

## Top talent 19

### Section 19

Not only should he adjust his state, but he should also prepare the foundation-building pills and various pills to replenish spiritual energy in advance.

However, Zhang Yuhe did not prepare anything. He just wanted to verify whether the Hunyuan Heavenly Scripture could really be practiced.

Who knew that this verification would directly enter the foundation-building state, which was a bit difficult to get off. Now he could only grit his teeth and persevere.

The surrounding spiritual energy swarmed in, and then turned into drizzle and sprinkled on the dantian.

Time passed slowly, and as the spiritual energy continued to liquefy, the originally gray dantian had turned into a vast ocean.

Dantian is like the sea.

Zhang Yuhe checked his own state, and then opened his eyes with a happy face.

"Haha, it's done."

The immortal foundation has been built, and it will be a smooth road from now on.

...

### Chapter 18 The revival of spiritual energy

Feeling the breath in the dantian, like the vast ocean, Zhang Yuhe was extremely excited, but at the same time he had some questions.

According to his understanding, when a cultivator just builds a foundation, the liquefied spiritual energy in the dantian varies according to the practice method and personal talent.

It is only about half an acre to two or three acres, but his Dantian is now a boundless sea.

It is very exaggerated.

"Is it because of the Hunyuan Heavenly Scripture, or is my talent too amazing? Or both factors?"

Zhang Yuhe guessed silently.

"Forget it, don't think about things that you can't figure out, try your current strength."

Although he has read countless classics in the library, his situation has never been recorded in the book.

Zhang Yuhe did not struggle, and a strong foundation is undoubtedly a good thing.

Walking out of the pavilion, Zhang Yuhe stood on the top of the Yinhe Peak and pointed forward.

Boom...

A huge stone in the distance was instantly cut in two.

Gengjin Sword Pointing.

This is the basic magic he learned in the library, and the power he exerted for the first time is much stronger than he imagined.

"If I could learn magic when I was in the Podao Temple, then killing monsters would be like cutting vegetables?"

Thinking of holding a long knife and killing monsters in the barren mountains, Zhang Yuhe couldn't help but want to laugh.

Now is the real cultivation of immortality. I was just a reckless man back then, too LO.

Then Zhang Yuhe tried several other basic techniques, and the results made him very satisfied.

Although it was only the most basic technique in the world of cultivation, the power he displayed was still considerable.

Zhang Yuhe has now successfully built his foundation, and he should be able to learn more advanced magical powers.

However, he has no merits, and he needs merits to learn the magic skills of the higher grades.

But he is not in a hurry, anyway, he does not plan to go out to kill monsters, and does not need powerful magical powers for the time being.

Zhang Yuhe had already planned to cultivate on the Yinhe Peak for a hundred years, and when it is his turn to go out to guard, he will go to the book building to exchange two magical powers.

As an inner disciple, although he does not need to do tasks at ordinary times, he needs to go out to guard every hundred years.

Daosheng Sect divides the entire Yufantian into ninety-nine states, each state has about ten prefectures, and each prefecture needs inner disciples to sit in, and rotate every hundred years.

In other words, Zhang Yuhe currently has only a hundred years of cultivation time. After a hundred years, the sect will assign him a guarding position.

Going out to guard is not as safe as being in the sect, and you may encounter danger.

Zhang Yuhe plans to quietly cultivate for a hundred years to improve his strength, and then learn magical powers and prepare magic weapons.

"Continue to practice."

Just as he returned to the pavilion and prepared to continue practicing, a message suddenly appeared in his mind.

[Feixiantai is short of spiritual energy, please log off in time. ]

There is also a five-minute countdown reminder.

"Uh, has it been a hundred days?"

He almost forgot that he was a player and could only stay in Yufantian for a hundred days each time he went online.

Offline.

Zhang Yuhe summoned the game system and chose to log off.

After a period of time and space conversion, he found that he had returned to the room.

Looking at the familiar environment in front of him, Zhang Yuhe felt a little like a world away.

He took out his mobile phone to check, and it was indeed only twelve hours.

