhao Fu unhappily, while others started to look quite hostile.

The City Lords stood far away because they had to consider their own safety. If it wasn't for the possibility of the Southern Continent being destroyed, they would not have worked together with players. They did not care if the players lived or died at all.

Now that the crisis had been resolved, they did not want to get involved in a fight between players. They did not set their eyes on this fortune.

The Dynasty Legatees all secretly felt quite pleased and expressed their support to those people who had spoken. They were still quite frightened of Great Qin and wanted to reduce its strength as much as possible. It hurt their hearts to see such a fortune falling into Great Qin's hands.

Zhao Fu coldly looked at them and said, "The corpses are right there; if you want them, you can take them."

Hearing this, the various people present felt quite angry. They all had prestigious statuses, so how could they do such a thing themselves? Moreover, their soldiers did not have Water Repelling Pearls, so they would die if they entered the water.

Now, the smell of gunpowder was in the air, and there was a noticeable tension. Thousands of City Lords started to consider attacking because even though Great Qin's Legatee was powerful, with so many of them, they should be able to kill him.

"Alright, the true crisis has not yet been resolved – we have not destroyed their magic formations yet, so let's just put this matter aside," Akhenaten said, trying to keep the peace as the main leader of the Southern Continent.

If they started fight before the true danger was over and the Fish Scale people came to attack again, they would be like a pile of loose sand. In the end, it would be the Southern Continent that suffered the most. Even though Akhenaten also felt quite annoyed, the most important thing right now was defending against the Fish Scale invasion.

Most people also realized that the crisis was not yet over, and yet they had started to squabble over the spoils. Many of them remembered why they had come here and no longer minded as much.

Moreover, if it wasn't for Great Qin's Legatee, they would not have been able to achieve such a decisive victory so easily. They might have been crushed by the Fish Scale people, and all of them would have died. When they thought of that, many of them felt much better.

After losing the support of the others, the people who had spoken immediately felt quite apprehensive and stopped speaking. They hid within the crowd, afraid that Zhao Fu would come for them.

Zhao Fu coldly harrumphed and decided to compromise, saying, "I can take out a portion of the spoils and give them out as rewards for everyone who participated!"

They had only obtained such a massive victory through everyone's efforts, and only Zhao Fu had contributed out of all of Great Qin. It would not be appropriate for Zhao Fu to take everything, so he decided to leave a bit for the others as well.

After hearing what Zhao Fu had said, all of the ordinary people started to happily laugh. All of them could earn some extra money from this, so they naturally stood on Zhao Fu's side.

As for the City Lords, they did not dare to say anything either and hid their hostility within their hearts.

Following this, countless people got on ships and started to head towards the rift. Apart from the powerful barrier, there was nothing defending the magic formations.

Chapter 765: Poison

After hearing that the invading army had been poisoned to death and that the City Lords had fled in terror, the millions of Fish Scale people defending the barrier had also run away.

Without these Fish Scale people defending it, the humans could freely attack and destroy the barrier. Everyone started to go up and attack the barrier, and soon, the barrier that even Zhao Fu could not shake was destroyed by 900 million humans and City Lords.

Following this, seawater stopped pouring into the human world. They had finally resolved this massive crisis.

“What should we do with the remaining poisoned water in our world? The poison’s simply too intense, and if it gets past the dikes, the result will be even more terrifying than the floods. It’s a disaster waiting to happen if we leave it there!” Akhenaten said after they had destroyed the magic formations.

This made everyone feel quite troubled. There was a massive amount of poisoned water, and it would be quite difficult to deal with it. If it leaked into the rest of the world, things would become incredibly dangerous.

A Japanese person said savagely, “That water came from the Fish Scale world, so let’s return it with some added poison. With so much poisoned water, we’ll be able to kill countless Fish Scale people. Since they tried to exterminate us, let’s exterminate them.”

A white-haired General from China rolled his eyes before saying, “That’s not quite possible; at most, it’ll only be able to poison some of them. There’s simply too much water in the Fish Scale world, and some of the deepest parts go thousands of kilometers down. The poisoned water will quickly be diluted and won’t be able to harm too many people.

“However, I thought of a method that can allow us to completely stop the Fish Scale people from launching any invasions!”

Hearing this, everyone felt delighted and asked, “What is it?”

The elderly General smiled as he explained, “Before, we were afraid that the second dike would be broken through, so we prepared a large amount of Ice Powder to construct an emergency third dike.

“However, because Great Qin’s plan was so successful, we can use the remaining Ice Powder to deter the Fish Scale people from attacking. We’ll first send the poisoned water to the rift and then seal it with the Ice Powder to prevent it from diluting.

“That way, we’ll be able to create a poisoned ice region and have people stand guard there. If the Fish Scale people attack again, we can melt the poisoned ice and have the poison quickly spread, killing all the invading Fish Scale people.

“Our greatest weakness is that we cannot breathe underwater or move around properly underwater, but now, living in the water has become a weakness for them. We can use this to suppress them.”

Everyone expressed their approval of this plan, and they started to carry out the elderly General’s plan.

They set up magic formations that sent the poisoned water to the rift. The City Lords then used the Ice Powder to freeze the water. Because of how many people had died in that water, the water was blood-red colored.

