### #Chapter 21 - Read Top Student: Experience Infinite Occupations Chapter 21

#### Chapter 21: Picnic Plans

In Li Chengqian's home, Li Tianlan and Chen Li sat opposite each other.

"Old Li, Huang Jingjing called me just now to tell me something." Huang Jingjing was Jian Qingli's mother.

"Oh, what did Huang Jingjing say to you again?" Li Tianlan frowned. He didn't like Huang Jingjing. Every time Huang Jingjing called Chen Li, she was either showing off Jian Qingli's results or talking about Li Chengqian's results.

It often made the two of them very uneasy.

Chen Li said worriedly, "Huang Jingjing said that Tianyi High School is about to hold a second provincial joint mock exam. The school management is paying close attention to this matter and has come up with a plan."

"In this exam, the bottom 100 students of Tianyi High School will be put together to form a new class."

"This class will be full of mischievous students, and the teachers will be those inexperienced ones who have just joined the workforce."

"You know our son's results. He will definitely be assigned to the Progressive class." Chen Li's face was filled with worry.

When she contacted the teacher initially, she was told that Li Chengqian had been studying very seriously these few days. She was still secretly pleased, but in the blink of an eye, she heard the bad news from Huang Jingjing.

If he was assigned to the Progressive class, without a familiar teacher and learning environment, surrounded by mischievous students, it would take a miracle for Li Chengqian to continue maintaining this learning spirit!

"Old Li, think of a way to see if it's possible for your son to stay in his current class." Chen Li was especially anxious, and was hoping that Li Tianlan would have a way.

Li Tianlan frowned. "What's wrong with this school? They should be focused on helping students improve their grades at this critical moment of the university entrance examination. Why are they planning to reassign classes at a time like this? They should have their heads checked!"

"When our son comes back, we have to give him a prep talk. Even if he gets assigned to the Progressive class, he has to persevere and keep studying hard."

"Old Li, your son's future is at stake! Think hard, surely you can find a way." Chen Li looked at Li Tianlan expectantly.

"I'm just an ordinary person, what can I do?" Li Tianlan smiled bitterly. He had already gone through the people he knew in his mind.

Crack!

"Dad, Mom, I brought back some pea pods. How about we stir-fry these for dinner tonight?" After Li Chengqian went straight into the kitchen to put down the two bags of pea pods.

"Dad, Mom, what's wrong? Why aren't you saying anything?" Li Chengqian put down the bags and walked to the living room. He saw the two elders looking very solemn.

Li Chengqian was stunned. He carefully recalled what had happened in his previous life. Other than the Peach Blossom Mountain the next day, there was indeed nothing major happening at this time.

After confirming that nothing particularly bad would happen, Li Chengqian finally relaxed.

"What else could it be? It's about Tianyi High School's class reassignment..." Li Tianlan said somewhat dejectedly.

"You guys already know about the second joint mock exam?" Li Chengqian said in surprise. He was prepared to keep this matter from his parents because once his parents found out, they would definitely be very worried about him. They would also think of all ways to let him stay in his current class.

In his previous life, his parents had done this. However, after putting in so much effort and losing all their face, Li Chengqian still got reassigned to the Progressive class in the end.

"Yes, your Auntie Huang told us." Chen Li had a bitter expression.

Looking at the two elders, one was bitter and the other was depressed, he immediately understood why the two elders had such expressions.

"You guys are worried that I will be assigned to the Progressive class, right?" Li Chengqian didn't know whether to laugh or cry. With his current results, he would never be assigned to the Progressive class.

"Yes!" Chen Li and Li Tianlan were both sullen .

"The two of you don't have to worry. I won't be assigned to the Progressive class." Li Chengqian said firmly and confidently.

"Also, before the results are out, don't go pleading with anybody."

"You can go talk to someone if my results really turned out to be bad."

"Are you really confident?" A mother knows her son best. Li Chengqian's confidence was genuine. Moreover, Li Chengqian had never lied to her since he was young.

"I'm confident! Just wait and see. I'll definitely give you guys a surprise." Li Chengqian smiled confidently.

"Alright! Mom will wait for your surprise." Chen Li hesitated for a moment before nodding.

Chen Li temporarily put aside her anxiety and hurriedly ran into the kitchen. "Son, why did you buy so many pea pods? How much is a catty? Have you been shortchanged?"

Upon closer inspection, the two bags of pea pods were both verdant and plump. The pea pods were so tender that water could be squeezed out.

She said in surprise, "Son, where did you buy these pea pods? They're so fresh."

"I met an old lady selling it on the way," Li Chengqian answered vaguely. "Mom, I'm hungry."

Immediately, Chen Li stopped caring about these details and began to cook.

The fried pea pods were quickly served on the table. Li Chengqian popped one into his mouth, and his eyes lit up.

Delicious!

The unique fragrance of the tender pea pods was so aromatic it stirred one's appetite.

"Mom, you cook so well."

A smile immediately appeared on Chen Li's face. "Eat more if it's delicious."

“Chen Li, these peas are so delicious!” Li Tianlan couldn’t help praising her after taking two bites.

“Is it really that delicious?” Chen Li picked up a piece and placed it in her mouth. Then, she was instantly conquered by the natural and fresh taste.

It didn’t take long for the family of three to finish the big bowl of pea pods.

“Honey, let’s bring some of these peas pods for our picnic tomorrow, we can roast them there. These pea pods that our son bought are the best I’ve eaten.” Li Tianlan rubbed his bloated stomach.

“Alright!”

“Son, our family, Aunt Huang’s family, and Ding Ling’s family have agreed to go to Peach Blossom Mountain for a picnic tomorrow. We’ll leave at eight in the morning. You should sleep early tonight. Don’t be late.” The three families had discussed the picnic a few days ago, as a means to help the three students destress.

“Peach Blossom Mountain?”

“In my previous life, because of my grades, my parents were mocked by Aunt Huang on Peach Blossom Mountain. I got upset and went for a walk around the mountain, and because I was preoccupied thinking about my studies, my father accidentally fell and injured his leg.” Recalling the situation at that time, Li Chengqian felt like kicking himself.

He was a scum in his previous life. He only had eyes for Jian Qingli and didn’t even care that his father was injured.

...

“Indifferent to the people who care about you, attentive to the people who ignore you!” Recalling his behavior in his previous life, Li Chengqian couldn’t face himself.

“In the past, you guys have always been protecting me. From today onwards, I’ll protect you guys.”

“This time on Peach Blossom Mountain, I definitely won’t let any of you get hurt. I won’t let anyone hurt you!” Li Chengqian made up his mind.

“These pea pods are quite effective!” After his meal, a force surged through his body and a warm feeling spread from his stomach throughout his entire body. Even without looking at his personal interface, Li Chengqian knew that the Strength Stats he had consumed to plant the pea pods were recovering.

The effect on Li Tianlan and Chen Li were even more obvious.

Because they were ordinary people, their Strength Stats were only around 10 points. After a day's work, their Strength Stats were about 3 points. They would have been exhausted and would have only wanted to sleep and rest.

However, because of the pea pods they had eaten, the energy they had consumed was quickly replenished. Just as they finished eating, the energy they had consumed for the day had already been replenished.

His body felt warm and fuzzy.

His energy had also come back. He was invigorated and full of life!

However, the pea pods they ate were still releasing energy. The two of them felt a little warm.

"Honey, this meal?" Li Tianlan looked at Chen Li in surprise.

...

"It's not the rice, it's the pea pods! There's something wrong with the pea pods!" The rice was the same as usual. The only difference was the pea pods that Li Chengqian brought back.

"I'll go to my son's room to take a look first." Li Tianlan suppressed the horny thoughts in his heart and entered Li Chengqian's room worriedly.

When he realized that Li Chengqian was fine and had already fallen asleep, he quickly ran out. "Our son is fine. He's already asleep. Let's go to our room to talk about something..."

"Also, put the pea pods in the fridge. You can't bring them to the picnic. They are not good for children!"

## Chapter 22: Showing Off

"Li Chengqian, where did you go this morning?" The next day, Chen Li felt refreshed and her face was flushed. Then, she saw Li Chengqian, who had just come back home.

"I went out to buy some seeds. I want to try planting them." Li Chengqian raised the bag in his hand.

He went out early in the morning to the seed market and even the wet market nearby, in preparation for the picnic at Peach Blossom Mountain.

Li Chengqian recalled that in his previous life, when they were at Peach Blossom Mountain, Huang Jingjing not only talked about Li Chengqian's results, but also took out all kinds of precious ingredients to brag.

All kinds of showing off.

This was also one of the reasons why Li Tianlan was so upset.

Since he had changed his fate, his parents' fate would be completely changed too.

Li Chengqian went out to buy seeds.

He had even gotten hold of precious truffle, matsutake, and dried mushroom spore powders.

With the Farmer profession, he only needed three minutes to turn these seeds into food, regardless of geography, time, and weather.

Although they made plans to go to Peach Blossom Mountain together, the three families drove there separately. They only agreed to barbecue there together.

It happened to be the peach blossom season. On Peach Blossom Mountain, pink peach blossoms were everywhere. The spring breeze blew, and pink peach blossoms danced in the sky. It was a gorgeous sight.

There was a small lake on Peach Blossom Mountain, and the surroundings of the small lake was flat. This was Li Chengqian's destination, Peach Blossom Valley.

Jian Qingli was wearing skinny jeans and a white shirt. Her makeup was exquisite and she looked extremely beautiful. As soon as she got out of the car, she started posing and taking photos.

Ding Ling's family had yet to arrive.

