Chapter 31 The whereabouts of the jade card

In the afternoon, the snow gradually increased, and soon the dry branches were bent over, and a thick layer of snow was piled up on the ground.

Yun Chang was wearing small leather boots, and stepped on the yard with a strange expression, listening to the "creaky" sound of the snow being trampled, and she was so happy that she couldn't close her mouth for a long time.

Gu Shinian stood under the eaves and measured the size of the windows, intending to cut some glass from the shopping mall and replace the slightly yellow and unwarm window paper.

After measuring the size, seeing that Yunshang was still playing wildly in the yard, Gu Shinian stepped over a few steps, picked up Yunshang's collar, and directly slipped the person into the house.

"When you play in the future, you should pay attention to the time yourself. In this weather, you can't stay outside all the time."

Without waiting for Yun Chang to speak, Gu Shinian took her hand again and said, "Let's go, it's almost time, advanced space to feed medicine."

Gu Shinian had already begun to exercise Yunshang's mental strength. After entering the space, he first asked Yunshang to feed Widow Wang with medicine, and then let her stand outside the building, using his consciousness to remove the glass on the counter of the pharmacy on the first floor, and using his consciousness Cut the glass to size on the window.

While Yun Chang was busy cutting the glass, Gu Shinian looked at the space carefully again, and soon discovered something was wrong.

If you don't look at the building, the topography of the entire space is exactly the same as the jade plaque that Yunshang lost, with a concave and slightly fatter top, and a flat lock on the bottom.

The extra building is at the place where the jade tag hangs, filling the depression above the lock-shaped jade tag, making the space into a trapezoid with a wide top and a narrow bottom, and there is no trace of the lock at all.

Gu Shinian realized that this space was probably the jade tablet that Yunshang lost.

It's no wonder that Yun Dachuan and Widow Wang couldn't find the jade tablets everywhere. The jade tablets turned into space and melted into the body of the original owner. How could they find them.

Thinking about it now, Yun Dachuan's death is really wrong.

"Ah Chang, come here."

Gu Shinian called Yun Chang and showed her the spatial terrain, and Yun Chang reacted at once.

"Second brother Gu, this is... my jade card?"

Gu Shinian didn't speak, just nodded slightly.

Yun Chang remembered that Widow Wang had said that when the original owner was dragged off the kang by the eldest grandson of the Wang family, he shed a lot of blood. The jade plaque should have been stained with blood at that time, and then turned into a space.

In this case, the loss of the jade card at the beginning can be explained.

"Second brother Gu, what the hell is going on here? Is the jade card I used before and the jade card that became the space the same one? Also, how did this store get into the space? "

The question that Yun Chang asked was also the question that Gu Shinian wondered.

Thinking of the strong connection between him and the store, the feeling that he could vaguely control the space, and the bloody appearance of him and Yunshang hugging each other during the earthquake, Gu Shinian was very suspicious. They will travel together because the blood on the two people has touched the jade card on Yunshang's body.

Seeing Yun Chang's small brows furrowed tightly, Gu Shinian smiled and tapped the center of her forehead:

"Okay, whether it's the same jade card or not, as long as you know it's not lost, as for other things, there's no need to get to the bottom of it."

Yun Chang rubbed his brows, wrinkled his little nose in dissatisfaction at Gu Shinian, turned around and continued to cut glass with his mental power.

Through exercising, Yunshang found that her mental power was getting stronger and stronger. Last time, she had a headache and couldn't stand up just by moving the spring eye. After the exercise, she changed the spring eye to another position, and her head was only slightly heavy.

Yunshang also found that she can now observe the outside world about 20 meters in the space, and can also collect things within 10 meters of the outside world in the space.

The whole space has become more and more spiritual.

After cutting the glass, Yun Chang used her consciousness to order Widow Wang to turn over the ground in the space, and then she took Gu Shinian out of the space.

Feeling that the connection between himself and the building was cut off again, Gu Shinian breathed a sigh of relief, pulled Yun Chang over, and said with a serious face:

"Ah Chang, if you have to admit someone into the space in the future, you must kill him as soon as possible, do you understand?"

Thinking of the increasingly close connection between him and the building after he entered the space, and the vague idea that he could turn back the customer at any time and take the space as his own, Gu Shinian felt a wave of fear in his heart.

He is worried that there are people in this world who are like him. After entering the space, they have the ability to take the space from Yunshang's hands.

You must know that the only person who can be brought into the space by Yunshang, except for him who is trustworthy, is only the enemy that Yunshang can't deal with when encountering danger, and can only be locked in the space.

When he thought that the enemy who entered the space would probably take away the space and completely control Yunshang in the space, Gu Shinian had a cold sweat on his back, and he didn't dare to imagine it any longer.

Yun Chang didn't know what Gu Shinian was worried about, and looked puzzled, "Second brother Gu, why did you want to kill him? Isn't it bad to be locked in a space as a coolie?"

"No, you can also use your consciousness to plant the land in the space. Except for the widow Wang, you can no longer keep living people in the space."

Seeing that Yun Chang was still puzzled, Gu Shinian had no choice but to make it clear.

"A-Shang, have you noticed that your connection with space is not particularly close. At least, I can take space away from you. Since I can do it, how can you guarantee that others won't be able to do it? ?"

Yun Chang's eyes were rounded, and she was both surprised and scared. If Gu Shinian didn't remind her, if she really met such a person in the future, she would not even know how to die.

No, she is very likely to be controlled, not even to die!

Seeing that Yun Chang was frightened, Gu Shinian hurriedly pulled her over and slowed down his voice:

"You don't have to be too nervous. I can feel this way. Maybe it's because of the blood on the jade plate during the earthquake. But to be on the safe side, you still have to remember my words and try not to close the space in the space. alive."

Yun Chang nodded, looked up at Gu Shinian, and said in a low voice:

"Second brother Gu, can you separate the space from the store? If not, you can put the space there..."

"Don't think about these unreliable things. This space is yours, you can keep it well and protect yourself. Besides, if I need something, I can ask you directly. Don't worry, I won't wrong myself. ."

Gu Shinian said that he loosened his cloud clothes, bent down and put the glass on the kang, took off his shoes and put on the kang, tore off the window paper a few times, picked up the hammer and the nails rattled.

Yunshang didn't speak, her consciousness was immersed in the space, and she wanted to try to see if the store and the space could be separated, but until the cold sweat broke out on her head, the connection between the space and the store was getting closer and closer, and there were even signs of integration into the space on the second basement floor. Frightened, Yun Chang quickly pulled out of consciousness.