At first, it was only a blood-red colored island, but the island slowly grew and grew. It gave off an incredibly bone-chilling coldness and an immense sense of danger. No aquatic beast dared to go near it, and even the smaller fish and prawns did not dare to stay around it at all.

Moreover, it would not be possible to get rid of the seawater in the 400 flooded regions immediately.

The Fish Scale world was incredibly furious after finding out what the humans had done, but they did not dare to invade again. The rift was now blocked by poisoned ice, and even though City Lords could fly over, none dared to do so because 4,000 City Lords had just been slaughtered.

The deaths of so many Fish Scale people and City Lords shook the entire Fish Scale world. The various factions had to re-evaluate the humans and could not underestimate them anymore.

The news about the battle spread throughout the entire Fish Scale world, and the factions that had led the invasion were criticized by countless people. Twenty or so leaders immediately resigned or were ousted.

The Legatees were also sharply criticized, and they were the ones who had lost the most.

This massive defeat not only greatly reduced their forces but also completely destroyed their morale as well. Even though they were the Fish Scale World's Legatees, they were rebuked and punished by their various families' elders.

The Fish Scale people now recognized Great Qin's Legatee to be the most important person in that battle. He had sealed the eight aquatic beast kings, was the human with the most potential, and was the World Protector. He was also the human world's most licentious King.

He was the one who had turned the entire situation around, and he was now listed as an extremely dangerous figure by the countless Fish Scale factions. He was their greatest enemy and someone countless women had to be wary of.

While the others were setting up the poisoned ice, Zhao Fu's soldiers had finished collecting the corpses. There were three billion corpses in total – 2.5 billion players and 500 million system main city soldiers. Apart from their equipment, most of them carried other items as well.

Just the money on them alone was worth about 4.5 billion gold coins, and Zhao Fu decided to take out one billion gold coins to reward those who had participated.

The equipment, items, and money were worth around 25 billion gold coins, and this shocked even Zhao Fu. He had never thought that those corpses would be worth so much money.

Apart from the massive fortune, there were also the corpses themselves. There were 500 million Stage 1 corpses from the Fish Scale side and 100 million Stage 1 corpses from the human side. Great Qin would not have to worry about Stage 1 corpses for the next few years. This made Zhao Fu feel even happier.

Even though they did not receive any EXP for the Great Qin City by poisoning the Fish Scale people to death, Zhao Fu had received Invasion Points for them, so he now had a massive number of Invasion Points.

Adding on the Invasion Points he had obtained from sealing the eight aquatic beast kings, Zhao Fu could now exchange for a Capital City, something else to be excited about.

By now, Zhao Fu could not stop smiling. The gains he had made this time were simply too massive and shocking.

After everyone returned from destroying the barrier, Zhao Fu gave them the rewards he had promised, resulting in a lot of cheering and celebrating.

However, Zhao Fu suddenly sensed something, and he hurriedly looking into his spatial ring and found that countless City Lord Seals had lost their glows.

Seeing this, Zhao Fu could not help but sigh. There was only one situation where this would happen: If the City had been conquered by someone else and been de-leveled to an Advanced Town, the City Lord Seal would lose its power.

Before, Zhao Fu had been planning to venture into the Fish Scale world to bring some Cities back.

Chapter 766: Capital City Stone

Zhao Fu had obtained 150 City Lord Seals from the previous battle, which was quite a large figure for Great Qin. Those City Lord Seals were all incredibly important, but they were now unusable, making Zhao Fu feel quite disappointed. It seemed that the Fish Scale people were more willing to destroy the Cities than give them to the humans.

Zhao Fu considered the problems of going to relocate the Cities – the Cities were scattered all over the Fish Scale world, and it would also be incredibly dangerous. When he thought of this, Zhao Fu no longer felt as disappointed.

He had already made shocking gains, so he decided to not be too greedy.

At that moment, the golden dragon suddenly said, “Even though those City Lord Seals are unusable now, they are still valuable treasures. You should collect as many as you can; they will be useful in the future!”

Hearing the golden dragon's words, Zhao Fu started to feel quite curious. After all, these unusable City Lord Seals were like ordinary rocks; what could they be used for in the future?

The golden dragon explained that the City Lord Seals could be used as special equipment, and they would be incredibly powerful. One could also use secret techniques to fuse these City Lord Seals into beasts' bodies, making them almost as strong as the boss monster of a region.

After hearing this, Zhao Fu felt quite shocked; he had never thought that they could be used in such a way. He then realized that since the City Lord Seals in his hands were now useless, the ones that the others had obtained were most likely useless as well.

Before, Zhao Fu had planned to immediately leave, but he now decided to talk with the others and see if he could have their useless City Lord Seals.

After some discussions, Zhao Fu planned to buy City Lord Seals for 100,000 gold coins each. To City Lords, 100,000 gold coins was a large sum of money, so they were all quite happy to trade something so useless for something so useful.

"Here, no need to pay me." Tina Pendragon came over to Zhao Fu, took out 30 or so City Lord Seals, and handed them to Zhao Fu.

Zhao Fu looked at her and asked, "Why?"