"Son, go play. Jian Qingli is over there," Li Tianlan said as she stopped the car and unpacked his stuff.

In his previous life, the moment Li Chengqian reached Peach Blossom Valley, he was so mesmerized by Jian Qingli that he followed her everywhere like a lovesick dog. He didn't even help his father carry the barbecue grill down.

Naturally it won't be the same this time round.

"Dad, where do you think this barbecue grill should be placed?" Li Chengqian opened the trunk and took down the fifty-odd catty barbecue grill.

With the enhancement of Strength skill, his strength had already reached a terrifying 30 points, equivalent to three times that of an ordinary person. Although his Strength Stats had yet to be fully unleashed and was still in the process of being continuously released,

50 catties was naturally not a problem.

“Son, be careful. The grill is very heavy. I’ll go with you and let’s just place it at the side.” Li Tianlan was especially happy that Li Chengqian had helped, he was also worried at the same time.

He hurriedly ran over to help. Under his instructions, Li Chengqian quickly placed the grill.

“Our son has really grown up!” Chen Li was overjoyed when she saw this scene.

“Alright, your mother and I will do the rest. You go and play.” Li Tianlan saw that Li Chengqian wanted to help further and hurriedly chased him away. What’s left was some trivial matters that didn’t require much effort.

“Alright then, I’ll go take a look around, maybe I can catch two fish in the stream.” Li Chengqian put the bag containing the seeds in his pocket, took a small bucket, and put a few plastic bags inside. He then strode towards the forest at the edge of the valley.

There were many people in Peach Blossom Valley, but there was no one in the dense forest outside.

The dense forest was deep. Other than the tall trees, there were many small bushes on the ground. There was no path in at all.

Li Chengqian was not shocked, but delighted instead. He strenuously crawled into the dense forest.

After walking for more than ten minutes and seeing that there were no traces of human activity around, he stopped at a spot that he was satisfied with. “This place is not bad!”

He vigilantly sized up his surroundings. After confirming that there was no one around, Li Chengqian no longer hesitated. He faced a barren grassland by the stream.

Reclamation skill!

In an instant, the overgrown wasteland disappeared and four units of land with fertile black soil appeared on the side of the stream.

“Plant!”

Immediately, the seeds truffle, matsutake, ginseng and peanuts were planted.

In actual fact, the two precious ingredients, truffle and matsutake, were fungi. There were no seeds, only spores. Li Chengqian had found them in a shop selling high end ingredients.

Young sprouts instantly sprouted from the four pieces of land. Four ingredients that grew in completely different environments grew rapidly out of the ground.

A rich, natural pine fragrance instantly filled the air.

Li Chengqian wasn't surprised. He lifted the bucket and went into the stream to get water. When the notification appeared, he watered the crops directly.

...

"Li Chengqian actually ignored me!" Meanwhile, Jian Qingli was frowning unhappily. She had expected Li Chengqian to be fawning over her, like just before.

But Li Chengqian actually grabbed a small bucket and went into the forest to catch fish. This was simply unreasonable!

"Maybe I got too close to Bi Jialiang and hurt his feelings," Jian Qingli thought to herself. "I was still thinking that this picnic is a chance to mend my relationship with Li Chengqian."

"Li Chengqian isn't even willing to come and talk to me. Forget it! Let's leave it at that!" But it was impossible for her to give up on Bi Jialiang because Bi Jialiang was her hope. If she followed Bi Jialiang, she might be able to enter Divine Dragon University without having to take the test.

Therefore, no matter what, she wouldn't give up her relationship with Bi Jialiang for Li Chengqian. This was her bottom line.

Not far away from Jian Qingli, her mother, Huang Jingjing, was bringing the food items out of the car bit by bit.

"Chen Li, let me tell you, this is the most critical period for the children now. As mothers, we can't do anything else, but we have to at least ensure the children's diet and nutrition," Huang Jingjing said seriously.

Then, she took out a palm-sized red frozen lobster. "Australian lobster. It's very fresh. It costs 200 yuan per catty. It's extremely expensive. This one weighs two catties and cost me 400 yuan, but it's nutritious. The child likes it!"

Then, she took out a bag containing about ten pieces of ginseng from the car.

Each ginseng was as thick as a little finger. They looked white and tender, and were especially fresh.

“Ginseng is especially nourishing for the brain. The children are in their third year of senior high school now, and studying is especially taxing on their brains. Brain food is good for their studies.”

“It’s just that this isn’t cheap either. 10 small roots, 500 yuan!” Huang Jingjing said proudly.

...

Right on the heels of that, Huang Jingjing took out a box of beef slices with streaks of white fat visible. “Kobe beef. This box costs 480 yuan. Kobe beef is the best beef in the world. It melts in your mouth. The beef in our country can’t compare to this at all.”

After Huang Jingjing took the beef, she seemed to have suddenly thought of something and asked Chen Li, who had been silent the entire time, “By the way, Chen Li, I forgot to ask you what food you’ve prepared.”

” Pork belly, pork ribs, and frozen drumsticks. What are these? Pea pods?” Huang Jingjing didn’t wait for Chen Li to answer and walked over to the food prepared by Li Chengqian’s family. Her tone was especially exaggerated.

“Chen Li, let me tell you. It’s fine to be thrifty during normal times, but the child will only be in Grade 12 for a year. We can’t save on the child’s food this year. We adults can skimp on ourselves, but we can’t let the child suffer.”

Huang Jingjing was arrogant. After looking at the food prepared by Li Chengqian’s family, she felt especially pleased.

In addition, Huang Jingjing’s voice was very loud, attracting the attention of many people around her.

Everyone’s eyes were focused on the food they had prepared.

Immediately, the smile on Chen Li’s face became frozen. Li Tianlan, who was preparing the charcoal, also looked unhappy.

## Chapter 23: All Trash

The ingredients on the four units of land had already been harvested by Li Chengqian using his skill.

The plastic bag and the small bucket in front of him had already been filled with ingredients.

There were more than 100 matsutakes, and each of them was the size of a fist. They looked amazing, white and tender, emitting a special scent. Li Chengqian had specially checked on the internet. This type of matsutake was considered top grade. One kilogram was worth about 1,000 yuan.

One unit of land and one harvest only yielded two kilograms of matsutake.

The other bag contained white truffles. There were only five of them, each about the size of a fist. There were only two kilograms in total.

A very special scent came from the white truffle. It didn't smell all that good, and was a little like gasoline.

However, this was a world-class ingredient. The price of one kilogram was about 10,000 yuan.

Then, there was the ginseng. Five pieces of ginseng as thick as an arm. They were fair and fat with green roots and beard-like whiskers.

There was also a bag of dried bacteria.

The last bag was filled with fresh peanuts with shells intact. A particularly fresh scent emerged from the peanuts.

Li Chengqian had always liked to eat raw peanuts. After harvesting them, he immediately peeled one and popped it into his mouth.

The fragrance of peanuts immediately filled his mouth. Li Chengqian thoroughly enjoyed that fragrance.

Moreover, these plants planted through the Farmer profession were already different from the original.

Apart from their original properties, they also brought other properties.

One could restore Strength Stats after eating matsutakes and truffles, but the restoration effect was average, one catty could only restore 3 Strength points, unlike pea pods.

Ginseng was especially powerful. A mature ginseng could restore five Strength Stats and five Intelligence Stats every day for a week after eating it.

One could restore Strength Stats by eating dried bacteria, but the effect was not very obvious. One catty could only restore +1 Strength Stats.

Peanuts have new properties that restore eight Strength Stats in 24 hours.

“Plant!” A piece of ginseng sprout emerged from the four units of land, instantly covering the four pieces of black soil.

The land reclaimed by the Farmer profession was extremely fertile and was the best land. Even if he used normal farming methods instead of the skills of the Farmer profession, he would still have obtained a good harvest.

It was just that he would need the usual amount of time as ordinary farming.

“Not many people come here. I’ll plant the ginseng here and come take a look whenever I have time. According to the rules of the Master of All Professions game, if I continue to farm after the crop matures, the quality will improve and the new crops will yield stronger effects.”

Even if Li Chengqian didn’t take care of it, it would still continue to grow. The only difference was that it would grow slightly slower.

After planting ginseng in the soil, Li Chengqian shifted his gaze to the ingredients he had just harvested.

“These are all top-notch stuff! I’ll take them back and let my parents have a taste.” The corners of Li Chengqian’s mouth curled up into a smile. He picked up the bag and small bucket and began to walk back.

Struggling through the bushes, Li Chengqian returned to Peach Blossom Valley.

Coincidentally, Huang Jingjing was haughtily imparting knowledge on good quality ingredients to Chen Li.

“Chen Li, let me tell you, at Grade 12, nutritional balance is very important. The children are tired of eating the same old pork, pork ribs, and pork belly. They’re not willing to eat these anymore.”

“Seafood, top-of-the-line beef, rich in vitamins, amino acids, DHA, and other substances. Children become smarter after eating them.”

Coincidentally, the ingredients Chen Li had prepared were pork, pork belly, and pork ribs.

The only special item was the small bag of pea pods.

"Mom, I found some delicious food in the mountains," Li Chengqian deliberately said loudly. Then, he lifted the food in his hand and brought it in front of Huang Jingjing.

The smell of truffles was strong to begin with, and the smell of truffles planted using the skills of the Farmer profession was even stronger.

Huang Jingjing sniffed and immediately detected a strange smell.

This smell was like gasoline mixed with mushrooms, soil, and garlic. It was especially pungent!

"Yucks, Li Chengqian, what is that? Why is it so smelly?" Huang Jingjing moved to the side with a look of disdain.

