

## Top Student: Experience Infinite Occupations

### #Chapter 51 - 51 Awesome Li - Read Top Student: Experience Infinite Occupations Chapter 51 - 51 Awesome Li

#### 51 Awesome Li

Li Chengqian heaved a sigh of relief after sending Liu Wendao away.

To be honest, after recovering the deleted video from Liu Wendao's computer hard drive, Li Chengqian was terrified to find out that Liu Wendao was a murderer.

He could handle Liu Wendao's underhand tactics, but his parents were ordinary people, and they were definitely no match for the ruthless Liu Wendao.

The moment he saw the video, he made up his mind to report on Liu Wendao.

Only then could he be rid of this threat and live in peace.

After everyone left, only Li Chengqian and the other two were left at the scene.

"Li Chengqian, why didn't you tell me in advance? I wasn't mentally prepared at all. I was so terrified just now." Jian Qingli went limp and almost slumped on the ground. She was mad.

Ding Ling was also visibly upset about this. She also felt that Li Chengqian was in the wrong this time.

"Li Chengqian, you're in the wrong this time. Don't do it again, or I'll really be angry," Ding Ling said unhappily.

Then, her voice became feeble. She couldn't help but lean towards Li Chengqian. "Hold me. My legs are weak. I can't stand it anymore."

"Li Chengqian, help me up too. I feel that my body is stiff and I'm losing control." Jian Qingli took a step forward and realized that her body was stiff and weak. Her quick reflexes allowed her to hook her arms around Li Chengqian's neck to prevent herself from falling to the ground.

Ding Ling almost cursed out loud when she heard this and saw Jian Qingli leaning against Li Chengqian's chest.

Jian Qingli was both upset and embarrassed. "Li Chengqian, it's all your fault. If you had told us in advance, things wouldn't have turned out like this."

Li Chengqian straightened his face and stretched out his arm to help Jian Qingli up. Then, he used one arm to support Jian Qingli.

In this way, he could support Jian Qingli's weight while keeping her at arm's length.

Jian Qingli's expression didn't change, but there was a trace of sadness in her eyes.

"This bitch is too mercenary. In the past, when Li Chengqian hid his capabilities, she despised him. Now that Li Chengqian's results are good and he has become confident and brave, she wants to lean on him again." Ding Ling cursed in her heart.

Seeing Li Chengqian take the initiative to distance himself from Jian Qingli, Ding Ling heaved a sigh of relief and was secretly happy.

Then, without waiting for Li Chengqian to make a move, she reached out and hugged Li Chengqian's hand to her chest again. A fulfilling sense of security instantly filled her heart.

"Come on, we're gonna be late."

After arriving at school, Li Chengqian applied for leave from Teacher Wang and went straight to the school library. He was not carrying any books in his bag, but a laptop.

Classes now were meaningless to him. He had already perfected his Senior High School, Junior High School, and Elementary School Knowledge skills.

In terms of experience value points, the experience value points gained from programming was slightly more than from attending class.

In addition, he also wanted to quickly complete the Divine Dragon Optimization software.

Last night, he had spent half the night developing the Data Restoration software, researching online protocols, and collecting evidence of Liu Wendao's crimes. He didn't get round to writing the codes he had planned to write at all.

...

Lesson had just ended in Class 5 of Grade 12.

As soon as Teacher Wang Jianjia stepped out of the classroom, a chubby fatty who was about 1.7 meters tall rushed in from outside. He was wearing a white sports t-shirt, and his hair was naturally curly.

"Chen Chunan, where's Li Chengqian from your class?" The little fatty glanced around and realized that Li Chengqian was not around. He began to ask the students he knew.

"Dapeng, why are you looking for Li Chengqian?" Chen Chunan raised his head and asked curiously.

The little fatty's name was Zhao Peng. He was studying in Grade 12 Class 2 and was Chen Chunan's junior high school classmate. The two of them were considered friends. They often invited each other to play LOL after school. Although the two of them were noobs, they were especially addicted.

"Chunan, breaking news! Li Chengqian from your class has done something serious." The little fatty's eyes lit up as he said urgently.

"What is it?" Chen Chunan became even more curious.

"Do you know Liu Wendao, president of the Square Group? He's Liu Daqiang's father," the little fatty said mysteriously. "He was arrested this morning too!"

"Isn't Liu Wendao very well connected? It's said that he's the wealthiest man in Tianyi City. How did he get caught?" Chen Chunan was surprised.

Because of Liu Daqiang, he had also heard of Liu Wendao.

In his eyes, Liu Wendao was a big shot, someone who was untouchable.

"Liu Wendao had killed someone. It was Li Chengqian who provided the crucial evidence. It was also Li Chengqian who helped the police capture Liu Wendao. I heard from my uncle that the city police department has applied to award Li Chengqian with a provincial medal for bravery. This medal can add 20 points to the university entrance examination." Zhao Peng's eyes were filled with envy. If he could get an extra 20 points, he would definitely be admitted to a key university.

"What? An extra 20 points?" Chen Chunan's eyes widened as he turned green with envy.

Twenty marks makes a big difference in the university entrance examination. It could put one ahead of thousands of people.

"What a waste. Li Chengqian can score full marks. The extra marks make no difference to him. It's a waste to give it to him. It would be great if these 20 marks were given to me." When the students heard what Zhao Peng said, their faces were filled with envy.

"Li Chengqian is really awesome!"

"If Li Chengqian scored full marks in university entrance examination, and together with these extra 20 marks, do you think his results will reach 770 marks?" A classmate suddenly said.

"If that's the case, Tianyi High School will be famous!"

"770 marks! This is definitely the highest university entrance examination score ever."

"It is more perfect than scoring full marks. Amazing, too amazing! In the future, I don't think we should call him Li Chengqian. We should just call him Awesome Li." A classmate joked and then laughed loudly. His laughter was filled with envy and jealousy.

"Dapeng, did you come to our class to look for me to talk about this?" Chen Chunan asked after everyone had quietened down.

"No, I came here to talk to Li Chengqian about something. I talked about the extra points just to gossip a little. I wanted to let you know how awesome Li Chengqian is," Zhao Peng said casually.

"Tsk! When the results of the second mock exam were announced, I already knew that he was impressive and awesome. Do I need you to tell me this? I know you too well, you're a lazy person, why would you come over if it's not something important for you? Cut the bullsh\*t, tell me honestly, what exactly is it?" Chen Chunan said disdainfully.

"I came to look for Li Chengqian about something. It's quite urgent. Do you know where he went?" Zhao Peng smiled and continued. He was usually a lazy bum, but at critical moments, he knew what to say and what not to say.

He couldn't reveal for now what he wanted to talk to Li Chengqian about.

"Li Chengqian took leave to go to the library. He's preparing for the Junior Informatics Programming Competition next week." Chen Chunan told Zhao Peng what he knew. Suddenly, something came to his mind and he asked curiously, "By the way, I remember that you also participated in the test organized by Teacher Tian Wenming. How did you do? Did you qualify?"

"I don't wanna talk about it. Twenty-one people took the test. I was 19th." Zhao Peng looked like he really wanted to put this behind him.