Tina Pendragon smiled as she replied, "They're useless to me, but they should be useful to you, so I'm gifting them to you. It was all thanks to your poison that our side was able to win so easily."

Zhao Fu replied straightforwardly, "There's no need to thank me; this matter concerned the safety of Great Qin, and I was just helping Great Qin."

As he spoke, he took out a spatial ring filled with gold coins and handed it to Tina Pendragon.

"Great Qin's Legatee, this is for you. Please also help if my Northern Continent is in danger in the future," Geoffrey said as he brightly smiled.

“Great Qin’s Legatee, I’ll give this to you too!” Masanori Hano walked over and gave ten or so City Lord Seals to Zhao Fu.

Zhao Fu received all of them and smiled, but he still gave them spatial rings with gold coins. He did not want to owe any favors.

Even though they had killed 4,000 or so Fish Scale City Lords, Zhao Fu had only obtained 3,500. The system main city City Lords were willing to exchange with Zhao Fu, but the players were not willing, as they were worried as to what Zhao Fu was going to use the City Lord Seals for.

Even if these City Lord Seals were useless, they would rather throw them away than give them to Zhao Fu. They did not want to strengthen Great Qin at all.

Zhao Fu did not force these people, but in the future, Zhao Fu would not care about the lives or deaths of those people. They had nothing to do with him.

Obtaining 3,500 City Lord Seals was already quite a surprising number; if he could actually obtain that many Cities, that would be the most ideal situation. If that happened, Great Qin would be invincible within the human world.

Now, their main task was to continuously expand the area of the poisoned ice. Akhenaten and some other Southern Continent factions planned to build a City on the ice, standing guard there.

After returning to Great Qin, Zhao Fu quickly went to the large Chaotic World Stone Stele and exchanged for a Capital City Stone. After selecting it, a golden cube appeared in front of him.

This Capital City was Gold grade, and a City Lord Seal had to be condensed for it. This was Great Qin’s first Capital City, apart from the Great Qin City itself, and Zhao Fu cared about it greatly.

As to who he should give the position of City Lord to, Zhao Fu immediately thought of Bai Qi. Bai Qi had been with him since the very beginning, and he was the person Zhao Fu trusted the most. He was Zhao Fu’s most important subordinate, so it was only right to give this City to him.

However, at that moment, Zhao Fu also thought about Tuoba Qing. With her bloodline, Zhao Fu always felt that she would be very important in the future.

As her bloodline slowly awakened, even without a City Lord Seal, her strength would be at Stage 8 level. She was abnormally powerful, and without the Great Qin Seal, Zhao Fu would not be able to fight with her at all. What's more, her bloodline had not even fully awakened yet.

Zhao Fu felt quite conflicted, because he wanted to make Bai Qi the City Lord, but he also wanted to make Tuoba Qing the City Lord.

In the end, Zhao Fu decided to make Tuoba Qing the City Lord of this Capital City. If she became the City Lord, not only would she be able to obtain enormous power, but the people that this City spawned would also have bloodlines that were stronger than normal. Although they would not have the same bloodline as her, their strength would be at least Stage 0-6 when they spawned.

After Zhao Fu had made this decision, the golden dragon said, "Are you sure you want to make her this Capital City's City Lord? This sort of low-level City is not good enough for her. I suggest you wait – you're only missing a single shard of the Desolate Blood Mask, and if you can restore it, you'll be surprised!

"I was wrong about the Desolate Blood Mask before – it's not a Nation Armament. It is instead something that surpasses even Emperor Heaven Armaments. I'm not sure exactly what it is, but because of the amount of power it gave off, I thought it was a Nation Armament.

"As such, I suggest you wait until the Desolate Blood Mask is restored. In actuality, your subordinate, Bai Qi, is the most suitable candidate. Do you remember the Seven Kill Stele?

"You can fuse the Seven Kill Stele into the City Creation Stone and give it to Bai Qi, who has the Seven Murders Star. There will definitely be extraordinary effects."

After hearing what the golden dragon had to say, Zhao Fu decided to wait to complete the Desolate Blood Mask before doing anything with Tuoba Qing. He took out the Seven Kill Stele, causing a berserk killing intent and gory stench to spread out. The Seven Kill Stele was incredibly powerful, and even ordinary Great Cities would not be able to suppress it.

Great Cities could not fuse with the Seven Kill Stele; otherwise, the City Heart would be destroyed by the berserk killing intent. Perhaps only some special Great Cities would be able to suppress it.

Zhao Fu did not have any special Great Cities, but the Capital City he had would be enough. After all, it was a level higher than Great Cities.

The Capital City's power would be able to withstand the Seven Kill Stele's killing intent, and Zhao Fu started to fuse the two together. The process was quite difficult, and the Seven Kill Stele gave off an intense blood-red light to resist the City Creation Stone, while the City Creation Stone gave off a bright golden light in response.

Chapter 767: Seven Kill Capital City

In the end, Zhao Fu spent a great deal of energy to fuse the two together, forming a blood-red cube that gave off a dense smell of blood and intense killing intent. The City Creation Stone also rose from Gold grade to Legendary grade.

