Chapter 177

Talent is innate, and he has never seen the so-called heavenly treasures that can change fate.

Every cultivator who can cultivate to the true fairyland is almost a person with outstanding talent.

However, compared with people in the lower world.

Most people in the fairyland are not bad in talent, and there are even no mortals who cannot cultivate.

Everyone born in the fairyland will be born with a certain spiritual root qualification.

Ninth-grade spiritual roots can be regarded as peerless geniuses in the lower world, but in the fairyland, it can only be regarded as relatively good.

Even spiritual body cultivators are not too rare in the fairyland.

The concept of genius is naturally different in different levels of the world.

It is precisely because of this that there are so many true immortals in a small place like Ji'an Sea.

And there are not a few golden immortal cultivators.

...

Zhang Yuhe came to the small pavilion on the lake.

He waved his hand, and a set of tea sets were neatly placed on the stone table.

He picked up the teacup and took a sip gently, and began to think quietly about the subsequent cultivation plan.

It took him tens of thousands of years to break through to the late stage of True Immortal.

So if he wants to break through to the Great Perfection of True Immortal, it may take more than ten thousand years.

This cultivation speed is too slow.

Zhang Yuhe thought, should he find a way to get a pill recipe to increase immortal energy?

For example, a pill recipe like Yunshen Xiandan.

If there is a similar immortal pill to assist, his cultivation speed can be improved a lot.

Otherwise, relying only on the assistance of immortal spirit stones is too slow.

There are many ways to improve the cultivation speed of True Immortal, but most of them are not practical.

For most True Immortals.

The best way is to open the three orifices or continue to take immortal pills.

Zhang Yuhe has completed the opening of the Yuanying orifice.

If you want to open the fourth orifice, you have to wait until you become a Golden Immortal.

The only way now is to find a suitable pill recipe.

But he also knows that this kind of thing depends on chance, and you can't find it if you look for it deliberately.

In the fairy world, even the most common immortal-level pill recipes are mostly controlled by those super powers.

It is rarely circulated to the outside world.

Since Zhang Yuhe ascended to heaven, the only elixir he has refined is the Huiling elixir.

It's not that he doesn't want to refine other elixirs.

But there is no elixir formula.

Without the corresponding elixir formula, he doesn't even know what materials to collect.

"Hey, take your time."

Thinking of this, he couldn't help but sigh.

He is now in the late stage of the True Immortal.

With such strength, he can completely protect himself in the Ji'an Sea.

If he activates the Hunyuan Guiyi magical power and goes all out.

Even if it is an ordinary Golden Immortal cultivator, he has the confidence to kill him.

"Let's deduce the formation for the time being."

Thinking about the future cultivation plan, Zhang Yuhe decided to deduce and improve the Renshui Absorbing Thunder Formation first.

He should also make some preparations for the future Golden Immortal Great Tribulation.

There are also heavenly tribulations in the fairy world.

Whenever an immortal breaks through a great realm, a heavenly tribulation will come.

In order to deal with the heavenly tribulation, the immortals have thought of various ways.

For example, refining defensive immortal tools, defensive immortal armor, and preparing immortal pills for recovery and healing.

However, the best way to deal with the heavenly tribulation is the immortal formation.

It is said that some super powers in the immortal world will have a tribulation platform.

There are powerful magic formations arranged on it, which can assist immortals in tribulation.

Of course, no force in the Ji'an Sea has such advanced things as the tribulation platform.

Zhang Yuhe is very satisfied with the Renshui Thunder Absorption Array.

He thought that if the Renshui Thunder Absorption Array could be deduced to the immortal level.

It should help him survive the Golden Immortal Tribulation.

He even considered.

Once the Renshui Thunder Absorption Array is successfully deduced, he can try to build a tribulation platform in the Daosheng Sect.

If this can be done.

Then there will definitely be more Golden Immortal cultivators in the Daosheng Sect in the future.

But that is all for the future.

Without sufficient strength to support, even if he can arrange the tribulation platform, he will not do it.

Because that will only attract the covetousness of other forces, which is a way to bring disaster.

...

In addition to deducing the formation, the matter of comprehending the third law should also be arranged on the agenda.

However, this matter is not the time yet.

Because once he begins to comprehend the law, it is easy to immerse himself in it.

Just like before, he cannot perceive what is happening in the outside world.

He doesn't even know that others have sent him a message.

If something big happens, it will be missed.

After ten thousand years of peace.

The relationship between Daosheng Sect and the Ouyang Family and the Qian Family has gradually become tense again.

Especially in the past few hundred years, the Ouyang Family has begun to frequently attack Daosheng Sect.

They not only attacked the True Immortal disciples of Daosheng Sect who went out, but also seized several small islands outside Daosheng Sect.

The current situation is already stormy.

Anyone with a discerning eye can see it.

Perhaps it won't be long before a super war will inevitably break out in the Ji'an Sea, which has been peaceful for many years.

In order to strengthen the defense of the sect, Daosheng Sect recalled the disciples scattered everywhere.

Even Song Heguang, who was in charge of the market, returned to Yunfei Island a hundred years ago.

Currently, there are only him and Xie Mingyuan left in Daosheng Sect in the market, plus a small number of disciples below the level of True Immortal.

In this situation.

Zhang Yuhe dared not immerse himself in the comprehension of the law.

Once the war broke out, he might be needed to go back to support the sect.

Even if he didn't need to support the sect, he didn't dare to retreat deeply.

What if the Ouyang family and the Qian family were so angry that they fought directly in the market.

Taking advantage of his retreat to attack, wouldn't it be a big deal?

At that time, not only would all his comprehension be wasted. And the interruption of retreat would cause great damage to him.

So Zhang Yuhe planned.

In the next time, he would slowly deduce the Renshui Thunder Absorption Array while observing the changes in the external situation.

At the same time, he would collect intelligence from the Ouyang family and the Qian family through various means.

In that way, once the fight started, he would know how to deal with it and what to choose.

"I hope the Ouyang family will not seek death."

Zhang Yuhe's expression was sharp, and he muttered to himself.

If the Ouyang family really wanted to seek death, he didn't mind killing a golden immortal to sacrifice the flag.

...

Chapter 161 The Battle Begins

Zhang Yuhe sipped his tea while quietly thinking about the future direction of his cultivation.

After sorting out his thoughts, he returned to the cave and came to the side hall on the left side of the cave.

A long stick that exuded a mysterious aura was standing on a high platform in the center of the side hall.

It was the Nine Heavens Flying Spirit Stick.

Zhang Yuhe had high expectations for this innate treasure.