"Alright, let's play a round of LOL after school. I'll go look for Li Chengqian first. It's really a little urgent." Zhao Peng was ready to leave now that he had received the most critical information.

...

"Come on, you came in third last, why beat around the bush?" Chen Chunan joked.

“Has anyone told you how obnoxious you are? We can still be friends if you can keep your mouth shut. I’m leaving, no time for small talk!” Zhao Peng also joked. Then, he waved his hand casually and rushed to the library.

He had got a tip-off from his uncle, who worked at the city police station. Now, he was going to discuss with Li Chengqian and try to get the last spot in Li Chengqian’s team.

“Uncle said that Li Chengqian’s computer skills are especially good. He’s even better than the police station’s Internet Security department. If he joins Li Chengqian’s team to participate in the Junior Informatics Programming Competition, the chances of him obtaining a ranking are very high.”

“Uncle said that Li Chengqian spent less than a night to develop the Data Restoration software that was used to recover Liu Wendao’s computer and phone data. It’s even better than the software that the station spent more than three million yuan to buy. The experts at the municipal bureau now worship Li Chengqian like he was god. He also heard that the municipal bureau is having internal discussions to buy from Li Chengqian the right to use the software .”

“Bi Jialiang is not in the same league as Li Chengqian.” As Zhao Peng walked towards the library, he happened to see Bi Jialiang walking over with a confident smile.

“Bi Jialiang should be on his way to look for Jian Qingli! Jian Qingli and Bi Jialiang are teammates...” Thinking of this, Zhao Peng thought of a rumor that he heard. It was rumored that Li Chengqian had invited Jian Qingli to join his team, but Jian Qingli mocked him.

“Fortunately, Jian Qingli didn’t agree to join Li Chengqian. Otherwise, I wouldn’t have had a chance at all.”

“There’s a rumor in school about Bi Jialiang, Jian Qingli, and Li Chengqian. A rumor about one man and two women...” As he thought about it, Zhao Peng’s thoughts went wild.

Outside Grade 12 Class 5, Bi Jialiang was especially excited when he asked Jian Qingli to step out.

“Jian Qingli, this is what had happened, Teacher Tian Wenming found a particularly good teacher for us in Tianbao City and arranged for us to go for one-to-one special training.”

“This person is a classmate of Teacher Tian Wenming. His name is He Jingguo. He has a PhD in Computer Science and is currently teaching at Qianling University.”

“Teacher Tian Wenming asked us to go straight to Tianbao City today.”

There were two things that excited Bi Jialiang. The first was that they had a powerful teacher to train them. His standards would definitely improve, and his chances of entering the top 50 would be much higher.

The second and most important point was to go to Tianbao City with Jian Qingli in advance.

A man and a woman together in a strange place. This was the best way to get closer to her.

Although Jian Qingli was close to him, up until now, he had not even had the chance to hold Jian Qingli's hand. He could only fantasize about their relationship.

He might be able to bring their relationship to the next level on this trip. He might be able to hold Jian Qingli's hand.

"Is that so? Then I need to talk to my mother first and see what she says." Jian Qingli didn't seem too excited. She replied calmly and then pretended to ask casually, "Where are Li Chengqian and the others? Are they going too?"

"Teacher Tian Wenming didn't say." Bi Jialiang felt uncomfortable when Li Chengqian's name was mentioned. The thought of 750 marks gave him too much pressure.

He felt inferior whenever he thought of Li Chengqian's 750 marks.

"But I think Li Chengqian probably won't have a chance to go. While he is very good with theory, his practical experience is very poor. Dr. He's training is very high level, without a certain amount of practical experience, it's useless to go." He became confident when he talked about practical experience.

In his impression, Li Chengqian was still clumsily learning to type a few days ago. Moreover, he was addicted to typing games and couldn't seem to stop playing.

This was the typical behavior of a person who had just come into contact with computers.

"Oh, I see." Jian Qingli had a faint smile on her face, and a trace of disappointment flashed in her eyes.

"There's one more thing. We've confirmed another member of our team today. His name is He Hongyun. He just transferred to our school. I heard that he's very skilled, but he's very arrogant."

"I heard from Teacher Tian Wenming that He Hongyun is Dr. He's son."

"It's all thanks to He Hongyun that we have the chance to participate in the special training in Tianbao this time." Bi Jialiang was in high spirits as he shared whatever he thought was worth sharing with Jian Qingli.

Jian Qingli was not very interested initially, but when she heard this, she was finally intrigued. "How does He Hongyun's skills compare to yours?"

"Teacher Tian said that he's better than me, but we'll have to give it a try to know his true level. I think his level should be about the same as mine at most." Bi Jialiang looked unconvinced.

He was very confident in computer technology. Even if He Hongyun's father was a computer science professor, he might not be better than him.

"This is a good thing! This way, our chances of entering the top 50 will be even higher." After Jian Qingli heard this, her eyes lit up. Since the two of them were about the same level, they would make good teammates during the competition, it would be much better than fighting alone.

Jian Qingli had already tested the waters with Li Chengqian. He had no intention of letting her join the team at all. This made her resentful.

Therefore, the stronger the team was now, the happier she was.

It would be best if her team was stronger than Li Chengqian's. Her team would surpass his team in every competition and cut him down to size.

She would show Li Chengqian that he wasn't the only clever person on earth.

"Teacher Tian said so too. The probability of us getting into the top 50 in the country is very high." Bi Jialiang smiled with pride in his eyes.

He was just short of saying to Jian Qingli, "I'm awesome, right? I'm the best choice for you."

"That's great." Jian Qingli also smiled. This time, it was a genuine smile.

"Jian Qingli, I think you've been very unhappy these past few days. Did Li Chengqian show off in front of you that he scored 750 marks?" Seeing that Jian Qingli finally relaxed and smiled, Bi Jialiang asked the question he had been wanting to ask.

"No." Jian Qingli shook her head. Li Chengqian had never mentioned his score.

"Jian Qingli, you have to think about it this way. Li Chengqian was indeed capable to have scored 750 marks and enrol in Divine Dragon University!" Bi Jialiang wouldn't dare to deny this. He changed the topic. "But we won't be inferior to him."

“As long as we work hard in the Junior Informatics Programming Competition and get into the top 50 in the country, we can still go to Divine Dragon University.”

“When you think about it this way, you’ll think that we’re better than Li Chengqian.”

“Because he can’t help others, but we can.” Although Bi Jialiang said ‘we’, he was actually expressing that he was powerful. He could bring Jian Qingli to Divine Dragon University, but Li Chengqian couldn’t!

He was telling Jian Qingli in a roundabout way that although his results were not as good as Li Chengqian’s, he was better than Li Chengqian in other aspects!

“Okay!” Jian Qingli nodded. She understood what Bi Jialiang meant, but she didn’t say anything else.

...

In the library, Li Chengqian stopped his rapid typing on the keyboard and looked out the window at the greenery in the distance, allowing his eyes to rest.

The feeling of short-sightedness was so uncomfortable. In order to prevent short-sightedness again, Li Chengqian strictly followed the 3-20 rule of using his eyes to protect himself.

