

《The Mysterious CEO》

4 Grand Welcome

Lu Lan was so shocked she knows how much effort she had put to get the job in finance and management department. Although she knows if she tries this opportunity she will be able to reach where she wants to be.

After some thought process, Lu Lan replied "Ok".

Hearing Lu Lan answer Si Li lips slight curve up.

"You can start from tomorrow." Si Li said that and left the room without further discussing anything.

Next day.

Lu Lan reached Den City after 2 hours' drive. Den City is not very developed. Although the government has been putting efforts to make it develop as compared to other metro cities and because of which many companies started their factory here so as Si Corporation.

Tex Corporation is the subsidiary whose shares were purchased by Si Corporation, many shareholders were against this proposal but due to Si Li pressure, no one dares to go against him.

Now because of various issues, it is consistently going into the losses, but Si Li has confidence that Tex Corporation is going to make a profit.

Lu Lan reached the Tex Corporation gate which was blocked by labours' as they were on strike, labours' leader saw Lu Lan and immediately recognized her and gave a hint to his men.

"See new in-charge of the company is here" one of the men shouts and starts throwing eggs on hers.

Before Lu Lan would see what was happening dozen of eggs are already thrown on her.

Manager of the company saw her and immediately send bodyguards to protect her but Lu Lan stopped them and went to the stage set up near the gate.

Seeing her confident labours stopped throwing eggs on her. Lu Lan stood in the centre of the stage and hold the microphone and confidently announced "All the labours who have joined this strike are fired".

Hearing her announcement all labours were shocked, they never expected that by joining the strike instead of getting the increase in their salary they have lost their job

Even manager was so shocked by the announcement because he knows they can't afford to lose they labours, even during strike some of the labours are working after the working labours and because of which Tex corporation is paying them extra for the overtime only to complete the customers' order, even though they were delayed to complete the order but by firing all the labours they won't be able to run this company.