This made Zhao Fu feel quite surprised, and he quickly looked at its description.

[Seven Kill Capital City Stone]: An ordinary Capital City Stone that was fused with a growth-type treasure with immense killing intent, creating a special City Creation Stone. Its Grade can be increased through slaughter, and the people it spawns will innately have [Slaughter Power]. This City Creation Stone is an extremely dangerous item and should only be used by a special person. Ordinary people will not be able to control its killing intent, causing that person and the spawned residents to become monsters who only live for slaughter.

This Seven Kill Capital City Stone was incredibly powerful, and ordinary people indeed would not be able to use it. Luckily, Bai Qi had the Seven Murders Star and was definitely the most ideal person to use it. As such, Zhao Fu did not worry too much.

“What are your orders, Your Majesty?” Bai Qi paid his respects after arriving, his cold face showing a trace of gentleness. This was something that ordinary people would never be able to see, and Bai Qi only showed this side when he was alone with Zhao Fu.

Zhao Fu smiled and nodded before handing him the Seven Kill Capital City Stone. After receiving it, Bai Qi's expression became one of shock, and he cupped his hands as he said, “Thank you, Your Majesty!”

“Alright, there’s no need for such formalities between us. I want to take a look at this Seven Kill Capital City Stone’s power, so let’s go now!” Zhao Fu said as he lightly laughed and walked out.

Bai Qi nodded and followed behind Zhao Fu.

Following this, the two of them went to the Abyss Province, the former Little Abyss. Bai Qi went to an empty area of land and pressed the blood-red Capital City Stone against the ground.

Boom!!

A wave of blood-red energy exploded out, and a gory and bloodthirsty aura spread out. As the terrifying energy blasted out, the ground immediately cracked.

Standing 1,000 meters away, Zhao Fu felt quite shocked and flew into the sky. He had never thought that the Seven Kill Capital City Stone would have such power.

After being pressed onto the ground, the Seven Murder Capital City Stone gave off a large amount of blood-red flames that slightly wavered as if they were trying to escape from all restrictions. Bai Qi’s expression became serious, and he gathered his Seven Murders General Star’s power in his hands. Sensing the Seven Murders General Star’s power, the Seven Kill Capital City Stone’s resistance became much weaker.

Boom!!

A gigantic explosion rang out as the Capital City Stone fused into the ground, and a blood-red pillar shot to the sky and dyed the sky blood-red. A berserk, bloody aura quickly spread out, and Great Qin’s residents within the Abyss Province all felt a chill through their bodies as their hairs stood on end.

Bai Qi suddenly raised a hand and roared, causing a powerful aura to explode out from him.

Boom!!

A gigantic blood-red star, bringing with it immense might, slowly descended. The blood-red starlight and the blood-red pillar of light fused together, seeming to dye the entire world blood-red, causing countless people to tremble in fear.

“Condense!” Bai Qi once again yelled as a resplendent mote of light appeared within the blood-red pillar of light, seeming to devour all of the blood-red light, causing the blood-red pillar of light and the blood-red starlight to fade away.

A blood-red, crystalline City Lord Seal, giving off a brilliant blood-red light and boundless killing intent, appeared in the air – this was the Capital City’s City Lord Seal.

The pure killing intent that it gave off caused even Zhao Fu’s hairs to stand on end; that was how frightening it was.

The City Lord Seal slowly descended into Bai Qi’s hand and fused into his body. A bloodthirsty aura exploded out, and now, Bai Qi’s aura was only weaker than Zhao Fu’s by a bit, making Zhao Fu feel quite surprised.

Following this, Zhao Fu looked at the Seven Kill Capital City’s stats and found that it could rival an Epic grade City. The people it spawned would have the Slaughter bloodline, and it would be possible for them to face ten ordinary people each with this bloodline. It was a bloodline even more powerful than the Ice and Fire bloodlines.

Zhao Fu smiled in satisfaction and went over to find Black Forest and Moon Wolf. The two of them were play-fighting near a Den, and seeing that Zhao Fu had arrived, they quickly went over and affectionately rubbed against him. Zhao Fu smiled and patted their heads before having them stand in front of him.

Zhao Fu wanted to try out the secret technique that the golden dragon had told him about, which was to use the useless City Lord Seals to fuse with the beasts’ bodies, making them even stronger.

Black Forest and Moon Wolf obediently stood where they were, looking at Zhao Fu curiously and wondering what he was going to do.

Zhao Fu took out two City Lord Seals and performed different hand seals as taught by the golden dragon. The two City Lord Seals floated in the air, giving off different lights.

“Accept them and don’t fight back. Otherwise, it’ll be very painful and the fusing will fail,” Zhao Fu said.

The two beasts stood and nodded expectantly. They felt that their master was going to do something good for them.

Seeing that they were ready, Zhao Fu pointed, and the two City Lord Seals turned into two rays of light and shot into Black Forest and Moon Wolf's heads. After the City Lord Seals entered their heads, they gave off a monstrous attractive force, causing Black Forest and Moon Wolf's bodies to visibly wither.

Moreover, their eyes became completely lifeless as if their souls had been sucked away. Right now, they looked like two dried corpses.