Use your eyes for no more than 20 minutes at close range, rest your eyes every 20 minutes, look into the distance of 20 feet (about 6 meters), and relax your eyes for 20 seconds.

(I suggest that readers do the same, especially the younger ones. Protect your eyes...)

This way, after his eyes were fully rested, it would not be so easy for him to be short-sighted again.

After resting, his gaze returned to the programming codes of Shenlong optimization software on the computer.

[Divine Dragon Optimization software completion rate: 65%!]

A translucent notification that only he could see appeared.

“If I was able to code properly last night, I would have been able to push the completion rate of the Shenlong Optimization software to 95% today.”

“Based on this rate, I will only be able to complete the beta version of the software on Sunday.” Li Chengqian did a mental calculation and came to this conclusion.

“After I take on the Software Engineer profession, coding would be a breeze.” Li Chengqian recalled that in his previous life, in the Master of all Professions game, the first skill of a Software Engineer was called Mental Coding. The faster one’s thoughts were, the faster one could write codes.

“I should just focus on completing the Divine Dragon Optimization software for now.” Li Chengqian immediately felt motivated again when he thought of the rapid input ability of the Mental Coding skill. His fingers started moving rapidly on the keyboard again.

At this moment, Zhao Peng walked in from outside, panting. When he came to Li Chengqian’s side and saw Li Chengqian’s fingers typing rapidly, he was stunned.

Then, he saw that on the computer screen, in just a breath’s time, more than ten long lines of code had been typed out by Li Chengqian on the blank page.

Lines of code quickly scrolled up. The speed at which Li Chengqian typed was even faster than he could read.

...

“F\*ck, this typing speed is too impressive! If he were to play an esports game, he would beat anyone flat.” His jaws dropped when he saw this.

“How did Li Chengqian manage to develop such dexterity? Could it be that he worked in a beauty salon?”

### 53 Teammate

Zhao Peng waited for twenty minutes before Li Chengqian stopped.

In these twenty minutes, Li Chengqian’s fingers didn’t stop at all. He wrote a total of 225 lines of code.

Although Zhao Peng wasn’t very good technically, he knew the programming speed of programmers.

As long as he could write 100 lines of effective code a day, he was already at the level of a world-class programmer.

In the past 20 minutes, Li Chengqian had written 225 lines of code. He was already twice as good as a world-class programmer.

What made Zhao Peng even more amazed was that in 20 minutes, Li Chengqian actually didn’t make a single correction. This meant that Li Chengqian was especially confident that his coding was flawless.

Of course, there was another possibility, which was that Li Chengqian was simply blindly coding.

If he hadn't heard about Li Chengqian's Data Restoration software and what happened with Liu Wendao, Zhao Peng would definitely have thought that Li Chengqian was blindly coding.

Now, he only had one feeling, and that was to concede defeat!

He was indeed awesome!

"Hello, Li Chengqian. I'm Zhao Peng from Grade 12 Class 2. I..." Seeing Li Chengqian stop, Zhao Peng quickly introduced himself.

"May I ask if your team is still short of one person? May I join your team?" Zhao Peng asked with an expectant look.

"How did you know about me? Why do you wish to join my team? What can you do after joining my team?" Li Chengqian asked curiously.

"I knew you when you scored full marks," Zhao Peng answered honestly. Because he scored full marks, the entire province's third-year students would probably remember Li Chengqian's name.

"I want to join your team because I know that your skills are very good. If I join your team and follow you, I'll definitely be able to enter the top 50, a lousy student like me would also be able to enter Divine Dragon University." Zhao Peng was very honest and straightforward.

"You know that my skills are good? How do you know?" Li Chengqian became serious. Other than Officer Wang Limin, he didn't seem to have revealed his programming skills to anyone.

At this point in time, only the relevant personnel at the Municipal Bureau knew that his skills were not bad.

How did this little fatty know?

"My uncle is in the Internet Security department of the Municipal Bureau. He was the one who told me," Zhao Peng said nervously.

"Oh, so I see." Li Chengqian suddenly understood. This way, it made sense. Li Chengqian thought for a moment and said, "Then tell me now, what can you do?"

"My... hand speed is relatively fast. I can be your assistant. I also have a better understanding of where to eat and what to do in Tianbao City. I can be in charge of both

aspects.” Zhao Peng had initially wanted to say that his programming skills were not bad, but when he thought of Li Chengqian’s skills, he really couldn’t bring himself to say so.

Compared to Li Chengqian, his skills were too lousy.

“Hand speed is relatively fast?” Li Chengqian’s eyes lit up, and a very good idea came to him.

Don’t get the wrong idea. Li Chengqian didn’t have any bad intentions. He just wanted Zhao Peng to become his input tool and help him share the workload.

“How’s your typing speed?” Li Chengqian continued to ask.

“About 100 Chinese characters per minute if I take into consideration accuracy,” Zhao Peng answered honestly. This typing speed was all because of his gaming.

Li Chengqian did a mental calculation. If this speed was used to enter codes, he should be able to enter 150 characters in a minute.

“Have you learned C language?” Li Chengqian continued to ask.

“I’ve learned it before. I obtained a C Language Level Two Certificate last year,” Zhao Peng answered honestly. He realized that he was even more nervous when facing Li Chengqian than when facing a teacher. His usual cheeky smile had completely disappeared.

“Sit down and show me what you’ve got!”

Zhao Peng sat down excitedly. Although Li Chengqian hadn’t explicitly agreed, asking him to sit down and give it a try meant that he had got one foot in the door.

“Don’t do this rubbish. I’ll read, and you’ll type.” Li Chengqian shifted his gaze to the computer, and his fingers started moving again. He dictated the codes for Zhao Peng to type as he kept writing them.

“Awesome, too awesome! As expected of Awesome Li! Is he even human?” Zhao Peng was stunned by his performance.

Three hours later...

[Divine Dragon Optimization software completion rate: 75%!]

Compared to this morning, the completion rate had increased by 10%.

Li Chengqian looked at the completion rate displayed on the Divine Dragon and nodded in satisfaction. "With some help, the efficiency has increased a lot."

He completed 8% and Zhao Peng completed 2%.

If Zhao Peng kept helping him, the software would be completed on Saturday instead of Sunday.

Li Chengqian packed up his computer and walked out of the library in high spirits.

Zhao Peng followed behind Li Chengqian. His face was pale, and his eyes were listless. He was totally drained and exhausted. His hair and face were covered in grease, as if he had been gruesomely tortured.

Even when he walked, Zhao Peng was trembling. He looked like he had been drained of all his energy.

"If you're too tired, go back and rest first. I'll tell Teacher Tian Wenming about you joining our team," Li Chengqian said, feeling sorry for him.

"Captain, I'm not tired! I'll go to Teacher Tian Wenming's office with you." Zhao Peng straightened his back and forced himself to speak. At noon today, Teacher Tian Wenming was going to announce the participants list.

Zhao Peng had to go and see if his name was on the list before he could be at ease.

At such a critical moment, he had to persevere no matter how tired he was.

If there were any unexpected developments, he could at least resolve it.