"I was lucky. I found some truffles, matsutakes, dried bacteria, ginseng, and peanuts in the mountains!" Li Chengqian took the opportunity to separate Huang Jingjing from his mother.

"Pfft!" Huang Jingjing burst into laughter.

Peach Blossom Mountain was not a place to grow truffles, matsutakes, and ginseng. If these three precious items were here, Peach Blossom Mountain would have been flattened by the wild animals. How could these be waiting for Li Chengqian to harvest?

In addition, dried bacteria and peanuts were clearly not products of this season.

So, without even looking at the items in Li Chengqian's hand, she was certain that he was lying.

"Kid, you're talking nonsense."

"Whether it's truffles or matsutakes, they're all top-notch ingredients. A catty costs a few thousand yuan. How can you possibly find them on this mountain?"

"I don't mean to reprimand you, but it's best for children to be honest and not lie. Otherwise, it'll be difficult to change your ways in future."

Li Chengqian had a trace of anger on his face, but he did not argue with Huang Jingjing.

Therefore, Li Chengqian didn't say a word. Instead, he turned around and said to Chen Li with a smile, "Mom, you've brought pork belly and pork ribs today. These are all my favorite foods. Don't listen to other people's nonsense."

Immediately, a smile appeared on Chen Li's originally tense face.

Compared to what other people say, the most important thing was to obtain Li Chengqian's approval.

"Let's eat some peanuts first. I found them on the mountain. They're especially delicious." The peanuts obtained through the Harvest skill were clean and did not carry any soil. They carried a natural fragrance.

Li Chengqian opened the bag containing the peanuts, revealing the peanuts with the fragrance of the soil.

"Ding Ling, you guys come over and eat with us." Seeing Ding Ling bring her parents over, Li Chengqian smiled as he beckoned them over.

"Sure!" Ding Ling agreed happily and walked over with her parents.

...

"Delicious, it's too delicious. Li Chengqian, where did you find these peanuts?" Ding Ling peeled a peanut and placed it in her mouth. The rich fragrance, as well as the fresh and sweet taste unique to tender peanuts, stimulated her taste buds.

The others ate one of the peanuts skeptically. Then, their expressions instantly became the same as Ding Ling's. Everyone's eyes lit up, and they grabbed a second helping.

Huang Jingjing watched as Li Chengqian ignored her, then invited Ding Ling and her family over to eat the peanuts. Moreover, she took notice of what he said about not listening to other people's nonsense.

He was obviously talking about her.

Instantly, she became unhappy.

Seeing Li Chengqian's family and Ding Ling's family sitting together and eating with relish, she felt even more uncomfortable.

In addition, Li Chengqian actually didn't invite her to join in. This made her feel even more embarrassed.

"Frozen peanuts bought at five yuan a catty, and you're eating it so enthusiastically... We'll see if you get diarrhea later," Huang Jingjing cursed softly.

"What ginseng? I think it's just a white radish! Such a big ginseng will probably take hundreds of years to grow. One stalk will cost hundreds of thousands!" She turned to look at the ginseng that was as thick as an arm. She couldn't see it clearly because of the plastic bag, and thus it looked like a white radish to her.

As for the matsutakes that Li Chengqian mentioned, she took a closer look and said disdainfully, "These are clearly apricot mushrooms sold at the supermarkets. They've even been washed."

If these were really matsutakes, they would cost more than 1,000 yuan per catty, and this bag would cost 5,000 yuan!

...

As for the truffle that Li Chengqian mentioned, he deliberately stretched out her head to take a closer look and realized that it was white, just like a small sweet potato. "Hehe, passing sweet potatoes off as truffle, you really have the cheek to brag!"

"Daughter, does Li Chengqian like to brag?" Turning her head, Huang Jingjing asked Jian Qingli.

"I didn't realize it before, but recently I've realized that he really loves bragging." Seeing Li Chengqian ignore Huang Jingjing, Jian Qingli was also very uncomfortable because she felt that what Huang Jingjing said was the truth. Li Chengqian had no right to be angry.

"Daughter, don't hang out with such an untrustworthy person in the future. He definitely won't have a future."

"Let them enjoy the five-dollar-a-kilogram frozen food."

"Mommy will make Australian lobsters for you..." Huang Jingjing snorted and raised her head arrogantly. Be it Chen Li or the ingredients brought by Li Chengqian, they were all trash compared to her Australian lobster, Kobe beef, and ginseng.

## Chapter 24: Do You Think I Don't Understand?

After eating the peanuts for a while, Ding Ling's parents were busy setting up the barbecue grill. Li Chengqian's parents went to the lake to try fishing, while Ding Ling stayed behind to help Li Chengqian.

She went over the things Li Chengqian found on the mountain.

"Li Chengqian, what's this? Apricot mushrooms? How do you eat them?" Ding Ling opened the bag containing the matsutakes and asked curiously as she looked at the 15-cm long matsutakes.

"These are matsutakes, put them on a skewer and roast." Li Chengqian didn't know how to eat them either, but when they were by the barbecue grill, he supposed anything could be skewered and roasted. Surely it won't go wrong.

"Oh!"

After a while, Ding Ling finished skewering all the matsutakes and opened the bag containing the white truffles. Smelling the stench from the bag, she frowned. "Eh, Li Chengqian, what are these? Why is it so smelly!"

"These are white truffles. It's good stuff. They smell bad but taste good!" Li Chengqian explained.

"Is that so? I've never eaten it before. I want to have a good taste after I'm done roasting it." Ding Ling frowned and tried to get used to the special taste of white truffles.

"En, this is relatively rare. I found them all on the mountain. In a while, I'll call Uncle and Auntie over to taste it." Li Chengqian said as he placed the charcoal in the middle of the grill. After trying very hard, he finally started the fire.

"Li Chengqian, should I slice the radish?" At this time, Ding Ling took out a piece of ginseng from the bag.

"Leave it for the time being." Li Chengqian's lips twitched. This was clearly ginseng, ok? It was just a little bigger!

...

There were a lot of people in Peach Blossom Valley today. One of them was especially fat. His stomach was three times the size of an ordinary person's.

He was Huang Daliang, the owner and head chef of Tianyi Daliang Restaurant. His Western food was superb. He was undoubtedly number one in Tianyi City.

In addition to serving western cuisine, his restaurant also dealt with some precious ingredients.

"Why does it smell like white truffles?" Huang Daliang sniffed hard. The unique smell of truffles was especially strong, even more fragrant than the white truffles he had just spent a lot of money to import.

"It smells so good. Who's so rich to bring white truffles to Peach Blossom Mountain for barbecue?" Huang Daliang exclaimed. He sniffed hard again, trying to trace the source of the smell.

"This is definitely the smell of top-notch white truffles. It's even better than the batch I just bought. I have to ask this person where he bought it." Huang Daliang followed the smell and walked over. After taking a few steps, he saw Li Chengqian and Ding Ling preparing the food.

When he saw the fist-sized white truffle with uneven surfaces, Huang Daliang's breathing quickened. "This is the highest grade white truffle!"

Then, he saw Ding Ling wrap the white truffle in tin foil and place it beside the grill.

The plan was for whoever wanted to eat it later to just place it directly over the fire to roast.

"Decadence! What decadence! To barbecue a top grade white truffle. If it were left to me I would have made a luxurious feast out of it." Huang Daliang was heartbroken. It would have been fine if there was only one white truffle, but there were still nine more beside it. It looked like they would also be handled in the same manner!

If he had these truffles, one white truffle of this size could make his restaurant popular for a week.

"What a waste. No, I have to teach them how to eat white truffles." Huang Daliang couldn't help but walk toward Li Chengqian's barbecue grill.

Huang Daliang actually had other ideas. If he could buy the white truffles from Li Chengqian, that would be for the best. If he couldn't buy them, then they probably won't turn down his suggestion for him, a top western chef, to cook the white truffles for them.

After it was done, I would naturally be able to eat some.

Thinking of this, Huang Daliang almost drooled. The reason why he was a chef was because he was gluttonous and had no resistance to top-notch ingredients.

"Qingli, look, isn't that the owner of Tianyi Daliang Restaurant?" Huang Jingjing was handling the Australian lobsters when she looked up and saw Huang Daliang walking over. She hurriedly asked Jian Qingli.

The ingredients that their family ate today were all bought from Tianyi Daliang Restaurant. They usually purchase their expensive groceries from Tianyi Daliang Restaurant.

Therefore, they had met Huang Daliang a few times.

"Yes, it's him." Jian Qingli nodded and answered affirmatively.

"He's here to greet us, right?" Huang Jingjing said in surprise when she saw Huang Daliang walking straight over.

"That must be it. The Australian lobster, Kobe beef, and ginseng that we brought over for barbecue today were all from Tianyi Daliang Restaurant." Huang Jingjing was smiling very widely.

She was extremely pleased. She looked at Li Chengqian and Ding Ling, who were busy, and thought to herself, "This is the difference in life. This kid who only knew how to talk big will never have someone of a higher level come to greet him."

To have someone coming over to greet her, especially when this person had a higher social status. To her, it was her pride and her reason for feeling superior.

"I have to ask Qingli to keep a distance from Li Chengqian in the future."

"Hang out more with people who are capable."

After Huang Jingjing flipped the lobster, the sweet smell of lobster came out. She straightened up with a smile and watched Huang Daliang walk over.

"Boss Huang, you're here for leisure too?" Huang Jingjing was the first to speak. Then, she looked at Li Chengqian and Ding Ling proudly.

