

## Top talent 161

### Section 161

Xie Mingyuan focused the power of law on the blue shield and easily blocked the opponent's attack.

It's also an introduction to the rules.

But the law of penetration is a special law, which is a level higher than Ouyang Lishan's law of gold.

Although the penetration law focuses more on attack, it does not mean that it has no defensive effect.

The confrontation of the power of laws depends more on the level and realm of the laws of both parties.

When the realms are the same, it is no problem for special laws to block the attacks of ordinary laws.

However, Xie Mingyuan is just an introduction to the Law, and he cannot continue to use the power of the Law to fight against the enemy.

Over time, it will become ineffective.

Ouyang Lishan looked at Xie Mingyuan with a cold expression and said lightly.

"I really underestimated you. I didn't expect you to understand the law of penetration."

"But even so, you have to stay with me today."

After finishing speaking, Ouyang Lishan offered a golden fairy sword.

The fairy sword grew rapidly, like splitting a mountain, and quickly slashed straight down towards Xie Mingyuan.

The other True Immortal cultivators around him also swarmed up.

They sacrificed various immortal weapons one after another and launched a fierce offensive towards Xie Mingyuan.

Even Ouyang Lihe, who had a broken arm, activated his immortal weapon at this time, wrapped up his injuries and fought hard.

The war broke out instantly, and the color of the world changed.

...

Zhang Yuhe sat cross-legged on the training platform.

At this time, the golden figure in the dantian, two bright spots of light, were flashing continuously.

In one of the light spots, a purple seedling has grown to two inches tall.

In another spot of light, a transparent seedling is rapidly growing.

I don't know how much time has passed.

When the transparent seedlings grow to one inch tall.

Zhang Yuhe suddenly opened his eyes, with a look of joy on his face.

"I finally realized the success."

Feeling the changes in the golden figure in his dantian, he breathed a sigh of relief.

"This is how long it's been."

Zhang Yuhe quickly calculated with his fingers.

"Has it been more than two thousand years?"

He couldn't help but be surprised when he saw the calculation results.

I originally thought that it would only take about a thousand years at most to understand the law of time.

Unexpectedly, it took more than two thousand years.

This surprised him.

However, he couldn't help but feel gratified when he thought about the wonderful effects of the Law of Time.

Zhang Yuhe waved his right hand.

A strange aura filled the entire training cave.

Everything in the cave seemed to stand still for an instant.

The entry-level time law can make time in an area stand still for a short time.

This is an extremely terrifying ability.

Think about it, when others are controlled by the law of time and cannot move at all.

What will be the consequences?

Isn't this just a matter of waiting for death?

Of course, the law of time is not invincible.

As long as the level of other people's laws is higher than his, such as the special laws of Xiaocheng level.

It can completely resist the erosion of the law of time.

As for the ordinary Five Elements Law, it is not that easy to block the erosion of the Law of Time.

Of course, monks with higher realms can naturally resist the influence of the laws of monks with lower realms.

For example, the Golden Immortal Monk, Zhang Yuhe's law of time cannot be affected.

Despite this, the law of time is still extremely powerful.

It is no exaggeration to say that he is invincible at the same level.

After testing the power of the law, Zhang Yuhe felt very satisfied.

With two supreme laws accompanying him, it is enough for him to gain a foothold in the Ji'an sea area.

"It's been more than two thousand years, but I don't know if anyone has ever looked for me?"

Thinking of this, Zhang Yuhe quickly took out the Immortal Mirror.

I saw a large amount of information displayed in the mirror.

Basically, it was Xie Mingyuan's message to him.

When he saw the last message, Zhang Yuhe couldn't help but frown.

"Senior Brother Xie has returned to the sect? Moreover, the Ouyang family and the Qian family have intensified their efforts recently. It seems that they can't help themselves and are planning to attack Dao Shengzong?"

"Senior Brother Xie will not be in danger if he returns to the sect alone, right?"

Thinking of this, Zhang Yuhe's expression changed.

A jade talisman appeared in his hand.

I saw that the surface of the jade talisman was covered with cracks and soon turned into pieces.

"No, something happened to Senior Brother Xie."

Think of this.

Zhang Yuhe quickly jumped into the air and rushed out of Fangshi.

While flying quickly, he sent a message to Xie Mingyuan, but did not receive a response.

If there is no response to the subpoena, there are only two situations.

One situation is that Xie Mingyuan is trapped somewhere and the interrogation is isolated.

In another situation, Xie Mingyuan may have died.

Of course, it is not excluded that the other party happened to be busy and did not see his summons.

However, Zhang Yuhe believes that this possibility is unlikely.

After all, Xie Mingyuan is returning to the sect instead of practicing in seclusion.

He couldn't contact Xie Mingyuan, which made him feel very anxious.

The jade talisman can only provide a warning and has no positioning function.

The jade talisman in his hand shattered.

That means that Xie Mingyuan, who holds another jade talisman, must have encountered a serious crisis.

He didn't know where Xie Mingyuan was at this time.

I don't know if Xie Mingyuan is still alive at this time.

But he couldn't sit idly by.

Not only did Xie Mingyuan and he both come from Yufantian, but he also took great care of him.

Whether dead or alive, he had to find the person.

Zhang Yuhe was flying quickly while thinking carefully about countermeasures.

According to Xie Mingyuan's previous message, he should have just set out not long ago.

In other words, the location of the accident should be near Ji'an Market.

There are many routes to take from the market back to the sect.

He didn't know which route Xie Mingyuan took.

He couldn't look for him one by one.

He would definitely miss the chance to rescue him.

Thinking of this, Zhang Yuhe's expression moved.

He quickly pinched the magic formula.

One after another, figures flashed around him quickly.

Three thousand incarnations quickly dispersed and flew in all directions.

After he ascended, the strength of the incarnation was also correspondingly improved to the fusion realm.

Although in the fairy world, the strength of the fusion realm is completely insignificant.

It is obviously useless to rely on the incarnation to fight.

But if it is used to find people, it should be effective.

After releasing the incarnation.

Zhang Yuhe chose a direction and flew forward quickly.

...