"Beast, he's simply a beast. He is good in his studies, good in his skills, and even his stamina is so good. We are nothing compared to him!" Seeing Li Chengqian's energetic appearance, Zhao Peng turned green with envy.

"Actually, you don't have to worry. Teacher Tian doesn't know my skills and doesn't think highly of me."

"Therefore, he basically won't care about this team. He won't care if you join my team."

"Everyone's focus is on Bi Jialiang's team now." Li Chengqian instantly understood what Zhao Peng was worried about.

To put it bluntly, everyone felt that Li Chengqian didn't have any hope of getting into the top 50 in the country, so they didn't care much about the remaining spot in Li Chengqian's team.

What everyone cared about was the remaining spot in Bi Jialiang's team.

In their opinion, Bi Jialiang had a chance of entering the top 50.

...

As long as he joined Bi Jialiang's team, there was a high chance that he would be qualified to study at Divine Dragon University without having to take the entrance exam.

In the past few days, other than Jian Qingli who wanted to join Li Chengqian's team, only Zhao Peng asked to join his team.

It was impossible for him to allow Jian Qingli to join! Li Chengqian would only make her watch him win the championship, there was no way he would bring her into his team to win the championship together.

Zhao Peng spoke sincerely and was not dislikable. He had also been rather obedient so far.

In addition, Zhao Peng's relative was at the Municipal Bureau. After much consideration, Li Chengqian decided to let Zhao Peng join his team.

In any case, it would be a waste not to add Zhao Peng.

Because no one felt that he would achieve much in the Junior Informatics Programming Competition.

"That's because they're blind and don't know how powerful you are, Captain. If the people in the school knew about your skills, I wouldn't have been able to get this spot so easily." Zhao Peng's eyes were filled with admiration. He wasn't pretending at all.

He had truly witnessed Li Chengqian's prowess in the past three hours!

Most of the codes Li Chengqian read out was difficult programming. There were very few C-language codes. Although he typed in the codes, he didn't actually understand the specific meaning at all.

Although he had worked with Li Chengqian for three hours, he still didn't understand what Li Chengqian was writing and what it was for.

...

"When the results of this Junior Informatics Programming Competition are out, those who don't believe you now will definitely be so shocked that their jaws will drop to the ground and they will regret it." Zhao Peng was extremely confident about this.

Then, Zhao Peng said firmly, "Captain, don't stop me. I have to go to Teacher Tian's office. I won't be at ease if I don't see my name reported. This is the admission ticket to Divine Dragon University."

"Alright, I had wanted you to go back and take a nap, so that we can continue writing codes in the afternoon."

"If you are not going to take a rest, we'll go back to the library to continue after signing up at Teacher Tian's place," Li Chengqian said with a smile.

"What?" Zhao Peng was dumbfounded. His entire body trembled. He almost cried. "Captain, you're still writing codes?"

"Yes!" Li Chengqian replied without turning his head.

"Captain, in that case you have to at least tell me what this software does, right?" Zhao Peng accepted his fate.

"An Android app."

## 54 Taking Leave

In Teacher Tian Wenming's office, the two teams from Tianyi High School sat on the sofas on both sides.

On Li Chengqian's side, only Ding Ling came first. After Li Chengqian came over, she saw Zhao Peng following behind. Ding Ling asked curiously, "Li Chengqian, who is he?"

"You must be Ding Ling, right? My name is Zhao Peng. I'm a new member of your team." Obviously, Zhao Peng had done a lot of work before looking for Li Chengqian. He knew about Ding Ling.

"En." Li Chengqian nodded. "Ding Ling, his programming ability is not bad. His typing speed is also quite fast. He's an okay fellow."

"Welcome!" Ding Ling replied expressionlessly. Other than when she was facing Li Chengqian, she was very cold at other times.

She was actually very happy with Zhao Peng's participation, and there was nothing to be dissatisfied with. In fact, she was even happier because of Zhao Peng's participation.

After Zhao Peng joined, the team was full. It was impossible for Jian Qingli to join again.

Opposite them, Jian Qingli, who was sitting on the sofa, gritted her teeth in hatred after hearing their conversation. She had told Li Chengqian several times that she wanted to join his team, but he had mercilessly rejected her.

Li Chengqian had now actually accepted a loser like this little fatty into the team!

Too much, he was too much.

The more Jian Qingli thought about it, the more angrier she became.

“Although Li Chengqian said that he has the confidence to enter the top 50 in the province, it’s still unknown if he can do it or not. It’s actually not too bad to follow Bi Jialiang and the other two.”

“It’s best if Li Chengqian’s team is eliminated in the preliminary round!”

“This is the only way to put him back in his place.”

“Otherwise, he is so cocky now. I really feel like slapping him whenever I see him.”

Thinking of Li Chengqian’s dejected look, Jian Qingli’s mood couldn’t help but improve a lot.

At this moment, a tall and thin boy with a pale face and dark circles around his eyes was sitting closest to Teacher Tian Wenming. He was wearing black shirt with a pair of blue jeans.

When Li Chengqian came in, he glanced at Li Chengqian from the corner of his eyes. Then, he shifted his gaze to the book in his hand, “30-day homemade operating system”. He had recently discovered this book. It was very difficult, but it was very inspiring to him!

Every chapter was obscure and difficult to understand, he had to read it repeatedly.

He had heard of Li Chengqian before. He was a high flyer who scored 750 marks in the second mock exam.

However, He Hongyun was extremely confident. Although he was inferior to Li Chengqian in terms of textbook results, he was confident that he was way better than Li Chengqian in terms of programming.

In Li Chengqian’s case, when he first transferred to Tianyi High School, Tian Wenming had specially told him that his theoretical knowledge was especially solid, but he had almost no hands-on experience.

“No wonder he could score full marks. He’s just a bookworm who only knows how to regurgitate texts.” He instantly wrote off Li Chengqian as an opponent.

Seeing that everyone was here, Tian Wenming looked around seriously. “I asked everyone to gather here today to talk about three things.”

“Firstly, He Hongyun has joined Bi Jialiang’s team to participate in this competition. He Hongyun has been exposed to computing since he was young. His programming proficiency is very high. He has contributed codes to the Linux desktop in the open source community and developed some minor software himself.”

“His participation can greatly increase the possibility of your team entering the top 50 in the province.”

When He Hongyun was being introduced by Tian Wenming, he put down the book in his hand with a proud expression and a proud smile on his face. He only nodded and didn’t say a word. That to him, was a good enough greeting for everyone.

Tian Wenming felt a headache when he saw He Hongyun’s proud behavior, but he couldn’t say anything.

Then, he glanced at Zhao Peng, who was sitting beside Li Chengqian. “Li Chengqian, I see that your team has also added a new member. You should also introduce him to everyone.”

“Grade 12 Class 2, Zhao Peng, my team member. He’s good at typing and is very fast. He can help me.” Li Chengqian thought for a moment and introduced everyone.

A good typist. What kind of introduction was this!

Zhao Peng’s expression turned awkward. He thought to himself, “Awesome Li thinks I’m just a typing machine.”

