### Chapter 171

Three jade boxes appeared in front of everyone.

Bangs stretched out his hand and waved, and the jade box slowly opened.

Three items came into view.

A small jade bottle should contain some kind of elixir.

A shining talisman seal, the rune pattern is covered, and it is unknown what its purpose is.

As for the last jade box, it contained a piece of golden fairy material.

Zhang Yuhe could recognize at a glance that this was the best material for refining a metallic fairy sword, the Golden Flame Fairy Crystal.

After the jade box was displayed, Liu Haitao spoke.

"The spirit-reviving elixir, the Wanli Escape Talisman, the Golden Flame Immortal Crystal, water-refining materials, or other items of equal value."

Seeing the items displayed by Liu Haitao, everyone at the scene was eager to try them.

The spirit-reviving elixir can restore a small half-immortal's energy in a short period of time.

If you have a spirit-reviving elixir, your combat endurance will be greatly improved.

It is a must-have item for real immortals to go on adventures.

After using the Wanli Escape Talisman, the flying speed can be increased instantly.

It is the best choice for true immortals to save their lives.

The Golden Flame Immortal Crystal is not simple either.

Although there are countless materials for refining low-grade fairy swords.

But in the fairy world, it is recognized that the best low-grade metallic fairy sword material is the Golden Flame Fairy Crystal.

Seeing Liu Haitao bringing out such a good thing, everyone communicated with him one after another.

Zhang Yuhe has no interest at all in these three things.

He had refined quite a few of the spirit-restoring elixirs himself.

In the Wanling Diagram, there are many spiritual herbs and elixirs planted, including the elixir that can be used to refine the elixir.

He doesn't lack the Wanli Escape Talisman either.

Even the escape talisman he drew himself was better than Liu Haitao's.

Although the Golden Flame Immortal Crystal is good, he has no need for it.

No matter how powerful a low-grade immortal sword is, can it compare to his Nine Heavens Hunyuan Sword?

...

After a while, these three items were replaced by other monks.

Everyone takes turns displaying the items.

Some people successfully get what they need, while many others get nothing.

After all, this is just a small trade fair, and the good things everyone can bring out are limited.

When it was Zhang Yuhe's turn.

Everyone involuntarily turned their eyes towards him.

As an immortal-level weapon refiner, everyone is looking forward to the items in his hands.

Zhang Yuhe was not pretentious either.

With a wave of his right hand, more than twenty immortal weapons appeared in front of everyone.

There are swords, guns, swords and sticks, all kinds of magical weapons.

Everyone couldn't help but be stunned when they saw the magical weapon he displayed.

It's not because there are a lot of immortal weapons, it's because they all look familiar to them.

After killing more than ten true immortals from the Ouyang family, Zhang Yuhe harvested a large number of immortal weapons.

He didn't like these fairy weapons, so he could only take them out and exchange them for something useful.

As for whether it will cause fire?

Zhang Yuhe never considered this at all.

With Hunyuan Guiyi's magical power by his side, he doesn't need to shrink back.

Even if the Ouyang family knew, they couldn't do anything to him.

Seeing the immortal weapon displayed by Zhang Yuhe, everyone's expressions couldn't help but feel a little weird.

Zhang Yuhe didn't pay attention to these people's thoughts, but said calmly.

"Twenty-seven low-grade immortal weapons can be exchanged for heavenly materials and earthly treasures of equal value."

After finishing speaking, he took out a broken pagoda again.

"The damaged middle-grade immortal weapon, the World-Suppressing Exquisite Tower, will be replaced with a three-star chaos beast crystal core."

When they saw the Zhenshi Linglong Tower, everyone stood up instantly.

Liu Haitao asked excitedly.

"Brother Zhang, are you sure you want to exchange this middle-grade immortal weapon?"

Zhang Yuhe nodded lightly.

Zhenshi Linglong Pagoda is indeed very precious.

A middle-grade immortal weapon is not a piece of cabbage.

In the Ji'an sea area, some golden immortal monks may not have middle-grade immortal weapons.

Although this world-conquering Linglong Tower is already badly damaged.

But it can still exert some power, which is far from comparable to low-grade immortal weapons.

If a True Immortal cultivator could possess the World-Suppressing Exquisite Tower, his strength would be greatly improved.

But Zhang Yuhe himself doesn't need this thing.

Although the Zhenshi Linglong Tower has a good ability to seal the town and imprison it, it is compared to its law of time.

That's totally not enough.

If that's the case, why do you need this thing?

Relatively speaking, the three-star Chaos Beast Crystal Core was the item he urgently needed.

As long as he changes to a three-star crystal core, he can open the third orifice.

Thus.

Not only can his strength be increased by another 30%, but his training speed can also be improved a lot.

More importantly, after opening the third orifice.

Then he can understand another supreme law.

The Linglong Tower of Zhenshi is nothing more than a piece of cake to him.

Although in terms of value, the three-star Chaos Beast Crystal Core is definitely not as good as a mid-grade immortal weapon.

Even if it were a mid-grade immortal weapon from Poyun, it couldn't be compared.

But for Zhang Yuhe, what suits him is the best.

Currently, only the three-star Chaos Beast Crystal Core can be of great help to him.

Seeing the Zhenshi Linglong Tower, everyone's hearts couldn't help but feel hot.

They all sent messages to Zhang Yuhe, wanting to exchange other items.

Some people proposed to exchange for second-level immortal materials, while others promoted the exchange for special magical powers and secret methods.

But they were all rejected by him.

His goal is very clear, only to exchange for the three-star chaos beast crystal core.

However, after a long time, no one was able to take out a three-star crystal core.

This made Zhang Yuhe a little disappointed.

But it was normal.

All the people present were True Immortals.

Most of them could not even beat the most common one-star Chaos Beast.

Not to mention the three-star Chaos Beast.

Unless they were the geniuses among the True Immortals.

Otherwise, let alone killing the three-star Chaos Beast.

Being able to escape from the hands of the three-star Chaos Beast was enough for them to brag about for the rest of their lives.

Zhang Yuhe wanted to exchange the three-star Chaos Beast crystal core from these people.

It was indeed difficult.

In fact, the best way was to find a Golden Immortal to exchange.

Unfortunately, Patriarch Song Heguang was not in the city.

He did not know any of the other Golden Immortals in the market.

Even if he wanted to exchange, he had no way.

So, he had no choice but to try at the trade fair.

Even if he could not exchange the three-star Chaos Beast crystal core this time, it didn't matter.

After the news spread.

There will always be someone who comes to him and wants to exchange with him.
