### Section 118

The demon army will arrive at the Demon Suppression City in half a year at most.

Even if he works hard to practice now, he won't improve much.

But this magical power of transforming into thousands of bodies, once it is successfully deduced and improved.

It may be of great help to the upcoming war.

Time passed slowly.

Two months later.

Zhang Yuhe suddenly opened his eyes.

He quickly pinched the magic formula.

Dozens of figures suddenly flashed around the practice platform.

These figures looked almost exactly like him, but their aura was much weaker.

Only in the early stage of refining emptiness.

Zhang Yuhe's mind moved slightly.

One of the figures waved his fist and punched out of the cave.

Galaxy Dragon Fist.

Seeing this, Zhang Yuhe showed a satisfied smile on his face.

"Not bad, not bad."

He deduced the magical power of transforming into thousands of bodies very successfully.

The incarnation that was transformed can not only exist for a long time, but also use magical powers to attack.

It has basically reached his original idea.

Different from the original version.

After his improvement, these avatars no longer need to split the soul to control.

Because these avatars are created by magic power.

It's a bit like a robot, with a pre-set program to help him handle affairs according to the program.

Of course, the main use of these avatars is to fight.

Just imagine.

Three thousand avatars of the Refining Void Realm lined up in a row, what a powerful force that would be.

You know, there are only three or four hundred elders of the Refining Void Realm in the entire Daosheng Sect.

And the avatars he created are equivalent to ten times the power of the entire Daosheng Sect.

It's simply terrifying.

It wouldn't be an exaggeration to describe it as an army of one person.

Of course.

To maintain the existence of the avatars, or even to fight, he needs to constantly consume his magic power.

But it doesn't matter.

Compared with the consumption of Hunyuan Guiyi, he can still withstand the consumption of maintaining three thousand avatars.

With his Dantian as wide as the sea, it is no problem to maintain the avatars fighting for a few days.

Compared with the original version, the biggest advantage of the improved magical power is that there is no aftereffect.

Even if the incarnation is killed, it is just a loss of some mana.

It will be able to practice and recover soon.

Zhang Yuhe waved his right hand, and dozens of incarnations surrounding the practice platform disappeared instantly.

"Very good, wait for the demon army to arrive, and then give them a surprise."

Zhang Yuhe has already thought about how to use this magical power.

That is to stand on the city to defend.

Once the demons attack, the three thousand incarnations will occupy one side and constantly use their various magical powers to fight the enemy.

Three thousand incarnations are equivalent to three thousand turrets of the Refining Void Realm.

And he can watch the battle quietly from the side, and only needs to deal with those demons in the Mahayana Realm.

With three thousand more Refining Void Realm, let's see how the demons will attack the city.

Zhang Yuhe expressed a little expectation.

"Since it has been improved, should we give this magical power a new name?"

Thinking that the improved version is fundamentally different from the original version, it can be regarded as a new magical power.

Zhang Yuhe plans to give it a new name.

"Let's call it the Galaxy Incarnation Technique."

In his opinion, although this magical power has infinite uses, it is only a small technique.

In large-scale combat, the three thousand incarnations are extraordinary.

But in the duel between masters, this magical power is useless.

When facing the Mahayana realm, no matter how many incarnations there are, they are not enough for a person to hit with one palm.

So, Zhang Yuhe thinks that this is just a small technique.

Just use it temporarily, don't spend too much thought on it.

Take back the incarnation.

Zhang Yuhe took out a crystal clear bead.

It was the ninth-grade spiritual essence obtained from Wu Tian.

He has been thinking about how to make this thing work to its maximum effect.

Wearing it directly on the body can indeed increase the speed of cultivation.

However, Zhang Yuhe felt that perhaps he could dig a little deeper.

For example, he could refine the spiritual essence into a treasure that could assist in cultivation.

Zhang Yuhe thought silently.

Various ideas kept appearing in his mind.

Ten days later.

Zhang Yuhe held a small and exquisite nine-story pagoda in his hand, with a smile on his face.

He combined the five elements to refine the spiritual essence into this pagoda.

The effect of assisting cultivation was stronger.

"Let's try it first."

Zhang Yuhe walked out of the cave and threw the exquisite small pagoda to the open space.

The exquisite small pagoda swelled in the wind.

Soon, a tall nine-story pagoda stood on the mountain peak.

The surrounding spiritual energy, like a swarm of bees, quickly gathered towards the pagoda.

Zhang Yuhe stepped into the top floor of the pagoda.

I saw a cultivation platform in it.

He walked up to the cultivation platform and sat cross-legged.

Slowly running the Hunyuan Tianjing, countless spiritual energy quickly gathered in the dantian.

"It's so cool."

After some experience, Zhang Yuhe couldn't help but exclaim.

He silently calculated.

The speed of cultivation here is at least ten times faster than outside.

If he maintains this cultivation speed, he may be able to cultivate to the middle stage of Mahayana in less than a hundred years.

"Very good, it is indeed worthy of being a combination of the spirit gathering array and the spirit essence."

"Let's call it the Spirit Gathering Tower."

Zhang Yuhe happily gave this spiritual treasure for auxiliary cultivation a popular name.

A mountain is not high, but it is magical if there are immortals.

The name does not need to be too loud, as long as it is useful.

Sitting cross-legged on the cultivation platform, endless spiritual energy gathered in the dantian.

Although the demon army is about to arrive.

But Zhang Yuhe did not take it too seriously.

He had seen the defense of the Demon City.

Not to say that it is impregnable, at least the demons will definitely not be able to break in in a short time.

Taking advantage of this time, he needs to practice more.

Every improvement is a point.

He has already thought about it. When the demon offensive is temporarily slowed down, he will practice in seclusion.

Try to break through to the middle stage of Mahayana before the cooling of Hunyuan Guiyi is over.

Then he will use the big move to flatten the demons in one wave.