“Pfft...!” Jian Qingli was amused by the introduction. This was not a typing competition. What was the use of typing quickly?

“What the... What’s the connection between fast typing and good computing skills?” Bi Jialiang rolled her eyes at Li Chengqian.

“Haha...” He Hongyun had a mocking expression on his face. “It looks like Li Chengqian’s actual combat skills are very poor. He thinks a person who can type faster is considered to be good. One can only imagine his own standards.”

Then, he lowered his head to read his book and stopped looking at Zhao Peng.

Even the corners of Tian Wenming’s eyes twitched because of Li Chengqian’s introduction.

“Teacher, and all the students, my name is Zhao Peng. I hope to learn from everyone in the future. Actually, other than what Li Chengqian said, my C language is quite good. Last year, I obtained a Level 2 Computing Certificate in C language.” Zhao Peng hurriedly introduced himself humbly.

He secretly swore in his heart that he would never give Li Chengqian a chance to introduce him again.

Ridiculous, simply ridiculous!

He Hongyun lowered his head to read his book and did not look at Zhao Peng.

Because of Li Chengqian's introduction, Jian Qingli and Bi Jialiang had preconceived notions and did not pay much attention to Zhao Peng's introduction.

The Level 2 Computing Certificate was a very basic level certification. The entry criteria for the Junior Informatics Programming Competition was higher than Level 2.

"Alright, Zhao Peng, take a seat first. I'll talk about the second matter." Seeing that Zhao Peng was a little embarrassed, Teacher Tian Wenming spoke.

"The preliminary round of the Junior Informatics Programming Competition will be held at the provincial Big Data Center at nine o'clock next Monday morning. I'm going to collect my admission ticket on Sunday afternoon. I'm preparing to leave for the Provincial Capital this afternoon. What do you think?"

He wanted to bring the team for Dr. He's training first.

Moreover, there was another benefit of going in advance, which was that he could familiarize himself with the examination environment.

"We're fine," Bi Jialiang replied excitedly. He secretly sized up the beautiful Jian Qingli, and his heart was palpitating.

"Teacher, I still have something on and can't leave. I'll go look for you guys on Sunday. What do you think?" Li Chengqian raised his hand and voiced his thoughts.

The head of the Municipal Bureau's Internet Security department had sent him a message, asking him to go to the Municipal Bureau today to help restore the data of a hard disk. He had already agreed, so he naturally couldn't go back on his word.

"Li Chengqian, wait for me to tell you the third matter. You can then decide if you want to go with me today." Tian Wenming did not agree immediately. Instead, he came to the third matter.

"Thirdly, I've found a big shot to train you in Tianbao City. His name is He Jingguo. He has a PhD in Computer Science and his standards are exceptionally high. He's currently a professor in the Computer Science Department of Qianling University."

"I've made an appointment with him. I've asked him to train you guys for two days, starting Saturday morning and ending Sunday afternoon. It would be a pity to miss it."

"I believe that after his training, your standards will improve immensely. The chances of winning an award in the Junior Informatics Programming Competition will also increase greatly," Tian Wenming looked at Li Chengqian and said.

...

Naturally, he would not exclude Li Chengqian from the training as Bi Jialiang thought. After all, they were all his students. When they had sufficient resources, they naturally treated everyone equally.

Although he also felt that Li Chengqian was a beginner and he had a weak foundation in actual combat operations, he might not understand Dr. He's class.

It wouldn't be very productive for him to attend the course.

However, Tian Wenming still hoped that Li Chengqian would attend and learn.

He Hongyun, who was disdainful of others, became even more arrogant when he heard Tian Wenming mention He Jingguo. After looking around proudly, his gaze landed on the book again.

"Teacher, I'm really sorry. I really need to apply for leave from you." To Li Chengqian, any training was meaningless to him. His standard was definitely higher than the so-called Professor He. It was a waste of time to go.

In addition, he had already promised to help restore the data, so he couldn't go back on his word.

Moreover, his work on the Divine Dragon Optimization software was at the end stage. He wanted to complete the software as soon as possible so that he can join the Software Engineer profession.

To him, this was the real deal. Everything else was secondary.

"He really doesn't know what's good for him! My father is a big shot. It's his honor to be able to participate in my father's training. He doesn't even cherish such a precious opportunity. Li Chengqian is a stupid idiot! Serves him right for being eliminated in the preliminary round." He Hongyun frowned and looked at Li Chengqian very unhappily.

From the moment Li Chengqian came in, this was the first time he looked Li Chengqian in the eye.

...

"Li Chengqian simply doesn't know what's good for him. Teacher Tian Wenming has already said so, but Li Chengqian still insists on taking leave. He really doesn't cherish

such a rare opportunity. For a big shot like Dr. He to be able to give us training, he's simply doing Teacher Tian Wenming a favor." Bi Jialiang thought to himself.

"Perhaps Li Chengqian is too full of himself now that he has scored full marks in the second mock exam. He doesn't even respect Teacher Tian anymore."

"Or perhaps, Li Chengqian knows that his hands-on skill is not good, so it's pointless to attend the class. That's why he doesn't want to go." The more Bi Jialiang thought about it, the more he felt that the possibility of the latter was very high.

"It's just as well that Li Chengqian isn't going, this way he won't affect my time alone with Jian Qingli..." Bi Jialiang's heart was beating rapidly.

Li Chengqian was insistent on applying for leave. A strange look flashed across Jian Qingli's eyes. "Teacher, I also want to apply for leave..."

Bi Jialiang immediately felt extremely disappointed when he heard Jian Qingli say that she wanted to apply for leave too.

He was looking forward to going to Tianbao City for training mainly because he wanted to be alone with Jian Qingli.

He was hyped up the entire morning because of this.

And now Jian Qingli has actually said that she wasn't going!

His hopes were dashed and his mood instantly fell.

"Teacher Tian, I'm also taking leave..." Ding Ling was following Li Chengqian. Moreover, she didn't know programming, so it would be a waste of time to go for training.

"Teacher Tian, I also have something on and need to apply for leave. When the time comes, Li Chengqian and I will look for you." Zhao Peng thought for a moment and also asked for leave.

Teacher Tian Wenming didn't say much and agreed right away. "Alright, I approve."

"But remember my instructions. You must be in Tianbao City before 3 p.m. on Sunday. Be careful on the way and stay out of trouble."

"That's all. Those who applied for leave can go eat first. He Hongyun, Bi Jialiang, you two stay behind." Tian Wenming waved his hand, indicating that Li Chengqian and the others could leave.

"They don't even cherish such an opportunity, they are not ambitious at all!" He Hongyun was especially upset. He felt offended that Li Chengqian and the others took leave.

"It's precisely because that bastard Li Chengqian took the lead in applying for leave that the others took leave!"

"It's all because of that bastard Li Chengqian." The more He Hongyun thought about it, the angrier he became. He stopped reading and was filled with disgust for Li Chengqian from the bottom of his heart.

"Sigh." Because Jian Qingli had applied for leave, Bi Jialiang was not in a good mood. He sighed. Moreover, he had a horrible suspicion. "Jian Qingli applied for leave because of Li Chengqian."