"That's right!" Huang Daliang casually glanced at Huang Jingjing. After realizing that they were not familiar with each other, he replied very casually. Without stopping, he walked straight to Li Chengqian and Ding Ling's side.

Huang Jingjing wanted to say something else, but when she realized that Huang Daliang was ignoring her, her expression turned awkward.

"Boss Huang is a busy man. He might have other important things to do," Huang Jingjing said to ease her awkwardness.

Then, she saw Huang Daliang standing in front of Li Chengqian and Ding Ling with a smile on his face. He asked very politely, "Sorry to disturb the two of you."

"What's the matter?" Li Chengqian glanced at Huang Daliang and realized that he didn't know him.

"It's like this. I want to ask, where did you buy this white truffle?" Huang Daliang pointed at the white truffle wrapped in tin foil.

"I run a western restaurant, so I'm very sensitive to the taste of these imported ingredients. The white truffles you two are using are of top grade, and I'm the gluttonous

type. When I smelled the smell, I couldn't help but come over and ask," Huang Daliang said with an embarrassed expression.

"Oh, I just found these white truffles on the mountain. I didn't buy it." Li Chengqian told him the same story as he told the others. However, while the others would buy this story, it definitely wouldn't work for someone who knew truffles.

However, that was what he had just said to Ding Ling, so he could only bite the bullet and tell Huang Daliang the same.

But as he spoke, he winked at Huang Daliang.

"Little brother, do you think I don't know? Don't lie to me. White truffles of this grade cost more than 10,000 yuan per catty. They are only available overseas. These are all imported!" Huang Daliang's small eyes widened, as he gave a knowing look.

"Sigh, little brother, are your eyes not feeling well? Why are you blinking all the time?" Seeing Li Chengqian continuously blinking, he couldn't help but ask.

Ding Ling was holding a small knife in her hand and carefully shaving the skin off the white truffles. After hearing what Huang Daliang said, she couldn't bear to peel any more. Her hands suddenly trembled and she almost cut herself. Then, she looked at Li Chengqian in shock and disbelief.

...

## Chapter 25: Subpar Trash

"Mister, you are mistaken. I just found this when I went up the mountain. Everyone here can testify for me," Li Chengqian said resolutely.

"Moreover, this is not an imported type. This is grown here in our country." Li Chengqian picked up a truffle and placed it in front of Huang Daliang, pointing at the yellow dots on the cap.

Huang Daliang took a closer look and indeed found characteristics typical of white truffles unique to China. "Not bad! But this cap..."

"It's just a little bigger. What's so strange about that?" Li Chengqian interjected. If he allowed him to continue, he would be exposed.

"Alright, if there's nothing else, we have to continue preparing the ingredients." Li Chengqian didn't give Huang Daliang a chance to speak at all.

He was telling him directly and indirectly: Go away, you're not welcome here.

"Little brother, since you picked up this truffle from the mountain, how about you sell it to me?" Not only did Huang Daliang not leave, he even deliberately walked closer and said to Li Chengqian with a smile.

"Not selling, not selling!" Li Chengqian rejected Huang Daliang's proposal without even thinking.

He took the risk of using the Farmer profession skills to grow these precious ingredients. They are meant for his parents' consumption, and not for sale.

Moreover, with the Master of All Professions game, earning money would be a breeze after he took on a worker-related profession. Therefore, after Li Chengqian was reborn, he had never bothered himself with money.

As long as he upgraded his profession step by step, he would have an endless supply of money in the future.

"10,000 yuan per catty! Sell it all to me!" Huang Daliang bidded directly.

"Hiss..." Huang Jingjing and Jian Qingli, who were standing not far away, heard this. Their eyes were popping out as they sucked in a breath of cold air.

Ding Ling put down the fist-sized truffle in her hand carefully.

"I said I'm not selling. No matter how much you offer, I'm not selling," Li Chengqian said with displeasure.

"Ding Ling, ignore him. Continue to prepare the ingredients according to my instructions! I picked this up from the mountain. It didn't cost a single cent!"

"Li Chengqian, this is too valuable. I can't handle it well." Ding Ling said softly.

"Little brother, I'm Huang Daliang, the chef of Tianyi Daliang Restaurant. I have experience in handling white truffles. Why don't I help you handle it? What do you think?" Huang Daliang continued to say.

"I don't have any other motives. It's mainly because when I see such good ingredients, I really can't help but want to get involved." Huang Daliang was all smiles. Seeing that Li Chengqian didn't object, he took over the position where Ding Ling was standing.

He picked up the paring knife and twirled it skilfully around the white truffle. Instantly, a thin layer of almost transparent skin was shaved off.

If it was in his shop, this layer of skin alone was enough for a portion of ruffle rice. He couldn't even bear to throw it away.

After Huang Daliang dealt with the ingredients at an extremely fast speed, he looked at the condiment box that Li Chengqian's family had brought and frowned. Firstly, it was ordinary, and secondly, there was too little variety. It was only good enough for preparing ordinary food. But if it was used to prepare truffles, it was simply blasphemous!

"Little brother, the condiments you brought are too little. I'll get my people to bring over the condiments we need." Seeing Li Chengqian nod his head, Huang Daliang was ecstatic.

"Xiao Wang, drive our car over and bring our seasoning to me. Then, put my portion of food here. You can take the rest to other places to barbecue."

Then, an entire shelf of seasoning was taken down from the car. Right on the heels of that, under Huang Daliang's command, a total of five Australian lobsters, three catties of snowflake beef, and all kinds of side dishes were taken down by him.

Every ingredient was a rare treat.

"Little brother, I'll eat with all of you. What do you think?" Huang Daliang smiled kindly.

One does not slap a smiling person. Not only did Huang Daliang contribute his effort, he also contributed other precious ingredients. In addition, he was extremely thick-skinned.

Li Chengqian really couldn't bring himself to reject him. "Alright!"

When Huang Daliang heard this, he was over the moon and smiled like a child.

Huang Jingjing, who had been standing at the side, looked terribly upset.

She took the initiative to welcome Huang Daliang, but he didn't even bother to talk to her.

But he was fawning over Li Chengqian.

In that case, what was she?!

Li Tianlan and Chen Li returned very quickly. After knowing what had happened, they said, "Son, your luck is really good!"

"Chef Huang, what's this thing my son found? It's called white truffles, right? It costs more than 10,000 yuan a catty, right?" Glancing at Huang Jingjing, Chen Li felt especially vindicated and deliberately asked loudly.

"That's right!" Huang Daliang answered honestly.

"How's the nutritional value? How's it compared to Australian lobster and Kobe beef?" Chen Li asked deliberately. She had deliberately said it for Huang Jingjing's ears. She had not forgotten a single word Huang Jingjing had said in front of her.

She was not a saint. She would remember being mocked and despised!

"White truffles are the best! They're better than anything else! Australian lobster and Kobe beef are subpar trash when compared to white truffles!"

"Oh, and what about the matsutake that my son found? How is it?" Chen Li looked at Huang Jingjing, whose expression had turned sour, and continued to speak happily.

"Top quality. If you want to buy it, it's more than 1000 yuan per catty." Huang Daliang looked at Li Chengqian in surprise. He realized that the ingredients Li Chengqian 'found' were all top quality.

He finally got it. These ingredients definitely couldn't have been found on the mountain. There had to be another source, but Li Chengqian just didn't want others to know.

"What about this dried bacteria?" Chen Li moved on to the next ingredient.

"This quality is at least 2,000 yuan per catty!" Huang Daliang said with absolute certainty.

Huang Jingjing listened to Chen Li and Huang Daliang's conversation. She was no fool, so she could naturally tell that Chen Li was asking all these for her benefit.

She had just bragged to Chen Li just now about the Australian lobster and Kobe beef, and criticized the ingredients that Chen Li brought.

Instant karma.

Within just a few minutes, Chen Li had already retaliated using the same method.

Huang Jingjing was furious. Her face was contorted with rage, but she could only suppress it in her heart.

"What's there to be proud of? He just got lucky. It's not like he can find it every time!"

"Furthermore, this family has been poor all their lives. Their family background is not good to begin with. To think that they actually chose to eat this valuable ingredient that they had picked on the mountain instead of selling it. They deserve to be poor for the rest of their lives!" Huang Jingjing cursed in her heart.

...

"After eating this, their family can only eat pork ribs and pork belly for the rest of their lives!"

"And with my family's financial strength, we can eat Australian lobster and Kobe beef as many times as we wish!" Thinking of this, the sense of superiority in Huang Jingjing's heart returned. She felt high and mighty once again.

"Sister Huang, do you think my son is lucky or not? He actually found so many good things on a casual trip into the mountains," Chen Li said with pride in her eyes as she looked over with a smile.

"It's actually better than what you paid so much money for, Sister Huang! And it's even more expensive. Just now, this chef said that while Australian lobster and Kobe beef are usually high class food, when compared to white truffles, they are subpar trash."

Huang Jingjing's expression turned really ugly. She could no longer maintain her high and mighty temperament.

She felt that not only was Chen Li calling Australian lobster trash, but she was in fact also taking the opportunity to say that she was trash!

What was even more infuriating was that she could not flare up yet!

## Chapter 26: Refreshed

Huang Jingjing was not someone who could be taken advantage of.

How could she take it lying down after being mocked by Chen Li?

She suppressed the anger in her heart.

"Chen Li, your son's luck in finding things is really amazing! He's indeed impressive. I can't help but admire him."

Huang Jingjing changed the topic and said with a look of pity on her face, "It's just that he isn't very lucky in his studies. The school now wants to segregate classes based on the second joint mock exam."

