Section 140

This made everyone feel proud.

The warm atmosphere at the scene continued, and it took a long time before it slowly calmed down.

Wang Guofeng walked to Zhang Yuhe and said respectfully.

"Please give the fairy city a name, senior."

"Okay."

Zhang Yuhe didn't waste any words. He quickly soared into the air and took out a huge star-pointing stone from the storage bracelet.

The star-pointing stone is a ninth-level spiritual material. It is an important material for refining top-grade Tongtian Lingbao and is extremely precious.

Zhang Yuhe waved the sword light and quickly divided the star-pointing stone into four neat parts.

Four rectangular stone bars were lifted by magic power and floated in the air.

He waved the sword light again and quickly carved on the stone bars.

After a while, the two big characters [Kunlun] burst into dazzling light and appeared on the four stone bars at the same time.

Zhang Yuhe waved his hand, and the four stone bars slowly flew to all directions.

Neatly inlaid on the city gate towers everywhere.

The immortal city is established, and the name of Kunlun will be passed down forever.

Chapter 129 The Great Array of the Heavens Pulling Stars

"Kunlun, Kunlun..."

As Zhang Yuhe hung the four plaques on the four city gate towers.

There was a thunderous cheer at the scene, and the name of Kunlun resounded through the sky.

Zhang Yuhe slowly fell from the air.

He stretched out his hand and pressed it slightly, and the scene instantly became quiet.

He spoke loudly to everyone.

"Since the game started, Blue Star has officially entered the era of cultivating immortals."

"But everyone knows that compared to Yu Fantian and Cangyun Realm, these real worlds of cultivating immortals, the area of our Blue Star is too small."

"So, I proposed to President Wang to build a fairy city here. Then, with the fairy city as the foundation, set up a large formation to pull the matter in the universe and gather it to Blue Star, so that Blue Star will continue to expand."

"If everything goes well, I believe that in the distant future, our Blue Star will also grow into a real world of cultivating immortals."

"At that time, even if there is no Yu Fantian, our descendants can still continue to cultivate immortals on Blue Star."

"Good, the ancestor is mighty."

Hearing Zhang Yuhe's words, everyone was extremely excited and cheered.

Thinking that in the future, Blue Star can also be like Yu Fantian, everyone is full of infinite expectations.

However, some people expressed doubts. After all, this sounded too fantastic.

"Is there really such a formation? Isn't this too exaggerated?"

"What do you know? We are just frogs in the well, how can we know the power of the Mahayana ancestors."

"Indeed."

"It is rumored that the Cangyun Realm is where the great formation was arranged by the ancestor Zhang, who completely reversed the demonic energy of a realm into spiritual energy suitable for the survival of cultivators. Since the ancestor Zhang can reverse the demonic energy of a realm, it is not strange to expand the Blue Star."

"No way, there is such a thing. The Mahayana ancestors are so terrifying."

...

After Zhang Yuhe finished speaking, he ignored the discussion on the scene.

If you want to do something, you must ask for everyone's opinions.

As long as you think it should be done, and most people don't object.

Then there is no need to worry about it.

He waved his right hand, and a pagoda full of spiritual light fell to the left of the platform.

This is the Gathering Spirit Tower.

After the game started, although the spiritual energy on the Blue Star revived and could support everyone's cultivation.

But so far, no spiritual veins have been formed on the Blue Star.

In other words, the spiritual energy revival on Blue Star is actually rootless.

Perhaps one day, with the game disconnected, the spiritual energy will completely dissipate.

Whether it is to set up a large formation or for cultivators to practice, spiritual energy must exist.

So Zhang Yuhe had long planned to place the Gathering Spirit Tower in Kunlun Immortal City.

A ninth-grade spiritual essence was refined into the Gathering Spirit Tower, which can be said to be a miniature ninth-grade spiritual vein.

Perhaps in the distant future, spiritual energy will be gathered through the Gathering Spirit Tower.

A real ninth-grade spiritual vein can be formed in Kunlun Immortal City.

The formation designed by Zhang Yuhe is also centered on the Gathering Spirit Tower to attract the materials of the heavens.

This formation was created by him by drawing on the strengths of many schools.

It is called the Heavens Pulling Star Formation.

Once this formation is arranged, it will pull the materials in the universe and continuously gather towards Blue Star.

At the same time, it will not cause damage to Blue Star.

In order to design this formation, he really spent a lot of thought.

In the world of cultivating immortals, there are many formations that can play the role of pulling materials.

For example, the Five Elements Gathering Spirit Array actually gathers the surrounding spiritual energy and confines it to a relatively small place.

However, it is very difficult to slowly integrate the attracted substances into the blue star without causing damage.

He also thought for a long time before he basically completed the deduction of this large array.

Now let's see the actual effect.

Thinking of this, Zhang Yuhe took off again.

He stretched out his hand and quickly carved in the void, and invisible array patterns slowly formed.

These array patterns gradually connected the array bases buried in various places in Kunlun Immortal City.

In addition to the Gathering Spirit Tower, he had already handed over other array materials and array bases to Wang Guofeng.

Let him bury them in various places according to the drawings when building the immortal city.

Time passed slowly.

As the last array pattern was carved.

Zhang Yuhe quickly pinched the magic formula and shouted at the same time.

"Start the array."

Dazzling light rose from various places in Kunlun Immortal City.

The light quickly passed over the blue star and spread to the endless void of the universe.

After a while, a magical scene appeared.

Everyone clearly felt that there were countless inexplicable auras in the void, which were constantly falling towards the blue star.

Then slowly merged into the earth.

But when everyone opened their spiritual senses to check carefully, they found nothing.

Everyone couldn't help but sigh that the power of the Mahayana ancestor was indeed unimaginable.

Although the formation was opened in front of them, they couldn't understand it at all.

After the Zhutian Pulling Stars Formation was activated, Zhang Yuhe silently observed for a long time before he breathed a sigh of relief.

He knew that the previous idea had been successful.

The Zhutian Pulling Stars Formation attracted and gathered the matter in the universe, and then merged it into the land of the blue star.

This is a long process.

From the tiny particles at the beginning, it may be fragments of stars in the end.

These substances will not fall directly on the surface of the blue star, but will directly merge into the center of the earth.

Then from the center of the earth, they will slowly expand to the surroundings.

Although this is slower, it is more stable.

The expansion of Blue Star will be completed silently, so slowly that people can't even notice it.

This way, it won't affect the normal life of the people on Blue Star.

After a few years, everyone will suddenly find that Blue Star seems to have really grown.

This is the effect Zhang Yuhe wants.

If he were to set up a large formation on a desolate planet, he would definitely choose a more violent method.

But it's obviously not possible on Blue Star.

Because Blue Star is a planet with life.

If the formation affects people's normal life, it would go against his original intention of designing this formation.

Zhang Yuhe silently felt the changes brought about by the activation of the All Heavens Pulling Stars Formation.

He estimated that it would take at most a few hundred years for other people to see that Blue Star is growing.

Perhaps in thousands or tens of thousands of years, the area of Blue Star will double.

Zhang Yuhe looked up at the sky and saw the future of Blue Star.