This thought made Bi Jialiang feel sad and depressed.

"In this competition, I must be better than Li Chengqian! I want to prove to Jian Qingli that I'm very good, better than Li Chengqian."

...

In the afternoon, Li Chengqian took his hands off the computer keyboard.

[Divine Dragon Optimization software completion rate: 87%!]

Li Chengqian's lips curled into a smile as he looked at the programming documents on the computer. He stretched and said to the tired Zhao Peng, "Let's go eat first. We'll continue after we've eaten..."

Hearing the word 'eat', Zhao Peng immediately perked up, but Li Chengqian's words made him shiver.

"Captain, are you still going to continue?" Zhao Peng was on the verge of tears. He didn't want to be a mindless input robot.

"I'm just teasing you. That's all for today. We'll continue tomorrow." Li Chengqian looked at the sullen Zhao Peng and shook his head.

After leaving Teacher Tian's place, Li Chengqian called Zhao Peng to the library to help him enter the codes into the computer.

Zhao Peng even skipped the afternoon classes.

"Learn programming from me and focus on the competition. You will gain direct admission to Divine Dragon University... Why would you still need to attend classes?"

After Li Chengqian said this, Zhao Peng could only grit his teeth and work for Li Chengqian.

Zhao Peng heaved a sigh of relief when he heard that he didn't have to be an input robot for Li Chengqian today. Afraid that Li Chengqian would change his mind, he rushed out of the library like a rabbit. "Captain, I still have something on. I'll leave first. I won't be eating together with you."

Li Chengqian laughed at his mannerism. "It's just writing codes, why is he so terrified?"

After resting for two minutes, Li Chengqian focussed his attention on the chat window.

Qin Datong from the Municipal Bureau Internet Security department had been asking him questions about the Data Restoration software.

There were a few cases where the Municipal Bureau was unable to prosecute the suspect because they couldn't retrieve critical evidence from a faulty hard disk.

They clearly knew who the suspect was, but because they didn't have any concrete evidence, they could only let the suspect go. The Municipal Bureau and the investigation officer were especially upset about this.

They also have engaged data restoration experts, but after repeated attempts, they still couldn't manage to retrieve the data.

The Data Restoration software developed by Li Chengqian gave Qin Datong hope.

Qin Datong asked Li Chengqian for the software in the morning as he wanted to test its functions.

Then, he was dumbfounded. He found that he didn't know how to operate this software at all.

This was because the Data Restoration software developed by Li Chengqian didn't have an interface at all. After opening it, there was only a black operating interface similar to a command line interface.

There weren't any user prompts on this interface either.

He tried the CMD command. It didn't work. There weren't even any prompts.

Although he majored in programming in university, he had no clue how to use this software.

He could only concede that he didn't know how to use this software at all!

“Li Chengqian, can you write down the instructions for using this software?” Qin Datong had no choice but to ask Li Chengqian for help.

The original purpose of this software was to restore the data on Liu Wendao’s computer hard disk.

Therefore, Li Chengqian’s sole purpose was speed. He wasn’t expecting anyone else to use it, so he naturally didn’t consider ease of usage for users.

In order to use this Data Restoration software, he had to enter a compilation code on this black interface.

Compiling codes was very simple for Li Chengqian, but for ordinary people, it was too difficult. Even for people with a certain programming foundation, it would take at least a month to learn it. Moreover, they needed a standing operating manual to guide them, else they would forget how to do it.

“Brother Qin, give me two hours. I’ll change the code. Otherwise, even if I write out the operating manual, it’ll be especially difficult to learn, it’ll take a long time,” Li Chengqian replied.

“Li Chengqian, I’ve already reported to the higher-ups that as long as your Data Restoration software works, it will be helpful for us to solve cases. The Municipal Bureau won’t use your software for free. They will definitely pay you a reasonable fee. You don’t have to worry about this.” Qin Datong’s message came again.

In fact, the Municipal Bureau had already discussed it internally. As long as Li Chengqian’s software was effective and could recover data that even the experts couldn’t, the Municipal Bureau was willing to spend 100,000 yuan to purchase it.

“Thank you, Brother Qin.” Li Chengqian didn’t decline. Then, he closed the chat window and began to work on tweaking the software.

The core Data Restoration function had already been completed. He only needed to create an user-friendly interface for the software.

He added the hard disk display function on the interface, allowing the hard disk that needed restoration to be displayed on the software interface once it is connected to the computer.

He added a data restoration button on the interface so as to execute commands on the hard disk to be restored.

After the data restoration was completed, the intuitive data classification, filtering, preview, and export functions he added would ensure that the user could quickly find and export the files he needed.

...

There is also a need to add features for software authorization to prevent the software he developed from being used by others.

Li Chengqian went online to review a few data restoration softwares and got an idea of how to design the minor details of the user interface.

“Focus!”

“Rational Thinking!”

With the activation of the two Skills, Li Chengqian entered an extremely focused state. At the same time, other than the spirituality of humans, his brain operated like a computer.

The plan that he had just decided on quickly went through his mind. He adjusted it according to the operating methods of the computer. The codes that he needed to write simply flowed, without him having to think.

If he had already taken on the Software Engineer profession and obtained the Thinking Coding skill, he could have entered the codes in his brain into the computer within an extremely short period of time.

But for now, he could only do it manually.

[Tool Mastery skill activated. Your typing speed has increased by 200%.]

A translucent notification appeared in front of him.

Li Chengqian's fingers were like lightning on the keyboard. With a crackling sound, lines of code quickly appeared on the computer.

...

Under his control, the software interface took shape at an extremely fast speed.

After an hour, the effects of the Focus and Rational Thinking skills had just disappeared.

A translucent notification appeared in front of Li Chengqian.

[Divine Dragon Data Restoration software completion rate 100%. Software grade D+.]

“Done!” Li Chengqian smiled.

The design of the software interface was very simple. After opening the software, there would be a prompt to insert the hard disk that required data restoration.

After the hard disk was inserted, it would automatically scan the size of the hard disk. It would also prompt the user to insert another hard disk to act as the storage location for the restored files.

After these steps are done, the software would begin to scan automatically.

There were no bells and whistles on the software interface. There was a prompt for every step.

Any literate person could easily use all the functions of this software as long as they followed the instructions of the software.

Li Chengqian didn't find any bugs in the software after a round of testing. He then proceeded to send the installation package to Qin Datong.

"Send!"

Then, he also sent a message to Qin Datong.

"Brother Qin, I've developed a simple interface. Take a look and see if this meets your requirements."

Looking at the translucent grading indication on the software, Li Chengqian can't help feeling a little disappointed, even though he did expect it.

"Such a pity, the grading of the Divine Dragon Data Restoration software is too low. It is only graded D+. How nice it would be if it could be graded C?" Developing a grade C software was a prerequisite for becoming a Software Engineer.

In fact, when Li Chengqian was developing the Data Restoration software, he had also downloaded a few world renowned data restoration softwares for reference. The highest grading of these software was only grade E.

It was one grade lower than the software he had developed.

"I should continue to refine the Divine Dragon Optimization software! This is my hope for becoming a Software Engineer." Li Chengqian opened the program file of the Divine Dragon Optimization software.

