

TOP TALENT, GAME UPGRADE

Section 2

"I don't know if the long sword made by Blue Star can be used after entering the game."

According to "Yufantian", players enter the game in real body.

When entering Yufantian for the first time, the player's clothes, including the items in his hands, will also be reflected in the game world.

Of course, this is only the first time you enter the game, and you can't bring anything in later.

For this reason, Zhang Yuhe specially spent a lot of money to customize this long sword in the style of Tang sword on the Internet.

It cost him 50,000 blue coins.

Although he knew that this might be charged a wave of IQ tax, he accepted it.

Money is something outside of the body. As long as this long sword can help him a little in the game, he is willing to spend any amount of money.

In a word.

Eternal life is priceless.

Even if it is just an illusory possibility.

For this possibility, not only Zhang Yuhe, but almost everyone is willing to fight.

If it weren't for the lack of channels, he would even want to bring firearms into the game.

It's a pity that Blue Star's control over firearms is too strict, and he has no channels at all.

He can't get it at all.

Zhang Yuhe, wearing sportswear, looked at himself carefully in the mirror with a long knife in his hand.

Then he jumped a few times to make sure that his clothes and shoes fit well and there was no discomfort, and then he slowly came to the desk.

"There is one minute left, everything is ready, and the rest depends on God's will."

When the time came to eight o'clock, Zhang Yuhe looked at the Feixiantai on the desk.

Suddenly, the time and space around him changed instantly, and he seemed to have come to another world.

Before he had time to check the surrounding environment.

A mechanical and ethereal voice sounded in his ears.

"Welcome to Yufantian, the talent for cultivation is being activated, please wait."

According to "Yufantian", everyone's talent is innate and almost unchangeable.

On the Blue Star network, it only detects whether everyone has the qualifications for cultivation.

And what kind of talent qualifications can only be truly activated when entering the game.

When the ethereal voice disappeared, a halo that looked a bit like a Bagua plate suddenly appeared under Zhang Yuhe's feet.

After a while, halos of various colors followed the Bagua halo under his feet and rose from time to time above Zhang Yuhe's body.

Bathed in the colorful light, Zhang Yuhe felt nothing at all.

I don't know how long it took, the ethereal voice sounded again.

"The talent and qualifications have been activated. Please check it yourself. I wish you a long life and eternal prosperity in the immortal way."

Immediately after another time and space conversion, Zhang Yuhe found himself in a dilapidated small Taoist temple.

Chapter 2 Top Talent

Zhang Yuhe quickly looked around and confirmed that there was no danger, then he immediately summoned the game system.

He had to see what the immortal cultivation qualifications he had just activated were like.

Although everyone's qualifications are determined at birth.

Just now, he just activated his own qualifications, not drawing a lottery.

But everyone knows that feeling.

It's like holding a lottery ticket in your hand. Although whether you win or not, it has already been determined when you get the lottery ticket.

But the anticipation of scratching the lottery is the most exciting moment.

"I hope it won't be a mortal cultivating immortals."

Zhang Yuhe prayed silently while summoning the game system.

Instantly, a digitized game panel appeared in front of him.

In the middle of the panel is the personal attributes.

Name: Zhang Yuhe

Sect: None

Realm: Mortal

Spiritual roots: Gold (Taoist), Wood (Taoist), Water (Taoist), Fire (Taoist), Earth (Taoist), Wind (Taoist), Thunder (Taoist), Ice (Taoist)

Special physique: Hunyuan Taoism

Luck: Good luck

Comprehension: ???

Skill: Qi-inducing Secret

Magical power: None

"Fuck."

Seeing his immortal cultivation qualifications, Zhang Yuhe was stunned.

"Did I save the Milky Way in my previous life?"

Immortal cultivation qualifications generally refer to the spiritual root attributes of the cultivator. The better the spiritual root, the faster the cultivation speed.

Not only that, the more excellent the spiritual roots are, the less difficulty they encounter in bottlenecks, and it is easier for them to break through the barriers and enter the next realm.

Therefore, Zhang Yuhe looked at the spiritual root attribute at first glance.

According to the description of "Yufantian", spiritual roots are divided into one to nine grades, and above the ninth grade there are earth grade, heaven grade, holy grade, and Tao grade spiritual roots.

Grades one to three are low-grade spiritual roots, which can only be barely used for cultivation, and it is almost impossible to go too far.

After all, not everyone can go against the sky like Han Lao Mo.

Grades four to six are medium-grade spiritual roots, which are already very good qualifications for cultivation.

As long as they work hard and have sufficient resources, cultivators with medium-grade spiritual roots can go a long way on the road of cultivation.

Grades seven to nine are high-grade spiritual roots.

Every cultivator with high-grade spiritual roots is a leader in the world of cultivation.

As long as the mind is normal and hard enough, they will definitely have a place in the world of cultivation.

As for above the ninth grade?

There is only one earth-grade spiritual root in a billion, and only one or two will appear in each immortal cultivation world every once in a while.

And heaven-grade spiritual roots are even rarer to be seen in ten thousand years, and once they appear, they will definitely stand at the top of the world.

Saint-grade spiritual roots and Dao-grade spiritual roots only exist in legends. The website of "Yufantian" only briefly introduces them, and whether they exist is still a matter of debate.

.....

The number of spiritual roots is not important.

Most cultivators have multiple spiritual roots, as long as one of them is good enough.

Looking at his eight spiritual roots, all of which are Dao-grade spiritual roots, Zhang Yuhe couldn't help scratching his head excitedly.

Top talent like him even exceeds the description on the Yufantian website.

"Haha, the way to immortality is today."

With such spiritual root qualifications, the speed of cultivation must be like riding a rocket.

Take off.

He even yearned for whether he could really ascend to the immortal world one day and live forever.

"Can't be arrogant, this is just the beginning, and I haven't figured out the situation yet."

"Maybe this is really just a game, or just a dream."

Zhang Yuhe tried to calm down his excitement.

After all, he had just entered the game, and his understanding of this place was limited to the introduction on the Yufantian website.

Whether the truth is as described on the website is still a matter of debate.

It took a long time. After calming down his excited temper, Zhang Yuhe looked at other places on the attribute panel.

Just now, he was only concerned with the spiritual root attributes, and he really didn't pay much attention to the others.

"Hey, what is this Hunyuan Dao body?"

He carefully recalled the introduction on the website, and it seemed that there was no introduction to special physiques.

"Am I special, different from others, and have something more than others?"

"Well, forget it for now, special things shouldn't be a bad thing."

Let's take a look at the others first.

Lucky attribute, good luck.

According to the description on the website, good luck should be the highest lucky attribute.

But Zhang Yuhe didn't care much about this.

Metaphysics is better to be natural, and not to be taken too seriously.

As long as there are no dark clouds covering the top of the head and the forehead is black, it's fine.

Enlightenment: ? ? ?

What does this mean?
