

Top talent 157

Chapter 157

"Here are the materials for immortal weapons. I want a heavy long stick immortal weapon, or a heavy hammer."

"No problem, Brother He will come to pick it up in half a year."

Zhang Yuhe took the storage ring and nodded in response.

After He Xingfa left.

Zhang Yuhe quickly came to the weapon refining room.

This was his first shot in Ji'an Market.

You can't be careless.

According to He Xingfa's needs, Zhang Yuhe quickly planned the shape of the immortal weapon.

He planned to refine a long stick-shaped lower-grade immortal weapon based on the Nine Heavens Flying Spirit Stick.

As the materials were put into the cauldron.

Zhang Yuhe silently observed the changes in the cauldron while practicing slowly.

After the True Immortal, the progress of cultivation was extremely slow.

Zhang Yuhe roughly estimated.

Even if he had a natural talent, he wanted to practice to the middle stage of the True Immortal.

It might take thousands or even tens of thousands of years.

If the three orifices could be opened in advance, the speed of cultivation should be faster,

but it should take four or five thousand years to break through to the middle stage of the True Immortal.

This speed of cultivation should be said to be extremely fast.

You know, it took Xie Mingyuan 200,000 years to break through to the late stage of the True Immortal.

Even so, he can be regarded as a peerless genius in the Ji'an Sea.

But Zhang Yuhe still felt it was too slow.

He was used to practicing at a rocket speed in Yufantian.

Now it suddenly slowed down, making him feel extremely uncomfortable.

However, this is how immortals practice.

Take your time.

...

Chapter 144 Opening two orifices

Half a year later.

He Xingfa came again.

Zhang Yuhe walked out of the cave, and the two of them just sat down in the pavilion.

He Xingfa couldn't wait to ask.

"I wonder if Brother Zhang has successfully refined the immortal weapon."

Zhang Yuhe didn't say anything.

He waved his right hand.

A long black stick appeared in his hand.

The long stick was surrounded by immortal energy, and there were circles of golden runes in the middle.

He Xingfa reached out to take it.

The long stick was extremely heavy in his hand, and he didn't pay attention to it, and his body couldn't help but tremble.

If it weren't for the fact that he had cultivated into an immortal body, he would have almost dropped the long stick on the ground. .

Looking at the long stick in his hand, He Xingfa reached out and touched it, his expression extremely excited.

He carefully looked at the long stick in his hand, as if he was looking at a piece of art.

When he saw the small words "Galaxy Breaking Heaven Stick" engraved in the middle of the long stick.

He Xingfa couldn't help but laugh happily.

"What a great Galaxy Breaking Heaven Stick."

After carefully examining it for a long time, He Xingfa reluctantly put the long stick away, and then asked Zhang Yuhe.

"I don't have many immortal stones on me. I have basically spent all the immortal stones to collect materials before. I wonder if I can pay with the Chaos Beast Crystal Core?"

Hearing this, Zhang Yuhe's eyes lit up.

Chaos Beast Crystal Core, that's a good thing.

He helped He Xingfa refine the immortal weapon, mainly for the purpose of making a name for himself.

As long as he had a reputation, it would be much easier to do things in the market in the future.

As for the reward, he really hadn't thought too much about it.

If he wanted a reward, he would definitely collect the money first and then do the work.

But since it was a Chaos Crystal Core, there was no need to be polite.

This thing was exactly what he needed.

Thinking of this, he asked tentatively.

"I wonder if Brother Xie has a two-star crystal core?"

He Xingfa flipped his wrist, and a crystal core emitting a violent aura appeared in his hand.

"This is a two-star crystal core, just consider it as a reward for Brother Zhang."

"Okay."

Zhang Yuhe nodded in agreement.

This was a fair trade.

When an immortal weapon master helped others refine weapons, he usually received a reward of the same materials.

The price of an immortal weapon is roughly equivalent to ten one-star crystal cores.

And one two-star crystal core can be exchanged for ten one-star crystal cores.

But this is only a theoretical exchange price.

In fact, the higher the star level of the crystal core, the more difficult it is to obtain.

Strictly speaking, He Xingfa used the two-star crystal core as a reward for refining the weapon, which was a bargain for Zhang Yuhe.

...

The transaction was over, and He Xingfa left happily.

Zhang Yuhe looked at the crystal core in his hand, and he was also very happy.

He still had a one-star crystal core left in his hand, and with this crystal core.

Then he could open two orifices.

Thinking of this.

Zhang Yuhe quickly walked into the cave.

He came to the practice platform, sat cross-legged, and silently recalled the contents of the Chaos Opening Secret Technique.

According to the records on the stone tablet, using this secret technique to open the orifice requires the arrangement of a fairy formation to assist.

After a while, Zhang Yuhe stood up.

He waved his right hand, and a number of formation flags quickly fell around the practice platform.

He had prepared these formation flags before, and now he only needed to carve the formation pattern.

Zhang Yuhe stretched out his hand and carved in the air, and a series of invisible formation patterns connected all the formation flags around the practice platform together.

When the last array pattern was finished.

He quickly pinched the magic formula, and a purple light lit up in the cave.

The light enveloped the sky above the training platform, forming a purple light curtain.

Zhang Yuhe took out the one-star crystal core and placed it not far in front of him.

He exhaled lightly, and then slowly absorbed the breath in the crystal core according to the method of the Chaos Awakening Secret Technique.

The Nascent Soul in the Dantian suddenly opened his eyes.

A bright light spot lit up on the golden Nascent Soul.

The light spot illuminated the entire Dantian, and the Dantian sea began to expand again.

Time passed slowly.

I don't know how long it has passed.

Zhang Yuhe slowly stood up from the practice platform.

Feeling the surging power in the Dantian, a smile appeared on his face.

"Very good, after the Yuanying opened one orifice, the strength has indeed improved a lot."

He silently felt the changes in the Dantian.

After opening the first orifice, his Dantian sea expanded by another 30%.

And the immortal spirit in the Dantian also became purer.

This is the benefit of the Yuanying opening orifice.

Not only can it directly improve the strength of the true immortal, but it can also improve endurance.

In addition, after the Yuanying opens orifice, the speed of cultivation will also be greatly improved.