"Everyone knows your son's results. He will definitely be assigned to the Progressive class. Moreover, I heard that the principal is the one who made the policy this time. He's impartial. It's useless no matter who goes to plead with him."

"What a pity, what a pity!"

"I heard from Qingli that your son has been studying quite seriously recently. After he has changed class and a new environment, with the new teachers, especially considering that he would be going to a class with all the lousy students, I wonder if your son would still be so serious. It's really worrying," Huang Jingjing said hypocritically. She was obviously gloating.

Immediately, the smile on Chen Li's face froze. She looked at Huang Jingjing angrily.

It wasn't because of Li Chengqian's results. When Li Chengqian came back the day before, he had already told them about the results. After a round of discussion, they both felt that Li Chengqian didn't seem to be lying.

She was angry because Huang Jingjing had called her the day before in all seriousness, pretending to be informing her of the class segregation. She had asked Chen Li to find someone to intercede and keep Li Chengqian in Grade 12 Class 5.

What Huang Jingjing said just now was very clear. She knew that it was useless to find someone to intercede!

Huang Jingjing acted as if she didn't notice Chen Li's anger. She continued with a smug smile, "Chen Li, I have another piece of good news for you. Qingli has obtained an opportunity to participate in the Junior Informatics Programming Competition. Tianyi High School is only sending two teams."

"The teachers said that Qingli's team stands a chance of emerging in the top 50 in the country."

"Do you know what it means to be in the top 50? You can have direct admission to Divine Dragon University without having to take the test!" Huang Jingjing was getting more and more proud, acting as if Jian Qingli had already obtained the admission ticket to Divine Dragon University without having to take the test.

Chen Li's face became more and more sour. Even Li Tianlan, who had been standing at the side without saying a word, was getting visibly upset.

"This woman is quite good at talking." Even Huang Daliang, who was focused on cooking, stepped back and sighed.

Li Chengqian narrowed his eyes and looked coldly at Huang Jingjing. This woman's words are simply venomous!

She had been attacking Chen Li, starting with the ingredients, then his results, and right after that it was about Jian Qingli participating in the Junior Informatics Programming Competition. Every issue she raised was aimed at displaying her sense of superiority.

It could even be said that Huang Jingjing's sense of superiority was built on Li Chengqian's family.

"No wonder in my previous life, my father was so angry that he fell and broke his leg." In his previous life, he had stuck by Jian Qingli's side, and he had no idea how much his parents had been mocked.

Moreover, he was certain that his parents had suffered more ridicule in his previous life than this one.

This time, he got the best ingredients, so Huang Jingjing didn't dare to talk about the ingredients later.

This time, he had obtained a spot in the Junior Informatics Programming Competition, which he hadn't in his previous life!

Just as Li Chengqian was about to speak, Ding Ling, who was standing at the side, couldn't help but say, "Auntie, actually, Li Chengqian is also participating in the Junior Informatics Programming Competition."

"He's still the captain. I'm his teammate!"

"Jian Qingli and I are not in the same team. Her captain is called Bi Jialiang!"

"Previously, in order to select the participants, the school organized an examination."

"Li Chengqian represented our team in the exam. He got first place, 100 marks!"

"Bi Jialiang came in second, 58 marks!"

"Jian Qingli knows this best. If you don't believe me, ask her."

Instantly, the smile on Huang Jingjing's face froze.

At this moment, Jian Qingli, who had gone out to take photos, happened to return. When she saw her mother's stiff expression, she asked in confusion, "Mom, what's wrong? Why do you look so pale? Are you feeling unwell?"

"Why didn't you tell me that Li Chengqian is also participating in the Junior Informatics Programming Competition?" Jian Qingli had told her that she was participating in this competition, but she didn't say a word about anything related to Li Chengqian.

"You didn't ask me!" Jian Qingli replied in confusion. Then, she thought of what Huang Jingjing usually did and seemed to have figured out what was going on.

She knew her mother too well. She loved to show off, compare, and find a sense of superiority.

Instantly, she understood what had just happened.

Then, her face turned as red as a monkey's butt.

At this moment, Chen Li asked Li Chengqian, "Son, why didn't you tell us about your participation in the Junior Informatics Programming Competition?"

"Mom, actually I don't think it's important at all. It's not something worth showing off, so I didn't tell you." Li Chengqian said calmly.

Even someone as thick-skinned as Huang Jingjing couldn't hold it in anymore. Her face and ears turned red, and she wished the earth could swallow her up.

Thanks to Bi Jialiang, Jian Qingli was qualified to participate in the Junior Informatics Programming Competition. Huang Jingjing wanted to tell everyone in the world and win their praises.

As for how Li Chengqian did it, how he obtained first place in the school exam, he didn't breathe a word to anyone.

In comparison, Huang Jingjing felt even more embarrassed.

Then, she pulled Jian Qingli and left without saying a word.

"Son, this is so satisfying! I've never seen your Auntie Huang look so upset." Chen Li was all smiles. Huang Jingjing had been irritating her for three years. This time, she could finally hold her head high.

She felt the gloom accumulated in her heart was swept away, and she instantly felt refreshed!

"Mom, I said before that I would make you proud. Did you think I said that for fun?" Li Chengqian laughed.

"Hey, kid, I just said you're fat, and you're already panting!" Li Tianlan scolded with a smile.

...

On the way back, Jian Qingli looked at Huang Jingjing, who was visibly upset, and asked carefully, "Mom, were you showing off in front of Aunt Chen that I participated in the Junior Informatics Programming Competition?"

"What's wrong with you, child? How could you set me up like this? Why didn't you tell me that Li Chengqian had also qualified to participate in the Junior Informatics Programming Competition?" Huang Jingjing said angrily. Jian Qingli was a saboteur. If she had known that Li Chengqian had also qualified to participate in the competition, she definitely wouldn't have broached this topic.

...

"You didn't ask me!" Jian Qingli rolled her eyes at Huang Jingjing and defended herself.

"Moreover, Bi Jialiang said that Li Chengqian's theoretical results are indeed very good, but his practical hands-on experience is nil."

"Furthermore, Li Chengqian isn't studying properly. Recently, he's been playing computer games every day. He won't gain anything from the Junior Informatics Programming Competition."

"Bi Jialiang's judgment is that Li Chengqian will be eliminated in the preliminary round. He's destined to be eliminated. Why should I tell you!" Jian Qingli said unhappily.

"Is that so?" After Huang Jingjing heard this, she thought for a moment and told Jian Qingli, "Qingli, when your preliminary exams are over, you must tell me Li Chengqian's results!"

"Also, aren't you guys going to take the second provincial joint mock exam next week? After the results are out, ask around about Li Chengqian's results and then update me."

"Li Chengqian's grades are so bad, he will definitely be assigned to the Progressive class. Why are you asking about his grades!" Jian Qingli said in confusion.

"Don't worry about what I'm using it for. Just help me find out when the time comes." In fact, Huang Jingjing couldn't take this lying down at all.

When the results of the second provincial joint mock exam are released, she would talk to Chen Li and get her payback for what happened today.

...

## Chapter 27: Second Mock Exam Begins, Stray Dog

On Monday, Li Chengqian and Ding Ling arrived at school early.

Because of the incident in Peach Blossom Valley, Jian Qingli seemed to be avoiding them on purpose. In the end, she did not go to school with them.

"Li Chengqian, what did Chef Huang whisper to you yesterday?" Ding Ling asked curiously.

Yesterday, Huang Daliang pulled Li Chengqian aside and muttered in his ears for more than ten minutes. In the end, Huang Daliang left with a smile on his face.

"It's nothing. He just told me to call him immediately if I find white truffles in the future." Li Chengqian smiled. He wasn't lying to Ding Ling, he simply didn't tell her the whole truth.

"Oh, I see! Actually, Chef Huang's dishes are quite delicious. If there's a chance in the future, I must go to his restaurant to eat." Ding Ling recalled the barbecue was still relishing the taste.

Especially the white truffles. They didn't smell good, but they tasted delicious.

However, Ding Ling did not mention the white truffles because Huang Daliang had already given them the price of white truffles once.

Li Chengqian was lucky to have found them once in the mountains, but he might not be able to find them a second time. If she talked about it, Li Chengqian would surely feel immense pressure.

"Chef Huang also told me that if I want to eat, I can call him any time. After the exams in the next few days, I'll bring you to his restaurant for a meal." Li Chengqian was all smiles.

"Forget it, I'm just saying. After I went home, I checked and found that Chef Huang's Tianyi Daliang Restaurant is the best restaurant in Tianyi City. It's also especially expensive. On average, it costs 300 yuan per head!" Ding Ling shook her head.

Then, she changed the topic again and talked about the second mock exam.

"Li Chengqian, how are your preparations for this exam?" Ding Ling's eyes were filled with worry. After all, Li Chengqian's previous results weren't good.

"No problem! Don't worry, I'll definitely give all of you a surprise." Li Chengqian smiled confidently. His Student profession was already at level 9. His elementary, junior high, and senior high school skills had already reached Master level.

A mere mock exam was nothing to worry about.

"Alright, I'll wait for your surprise. Work hard for the exam. Don't be assigned to the Progressive class!"

As the second mock exam was a joint examination for the entire province, the school attached great importance to it. The exam was basically held in accordance with the requirements of the university entrance examination.

After parting ways with Ding Ling, Li Chengqian found the examination hall and sat down according to the seating plan.

When he came in, he deliberately looked around. Other than the people from his class, there were also people from other classes in this examination hall.