The two City Lord Seals absorbed a lot of flesh and blood and Black Forest and Moon Wolf's souls. They gradually became a blood-red color and gave off blood, covering their bodies and forming balls of blood.

Zhao Fu waited by their side because fusing often took a while.

Five hours later, Zhao Fu felt that he could not just keep waiting here, and he prepared to go deal with some other things before coming back to take a look.

At that moment, the two balls of blood gradually disappeared, revealing two orbs that were as big as chicken eggs. They seemed to be made of jade, and one was silver while the other was green.

The silver one started to give off boundless silver light, while the green one started to give off immense green flames, and the two beasts' auras became stronger and stronger.

Boom! Boom!

The two beasts' bodies gave off a massive amount of power, and the two jade eggs started to rapidly grow. In the end, they became two massive beasts that were 100 meters tall – their eyes now had life in them again, and feeling the power within their bodies, they heaven-shakingly roared.

Zhao Fu could sense that this immense strength could rival that of the Stage 5 Wyverns, and he smiled. Of course, this was not their final strength either.

After fusing a City Lord Seal into them, the City Lord Seal would become stronger as they became stronger. In the future, it was possible for them to surpass boss monsters. Zhao Fu currently still had another 3,500 or so City Lord Seals, and he would be able to develop an army of despair-inducing beasts

Chapter 768: God-Sealing Space

Right now, Zhao Fu only had one type of powerful beast, which were the Wyverns. The mature Wyverns had Stage 5 strength, and with their powerful bodies, if he gave them City Lord Seals, the effects would be extraordinary.

However, while Wyverns could destroy some lower-grade creatures, they would be completely suppressed when facing higher-grade creatures. After all, Wyverns were the lowest grade of Dragons, and all of their stats were quite ordinary; there was nothing exceptionally strong about them.

By now, Zhao Fu no longer saw them as his biggest asset, and he now planned to use these City Lord Seals to help them evolve. While fusing, it was quite likely to go through mutations.

However, they would have to do this in a place with a large amount of attribute-type energy. Zhao Fu immediately thought of the world of fire and ice in Gloomy Jungle, which would likely be able to satisfy this.

After going through mutations, the Wyverns would definitely become much stronger. Even if they could not compare to true Fire Dragons or Ice Dragons, they would definitely be a lot stronger than ordinary Wyverns and would help the Wyverns continue to evolve.

By now, Great Qin had 1,527 Wyverns, and 1,200 of them were capable of fighting.

Black Forest and Moon Wolf, who were 100 meters tall, Zhao Fu smiled and had them go back to their normal forms. Their 100 meter tall bodies were their battle forms, and they were able to go back to their original sizes as they pleased.

After going back to their normal sizes, the two of them affectionately played with Zhao Fu. Soon, another figure leaped into Zhao Fu's embrace, a chubby white cat.

Fat Cat had been with Asani, but after sensing the changes in the two beasts, it had quickly hurried over. It leaped into Zhao Fu's embrace, looking at him with watery eyes, begging for the same treatment.

Zhao Fu smiled and sent a City Lord Seal into its body before placing it on the ground so that it could slowly fuse with the City Lord Seal.

Following this, Zhao Fu led 1,200 Wyverns to Gloomy Jungle. The sight of a thousand dragons flying together was quite a rare and majestic sight. Their massive might caused beasts below on the ground to all lie on the ground, trembling in fear and submission.

However, the Black Forest Horses were not as affected by the dragon's might that the Wyverns gave off. Their Den now had a trace of divinity, and they all had a faint trace of divine power, giving them more power and resistances than ordinary creatures.

After reaching the depths of Gloomy Jungle, Zhao Fu had 600 Wyverns stay in the icy region and 600 Wyverns enter the high-heat region before sending 1,200 City Lord Seals into their bodies.

Their bodies withered, and their eyes became lifeless as all of their flesh and blood, as well as traces of icy air and flames, were absorbed into their bodies, causing their bodies to be covered with a layer of ice or fire.

Their transformations would take some more time, as they would also be mutating and gaining attributes as well. Zhao Fu left immediately and came back three days later. The Wyverns had completely transformed, looking incredibly different.

Their gray scales had disappeared and were replaced by icy or fiery scales. They were also 150 meters long and were either incredibly cold or incredibly hot. Their auras were also much more powerful, and their strength was around Stage 6-8 to 6-9. Now, they would not be at a disadvantage even when facing Stage 7 dragons.

This method of increasing their strength by using City Lord Seals was simply too powerful. However, under normal circumstances, who would be willing to destroy a Great City and give up on a City Lord Seal?

Now, Zhao Fu had around 2300 City Lord Seals left. He then thought of another powerful creature, which was the Corpse Soul Commander. Corpse Soul Commanders also had Stage 5 strength, and with their Corpse Soul Power, they were stronger than normal Stage 5 soldiers.

Zhao Fu wondered what would happen if he fused City Lord Seals into them; seeing the effects the City Lord Seals had on the creatures so far, Zhao Fu felt quite curious to see what they would do to the corpse Soul Commanders.

