Chapter 138

Such a small world is not enough for those immortal cultivation players to display.

They are really a little worried that those players will destroy Blue Star one day.

If the world can really be expanded, naturally no one will object.

Although they still have some doubts about whether Wang Guofeng can do this.

After all, it sounds like talking about the Book of Heaven.

However, in everyone's mind, Wang Guofeng is the first person in the immortal way of Blue Star.

His knowledge is naturally not comparable to that of ordinary people.

The Divine Transformation cultivator has the power to move mountains and fill the sea.

Maybe Wang Guofeng really has a way to gradually expand the world by arranging a large formation.

If this can really be done, it will surely open a new era for Blue Star.

Soon, the federal government and the Immortal Cultivation Alliance issued a notice at the same time.

A huge immortal city will be built in Kunlun Mountain.

To do this, it is necessary to relocate the residents within a radius of 5,000 miles.

As for the purpose of building the immortal city, the notice did not elaborate.

After all, the act of pulling cosmic matter and expanding the world is really incredible.

No one would believe it if they told it to others.

So, they simply found a reason, saying that they specially built the immortal city to accommodate more and more immortal players.

As soon as the news came out, the whole world was instantly shocked.

Tianwang immediately became lively.

"The president is so generous, he actually wants to build a 5,000-mile immortal city."

"Indeed, a 5,000-mile city is not small in Yufantian, and it is even larger than some state cities."

"Do you need manpower? I practice earth-attributed exercises, and I am good at civil engineering, hehe."

"Don't worry, after the immigration is over, we will have a chance to show our skills."

"I will go to Kunlun Mountain and wait. How can I be missing in the construction of the first immortal city on Blue Star?"

...

After handing the matter over to Wang Guofeng, Zhang Yuhe didn't care about it anymore.

Whether it is relocating people or building cities, it is not something that can be done in a short time.

Even if there are many cultivators on Blue Star.

But to build a fairy city covering an area of 5,000 miles completely.

It will take at least one or two years.

The next time.

Zhang Yuhe practiced in seclusion while deducing the magic array.

At the same time, he started to refine the lightning absorption column.

He collected a lot of materials in the Demon God Palace, which can refine thousands of lightning absorption columns of the top-grade Tongtian Lingbao level.

Now he is in the late stage of Mahayana, and it is not far from the perfection of Mahayana.

Need to prepare early.

Zhang Yuhe expected that the great heavenly tribulation he was about to receive must be extraordinary.

Whether it was breaking through the refining void, or the fusion, or Mahayana realm, the heavenly tribulation he attracted was far beyond that of ordinary cultivators.

If you don't prepare seriously, you might be killed by the great heavenly tribulation.

That would be funny.

He planned to continue to deduce and improve the Renshui lightning absorption array, using the lightning absorption column of the top-grade Tongtian Lingbao as the array base.

Redesign a grand lightning absorption array.

This time he planned to increase the number of lightning absorption columns to one thousand and twenty-four.

It is exactly one yuan.

The number of lightning-absorbing pillars has increased, and the quality has been improved to the level of top-grade Tongtian Lingbao.

Then redesign the array pattern and connect them together.

Once all of these are completed.

Zhang Yuhe believes that no matter how abnormal the future great calamity will be.

He can survive it.

...

Time passed slowly, and another two hundred years passed.

Zhang Yuhe walked out of the Juta.

At this time, there was no trace of any cultivation on his body, just like an ordinary mortal.

The whole person was magnificent and perfect, without any breath leaking out, which was the sign of Mahayana perfection.

After practicing Taoism in Yufantian for nearly two thousand years, he finally broke through to Mahayana perfection.

As long as he survives the great calamity, he will truly become an immortal.

A cultivator who ascended for two thousand years is definitely a mythical existence in Yufantian.

According to the records left by the ancestors.

Even in the fairy world, it is extremely difficult for cultivators to cultivate the true fairyland.

Even the geniuses of the great forces in the fairy world need almost ten thousand years.

Only then can he cultivate to the perfection of Mahayana, and then overcome the heavenly tribulation and ascend to the realm of true immortals.

He, a person from the lower world, was able to break through to the perfection of Mahayana within two thousand years.

This has to be said to be a legend.

Of course, Zhang Yuhe's ability to cultivate so quickly is also the result of a combination of many factors.

First of all, his talent is unprecedented.

The Hunyuan Dao body is extraordinary and far beyond the ordinary spiritual body cultivators.

In addition, the Daosheng Sect just happens to have the Hunyuan Heavenly Scripture.

The combination of the two is completely the effect of one plus one greater than two.

In addition, the Five Elements Gathering Spirit Array and the later Gathering Spirit Tower also helped him a lot.

If there were no help from these factors, even if he was talented, he would probably have to cultivate for another three to five thousand years.

...

Zhang Yuhe stood on the Yinhe Peak, his eyes swept around, and he muttered to himself.

"Let's arrange things first, and then prepare to welcome the great heavenly tribulation."

At this time, a figure flew from the bottom of the mountain.

Wang Guofeng showed up and shouted to him respectfully.

"Senior, the construction of the Immortal City has been completed. I don't know when the formation will be set up."

Zhang Yuhe summoned the system panel and took a look, then said lightly.

"Let's do it now. We will meet at Kunlun Mountain after we get offline."

After Zhang Yuhe finished speaking, the two of them logged off and left one after another.

Back to Blue Star.

Zhang Yuhe jumped into the sky and flew high into the sky quickly.

He stood thousands of miles high in the sky, overlooking the entire Blue Star.

I saw a huge square city in the middle of the Blue Star Land, which was extremely conspicuous.

"good."

Zhang Yuhe was extremely satisfied when he saw the appearance of the fairy city from high in the sky.

Wang Guofeng's ability to do things is indeed very good.

Without delaying their training, he organized the players on Blue Star.

It only took less than two years.

Just on Blue Star, such a magnificent fairy city was built.

Zhang Yuhe also greatly admired Wang Guofeng's organizational ability.

He himself doesn't have the ability.

But that's okay.

Everyone has his or her own strengths.

His cultivation speed is not comparable to ordinary people.

...

Chapter 128 Kunlun Fairy City

After getting offline, Wang Guofeng quickly flew towards the Kunlun Mountains.

At this time, a large number of Blue Star monks had gathered in the newly established fairy city.

After all, many of them will not stay in Yu Fantian for a long time.
