Section 137

Zhang Yuhe and Wang Guofeng appeared.

At this time, Wang Guofeng was very confused.

He didn't know why Zhang Yuhe suddenly brought him here.

But he didn't ask, but stood respectfully behind him.

Zhang Yuhe looked around.

I saw mountains undulating and stretching endlessly.

Occasionally there are monsters flying and galloping in the mountains.

But they were all the lowest level first-order monsters, not even a second-order monster.

Although the spiritual energy has recovered, it has been more than ten years.

But the monsters on Blue Star have no chance to grow up.

There is no way, because the players are too fierce.

Players have Yu Fantian's resources to help them, and there is also a time difference of a hundred times.

The growth rate is not comparable to that of the monsters. They have already left the monsters far behind.

Not counting Zhang Yuhe himself.

Wang Guofeng is a genuine cultivator of spiritual transformation.

There are even more players in the Nascent Soul and Golden Core realms.

In such an environment, how could a monster have a chance to grow?

But Zhang Yuhe knew that this was not a good phenomenon.

There are no monsters and no resources.

So how will the monks on Blue Star grow in the future?

Do they have to rely on the game Yu Fantian all the time?

If one day the game is disconnected, wouldn't it mean that they will return to the Age of Ending Law?

The best way is to let Blue Star become a real world of immortal cultivation.

However, because Blue Star is too small.

At most, the area is equivalent to a mansion in Yu Fantian.

It is completely impossible for such a small world to grow independently into a world of cultivating immortals.

Therefore, if Blue Star wants to grow independently, it must expand the world.

Zhang Yuhe turned around and asked Wang Guofeng.

"How do you think the immortality of Blue Star is developing now? If there is no Yu Fantian, can the immortality continue in Blue Star?"

Wang Guofeng shook his head and said.

"Definitely not. Without Yu Fantian's support, Blue Star will soon fall into turmoil."

"Blue Star itself cannot produce it. Too many resources for cultivating immortals, even spiritual energy, may escape from Yu Fantian."

"Once the path to immortality is cut off, those players will become so desperate that they go crazy, and eventually the entire world will be destroyed."

Wang Guofeng had already considered this issue, but he was unable to change anything.

In fact, the Immortal Cultivation Alliance has even made many emergency plans for this.

However, no one can say whether these plans will be effective.

But Zhang Yuhe, since this question has been asked, is there any solution?

Thinking of this, Wang Guofeng couldn't help but his eyes lit up.

He asked Zhang Yuhe cautiously.

"I wonder if senior has any suggestions."

Zhang Yuhe glanced around, and then said slowly.

"I plan to build a fairy city here, and then use the fairy city as the foundation to deploy a powerful formation to attract matter in the void and make the blue star expand."

Hearing this, Wang Guofeng couldn't help but have some questions.

he asked again.

"If the mass of the blue star expands, how will the problem of gravity be solved?"

Celestial bodies attract each other and move in the universe due to gravity.

This is a concept that is deeply rooted in the hearts of Blue Star people.

However, Zhang Yuhe didn't think so.

He said calmly.

"I think the entire universe may have been a complete world in the first place, but due to some reason, the world expanded and exploded, and it became what it is today."

"So, I want to reassemble the matter in the entire universe into a big world by setting up a large array with the Blue Star as the center."

"As for the issue of gravity between celestial bodies, this may be just a low-level rule. Under the influence of the formation, there is no need to consider it at all."

"Look at Yu Fantian and Cangyun Realm, two such huge worlds, are they moving around any celestial body?"

Wang Guofeng stood nearby, listening quietly and nodding silently.

He had considered some issues before, but due to his limited knowledge, he had not figured out the key points.

Now that he heard Zhang Yuhe's words, he had some understanding.

The so-called gravity may be just the rules of the Blue Star Universe, not the universal rules of the entire world of immortality.

If Blue Star wants to develop into a real world of immortality, it must look at issues according to the rules of the world of immortality.

There's just one problem.

Is there really any big formation that can combine matter in the entire universe?

Attract them all to Blue Star without causing any damage to Blue Star?

It was hard for Wang Guofeng to imagine what a magnificent formation this must be.

However, he believed that Zhang Yuhe would not act without aim and must be well prepared.

The power of Mahayana monks was completely beyond what he could imagine now.

Since Zhang Yuhe mentioned this matter, he must be certain.

Once this is really accomplished, it will be a grand event that will benefit future generations for hundreds of millions of years.

Zhang Yuhe, who is leading this matter, can be said to be the God of Creation.

And if he is lucky enough to participate in this grand event, he will surely be remembered forever.

Thinking of this, Wang Guofeng couldn't help but get a little excited, and he asked with firm eyes.

"I wonder what senior needs me to do?"

Zhang Yuhe looked around, thought for a while and then said.

"With this place as the center, relocate all residents within a radius of 5,000 miles, and then build a fairy city."

He took out a jade slip, handed it over, and continued.

"Here is the plan of the fairy city. You lead people to build the city according to the blueprint."

"After the city is completed, I will arrange the corresponding formation to attract the matter in the universe."

"Please rest assured, senior, I will do my best to get this done as soon as possible."

Wang Guofeng took the jade slip and said with a firm look.

...

Chapter 127 Mahayana Perfection

After returning to Wangjing City, Wang Guofeng quickly communicated and negotiated with the federal government.

Relocating the people within a radius of 5,000 miles around Kunlun Mountain is not a simple matter.

You know, the total area of the entire Blue Star is only 80,000 miles.

Wanting to set aside 5,000 miles of land in the center of the world to build a fairy city.

This is definitely a groundbreaking event.

The number of people involved in the migration is hundreds of millions.

If this matter is to be accomplished, the federal government must assist.

You must know that Blue Star is not like Yufantian, where mortals have no status at all.

Blue Star is a society ruled by law.

No matter how powerful the cultivators are, they cannot interfere with the lives of ordinary mortals.

If there is a need, it must be negotiated.

However, with Wang Guofeng's current status on Blue Star, there will naturally be no big problem.

He roughly explained Zhang Yuhe's idea to the federal government.

Of course, he did not mention Zhang Yuhe for the time being.

He just said that he had obtained some kind of opportunity in Yufantian, which recorded a special formation.

It can be used to expand the world.

Without Zhang Yuhe's consent, Wang Guofeng dared not reveal his identity.

After listening to Wang Guofeng's narration, the federal government immediately expressed its support.

With the advent of the era of immortal cultivation, everyone has seen the vastness of Yufantian.

I have long felt very helpless about the smallness of Blue Star.