Zhao Fu currently had 7,400 Corpse Soul Soldiers and 137 Corpse Soul Commanders. He called over the Corpse Soul Commanders, who were 6 meters tall, had gray skin, and had powerful bodies. Their eyes were blood-red, filled with violence and bloodlust. Any ordinary person standing in front of them would feel terrified.

Zhao Fu stretched out his hand, and 137 unusable City Lord Seals appeared around him. He pushed his hand forwards, and the City Lord Seals turned into rays of light that shot into their bodies.

“Roar!! Roar!! Roar!!” three hours later, roars tore through the sky, and 137 monsters that were 70 meters tall appeared. The Corpse Soul Commanders all looked incredibly terrifying – their bodies gave off gray auras, and their faces looked incredibly savage. The single horn on their heads and their blood-red eyes made them look like devils.

Their strength now reached Stage 7, and it would be no problem for them to fight the City Lord of a Basic City.

The strengthening of the Wyverns and Corpse Soul Commanders instantly boosted Great Qin’s strength by a terrifying amount. Now, Zhao Fu almost felt like sweeping through the entire northern side of the Midland Continent.

However, Zhao Fu’s rational side told him to stay calm. After all, there were around 2,000 regions, meaning there would be at least 7,000 City Lords and 600 million Stage 1 soldiers to deal with.

Zhao Fu still had around 2,200 City Lord Seals. Zhao Fu did not want to use them on ordinary Corpse Soul Soldiers, and there were not any more mature Wyverns. As such, Zhao Fu decided to keep them until he had more Wyverns and Corpse Soul Commanders.

These unusable City Lord Seals were incredibly rare and difficult to obtain. After all, one had to destroy a Great City to obtain such a City Lord Seal. Since they were so valuable, Zhao Fu did not want to waste a single one.

A few days later, the poisoned ice had become a gigantic island, and Akhenaten and many of the Southern Continent factions had built a City there, making it so that the Fish Scale people did not dare to invade anymore.

After all of the poisoned water had been drained, the ground underneath was quite gray, and some of the poison still remained. All of the plants there had withered to death, and 400 regions had become regions of death without a single trace of life within them.

Although it looked bad, the world had self-regeneration abilities, so the 400 regions would eventually recover.

Zhao Fu went to the place where the black spear was, which was where he had sealed the eight aquatic beast kings. He had come here to try to subdue them.

The aquatic beast kings were incredibly powerful, and if they submitted, Great Qin's strength would once again be greatly boosted.

Back then, Zhao Fu had used up half of Great Qin's Fate, so he had to make up for it somehow. Otherwise, it would be a great loss.

Zhao Fu gripped the black spear, and the 1,000 meters wide Emperor's Seal appeared. Zhao Fu's body slowly sank downwards into the ground. He arrived at a massive sealed region, called the God-Sealing Region, one of the King's Crown's powers.

Within the sealed region, the eight aquatic beast kings were bound by chains and suspended in the air. When they saw Zhao Fu, they immediately started to struggle and furiously roar.

Chapter 769: 27 Regions

Over the next few days, Zhao Fu stealthily made a map of the locations of system main cities before starting his operation. Great Qin now had 500 or so City Lords of Great Cities, and in order to kill the Fish Scale City Lords as quickly as possible, he put 20 City Lords in a team. They could either quickly kill a single City Lord and relocate the system main city or split into two teams of 10 City Lords to simultaneously attack two system main cities.

Each of the teams was responsible for conquering the system main cities in a region. After doing this, they could not be greedy and had to return to the human world immediately, or they could be in danger.

With the 500 or so City Lords, Zhao Fu made 25 teams that could destroy 25 regions. This way, he would not only be able to obtain a large number of cities but also many Invasion Points.

In order to ensure their safety, Zhao Fu prepared many things: isolation barriers, which could temporarily stop teleportation channels to stop the word from getting out; items to hide their auras; and two Destruction Crystals each in case of emergencies.

After making preparations, all of them snuck into the Fish Scale world and quietly waited. They had to all act simultaneously so that they could destroy 25 regions quickly and safely.

Once word got out, resulting in many City Lords coming over, it was possible for many of them to die. As such, they could not be careless or greedy; they had to do everything in the blink of an eye and quickly return.

Zhao Fu went near a system main city and silently waited. Zhao Fu could not afford to have his identity exposed, or he would be in great danger; he could not defend against the entire Fish Scale world. If he could not use the other City Lords' powers, if 50 or 60 City Lords attacked him together, he would not be able to deal with them.

Time gradually passed, and because this was hundreds of meters underwater, it was quite dim. However, because the system main cities all had magic formations providing light, it was always daytime there.

However, there were no creatures that were awake for the entire day without resting, so Zhao Fu was waiting until they went to rest.

Following this, the time for the operation arrived, and all of Great Qin's City Lords simultaneously attacked. Zhao Fu directly rushed towards the City Hall.

The City Lord quickly sensed Zhao Fu and woke up, feeling quite startled. However, Zhao Fu had already arrived in front of him, and his whole body was covered with his cloak so as to prevent his identity from being exposed.

The Fish Scale City Lord grabbed his reef stone spear and roared, “Who are you?”

Zhao Fu did not waste any words and rushed up, his sword giving off an immense sword light as he slashed towards the Fish Scale City Lord.

