

## Top talent 195

### Section 195

One is to improve your cultivation to the level of True Immortal Dzogchen.

The other thing is to consider the issue of the Golden Immortal Tribulation.

I have experienced many times of tribulation in the lower realm.

Zhang Yuhe didn't dare to take it too seriously about overcoming the tribulation.

Who knows what kind of perverted disaster it will cause when he breaks through the golden fairyland.

Without adequate preparation, he would not dare to break through the tribulation easily.

It would be funny if he was killed by a catastrophe.

After ascending to the fairy world, he no longer had the game panel.

There's no way to resurrect him if he's dead.

In fact, even when Yu Fantian was still alive.

Zhang Yuhe also cherished his life.

He will never seek death based on his identity as a player.

Even when faced with the invasion of demons, he did not resort to self-destruction tactics.

He believes that this is a spiritual pursuit.

Depending on the player's identity, if you get used to it, you may eventually go astray.

...

## Chapter 175 Refining Blueprints for Low-grade Immortal-Destroying Cannon

Zhang Yuhe stood on the top of Galaxy Peak and looked at the entire island.

I saw constant exchanges of people on the island, and gradually restored its former prosperity.

Although he has been stationed here for nearly three thousand years, he has not intervened in the specific affairs of Galaxy Island.

In fact, it's not just him.

Even Xie Mingyuan, who was on Galaxy Island, had no idea what was going on here.

They just need to sit on the island.

Those Dao Sheng Sect disciples who are under the True Immortal will naturally handle the affairs on the island well.

For them, cultivation is the most important thing.

Whether it's Zhang Yuhe or Xie Mingyuan.

Their goals are clear.

The next step is to aspire to the Golden Wonderland.

Only by cultivating to the Golden Immortal Realm can one be considered a minor player in this immortal world.

True Fairyland is still a bit too weak.

Once out of Ji'an sea area, it is nothing.

But Zhang Yuhe thought about it.

Before practicing, let's look at the harvest first.

After throwing all the things into the Wanling Diagram, he didn't pay attention to it anymore.

First, he went back to the sect and was busy for a while, then came to Galaxy Island and went into seclusion to understand the rules.

He really hadn't looked carefully at how much he had harvested.

Because there are just too many things.

Zhang Shen has been classifying and organizing them in Wan Ling Tu.

Now that three thousand years have passed, it should have been sorted out.

Zhang Yuhe presented the Ten Thousand Spirits Map.

After casting a spell, he stepped into it.

Saw Zhang Yuhe coming in.

Zhang Shen immediately ran over and shouted respectfully.

"I've met my lord."

Then he laid out a long list of various storage equipment like a treasure offering.

"Sir, everything is here, sorted and sorted."

"In addition, those elixirs, herbs, and trees have been planted by me in various places in the Wanling Map."

Zhang Yuhe nodded, took the storage equipment and looked at them one by one.

Several of the storage bracelets are all filled with fairy stones.

He made a rough estimate.

All the immortal spirit stones added together are probably around 5 billion.

So many fairy stones placed together look like giant mountains.

Very exaggerated.

Although Zhang Yuhe had already been mentally prepared.

But when he saw so many fairy stones, he still felt very shocked.

The Ouyang family's three million years of accumulation allowed him to make a super windfall fortune.

There is literally too much money to spend.

This is just a fairy stone.

He continued to pick up the storage rings and looked down one by one.

A variety of refining materials.

From the mortal level to the immortal level, there are countless.

Zhang Yuhe didn't even take a look at those mortal materials.

These things are of no use to him.

Forget about leaving it to the Tao Sheng Sect's treasure house from now on.

After all, most of the sect's disciples are still below true immortals.

These things are of no use to him.

For disciples below the level of True Immortal, it is a rare treasure.

There are also a lot of materials for immortal level weapon refining, probably as many as a thousand copies.

With some auxiliary materials, it can be enough to refine thousands of low-grade immortal weapons.

However, most of these materials are first-grade Immortal level.

As for the immortal materials that can be used to refine middle-grade immortal weapons, there are only three types in total.

Xian'er materials are extremely rare in the Ji'an sea area.

After the monks break through to the Golden Immortal, they usually go to other sea areas or venture to the Chaos Continent.

If you stay in the Ji'an sea area, you may not even be able to get a middle-grade immortal weapon.

Middle-grade immortal weapons correspond to golden immortal monks.

It is rare in Ji'an waters.

Zhang Yuhe continued to look down.

There are not many finished artifacts, only about a dozen.

The Ouyang family mobilized in large numbers, and almost all the True Immortal monks participated in the attack on Dao Sheng Sect.

Therefore, they basically took away all the finished fairy weapons in stock.

These finished artifacts were probably seized by Lian Zhengyu and Yu Liwei.

Thinking of this, Zhang Yuhe couldn't help but feel a little regretful.

I made less money.

Suddenly, when he opened one of the storage rings.

I saw that there were piles of various jade slips inside.

From the most common yellow-level skills and magical powers to the immortal-level skills and magical powers, they all have it.

Zhang Yuhe was amazed by the rich content.

The Ouyang family is worthy of being one of the five major forces in the Ji'an sea area.

With these jade slips of skills and magical powers, it would not be a problem to rebuild a power.

"I will check them slowly when I have time."

There are too many jade slips.

Zhang Yuhe did not check them one by one.

These are regarded as the knowledge reserve for the future.

When he plans to deduce magical powers next time, he will check them slowly.

He opened the last storage ring.

There were still various jade slips inside.

Zhang Yuhe took a rough look.

They were basically some jade slips of skills such as pill recipes and refining drawings.

"Hey, what kind of jade slip is this?"
