Chapter 71 The Big Bang

Yun Chang's face turned pale in an instant, and she sat on the ground with her buttocks on the ground, pushing Gu Shinian with her hands, and she kept shouting to make Gu Shinian run!

Gu Shinian was much calmer, looked up and looked around, his eyes locked on the north of Linyang, and he looked at the black and yellow smoke slowly rising in the air from a distance.

"Ah Chang, don't be afraid, it's not an earthquake." Gu Shinian picked up Yun Chang and paused, "It's... a big explosion."

Yun Chang reacted and followed Gu Shinian's line of sight, just like the surrounding crowd, staring blankly at the smoke rising from the sky.

Suddenly someone next to him screamed loudly:

"No! It's an accident in the mine!!!"

This sentence seemed to open the valve, and the surrounding crowd panicked instantly. Some people hurried to the end of the street, some people sat on the side of the street with no faces, tears kept shedding tears, and some people ran into the hospital and rushed Go to the top of the building, want to stand a little higher, try to look as far as possible, and then a little further.

Yun Chang stared blankly at all the things in front of her, she always felt a little illusory and unreal, and her heart was full of all kinds of questions.

Big bang?

Where did the big bang go?

Okay, how could there be a big explosion?

The place where the smoke rises is so far away, how can even the earth shake a few times here?

But soon, the surrounding discussions solved her doubts.

"It's over! Listening to this movement, it's not like the mine collapsed, it's like an explosion."

"The hospital can be shaken so far away from the coal mine. What will happen to the mine?"

"How can it explode? Could it be the enemy's special work?"

"The matter is estimated to be serious. If one or two open-pit coal mines collapse, people can still pull them out. If there is a big explosion... I am afraid that all the mines in the mine will collapse..."

"It's over! At this point, the workers have all gone into the mine!"

"...My third son is also going to mine today...No, I, I have to go and see."

"Comrade, come up quickly, I have a bicycle, I will take you there faster!"

...

Yun Chang's heart sank immediately, and there was a depression in her heart, but she didn't know how to express it.

As the people around said, with such a big movement, all the mines in the coal mine will collapse. It is working time now, and those workers who have gone out of the mine will probably be buried in the mines.

At this stage, coal miners are the hardest and most tiring type of work in Linyang. Many of the coal used by households in the country are carried by coal miners from the mine in bamboo baskets.

Because the work is too hard and too dangerous, people with a little knowledge will not choose to go to the coal mine to work.

And those workers who go to the mines are mostly young adults who have no way to find other jobs at home, or have a family waiting to support them.

It can be said that behind every coal miner is a family.

Yun Chang couldn't imagine how many families would fall into desperation because of the loss of their pillars with these two big explosions.

Gu Shinian's heart was also heavy, like a stone was pressed, he stood silent for a long time, raised his hand and stroked Fu Yunshang's head, and led her into the hospital.

"Second Brother Gu!"

Gu Shinian lowered his head and saw Yun Chang looking at him eagerly, his eyes turned red, "Second brother Gu, it will be fine, right..."

This is not so much asking Gu Shinian, but rather that Yun Chang is seeking psychological comfort for herself.

She is only five years old. In the face of such a big event, she can't do anything, and she can't help those miners' families.

Even if she has a warehouse of food.

Gu Shinian was silent for a while, then nodded hesitantly, "A-Shang, it will be fine, don't worry, there is the government..." The government will give subsidies.

But at this stage, whether it is the government or the common people, they are all tightening their belts to live. Even if subsidies are given, each household will be compensated with a little money at most, or given a little ration, which cannot fundamentally solve the plight of the families of the miners who died.

What is the subsidy enough for...

The two fell silent again.

A series of high-pitched whistles quickly sounded on the street outside. The police and the joint defense team were dispatched together, shouting martial law through a loudspeaker, and driving the crowd on the street.

Army green trucks roared past the hospital gate one by one, heading towards the coal mine.

In the hospital, doctors and nurses shouted to patients and their families to go back to the ward immediately and not to walk around. Many doctors and nurses hurried out of the hospital building with medical bags and gathered at the gate of the hospital.

Yun Chang saw Zhou Mingjuan behind the crowd at a glance, wearing a white coat, with a medical bag on her shoulders and her leather bag on the other, she was walking behind the crowd to the hospital gate.

"Second Brother Gu, these doctors are going to the mine." Yun Chang anxiously pulled Gu Shinian's hand, "Zhou Mingjuan will also go!"

Gu Shinian's expression suddenly became serious. If Zhou Mingjuan went to the mine, he wouldn't be able to get a recording pen today. Moreover, there was such a big accident in the mine, and the scene was chaotic. If Zhou Mingjuan's blanket was taken advantage of If you mess around, it will be a big trouble.

Not to mention whether Gu Huaiqing said any military secrets at home last night that should not be shared, that is, the recorder whose craftsmanship and technology are far superior to this era, should not be exposed to others.

Yun Chang also thought of these problems, sweating on his forehead anxiously, and his eyes kept scanning back and forth at the hospital door.

When the figure of Miss Beautiful Hand Nurse jumped into view, Yun Chang's eyes suddenly lit up, and she pulled Gu Shinian into the outpatient department with her hands. Included in space.

"Rainbow! What are you doing!"

Gu Shinian didn't expect Yun Chang to do such a thing. Standing in the space, in a fit of anger, he called out the nickname of Yun Chang's previous life together with his surname.

"Second brother, don't worry, I have a way to get the recorder back!"

Yun Chang consciously replied in the space, no longer paying attention to Gu Shinian's shouting, and turned around and ran to the door of the hospital.

Chen Mei was checking the bandage and potion in the medical bag, when a small cannonball rushed behind him, and then the white coat was grabbed by a pair of small hands:

"Sister, are you going to mine..."

"Hey, is it you girl?" Chen Mei bowed her head, seeing that the person who came was the little girl who gave her milk candy yesterday, she quickly crouched down and said, "Yes, we are waiting for the car to go to the mine. Little girl, Why did you run out alone? Now that the streets are under martial law, you don't dare to go out, so hurry back to the ward and stay there."

Yun Chang pursed her lips, tried her best to act, and squeezed out a few tears, "Sister, you take me back to the mine, my home is in the mine... My mother said it exploded, the house collapsed, and then left me to ride The car is home, I, I don't know anyone..."

Chen Mei's egg hurts.

What kind of parent is this?

If the house is going to collapse, don't you have a daughter?

Even if you are just so old, you are thrown into the hospital, and you are not afraid of losing your child?

It's just that she can't take the little girl!
