

Top talent 151

Section 151

After the two separated, Zhang Yuhe flew quickly towards the book building.

At this time, his impression of the fairy world came entirely from the descriptions of Liu Fang and Xie Mingyuan.

It was a bit too one-sided.

For him, the best way to understand common sense was naturally to read more books.

Dao Sheng Zong was once the leader of the five major forces in Ji'an Sea.

The classics collected in the book building were as vast as the sea.

As long as he read through the book building, he would no longer be a newbie who had just ascended.

In the following days, Zhang Yuhe immersed himself in the ocean of knowledge in the book building.

By consulting a large amount of information, he finally had a general understanding of the fairy world.

According to the records in the classics, the size of the fairy world is completely beyond the imagination of ordinary people.

Not to mention a small true immortal like him, even a big boss in the realm of Daozu would not be able to travel throughout the entire fairy world in his lifetime.

The fairy world is composed of countless fairy domains.

Among them, the Ji'an Sea is part of the South China Sea Fairyland.

The fairy domains are divided according to their strength, and they are also different in size.

The big fairyland is ruled by the Taoist ancestors, and the small fairyland may only have the strongest golden fairy cultivators.

The South Sea Fairyland is also a relatively large fairyland in the entire fairy world.

Because the South Sea Fairyland is ruled by the Daluo Immortal, its strength is not too weak.

In addition to the general situation of the fairy world, by consulting the classics.

Zhang Yuhe also has a certain understanding of the future direction of cultivation.

The cultivation of immortals requires multiple lines of progress.

In addition to cultivation, it is also necessary to cultivate the immortal body, open the Yuanying, and comprehend the laws.

If cultivation is the foundation of immortals, then the Yuanying is the multiplier of immortals.

And the law is the extension of the power of immortals.

As for the cultivation of the immortal body, it can be simply understood as body refining.

Of course, the process is much more complicated than the body refining in Yufantian.

Chapter 139 This technique is afraid to fight against the Chaos Beast

Cultivation, immortal body, Yuanying opening, law comprehension.

The four cultivation routes complement each other, and each one is extremely important.

However, each one is extremely difficult.

Cultivation requires slowly honing the immortal energy. Even if ordinary true immortals retreat for tens of thousands of years, they may not make any progress.

The opening of the Yuanying requires not only the secret technique of opening the orifices, but also the corresponding materials.

Theoretically, each immortal can open up to nine orifices.

True immortals can open three orifices, Golden immortals can open up to six orifices, and Taiyi immortals can open nine orifices.

For every additional orifice opened by a cultivator, his strength will increase by 20% to 30%, and the speed of cultivation will also become faster.

However, the secret techniques that can open nine orifices are completely in the hands of those top forces.

The secret techniques of opening the orifices that can be found on the market can only open up to three orifices at most.

Higher secret techniques of opening the orifices are completely impossible to find, and they are monopoly resources that cannot be bought with money.

It is said that the secret technique of opening the orifices of Daosheng Sect can open up to seven orifices.

In the entire Ji'an Sea, it should be the top secret technique of opening the orifices.

Zhang Yuhe has just entered the sect and can only obtain the secret techniques of the first three orifices.

But there is no rush for this matter. He will talk about it after he comprehends the second volume of Hunyuan Tianjing.

As for the cultivation of the immortal body, it depends more on chance. Normal cultivation will hardly make any progress.

The power of the immortal body is extremely strong and is divided into four stages.

The initial stage of the immortal body, the small success of the immortal body, the great success of the immortal body, and the perfection of the immortal body.

Even if you only cultivate to the initial stage of the immortal body, you can rely on your physical body to withstand the attack of the lower-grade immortal weapon.

As for the strength of the perfect immortal body, it is completely unimaginable.

However, if you want to cultivate the immortal body, you must have the corresponding heavenly materials and treasures to assist.

Any kind of heavenly materials and treasures that can promote the cultivation of the immortal body are extremely precious.

Whenever similar heavenly materials and treasures appear in the world, they will trigger fierce competition among the immortals.

For the cultivation of the immortal body, Zhang Yuhe does not need to think about it for the time being.

For him, the biggest advantage should be the comprehension of the law.

Although the game function has completely disappeared after the ascension, his explosive comprehension.

It is his innate talent.

With such abnormal comprehension, it should not be too difficult for him to comprehend a law.

However, before comprehending the law, he needs to open a hole in the Nascent Soul first.

The opening of the Nascent Soul is the key to carrying the power of the law.

Each time a hole is opened, it can carry a law.

Zhang Yuhe carefully sorted out the subsequent cultivation sequence.

That is to comprehend the lower volume of the Hunyuan Heavenly Scripture first, and then start to open the first hole.

Finally, comprehend the law and practice in seclusion.

Let's improve the cultivation first.

Thinking of this, Zhang Yuhe quickly flew towards the mountain gate square.

Near the square, cultivators passed by from time to time.

However, these people were all below the realm of true immortals.

There seemed to be more than a hundred true immortal cultivators in the Daosheng Sect.

However, these people were basically distributed in various places to guard, and there were not many true immortal cultivators left in the sect.

It was rare to see them at ordinary times.

Zhang Yuhe chose to sit cross-legged in a corner of the square.

He slowly contacted the stone tablet with his consciousness.

Boom...

A vast breath rushed towards him.

A large amount of information quickly poured into his mind.

The stone tablet was still simple and plain, and no strange images appeared.

No one knew that at this moment he was comprehending the skills on the stone tablet.

No one knew how long it had passed.

Zhang Yuhe opened his eyes, his face showed ecstasy, and he muttered to himself.

"The complete Hunyuan Tianjing is so powerful and comprehensive."

He continued to close his eyes slightly, slowly recalling the contents recorded in the second volume of Hunyuan Tianjing.

According to the description on the stone tablet.

There seems to be no upper limit to the practice of Hunyuan Tianjing.

Even if you practice to the Daozu realm, there is still a way forward.

This is a bit scary.

"Could this be a method that surpasses the fairy world?"

Zhang Yuhe guessed silently.

In addition to the subsequent practice methods, the second volume of Hunyuan Tianjing also records the promotion method of the natal magic weapon.

This is not too special. Basically, all the exercises have corresponding methods for refining and improving the natal magic weapon.

The most important thing is that Zhang Yuhe also comprehended a secret technique of opening the orifices of the Nascent Soul in the stone tablet.

And it is a secret technique that can open ten orifices.

This made him ecstatic, but he couldn't help but feel a little confused.

Isn't it at most that nine orifices can be opened?

Why can the secret technique of opening the orifices recorded in Hunyuan Tianjing open ten orifices?

This made him more resolute in his previous conjecture.

This Hunyuan Heavenly Scripture is definitely a skill that surpasses the immortal world.

As for whether there is a higher level world above the immortal world.

He didn't know.

Who cares? Anyway, there is a secret technique for opening the orifices.

Moreover, the auxiliary materials needed for the secret techniques for opening the orifices recorded in the Hunyuan Heavenly Scripture are relatively easy to find.

Many secret techniques for opening the orifices in the immortal world have existed for too long.

The usable materials have long been exhausted by the ancestors.