Sensing Zhao Fu’s power, the Fish Scale City Lord’s expression fell, and he exploded out with his full strength. He gripped his spear with both hands and blocked in front of him but was still sent flying. He heavily crashed against a wall, and a sword light pierced through his chest.

The Fish Scale City Lord instantly died, and his City Lord Seal floated out of his corpse. Zhao Fu grabbed it and hurried towards the City Heart. The system main city was in complete chaos right now, as the teleportation channels could not be used, and a large number of soldiers gathered at the City Hall.

Zhao Fu directly charged over to the City Heart and did not waste any time. He chose to conquer and relocate the City before turning into a black ray of light, disappearing into the distance as he headed to the next system main city.

Zhao Fu released his power and shot into the City Hall of another system main city. A General was the first to discover Zhao Fu, and he yelled as he rushed over. Zhao Fu disdainfully slashed out, cutting that General’s body into multiple parts.

Back then, Zhao Fu could not defeat even a single General and almost died trying to fight a City Lord even after using his Nation Armament. However, things were completely different now. Let alone Generals, even City Lords could barely put up a fight against him.

After killing this city’s City Lord as well, Zhao Fu quickly conquered and relocated this system main city before turning into a ray of black light and disappearing.

In just a short while, Zhao Fu had destroyed four system main cities and obtained a Region Treasure Chest. Now that his task was complete, he knew that he should just leave, but his body headed towards a second region.

In fact, Zhao Fu wanted to throw down a Destruction Crystal to kill at least 300,000 people. Killing any Fish Scale people gave rewards, regardless of whether they were players or indigenous residents.

Back then when the Fish Scale people had flooded 400 or so regions and killed all living creatures, they would have obtained an astronomical number of Invasion Points. As such, Zhao Fu also wanted to blast these Fish Scale people.

However, Zhao Fu realized that the shockwaves from the Destruction Crystals would be too big and would alert many other City Lords, causing their plan to fail.

A while later, Zhao Fu finished destroying the three system main cities of the second region. Even though he knew it was best to not be greedy, he could not help but fly towards the next region.

After obtaining seven system main cities so quickly, Zhao Fu simply felt too excited.

After destroying two system main cities in the third region, Zhao Fu quickly escaped because he could sense many dangerous auras heading towards the third region. He had been discovered.

Hundreds of City Lords furiously chased after Zhao Fu, but none of them were able to catch up to him. In the end, Zhao Fu was able to safely escape.

Following this, thousands of Fish Scale City Lords angrily stood in the sky above the island of ice. The pressure they gave off made it difficult for the ordinary people to even breathe and was incredibly terrifying.

Akhenaten quickly heard that the Fish Scale City Lords were preparing to attack the island of ice, so many of the Southern Continent's City Lords also headed over.

Neither side had the confidence to win a decisive victory against the other, so neither side attacked. The Fish Scale City Lords knew that their own soldiers could not go near the island of poisoned ice and that they were no match for the humans on land.

Even though they could survive on land and in water, they spent the vast majority of their time in the water. They were used to swimming, and if they went on land, their battle power would go down drastically; this was something that they knew clearly.

Moreover, the humans had their soldiers there to support them; if the Fish Scale City Lords rushed over, the ending would be just like before. They had mostly come to deter the humans from doing such a thing again and to show that they were not people who could be easily bullied.

After all, both sides were enemies, so they could not say much about the humans suddenly attacking them.

After facing off in a stalemate for a while, the Fish Scale City Lords finally left. The Southern Continent City Lords all felt quite confused and did not understand what this was all about.

Soon, they heard from some scouts that an unknown human faction had wiped out 27 regions in just a short while.

This news shocked all of the Southern Continent City Lords and players. None of them had any thoughts about invading the Fish Scale world, and they had never expected a faction to be able to destroy 27 regions in such a short amount of time. If that faction had had a bit more time, it would have simply been terrifying.

Akhenaten's expression became grim. Without even thinking, he knew who had done this; Great Qin's strength was simply horrifying.

Chapter 770: 27 Regions

Over the next few days, Zhao Fu stealthily made a map of the locations of system main cities before starting his operation. Great Qin now had 500 or so City Lords of Great Cities, and in order to kill the Fish Scale City Lords as quickly as possible, he put 20 City Lords in a team. They could either quickly kill a single City Lord and relocate the system main city or split into two teams of 10 City Lords to simultaneously attack two system main cities.

Each of the teams was responsible for conquering the system main cities in a region. After doing this, they could not be greedy and had to return to the human world immediately, or they could be in danger.

With the 500 or so City Lords, Zhao Fu made 25 teams that could destroy 25 regions. This way, he would not only be able to obtain a large number of cities but also many Invasion Points.

In order to ensure their safety, Zhao Fu prepared many things: isolation barriers, which could temporarily stop teleportation channels to stop the word from getting out; items to hide their auras; and two Destruction Crystals each in case of emergencies.

After making preparations, all of them snuck into the Fish Scale world and quietly waited. They had to all act simultaneously so that they could destroy 25 regions quickly and safely.