Liu Daqiang, Jian Qingli, and Bi Jialiang were all in this examination hall.

Looking at the experience value points in the Experience Pool, he only had 1,032 experience value points.

During the Saturday holiday, the remaining experience value points was 312 points. He obtained 200 experience value points through reading, and 520 experience value points through Planting skill.

For the Farmer profession, experience value points were obtained through planting.

He can obtain 10 experience value points for every unit of wasteland he reclaimed, and 10 experience value points for every unit of plant he planted.

Every time he harvested, he could obtain a different amount of experience value points depending on the plant.

For example, 100 experience value points could be obtained from planting and harvesting high grade ingredients like ginseng.

However, because he was afraid of being discovered, he didn't dare to use the power of the Farmer profession on a large scale.

Li Chengqian frowned and thought to himself, "Without a teacher to teach, the experience value points I get every day in school is pitifully little."

"Looks like I have to think of a way to go to the suburbs and use the skills of the Farmer profession to farm a whole bunch of experience value points."

His main goal in taking on the Farmer profession was to increase his Strength Stats. He had already surpassed his goal now.

"For this exam, I'll take a test at nine in the morning and another at two in the afternoon. I'm allowed to hand in my paper in 30 minutes. If I hand in my paper at 9:30, I'll have five and a half hours in between." The more he thought about it, the more Li Chengqian felt that this plan was feasible.

In his previous life, in the Master of All Professions game, what restricted farmers from farming experience value points quickly was that seeds were especially rare and expensive.

In reality, this problem did not exist at all. If he used 100 yuan to buy ordinary seeds, it was enough for Li Chengqian to use.

The only problem was that he was afraid of being discovered.

Liu Daqiang noticed Li Chengqian frowning in deep thought and he started imagining things.

“Hey, Li Chengqian, aren’t you very capable? You haven’t even started the exam and you’re already frowning? You’re worried that you won’t be able to do the questions later, right?” After being rebuked by Li Chengqian once, Liu Daqiang had been waiting for an opportunity to ridicule Li Chengqian thoroughly, to the extent that he had no comeback.

When the results of this exam are out, he would let Li Chengqian avoid him like the plague.

Liu Daqiang wasn’t the only one laughing. Jian Qingli was laughing too, and so was Bi Jialiang.

All of them were waiting to see Li Chengqian’s exam results, and then wait for Li Chengqian to be assigned to the Progressive class.

The first subject was Chinese. The invigilation arrangement was the same as the university entrance examination. There were two invigilators, one in front and one behind.

After the test paper was distributed, Li Chengqian filled in his personal information, flipped through the test paper, and began to answer the questions.

“It’s so difficult! The questions for this provincial joint exam are even more difficult than the official university entrance examination!” Many students flipped through the test papers first and realized that the questions for this exam were much more difficult than usual.

Li Chengqian was anxious to go to the suburbs, thus he didn’t hold anything back amidst everyone’s bitter cries. He quickly filled in the answers to the questions one by one on the answer sheet.

These questions were too simple for him. There was no need to think at all. At a glance, the answers naturally came to him.

The only thing that took some time was the essay question. He thought about it for about a minute before starting to write. Then, the words simply flowed.

The answer sheet was clean and tidy. There were no typos or stains.

In his previous life, Li Chengqian's handwriting wasn't good.

However, in this life, calligraphy was included in the skills of the Student profession.

After all the skills of his Student profession were upgraded to Master Level, his crooked writing became neat and tidy.

They were especially beautiful.

From the first question to the last question, Li Chengqian spent a total of 35 minutes, five minutes more than expected, and that was because the essay writing took a lot of time.

"Teacher, I want to hand in my paper!" After he finished writing, Li Chengqian raised his hand straightaway. He still needed to go to the suburbs.

...

The teacher on the podium looked at the time and realized that only 35 minutes had passed. He frowned.

"Alright, you may leave!"

Li Chengqian used the test paper to block the answer sheet and walked out of the classroom without hesitation.

When Li Chengqian raised his hand to hand in the paper, everyone in the classroom saw it.

"Brother, did you just give up?" For ordinary people, they couldn't even finish answering the multiple-choice questions in 35 minutes. The only explanation for handing in the paper at this time was that he was giving up.

Jian Qingli shook her head.

She even felt that Li Chengqian was very pitiful, especially when he rushed out of the classroom in that manner. In her eyes, it was as if he was running away, like a stray dog.

"In the past, although his results were bad, he would persist until the end of the exam."

“Now when he realized that he didn’t know how to answer the questions, he handed in the paper the minute he could do so and left!”

“Li Chengqian has given up!”

“His test results this time might be worse than the last.”

...

The smile on Liu Daqiang’s face became even brighter. “When the results are out, I’ll say what you said in front of everyone. Let’s see if you still have the cheek to remain in Tianyi High School.”

Bi Jialiang also shook his head. His opinion of Li Chengqian had dropped another level lower.

He discovered that ever since he obtained first place in the computing theory test, Li Chengqian had been proud and complacent, completely letting himself go. He no longer revised the questions for the Junior Informatics Programming Competition. He even played games every day, did not study his textbooks, and did not take the exams seriously.

“Only now do I realize that Li Chengqian isn’t even a worthy opponent.”

## Chapter 28: Worker Profession

“Personal interface!” Li Chengqian sat in the car heading to the suburbs and muttered in his heart.

Name: Li Chengqian

Intelligence: 19 (Average adult is 10 points)

Strength: 19 (30.4 after strengthening) (Average adult strength: 10 points)

Agility: 10 (Average adult is 10 points)

Profession : Student level 9 (Advanced), Farmer level 9 (0/1)?

Student Profession Skills:

1. Focus (Master)

2. Elementary School Knowledge (Master)

3. Junior High School Knowledge (Master)

4. Senior High School Knowledge (Master)

5. Rational Thinking (Master)

Farmer Profession Skills

1. Endurance (Master)

2. Reclamation (Novice 0/3)

3. Planting (Master)

4. Harvesting (Novice 0/7)

5. Strength (Master)

Experience Pool: 1,0

“Reclamation, Harvest skill, upgrade!”

[You have consumed 810 experience value points, Wasteland Reclamation skill (Master), Harvest skill (Master), 222 experience value points remaining in the Experience Pool.]

Immediately, the description of the Wasteland Reclamation skill and the Harvest skill changed.

[Wasteland Reclamation (Master): Consumes 1 Stamina point. You can instantly turn 100 units of wasteland into fertile farmland and flatten the terrain of this portion of land.]

After his Wasteland Reclamation skill proficiency reached Master Level, the amount of land he can reclaim at a time increased tenfold to 100 units.

Using these skills to earn experience value points is ten times more efficient.

[Harvest (Master): Consumes 1 Stamina point. You can instantly harvest crops from 100 units of land or use them on non-systemic land.]

The harvest area of the Harvest skill had also increased by 10 times. At the same time, it can now be used on non-systemic land.

After these two skills have been upgraded, all the skills of the Farmer profession are at Master level. Behind the Farmer profession, the word “advanced” appeared.

Li Chengqian clicked on it out of curiosity.

[Advanced Profession: Farm Owner]

[Farmer Owner Advancement Requirement 1: Attain Master level for all skills under the Farmer profession (Completed).]

[Farmer Owner Advancement Requirement 2: Attain level 3 for Agricultural Management (Incomplete).]

[Farmer Owner Advancement Requirement 3: Consume 5,000 experience value points (Incomplete).]

[Farmer Owner Advancement Requirement 4: Obtain land use rights for more than 100 acres (Incomplete).]

[Farmer Owner Advancement Requirement 5: Own complete set of equipment for tilling the land, sowing seeds, watering, harvesting and sorting (Incomplete).]

“The requirements for the Farm Owner profession are indeed different from the game.” Li Chengqian was a little disappointed. In his previous life, the Farm Owner profession was very simple. There were only three conditions.

However, what was displayed now was much more complicated.

“Little brother, we’ve arrived at the second bridge of the Fangsha river!” Just as Li Chengqian was deep in thought, the driver stopped the car by the roadside.

To the north of Tianyi City, a small desert had gradually formed due to soil erosion. In order to manage the desert, Tianyi City had spent a lot of effort and money to dig a small river.

A lot of money was spent every year on forestation to contain the desert.

However, the effect was minimal!

And the desert continued to expand.

Li Chengqian chose this place because there was a river here. Another reason was that very few people came here as the sandstorm was very heavy.

After Li Chengqian got out of the car, he crossed the bridge and walked along the side of the bridge for a while. He only stopped when he was far away from the road.

After looking around carefully and realizing that there was no one around, he began to use his skills.

“Reclaim!”

Below him, there was an area that was ten meters long and wide. It was originally yellow sand and gravel.

In an instant, the land in this area changed.

The yellow sand and gravel had unbelievably turned into black and fertile land. The land was moist.

The originally slanted ground became flat under the effect of the skill, there was no more slope.

[You have reclaimed 100 units of arable land, You have obtained 1,000 experience value points. You have 1,222 experience value points remaining in the Experience Pool.]

“Awesome!” Li Chengqian’s spirits soared when saw the system notification.

...

“Plant!” A handful of wild grass seeds that Li Chengqian had prepared in advance, as well as a handful of medicinal wolfberry seeds were planted.

In an instant, the black ground was covered in dense weeds. The weeds were lush, as if they had been growing for many years.

[You have planted 98 units of perennial weeds, You have received 980 experience value points. You have 2,202 experience value points remaining in the Experience Pool.]

[You planted 2 units of wolfberries. You have obtained 20 experience value points. You have 2,222 experience value points remaining in the Experience Pool.]

