Chapter 72 Entering the Mining Area

Chen Mei looked embarrassed, "Little girl, my sister is going to the mine to save people, I don't have time to send you home, and I don't have time to take care of you..."

"Sister, I know the way, I don't need my sister to take me home, I, I can still help my sister with her work and carry her bags...Sister, you can take me home, I have a brother and a father at home, I want to go back and see Look....."

The more Yun Chang spoke, the more anxious she became, her face flushed red, tears were falling down, and the circles of Chen Mei's eyes were flushed.

Although the little girl did not dress like a child of a coal miner's family, the explosion was so violent that even the cadres in the mine might not be safe.

The little girl's mother rushed home in such a hurry, she should also be worried about the safety of her husband and son.

It's just that the enemy has not been caught yet, and the mine is not necessarily safe, so she really can't take the little girl there.

Chen Mei raised her hand to caress the top of Yunshang's head, sniffed and said, "Little girl, my sister will take you to the nurse station, how about finding a nurse sister to take care of you? You will wait for your mother to come back at the hospital..."

"Wow....."

Before Chen Mei finished speaking, Yun Chang wiped her tears and started crying, and she was out of breath in just a few seconds.

A few nurses hurried around and asked Chen Mei what happened.

Knowing that Yunshang wanted to take a ride home, a short-haired nurse pulled Yunshang away from the crowd and pushed Yunshang into Chen Mei's arms, shouting at Chen Mei like a cannonball:

"You are also confused. Who do you want to entrust your child to? How long? The explosion was so loud that her family didn't know what was going on. If something happened to the family, her mother couldn't come over and the child would eat. How to solve the problem?"

Who doesn't lack a bite to eat these days?

Entrusting your child to others is not a simple matter of adding a pair of chopsticks.

Chen Mei was stunned, squatted down and asked Yunshang, "Girl, did your mother leave you a food stamp before going home?"

"No!" Yun Chang quickly shook her head, "My mother ignored me and rode away."

Chen Mei: "..."

"Then... the mine is so big, can you really find a home?"

"Yes! If I can't find it, I'll sit next to my sister and show my sister's bag." Then I'll follow you back to the hospital!

Yun Chang didn't say the last sentence, but Chen Mei strangely understood what she meant.

Seeing that Yunshang had made up her mind to rely on her, and the surrounding nurses had no opinion, Chen Mei had no choice but to respond, "Well, I'll take you over to tell Director Zhou, and I'll be at the mine later... If you can't find your family, I'll take you back to the hospital!"

Yun Chang was moved.

Why is her beautiful lady so kind?

The last sentence is not just about returning to the hospital, Chen Mei is planning to pay for her meals.

After making up her mind, Chen Mei took Yun Chang and walked to Zhou Mingjuan. Before she could speak, Zhou Mingjuan's brows first wrinkled.

"Chen Mei, what are you doing? We are going to the mining area to save people, but we are not asking you to take your children to play..."

"Sister, you lied!"

Yun Chang suddenly interrupted Zhou Mingjuan's words, frowned and looked at Chen Mei, "We don't have such a young and beautiful director in our mine! This sister is so beautiful, like a college student, she is definitely not Director Zhou!"

Chen Mei: "..."

Zhou Mingjuan: "..."

Nurses: "..."

Chen Mei recalled what Yun Chang said about Zhou Mingjuan before, and the corners of her mouth twitched a few times.

Why is this little girl still talking about people, and talking about ghosts?

Zhou Mingjuan's expression relaxed immediately, the corners of her mouth curved, and her eyes were not as aggressive as before.

Yun Chang quickly pulled Chen Mei's hand, Chen Mei reacted, and stepped forward to tell Yun Chang's desire to take a ride to the mine.

Maybe it was Yun Chang who flattered Zhou Mingjuan before to make Zhou Mingjuan comfortable. Maybe it was because he heard that Yun Chang could find a home by himself in the past and would not cause them any trouble.

Chen Mei breathed a sigh of relief, and quickly pulled Yun Chang to stand among the nurses.

A few minutes later, a large truck with an army green canvas roof stopped at the entrance of the hospital. Zhou Mingjuan took the lead in the co-pilot seat. The rest of the doctors and nurses helped each other and quickly climbed into the truck. The car quickly headed towards the mining area. drive away.

Yun Chang was sitting in Chen Mei's arms, with two meaty steamed buns behind her, and a soft cushion under her buttocks. When the car moved forward, instead of feeling bumpy, it swayed, giving the feeling of sitting on a rocking chair sofa.

From time to time, I touched the beautiful hand of Miss Nurse's sister, Yun Chang comfortably wanted to hum.

Chen Mei, on the other hand, turned her head sideways and talked to the former short-haired nurse about the big explosion, with undisguised anxiety and anger in her tone.

"When the dean talked to Director Zhou, I listened and said that the explosion range was very large and the casualties were very serious. In addition to our hospital, doctors and nurses from the military hospital were also dispatched."

"How miserable the coal miners are! Damn enemy agents, better catch them and shoot them on the spot!"

"This time, it is estimated that the city will be searched again, and I don't know how long the martial law will be."

"It doesn't matter how long it takes, as long as you can catch the enemy special..."

While listening to the two of them talking, Yun Chang looked at the scene outside through the gap of the canvas curtain. After half an hour, the car finally drove into the mining area.

When Yunshang stepped on the gray-black ground, she looked at the huge deep pit ahead, the devastated mining area that stretched for miles, and the coal miners whose faces were covered in soot and blood stained, running back and forth to save people, breathing Immediately stopped.

There were police officers at the scene, and soldiers who were urgently transferred from the military region were participating in the rescue. However, these injured coal miners had no time to bandage their wounds, and they did not care that the coal dust on the scene would infect the wounds. He kept

shouting the names of his coworkers, and desperately digging through the pile of rubble under his feet.

Outside the martial law area, some older women slumped to the ground and wept piercingly, while others rushed into the martial law area, crying their family members' names while crying, and joined the search and rescue team.

Without tools, they dig the coal ash pile with their bare hands...

The doctors and nurses from the hospital rushed into the martial law area as soon as they got out of the car, and ran to the makeshift tent with the red cross on the top where the seriously wounded were placed.

Chen Mei ran a few steps, then turned around and ran to Yunshang's side, "Girl, go home and have a look first, if there is no one at home, go to the tent with the Red Cross to find me!"

After speaking, without waiting for Yun Chang to reply, he ran to the tent area.

Yun Chang noticed that Zhou Mingjuan also carried the leather bag into the tent, paused, changed direction, and entered the martial law line.

"Girl, don't dare to go over there, there are so many people inside, it's not good to bump into you."
