Chapter 194

"If that's the case."

"Doesn't that mean that among the Chaos Beasts, there are existences that transcend the Dao Ancestor Realm?"

...

Chapter 174 Introduction to Space Laws

According to Zhang Yuhe's understanding.

Chaos beasts with one to three stars correspond to monks in the True Immortal Realm, and chaos beasts with three to six stars correspond to golden immortal monks.

Stars seven to nine correspond to Taiyi Immortal.

The Chaos King Beast corresponds to the Daluo Immortal among the monks.

Further up, there is the Chaos Beast Lord, corresponding to the Dao Ancestor Realm.

As for the Chaos Supreme, he had never heard of it at all.

Zhang Yuhe felt that if among the chaotic beasts, there were existences beyond the Tao Ancestor realm.

So why can monks in the fairy world fight against chaos beasts?

Zhang Yuhe looked at Yu Liwei, wanting to get the answer from her.

However, Yu Liwei shook her head.

She said slowly.

"I've never heard of Chaos Supreme either."

"But judging from the Taoist rhyme spread in the stone tablet, we can know how powerful this technique is."

"It's a pity that after acquiring this technique, Lu Yunfei and I studied it for a long time."

"Other than knowing the name of the technique, which is called the Hunyuan Heavenly Scripture, no more information can be obtained."

"Later, Lu Yunfei used an incarnation to bring the stone tablet recording the first volume of the Hunyuan Scripture to the lower realm."

"The first is to store the two stone tablets separately to ensure safety."

"Secondly, he thought about whether he could find a way to practice the Hunyuan Heavenly Scripture in the lower realm."

Having said this, Yu Liwei looked at Zhang Yuhe, and then continued.

"I didn't expect that after millions of years, there would really be someone who could successfully practice the Hunyuan Heavenly Scripture."

Hearing this, Zhang Yuhe fell into deep thought.

He originally thought that the Hunyuan Heavenly Scripture might be a technique passed down by a certain Taoist ancestor.

Unexpectedly, it actually came from the Chaos Beast.

Speaking of which, do Chaos Beasts also have techniques?

He has never heard of it.

Chaos beasts follow the path of sacrifice and evolution, not the path of cultivation.

Thinking of this, Zhang Yuhe asked Yu Liwei.

"Isn't it said that Chaos Beasts evolved through sacrifices and gradually became stronger? They can also practice exercises?"

Yu Li shook her head slightly and did not answer.

Obviously, she didn't know much about this matter.

After a long time.

Yu Liwei said slowly.

"You must keep your practice of the Hunyuan Scripture as a secret as much as possible."

"Lu Yunfei still doesn't know where he is trapped. Maybe he will need you to rescue him in the future."

"But you don't have to worry too much. The monks in the immortal world are more united than you think."

"After all, there are only a few frogs in the well like the Ouyang family and the Qian family."

"They can only jump a few times in small ponds like this in the Ji'an sea area."

"The outside world is very vast, not comparable to the Ji'an Sea. The Chaos Continent is the stage for monks."

"It's a pity that Taiyi Immortal has never been born in our Ji'an sea area."

"I cannot lead everyone to establish a fairy city in the Chaos Continent and gain a firm foothold."

"At the beginning, Lu Yunfei was arrogant and proud. He established the Immortal City in the Chaos Continent with the Golden Immortal Dzogchen cultivation base."

"As a result, a great catastrophe came, and the fairy city was attacked by the chaos beasts, causing heavy losses to all forces in the Ji'an sea area."

"Even the Dao Sheng Sect almost came to an end."

"Practice hard."

After Yu Liwei finished speaking, she slowly walked outside the hall.

Zhang Yuhe thought quietly.

The amount of information just now was a bit much and he needed some time to digest it.

...

After the two major families were destroyed, the Daosheng Sect took over the territory of the Ouyang family.

The Nine Immortals Gate takes over the territory of the Qian family.

They did not continue to expand, which made everyone in the Ten Thousand Beast Sect heave a sigh of relief.

Three thousand years later.

Galaxy Island, Galaxy Peak.

After the Ouyang family was destroyed, the Daosheng Sect renamed Tianchen Island Galaxy Island.

Zhang Yuhe and Xie Mingyuan led some sect disciples to permanently guard the island.

Although the resources on the island were basically plundered by the two of them.

But Galaxy Island itself is also a very important resource.

Galaxy Island is vast, with a radius of hundreds of thousands of miles, allowing a large number of monks to thrive.

The most important thing is that there is a second-order fairy spirit vein on this island.

Naturally, Dao Sheng Sect would not abandon such an important place casually, but would make full use of it.

Zhang Yuhe walked out of the cave and stood at the top of Galaxy Peak, with a look of joy on his face.

He muttered to himself.

"It took three thousand years to finally understand the laws of space."

Zhang Yuhe quickly jumped into the air and flew into the distance as fast as lightning.

With the blessing of space laws, his current flying speed is at least ten times higher than before.

Of course, accelerating flight speed is only the beginning of utilizing the laws of space.

The real role of space law is still reflected in combat.

For example, space confinement, space cutting, etc.

If used in conjunction with the Law of Time, the power will be greatly increased.

However, right now, he has only just begun to understand the laws, and many methods are not yet available for him to use.

As the law is understood more deeply, the power of the Supreme Law will become more terrifying.

Seeing the effect of the Space Law, Zhang Yuhe was extremely happy.

These three thousand years were indeed not in vain.

After the war ended, he stayed on the Yinhe Peak, observing the space rhyme on the Wanlingtu.

It was not until recently that he finally comprehended the space law.

So far, he has mastered the three supreme laws of power, time, and space.

If other cultivators knew, they would be jealous and crazy.

Although cultivators can comprehend one more law for each acupoint they open.

But everyone has limited time, so how can they have so much time to comprehend the law?

Most cultivators will try their best to spend their time on cultivation.

After all, cultivation is the foundation.

Comprehending the law takes too much time, and there is no accuracy.

Some cultivators with good comprehension may only need thousands of years to comprehend an ordinary law.

Many cultivators with poor comprehension may not be able to touch the threshold of the law even after spending tens of thousands of years.

Therefore, everyone will spend time on comprehending the law only when they encounter a bottleneck in cultivation.

As long as they can still practice normally, everyone will focus on cultivation.

But Zhang Yuhe is different.

He has not encountered any bottlenecks in his cultivation so far.

Moreover, his comprehension is extraordinary, so he does not need to worry about not being able to comprehend the laws.

It is nothing more than spending more time.

After entering the three supreme laws, the matter of the laws has come to an end for the time being.

Although the tree of laws will continue to grow if he continues to comprehend.

But there will be no qualitative change.

If he wants to comprehend the laws to the level of minor success, he must wait until he breaks through to the Golden Immortal.

There are only two problems facing Zhang Yuhe now.