"What a wonderful journey."

Recalling his experience in Yufantian for a hundred years, Zhang Yuhe sighed silently.

He waved his right hand, and an exquisite flying sword floated quietly in front of him.

Then he looked at his left hand again, and the storage ring was worn on his hand.

"Damn, the strength and items in the game can really be brought to the real world."

"There won't be any trouble when the immortals come to the real world, right?"

At this time, Zhang Yuhe didn't know what to think.

Silently feeling himself, the dantian still exuded a surging breath like the sea.

"Forget it, why think so much, anyway, it's impossible for someone to practice faster than me, even if the world is in chaos, it won't affect me."

Zhang Yuhe turned his head to look at the Feixiantai on the desk, and suddenly found a trace of spiritual energy slowly gathering towards the Feixiantai.

This made him astonished.

"Blue Star also has spiritual energy?"

Zhang Yuhe quickly ran the Hunyuan Tianjing, and sure enough, spiritual energy began to gather towards him.

However, compared with the Yufantian world, the spiritual energy of Blue Star seemed very thin, and the effect of cultivation was very poor.

Zhang Yuhe stopped practicing and looked at the Feixiantai on the desk seriously.

He had some understanding of the general principle of this thing.

In his opinion, Feixiantai was equivalent to an alternative teleportation array.

By absorbing the spiritual energy of the Blue Star, the player is transported to the Yufantian world.

It takes twelve hours to charge and twelve hours to run. It is very magical.

"See what is happening in the outside world?"

Zhang Yuhe quickly picked up his mobile phone and logged into the game forum.

The fastest way to understand the current situation is of course to go online.

At this time, the Yufantian forum was very popular, and the post page had already exceeded 999+.

The first post had a large title.

[Spiritual energy is revived, immortal cultivation is coming, and it is urgent to establish the Blue Star Immortal Cultivation Alliance. ]

Zhang Yuhe clicked on the post to view.

According to the description of the poster, the spiritual energy of the Blue Star has been fully revived. Although the spiritual energy is far less than that of the Yufantian world, it is strong enough to support cultivation.

Since humans can cultivate, can the various beasts in the Blue Star also evolve? Will they become ferocious monsters?

The poster called on all players to unite and establish the Blue Star Immortal Cultivation Alliance. While everyone is improving their strength in Yufantian, they will monitor the situation of wild beasts in the wilderness of the Blue Star.

Prevent wild beasts from evolving rapidly and invading the living place of humans.

The poster also mentioned that he has the eighth-grade water spirit root and has cultivated to the first level of Qi Refining.

There were countless replies below the post.

"Spiritual energy revival? Doesn't that mean that everyone can cultivate?"

"You wishful thinking, cultivating immortals requires spiritual root qualifications. Even in Yufantian's world, mortals are the majority, and the number of cultivators is less than one in ten thousand."

"It's over, it's over, will there be monsters attacking our city in the future?"

"Don't worry, I will take action when that day comes."

"You are just a weak chicken, you won't use the keyboard to attack."

"Haha, the keyboard saint is invincible."

"I am not very worried about the wild monsters on Blue Star. After all, the beasts start the same as us, and the evolution speed should not be faster than our cultivation. I am only worried that the monsters and natives of Yufantian will invade Blue Star. . "

"Think too much, the Blue Star is a tiny place, not even as good as Yu Fantian's one prefecture, how could people look down on it."

"That's right, it's just groundless worry."

"Why think so much, if that day really comes, everyone just lie down, don't struggle."

"Haha, the buddy above is right, the power of the immortal world is far beyond our imagination, Yu Fantian can flatten us all with any Yuanying boss, so don't think about it, just practice well."

"I support the poster, let's unite and practice, create an immortal alliance, and jointly protect the Blue Star."

"Support +1."

...

Closing the post, Zhang Yuhe was thoughtful.

He also felt that some of the poster's words made sense.

Since the spiritual energy has revived and humans can practice, then the beasts in the wilderness can naturally evolve.