He fetched water from the river using a bucket he had prepared and poured it on the soil where the wolfberries were planted.

The wolfberries quickly bloomed and bore fruit. Ripe wolfberries that were the size of peas emitted a rich medicinal fragrance.

“Harvest wolfberries!”

[You have harvested 40 medicinal wolfberries, You obtained 400 experience value points. You have 2,622 experience value points remaining in the Experience Pool.]

[Medicinal Wolfberry: Each can restore 1 point of Strength Stats!]

In the past two days, whenever he was free, he would test the abilities of various crops on the plot of land below his block.

Through his experiment, he found that medicinal wolfberry was the best for restoring Stamina.

...

Other items had to be consumed in large quantities to recover Strength Stats. It was fine to use them to improve one's health, but they are not suitable for releasing skills.

Then, Li Chengqian followed the river and began to release the Wasteland Reclamation and Planting skills.

He released a total of 20 times of Wasteland Reclamation and 20 times of Planting.

Then, a full 200 meters of the riverbank turned green. It was filled with weeds, lush and extremely beautiful.

[You have reclaimed up 2,000 units of arable land. You have received 20,000 experience value points. You have 21,622 experience value points remaining in the Experience Pool.]

[You have planted 2,000 units of perennial weeds. You have received 20,000 experience value points. You have 41,622 experience value points remaining in the Experience Pool.]

Seeing that he had officially exceeded the 40,000 mark for experience value points on his personal interface, Li Chengqian couldn't help but smile.

Then, without any hesitation, he turned around and left.

The riverbank had always been bare. Suddenly, the 200-meter-long riverbank had become green and filled with weeds.

If anyone found out, he would definitely be a prime suspect.

"I definitely can't use Farmer profession skills casually in the future! It's too astonishing." It didn't matter in the game, but in reality, the effect was simply terrifying!

If he was found out, even if he weren't sent to the lab as research material, he would definitely be used as a tree planting machine.

However, Li Chengqian had already achieved his goal of coming here this time, and that was to obtain enough experience value points to obtain the Worker profession.

“Now that I have enough experience value points, I can take on the Worker profession.”

“With the Worker profession, the software I write will also be considered an industrial product.”

“As long as I create an industrial product, I can obtain experience value points!”

The Worker profession was also a basic profession. After leveling up, one could increase one’s Agility Stats.

What Li Chengqian valued was the way the Worker profession obtained experience value points.

After becoming a Worker profession, one could obtain experience value points by creating any industrial product.

The more complicated and advanced the industrial products were, the more experience value points they could obtain.

At the advanced level of the Worker profession, the method for obtaining experience value points was much better than any other profession.

In Li Chengqian’s plan, the Worker profession and the advanced level of the Worker profession were his main sources of experience value points.

## Chapter 29: Worker Profession 2, Restoration of Vision

Li Chengqian finished the English exam in the afternoon within 20 minutes.

The questions were very simple, although most of the questions were very obscure and some words were not frequently used.

However, the areas examined were all within the senior high school syllabus.

It might be difficult for others, but for Li Chengqian, it was no different from a question like  $1+1=2$ .

It was very simple!

After completing it within 20 minutes, Li Chengqian read it again from beginning to end as he wasn’t allowed to submit the paper and leave.

He was confident that he could score at least 145 marks for the 150-mark English subject. The other 5 marks were because he could not guarantee that he could score full marks for the English essay.

After all, the score of a subjective topic like an essay had a lot to do with the subjective opinion of the teacher who graded the paper.

After waiting for 30 minutes, when he was allowed to hand in his paper, Li Chengqian did not hesitate at all. He immediately handed in his paper and left the classroom.

He had already bought a Profession Slot on the way back from farming in the suburbs. When he opened the inauguration certificate for the Worker profession to check the requirements, he realized that they were different from the Master of All Professions game in his previous life.

In his previous life, in the Master of All Professions game, there were no prerequisites for taking on the Worker profession.

However, there were prerequisites for taking on a Worker profession in reality.

One needed a studio larger than 10 square meters to be able to take on the Worker profession.

Li Chengqian, who was in a hurry to take on the Worker profession, rushed out immediately after the exam.

Liu Daqiang's smile became even more radiant when he saw Li Chengqian hand in his papers and leave.

In the first subject, which was Chinese language, Li Chengqian had handed in his paper within 30 minutes. Now, in the second subject, which was English language, Li Chengqian had done the same.

It was obvious that Li Chengqian didn't know how to do the papers. He had completely given up and let himself go.

"Now that he has been exposed, I wonder if Li Chengqian still has the face to continue coming to school."

"Perhaps he thinks that after the results are out, he will go to the Progressive class and will be able to avoid my ridicule? Childish, he's simply dreaming! Why would I let you off!"

"The results of the exams will be released on Thursday, and the results will be announced online. You can check your results by entering your exam pass!"

“Li Chengqian, when the time comes, I will definitely take a screenshot of your results and send it along with what you said back then to everyone I know. I will let everyone know what you are made of.” Liu Daqiang sneered.

Jian Qingli and Bi Jialiang also noticed that Li Chengqian had handed in his paper in advance.

However, Jian Qingli only shook her head and didn’t say anything else.

Because the questions in this mock exam were very difficult, she was also struggling.

Thus she didn’t pay much attention to Li Chengqian’s movements.

In any case, Li Chengqian himself had already given up, so it wasn’t worth her paying too much attention.

“Trash!” Bi Jialiang glanced at Li Chengqian. After cursing in disdain, he sighed in his heart. “The exam questions this time are too difficult. The Chinese language exam in the morning was very difficult, and now the English language exam is also very difficult!”

“It’s only normal that a lousy student like Li Chengqian doesn’t know how to do it!”

...

Li Chengqian naturally chose to locate the studio in his home.

It was also unrealistic for him to find another place to use as a studio. After careful consideration, he finally decided to use his home as a studio for the time being.

In any case, as long as the area was more than 10 square meters and belonged to him, it was fine.

After Li Chengqian quickly got home, he quickly opened his personal interface.

After the last requirement was met, a notification appeared on the translucent page in front of him.

[You have successfully taken on the Worker profession! Current Worker profession level 0...]

Looking at the remaining 36,000-odd experience value points, Li Chengqian didn’t even think about it. He upgraded the Worker profession directly to level 9.

[You have consumed 1,421 experience value points. Worker profession upgraded to level 9. You have 34,579 experience value points remaining in the Experience Pool.]

[Your Agility Stats +9, current Agility: 19 points.]

After his Agility Stats increased to 19 points, Li Chengqian felt as light as a swallow.

The feeling was like he had put down a sandbag that he had been carrying on his back.

“My eyes!” Li Chengqian felt a cool sensation in his eyes. Then, he realized that his vision was blurry, and a feeling of dizziness and nausea assaulted him.

Li Chengqian hurriedly took off his glasses.

Then, all the discomfort disappeared.

Without his glasses, everything around him was crystal clear.

“My shortsightedness is cured!” After a few tests, Li Chengqian was overjoyed because he finally confirmed that his eyesight, which had reached 300 degrees of shortsightedness, had recovered after his Agility Stats reached 19 points.

Previously, everything was blurry to him, it’s as if there was a layer of frosted glass in between. He had to wear glasses to see clearly.

Now it felt as if that layer of frosted glass had been removed and the whole world had become crystal clear, as if it had been washed with water.

“I didn’t expect that taking up the Worker profession would bring about the effect of eliminating myopia! It’s worth it, it’s more than worth it. Just the fact that I can restore my vision is worth it however much experience value points I spend.” Li Chengqian was overjoyed and his voice was quivering.

Only those with myopia knew how uncomfortable it was to be nearsighted.

To be unable to see anything clearly, to have to wear a pair of spectacles on one’s nose every day, it was extremely inconvenient.

After a prolonged period, there would be a deep dent on the nose. It was especially uncomfortable and unsightly.

Moreover, if the frame of the spectacles was too tight, it would often scrape the skin above the ears, and that hurts a lot.

...

Also, after one developed myopia, spectacles became a must, otherwise the myopia would worsen as the eyes became fatigued from the strain.

With his spectacles on, it was inconvenient for him to exercise. If his spectacles accidentally fell off, he would be half blind.

It could be said that once one was short-sighted, they would be short-sighted for life!

Li Chengqian didn't expect the Agility Stats to have such an advantage. If he had known earlier, the first profession he chose would definitely have been the Worker profession and not the Farmer profession.

Li Chengqian walked to the window and looked at the square in the distance.

Then, he realized that even from a hundred meters away, he could see the other party's appearance clearly, even with naked eyes.

"With my current vision, I'm qualified to be a pilot! It's definitely above 5.3!" After confirming that his eyesight had recovered and was even better than ordinary people's, Li Chengqian focused his attention on the notifications.

[Worker profession level 1. You have obtained a passive skill, Agility (Novice 0/1): Agility Stats increased by 10%.]

[Worker profession level 3. You have obtained a passive skill, Tool Mastery (Novice 0/1): Master the usage of simple tools.]

[Worker profession level 5. You have obtained a skill, Quick Processing (Novice 0/1): Consumes 1 Strength Stats. Under the premise raw materials are provided and manufacturing principles have been mastered, you can quickly create non-software industrial products that you have already mastered.]

[Worker profession level.7. You have obtained a passive skill, Precise Sizing (Novice 0/1): You are abnormally sensitive to size, you can detect sizes up to a 1 mm margin of error, just by relying on your palms and eyes.]

...