Based on Li Chengqian's estimation, after this software was completed, it should be able to reach grade C.

...

After Qin Datong politely replied that he had received it, he impatiently accepted the software sent by Li Chengqian.

After the installation was completed, he quickly opened it.

The software interface was basic, but he could finally understand and know how to operate it.

“Xiaochen, bring over the hard disk used to test the Data Restoration software the last time,” Qin Datong shouted to a young man in the office.

A few days ago, the Jingguo Data Company came to the Municipal Bureau to promote the Jingguo Data Restoration software. The hard disk used to test the software was still there. It had come in handy for testing the Data Restoration software developed by Li Chengqian.

“Captain, Li Chengqian has already modified the software and sent it over?” Xiaochen asked curiously.

“Let’s also take a look at how well the software developed by Li Chengqian is working.” After hearing Qin Datong, the rest of the team came over to Qin Datong’s office at the same time.

“Let’s just put it to the test! Just like how the Jingguo Data Restoration software was assessed, give me a set.”

“I’m also here to see if this kid’s standard is as godly as the rumors have it.” Because of Liu Wendao’s arrest, word on Li Chengqian’s programming skills had already spread throughout the Municipal Bureau, especially within the Internet Security department. Everyone knew Li Chengqian’s name.

“Quiet, everyone. Let’s test the data recovery function of the Divine Dragon Data Restoration software using the same method that we tested the Jingguo Data Restoration software.”

“Old Qian, you’re in charge of the normal delete test.”

“Xiaochen, you’re in charge of the zone deletion test.”

“Li Zhengdong, you’re in charge of the format restoration test.”

“Wang Meng, you’re in charge of the restoration test after the documents are overwritten.”

"I'll be in charge of testing the versatility of the software. It is stated in the software that it can restore data from mechanical hard drives, solid-state hard drives, and USB drives. Let me try."

"Everyone, get to work. Let me know immediately if there are any results." After Qin Datong made the arrangements, he took some hard disks for testing and went to his computer.

"Yes!" Everyone split up and got started.

Half an hour later, Old Qian was the first to complete the test. He came over with his notebook and reported to Qin Datong, "Captain, the Divine Dragon Data Restoration software can restore 100% of the files deleted by normal methods. One hundred percent of the deleted files in the recycle bin can be restored. In addition to restoring files, it can also restore the catalog tree."

"The speed of data restoration is very fast. It is comparable to direct copying speed."

"The software only uses a read-only mode during the data restoration process. It won't cause damage to the data on the hard disk."

"I've tested the Divine Dragon Data Restoration software. It is without a doubt the best software for restoring normal deleted files!" Old Qian reported solemnly.

"Captain, my zone deletion test has been completed. The results are unbelievable." Xiaochen walked over with a look of disbelief.

"The Divine Dragon Data Restoration software can restore deleted partition tables and restore 100% of the files in the partition. Even the catalog tree can be preserved 100%. All the files after restoration are not corrupted and are error free. The recovery speed is the same as the hard disk speed that the data is recovered from."

"I feel that this software doesn't look like it's restoring files. It looks like it's copying files."

"In terms of regional deletion and restoration, the Divine Dragon Data Restoration software is also the most advanced software I've tested. It's ten thousand times better than the data restoration software that the Jingguo Data Company presented to our bureau a few days ago."

"Captain, we have to buy this software. In the future, when we encounter cases that require data extraction, the Divine Dragon Data Restoration software will be our trump card, our secret weapon!" Xiaochen sang praises of the Divine Dragon Data Restoration software after just one use.

"Don't be anxious. Let's wait for Li Zhengdong and Wang Meng's test results first." Qin Datong's test had also been completed.

Through his simple test, he found that the Divine Dragon Data Restoration software had especially good restoration effects on solid-state hard drives, USB drives, mechanical hard drives, and mobile phones. It was more advanced than any software he had tested before.

An hour later, Li Zhengdong walked into Qin Datong's office looking stunned. "Captain, Li Chengqian is really a genius! This software is too awesome!"

"Did you know? After we used the Divine Dragon Data Restoration software to scan the hard disk, the files on the entire disk were restored, as if the hard disk had not been formatted."

"The average recovery speed is 600 Mb/s. It's the same as the read/write speed of the hard disk. For other softwares, 50 Mb/s was already considered impressive. I remember that the last time the people from the Jingguo Data Company came to promote their data restoration software, they were trumpeting their 60Mb/s speed as a world first."

"I remember their quote was 200,000 a year for software usage, right?"

"Compared to Li Chengqian's Divine Dragon Data Restoration software, the Jingguo Data Company's data restoration software speed is like a turtle crawling."

"Captain, if the price doesn't exceed 200,000 yuan, we'll buy the Divine Dragon Data Restoration software!" Li Zhengdong praised the software developed by Li Chengqian. It was really powerful.

...

"Captain, my test is also completed!" At this moment, Wang Meng walked in. He was very calm as he reported the test results one by one.

"After testing, I found that the Divine Dragon Data Restoration software can restore 100% of a hard disk that has been formatted, and overwritten by other files."

"The restored files only have a damage rate of 0.03%." This was an unbelievable figure.

"The most advanced data restoration software in the world only has a data recovery rate of 23% and a data damage rate of 87% for formatted and overwritten files!"

"The test results of the Jingguo Data Company's data restoration software are as follows: 19% data recovery rate, 93% data damage rate."

"I only have one thing to say after my evaluation of the Divine Dragon Data Restoration software—we have another world leading technology!" Wang Meng's face was filled with admiration.

"I suggest that we purchase software immediately and then perform data restoration and extraction on all the hard disks that data couldn't be extracted from previously." The Municipal Bureau had more than 30 cases that couldn't be prosecuted and closed due to insufficient evidence, as they couldn't extract videos from the hard disks.

They clearly knew who did it, but because they didn't have any concrete evidence, they couldn't put the bad guys away.

And the criminals got away scot free!

Wang Meng estimated that key evidence could be found in 90% of cases if he used the Divine Dragon Data Restoration software. He would then be able to bring the perpetrators to justice and let them receive the punishment they deserved.

"Amazing! He's really amazing!"

...

"Moreover, this software was written by Li Chengqian in one night. Don't you think it's infuriating? Some people just have the talent!"

Thinking of Li Chengqian's age and the time he spent developing the Divine Dragon Data Restoration software, Qin Datong and the others only had two thoughts in their minds.

Totally impressed !

Awesome!

"I'll report to the higher-ups immediately. We have to buy the Divine Dragon Data Restoration software." Qin Datong recorded the test data in his notebook and made up his mind. He walked towards his boss's office.

"Son, the company's registration has been completed." Just as he had gotten home and finished his dinner at night, Chen Li returned home and handed the relevant company documents and seal to Li Chengqian.

Thereafter, the old couple returned to their room and checked the employment ads on their phone app.

Other than registering a company for Li Chengqian that today, they had been looking for a job outside. After walking around for an entire day, they still couldn't find a suitable one. The old couple's worries were written all over their faces.

