He just wants to practice quietly and wait for the day of ascending to the immortal world.

From then on, everything in the outside world has nothing to do with him.

"What, the spiritual energy of Blue Star is reviving, and the beasts in the mountains and forests are gradually becoming monsters?"

"Don't worry, it's just a small monster, I don't need to take action."

"An eight-clawed monster appeared in the sea, no one can stop it, the federal government is ready to use bullets to solve it."

"Zhuo, you are really too weak, let me do it."

He just saw his right hand slash.

A magnificent sword light suddenly flashed on the sea thousands of miles away.

The sword light split the sea surface in two, and it took a long time to return to calm.

Only two pieces of the eight-clawed monster's corpse were left at the scene.

A few years later, a colorful immortal ladder appeared above Zhang Yuhe's head.

Chapter 1 "Yufantian"

"Yufantian" will officially start at 8 o'clock tonight. Let us look forward to the lucky ones who are qualified to participate and bring good news to everyone."

"According to expert analysis, "Yufantian" is a high-dimensional civilization's mental invasion of Blue Star. Experts call on everyone to remain vigilant and try not to participate or contact, so as not to bring disaster to Blue Star."

"Bang."

Zhang Yuhe turned off the TV and said to himself.

"It's nonsense. Who can resist the temptation of immortality?"

Want everyone not to enter the game? How is this possible? It's simply a fantasy.

Zhang Yuhe doesn't know what others think, but he must enter the game to try it himself.

How can you know if it's true if you don't go in and take a look?

As for whether it will bring disaster? Have you heard the story of worrying about the sky?

Why think so much?

Even if there will be a flood tomorrow, he will go into "Yufantian" tonight to see if there is really a place in the world where he can cultivate immortality.

...

A month ago, a game called "Yufantian" suddenly appeared in the public's field of vision.

No one knows who developed this game, and no one knows who is operating this game behind the scenes.

There are only overwhelming advertisements, which constantly fill all advertising platforms.

Even CCOV will occasionally show advertisements for "Yufantian".

These advertisements seem to appear for no reason.

All platforms have tried every possible way, but still cannot stop the automatic invasion of "Yufantian" advertisements.

It's like there is an omnipotent hand controlling everything behind the scenes.

All these things make "Yufantian" shrouded in a mysterious veil, which arouses people's endless reverie.

The advertising slogan of "Yufantian" is also very exaggerated, even to an outrageous degree.

According to "Yufantian\

, "As long as you enter "Yufantian", you can obtain the method of cultivating immortals, you can embark on the road of cultivating immortals, and even have the opportunity to ask for immortality and ascend to the immortal world.

Moreover, all the abilities and items obtained by players in "Yufantian" can be directly brought to the present world.

Cultivating immortals?

Immortality?

Ascending to the immortal world?

The abilities and items in the game can also be brought to the present world?

This is totally not human talk.

Because this is simply a myth.

If it weren't for the fact that the person behind the scenes could not be found, everyone would definitely think that someone was crazy.

It's completely crazy talk.

However, "Yufantian" seems to be omnipotent, and advertisements are everywhere.

This has to make people have strange thoughts.

Maybe it's true.

What if it's really possible to cultivate immortals.

Who would want to miss such an opportunity?

However, not everyone can enter "Yufantian".

According to "Yufantian", only those who are detected to have the qualifications to cultivate immortals will be allocated props to enter the game.

All Blue Star people who are over 16 years old can go through the "Yufantian" website to remotely take the qualification test.

After passing the test, the props for logging into the game will be issued immediately.

Zhang Yuhe subconsciously looked at his desk, where an octagonal pagoda about a foot high stood quietly.

"Can this thing really let me enter the game?"

This octagonal pagoda is the login prop issued by "Yufantian".

And it also has a very nice name, called Feixiantai.

After passing the qualification test, this Feixiandai appeared on Zhang Yuhe's desk inexplicably.

The situation really frightened him, and he thought he had seen a ghost.

He even called up the surveillance camera at home and looked again and again, but he couldn't find how this thing appeared.

In fact, it's not just Zhang Yuhe who is like this.

The same is true for other people who passed the test. Inexplicably, there is an octagonal pagoda next to them.

This kind of thing that cannot be explained by science caused huge waves at the time.

It is precisely because of this that Zhang Yuhe is more determined to enter Yu Fantian to have a look.

See if you can really cultivate immortality and seek immortality.

Are the once distant fairy tales about to come to this world?

For this reason, he quit his job last month and concentrated on waiting for the release of "Yufantian".

The clock slowly passed by, and there were still five minutes left before the game started.

Zhang Yuhe took out a cigarette from the table and lit it silently to calm down his excitement.

At this time, he was indeed very excited.

There is both the expectation of cultivating immortality and the fear of the unknown.

All kinds of indescribable emotions made him unable to calm down for a while. Soon, after smoking a cigarette, Zhang Yuhe quickly dressed up, and then picked up a sheathed long knife from the table.

Clang...

Pulling out the long knife, Zhang Yuhe said to himself.
