Chapter 141

The Blue Star of the future will definitely be one side, the real world of cultivating immortals.

"I have done everything I need to do, and the rest depends on the efforts of future generations."

Zhang Yuhe muttered to himself.

After a while, he turned to Wang Guofeng and said.

"The Great Formation of Stars in the Sky has been activated. This formation will not require human control and will operate autonomously until the matter in the entire universe is reunited into a large world."

Immediately afterwards, he took out two more array disks, handed them to Wang Guofeng and continued.

"In Kunlun Fairy City, I have deployed an offensive and defensive formation at the same time."

"The defensive formation is improved from the Demon-Suppressing City's Heaven-Sealing Forbidden Spirit Formation. Once fully activated, it can block the attacks of Mahayana monks."

"As for the attack formation, it was designed by myself and is called Destruction in All Directions."

"As long as the grand formation is activated, with Kunlun Immortal City as the center, within a radius of 50 million miles, all humans and animals will be destroyed."

"You must carefully pass these two arrays down in the future so that future generations can use them with caution."

"Yes, I understand."

Wang Guofeng respectfully stretched out his hands and took the two formation disks, feeling extremely excited.

He knew that with the All-Heaven Star Formation, Blue Star would have a bright future.

And with the offensive and defensive formations, Kunlun Fairy City will definitely stand tall in the world forever.

From then on, Blue Star truly entered the great era of cultivating immortals.

Chapter 130 Hope to reunite in the fairy world

Zhang Yuhe took out a storage ring, handed it to Wang Guofeng and said.

"It contains the magical powers that I have collected over the years in Yu Fantian and Cangyun Realm. There are also some that I have deduced and created myself."

"You can follow the example of the Dao Sheng Sect and build a library and a scripture building respectively in Kunlun Immortal City, so that Blue Star monks can more easily obtain magical powers and techniques. As for the operating rules, you can discuss them among yourself."

Wang Guofeng took it with both hands and glanced at the ring with his spiritual consciousness.

In the storage ring, all kinds of jade slips were piled up like a mountain, and the number was astonishing.

With these jade slips, players' future cultivation path will be much smoother.

Think of this.

Wang Guofeng solemnly saluted Zhang Yuhe and then spoke.

"Thank you, senior."

Zhang Yuhe waved his hand and then spoke.

"The matter is over, I'll take the first step."

After saying that, he turned into a stream of light and left.

Countless monks in the fairy city watched Zhang Yuhe leave.

My heart is filled with infinite reverence.

As a player who entered Yu Fantian at the same time, Zhang Yuhe was actually the ancestor of Mahayana.

Thinking of this, everyone couldn't help but marvel.

However, looking at the fairy city in front of them and thinking about Blue Star's future, everyone was full of unlimited expectations.

I hope that one day, they can become a Mahayana ancestor like Zhang Yuhe.

Even finally ascended to the fairy world.

...

Tao Sheng Sect, Galaxy Peak.

Zhang Yuhe invited Feng Xiaotian and was sitting in a small pavilion on the top of the mountain, drinking tea and discussing something.

Wang Guofeng and Li Tian stood behind them in a restrained manner.

After taking a sip of tea, Feng Xiaotian asked him.

"Senior brother, are you sure we are going to welcome the great calamity now? The power of the ascending great calamity is extremely terrifying. According to the records in the classics, when the great calamity comes, the entire Yu Fantian will be shrouded under the pressure of the calamity. "

"Actually, senior brother, there is no need to worry. You have a long life and can stay in Yufantian for a long time."

"During this period of time, senior brother can slowly polish his magical powers and prepare various means to deal with the catastrophe. Only in this way will he be more confident in surviving the catastrophe."

After hearing about Zhang Yuhe, he was ready to welcome the great disaster.

Feng Xiaotian was shocked.

In the history of the Yufan Tiandao Holy Sect, there were three ancestors who successfully survived the great catastrophe and ascended to the immortal world.

But this does not mean that only these three people have reached Mahayana perfection.

There were other ancestors who also cultivated to the perfection of Mahayana, but finally fell under the great catastrophe.

It didn't fly smoothly.

Feng Xiaotian didn't want Zhang Yuhe to fall in the last step of practicing Taoism.

Only then did he take pains to persuade me.

In his opinion.

Although Zhang Yuhe is far superior to any monk in terms of talent and magical abilities.

But after all, his cultivation time is too short, and there is still a lot of room for polishing and improving his magical powers.

And he had plenty of time.

After monks reach Mahayana perfection, they will not be rejected by the way of heaven.

You can definitely continue to stay in Yufantian.

In history, those perfect monks who ushered in great tribulations waited for themselves to reach their peak state.

Only then will he let go and lead the great disaster to come.

But Zhang Yuhe is still early.

There's no need to be in such a hurry.

Zhang Yuhe put down the tea cup in his hand and said lightly.

"Sect Master, don't worry. I have already made thorough preparations and there will be no problem in surviving the great catastrophe."

He was completely confident that he could withstand the great calamity.

Nothing else.

It relies on the Renshui thunder-absorbing formation that he has continuously refined and improved.

Zhang Yuhe thought.

If one thousand and twenty-four top-grade Tongtian Lingbao-level lightning-absorbing pillars were arranged, a lightning-absorbing array could be formed.

If you can't withstand the bombardment of the great calamity, then there probably isn't much strength in this world that can withstand it.

Although his strength can indeed be improved and his formation can be improved.

But Zhang Yuhe knew that no matter how much he improved, it would only be a quantitative change, not a qualitative change.

Therefore, there is no need for him to delay it any longer.

And he is also full of unlimited expectations for the fairy world.

He really wanted to see if after ascending, he would really be able to achieve immortality.

Hearing Zhang Yuhe's words, Feng Xiaotian was speechless.

He also knew that a monk should move forward bravely without fear of any difficulties or obstacles.

Now that Zhang Yuhe had made his decision, he stopped trying to persuade him.

Instead, he continued to ask.

"I wonder, senior brother, do you have anything else to explain?"

Once a monk receives the great calamity, he will never return.

It goes without saying that he failed, he must have been chopped into ashes by the catastrophe.

If you succeed, you will pass through the Immortal Ladder and ascend away from Yu Fantian.

Feng Xiaotian knew that Zhang Yuhe must have something to confess when he called him before going through the tribulation.

That's why he asked this question.

Zhang Yuhe took out a jade slip, handed it over and said.

"This is the jade slip I found from Zhao Mingyue's clone. It contains a formation that should be used on you."

After finishing speaking, he took out five formation flags and a formation disk again.

[Transfer Station 1 in the world-weary novel 1 7 9 9 4 3 1 6 4]

After Feng Xiaotian took the jade slip and inspected it, he couldn't help but asked in surprise.

"Is this Five Elements Spirit Gathering Formation really so miraculous? Can it increase the speed of cultivation?"

"Yes."

Zhang Yuhe nodded.

The Five Elements Spirit Gathering Formation is extremely sophisticated, and he was able to cultivate to Mahayana perfection so quickly.

This formation has at least half the credit.

Feng Xiaotian put away the formation flag and formation disk, then solemnly saluted Zhang Yuhe and said.

"Thank you, senior brother."

"Sect master, you don't have to be polite."

Zhang Yuhe responded lightly, and then looked at Wang Guofeng and Li Tian behind him.