One can see worry in their eyes.

"I see that this company is hiring cleaners. The salary is more than 2,000 yuan. Let's give it a try tomorrow." After Chen Li saw a message, she discussed it with Li Tianlan in a low voice. They spoke very softly as they were afraid Li Chengqian would hear them.

"You used to work in finance and treasury management. It's better to find related jobs. Forget about manual work. It's tough and tiring. You're old and your health isn't good." Li Tianlan didn't agree with Chen Li at all.

"Old Li, at a time like this, do we still have a choice? We should just find a job first and jump ship when there's a suitable one." Chen Li shook her head.

To be unemployed and sitting at home was driving her nuts, she wasn't the type to sit still.

Although the two of them were discussing very softly and ordinary people would definitely not be able to hear their discussion, Li Chengqian could hear everything very clearly.

When he was reborn, he had sworn to let his parents live a good life. How could he let Chen Li be a cleaner?

"No, Dad and Mom have been busy all their lives. They can't stay idle at all."

"Moreover, Dad and Mom have always been worried about money!" No matter how much they try to cut corners, their family's monthly expenses still come to 10,000 yuan. Although Li Chengqian had given his parents 30,000 yuan, this money would be used up in no time.

It wouldn't last long.

If he could not stabilize his family within three months, there would be big trouble at home. He would have to borrow money to maintain his family.

Actually, Li Chengqian totally understood Li Tianlan and Chen Li's thoughts.

"I had thought that my parents would be at ease after I received the prize money for the Junior Informatics Programming Competition." However, the anxiety his parents were showing now made him understand that neither Chen Li nor Li Tianlan have the patience to quietly wait for that day to come.

That was because the finals would only be held a month later!

If they had to wait for 30 days, every day would be a torture for them.

"I have to think of a way to find something to keep them busy." Li Chengqian looked at the information on the company that had just been registered and suddenly had an idea.

He wanted to upload the Divine Dragon Data Restoration software to the Internet. Just like other software, he would charge a usage fee.

At this moment, Qin Datong's message came.

"Li Chengqian, we've already tested your Divine Dragon Data Restoration software. The software works very well. It's indeed more advanced than any data restoration software on the market."

"We've reported the results of the test to our superiors."

"There's one last question I need to confirm with you."

"How much are you going to charge for the Divine Dragon Data Restoration software?" Qin Datong had already reported the test results to Chief Zhao. Chief Zhao's position was very clear. As long as the price did not exceed 200,000 yuan a year, he would sign the contract with Li Chengqian.

Li Chengqian looked troubled. Although he had written the software and knew that it was more advanced than any data restoration software in the world, he had never studied the pricing issue.

He needed to go online and see how the other data restoration softwares were priced.

Qin Datong sat in front of the computer. He waited and waited in vain for Li Chengqian's reply.

"Xiaoqin, what's going on? Are you done? We're still waiting to use the software!" The person who spoke was Wang Dawu from the Criminal Investigation department of the Municipal Bureau. After hearing that the Internet Security department had a software that could restore the data from hard disks, he came looking for Qin Datong in the middle of the night.

"Xiaoqin, what's wrong with you? Why haven't you negotiated the deal yet!"

"Xiaoqin, stop dawdling. Just ask him if he would take 200,000 per year!" Wang Dawu said loudly as he walked over anxiously.

Qin Datong had a bitter smile on his face. "Brother Wang, who would quote their maximum price upfront! Why don't we wait a little longer and wait for him to quote a price?"

"Xiaoqin, what are you waiting for? We're not a company, so we don't have to consider profit and loss! Our duty is to uphold justice, keep peace, fight criminals, and bring them to justice."

“As long as we achieve these goals, the money spent is worth it.”

“The Divine Dragon Data Restoration software has been tested by you. It’s the most advanced software. It can restore hard disk data that other softwares can’t recover!”

“I remember that the data restoration software you bought last year cost 200,000, right?”

“Then why can’t we use the same price to buy a more advanced software now?” Wang Dawu opined.

Qin Datong could only smile bitterly. “Brother Wang, I’ll listen to you. I’ll ask Li Chengqian what’s going on.”

“Li Chengqian, how about 100,000 per year?” Qin Datong thought about it. Although what Wang Dawu said was very blunt, it did make sense. Then, seeing that Li Chengqian still hadn’t replied, he took the initiative to send a message.

However, he quoted half the amount he budgeted.

...

Li Chengqian was still researching the pricing of other data restoration softwares on the Internet. He wanted to do a summary and then give Qin Datong a quote. At the same time, he thought about researching the pricing of other softwares so as to make a price list for personal subscriptions.

However, he realized that it was not easy to do so because the price range of data restoration softwares was too wide. The most expensive one was 500,000 a year, and the cheapest one was free. Ordinary softwares cost less than 1,000 a year.

“This is too troublesome. After the company’s framework is set up, I’ll only be in charge of software development. I’ll find a specialized person to be in charge of everything else.” Li Chengqian’s head was throbbing.

Just then, a message from Qin Datong popped up.

“The first offer is 100,000?” When Li Chengqian saw this price, his heart skipped a beat and he became excited.

Although this price was not very high compared to the most expensive data restoration softwares out there, it was still a huge sum of money for Li Chengqian.

Since Qin Datong was willing to offer 100,000 on his first try, it meant that there was still room for negotiation.

Li Chengqian knew this very well.

However, Li Chengqian also knew that the Municipal Bureau's purpose for buying this software was to fight crime.

Therefore, after mulling over it, Li Chengqian decided not to bargain with Qin Datong.

"Okay, I agree. Thank you, Brother Qin."

When Qin Datong Li Chengqian's message, he was stunned for a moment and said in disbelief, "Why didn't this kid bargain with me?"

Then he thought of Li Chengqian's age and he felt a trace of guilt. He thought to himself, "Is this considered bullying a little kid?"

The two of them immediately proceeded to discuss the terms of the software purchase.

...

They agreed to sign the contract at the Municipal Bureau the following morning.

"Big Brother Wang, why do you think Li Chengqian didn't bargain with me?" Qin Datong looked uneasy.

"Ha, Li Chengqian is just a 17-year-old kid. How can he bargain with you? You're simply bullying the kid." Wang Dawu joked.

"Hurry up and install the software. I want to see for myself if the Divine Dragon Data Restoration software is as amazing as you guys claimed." Then, Wang Dawu urged impatiently.

"Over the years, our department has accumulated 56 hard disks from which data couldn't be restored. These involved 37 cases. I've already asked someone to bring the hard disks over."

"We have to work overtime tonight to recover the data!"

"As long as the data is restored, I'll arrest those bastards tomorrow and send them to the prisons." The suspects of these 37 cases had to be released as there was insufficient evidence in the past.

The police officers were all seething with anger.

Because they couldn't crack these cases, their bosses reprimanded them and kept applying pressure on them.

“I’ll work overtime with you guys too. Let’s see how effective the Divine Dragon Data Restoration software is in actual combat!” After Qin Datong heard Wang Dawu’s words, he became solemn.

Qin Datong felt the same way as Wang Dawu. People have to pay for their crimes!

...