Once word got out, resulting in many City Lords coming over, it was possible for many of them to die. As such, they could not be careless or greedy; they had to do everything in the blink of an eye and quickly return.

Zhao Fu went near a system main city and silently waited. Zhao Fu could not afford to have his identity exposed, or he would be in great danger; he could not defend against the entire Fish Scale world. If he could not use the other City Lords' powers, if 50 or 60 City Lords attacked him together, he would not be able to deal with them.

Time gradually passed, and because this was hundreds of meters underwater, it was quite dim. However, because the system main cities all had magic formations providing light, it was always daytime there.

However, there were no creatures that were awake for the entire day without resting, so Zhao Fu was waiting until they went to rest.

Following this, the time for the operation arrived, and all of Great Qin's City Lords simultaneously attacked. Zhao Fu directly rushed towards the City Hall.

The City Lord quickly sensed Zhao Fu and woke up, feeling quite startled. However, Zhao Fu had already arrived in front of him, and his whole body was covered with his cloak so as to prevent his identity from being exposed.

The Fish Scale City Lord grabbed his reef stone spear and roared, "Who are you?"

Zhao Fu did not waste any words and rushed up, his sword giving off an immense sword light as he slashed towards the Fish Scale City Lord.

Sensing Zhao Fu's power, the Fish Scale City Lord's expression fell, and he exploded out with his full strength. He gripped his spear with both hands and blocked in front of him but was still sent flying. He heavily crashed against a wall, and a sword light pierced through his chest.

The Fish Scale City Lord instantly died, and his City Lord Seal floated out of his corpse. Zhao Fu grabbed it and hurried towards the City Heart. The system main city was in complete chaos right

now, as the teleportation channels could not be used, and a large number of soldiers gathered at the City Hall.

Zhao Fu directly charged over to the City Heart and did not waste any time. He chose to conquer and relocate the City before turning into a black ray of light, disappearing into the distance as he headed to the next system main city.

Zhao Fu released his power and shot into the City Hall of another system main city. A General was the first to discover Zhao Fu, and he yelled as he rushed over. Zhao Fu disdainfully slashed out, cutting that General's body into multiple parts.

Back then, Zhao Fu could not defeat even a single General and almost died trying to fight a City Lord even after using his Nation Armament. However, things were completely different now. Let alone Generals, even City Lords could barely put up a fight against him.

After killing this city's City Lord as well, Zhao Fu quickly conquered and relocated this system main city before turning into a ray of black light and disappearing.

In just a short while, Zhao Fu had destroyed four system main cities and obtained a Region Treasure Chest. Now that his task was complete, he knew that he should just leave, but his body headed towards a second region.

In fact, Zhao Fu wanted to throw down a Destruction Crystal to kill at least 300,000 people. Killing any Fish Scale people gave rewards, regardless of whether they were players or indigenous residents.

Back then when the Fish Scale people had flooded 400 or so regions and killed all living creatures, they would have obtained an astronomical number of Invasion Points. As such, Zhao Fu also wanted to blast these Fish Scale people.

However, Zhao Fu realized that the shockwaves from the Destruction Crystals would be too big and would alert many other City Lords, causing their plan to fail.

A while later, Zhao Fu finished destroying the three system main cities of the second region. Even though he knew it was best to not be greedy, he could not help but fly towards the next region.

After obtaining seven system main cities so quickly, Zhao Fu simply felt too excited.

After destroying two system main cities in the third region, Zhao Fu quickly escaped because he could sense many dangerous auras heading towards the third region. He had been discovered.

Hundreds of City Lords furiously chased after Zhao Fu, but none of them were able to catch up to him. In the end, Zhao Fu was able to safely escape.

Following this, thousands of Fish Scale City Lords angrily stood in the sky above the island of ice. The pressure they gave off made it difficult for the ordinary people to even breathe and was incredibly terrifying.

Akhenaten quickly heard that the Fish Scale City Lords were preparing to attack the island of ice, so many of the Southern Continent's City Lords also headed over.

Neither side had the confidence to win a decisive victory against the other, so neither side attacked. The Fish Scale City Lords knew that their own soldiers could not go near the island of poisoned ice and that they were no match for the humans on land.

Even though they could survive on land and in water, they spent the vast majority of their time in the water. They were used to swimming, and if they went on land, their battle power would go down drastically; this was something that they knew clearly.

Moreover, the humans had their soldiers there to support them; if the Fish Scale City Lords rushed over, the ending would be just like before. They had mostly come to deter the humans from doing such a thing again and to show that they were not people who could be easily bullied.

After all, both sides were enemies, so they could not say much about the humans suddenly attacking them.

After facing off in a stalemate for a while, the Fish Scale City Lords finally left. The Southern Continent City Lords all felt quite confused and did not understand what this was all about.

Soon, they heard from some scouts that an unknown human faction had wiped out 27 regions in just a short while.

This news shocked all of the Southern Continent City Lords and players. None of them had any thoughts about invading the Fish Scale world, and they had never expected a faction to be able to destroy 27 regions in such a short amount of time. If that faction had had a bit more time, it would have simply been terrifying.

Akhenaten's expression became grim. Without even thinking, he knew who had done this; Great Qin's strength was simply horrifying.
