Chapter 158

"Keep working hard and try to open the second orifice directly."

After successfully opening the first orifice in the Nascent Soul, Zhang Yuhe was not satisfied.

He planned to open the second orifice directly in one go.

Although there is a certain chance of failure when the Nascent Soul is opened, he doesn't care at all at this time.

The opening of the Nascent Soul can directly improve strength and speed up cultivation.

Who can resist such temptation?

Zhang Yuhe waved his right hand and put away the formation flags around the cultivation platform.

Replace the new formation flags and start carving the formation pattern again.

According to the records of the Chaos Opening Secret Art, the formation used for each opening will be different.

If he wants to open the second orifice, he needs to rearrange the formation.

However, to open the first three orifices, only the first-level immortal formation is needed.

This is not difficult for him at all.

Soon, the new formation was arranged.

Zhang Yuhe took out the two-star crystal core that he had just obtained and placed it in front of him, then slowly closed his eyes.

Under the cover of purple light, the breath on the crystal core was slowly absorbed into the Dantian.

After a long time.

Zhang Yuhe opened his eyes, and a look of ecstasy appeared on his face.

"Haha, two consecutive times."

He was extremely happy that he had successfully opened his orifices.

He silently felt the changes in his own strength.

After opening two orifices in a row.

His current strength has increased by as much as 60%, which is a qualitative leap.

Among the True Immortal cultivators, he is now a master.

If he bursts out with all his strength, he dares to fight in the late True Immortal stage.

With such strength, he can basically protect himself in the Ji'an Sea.

As long as he doesn't provoke those Golden Immortal ancestors, there shouldn't be too many here that can threaten his safety.

Despite this, Zhang Yuhe was not complacent.

He didn't have the idea of going out to play.

If his strength is not good, he has to practice in hiding. If his strength is improved, he also has to continue practicing.

This is just where he is.

A small True Immortal can only jump around in the fish pond in the Ji'an Sea.

Once he leaves the Ji'an Sea, his strength will not be enough.

"Since two acupoints have been opened, the next step is to comprehend the laws."

Zhang Yuhe put away the joy of the successful opening of the acupoints and began to plan the next arrangements.

Put aside the cultivation for now, it is not something that can be done in one go.

He should not think about improving his cultivation again without thousands of years.

For him, comprehending the laws is the fastest and most direct way to improve his strength.

Although many True Immortal cultivators have been thinking hard for tens of thousands of years, they still cannot get into the door of the law.

But he is different.

With his extraordinary comprehension, it should not be too difficult to comprehend a law.

...

Chapter 145 The Law of Power

Thinking of the law, Zhang Yuhe fell into deep thought.

The laws are also divided into strong and weak.

The laws in the fairy world are roughly divided into ordinary laws, special laws and supreme laws.

The five elements laws such as the law of gold and the law of wood belong to ordinary laws.

Special laws generally refer to the law of ice, the law of speed, the law of thunder and the like.

The strongest is of course the supreme law.

There are nine supreme laws recognized in the fairy world.

They are: the law of time, the law of space, the law of soul, the law of cause and effect, the law of reincarnation, the law of power, the law of life, the law of death, and the law of yin and yang.

Among these nine supreme laws, some are extremely powerful, while others are mysterious.

But no matter which one, as long as you can comprehend a supreme law, you can basically dominate among the cultivators of the same level.

With Zhang Yuhe's eyes, he naturally looks down on those ordinary laws.

He even looks down on special laws.

In his mind, he would just comprehend the supreme law directly.

Anyway, he has such a heaven-defying understanding, and it would be a waste if he doesn't choose the strongest law to comprehend.

You know, there is a limit to the laws that each immortal can comprehend.

Each time an immortal opens a hole, he can comprehend one more law.

Theoretically, each immortal can comprehend nine laws at most.

Of course, Zhang Yuhe is different.

The Chaos Opening Secret Technique can open a total of ten holes in the Nascent Soul.

In other words, he can comprehend ten laws at most.

In addition to the nine supreme laws, he can comprehend one more law.

Zhang Yuhe wondered whether he should pick a simple law to test the waters first.

But he quickly put this idea behind him.

In his opinion, the statement about the supreme law in the immortal world is not necessarily accurate.

Because there is no chaos law among these nine supreme laws.

This makes him feel very strange.

Even in the entire immortal world, there is no such thing as the chaos law.

He has a vague feeling.

There should be ten supreme laws in the immortal world, but the chaos law has never been comprehended by anyone.

That's why there is no such statement.

In this case, he can't mess around.

It is better to be honest and choose a supreme law to comprehend.

Which law should I start with?

Thinking of this, Zhang Yuhe could not help but fall into deep thought again.

The law cannot be comprehended out of thin air.

If a cultivator wants to comprehend the law, he must have a corresponding medium.

For example, skills, magical powers, items with the breath of laws, etc.

Normally, it is relatively easier to comprehend the corresponding attribute laws of the skills you practice.

The eight attributes of the Hunyuan Tianjing are practiced together, but neither the five elements law nor the wind, thunder and ice law are what he thought of.

Zhang Yuhe first thought of the law of time and the law of power.

When he was in Yu Fantian, he practiced the Great Wilderness Prisoner Sky Finger.

This magical power obviously has a hint of the charm of the law of time.

Perhaps through this magical power, he can comprehend the law of time.

In addition, his self-created Galaxy Zhoutian Gong is a good body refining magical power.

Body refining is actually a manifestation of power. He should be able to comprehend the corresponding law of power from this magical power.

If he can comprehend the law of power, he may be able to deduce and improve this magical power again.

Body refining magical power is also extremely important for immortals.

Because it is the key to evolving into an immortal body.

In order for an immortal to cultivate an immortal body, he needs the corresponding natural materials and treasures to assist him.

Physical strength is also very important.

A fragile immortal cannot evolve into an immortal body.

"Let's start with the law of power."

Zhang Yuhe made a decision quickly.

Because the Galaxy Zhoutian Gong was created by him.

Relatively speaking, he is more familiar with this magical power, which is more conducive to his understanding of the law from it.

As for the law of chaos, it is just his guess.

Whether this law really exists in the immortal world is still a matter of debate.
