

# Chapter 51 Bad Luck

Three days was too short.

But Alyssa didn't waste any time and quickly got busy.

First, she checked out the Harvey Group's situation.

What she had to do was to make sure that the information she got was consistent with the real information of the Harvey Group.

After making sure the information was consistent.

She then approached Edith Jones, a shareholder who disagreed with the asset reorganization.

Edith set up his own company three years ago. When he had the money, he started investing, and Harvey's Technology was one of the companies he invested in.

He had no real power in Harvey's Technology, but was only a shareholder and received a dividend at the end of each year.

He didn't agree to the asset reorganization because his equity might be diluted. If that happened, he would have nothing left.

Businessmen only cared about profit, and so did Edith.

The asset reorganization six months ago clearly infringed on his profits.

In fact, Edith and Liam should have settled these things in private.

It seemed that they failed to do so, which was why they made such a mess now.

It would be more difficult to settle something that had been stalled for most of the year now.

Alyssa wanted to meet Liam first. He was the key. As long as he gave enough compensation, she believed that Edith would agree to the asset reorganization.

When that happened, the problem would be solved.

Alyssa started immediately.

She called Liam's secretary and made an appointment to meet him at nine o'clock the next day.

That evening, she made Leon his usual black tea and brought it into the study.

Leon was slamming his mouse. Alyssa frowned, "What's wrong?"

"The computer is too slow. I can't read the reports."

"Let me see."

Alyssa walked over and found the computer full of plug-ins. No wonder the computer was running so slowly. Someone as busy as him probably didn't have time to clean up his computer.

"Are you in a hurry?" Alyssa looked up at Leon, "I need to clean up the computer. It might take half an hour."

"I'm in a hurry."

"Then you can use my laptop first. I'll go get it for you."

Alyssa turned around and brought her laptop to Leon, and when Leon didn't move, she looked at him curiously.

After a moment of being stared at, Leon sensed something was wrong and hurriedly got busy.

While checking the computer, she looked at the information she needed for tomorrow and quickly memorized it all.

As she read it out loud, Leon gave her a look.

Alyssa saw Leon staring at her and smiled, "Am I disturbing you? I'll keep my voice down. I'm sorry."

"Why are you investigating Harvey's Technology?"

"It's a practical exercise, an activity for the finance department. The teacher asked the whole class to participate, and everyone has a different topic." Alyssa said as she organized her papers, "Maybe I got bad luck, and the topic I received was the most difficult one."

"This is a project that was suspended six months ago. Many people were unable to reconcile Liam and Edith. How much certainty do you think you have?"

"Frankly, I'm not sure, but I'm confident. I can make an effort to give it a try."

"A lot of people have tried, but it didn't work."

"Do you believe that I can do it?"

Leon smiled and didn't say anything.

Alyssa smiled as well, "It seems that you don't believe it! That's okay. I'll figure it out myself. But let's make a bet! If I can get the Harvey Group to reorganize its assets, then the debt for equity swap will go smoothly, right?"

Leon nodded, "Yes."

"Then if I succeed, you have to buy me a meal."

"A meal?"

Leon froze!

If she could do it, he wouldn't just buy her a meal!

"Is it hard? If you don't have time, just buy me a cup of milk tea! I'm not picky. You can buy a milk tea powder and make me a cup of milk tea."

She thought that he should not have time.

So, even if he gave her a cup of milk tea, she would still be happy.

Leon found Alyssa interesting, "Okay, I'll buy you a meal as long as you can facilitate the debt for equity swap."

Alyssa nodded and noticed that Leon's computer was finished cleaning up, "Oh! By the way, your computer's system is a bit old. It's been updated for two generations now. You don't usually have time to deal with that. How about I help you reinstall a system?"

"Okay." Leon had seen Alyssa's ability to repair computers and was quite confident in her.

"Do you have any files on your computer that you want to copy away? If so, you have to copy the files away on a flash drive."

"There's nothing in my computer. You can just redo the system."

Alyssa nodded and hurried to redo the system for Leon's computer.

About an hour later, Alyssa not only finished the system, but also installed all the software Leon needed.

She quickly changed laptops with Leon.

Leon felt that his computer with the new system was not only much faster, but even the software was complete.

Alyssa saw that Leon was busy and left with her laptop in her arms. When she left, she took a look at Leon and wanted to tell him to go to bed early.

She had to study hard to help Leon.

Before that, she had to get her school work done.

Early the next morning.

Alyssa went to Harvey's Technology and met Liam successfully.

Liam looked at the student-like Alyssa and smiled, "Alyssa, I got the message from your school earlier. You can ask me anything you want to know. Edith is the problem. If you can convince Edith, then you will solve the problem. Alyssa, is there anything you can do to convince Edith?"

"I haven't gone to Mr. Jones yet," Alyssa said honestly and asked softly, "Mr. Harvey, can I ask you some questions?"

Liam nodded, "Go ahead."

"There is no doubt that a debt for equity swap will resolve your company's debt. I have studied your company's situation. As the previous proposal given by the asset management company, it is indeed the easiest way to do it. After the reorganization of the asset, you can pay back the money according to the ten-year term. The company cannot be re-listed until the money is repaid. But your company can continue to develop other projects, register other companies, and get listed again after good development."

"It seems that Alyssa knows a lot about my company."

"What I want to say is, about the asset reorganization, since Mr. Jones does not agree, have you talked to him privately? Is there any other way to solve this problem privately? Mr. Harvey, with all due respect, it would be most harmful to your company if you go on like this, what do you think?"

"We have discussed this privately. Edith asked me to compensate him, but now Harvey's Technology is in arrears. I don't have the money to pay him now. He is really greedy. Before, I said I would give him an IOU, but he was not satisfied with it, so this thing has been delayed until now."

"I understand, Mr. Harvey. Then I'll leave you alone. I'll go and meet Mr. Jones."

Alyssa turned around and left.
