Chapter 196

Suddenly, on the top of a pile of jade slips, a golden jade slip stood out.

Zhang Yuhe reached out to take out the jade slip and released his spiritual sense to check it.

After reading the contents of the jade slip, he couldn't help but be overjoyed, muttering to himself.

"It turned out to be the refining blueprint of the low-grade Immortal-killing Cannon?"

Although the low-grade Immortal-killing Cannon can't kill the Golden Immortal cultivator with one shot like the middle-grade Immortal-killing Cannon.

But if there are more of them, they are also powerful.

Dozens of low-grade Immortal-killing Cannons are deployed, and the Golden Immortal cultivators still have to retreat.

Of course.

The invention of the Immortal-killing Cannon was never intended to deal with cultivators.

It was to deal with those Chaos Beasts with thick skin and flesh.

The low-grade Immortal-killing Cannon can kill Chaos Beasts below three stars.

Although it can't kill with one shot.

But it can still kill with a few shots.

Compared to the magical weapons of the True Immortals, the Immortal-Destroying Cannon is the most effective weapon for cultivators to deal with Chaos Beasts.

After seeing the refining drawings of the lower-grade Immortal-Destroying Cannon, Zhang Yuhe fell into deep thought.

If it was just a normal fight.

He didn't take ordinary Golden Immortals seriously at all.

He could easily kill them.

Even if it was a master in the middle stage of the Golden Immortal, he could probably fight him to a draw.

At least he wouldn't suffer too much.

If he fully activated the magical power of Hunyuan Guiyi, he could probably kill even a late Golden Immortal.

Logically speaking.

The lower-grade Immortal-Destroying Cannon should be basically useless to him.

It can only deal with things in the True Immortal Realm, what use can it have?

He could kill a large number of True Immortals with just a slap.

But thinking about the future, he still had to go to the Chaos Continent.

Zhang Yuhe carefully put away the drawings.

He could kill a large number of True Immortals with a slap.

But if he faced Chaos Beasts, it would probably not work.

Chaos beasts are as big as mountains.

Even Chaos beasts below three stars are not so easy to kill.

If there is the help of the Immortal-Destroying Cannon, it will be different.

And Zhang Yuhe is ambitious.

He plans to follow Lu Yunfei's example and build an immortal city in Chaos Continent in the future.

Once the immortal city is built, the Immortal-Destroying Cannon will be an indispensable means of defense.

The Immortal-Destroying Cannon is very complex and difficult to refine.

And it also requires a lot of materials.

Among them, there is a core material called Shengyang Sand, which is extremely precious.

At least he has not seen this material so far.

But Zhang Yuhe is not in a hurry.

He has no plan to go to Chaos Continent now.

If he wants to go to Chaos Continent, he must at least wait until he breaks through the Golden Immortal Realm.

Let's talk about it after he survives the Golden Immortal Heavenly Tribulation.

...

Chapter 176 True Immortal Great Perfection

After checking all the items roughly.

Under the leadership of Zhang Can, Zhang Yuhe walked everywhere in the Ten Thousand Spirits Map.

Looking at the spiritual herbs and medicines planted in various places, he could not help but feel very satisfied.

Spiritual herbs below the immortal grade are not counted.

There are hundreds of spiritual herbs and medicines of the first immortal grade alone.

Some of the spiritual herbs have reached the mature year, but they have not been picked.

Because he does not have the recipe now.

He cannot refine the immortal pill, so he can only let these spiritual herbs and herbs continue to grow.

Anyway, there are only benefits and no harm in growing them longer.

The recipes of the immortal world are more precious than Zhang Yuhe imagined.

Even if he searched the entire Ouyang family, he only found the recipe of Huiling Xiandan.

However, he had already obtained this recipe in the market.

It is a duplicate recipe and has no use at all.

As for the recipe he expected, similar to Yunshen Xiandan, which can enhance the immortal power.

It is estimated that the Ouyang family does not have it either.

Anyway, he has never found it.

After roughly inspecting the spiritual herbs and medicines in the Wanlingtu, he returned to the cave.

Zhang Yuhe walked to the training platform and sat cross-legged.

He muttered to himself.

"It's time to practice well."

He slowly circulated the Hunyuan Heavenly Scripture, and the surrounding immortal spirits instantly swarmed towards the training platform.

...

Spring went and winter came, and another ten thousand years passed.

During these ten thousand years, the Daosheng Sect flourished and absorbed a lot of fresh blood.

The number of true immortal disciples in the sect has grown to more than 300 people.

Compared with before, it has more than doubled.

Some of these people were originally casual cultivators in the Ji'an Sea Area. After being assessed, some people with good character were absorbed into the sect.

In order to maintain the increasingly large territory of the Daosheng Sect.

Some true immortal disciples were promoted from the original Mahayana disciples of the sect.

After resolving the threats from the Ouyang Family and the Qian Family, the Daosheng Sect quickly embarked on the fast track of development.

The resources in the sect were open to the disciples, and some Mahayana disciples took the opportunity to break through to the realm of true immortals.

The only pity is that

During these ten thousand years, the Daosheng Sect did not produce any new Golden Immortal ancestors.

After a cultivator is promoted to a True Immortal, his cultivation progress will be extremely slow.

Every step forward for a True Immortal cultivator is very difficult.

The Ji'an Sea area is located in a remote area, and there are almost no immortal pills and resources that can assist the True Immortal in cultivation.

Everyone can only take one step at a time and slowly break through.

Many True Immortal cultivators will encounter bottlenecks when they reach a certain point in their cultivation.

If there is no special immortal pill to resolve the bottleneck.

They may stay in the current realm forever.

It is because of this.

It is extremely difficult to cultivate to the Golden Immortal Realm in the Ji'an Sea.

Countless True Immortal cultivators can only go to other seas to seek breakthroughs.

...

Zhang Yuhe walked out of the cave gate with a look of joy on his face.

At this time, the aura emanating from his body was already the Great Perfection of True Immortal.

After ten thousand years of cultivation, Zhang Yuhe finally reached the Great Perfection of True Immortal.

Thanks to the second-level immortal vein on the Yinhe Peak, his cultivation speed.

It is much faster than when he was in the market.

Originally, he thought.

It might take more than ten thousand years to cultivate to the Great Perfection of True Immortal.

This is good, saving him thousands of years.

...

Zhang Yuhe stood on the top of Yinhe Peak, quietly thinking about his future arrangements.