[Worker profession level 9. You have obtained a Skill, Manufacturing Principle (Novice 0/1): After seeing a machine, you can consume a large amount of Strength Stats and master the Manufacturing Principle of the machine in an extremely short period of time. When the prerequisite knowledge conditions are not met, the required knowledge and level can be displayed.]

"Hiss... So this skill didn't exist in the original Master of All Professions game!" After reading the description of the Manufacturing Principle skill, Li Chengqian was more astonished than anyone else.

Especially after carefully reading the introduction of the Manufacturing Principle skill, there was only one thought in his mind-this skill was out of this world!

According to the description of the skill,

Even if a photolithography machine was placed in front of him, he would be able to obtain the manufacturing technology of the photolithography machine in an extremely short period of time!

If a CPU was placed in front of him, he could also obtain the manufacturing principle using the Manufacturing Principle skill.

“Let me take a look at the laptop...” Li Chengqian couldn’t hold back anymore. He walked to his father’s laptop and used the Manufacturing Principle skill.

[Analysis of requirements for laptop: 1. Materials science proficiency (not mastered); 2. Integrated circuit proficiency (not mastered); 3. Electromagnetics proficiency (not mastered); 4. Polymer chemistry proficiency (not mastered); 5. Electronic informatics proficiency (not mastered); 6. Photoelectric Physics proficiency (not mastered); 7. Novice level acoustic electro-technology (not mastered)...

Chapter 180: Introduction to Bearing Studies (non mastered)

[After mastering knowledge of the above subject, you will consume 91.18 million Strength Stats, and you will obtain the principle of making a complete laptop.]

“It’s too difficult! You’ll hurt yourself if you bite off more than you can swallow. I’d better take it slow.” When Li Chengqian saw the figure of 90 million, he felt that this skill wasn’t that realistic.

However, Li Chengqian also knew that it was not that the skill was unrealistic, but that there was a problem with the way he used it. When he used the Manufacturing Principle skill on the entire laptop, the manufacturing principle of all the parts in the laptop would appear.

Putting everything else aside, there was only one country in the world that could manufacture a CPU component in a laptop.

It was the same for GPUs! Although the Divine Dragon Nation could make them, others were ahead by 20 years in terms of making use of its performance!

And that was just one component of the laptop.

Chapter 30: Examinations are Over, Full Marks Exam Papers

After testing the skills of the Worker profession, Li Chengqian stopped.

The Worker profession has cured his myopia. This was a pleasant surprise.

With his current Stats, it was very difficult for him to properly use the powerful skills of the Worker profession.

Therefore, he turned his attention to his initial goal.

His initial goal for the Worker profession was actually to write his own open-source operating system.

Software development was part of the software industry.

After Li Chengqian took on the Worker profession, he could also obtain experience value points by writing or modifying the operating system.

Of course, there was a prerequisite, which was that he had to work in a studio in order to obtain the experience value points.

Outside of the studio, he couldn't obtain experience value points through the Worker profession.

According to the experience value points earned by the Worker profession in his previous life, if he worked in the software industry, he could obtain about 1,000 experience value points in an hour. When he has completed the software development, he would be given a lump sum of experience value points according to the technical content of the development.

The Worker profession did not earn experience value points as quickly as the Farmer Class.

However, the way to obtain experience value points in the Worker profession was less conspicuous and exaggerated as the Farmer profession.

"Let's do it!" Li Chengqian took Li Tianlan's computer to his room, turned on the computer, and installed the VC software.

The 30-day homemade operating system and the linux kernel were downloaded to the computer.

In the process of actually operating the computer, Li Chengqian realized that after taking on the Worker profession, his fingers had become more agile, his dexterity had improved, and his dynamic vision had become extremely good.

Therefore, Li Chengqian's input speed increased by a full five times!

On the premise that accuracy was ensured, Li Chengqian could easily press 20 keys per second without error.

In other words, he could easily enter about 1,000 characters per minute into the computer and still maintain an accuracy rate of 99.9%.

“Focus!”

“Rational Thinking!”

Li Chengqian used the two skills of the Student profession without hesitation.

In the past, in the skill state, his vision restricted him from obtaining knowledge.

Now that he had taken on the Worker profession, his dynamic vision had greatly improved. In the past, he needed one second to see the contents of a page clearly, but now, he could flip three pages in one second.

“This portion is too unwieldy, I have to restructure it...”

“The execution of this function is too slow, I'll use an assembly language to rewrite it...”

With the enhancement of the Rational Thinking skill, the originally difficult code looked especially familiar and easy. Li Chengqian could even understand why the original developer wrote it this way.

Li Chengqian wasn't simply looking at it, he was also constantly marking out the places that needed to be modified and deleted.

...

On the second day of the exam, the subjects were mathematics and comprehensive science. Li Chengqian still did things his own way. The examination time for each subject was 30 minutes, and he would immediately hand in his papers the second he could do so, without any delay.

This made everyone feel that Li Chengqian had really given up.

But in actual fact, to Li Chengqian, the questions were really too simple. At a glance, the answer would appear in his heart. There was no need to use his brain at all.

In addition, ever since he started studying operating systems as a Worker, Li Chengqian had been completely engrossed.

1000 experience value points per hour!

The efficiency of obtaining experience value points was even higher than in class.

Coupled with the fact that writing an advanced operating system gave him a very high sense of achievement, Li Chengqian found it especially interesting.

“After the results of this exam are out, I want to apply to Teacher Wang and the school for a leave of absence and focus on developing the operating system with all my might!”

“By then, I will definitely be able to earn a large amount of experience value points.”

“After I take on the University Student profession, I can use the remaining experience value points to buy the corresponding Knowledge skills.” Li Chengqian had a smile on his face.

Don’t think that he had a lot of experience value points now.

And it seemed like he would never run out of it.

In fact, when his profession level had increased to level 10 or above, or when he had advanced to a higher level profession, the consumption of experience value points would increase by a hundred times.

Li Chengqian remembered that in his previous life, the professional Knowledge skills of University Student could only be purchased from the Profession Mall using experience value points. The cheapest Knowledge was at least 10,000 experience value points. A large amount of experience value points was also required for upgrading of the proficiency levels.

“I sorted out about 10,000 lines of code yesterday. If I speed up today, I’ll be able to finish writing all the codes for the system’s basic core.” When he got home, he quickly turned on his computer and opened the project document.

He quickly got into work mode.

At Tianyi High School, after the comprehensive science exam was over, the students who usually had good grades surrounded Teacher Wang Jianjia when they saw her outside the classroom.

“Teacher, are the results of the English exam we took yesterday out yet?”

“Teacher, can you tell me how many marks I scored this time?”

“Teacher, the questions this time are too difficult. I wonder if I passed the exam?”

"Alright, alright. Everyone, quieten down." Wang Jianjia was already used to such scenes and was very experienced in handling things. She raised her hand and spoke loudly.

After everyone quietened down, Teacher Wang Jianjia said, "Because this exam is a joint examination for the entire province. It's completely based on the examination model of the university entrance examination."

"All the papers have been mixed up and scanned and uploaded online. Teachers from all over the province will grade the papers online."

"There are no names on the test papers. No one knows which school or which student the test paper they graded belongs to."

...

"Students, wait patiently. Don't be anxious. The results will be out on Thursday. You'll know when the time comes."

When Wang Jianjia said this, she seemed to have thought of something. She sent a photo of the test paper to the class group. "Students, when I was grading the test papers yesterday, I found a test paper with full marks. I'll send it to the group now. Everyone, learn from this paper."

"I don't know who this student is, nor do I know which school he's from, but I reckon that he should be a student of Celestial Treasure First High School!" Celestial Treasure First High School was the best high school in the entire province. Every year, there were a few people from this school who could get into Divine Dragon University!

"Look at his paper, look at his essay!" When Wang Jianjia said this, her eyes were filled with admiration.

There was not a single correction on this test paper. The paper was clean, and the handwriting was especially beautiful. Every letter is neat and smooth, it is such a pleasure to look at.

"Wow, this handwriting is so beautiful. It's even more beautiful than printed words!" Jian Qingli leaned over to take a look, her eyes revealing admiration and envy.

"This person is amazing!" Bi Jialiang was about to leave, but after hearing what Teacher Wang said, he also came over to join the crowd. After seeing the handwriting on the test paper, he felt that his handwriting was childish and unsightly.

"It's not just his handwriting that is good, but also his studies. Didn't you hear what Teacher Wang said? He scored full marks in English!" Liu Daqiang was especially convinced.

“He could get full marks for such a difficult paper. This person is really impressive, awesome.”

“I really want to know who this person is!”

“You think others are amazing, right? Are you convinced now? Then work hard and see the gap between you and others clearly. Don’t be smug just because you passed an exam.” Wang Jianjia waited for everyone to express their opinions before speaking.

...

“By the way, did any of you see Li Chengqian?” Wang Jianjia’s looked around but didn’t find Li Chengqian.

She had already gone to look for the principal to talk about Li Chengqian, but the principal’s attitude was very firm. They had to follow the policy. Those with lower grades had to go to the Progressive class.

She was afraid that Li Chengqian wouldn’t be able to accept it when the time came, so she wanted to give him a prep talk first, so that he wouldn’t take it too hard.

“Teacher, Li Chengqian submitted his paper in 30 minutes for every exam. He left a long time ago.” Liu Daqiang said loudly.

Wang Jianjia frowned.

Meanwhile, when Li Chengqian heard his phone’s notification, he reached for it and opened the message. He saw the test paper that Teacher Wang Jianjia had circulated. “Eh, isn’t this my test paper?”
